TO THE MEMBERS OF THE
AMERICAN INSTITUTE OF HEBREW
this volume is respectfully dedicated

Entered according to the Act of Congress in the office of the Librarian of Congress, 1882, by WILLIAM R. HARPER.

PREFACE TO THE SECOND EDITION.

Within twelve months from the time of publishing the first edition of the "Elements of Hebrew," every copy was gone. The favor with which the book was received encouraged the author to undertake the publication of a new edition. This edition is printed, *not published.* The *publication* of a Hebrew grammar presupposes long experience and erudite knowledge. To neither of these does the author lay claim. It is to be understood that the present volume is issued for a special class of men, engaged in a special work. It is, in the nature of the case, imperfect. But while this fact is sorely lamented, and while no excuse for it can be offered, there are reasons which perhaps in some measure may serve to extenuate it. The plan of the grammar is entirely *new.* Years of study and practice are necessary for the full and perfect development of it. The work of preparation has been done in the midst of regular and special duties of the most exacting character. Add also the patience-trying, soul-disturbing difficulties connected with the setting up and electrotyping of Hebrew type, together with the haste made necessary by the daily demands for the book, and perhaps the student will pardon the errors which may arrest his attention.

The "Elements" contains nothing new; it is but a new arrangement of old material. The best grammars have been consulted in its preparation. It is especially indebted to the grammars of Gesenius and Davidson, but valuable aid has been received also from Green, Ewald, Nordheimer, Deutzsch, Kalisch, Bickell and Boettcher.

The system of grammar employed is substantially that of Gesenius.

The method of transliteration, however, differs in some details. It may be said that the book is intended, in some sense, as an Introduction to Gesenius.

The method pursued is the so-called *Inductive.* The first four chapters of Genesis form the basis and a thorough knowledge of these chapters is presupposed on the part of all who undertake the study of it. When these chapters fail to produce examples of a given principle, words are taken from other portions of the Old Testament, and in most cases the book, chapter and verse are indicated. Additional material is furnished by the various Paradigms and the forms taken from them. The principle underlying the whole method is this: *So far as possible let the student master facts before principles; let no principle be presented for his consideration until he has had several illustrations of that principle.* This is the *ideal* plan, and, in the opinion of the author, he who adheres to it most rigidly is the *ideal* teacher.

Instead of adopting a new Paradigm-word for each class of Weak verbs, it seemed best to retain the verb קטל, merely varying it so far as the particular verb under consideration demanded, e. g., Pē Guttural עטל; ʿAyĭn Doubled, קטט; ʿAyĭn Vāv, קול etc. There is no objection whatever to this method. Gesenius adopts it in his treatment of the *Formation of Nouns.* Experience has shown that men learn the verb in this way more rapidly and more thoroughly.

The treatment of the noun is, in substance, that which is found in Gesenius' grammar, in a form, however, more simple and less cumbersome.

For the sake of convenience of reference, those sections of the "Hebrew Vocabularies" which contain the lists of Strong, Guttural, Contracted and Quiescent verbs, occurring between 25 and 5000 times are included in this volume.

It was absolutely necessary to have the grammar ready by Sept. 1st. On this account, it was found impossible to insert the three appendices which belong to it, viz.: I. *The Accents;* II. *Vav Consecutive;* III. *The*

Formation of Nouns. These will be printed, at the earliest possible moment, and will be sent *free of charge* to all purchasers of the grammar.

In the work of revising the sheets and of verifying the references, much valuable assistance has been rendered by Mr. O. O. Fletcher.

The grammar may be obtained only through THE HEBREW BOOK EXCHANGE.

Trusting that the present edition may be received with the same favor as the former one, and that the unavoidable delay in issuing it will be excused, the author places the book in the hands of his pupils.

MORGAN PARK, Sept. 1st, 1882. W. R. H.

TABLE OF CONTENTS.

PART FIRST—ORTHOGRAPHY.

I. LETTERS.

Page.

1. Hebrew Alphabet 10, 11
2. Remarks on Pronunciation 12, 13
3. Remarks on the Letters 12, 13
4. Classification of the Letters 12, 13

II. VOWELS.

5. Vowel-Sounds 14, 15
6. Vowel-Letters 14, 15
7. Vowel-Signs 14, 15
8. Coalition of Vowel-Letters and Vowel-Signs 16, 17
9. The Half-Vowels 16, 17
10. The Syllable-Divider (Sh^{e}va) 16, 17

III. POINTS.

11. Daghesh-Lene 16, 17
12. Daghesh-Forte 18, 19
13. Mappiq and Raphe 20, 21
14. Maqqeph 20, 21
15. Methegh 20, 21
16. Q^{e}ri and K^{e}thibh 20, 21

IV. SYLLABLES.

17. Syllabication 22, 23
18. Kinds of Syllables 22, 23
19. The Quantity of the Vowel in Syllables 22, 23
20. Qamets and Qamets-Hatuph 22, 23

V. EUPHONY OF VOWELS.

21. The Hebrew Vowel-System 24, 25
22. Changes of Vowels 26, 27
23. Insertion of Vowels 26, 27
24. Pause 28, 29

VI. EUPHONY OF CONSONANTS.

25. Assimilation 28, 29
26. Rejection of Consonants 28, 29
27. Addition, Transposition, Commutation 30, 31
28. Peculiarities of Gutturals 30, 31
29. Peculiarities of Quiescents 32, 33

PART SECOND—ETYMOLOGY.

VII. PARTICLES—(Inseparable).

30. The Article 36, 37
31. The He Interrogative 36, 37
32. Inseparable Prepositions 36, 37
33. Vav Conjunctive 38, 39

VIII. PRONOUNS.

34. The Personal Pronoun 38, 39
35. The Pronominal Suffixes 38, 39
36. The Demonstrative Pronouns 40, 41
37. The Relative Pronoun 40, 41
38. The Interrogative Pronouns 40, 41

IX. THE VERB.

39. Roots, Classes 42, 43
40. General View of the Strong Verb: Species 42, 43
41. General View of the Strong Verb: Tenses and Moods 44, 45
42. The Perfect (Qal) 46, 47
43. The Infinitives (Qal) 46, 47
44. The Imperative (Qal) 48, 49
45. The Imperfect (Qal) 48, 49
46. The Participles (Qal) 48, 49
47. The Niph'al Conjugation 50, 51
48. The Pi'el and Pu'al Conjugations 50, 51
49. The Hiph'il and Hoph'al Conjugations 52, 53
50. The Hithpa'el Conjugation 52, 53

X. WEAK VERBS.

51. Classes of Weak Verbs 54, 55
52. Verbs Pe (פ) Guttural 54, 55
53. Verbs 'Ayin (ע) Guttural 56, 57
54. Verbs Lamedh (ע) Guttural 56, 57
55. Verbs Pe 'Aleph (פ"א) 58, 59
56. Verbs Pe Nun (פ"נ) 58, 59
57. Verbs 'Ayin Doubled (ע"ע) 60, 61
58. Verbs Pe Yodh (פ"י) 62, 63
59. Verbs 'Ayin Vav, and 'Ayin Yodh (ע"ו, ע"י) 64, 65
60. Verbs Lamedh 'Aleph (ל"א) 66, 67
61. Verbs Lamedh He (ל"ה) 66, 67
62. Verbs with Suffixes 68-70, 69-71
63. Special Forms 70, 71

XI. NOUNS.

64. Gender, Number 72, 73
65. States 72, 73
66. Ancient Case-Endings 74, 75
67. Suffixes with Nouns 74, 75
68. Stem-Changes 76, 77
69. Declensions of Masculine Nouns 78, 79
70. Declensions of Feminine Nouns 79
71. Irregular Nouns 80
72. Numerals 81

XII. SEPARATE PARTICLES.

73. Adverbs 82, 83
74. Prepositions 82, 83
75. Conjunctions 82, 83

Paradigms 85-110

Verbs occurring 25—5000 times, arranged according to their classification 111-119

[1] This verse contains every letter in the alphabet, and, with a pair of exceptions, every sound in the language.

I. Letters.

1. Hebrew Alphabet.

Initial and medial.	Final.	Sound and sign.	Hebrew name.	Pronunciation of the name.	Signification of the name.	Numerical value.
א		ʾ	אָלֶף	ʾA-lĕph	*Ox*	1
ב		b, bh	בֵּית	Bêth	*House*	2
ג		g, gh	גִּמֶל	Gî-mĕl	*Camel*	3
ד		d, dh	דָּלֶת	Dā-lĕth	*Door*	4
ה		h	הֵא	Hē	*Window (?)*	5
ו		v	וָו	Vāv	*Hook*	6
ז		z	זַיִן	Ză-yĭn	*Weapon*	7
ח		ḥ	חֵית	Hêth	*Fence*	8
ט		ṭ	טֵית	Têth	*Serpent (?)*	9
י		y	יוֹד	Yôdh	*Hand*	10
כ	ך	k, kh	כַּף	Kăph	*Palm of the hand*	20
ל		l	לָמֶד	Lā-mĕdh	*Ox-goad*	30
מ	ם	m	מֵים	Mêm	*Water*	40
נ	ן	n	נוּן	Nûn	*Fish*	50
ס		ṣ	סָמֶךְ	Ṣā-mĕkh	*Prop*	60
ע		ʿ	עַיִן	ʿA-yĭn	*Eye*	70
פ	ף	p, ph	פֵּא	Pē	*Mouth*	80
צ	ץ	ts	צָדֵי	Tsā-dhê.	*Fish-hook*	90
ק		q	קוֹף	Qôph	*Back of the head*	100
ר		r	רֵישׁ	Rêsh	*Head*	200
שׂ		s	שִׂין	Sîn	*Tooth*	300
שׁ		sh	שִׁין	Shîn	*Tooth*	300
ת		t, th	תָּו	Tāv	*Sign* or *cross*	400

2. Remarks on Pronunciation.

1		2	
נָאֶם (Z. 1)	לְעַד (Z. 2)	קוּמִי (Z. 2)	מִשְׁפָּטִי (Z. 3)
אַפִּי (Z. 6)	עֲלֵיהֶם (Z. 5)	כִּי (Z. 3)	תֹּאכַל (Z. 8)
יְהוָה (Z. 1)	חַכּוּ (Z. 1)	קָנָאתִי (Z. 7)	לֶאֱסֹף (Z. 3)
עֲלֵיהֶם (Z. 5)	חֲרוֹן (Z. 6)	כֹּל (Z. 6)	שִׁיחַ (2. 5)

3		4	
בְּאֵשׁ (Z. 7)	יַבְהִל (1. 7)	לֶאֱסֹף (Z. 3)	מִשְׁפָּטִי (Z. 3)
קָבְצִי (Z. 4)	לְעַד (Z. 2)	לִשְׁפֹּךְ (Z. 5)	בְּאֵשׁ (Z. 7)
גּוֹיִם (Z. 3)	לָכֵן (Z. 1)	קִנְאָתִי (Z. 7)	עֵשֶׂב (2. 5)
בְּרֹגַת (1.28)	כִּי (Z. 3)	תֹּאכַל (Z. 8)	שִׁיחַ (2. 5)

3. Remarks on the Letters.

1	2	3	
בְּאֵשׁ (Z.7)	לָכֵן—לִשְׁפֹּךְ (Z.1,5)	כּוֹכָבִים (1.16)	זַעְמִי—חֲרוֹן (Z.5,6)
תֹּהוּ (1.2)	קוּמִי—לְיוֹם (Z.2)	בְּרֹגַת—פְּנֵי (1.26)	מִשְׁפָּטִי (Z.3)
לָכֵן (Z.1)	נְאֻם—לָכֵן (Z.1)	דֶּרֶךְ (3.24)	לְיוֹם—לֶאֱסֹף (Z.2,3)
נְאֻם (Z.1)	אַפִּי—לֶאֱסֹף (Z.6,3)	הָיְתָה—חֹשֶׁךְ (1.2)	לַעַד—קָבְצִי (Z.2,4)
יְהוָה (Z.1)	לְקָבְצִי—הָאָרֶץ (Z.4,8)	וַיְהִי (1.3)	בְּאֵשׁ—שִׁיחַ (Z.7—2.5)

4. Classification of the Letters.

1	2	3
Labials . . . . . פ, מ, ו, ב	Weak: י, ו, ה, א ע, ח, ה, א	Serviles . . . . . א כ, י, ו, ה, ב ת, ש, נ, מ, ל
Dentals or Sibilants . . . . ש, צ, ס, ז	Medium: ר, נ, מ, ל ש, צ, ס, ז	Radicals . . . . . ג ס, ט, ח, ז, ד ר, ק, צ, פ, ע
Linguals . . . ת, נ, ל, ט, ד	Strong: פ, ב ק, כ, ג ט, ת, ד	
Palatals . . . . . כ, י, ג		
Gutturals . . . . ע, ח, ה, א		
(ר is treated as a guttural.)		

2. Remarks on Pronunciation.

1. א (') is a "*soft breathing*," corresponding to *h* in *hour*.
   ה (h) is a "*rough breathing*," corresponding to *h* in *how*.
   ע (') is a sound peculiar to the Semitic, and so difficult of utterance that no attempt is made to reproduce it[1].
   ח (ḥ) is a deep guttural, pronounced like *ch* in German *Buch*.

2. ק (q) has a more forcible utterance than כ (k).
   ט (ṭ) and ס (ṣ) are not, in practice, distinguished from ת (t) and שׂ (s).

3. Six letters have a double pronunciation[2]: ב b, ב bh; ג g, ג gh; ד d, ד dh; כ k, כ kh; פ p, פ ph; ת t, ת th. (See **11.**)

4. שׁ pointed שׁ is sounded *sh*; pointed שׂ, it is sounded *s*.

3. Remarks on the Letters.

1. Words are written from *right to left*, and may not be divided; when it becomes necessary to fill out a line, certain letters are "extended:" א, ה, ל, ם, ת.

2. Five letters have two forms; the second is a final form: כ, ך; מ, ם; נ, ן; פ, ף; צ, ץ.

3. Certain letters, very similar in form, are to be carefully distinguished: ב, כ; ג, נ; ד, ך, ר; ה, ח, ת; ו, י; ז, ן; ט, מ; ס, ם; ע, צ; שׁ, שׂ.

4. Classification of the Letters.

1. *According to their organic formation:*—(1) Labials, (2) Dentals, or Sibilants, (3) Linguals, (4) Palatals, (5) Gutturals.

2. *According to their strength:*—(1) The *weak* letters suffer or occasion *many* changes in the formation or inflection of words; (2) the *medium* suffer or occasion a *few* changes; (3) the *strong* suffer or occasion *no* changes.

3. *According to their functions:*—(1) The *Serviles* are used as prefixes and suffixes in the formation and inflection of words (see Appendix I); (2) The *Radicals* are found *only* in roots.

---

[1] ע had originally two sounds: (1) that of a sharp guttural (related to א, as ח to ה); (2) that of a vibrating palatal sound (cf. the French *r*).

[2] In practice, כ (kh) and כ (k), ג (gh) and ג (g) are not distinguished; ד (dh) is pronounced like *th* in *the*, ת (th), like *th* in *thin*.

II. Vowels.

5. Vowel-sounds.

Primary Vowel-sounds.		A (1st class)	I (2d class)	U (3d class
1. Short vowels	pure	ă	ĭ	ŭ
	deflected	(ĕ, ĭ)	ĕ	ŏ
2. Originally long vowels	pure	â (ô)	î	û
	diphthongal		ê	ô
3. Heightened or tone-long		ā (é)[1]	ē	ō
4. Volatilized or tone-short, called *half*-vowels		ᵉ ᵃ	ᵉ e	ᵉ o

6. Vowel-letters.

5	4	3	1 and 2
תראה thērāé	אלהים ʾelôhîm	קומי qûmî	קאם qâm
עשה ʿôsé	יהי yᵉhî	תהו thōhû	ראש râsh
נעשה nă ʿᵃsé	פרי pᵉrî	ובהו vābhōhû	ראשים rāshîm
יהיה yĭhᵉyé	שלישי shᵉlîshî	רוח rû(ă)ḥ	נא nā
מקוה mĭqvē	פני pᵉnê	אור ʾôr	היתה hāyᵉthā
הנה hĭnnē	שני shᵉnê	טוב ṭôbh	בהמה bᵉhēmā
אהלה[2] ʾŏḥᵒlō	בין bên	יום yôm	קולך qôlᵉkhā
עשה[3] ʿᵃsō	עליהם ʿᵃlêhĕm	זרעו zărʿô	אכלת ʾākhāltā

7. Vowel-signs.

Class.	Long.			Short.			Half.		
A Class	ַ ָ	â, ā	Qāmĕts	ַ	ă	Păttăḥ	ַ ֲ	ᵃ	Simple Shᵉvâ Hāṭĕph-Păttăḥ
I Class	ִ ִי	î	Hîrĕq	ִ	ĭ	Hîrĕq	ִ ֱ	ᵉ	Simple Shᵉvă
	ֵ ֵי	ê, ē	Tsērê	ֶ	ĕ	Sĕghôl	ֶ	ᵉ	Haṭĕph-Sĕghôl
U Class	ֻ וּ	û	Shûrĕq	ֻ	ŭ	Qĭbbŭts	ְ	ᵉ	Simple Shᵉvâ
	ֹ ו	ô, ō	Hōlĕm	ָ	ŏ	Qāmĕts-Hāṭûph	ֳ	ᵒ	Hāṭĕph-Qāmĕts

[1] A diphthongal sound, difficult to classify.
[2] Gen. 12. 8. [3] Gen. 50. 20.

II. Vowels.

5. Vowel-sounds.

1. The *pure* short vowel-sounds are primary ; the *deflected* are related to and derived from the corresponding pure : ă often passing into ĕ, and then into ĭ ; ĕ and ŏ being equally current with ĭ and ŭ.
2. Of the originally *long* vowel-sounds, (1) the *pure* arise by duplication of short (ă + ă = â, etc.), or by coalescence of a short with its corresponding consonantal sound (ĭ + y = î, ŭ + v = û); (2) the *diphthongal*, from the combination of ă with ĭ or y, or of ă with ŭ or v.
3. The *heightened* or *tone-long*, originally short, arise from their proximity to the tone or accent of the word.
4. The *volatilized* or *tone-short*, not vowels but *half*-vowels, are occasioned by their distance from the tone or accent of the word.

6. Vowel-letters.

Originally vowel-sounds were indicated *only* by certain feeble consonant-sounds, א, ה, ו, י, hence called *vowel-letters*. Of these,

1. The *guttural* א indicated the guttural sound ā (seldom â) when *medial* (and sometimes when final)[1] ;
2. The *guttural* ה indicated the guttural sound ā, when *final* ;
3. The *labial* ו indicated the labial sounds û, ô ;
4. The *palatal* י indicated the palatal sounds î, ê ;
5. The letter ה sometimes also indicated é, ê, ô when final.

Remark 1.—A-sounds are indicated *rarely* when medial, and *not uniformly* when final.

Remark 2.—I-sounds and U-sounds are indicated *generally* when medial, *always* when final.

Remark 3.—When medial, *pure* long diphthongals (ê, ô) are indicated, but not *tone*-long (ē, ō).

7. Vowel-signs.

When the Hebrew ceased to be a spoken language this indication of the vowel-sounds by the vowel-letters was insufficient ; hence arose the so-called Massoretic system of vowel-signs which have the following pronunciation :

◌ָ (â, ā) as in *father*	◌ַ (ă) as in *hat*	◌ְ (ᵉ) has the sound of a very short *u*, like *e* in *below*.
◌ִ (î) as in *machine*	◌ִ (ĭ) as in *pin*	
◌ֵ (ê, ē) as in *they*	◌ֶ (ĕ) as in *pen*	◌ֲ, ◌ֳ, ◌ֱ (ᵃ ᵉ ᵒ) have the same sound as ◌ַ, ◌ִ, ◌ֶ, but are hurried in the pronunciation.
◌ֻ (û) as in *true*	◌ֻ (ŭ) as in *put*	
◌ֹ (ô, ō) as in *note*	◌ָ (ŏ) as in *on*	

Remark 1.—The Massoretic system of vowel-signs is purely phonetic.

Remark 2.—The points are generally written beneath the letter after which they are pronounced, but Hōlĕm is written above its letter and Shûrĕq is written in the bosom of Vāv.

---

[1] This does not include those cases in which א loses its consonantal character and quiesces (see).

8. Coalition of Vowel-letters and Vowel-signs.

(10.14)[1] קָאם	(1.15) מְאוֹרֹת	(2.13) הַסּוֹבֵב	(2.17) תָּמוּת	(2.7) וַיֵּיצֵר
(קָם)	(1.16) מְאֹרֹת	(2.11) הַסֹּבֵב	(3.3) תָּמְתוֹן	(2.19) וַיֵּיצֶר
(3.12) נָתַתָּה	(1.30) רוֹמֵשׁ	(3.8) קוֹל	(2.25) עֲרוּמִים	(תַּנִּינִים)
(נָתַתָּ)	(1.26) רֹמֵשׁ	(3.10) קֹלֶךָ	(3.7) עֵירְמִם	(1.21) תַּנִּנִים

9. The Half-Vowels.

3.	(2)	2.	(1)	1.
(1.7) אֲשֶׁר	(1.3) וַיְהִי	vă-yᵉ-hî	(1.1) בְּרֵאשִׁית	(1.6) רָקִיעַ
(1.1) אֱלֹהִים	(1.15) בְּרָקִיעַ	bĭ-rᵉ-qî(ă)ʿ	(1.2) תְּהוֹם	(1.15) רָקִיעַ
(1.14) מוֹעֲדִים	(1.28) מִלְאוּ	mĭ-lᵉ-ʾû	(1.2) הָיְתָה	(שָׂרַץ)
(2.24) יָעֻב	(1.28) בְּרֹגַת	bĭ-ghᵉ-ghăth	(1.20) יִשְׁרְצוּ	(1.21) שָׁרְצוּ
(2.23) לְקֻחָה	(2.2) וַיְכַל	vă-yᵉ-khăl	(1.16) הַמְּאוֹרֹת	(יִשְׁרְצוּ)
(2.12) זָהָב	(2.15) עָבְדָהּ	ʿŏ-bhᵉ-dhāh	(1.21) הַגְּדֹלִים	(1.20) יִשְׁרְצוּ

10. The Syllable-divider, Sh·va.

Remarks 2, 3.	Remark 1.	2.	1.
(1.20) יִשְׁרְצוּ	(1.1) בְּרֵאשִׁית	(1.4) חֹשֶׁךְ	(1.7) וַיַּבְדֵּל

[1] Hosea.

8. Coalition of Vowel-letters and Vowel-signs.

A vowel-sound is often doubly indicated, by a vowel-letter and by a vowel-sign. It is in this case said to be written *fully*; if indicated only by a vowel-sign, it is said to be written *defectively*.

9. The Half-Vowels.[1]

1. The *half-vowels*, shortenings or remnants of earlier full vowel-sounds, are indicated by the so called Sh^{e}vâ; this Sh^{e}vâ is *always* pronounced, the simple (ְ), like *e* in *below*, the compound, like an extremely short *a*, *e*, or *o* (cf. **7.**).
2. Simple Sh^{e}vâ is called:
   (1) *Initial*, when it stands under a letter which belongs exclusively to the following syllable;
   (2) *Medial*, when it stands under a letter which wavers between the preceding and following syllables, closing the former and beginning the latter (see **19.** R.)
3. Compound Sh^{e}vâ, represented by the union of the *simple* Sh^{e}va with a short vowel, stands chiefly under gutturals.

10. The Syllable-divider, Sh^{e}va.

A simple Sh^{e}vâ, serving merely as a syllable-divider and *not* pronounced, is also written:

1. Under every *medial* vowelless[2] consonant, and
2. Under a *final* vowelless consonant,
   (1) When that consonant is Kăph, or
   (2) When it contains Dāghēsh-forte (cf. **12.** 2. 1), or
   (3) When it is preceded by another vowelless consonant.

Remark 1.—א, ה, ו, י, when *vowel-letters* (see 7), or quiescent ( ) do not of course receive a Sh^{e}vâ.

Remark 2.—The Sh^{e}vâ under an initial consonant, whether of a word or of a syllable, is always a *half-vowel and vocal.*

Remark 3.—The Sh^{e}vâ under a final consonant, whether of a word or of a syllable is always a *syllable-divider and silent.*

III. Points.

11. Daghesh-lene.

The letters בּ, גּ, דּ, כּ, פּ, תּ have a double sound (see **2.** 3). Their original hard or unaspirated sound (b, g, d, k, p, t) is indicated by a point called Dāghēsh-lene, *which they receive whenever they do not immediately follow a vowel-sound.*

Remark 1.—When a disjunctive accent stands between an aspirate and the preceding vowel (as at the beginning of a chapter, verse or section of a verse), the aspirate does not *immediately* follow the vowel, and hence takes Dāghēsh-lene.

Remark 2.—The fact that an aspirate without Dāghēsh-lene *must immediately follow a vowel-sound*, often shows that a preceding Sh^{e}vâ is a half-vowel, when this would not otherwise be known.

---

[1] The half-vowels are indicated by the superior letters ($^{a\ e\ o}$); the simple Sh^{e}va, when a half-vowel, by an italicized (^{e}).

[2] I. e., without a vowel or a half-vowel.

12. Daghesh-forte.

[1]Genesis. [2]Exodus. [3]Judges. [4]Job. [5]Isaiah.

12. Daghesh-forte.

1. The doubling of a consonant is indicated by a point in its bosom, called Dāghēsh-forte. Consonants may be doubled (*i. e.*, receive Dāghēsh-forte) *only* when they immediately follow a vowel ; hence

Remark 1.—The point וּ Vāv and in the aspirates is always Dāghēsh-*forte*, if preceded by a vowel.

Remark 2.—Dāghēsh-forte in an aspirate serves also as Dāghēsh-lene, doubling the *hard*, not the soft, sound of the aspirate.

2. Dāghēsh-forte is omitted

1) always from *final* consonants (except from תְּ of אַתְּ, and נָתַתְּ);

2) often from *medial* consonants which have *only* a Sh^{e}vâ ;

Remark 1.—In such cases the Dāghēsh-forte, though not expressed, is *implied*, and the Sh^{e}vâ is always a half-vowel.

Remark 2.—The letters which thus reject Dāghēsh-forte are in the order of frequency of rejection, ו, י, מ, נ, ל, צ, ס, ש, ק. (Aspirates may not reject it.)

3) always from the *gutturals* (see 28. 3).

3. Dāghēsh-forte may be *essential*, *i. e.*, necessary to the form in which it occurs ; it is then called

1) *Compensative*, when the doubling represents (1) the combination of two similar or (2) the assimilation of two dissimilar letters ;

2) *Characteristic*, when the doubling is indicative of a grammatical form.

Dāghēsh-forte may be *euphonic*, *i. e.*, employed merely for the sake of euphony ; it is then called

3) *Conjunctive*, when the initial letter of a word is thereby joined with the final vowel of the preceding word ;

4) *Separative*, when a consonant, with Sh^{e}vâ and preceded by a short vowel, is doubled in order to make the Sh^{e}vâ more audible ;

5) *Emphatic*, when the doubling strengthens or emphasizes the final tone-syllable of a section or verse;

6) *Firmative*, when the doubling, in the case of liquids, gives greater firmness to the preceding vowel.

	יְהוָה	יִשְׁשָׂכָר	יששכר	(30.18) יִשָּׂכָר

13. Mappiq and Raphe.

1. Măppîq (מַפִּיק *extender*) is a point in ה, when final, and indicates that it is used as a consonant, and not as a vowel-letter.

2. Rāphé (רָפֶה *rest*) is a horizontal stroke placed over a letter, and calls attention to the *absence* of Dāghēsh or Măppîq, where these points might have been expected.

14. Maqqeph.

Măqqēph (מַקֵּף *binder*) is a horizontal stroke placed between two words, and indicates that they are to be pronounced together, and accented as though they formed but a single word.

Remark.—The first word losing its accent, any long vowel, in a mixed (18. 2) syllable, is shortened.

15. Methegh.

Měthĕgh (מֶתֶג *a bridle*) is a perpendicular line placed on the left side of a vowel-point, and indicates that the syllable to which it belongs has a secondary accent. The following are its chief uses :—

1. On the second syllable before the tone; but generally on the third, if the second is mixed (18. 2).
2. With a long vowel followed by a vocal Sh^{e}vâ *pretonic.*
3. With *all* vowels before a compound Sh^{e}vâ.
4. With a long vowel before Măqqēph.

16. Q^{e}rî and K^{e}thîbh.

1. Q^{e}rî (קְרִי *read*).—A term designating marginal readings which the Massorites substituted for the readings of the text.

2. K^{e}thîbh (כְּתִיב *written*).—A term designating the readings of the text for which the Massorites substituted the Q^{e}rî.

Remark 1.—In such cases, the vowel-points given with the K^{e}thîbh are pronounced with the Q^{e}rî, and in reading the K^{e}thîbh the vowels must be supplied.

Remark 2.—Words *always* read otherwise than they are written receive the pointing of the Q^{e}rî, while the marginal reading is omitted.

IV. Syllables.

17. Syllabication.

1.	2.
בָּרָא (1.21)	הָרִקִיעַ (1.20) אֱלֹהִים (1.1) הָרָקִיעַ (1.7)

(2.15) לִשְׁמְרָהּ	(הָעָטְלוּ)	(1.6) רָקִיעַ	(1.21) שָׁרְצוּ

[1] Exodus.

IV. Syllables.

17. Syllabication.

1. A word contains as many syllables as it has vowels.
2. Pattaḥ-furtive (see) and the Shᵉvâs (half-vowels) are not sufficiently vocalic to form syllables.

Remark.—Every syllable, except the prefix ֫, begins with a consonant.

18. Kinds of Syllables.

Syllables are *simple* (*open*), or *mixed* (*closed*):—

1. *Simple*, when they end in a vowel ;
2. *Mixed*, when they end in a consonant.

Remark 1.—A mixed syllable whose final consonant is the same as that with which the following syllable begins is termed *sharpened.*

Remark 2.—A *final* mixed syllable sometimes ends in *two* consonants but a vowel is generally inserted (see **12.** 2).

Remark 3.—Of two consonants, with Shᵉvâs, in the middle of a word, the first belongs to the preceding, the second to the following syllable.

Remark 4.—A syllable may, of course, *begin* with two consonants, the first of which always has a half-vowel.

19. The Quantity of the Vowel in Syllables.

1. The vowel of an unaccented *simple* syllable is long.
2. The vowel of an unaccented *mixed* syllable is short.
3. The vowel of an *accented* syllable, whether simple or mixed, may be either long or short.

Remark.—Sometimes a consonant with *medial* Shᵉvâ (see § 9. 2, (2)) hangs loosely between the preceding and following syllable, serving both to close the former and to open the latter. Such a syllable is termed *half-open* or *intermediate*[1].

20. Qamets and Qamets-ḥaṭuph.

1. The vowel-point ◌ָ is Qāmĕts-ḥāṭûph(ŏ),
   1) in an unaccented mixed syllable ;
   2) before a guttural with Hāṭēph-Qāmĕts, or Qāmĕts-ḥāṭûph.
2. It is Qāmĕts (ā or â),
   1) in a simple syllable ;
   2) in an accented mixed syllable ;
   3) where accompanied by Mĕthĕgh, and followed by a simple Shᵉvâ, as a half-vowel.

[1]For a fuller treatment of the half-open syllables, see Apendix III.

V. Euphony of Vowels.

21. The Hebrew Vowel-system.

[1] Hosea. [2] Ruth.

V. Euphony of Vowels.

21. The Hebrew Vowel-system.

		A-class.	I-class.	U-class.
1. *Originally long vowels*	*pure*.....	ָ	ִ or ִי	ֻ or וּ
	diphthongal.		ֵ or ֵי	ֹ or וֹ

These are represented by â î û, ê ô, and, excepting ָ, are generally written *fully;* they are *immoveable* or *unchangeable*, *i. e.*, may not be shortened, or changed to Sh^{e}vâ through the influence of the tone or syllabication.

2. *Short vowels*	*pure*.....	ַ	ִ	ֻ
	deflected.....	ֲ or ֳ	ֱ	ֳ (ŏ)

These are represented by ă ĭ ŭ, ĕ ŏ; they generally stand in mixed syllables, in which case they are *unchangeable.*

3. *Heightened or tone-long*.....	ָ	ֵ	ֹ

These are represented by ā ē ō, and are usually written *defectively;* since they are *long*, simply because of their proximity to the tone, their very existence depends upon that proximity. They may stand

1) *before* the tone (in simple syllables), or
2) *under* the tone (in mixed syllables).

4. *Volatilized or tone-short*	(under gutturals)[1]	ֲ	ֱ	ֳ

These are represented by the (so-called) superior ^{e} and by $^{a\cdot e}$ °, and are only *half* or *indistinct* vowels. They occur in what would be

1) the second or third syllable before the tone, or
2) the fore-tone syllable (in certain grammatical forms).

Remark 1.—*Unchangeable* are (1) *by nature* the originally long vowels â î û ê ô, and (2) *by position*, the short vowels when in a mixed syllable.

Remark 2.—*Changeable* are (1) the tone-long ā ē ō, and (2) the tone-short or half-vowels (Sh^{e}vâs).

Remark 3.—While ê, ô and ē, ō may usually be distinguished by their full or defective writing, â and ā may be distinguished only by a knowledge of forms.

Remark 4.—The vowel represented by é is of a diphthongal character; it will be treated of later.

[1] See 28. 2.

22. Changes of Vowels.

1. 1)	1. 2)	Remark.
(1.4) אֶת־הָאוֹר	(2.2) מְלֵא־כָה / מְלַאכִי־תוֹ	(2.24) (אֵם) אִמּוֹ

	(1.22) יְרֵב (27.38) וַיִּבְךְ	(הָעֲטִילָה)

[1] Exodus.

22. Changes of Vowels.

1. A tone-long vowel is changed to its (original) short,
   1) When a mixed syllable loses its accent ;
   2) When a simple syllable becomes a mixed one.

   Remark.
   ◌ָ is shortened to ◌ַ, but to ◌ָ in sharpened syllables.
   ◌ֹ is shortened to ◌ָ (ŏ), but to ◌ֳ in sharpened syllables.

2. A short vowel is changed to its corresponding long,
   1) When a mixed syllable becomes a simple one ;
   2) When a following Dāghēsh-forte has been omitted from a guttural ;
   3) When a following (vowel-)letter quiesces in it ;
   4) When its syllable is *in pause* (**24.** 1).

3. When a word is lengthened at the end, and the *accent, in consequence, advanced*, vowels pass over into half-vowels ; this occurs in the case of
   1) Penultimate ◌ַ and ◌ָ, *particularly in the inflection of nouns;*
   2) Ultimate ◌ַ, ◌ֵ (ē), ◌ֹ (ō), *particularly in the inflection of verbs.*

Remark 1.—In many cases the vowel is entirely rejected, its absence being indicated by the silent Sh^{e}vâ.

Remark 2.—If the accent is advanced *two syllables*, both vowels may be changed.

23. Insertion of Vowels.

1. When, in inflection or composition, two half-vowels come together at the beginning of a word, the first becomes a short vowel, generally ◌ִ; but if either half-vowel is a compound Sh^{e}vâ, the vowel thus arising corresponds to it (**28.** 2).

   Remark.—The new syllable, thus formed, is usually the so-called intermediate or *half-open* syllable.

2. When two Sh^{e}vâs come together at the *end* of a word, a helping-vowel is generally inserted, viz., ◌ֶ; but under gutturals, ◌ַ.

   Remark.—The concurrence of two Sh^{e}vâs at the end of a word is admissible, but only when the second stands under a strong consonant (מ, ך) or under an aspirate with Dāghēsh-lene.

3. When in the middle of a word a *compound* Sh^{e}vâ comes to stand before a *simple* Sh^{e}vâ, the former is universally changed to its corresponding short vowel.

24. Pause.

1.	2.	3.
(1.2) הַמָּיִם (2.5) יִצְמַח	(2.25) יִתְבַּשַּׁשׁוּ	(3.11) אַתָּה אַתָּה
(1.5) לַיְלָה (2.8) יֵצֶר	(7.11) נִפְתְּחוּ	
(1.8) שָׁמַיִם (1.29) זֶרַע	(3.17) בַּעֲבוּרֶךָ	(3.10) אָנֹכִי אָנֹכִי

(3.2)[4] (מ)אֻכָל	(2.25) יְהִוּ	for	יְהִיוּ	(1.31) עֲשֵׂה(עֲשִׂי)	

[1] Ecclesiastes. [2] Numbers. [3] Psalms. [4] Exodus.

24. Pause.

The pauses at the end of a clause or verse, indicated by the more powerful accents, cause certain changes :

1. Short vowels are lengthened (_ and often _̇, to _̄).
2. Vowels changed in inflection to Sh^{e}vâ are restored and, if short, lengthened.

Remark.—Sh^{e}vâ before the suffix הָ becomes _̇ (é).

3. The tone is often shifted from the *ultima* to the *penultima*.
[Other changes will be noticed later in the treatment of inflection.]

VI. Euphony of Consonants.

(For a general statement of the Consonant-system, see 4.)

25. Assimilation of Consonants.

The final consonant of a mixed syllable is often assimilated (made similar) to the initial consonant of the following syllable.

This occurs

1) chiefly with the weak consonant נ ; but also
2) with ל in the verb לָקַח *to take*, and
3) with ר (of the relative pronoun אֲשֶׁר), ת (of the prefix הִת), and ד in some special cases.

Remark 1.—נ is generally assimilated, but is retained in accented syllables and before the gutturals (except ח).

Remark 2.—Assimilation is expressed by a Dāghēsh-forte in the following consonant, which, however, is rejected from final consonants.

26. Rejection of Consonants.

The consonants most liable to rejection are the breathings א, ה, the vowel-letters ו, י, and the liquids ל, נ :

1. *Aphaeresis*, or rejection from the beginning of a word, takes place when a consonant, naturally feeble, is without a vowel to sustain it.
2. *Syncope*, or rejection from the middle of a word, takes place when a consonant, naturally feeble, is preceded only by Sh^{e}vâ.

Remark 1.—The vowel of the rejected consonant is always given to the preceding consonant, and א is often orthographically retained.

3. *Apocope*, or rejection from the end of a word, takes place in the case of נ of the verbal endings וְן and יְן _̇, and in the case of ם of the nominal ending יִם _̇(י_̇ in the construct state).

27. Addition, Transposition, Commutation.

1.	2.	3. 1)	3. 2)
זְרוֹעַ אֶזְרוֹעַ	הִתְשַׁמֵּר הִשְׁתַּמֵּר	הִתְצַדֵּק הִצְטַדֵּק	וָלַד יָלַד

(1.4) הַחשֶׁךְ	(פִּעֵל)	(1.22)הָעוֹף	(4.14)גֵּרַשְׁתָּ

27. Addition, Transposition, Commutation.

1. The *addition* of a letter sometimes takes place at the beginning of a word to avoid harshness in pronunciation, as in the case of א (called *prosthetic*), in the formation of nouns.

Remark.—The ה used as a prefix in the formation of the Nĭph'ăl and Hĭthpă'ēl conjugations is of a similar nature.

2. The *transposition* of letters, of frequent occurrence in the province of the lexicon, occurs in the grammar, only in the case of ת, of the Hĭthpă'ēl of verbs when it would stand before a sibilant.

3. The *commutation* of letters, of frequent occurrence in the province of the lexicon, occurs in the grammar, in the case of
   1) ת and ט, in the Hĭthpă'ēl conjugation, and
   2) ו and י, in some verbs Pē Yōdh.

28. Peculiarities of Gutturals.

The gutturals, beginning with the weakest are in the order of their strength, א, ע, ה, ח. They have in common the following peculiarities:

1. *They prefer (particularly before them) the guttural or a-vowels;* hence
   1) They take ַ in preference to ָ or ָ, likewise often instead of ֵ (ē), or ֹ (ō);
   2) The strong gutturals (ה, ח, ע) at the end of a word, when preceded by a heterogeneous long vowel (*i. e.*, by any long vowel except ָ) receive a Păttăḥ called *furtive*, because in pronunciation it steals in before the letter under which it is written.

Remark.—Păttăḥ-furtive is not counted as a vowel, and therefore does not form a syllable (17. 2); it disappears when the guttural ceases to be final.

2. *They prefer compound to simple Sh'va.*

Remark 1.—The gutturals may have simple (always silent) Sh'vâ, when they close a mixed syllable in the middle of a word.

Remark 2.—At the beginning of a word ֲ is usually employed, except in the case of א, which prefers ֳ; but in the middle of a word the Sh'vâ generally corresponds to the preceding vowel.

3. *They cannot be doubled* (receive Dāghēsh-forte).

Remark 1.—The strong gutturals (ע, ה and ח) may, however, receive what is termed a *virtual* doubling, *i. e.*, Dāghēsh-forte *implicitum.*

Remark 2.—The weak gutturals א and ר (see **Remark 3**) entirely reject the doubling and require in compensation the lengthening of the preceding vowel to its corresponding tone-long.

Remark 3.—The letter ר is treated as a guttural, in that (1) it prefers before it ַ, and (2) rejects Dāghēsh-forte.

29. The Peculiarities of Quiescents.

1. 1)	1. 2)	Remarks 1, 2.
(1.1) בָּרָא	(1.1) רֵאשִׁית *for* רְאֵשִׁית	(1.22) לֵאמֹר (1.4) וַיַּרְא
(1.5) יִקְרָא	(2.10) רָאשִׁים *for* רְאָשִׁים	(3.5) כֵּאלֹהִים (15.9)[1] חֵטְא

(2.7) וַיִּיצֶר *for* וַיִּיצֵר	(1.3) יְהִי *for* יִהְיִ	(4.7) תֵּיטִיב *for* תַּיְטִיב

[1] Deuteronomy.

29. The Peculiarities of Quiescents.

1. א loses its consonantal power and is silent (*i. e.*, *quiesces*),
   1) *always* at the end of a word;
   2) *often* in the middle of a word, viz.:
      (1) When its vowel is given to a preceding vowelless consonant, or
      (2) When it, with a compound Sh^{e}vâ, would be preceded by the corresponding short vowel.

Remark 1.—A final א preceded by a simple Sh^{e}vâ is termed *otiant.*

Remark 2.—A quiescent א is often elided in the middle of a word.

2. ה loses its consonantal power and is silent (*i. e.*, *quiesces*), *only at the end of a word;* but here always, unless it contains a Măppîq (13).

Remark.—Elision of ה occurs (1) in the case of the article after an inseparable preposition (32. 4); (2) in certain verbal forms after a preformative (41. 4); (3) when the vowels preceding and following have been contracted.

3. ו and י lose their consonantal power and are silent (*i. e.*, *quiesce*),
   1) When they would stand with a silent Sh^{e}vâ, after a homogeneous vowel;
   2) When they would stand after a vocal Sh^{e}vâ.

Remark.—ו and י, when preceded by their homogeneous *short* vowels, contract with these into the corresponding long, û, î; when preceded by ֵ they often contract into the corresponding diphthongal, ô, ê; and, in both cases, the ו and י are generally orthographically retained[1].

General Remark.—To aid in distinguishing *when* the vowel-letters quiesce or are silent, the following is suggested:

1) When *medial* they are silent, unless followed by a vowel or Sh^{e}vâ.
2) When *final*, א is *always* silent; likewise ה, unless it contains Măppîq; but ו, only when preceded by ô or û; and י, only when preceded by ê or î.

[The subject of the *Accent* will be treated in an Appendix.]

[1] On ו or י as the third radical of verbs ל״ה, see 61.

PART SECOND:—ETYMOLOGY.

[1] Kings. [2] Numbers. [3] Exodus. [4] 1 Samuel. [5] 2 Samuel. [6] Joel.

VII. Particles.

30. The Article.

1. The primary form of the Article is הַ accompanied by Dāghēsh-forte in the following letter[1] ..... הַ·
2. Before the strong gutturals ה and ח, which may be doubled by *implication* (28. 3. R. 1), it becomes ..... הַ
3. Before the *weak* gutturals א, ר and (generally before) ע, which cannot be doubled (28. 3. R. 2), it becomes ..... הָ
4. Always before ח, and before an *unaccented* ה or ע, it becomes ... הֶ

Remark 1.—The Dāghēsh-forte of the Article may, of course, be omitted from *vowelless* consonants (12. 2. 2)).

Remark 2.—אֶרֶץ *earth*, הַר *mountain*, and עַם *people* lengthen their vowel after the Article.

Remark 3.—The ה of the Article is elided after the prepositions ל, כ, ב (but *not* after מִן), the vowel being given to the preposition.

31. He Interrogative.

1. Hē, used as an interrogative particle, is usually pointed ..... הֵ
2. Before a vowelless consonant, it becomes (23. 1) ..... הַ
3. Before a guttural, it becomes ..... הַ
4. Before a guttural with ָ, it becomes ..... הֶ

Remark.—The new syllable thus formed is *intermediate*, and a following Sh^{e}vâ is *always* vocal, a Dāghēsh-forte separative (12. 3. 4)) being sometimes employed.

32. Inseparable Prepositions[1].

1. The Inseparable prepositions (בְּ *in*, כְּ *like*, לְ *to*) are usually prefixed with vocal Sh^{e}vâ ..... ְ
2. Before consonants with simple Sh^{e}vâ, they receive (23. 1) ..... ְ
3. Before gutturals with compound Sh^{e}vâ, they receive (23. 1) the corresponding short vowel ..... ֲ, ֳ, or ָ (ŏ).
4. Before the article, they take its vowel, the ה being rejected.
5. Before a tone-syllable, they often take a *pretonic* ..... ָ

Remark 1.—מִן *from* is written separately only before the article; elsewhere it is *prefixed*, and pointed (1) regularly, מִ·; (2) before vowelless consonants and strong gutturals (ה, ח), מ; (3) before *weak* gutturals (א, ר, ע), מֵ.

Remark 2.—The initial א of אֲדֹנָי Lord, and אֱלֹהִים God, preceded by an inseparable preposition, quiesces in ֲ, and ֱ respectively.

Remark 3.—יְהוָה receives the pointing of אֲדֹנָי, *e. g.*, לַיהוָה, בַּיהוָה.

[1] The original form of the Article was הַל, as seen in the Arabic *al*.

33. Vav Conjunctive.

1.	2.	3.	4.

(2.4) וְשָׁמַיִם	(1.26) וּבְעוֹף (1.22) ורְבוּ	(וֶהוֹת)	(2.17) וָרָע

VIII. Pronouns.

34. The Personal Pronoun.

Singular.		Plural.	
1. *com.*	אֲנִי, אָנֹכִי ....*I*	1. *com.*	אֲנוּ, נַחְנוּ, אֲנַחְנוּ .....*we*
2. *m.*	אַתָּה	2. *m.*	אַתֶּם
2. *f.*	אַתְּ (אַתִּי, *for* אַתִּי) *thou*	2. *f.*	אַתֶּנָה, אַתֵּן .....*ye*
3. *m.*	הוּא .....*he, it*	3. *m.*	הֵמָּה, הֵם
3. *f.*	הִיא (הִוא) .....*she, it*	3. *f.*	הֵנָּה, הֵן .....*they*

Singular.	Plural.
(3.10) כִּי עֵירֹם אָנֹכִי	(13.8) אֲנָשִׁים אַחִים אֲנַחְנוּ
(4.9) הֲשֹׁמֵר אָחִי אָנֹכִי	(42.11) בְּנֵי־אִישׁ אֶחָד נַחְנוּ
(3.14) אָרוּר אַתָּה	(42.9) מְרַגְּלִים אַתֶּם
(3.19) כִּי עָפָר אַתָּה	(31.6) וְאַתֶּנָה יְדַעְתֶּן
(2.11) הוּא הַסֹּבֵב	(3.7) כִּי עֵירֻמִּים הֵם
(3.20) כִּי הִוא הָיְתָה אֵם	(6.4) הֵמָּה הַגִּבֹּרִים

35. The Pronominal Suffixes.

Singular.		Plural.	Singular with אֵת, sign of def. obj.		Plural with אֵת, sign of def. obj.
1. *com.*	נִי, ־ִי, ־	נוּ	1. *com.*	אֹתִי	אֹתָנוּ
2. *m.*	ךָ	כֶם	2. *m.*	אֹתְךָ	אֶתְכֶם
2. *f.*	ךְ	כֶן	2. *f.*	אֹתָךְ	wanting.
3. *m.*	הוּ	הֶם, *or* ם	3. *m.*	אֹתוֹ	אֹתָם
3. *f.*	הָ	הֶן, *or* ן	3. *f.*	אֹתָהּ	אֹתָן

33. Vav Conjunctive.

1. Vav Conjunctive is regularly prefixed with vocal Sh^{e}vâ ..... וְ
2. Before labials and vowelless consonants it quiesces in ..... וּ
3. Before gutturals with compound Sh^{e}vâ, it receives the corresponding short vowel ..... וַ, וֲ, or וֳ (ŏ).
4. Before a tone-syllable, it often takes a *pretonic* ..... וָ.

VIII. Pronouns.

34. The Personal Pronoun.

See Paradigm A.

The forms of the Personal Pronoun are used only as Nominatives. They cannot stand after verbs or prepositions.

1. In the *first person singular* אָנֹכִי, in pause אָנֹכִי, occurs less seldom than אֲנִי, in pause אֲנִי.
   In the first person *plural*, אֲנַחְנוּ is most frequent, אָנוּ occurring but once, and נַחְנוּ six times.

Remark.—All forms of the first person are of *common* gender.

2. In the *second person singular*, the *masc.* אַתָּה is for an original אַנְתָּה; the *fem.* אַתְּ (ătt) is for an original אַנְתִּי, contracted to אַתִּי which form occurs in the K^{e}thîbh seven times.
   In the *second person plural*, the *masc.* אַתֶּם is for אַתּוּם (cf. the form of the term. תֶּם before suffixes); the *fem.* אַתֶּן for אַתּוֹן occurs but once, and אַתֶּנָּה but four times.
3. In the *third person singular*, the *masc.* הוּא stands in the Pentateuch for the *fem.* הִיא, except in eleven instances, but in such cases it was pointed by the Massorites הִוא.
   In the *third person plural*, הֵם and הֵן are related to הוּא and הִיא, as אַתֶּם to אַתָּה.

Remark.—The ה־, probably originally demonstrative, has lost its force.

35. The Pronominal Suffixes.

See Paradigm A.

When a pronoun is to be governed by a noun, verb or preposition, not the full, but a shortened form must be employed. These are termed *suffixes*, and indicate the various case-relations.

Remark 1.—When a pronominal suffix belongs to a verb, the suffix may either be attached to the verb, or stand after it, in connection with אֵת, the sign of the definite object.

Remark 2.—In the second person, *sing.* and *plur.*, the palatal (*k*-) sound is substituted for the lingual (*t*-) sound.

Remark 3.—The suffixes כֶם, כֶן, הֶם and הֶן always take the accent and are termed *grave*; the rest are *light*.

Remark 4.—י (1st pers.) is used with nouns; נִי with verbs. הֶם and הֶן are used with verbs and plural nouns, ם and ן with singular nouns.

36. The Demonstrative Pronouns.

Singular.	Plural.	Singular.	Plural.
M. זֶה *this*	אֵלֶּה (אֵל) *these*	*M.* הוּא *that*	הֵם *or* הַמָּה *those*
F. זֹאת *this*		*F.* הִיא *that*	הֵן *or* הַנָּה *those*

(5.1) זֶה סֵפֶר	(3.13) מַה־זֹּאת עָשִׂית
(6.15) וְזֶה אֲשֶׁר תַּעֲשֶׂה	(2.4) אֵלֶּה תּוֹלְדֹת
(7.11) בַּיּוֹם הַזֶּה	(2.12) וְזָהָב הָאָרֶץ הַהִוא
(2.23) זֹאת הַפַּעַם	(6.4) בַּיָּמִים הָהֵם

37. The Relative Pronoun.

אֲשֶׁר *who, which;* in the later books[1] written ·שְׁ, sometimes ·שֶׁ.

(1.7) אֲשֶׁר מִתַּחַת לָרָקִיעַ	(2.2)אֲשֶׁר עָשָׂה	(2.11)אֲשֶׁר־שָׁם הַזָּהָב
(1.11)אֲשֶׁר זַרְעוֹ־בוֹ	(2.3)אֲשֶׁר בָּרָא	(1.29)אֲשֶׁר־בּוֹ פְּרִי־עֵץ
(1.21)אֲשֶׁר שָׁרְצוּ	(2.8)אֲשֶׁר יָצָר	(1.30)אֲשֶׁר־בּוֹ נֶפֶשׁ חַיָּה

38. The Interrogative Pronouns.

מָה *what?*	מִי *who?*

2. 1)	2. 2)	2. 3)	2. 4)
(2.19)מַה־יִּקְרָא	(31.36)מַה חַטָּאתִי	(מָה אֵלֶּה)	(4.10)מֶה־עָשִׂיתָ
(3.13)מַה־זֹּאת	(מַה־הוּא)	(מָה רְאִיתֶם)	(מֶה־הָיָה)
(3.13)[2]מַה־שְּׁמוֹ	(מַה־הֵמָּה)	(מָה עֲשִׂיתֶם)	(מֶה־חָרַל)

[1] Eccl., Sam., Canticles. [2] Ex.

36. The Demonstrative Pronoun.

1. The form זֹאת (zôth) is for זָאת, i. e., זָא with fem. ending תְ.
2. The form אֵל occurs only eight times, and then always in the Pentateuch and with the Article.
3. The forms אֵל and אֵלֶּה are plural in *signification*, not in *form*.
4. Rarer and stronger forms are הַלָּזֶה (m.) *yonder*, הַלָּזוּ (f.), הַלָּז (c.).
5. The Personal pronouns, of the third person, are used as remote demonstratives.
6. זוּ is found in poetry, but generally as a Relative.

37. The Relative Pronoun.

1. The relative does not vary for gender or number.
2. In the later books, the form שֶׁ֫ is often used, ר having been assimilated, and א rejected.
3. When the Relative is immediately preceded by a preposition, the preposition governs not the Relative but its antecedent understood.
4. When the Relative is to be governed by a noun, verb, or preposition, it stands unchanged at the beginning of its clause, and the appropriate pronominal suffix is attached to the governing word.

38. The Interrogative Pronouns.

1. The Interrogative מִי refers to *persons*, מָה to *things*. Both are indeclinable, the former unchangeable.
2. The vowel of מָה is influenced by the initial consonant of the following word:

   1) Before strong consonants it is pointed ..... מַה־
   2) Before strong gutturals (ה and ח) it is ..... מַה
   3) Before weak gutturals (א, ר, and ע) it is ..... מָה
   4) Before gutturals with ֫, it is ..... מֶה

Remark 1.—The Dāghesh-forte of מַה־ is *conjunctive* (**12.** 3. 3)).

Remark 2.—Under certain circumstances, מֶה and מָה are found before other letters than gutturals.

IX. The Verb.

39. Roots, Classes.

1.

בָּרָא *he created* (1.1)	מַבְדִּיל (1.6) *from* בָּדַל	הִמְטִיר (2.5) *from* מָטַר	תִּפָּקַחְנָה (3.7) *from* פָּקַח

קָטוּל	נִקְטָל	מְקֻטָּל			מָקְטָל		Participle Passive.

IX. The Verb.

39. Roots, Classes.

1. The *root* of a verb consists of three letters termed radicals (**4.** 3. (2)), and is generally pronounced with the vowels of the 3 pers. sing. of the past tense.

2. The *class* of a verb is indicated by the character of the consonants which compose its root:
   1) *Strong* verbs have only strong (**4.** 2. (3)) consonants. (All other verbs are, in distinction, called *weak*.)
   2) *Guttural* verbs have as one of their radicals a guttural.
   3) *Contracted* verbs have a radical which may be assimilated or contracted.
   4) *Quiescent* verbs have as one of their radicals a vowel-letter.

40. General View of the Strong Verb: Species.

1. From the root, by the addition of letters, the variation of vowels and the reduplication of radicals are formed *seven* so-called species or conjugations:

1) Qăl	(קַל)	**Simple Active,**	קָטַל *he killed.* [*was killed.*
2) Nĭph'ăl	(נִפְעַל)	**Reflexive & Passive,**	נִקְטַל *he killed himself* or
3) Pi'ēl	(פִּעֵל)	**Intensive Active,**	קִטֵּל *he massacred.*
4) Pŭ'ăl	(פֻּעַל)	**Intensive Passive,**	קֻטַּל *he was massacred.*
5) Hĭph'îl	(הִפְעִיל)	**Causative Active,**	הִקְטִיל *he caused to kill.*
6) Hŏph'ăl	(הָפְעַל)	**Causative Passive,**	הָקְטַל *he was caused to kill.*
7) Hĭthpă'ēl	(הִתְפַּעֵל)	**Reflexive,**	הִתְקַטֵּל *he killed himself.*

2. These species or conjugations are characterized as follows:
   1) The Qăl has merely the simple root-form.
   2) The Nĭph'ăl has the characteristic prefix נ, in the Perfect and Participle, but in all other forms (except in some cases of the Infinitive Absolute), a Dāghēsh-forte *in* and a pretonic Qāmĕts *under* the first radical.
   3) The Pi'ēl has *everywhere* Dāghēsh-forte in the second radical; and its characteristic vowels are ֵ (in the Perfect, attenuated to ֶ) under the first, and ֵ under the second radical.
   4) The Pŭ'ăl has *everywhere* Dāghēsh-forte in the second radical, and instead of ֶ and ֵ of the Pi'ēl, ֻ and ֵ.
   5) The Hĭph'îl has the prefix הִ (in the Perfect, הֶ), of which ה is elided after a preformative. The second radical has, as a characteristic vowel, י ִ.
   6) The Hŏph'ăl has the prefix הָ (hŏ), of which ה is elided after a preformative.
   7) The Hĭthpă'ēl has the prefixed syllable הִתְ, together with the Dāghēsh-forte *characteristic* and vowels of the Pi'ēl.

41. General View of the Perfect Verb: Tense and Mood.

Participles.	Imperfects.	Imperatives.	Inf's Construct.	Inf's Absolute.	Perfects.

(3.24) מִתְהַפֶּכֶת	(6.6) יִתְעַצֵּב	(הִתְקַדֵּשׁ)	(6.9) הִתְהַלֵּךְ־

41. General View of the Verb: Tenses and Moods.

1. The Hebrew verb has the following tenses and moods:
   1) *A Perfect*, designating that which is finished, complete;
   2) *An Imperfect*, designating that which is unfinished, incomplete;
   3) *Two Infinitives*, Absolute and Construct;
   4) *An Imperative*, of which only the *second* person occurs;
   5) *Participles—two*, active and passive, in the Qăl; *one* in each of the remaining species.

Remark 1.—These moods and tenses are found in all the species, except that the pure passives, Pŭ'ăl and Hŏph'ăl, have no Imperative.

Remark 2.—The Perfect and Imperfect are to be regarded as tenses of an Indicative mood.

2. The Tenses and Moods are characterized as follows:
   1) *The Perfect* (3 m. sg.) of the Qăl is the *root* of the verb; the other Perfects (3 m. sg.) are the stems of their respective species.
   2) *The Infinitive Absolute* differs from the Perfect, in that
      (1) The second radical has (_̤) in the Hĭph'îl and Hŏph'ăl, but (_̇) the other species, while
      (2) The original vowel (_̲) is *restored* in the penult of the Pi"ēl and Hĭph'îl.

Remark.—The regular form of the Nĭph'ăl Infinitive Absolute is, *e. g.*, נִקְטֹל; the more common form however is הִקָּטֵל, of which the ה is prosthetic (i. e. prefixed to assist in the pronunciation, see **27.** 1); the _̲ is pretonic, and the Dāghēsh-forte in ק is the result of the assimilation of the characteristic נ.

   3) *The Infinitive Construct* is a shortened form of the Infinitive Absolute:
      (1) In the Qăl, the pretonic _̲ is dropped;
      (2) In the Nĭph'ăl, the vowel of the ultima, instead of (_̇), is (_̤);
      (3) In the remaining species, the vowel of the ultima is the same as that of the corresponding Perfect.
   4) *The Imperative* is the *same* as the Infinitive Construct, except in the Hĭph'îl (2 m. sg.), where it is the same as the Infinitive Absolute.
   5) *The Imperfect* is the *same* as the Infinitive Construct, with the addition of the necessary indications of gender, number, and person.

Remark.—The initial ה of the Infinitive Construct is of course elided after a prefix.

   6) *The Participles* are nominal forms:
      (1) The Qăl having the forms קֹטֵל, קָטוּל;
      (2) The Nĭph'ăl being a lengthened form of the Perfect; while
      (3) The remaining species have the *stem-form* with the prefix מ, the ultimate vowel of the stem, if short, being lengthened, and the initial ה being rejected.

42. The Perfect (Qal).

Tabular View.

Analysis.	Instances.	Form.	Gen. Num. Per.
The simple root-form.	שָׁבַת (2.3)	קָטַל	*Sg.* 3 *m.*
ה ָ (orig. ת ָ[1]), regular fem. ending.	נָתְנָה (3.12)	קָטְלָה	3 *f.*
תָּ[2], fragment of אַתָּה *thou* (m.).	אָכַלְתָּ (3.18)	קָטַלְתָּ	2 *m.*
תְּ[3], fragment of אַתְּ (ăтt), *thou* (f.).	צָחַקְתְּ (18.15)	קָטַלְתְּ	2 *f.*
תִּי (for כִּי), fragment of אָנֹכִי, *I*.	שָׁמַעְתִּי (3.9)	קָטַלְתִּי	1 *c.*
וּ (orig. ום), regular plur. ending.	שָׁרְצוּ (1.21)	קָטְלוּ	*Pl.* 3 *c.*
תֶּם, fragment of אַתֶּם *ye* (m.).	הְיִיתֶם (3.5)	קְטַלְתֶּם	2 *m.*
תֶּן, fragment of אַתֶּן *ye* (f.).	(הְיִיתֶן)	קְטַלְתֶּן	2 *f.*
נוּ, fragment of אֲנַחְנוּ *we*.		קָטַלְנוּ	1 *c.*

Remark 3.		Remarks 1 and 2.			
He was, or *has become* (*is*) *great*	גָּדַל (26.13)	קָטֹל	קָטֵל	קָטַל	*Sg.* 3 *m.*
He was, or *has become* (*is*) *heavy*	כָּבֵד (12.10)	קָטְלָה	קָטֵלָה	קָטְלָה	3 *f.*
He was, or *has become* (*is*) *old*	זָקֵן (18.12)	קָטַלְתָּ	קָטַלְתָּ	קָטַלְתָּ	2 *m.*
He was, or *has become* (*is*) *able*	יָכֹל (32.26)	קְטַלְתֶּם	קְטַלְתֶּם	קְטַלְתֶּם	*Pl.* 2 *m.*
I was, or *have become* (*am*) *little*	קָטֹנְתִּי (32.11)	קָטַלְנוּ	קָטַלְנוּ	קָטַלְנוּ	1 *c.*

43. The Infinitives (Qal).

6.	5.	4.	3.	1 and 2.	
אָכֹל (2.17)	עָבְדָה (2.15)	לִמְשֹׁל (1.18)	אָכֹל (2.10)	קָטוֹל	**Inf. Absolute**
אֲכָלְכֶם (3.5)	שָׁמְרָה (2.15)	לִשְׁמֹר (3.24)	מָשֹׁל (37.8)	קְטֹל	**Inf. Construct**

[1] The original ת ָ is still used before suffixes and in verbs ל״ה (61).

[2] Seldom written תָּה, cf. נָתַתָּה (3. 12).

[3] Sometimes ִתְּי, always so before suffixes.

42. The Perfect (Qal).

Notes on the Tabular View.

1. The inflection of the verb exhibits distinctions for *number*, *person* and *gender*. Special forms for the *feminine* occur in the 2 and 3 pers. sg. and 2 pers. plur.
2. The *Perf.* 3 *m. sg.* (קָטַל, *he killed*) is the stem to which are appended the pronominal fragments and signs which mark gender and number. *The Perfect has no prefixes.*
3. Before vowel-additions, the tone-syllable becomes a half-vowel, i. e., vocal Sh^{e}vâ (**9.** 1).
4. The grave suffixes תֶּם *Ye* (m.) and תֶּן *Ye* (f.) always receive the tone, and,in consequence of this change, the tone-long vowel of the first syllable becomes Sh^{e}vâ (**21.** 3).
5. Before additions with initial consonant the accent or tone is always on the penult, except in the case of the *grave* suffixes just mentioned.

Remark 1.—Most verbs have (_) as the vowel of the second radical in the Qăl Perf. 3 m. sg.; but many verbs have (_) instead of (_); while a few have (_). The first are termed **Middle A,** the second **Middle E,** the third **Middle O.**

Remark 2.—Verbs **Middle E** retain ē only in the 3 m. sg., and sometimes in *pause*, but verbs **Middle O** retain ō throughout the Perfect, shortened to ŏ, however, in the 2 *plur.*

Remark 3.—While verbs **Middle A** are for the most part *transitive*, those **Middle E** and **Middle O** (and also a few of those **Middle A**) are *intransitive.* The latter are generally termed *Statives*[1], and their *Perfects* are usually best rendered by the English *Present.*

43. The Infinitives (Qal).

Notes on the Tabular View.

1. The *Construct* is merely a shortening of the *Absolute.*
2. ֹ or _ of the *Absolute* is (ô) unchangeable (**21.** 1); _ of the *Construct* is (ō) changeable (**21.** 3).
3. The *Absolute* is used chiefly as an adverbial accusative.
4. It is only to the *Construct* that prepositions may be prefixed.
5. It is only to the *Construct* that pronominal suffixes may be appended, and these suffixes may be either the subject or object of the Infinitive.
6. Before *vowel*-additions the characteristic ō is given to the first radical and shortened to ŏ (in an intermediate syllable). Before suffixes of the *second person*, the ō, though retained with the second radical, is shortened to ŏ.

[1] Stative verbs are those "which express (1) a bodily or physical state, as *to be great, deep, old;* (2) an affection of the mind or act of the senses (except *sight*), as *to mourn, rejoice, hate, hear;* (3) actions intransitive, or actions in which the reflex influence of the action upon the subject is very prominent, as *to die, approach, wear, hew wood.*"

44. The Imperative (Qal).

Tabular View.

5.	4.	1—3.		
מְלֹא(1.22)	קְטָל	*kill thou* (m.) (Qᵉṭōl)	קְטֹל	*Sg.* 2 *m.*

45. The Imperfect (Qal).

Tabular View.

Analysis.	Imperfect with ă.	Imperfect with ō.	Gen. Num. Per.
יִ, euphonic change for וּ of הוּא.	יִקְטַל	יִקְטֹל	*Sg.* 3 *m.*
תִּ, regular sign of the feminine.	תִּקְטַל	תִּקְטֹל	3 *f.*
תָּ, a fragment of אַתָּה.	תִּקְטַל	תִּקְטֹל	2 *m.*
תִּ, fragments of אַתְּי (אַתְּ)	תִּקְטְלִי	תִּקְטְלִי	2 *f.*
אֶ, a fragment of אָנֹכִי.	אֶקְטַל	אֶקְטֹל	1 *c.*
וּ, reg. plur. end. added to 3 m. sg.	יִקְטְלוּ	יִקְטְלוּ	*Pl.* 3 *m.*
נָה, fragment of הֵנָּה, added to 3 f. sg.	תִּקְטַלְנָה	תִּקְטֹלְנָה	3 *f.*
וּ, reg. plur. end. added to 2 m. sg.	תִּקְטְלוּ	תִּקְטְלוּ	2 *m.*
נָה, fragment of אַתֶּנָּה, added to 2 f. sg.	תִּקְטַלְנָה	תִּקְטֹלְנָה	2 *f.*
נ, fragment of אֲנַחְנוּ.	נִקְטַל	נִקְטֹל	1 *c.*

46. The Participles (Qal).

Tabular View.

1—4.		Participle Passive.	Participle Active.	Gen. and Num.
רֹמֶשֶׁת(1.21)	רֹמֵשׂ(1.26)	קָטוּל	קוֹטֵל	*Sg. m.*
מֹצְאִי(4.14)	יֹצֵא(2.10)	קְטוּלָה	קוֹטְלָה	*f.*
צֹעֲקִים(4.10)	סֹבֵב(2.11)		קוֹטֶלֶת	
אָרוּר(3.17)	הֹלֵךְ(2.14)	קְטוּלִים	קוֹטְלִים	*Pl. m.*
אֲרוּרָה(3.17)	עֹבֵד (4.2)	קְטוּלוֹת	קוֹטְלוֹת	*f.*

[1] Exodus.

44. The Imperative (Qal)

Notes on the Tabular View.

1. The Imperative is used only of the *second person.*
2. The Imperative like the Perfect has no prefixes, but has the same *terminations* (ִי _, וּ and נָה) as the Imperfect (45).
3. The (_) in the 2 *f. sg.* and 2 *m. pl.* arises from a Sh^{e}vâ, and the syllable is half open or intermediate, the Sh^{e}vâ being a half-vowel and vocal (23. 1).
4. Verbs **Middle E** (42. R. 1) and many (intransitive) verbs **Middle A** take (_) instead of (ַ_) in the Imperative.
5. The ה _ of the termination נָה is sometimes dropped; at times also נָה is written ֶן.

45. The Imperfect (Qal).

Notes on the Tabular View.

1. The Imperfect has *pre*-fixes as well as *suf*-fixes.
2. Verbs **Middle A** (*transitives*) have ō as the characteristic vowel of the Imperfect; but verbs **Middle E** and **Middle O**, and some verbs **Middle A** (*Statives*) have ă instead.
3. Verbs which have ă in the Imperfect, have it also in the Imperative (44. 4).
4. Before vowel-additions the characteristic vowel (ō or ă) is changed to a half-vowel (cf. 42. 3).
5. וּן, the longer form of the termination וּ, is frequently employed in its place, while נָה is not seldom written ֶן.
6. The (_) (ĕ), under the preformative אֶ, may be explained by the fact that אֶ seems, everywhere, to have a preference for that sound.
7. The Imperfect must not be regarded as the equivalent of the English *future.* It represents an action or event as *unfinished*, continued, whether in the past, present or future. It is, of course, most *frequently* employed in reference to future events, but not always so.

46. The Participles (Qal).

Notes on the Tabular View.

1. The Qăl has *two* Participles, but of these the Passive is probably a remnant of a lost passive conjugation.
2. In the Active וֹ, often written defectively (ֹ_), is unchangeable (ô); (ֵ_) (ē) before vowel-additions is rejected.
3. In the Passive (_) is tone-long (ā) and therefore changeable; וּ (û) is unchangeable.
4. Participles are *nominal* forms and are inflected like *nouns.*

Remark.—Verbs **Middle E** and **O** have instead of קוֹטֵל, a form similar to that of their Perfect, קָטֵל or קָטֹל.

47. The Niph'al Conjugation.

See Paradigm B.

3.[1]	2.		1.	
וָאֵחָבֵא *And I hid myself*.....(3.10)	הִקָּטְלִי	נִקְטְלָה	נִקְטַל	Perf.

יֻלְּדוּ *they were born* (6.1)	שֹׁרֶשׁ *root* / שִׁרֵּשׁ *uproot*	קָדַשׁ *be holy* / קִדֵּשׁ *sanctify*	רָדַף *follow* / רִדֵּף *pursue*

[1] Cf. also יִפָּרֵד (2.10), תִּפָּקַחְנָה (3.7), יִוָּלֵד (4.18), תִּשָּׁחֵת (6.11), תְּפָלֵּא (6.11).

[2] It is not thought necessary to cite the verses in which these words occur.

47. The Niphal Conjugation.

1. *Synopsis:*
   1) נ, assimilated and represented by Dāghēsh-forte in the Inf's., Impf., and Imv., characterizes this conjugation throughout.
   2) The (_) of the first radical is tone-long (ā).
   3) On the forms נִקְטֹל and הִקָּטֵל (Inf. abs.), see **41.** 2 R.
   4) ה of the Inf. const. is sometimes elided after a preposition.
2. *Inflection:* The inflection of the Nĭph'ăl is entirely analogous to that of the Qăl.

Remark 1.—The second radical often has (_) in the Impf. instead (_), *in pause.*

Remark 2.—The preformative of the 1 sg. (אִ) often has (_) instead of (_).

3. *Signification:* The meanings of the Nĭph'ăl are briefly as follows:
   1) It is primarily *reflexive*, cf. the Hĭthpă'ēl.
   2) It is chiefly used in a *passive* sense.

Remark.—The Nĭph'ăl is sometimes reciprocal (cf. נִלְחַם), and sometimes equivalent to the Greek *Indirect Middle* (cf. שָׁאַל).

48. The Pi'el and Pu'al Conjugations.

1. *Synopsis:*
   1) Dāghēsh-forte in the second radical characterizes these conjugations throughout.
   2) Păttaḥ (in the Perf., (_)) is the characteristic vowel of the Pĭ'ēl; (_), of the Pŭ'ăl.
   3) The Inf. const. (Pĭ'ēl) is often substituted for the Inf. abs.
   4) The Pŭ'ăl lacks an Imv.
   5) The מְ of the Participle is a fragment of מִי *who?*
2. *Inflection:* The inflection of the Pĭ'ēl and Pŭ'ăl is entirely analogous to that of the Qăl and Nĭph'ăl.

Remark 1.—The (_) of the Perf. (Pĭ'ēl) is attenuated from an original (_), as in the Hĭph'îl.

Remark 2.—Before terminations beginning with a consonant the (_) of the Pĭ'ēl always becomes (_).

Remark 3.—On the omission of Dāghēsh-forte, though *characteristic*, see **12.** 2.

3. *Signification:* The meanings of the Pĭ'ēl and Pŭ'ăl are briefly as follows:
   1) The Pĭ'ēl expresses *intensity* and *repetition.*
   2) The Pĭ'ēl expresses a *causative* idea.
   3) The Pĭ'ēl is used in the formation of *denominatives*, which frequently contain a *privative idea.*
   4) The Pŭ'ăl is the *passive* of the Pĭ'ēl, and sometimes of the Qăl.

49. The Hiph'il and Hoph'al Conjugations.

שָׁכַח *forget*	הִשְׁתַּכַּח	*be forgotten.*	קָדַשׁ *sanctify*	הִתְקַדֵּשׁ	*sanctify one's self.*

49. The Hiph'il and Hoph'al Conjugations.

1. *Synopsis:*

   1) הַ, in the Perf. attenuated to הָ, is the characteristic of the Hĭph'îl.
   2) הָ (hŏ) is the characteristic of the Hŏph'ăl.
   3) ה of both prefixes is elided after preformatives.
   4) The ִ _ of the Hĭph'îl Perf., Inf. Const., Impf. and Part. is derived from (_̇), which is found in the Inf. Abs., Imv. and Jussive Impf.
   5) The Imv. of the Hĭph'îl is like the Inf. Abs., not, as in other conjugations, like the Inf. Const.
   6) The Hŏph'ăl lacks an Imv.

2. *Inflection:* The inflection of the Hŏph'ăl is entirely analogous to that of the other conjugations, but that of the Hĭph'îl is somewhat different.

   1) Before *vowel*-additions (הָ _, וּ and ִ _), the vowel (î) of the second radical is *retained and accented.*
   2) Before *consonant*-additions, (תָּ, תֶּם, נָה etc.) this vowel is *changed* in the Perf. to (_̆), in the Impf. and Imv. to (_̇).
   3) In the so-called Jussive Impf. ( ) and with Vav Consecutive ( ) the vowel of the Hĭph'îl Impf. is (_̇), not ִ _.

3. *Signification:*

   1) The Hĭph'îl is *causative* of the Qăl.
   2) The Hŏph'ăl is *passive* of the Hĭph'îl, or of the Qăl.

50. The Hithpa'el Conjugation.

1. *Synopsis:*

   1) The prefixed syllable הִתְ, and Dāghēsh-forte in the second radical characterize this conjugation.
   2) The connection of the Hĭthpă'ēl and the Pi'ēl is to be marked.
   3) No case of a Hĭthpă'ēl Inf. Abs. occurs.
   4) The ת of the prefix הִתְ is always *transposed*, when it would stand before ס, שׁ or שׂ; it is *changed* to ט and *transposed* before צ; it is *assimilated* before ד, ט, or ת. (See 27. 2 and 3.)

2. *Inflection:* The inflection of the Hĭthpă'ēl is entirely analogous to that of the Pi'ēl.

3. *Signification:*

   1) The Hĭthpa'ēl is primarily *reflexive.*
   2) It sometimes has a *reciprocal* force, and often also that of the *Greek Indirect Middle.*
   3) It is rarely *passive.*

	יַהַרְגֵהוּ (4.8)		

X. Weak Verbs.

51. Classes of Weak Verbs.

There are three classes of the so-called *weak* verbs :

1. **Guttural Verbs ;** these are called
   1) **Pe Guttural,** if the *first* radical is a guttural ,
   2) **ʿAyin Guttural,** if the *second* radical is a guttural ;
   3) **Lamedh Guttural,** if the *third* radical is a guttural.
2. **Contracted Verbs ;** these are called
   1) **Pe Nun** (פ״נ), if the *first* radical is נ ;
   2) **ʿAyin Doubled** (ע״ע), if the *second* and *third* radicals are alike.
3. **Quiescent Verbs ;** these are called
   1) **Pe Yodh** (פ״י), if the *first* radical is י ;
   2) **ʿAyin Vav,** or **ʿAyin Yodh** (ע״ו or ע״י), if the *second* radical is ו or י ;
   3) **Lamedh ʾAleph** (ל״א), if the *third* radical is א ;
   4) **Lamedh He** (ל״ה), if the *third* radical is ה.

Remark 1.—These names are derived from the verb פָּעַל, which was formerly used as the paradigm-word.

Remark 2.—A single verb may, of course, have the peculiarities of two or even three classes.

52. Verbs Pe (פ) Guttural.

This class of verbs deviates from the regular or strong verb in the following particulars :

1. **The guttural prefers the guttural or a-vowels* (**28.** 1); hence (_) is depressed to (_), the latter being nearer the *a*-sound.

   Remark.—In the Qăl Impf. with ō, the original ă appears with the preformative.

2. †*The guttural prefers compound to simple Shᵉva* (**28.** 2):
   1) Under an *initial* guttural this ḥāṭēph is (_), but often (_) under initial א ;
   2) Under a *medial* guttural the ḥāṭēph corresponds to the preceding vowel.

   Remark 1.—All gutturals take compound Shᵉvâ at the beginning of a word, but the strong gutturals, when *medial*, often retain simple Shᵉvâ.

   Remark 2.—When the afformatives ה _, י_, and ו are added, and the preceding vowel is in consequence rejected (**22.** 3. 2), a preceding compound Shᵉvâ is always changed to its corresponding short vowel (**23.** 3), and the syllable thus formed is *half-open.*

3. ††*The guttural cannot be doubled* (**23.** 3), and the preceding vowel is in consequence lengthened.

Remark.—In הָיָה *be* and חָיָה *live*, the first radical is not treated as a guttural *except* that, when initial and vowelless, it has (_).

53. Verbs Ayin Guttural.

General View.

53. Verbs 'Ayin (ע) Guttural.

See Paradigm E.

This class of verbs deviates from the regular or strong verb in the following particulars:

1. * *The guttural prefers the guttural or a-vowels* (28. 1); hence
   1) It takes *after* it (_̲) instead of (·) in the Qăl Imv. and Impf.;
   2) It often changes a following (_̤) to (_̲), in the Pi'ēl Perf.;
   3) It restores the original (_̲) under the first radical in the Qăl Imv., *fem. sg.* and *masc. plur.*

   Remark. The guttural exerts less influence on a following than on a preceding vowel.
2. † *The guttural prefers compound to simple Sh^{e}va* (28. 2).
3. †† *The guttural cannot be doubled* (28. 3); hence in the Pi'ēl, Pu'ăl and Hithpă'ēl,
   1) Dāghēsh-forte is *rejected* and the preceding vowel is lengthened ((_̲) to (_̤), (_̲) to (_̄), (_̣) to (_̇)), as in the case of א and ר; or
   2) Dāghēsh-forte is *implied*, and the preceding vowel is retained short in an *intermediate* syllable (19. R.), as in the case of ה, ח, and ע.

General Remark.—In this class of verbs, the form of the Pi'ēl Inf. Abs. is the same as that of the Inf. Const.

54. Verbs Lamedh (ל) Guttural.

See Paradigm F.

This class of verbs deviates from the regular or strong verb in the following particulars:

1. * *The guttural prefers the guttural or a-vowels* (28. 1); hence
   1) It takes (_̲) instead of (·) in the Qăl Imv. and Impf.;
   2) It changes a preceding (_̤) to (_̲), except in the Infinitive Abs. and Participles; and
   3) It receives a Pattaḥ-furtive, when final and preceded by a heterogeneous long vowel (_̤, ◌ֳ, ◌ָ or ◌ֹ).
2. † *The guttural prefers compound to simple Sh^{e}va* (28. 2), but in this class, compound Sh^{e}vâ is substituted *only* before suffixes, the simple Sh^{e}vâ (syllable-divider) being retained before personal terminations.

Remark 1.—In the 2 f. sg. Perf. of all species a helping-vowel (_̲) is substituted for Sh^{e}vâ under the guttural.

Remark 2.—The form נִקְטֹל is used instead of הִקָּטֵל in the Niph'ăl Inf. Abs.

Remark 3.—The Inf's Abs. and Const. of the Pi'ēl are the same, except that the _̤ is retained in the former, but rejected in the latter.

55. Verbs Pe ʿAleph (פ״א).

See Paradigm J.

This class consists of *five* verbs with initial א; אָבַד *perish*, אָבָה *be willing*, אָכַל *eat*, אָמַר *say*, אָפָה *bake*. They deviate from the perfect or strong verb in the following particulars:

1. *The *first* radical א, in the *Qal Imperfect*, quiesces in ֹ (ô).

   Remark 1.—This ô is for â יֶאֱטַל = יֶאטַל = יֹאטַל.

   Remark 2.—א the preformative of the Impf. 1 pers. sg. is dropped before א the first radical.

2. †The *second* radical has in the Qăl Imperfect ă, but often in pause, ē. When the accent recedes this vowel often becomes ֶ (ĕ).

Remark 1.—*Outside of the Qal Imperfect*, these verbs are treated as verbs *Pe Guttural*.

Remark 2.—A few verbs, however, are treated, at one time as *Pe Aleph*, at another as *Pe Guttural*.

56. Verbs Pe Nun (פ״נ).

See Paradigm G.

This class of verbs deviates from the perfect or strong verb in the following particulars:

1. **Nun, initial and with only a Shᵉva (half-vowel), is rejected* (**26.** 1) in the Qăl *Inf. Const.* and *Imperative* of verbs with ă in the Impf.

   Remark 1.—The *Inf. Const.*, after the rejection of נ, assumes the feminine ending and becomes a Segholate.

   Remark 2.—In verbs with ō in the *Impf.*, נ is generally retained.

2. †*Nun, at the end of a syllable and with only a Shᵉva (syllable-divider), is assimilated* (**25.** 1) and represented by Dāghēsh-forte in the following consonant.

Remark 1.—Assimilation rarely takes place in verbs which have a guttural as the second radical.

Remark 2.—The ַ (ŏ) of the Hŏphʿăl becomes (ָ) in the sharpened syllable (**22.** 1).

Remark 3.—The verb נָתַן *give* is to be particularly noticed in that (1) it assimilates its *third* as well as its *first* radical, and (2) it has ē as the vowel of the Impf. and Imv.

Remark 4.—The verb לָקַח *take* treats ל like נ in the Qăl and Hŏphʿăl (**25.** 2), but in the Nĭphʿăl (נִלְקַח) the ל is retained.

[1] So few ע״ע forms occur in the opening chapters of Genesis, that it is judged best to take the forms of סָבַב *surround.*

57. Verbs Ayin Doubled (ע"ע).

See Paradigm H.

The deviation of this class of verbs from the perfect or strong verb is occasioned by the contraction of the second and third radicals. This contraction takes place in all forms except those which contain unchangeable vowels or Dāghēsh-forte. The following changes result from the contraction:

1. **The contracted monosyllabic stem takes the vowel of the second radical.* In every case the vowel is the same as that of the perfect verb, except that (1) ă instead of ē (**47.** 2 R. 1) is used in the Nĭphʿăl Impf. and Imv., and (2) ē *heigthened*, instead of î *lengthened*, from ĭ is used in the Hĭphʿîl.
2. †*Before the monosyllabic stem the preformative, which would stand in a simple syllable before the tone, takes a tone-long vowel* (**21.** 3. 1). Hence
   1) ā, lengthened from the original ă, appears in the Qăl *Impf.*, the Nĭphʿăl *Perf.* and *Part.*, and the Hĭphʿîl *Inf's.*, *Imv.* and *Impf.*
   2) ē, heightened from ĭ, appears in the Hĭphʿîl *Perf.*, and in a few cases of the Qăl *Impf.* with ă.
   3) û, lengthened from ŭ, appears throughout the Hŏphʿăl.

   Remark.—It often happens that a Dāghēsh-forte is inserted in the first radical, and the necessity of lengthening the preceding vowel thereby avoided.
3. ††*Before affomatives beginning with a vowel*, the Dāghēsh-forte, implied in the contracted radical, is inserted, and the preceding vowel is retained and accented.
4. ¶*Before affomatives beginning with a consonant*, a separating vowel is inserted, ô in Perfects, é in Imperfects and Imperatives. These vowels receive the tone, except in the case of ô before the terminations תֶּם and תֶּן.
5. ⁑*The removal of the accent occasions the following vowel-changes:*
   1) The tone-long vowels of the preformatives become Shᵉvâ (**22.** 3. 1).
   2) The tone-long stem-vowels ō and ē are shortened to ŭ and ĭ (**22.** 1. 1).
6. ⁑⁑*The regular Intensive conjugations occur, viz.:* Pĭʿēl, Pŭʿăl and Hĭthpăʿēl; but more often for these there are substituted,
   1) The so-called Pôʿēl, Pôʿăl and Hĭthpôʿēl, formed by inserting ו after the first radical; or
   2) The so-called Pĭlpēl and Hĭthpălpēl, formed by reduplicating the contracted stem.

[1] Meaning, *to kindle.*

58. Verbs Pe Yodh and Pe Vav (פ״י and פ״ו).

See Paradigm I.

The so-called Pē Yōdh (פ״י) verbs include also what are more properly termed Pē Vāv (פ״ו) verbs. It is best to treat these separately, in as much as they differ in both origin and inflection.

A. Verbs Pe Vav (פ״ו).

In these verbs the first radical was originally *Vav*, and it undergoes the following changes:

1. **In the Qal Impf., Inf. const. and Imv.*, two methods of treatment exist:
   1) In some verbs[1] the radical is entirely rejected, in which case
      (1) the vowel of the preformative in the Impf. becomes ê, while the vowel of the second radical is ē, or, with a guttural, ă;
      (2) The *Inf.* const. takes on the feminine ending ת, thus artificially preserving the triliterality of the root.
   2) In some verbs[2], however, the radical, changed to י, is retained, and, after the ĭ of the preformative, is quiescent, in which case the second radical has ă.
2. †*Whenever*, outside of the forms just mentioned, *the first radical is initial*, it becomes י.
3. ‡*Whenever*, in the course of inflection, *the first radical is medial*, it is retained as ו, but
   1) It appears as a consonant only in the Nĭph'ăl Inf., Imv. and Impf.;
   2) It unites with ă and forms the diphthongal וֹ (a+v=ô), in the Nĭph'ăl Perf. and Part., and throughout the Hĭph'îl;
   3) It unites with ŭ and forms וּ (u+v=û) throughout the Hŏph'ăl.

B. Verbs Pe Yodh (פ״י)[3].

Of these verbs no Nĭph'ăl or Hŏph'ăl forms occur, but

1. *In the Qăl, the י is retained throughout, quiescing in ĭ in the Impf. (cf. above **1.** 2)); likewise also
2. †In the Hĭph'îl, the י is retained, and uniting with ă of the preformative, it becomes יֲ (a+y=ê).

Remark.—In a few verbs[4] of this class the י is treated like נ and assimilated.

59. Verbs ʿAyin Vav and ʿAyin Yodh (ע״ו, ע״י).

See Paradigm K.

The deviation of this class of verbs from the regular or strong verb is occasioned by the weakness of the second radical ו or י. Verbs ʿAyin Yōdh differ from those ʿAyin Vāv only in the Qăl Inf. const., Imv. and Impf.:

1. **The middle radical never appears as a consonant*, but either
   1) quiesces in the original (homogeneous) vowel ◌ִ, as in the Qăl Inf. const., Imv. and Impf.;[1] or
   2) unites with the accompanying vowel, as throughout the Nĭphʿăl, except in the Infinitive Abs., or
   3) is entirely rejected, as in the Qăl Perf., Inf. Abs. and Part., Nĭphʿăl Infinitive Abs., and throughout the Hĭphʿîl and Hŏphʿăl.[3]

Remark.—In the Qăl Inf. const., Imv. and Impf., י of verbs ע״י is treated in the same manner as ו of verbs ע״ו.

2. †*Before the monosyllabic stem, the preformative, which would stand in a simple syllable before the tone, takes a tone-long vowel* (**21.** 3. 1). Hence,
   1) ā, lengthened from the original ă, appears in the Qăl *Impf.*, the Nĭphʿăl *Perf.* and *Part.*, and the Hĭphʿîl *Inf's*, *Imv.* and *Impf.*;
   2) ē, heightened from ĭ, appears in the Hĭphʿîl *Perf.*, and *Part.*
   3) û, lengthened from ŭ, appears throughout the Hŏphʿăl.

3. ††*Before affomatives beginning with a vowel*, the tone contrary to the analogy of the strong verb, is upon the *penult*, except in the Hŏphăl.

4. ¶*Before affomatives beginning with a consonant*, a separating vowel is inserted, ô in Nĭphʿăl and Hĭphʿîl Perfects, é in the Qăl Imperfect. These vowels receive the tone, except before the terminations תֶּם and תֶּן.

Remark.—In the Nĭphʿăl, ô of the stem becomes û where the inserted ô is employed.

5. §*The removal of the accent changes* the tone-long vowels ā (Qăl and Nĭphʿăl) and ē (Hĭphʿîl) to Shᵉvâ (**22.** 3. 1).

6. §§The regular Intensive conjugations, Pĭʿēl, Pŭʿăl and Hĭthpăʿēl, occur very seldom ; there are, however, substituted for them,
   1) The so-called Pôlēl, Pôlăl, and Hĭthpôlēl, formed by inserting ו and reduplicating the third radical ; or
   2) The so-called Pĭlpēl and Hĭthpălpēl, formed by reduplicating the contracted stem.

60. Verbs Lamedh 'Aleph (ל״א).

See Paradigm M.

This class of verbs deviates from the perfect or strong verb in the following particulars:

1. **Final* א is always quiescent, and lengthens a preceding ă to ā.

   Remark.—The Qăl *Impf.* and *Imv.* have *a* after the analogy of verbs Lāmĕdh Guttural.

2. †*Medial* א before *consonant*-additions quiesces
   1) in ◌ָ (ā), in the Qăl Perfect (Middle A);
   2) in ◌ֵ (ē), in the Qăl Perfect (Middle E), and in the other Perfects;
   3) in ◌ִ (é), in all Imperfects and Imperatives.

   Remark.—א losing thus its consonantal character is sometimes rejected.

3. *Medial* א before *vowel*-additions is treated as a regular consonant.

Remark.—This class shows a manifest tendency to adopt the vowels of verbs Lāmĕdh Hē.

61. Verbs Lamedh He (ל״ה).

See Paradigm L.

This class of verbs would properly be termed ל״ן or ל״י, since ן or י is the third radical, appearing in the Qăl Part. pass., while ה is not a radical, but a mere vowel-sign:

1. *When the original* ן *or* י *would be final*, it is rejected (except in the Qăl Part. pass.) and the vowel-letter ה is substituted for it, indicating the vowel which arose from the union of the third radical with the preceding vowel. Hence there occur the following endings:
   1) הָ◌, in all Perfects;
   2) הִ◌ (a+y=é), in all the Imperfects and Participles;
   3) הֵ◌ (a+y=ē), in all Imperatives;
   4) הֵ◌, in the Infinitives absolute; but הֶ◌ in Hĭph. and Hŏph.;
   5) וֹת, the fem. term. תָ being added, in all Infinitives const.

2. *When the original* ן *or* י *would not be final*,
   1) *before vowel-additions*, it is usually rejected together with the preceding vowel; it is however retained in pausal forms; but
   2) *before consonant-additions*, it unites with the preceding vowel (ă), and forms the diphthongal *ay*, which
      (1) becomes יֶ◌ (ê) in the Perfect of all passive conjugations, but
      (2) *may* be thinned to יִ◌ (î) in the other Perfects, and
      (3) becomes יִ◌ (é) before נָה of Imperfects and Imperatives.

Remark 1.—The Perfect 3 fem. sg. has the old ending תָ◌, to which הָ◌ (euphonic) is added.

Remark 2.—Verbs ל״ה when *apocopated* in the Imperfect lose הִ◌.

62. Verbs with Suffixes.

A. The Perfect with Suffixes.

1.	2. 1)	2. 2)	2. 3)
קָטַלְתָּ / קָטַלְתְּ	קְטַלְתָּ־נוּ	קְטָלְךָ	קְטָלְךָ־הוּ

קָטְלֵם	קְטָלְכֶם	קָטְלוֹנִי (2 f. pl.)	הַקְטִילֵהוּ	מְקַטְלֵךְ

62. Verbs with Suffixes.

See Paradigm C.

When the object of a verb is a pronoun, it is often expressed by the the union of אֵת, the sign of the definite object, and the pronominal suffix. More often, however, the pronominal suffix is joined directly to the verbal form. This produces certain changes of termination and stem.

A. The Perfect with Suffixes.

1. *Changes of termination*: The older forms are in many cases restored, as תְּ _ for ה _ (3 *sg. fem.*), תִּי for תְּ (2 *sg. fem.*), תּוֹ (תּוֹם) for תֶּם (2 *pl. masc.*).

   Remark.—תָּ (2 *sg. masc.*) sometimes becomes תַ before נִי.

2. *Union of termination and suffix;*
   1) Verbal forms ending in a *vowel* take the simple form of the suffix.
   2) Verbal forms ending in a *consonant* take a connecting vowel, generally _, but before ךָ, כֶם and כֶן, a Shᵉvâ (half-vowel).

   Remark.—Forms ending in תְּ _ (for ה _) take no connecting vowel before suffixes consisting of a syllable; before other suffixes it draws the tone to the penult.

   3) The following contractions take place:
      (1) הוּ _ is contracted to וֹ;
      (2) יהוּ _ is contracted to יְ_;
      (3) תְּהוּ _ is contracted to תּוֹ_;
      (4) הָ _ is contracted to הַ_;
      (5) תָּהָ _ is contracted to תָּה _.

3. *Changes of stem:*
   1) Before all suffixes the tone-long ā of the first syllable, no longer standing before the tone, is changed to Shᵉvâ.
   2) Where ă of the second syllable *has been rejected*, as before personal endings beginning with a vowel, it is restored and, in the simple syllable, lengthened.

Remark 1.—Verbs Middle E retain ē before suffixes.
Remark 2.—In the Pĭʿēl, (_) becomes (_) before ךָ, כֶם, כֶן, but elsewhere is rejected.

B. Infinitive, Imperative and Participles with Suffixes.

1. *The Infinitive, before suffixes*, assumes the form קָטְלְ, the ŏ being drawn back.

   Remark 1.—The first syllable is always half-open or intermediate.
   Remark 2.—Before ךָ, כֶם and כֶן the form קִטְלַ is more frequently employed.

2. *The Imperative*, before suffixes,
   1) in the 2 m. sg. follows the analogy of the Infinitive;
   2) in the 2 f. sg. and 2 m. pl. suffers no change.
   3) in the 2 f. pl. has the form קִטְלוּ instead of קִטְלְנָה.

   Remark 1.—The Imperative in ă, retains and lengthens the ă as does the Imperfect.
   Remark 2.—The Infinitive may be construed with either the *verbal* suffix (נִי) or the *nominal* suffix ִי _.
   Remark 3.—In the Hĭphʿîl the form הַקְטִיל is used instead of הַקְטֵל.

3. *The Participles*, before suffixes, are treated as nouns (67).

C. The Imperfect with Suffixes.

1.	2. 1)	2. 2)	
תִּקְטֹלְנִי (3 f. pl.)	יִקְטְלוּנִי	יִקְטְלֵנִי	יִקְטָלֵךְ
תִּקְטֹלְם (3 f. pl.)	יִקְטְלוּהוּ	יִקְטְלֵהוּ	יִקְטָלֵכֶם
תִּקְטֹלְוּהוּ (2 f. pl.)	תִּקְטְלִינוּ	יַהַרְגֵהוּ	תִּקְטָלֵךְ
תִּקְטֹלְוּהָ (2 f. pl.)	תִּקְטְלוּם	יַנִּיחֵהוּ	תִּקְטָלֵכֶם

3.		Remarks.	4.

אֶקְטֹל	יִקְטֹל	תְּקַטְּלֵנִי	יִקְטְלֵנּוּ
אֶקְטְלֵהוּ	יִקְטָלֵכֶן	תְּקַטְּלֵךְ	יִקְטְלֶנָּה

63. Special Forms.

1. 1)		1. 2)	
אֵרְדָה (18.21)	*I* will *go down*	יְהִי (1.3)	*Let there be.*
אַהַרְגָה (27.41)	*I* will *kill.*	תַּדְשֵׁא (1.11)	*Shall cause to spring forth.*
נִלְבְּנָה (11.3)	*Let us make brick.*	תּוֹצֵא (1.24)	*Shall cause to go forth.*
נִשְׂרְפָה (11.3)	*Let us burn.*	יֶרֶב (1.22)	*Let multiply.*
נֵרְדָה (11.7)	*Let us go down.*	אַל־תַּעַשׂ (22.12)	*Do not do.*

2. 1)	2. 2)	2. 3)	3.
וְאֶשְׁלְחָה (32.6)	וַתּוֹצֵא (1.12)	וַיֹּאמֶר (1.3)	סוֹרָה (4.1)[1]
—	וַיַּשְׁכֵּן (3.24)	וַיְבָרֶךְ (1.22)	שְׁבָה (4.1)[1]
וַיַּרְא (1.4)	וַיָּבֵא (2.19)	וַיִּשַּׁם (2.8)	(גַּל)
וַיַּבְדֵּל (1.4)	וַיָּקָם	וַיִּצַּר (2.19)	שִׁמְעוֹן (4.23)
וַיַּעַשׂ (1.7)	וַתּוֹסֶף (4.2)	וַתֹּאמֶר (3.2)	קְרָאן (2.20)[2]

[1] Ruth. [2] Exodus.

C. The Imperfect with Suffixes.

1. *Changes of termination*: נָה (2 and 3 *pl. fem.*) becomes ן.
2. *Union of termination and suffix:*
   1) Verbal forms ending in a *vowel* take as in the Perfect the simple form of the suffix;
   2) Verbal forms ending in a *consonant* take a connecting vowel, generally (ַ), but before ךָ, כֶם and כֶן, a Shᵉvâ (half-vowel).
3. *Changes of stem:*
   Before suffixes, the forms of the Qăl Impf., which end in a consonant, change ō to Shᵉvâ, but before ךָ, כֶם, כֶן, the ō becomes ŏ.

Remark 1.—Verbs with (ָ) in the Imperfect (e. g. ʿAyĭn and Lāmĕdh Guttural) retain the ă and lengthen it.

Remark 2.—In the Pĭʿēl, (ִ) like ō of the Qăl becomes Shᵉvâ, but (ִ) before ךָ, כֶם and כֶן; while the î of the Hĭphʿîl remains.

4. *Nun Epenthetic or Demonstrative.*

In pausal or emphatic forms there is often inserted, instead of a union-vowel, a union-syllable נַ ָ or נָ ָ, of which the נ is generally assimilated (see Paradigm A).

63. Special Forms.

1. In addition to the common form of the Imperfect, there are in Hebrew two special forms, which are used to express certain special significations:
   1) *The Cohortative Imperfect:*
      (1) The *form* of this Imperfect is characterized by the ending הָ ָ, before which a preceding vowel, unless unchangeable, becomes Shᵉvâ. It is used only in the *first person*, sg. or plur.
      (2) The special signification of the Cohortative is that of *desire*, *determination*, and in the plur., that of *exhortation.*
   2) *The Jussive Imperfect:*
      (1) This Imperfect is characterized, wherever it is possible, by a shorter form of the verb. It is found in the Hĭphʿîl of the Strong verb, in the Qăl and Hĭphʿîl of verbs ע״י, and in all conjugations of verbs ל״ה. It is used only in the second and third persons.
      (2) The special signification of the Jussive is that of *wish*, *command;* with a negative, *dissuasion*, *prohibition.*
2. *The Imperfect with Vav Consecutive:*
   A special form of the Imperfect is used, where possible, with the Vav Consecutive, viz.:
   1) A form similar to that of the Cohortative in the first person;
   2) A form similated to that of the Jussive in the second and third persons; or
   3) A form marked by the recession of the accent.

Remark.—The accent never recedes, however, except to a simple syllable.

3. *The Imperative:* There occur special forms of the Imperative after the analogy of the Cohortative Imperfect:
   1) *A lengthened form*, הָ ָ being affixed; this is often more emphatic than the regular form.
   2) *A shortened form*, ה ָ of verbs ל״ה being rejected, and sometimes ה ָ of נָה.

XI. Nouns.

64. Gender and Number.

[1] Ex-

XI. Nouns.[1]

64. Gender and Number.

1. Nouns in Hebrew have *two* genders:
   1) *Masculine*, which has no particular indication;
   2) *Feminine*, which is usually indicated by the termination ה ָ or ת.

Remark 1.—ת is added to forms ending with a vowel, without change; but to forms ending with a consonant it is joined by means of the helping vowel (ַ) or, after gutturals (ָ).

Remark 2.—The ending ת occurs less frequently than ה ָ, and often with words which have feminines also in ה ָ.

Remark 3.—The original feminine ending was ת ַ, from which ה ָ is derived by the apocopation of ת, and the lengthening of ă to ā; ה being only a vowel-letter.

2. Nouns in Hebrew have *three* numbers:
   1) *Singular;*
   2) *Plural*, ending in ִים (*masc.*), וֹת (*fem.*);
   3) *Dual*, ayim ֵיִם.

Remark 1.—Nouns ending in ִי ַ have plurals in ַיִם, contracted to ִים.

Remark 2.—Nouns ending in ה ֶ, lose their ending before dual and plural terminations.

Remark 3.—The ending וֹת is either added directly to a singular form, or takes the place of ת ַ, ת ֶ, or ה ָ of the singular.

Remark 4.—Many masculine nouns have feminine plural endings and many feminine nouns masculine plural endings.

Remark 5.—The dual is, for the most part, used only of objects which go in pairs.

Remark 6.—מַיִם (*waters*) and שָׁמַיִם (*heavens*) are irregularly accented on the penult.

65. State.

1. Nouns in Hebrew are said to have or to be in certain *states:*
   1) A noun is in the *Absolute* state when it is *not* dependent upon another noun or pronoun.
   2) A noun is in the *Construct* state when it is dependent upon another noun or pronoun.

Remark—In Latin or Greek, the *second* of two nouns, which stand in close relation, suffers change, but in Hebrew it is the *first*. These changes are due to the fact that the tone hastens on to the second noun.

2. The following changes of *termination* take place in the formation of the *Construct State:*
   1) The endings ִים ַ and ֵיִם ַ lose ם and the vowel becomes ִי ֲ.
   2) The later feminine termination ה ָ is always restored to the original ת ַ; ת ֶ and וֹת suffer no change.
   3) Nouns in ה ֶ change this to ה ֲ, and nouns in ִי ַ change this to ִי ֲ. [For changes of *stem*, see 68.]

[1] The *Noun* embraces the substantive, the participle and the adjective.

66. Ancient Case-Endings.

3.	2	1.
חַיְתוֹ (1.24)	קוֹלִי תַּחֲנוּנָי (116.1)[1]	שָׁמַיְמָה (15.5) *heaven-ward*

(פָּנֶיהָ)	(קוֹלָיו)	מֵחֶלְבֵהֶן (4.4)	(סוּסַיִךְ)

[1] Psalm. [2] Deut. [3] Isaiah. [4] Numbers.

66. Ancient Case-Endings.

There are found in Hebrew what seem to be the remains of former case-endings. They are

1. ה ָ (generally unaccented), termed *local* or *directive*, and used to denote *direction* or *motion*.

   Remark.—This ה ָ is often used in a weaker sense, indicating the place *where*; with a preposition it often seems to have entirely lost its original force.

2. י ַ (usually accented), which was used to indicate the *construct state*. It is still found in poetry, in proper names, and with some particles. It has, however, lost all significance.

3. ִי (always accented), which occurs far less frequently than י ַ, and chiefly with nouns in the construct relation.

67. Nouns with Suffixes.

See Paradigms H and N.

Nouns take *before suffixes*, for the most part, the forms of the construct state. Here only the form of the suffix will be treated:

1. *Suffixes to Singular Nouns:*
   1) Nouns, ending in the construct state with a *vowel*, receive the suffixes without a union-vowel.
   2) Nouns, ending in the construct state with a *consonant*, take a union-vowel, which is
      (1) ָ generally in the 3d person; but
      (2) ָ in the 3d person of forms ה"ל, in the 2d fem. (sg.) and in the 1st plur.
      (3) ַ before ךָ ,כֶם and ן.ֶ

   Remark 1.—הָ ָ is contracted for ה ָ, וֹ for הוֹ ָ (29. 2. R.).

   Remark 2.—ךָ ַ becomes, in pause, ךָ ָ (24. 2).

   Remark 3.—The ending of the fem. construct, ת ַ, becomes ת ָ before the light suffixes.

2. *Suffixes to Plural Nouns:*
   In the case of *plural nouns* suffixes are attached to the original ending of the *construct plural*, viz.; י ֵ, which
   1) remains unchanged in the 1st masc. sing. (י ֵ) and the 2d fem. sing. (ִיךְ ֵ); the י of the suffix being absorbed by the final י in the former case, and joined by the helping ֵ in the latter case;
   2) is contracted into ê (י ֵ) in the 3 masc. sing. and throughout the plural;
   3) loses י and lengthens ă to ā in the 3 *masc.* sing.;
   4) loses י and deflects ă into é (י ֵ) in the 2 *masc.* and 3 *fem.* sing.

Remark 1.—י, though in fact abandoned, is often retained orthographically.

Remark 2.—Although י ֵ is a plural sign, suffix-forms containing it are appended to feminine plurals in וֹת, thus making a double indication of the plural idea.

68. Changes of Stem.

1. 1)	1. 2)	2. 1)	2. 2)
גָּדוֹל	גְּדוֹלִים	דָּבָר	דִּבְרִי
מָאוֹר	מְאוֹרוֹת	(דָּבָרֵיכֶם)	דִּבְרֵיכֶם
לֵבָב	לְבָבִים	חָכָם	חַכְמִי
כָּנָף	כְּנָפַיִם	(חָכְמֵיכֶם)	חַכְמֵיכֶם
עָוֹן	עֲוֹנִי	זָקֵן	זִקְנִי
מֹצָא	מְצָאִי	(זִקְנֵיהֶם)	זִקְנֵיהֶם

3. 1)	3. 2)	4. 1)	4. 2)
יָדְךָ	יָדֶיךָ	רָקִיעַ *abs.*	רְקִיעַ *const.*
דָּמְךָ	דְּבָרֶיךָ	פָּנִים *abs.*	פְּנֵי *const.*
דְּבָרְךָ	חֻכַּמְתֶּךָ	זָהָב *abs.*	זְהַב *const.*
חָכְמָתְךָ	זְקֻנֶיךָ	זָקֵן *abs.*	זְקַן *const.*

5.

מֶלֶךְ	מַלְכָּה / מַלְכִּי	מֶלֶךְ	מְלָכִים / מְלָכוֹת
בַּעַל	בַּעֲלָה / בַּעֲלִי	עֶצֶם	עֲצָמַי
צֶלֶם	צַלְמוֹ	יֶלֶד	יְלָדִים
זֶרַע	זַרְעוֹ	רֶגֶל	רַגְלַיִם
		קֶרֶן	קְרָנַיִם

6.		7.	
מְקוֹם *abs.*	מְקוֹם *const.*	רַב (רָבַב) *masc.*	רַבָּה *fem.*
עָלֶה *abs.*	עֲלֵה *const.*	גַּן (גָּנַן) *masc.*	גַּנָּה *fem.*
רֹעֶה *abs.*	רֹעֵה *const.*	אַף (אָנַף) *sing.*	אַפַּיִם *dual.*
עֹשֶׂה *sing.*	עֹשִׂים *plur.*	חֹק (חָקַק) *sing.*	חֻקִּים *plur.*
שָׂדֶה *sing.*	שָׂדוֹת *plur.*	אֵם (אָמַם) *sing.*	אִמּוֹת *plur.*

68. Changes of Stem.

The stem of a noun is subject to *change*, (1) when the noun is in the construct relation with a following noun, (2) when terminations of gender and number are affixed, and (3) when pronominal suffixes are appended. These changes of stem are due principally to the shifting of the tone. They may be classified as follows:

1. Before terminations of gender and number (*absolute*) and before monosyllabic suffixes, *the tone is shifted one syllable*, in which case
   1) a penultimate tone-long (originally short) vowel becomes Sh^{e}vâ, because it ceases to stand before the tone;
   2) an ultimate tone-long (originally short) vowel is retained in the simple syllable before the tone.

   Remark.—In participial forms, however, an ultimate tone-long ◌ֳ becomes Sh^{e}vâ.
2. Before terminations of the dual and plural *construct*, and before grave suffixes, the tone is shifted two syllables, in which case
   1) a penultimate tone-long (originally short) vowel is shortened;
   2) an ultimate tone-long (originally short) vowel becomes Sh^{e}vâ.

   Remark.—According to 2. 1), the tone-long vowel is shortened, e. g. ā to ă; the ă is often still further attenuated to ĭ.
3. Before the union- (half) vowel Sh^{e}vâ, a penultimate tone-long vowel
   1) is retained in a simple syllable, *in the case of* דָ◌ֳ; but
   2) is shortened, and stands in a half-open syllable, in the case of כָּם and כֶּן.
4. In the case of the Singular of the Construct, when the tone goes forward to the next word,
   1) a penultimate tone-long vowel becomes Sh^{e}vâ;
   2) an ultimate tone-long vowel (ā or ē) is shortened.
5. Certain nouns, really monosyllabic, are written and pronounced as dissyllables, a helping vowel ĕ, or after a guttural ă, being inserted. These are termed *Segholates*, and have their origin as follows:

A Class.	I Class.	U Class.	
קַטְלָ	קִטְלָ	קֻטְלָ	primary form;
קַטְלָ	קִטְלָ	קֻטְלָ	under the tone;
קַטֶלָ	קִטֶלָ	קֻטֳלָ	with the helping vowel.

   These are peculiar in that
   1) Suffixes are appended in the sing. to the primary form;
   2) Before the plur. endings, and before the light suffixes with the *plur. masc.*, a pretonic ◌ֲ is inserted, and the original vowel becomes Sh^{e}vâ.
   3) The dual sometimes follows the analogy of the sing. suffixes, sometimes that of the plur. endings.

   Remark.—Segholate ע״ו and ע״י forms contract *av* and *ay* to ô and ê in the construct and before suffixes.
6. Noun-stems from verbs ל״ה,
   1) Change ה◌ֳ to ה◌ֲ in the formation of the *construct;*
   2) Reject ה◌ֲ before all terminations of gender and number, and before suffixes.
7. Noun-stems from verbs ע״ע, before a termination with initial vowel,
   1) Receive Dāghēsh-forte in the contracted radical,
   2) Shorten a preceding long vowel.

69. Remarks on Paradigms of Masculine Nouns.

See Paradigm O.

A. Declension I.

This declension includes all so-called Segholates (see 68). The following explanations of the Paradigms are to be marked:

1. Paradigms *a*, *b*, *c* exhibit *strong* forms; the primary stems סֵפֶר, מַלְךְ and קֹדֶשׁ, by the introduction of the helping-vowel and through the influence of the tone, becoming סֵפֶר, מֶלֶךְ, and קֹדֶשׁ.
2. Paradigms *d*, *e*, *f* exhibit *guttural* forms; ַ is consequently used instead of ֶ as a helping-vowel.

Remark.—It will be noted in respect to these paradigms that

1) The Construct is the same in form as the Absolute;
2) Singular suffixes are appended to the primary form;
3) A pretonic ֶ is inserted before the plural ending ִים;
4) This pretonic ֶ remains before light suffixes, but is rejected in the construct and before grave suffixes.
5) The Dual generally follows the analogy of the plural, but sometimes that of the light suffixes.

3. Paradigms *g*, *h*, *i* exhibit ע״ו and ע״י forms, in which the primary forms מָוֶת, זַיִת and שַׁוְט are contracted to מוֹת, זֵית (except in the absolute) and שׁוֹט.
4. Paradigm *k* exhibits a ל״ה form, in which the original י appears.
5. Paradigms *l*, *m*, *n* exhibit ע״ע forms, in which אִמְּם יַמְּם and חֻקְּק are the primary forms. Under the tone the vowels are regularly heightened. Before terminations beginning with a vowel, the doubling appears.

B. Declension II.

This declension includes all nouns which originally had short vowels in both syllables. The following explanations of the Paradigms are to be marked:

1. Paradigms *a*, *b* exhibit forms of which the primary forms are (qăṭăl) דָּבָר and חָכָם. Here ă of the first syllable *before*, and ă of the second syllable *under* the tone is heightened.
2. Paradigms *c*, *d*, *e* exhibit forms of which the primary forms are (qăṭĭl) זָקֵן, כָּתֵף, and חָצֵר. Here ă *before* and ĭ *under* the tone are heightened.

Remark.—It will be noted in respect to these paradigms that

1) כָּתֵף is, in fact, converted into a Segholate;
2) The stem-changes are those described in 68.

3. Paradigm *f* exhibits a form ל״ה, of which the primary form is (qăṭăl) שָׁדַי. Here the ה ַ becomes ה ָ, in the Construct, and is dropped before all terminations (68).

Remark.—The original form שָׁדַי exists by the side of שָׁדֶה, and there are many forms in which the ה ַ has been dropped in the absolute state, e. g., יָד for יָדֶה.

C. Declension III.

This declension includes all nouns which have an unchangeable vowel in the first syllable, but a tone-long (originally short) vowel in the second syllable:

1. Paradigm *a* exhibits a form of which the primary form is (qôṭăl) עוֹלָם. Here the original short vowel is retained *heightened* before and under the tone, but is elsewhere changed to Sh^{e}vâ.

2. Paradigm *b* exhibits a form of which the primary form is (qôṭĭl) אֵיב. Here the originally short vowel (1) is retained (or deflected to ĕ) before כֶּם, ךְ and כֶן; (2) is heightened *under* the tone, but (3) becomes Sh^{e}vâ *before* the tone.

3. Paradigm *c* exhibits a ל״ה form of which the primary form is (qôṭăl) חוֹזִי. Here as above (B.3) the short vowel is entirely rejected before all terminations.

D. Declension IV.

This declension includes all nouns with an unchangeable vowel in the second syllable.

1. Paradigm *a* exhibits a form of which the primary form was (qăṭîl) פָּקִיד. Here the originally short vowel is rejected whenever it ceases to be pretonic.

2. Paradigm *b* exhibits a form of which the primary form was (qăṭîl) עָנִי. Here the final י was blended with î, but appears before additions, protected by Dāghēsh-forte.

3. Paradigm *c* represents all forms in which both syllables have unchangeable vowels, and which consequently suffer no change.

70. Remarks on Paradigms of Feminine Nouns.

1. Declension I includes all feminine Segholates: Paradigms *a*, *b*, *c* representing stems with an original ă, ĭ, ŭ; Paradigm *d* representing a form ע״ע; Paradigm *e* representing a Segholate form with ת. (Cf. Infinitives Construct of verbs פ״ו and פ״נ).

2. Declension II includes all feminines which originally had short vowels in both syllables (qaṭalat); Paradigm *a* representing a regular form, Paradigm *b* a form with a guttural, Paradigm *c* a ל״ה form.

3. Declension III includes feminine nouns with unchangeable vowel in first, changeable in second syllable.

4. Declension IV includes those forms which have unchangeable vowels after the vowel of the first syllable has become Sh^{e}vâ.

71. Irregular Nouns.

There are in Hebrew several nouns which present certain peculiarities. The following list contains the most common of these:

1. אָב (for אַבְה) *father*, *const.* אֲבִי, *with suff.* אָבִי (*my f.*), אָבִיךָ, אָבִיךְ, אָבִיהוּ, אָבִיהָ, אֲבִיכֶם, אֲבִיהֶם, אָבִיו or אָבְיוֹ; *plur.* אָבוֹת.

2. אָח (for אַחְה) *brother*, *const.* אֲחִי, *with suff.* אָחִי (*my b.*) אָחִיךָ, אָחִיךְ, אָחִיהוּ, אָחִיהָ, אֲחֵיכֶם, אֲחֵיהֶם, *plur. const.* אֲחֵי. *Plur. abs.* אַחִים (*D. f. implic.*), אַחַי, אַחֶיךָ, אַחֶיהָ, but אֶחָיו.

3. אֶחָד (for אַחַד with *D. f. implic.*), *const.* אַחַד, *fem.* אַחַת (for אַחֲדַת). *Plur.* אֲחָדִים *some, the same.*

4. אָחוֹת (from אַחַוַת) *sister*, *const.* אֲחוֹת, *with suff.* אֲחוֹתִי.

5. אִישׁ (for אֲנְשׁ attenuated from אֲנָשׁ) *man; plur.* אֲנָשִׁים, *const*, אַנְשֵׁי; seldom אִישִׁים.

6. אִשָּׁה (for אֲנְשָׁה), *const.* אֵשֶׁת (for אִשְׁתְּ), *with suff.* אִשְׁתִּי, אִשְׁתְּךָ; *plur.* נָשִׁים (for אֲנָשִׁים), *const.* נְשֵׁי, *with suff.* נְשֵׁיהֶם, נָשָׁיו.

7. אָמָה *maid-servant; plur.* אֲמָהוֹת, *const.* אַמְהוֹת.

8. בַּיִת *house*, *const.* בֵּית; *plur.* בָּתִּים (bâttîm or bôttîm). D. f. distinguishes it from בָּתִּים (בוּת); *const.* בָּתֵּי, *with suff.* בָּתֵּיהֶם.

9. בֵּן (for בְּנְ, from בָּנָה *build*), *son*, *const.* בֶּן־, בִּן־; *with suff.*, בְּנִי, בִּנְךָ, *plur.* בָּנִים, *const.* בְּנֵי.

10. בַּת (for בַּנְתְּ fr. בֵּן), *with suff.* בִּתִּי (for בִּנְתִּי); *plur.* בָּנוֹת (as if from בָּנָה), *const.* בְּנוֹת.

11. חָם *father-in-law*, like אָח.

12. יוֹם (for יָוֹם) *day*, *plur.* יָמִים (for יְוָמִים), *const.* יְמֵי, *dual* יוֹמַיִם.

13. מַיִם (*plur.*) *water*, *const.* מֵימֵי, מֵי.

14. עִיר *city*, *plur.* עָרִים, *const.* עָרֵי.

15. פֶּה *mouth*, *const.* פִּי, *with suff.* פִּי (*my m.*) פִּיךָ, פִּיו and פִּידוּ, פִּיהָ, like אָב; *plur.* פִּים and פִּיוֹת.

16. רֹאשׁ (for רַאשׁ = רַאְשׁ), *plur.* רָאשִׁים (for רְאָשִׁים) *const.* רָאשֵׁי.

72. Numerals.

See Paradigm N.

A. Cardinals.

1. The numeral אֶחָד *one* is an *adjective*, standing after and agreeing with its noun.

2. The numeral שְׁנַיִם is a *noun*, used either in the appositional or construct relation with the word which it enumerates, and agreeing with it.

3. The numerals from *three* to *ten* are abstract feminine substantives, used in appositional construction with the nouns which they enumerate. The *feminine* form was the original one and is used with masculine nouns; the masculine is a shorter form used with feminines.

4. The numerals from *eleven* to *nineteen* are formed by uniting עֶשֶׂר or עֶשְׂרֵה *ten* with the units, viz: with the construct form of *one* and *two*, but with the absolute form of the others.

5. The numerals *thirty* to *ninety* are formed by adding the masc. plur. ending יִם_ to the units, but *twenty* (עֶשְׂרִים) is the plural of *ten* עֶשֶׂר.

6. The units are added to the tens by means of וְ; in the earlier books preceding the tens, in later books following them.

7. The units take the noun in the plural; the tens, when before it, take the noun in the singular, when after it, in the plural.

8. The numerals *eleven* to *nineteen* take the noun in the plural, except in the case of a few very common nouns like *day*, *man*, etc.

B. Ordinals.

1. The ordinal *first* is רִאשׁוֹן (from רֹאשׁ, *head*).

2. The ordinals from *two* to *ten* are formed from the corresponding cardinals by means of the termination י_; another י_ being inserted between the second and third consonants.

3. Above *ten*, cardinals are used for ordinals.

4. The feminines of the ordinals are used to express fractional parts.

XII. Separate Particles.

73. Adverbs.

		1. 1)
מַדּוּעַ *why?*	אָמְנָם } *really.* חִנָּם *gratuitously.*	אַי *where?*
[מַה יָּדוּעַ]	אָמְנָם } *really.* רֵיקָם *in vain.*	אָז *then.*
מִלְמַעְלָה *from above*	פִּתְאֹם *suddenly.* יוֹמָם *by day.*	לֹא *not.*
[מַעְלָה ,לְ ,מִן]	שִׁלְשֹׁם *the day before yesterday.*	שָׁם *there.*

	2. 3)	2. 2)	2. 1)
זֶה *here.*	אָמֵן *firmly.*	הַרְבֵּה *much.*	מְאֹד *very.*
הֵנָּה *hither.*	טוֹב *well.*	הֵיטֵב *well.*	חוּץ *abroad*
שָׁלֹשׁ *thrice.*	רִאשׁוֹנָה *formerly.*	הַשְׁכֵּם *early.*	לְבַד *alone.*
שֶׁבַע *seven times.*	נִפְלָאוֹת *wonderfully*	מַהֵר *speedily.*	מִבַּיִת *within*

3.

הִנְנִי } הִנְּךָ	עוֹד } עוֹדְנִי עוֹדֶנּוּ	אַי } אַיֵּכָה אַיּוֹ	אַיִן—אֵינֶנִּי יֵשׁ—יֶשְׁנוֹ

74. Prepositions.

3.	2.	1.	
אַחֲרֵי	בֵּינְךָ	מִתַּחַת *from under.*	אַחַר *behind.*
אֵלַי	מִמֶּנּוּ	לְמִן *from.*	אֵצֶל *close by.*
סְבִיבוֹתַי	אֶצְלִי	לִפְנֵי *before.*	בֵּין *between.*
עֲלֵיהֶם	זוּלָתִי	לְפִי *according to.*	בַּעַד *about.*
אִתּוֹ	בֵּינִי	לִקְרַאת *toward.*	עַל *upon.*
אִתּוֹ	נֶגְדִּי	בִּבְלִי *without.*	תַּחַת *under.*

75. Conjunctions.

3.	2.	1.
יַעַן אֲשֶׁר *because that.*	פֶּן *lest.*	כִּי *that.*
אַחַר אֲשֶׁר *after that.*	אַל *that not.*	אֲשֶׁר *that.*
עֵקֶב כִּי *because that.*	בְּטֶרֶם *before that.*	

XII. Separate Particles.

73. Adverbs.

1. Adverbs, proper, may be classified as follows:
   1) Those which may be termed *primitive*, originally related to pronominal roots;
   2) Those which are formed by appending terminations, ם_ and ם̇.
   3) Those which are formed by composition.
2. Other parts of speech are, at times, used as adverbs:
   1) Nouns, either alone or when used with prepositions.
   2) Infinitives absolute.
   3) Adjectives, especially in the feminine.
   4) Pronouns and numerals.
3. Certain adverbs, involving a verbal idea, take suffixes and in some cases, Nun Epenthetic.

74. Prepositions.

1. Prepositions are, in most cases, derived from nouns:
   1) They are *simple;*
   2) They are *compound*, made up of
      (1) Two prepositions; or
      (2) A preposition with a noun, an infinitive, or an adverb.
2. Prepositions are combined with suffixes, after the analogy of singular nouns.

Remark.—For the union of the Inseparable Prepositions with suffixes see Paradigm R.

3. Some prepositions take suffixes after the analogy of *plural* nouns.

Remark.—אֵת the preposition is to be distinguished from אֵת the sign of the definite object.

75. Conjunctions.

Conjunctions are to be classified, in reference to their origin as follows:

1. Those which were originally pronouns;
2. Those which were originally substantives;
3. Those which were originally prepositions.

Remark.—ו *and* is perhaps to be derived from a stem meaning *to join.*

PARADIGMS.

Paradigm A. The Personal

Nominative of the Pronoun or Separate Pronoun.	Genitive of the Pronoun, or *Suffix of the Noun* (*possessive Pron.*)	
	With Nouns Singular.	With Nouns Plur. and Dual.
Sing. 1. *com.* אָנֹכִי, in pause אָנֹכִי; אֲנִי, in pause אָנִי *I.*	־ִי *my* (prop. Gen. *mei*).	־ַי *my.*
2. *m.* אַתָּה (אַתְּ) in pause אָתָּה; *f.* אַתְּ (אַתִּי). *thou.*	־ְךָ, ־ָךְ, in pause ־ֶךָ (־ֵךְ), ־ֹךְ, ־ָךְ *thy* (*tui*).	־ֶיךָ, ־ָיִךְ, ־ַיִךְ *thy.*
3. *m.* הוּא *he.*	־ֹו, ־ָו, הוּ; ־ֵהוּ (ה) *his* (*ejus* and *suus*).	־ָיו, ־ֶיהָ, ־ַיהוּ *his.*
f. הִיא *she.*	־ָהּ; ־ֶהָ; ־ֵהּ *her.*	־ֶיהָ *her.*
Plur. 1. *com.* אֲנַחְנוּ (נַחְנוּ), (אֲנוּ) *we.*	־ֵנוּ; ־נוּ (־ֵנוּ) *our.*	־ֵינוּ *our.*
2. *m.* אַתֶּם; *f.* אַתֶּנָּה, אַתֵּן *ye.*	־כֶם; ־ְכֶם; ־כֶן; ־ְכֶן *your*	־ֵיכֶם; ־ֵיכֶן *your.*
3. *m.* הֵמָּה, הֵם; *f.* הֵנָּה, הֵן *they.*	־ָם; ־ֵם; ־ָן, ־ֵן, ־ֶן *their.*	־ֵיהֶם; ־ֵיהֶן *their.*

Pronoun and Pronominal Suffixes.

Accusative of the Pronoun, or *Suffix of the Verb*

By itself.	With Nun demonstrative.
נִי ; נִי־ ; נִי֫־ *me.*	נִי֫־, נִי־
ךָ ; ךָ־, in p. ךָ֫, ךָ֪־ ; ךְ ; ךְ־ ; ךְ֫, ךְ֪־ *thee.*	ךָ֫־, (נְךָ֫־) ; not found.
הוּ, וֹ ; הוּ־ (ה), וֹ ; הוּ֫־ *him.*	הוּ֫־, נּוּ־, (נּוֹ)
הָ ; הּ־ ; הָ֫־ *her.*	נָה֫־
נוּ ; נוּ־ ; נוּ֫־ *us.*	נוּ֫־
כֶם ; כֶם־ ; כֶן ; כֶן־ *you.*	These forms do not occur.
(הֶם), ם ; ם־, ם־ ־ ; ם֫־, ם֫־ ־ *them.*	
(הֶן), ן ; ן־, ן־ ־ ; ן֫־ *them.*

1 בָּרַח (K. Hi.) Flee
2 זָרַע (K. Ni. Pu. Hi.) Sow
3 כָּרַע (K. Hi.) Bend the knee
4 פָּרַח (K. Hi.) Flourish
5 קָרַע (K. Ni.) Rend

XVII. Verbs Pe Nun occurring 25–5000 times.*

1 נָבַט (Pi. Hi.) Look
2 (נָבַל)(K. Pi. Hi.) Wither
3 נָגַד (Hi. Ho.) Make known
4 נָגַף (K. Ni. Hithp.) Smite
5 נָגַשׁ (K. Ni. Hi. Ho. Hithp.) Approach
6 (נָדַף)(K. Ni.) Scatter
7 נָדַר (K.) Vow
8 נָטַשׁ (K. Ni. Pu.) Spread out
9 נָכַר (Ni. Pi. Hi. Hithp.) Know
10 נָסַךְ (K. Ni. Pi. Hi. Ho.) Pour out

* Verbs in parentheses occur less than 25 times.

XVII. Verbs Pe Nun occurring 25—5000 times.

11 נָפַל (K. Hi. Hithp. Pil.) Fall
12 נָצַב (Ni. Hi. Ho.) Stand
13 נָצַל (Ni. Pi. Hi. Ho. Hithp.) Snatch, deliver
14 נָצַר (K.) Keep, watch
15 נָקַב (K. Ni.) Define
16 נָקַם (K. Ni. Pi. Ho. Hithp.) Avenge
17 נָשַׂג (Hi.) Reach
18 נָשַׁךְ (K. Pi. Hi.) Lend
19 נָשַׁק (K Pi. Hi.) Kiss
20 נָתַן (K. Ni. Ho.) Give
21 נָתַץ (K. Ni. Hi. Pu. Ho.) Break down
22 נָתַק (K. Ni. Pi. Hi. Ho.) Draw out

XVIII. Verbs Ayin Doubled occurring 25—5000 times.

1. Verbs Ayin doubled.

1 בָּלַל (K. Hi. Hithp.) Confound
2 (גָּלַל)(K. Ni. Po. Hi. Hithpo. Pilpel, Hithpalpel) Roll
3 דָּמַם (K. Ni. Po. Hi.) Be silent
4 יָלַל (Hi.) Howl, wail
5 מָדַד (K. Ni. Pi. Po. Hithpo) Measure
6 (מָלַל)(K. Pi.) Talk
7 (מָסַס)(K. Ni. Hi.) Melt
8 נָדַד (K. Po. Hi. Ho. Hithpo.) Wander
9 סָבַב (K. Ni. Pi. Po. Hi. Ho.) Surround
10 (סָכַךְ)(K. Hi. Ho.) Cover, protect
11 (סָרַר)(K.) Be rebellious
12 פָּלַל (Pi. Hithp.) Pray
13 פָּרַר (K. Po. Pil. Hi. Ho. Hithpo.) Break
14 צָרַר (K. Pu. Hi.) Distress
15 קָדַד (K.) Bow down the head
16 קָלַל (K. Ni. Pi. Pil. Pu. Hi. Hithpalpel) Be light
17 רָנַן (K. Pi. Pu. Hi. Hithpo.) Sing, cry aloud
18 שָׁדַד (K. Ni. Pi. Pu. Po. Ho.) Destroy
19(שָׁמַם)(K. Pu.) Be waste, desolate
20 תָּמַם (K. Ni. Hi. Hithp.) Finish

2. Verbs Pe Guttural and Ayin doubled.

1 אָרַר K. Ni. Pi. Ho.) Curse
2 הָלַל (K. Pi. Po. Pu. Hi. Hithp. Hithpo.) Praise
3 (חָגַג)(K.) Dance, celebrate a feast
4 חָלַל (K. Ni. Pi. Pu. Poel, Poal, Hi. Ho.) Pollute, begin
5 חָנַן (K. Ni. Pi. Po. Ho. Hithp.) Be gracious
6 חָתַת (K. Ni. Pi. Hi.) Be dismayed
7 (רָבַב)(K. Pu.) Be many, multiply
8 רָעַע (K. Hi. Hithpol.) Be evil

XIX. Verbs Pe Yodh occurring 25—5000 times.

1 הָלַךְ (K. Ni. Pi. Hi. Hithp.) Walk
2 יָבֵשׁ (K. Pi. Hi.) Be dry
3 יָטַב (K. Hi.) Be good
4 יָכֹל (Ho.) Be able
5 יָלַד (K. Ni. Pi. Pu. Hi. Ho. Hithp.) Bring forth
6 יָנַק (K. Hi.) Give suck
7 יָסַד (K. Ni. Pi. Pu. Ho.) Found

XIX. Verbs Pe Yodh occurring 25–5000 times.

8 יָסַף (K.Ni.Hi.) Add [tise
9 יָסַר (K. Ni. Nithp.Pi.Hi.) Chas-
10 יָצַק (K. Hi. Ho.) Pour out
11 יָצַר (K. Ni, Pu. Ho.) Form
12 יָצַת (K. Ni. Hi.) Kindle
13 (יָקַץ)(K.) Awake [snares
14 (יָקַשׁ)(K. Ni. Ho. or Pu.) Lay
15 יָרַד (K. Hi. Ho.) Go down
16 יָרַשׁ (K. Ni. Pi. Hi.) Possess
17 יָשַׁב (K.Ni.Pi.Hi Ho.) Sit, dwell
18 (יָשַׁן)(K. Pi.) Sleep
19 יָשַׁר (K. Pi. Pu. Hi.) Be straight, right
20 יָתַר (K. Ni. Hi.) Be left over

XX. Verbs Ayin Vav occurring 25–5000 times.

1 (בּוּז)(K.) Despise [ashamed
2 בּוֹשׁ (K. Pil. Hi. Hithpol) Be
3 גּוּר (K. Hithpol.) Sojourn
4 (דּוּשׁ)(K. Ni. Hoph.) Thresh
5 זוּב (K.) Flow
6 זוּר (K. Ni. Ho.) Sojourn
7 חוּל (K. Pol. Pul. Hi. Ho. Hith-pol. Hithpalpel) Be pained, bring forth
8 טוֹב (K. Hi.) Be good [tain
9 כּוֹל (K. Pilpel, Polpal, Hi.) Con-
10 כּוּן (Ni. Pol. Pul. Hi. Ho. Hith-pol.) Prepare
11 (לוּז)(K. Ni. Hi.) Turn away
12 לוּן (K. Ni. Hi. Hithpalpel) Lodge [Scorn
13 לוּץ (K. Ni. Pil. Hithpalpel)
14 (מוּג)(K. Ni. Pol. Hithpol.) Melt
15 מוּט (K. Ni. Hi. Hithp.) Move
16 מוּל (K. Ni. Pol. Hi. Hithpol.) Circumcise
17 מוּשׁ (K. Hi.) Depart
18 מוּת (K. Pol. Hi. Ho.) Die
19 (נוּם)(K.) Slumber
20 (נוּס)(K. Pol. Hi. Hithpol.) Flee
21 נוּף (K. Pol. Hi. Ho.) Shake, sift
22 (סוּג)(K. Ni.) Turn back
23 סוּר (K. Pol. Hi. Ho.) Turn aside
24 פּוּץ (K. Ni. Pol. Pilpel, Hi. Hithp.) Scatter
25 (צוּד)(K. Po. Hithp.) Hunt
26 (צוּם)(K.) Fast
27 צוּר (K.) Press, besiege
28 קוּם (K. Pi. Pol. Hi. Ho. Hithp.) Rise, stand
29 רוּם (K. Pol. Polal, Hi. Ho. Hith-pol.) Be high
30 רוּץ (K. Pol. Hi) Run
31 (רוּק)(Hi. Ho.) Pour out, draw out
32 (רוּשׁ)(K. Hithp.) Be poor
33 שׁוּב (K. Pol. Pul. Hi. Ho.) Turn, return

XXI. Verbs Ayin Yodh occurring 25–5000 times.

1 בִּין (K. Ni. Pol. Hi. Hithpol.)
2 גִּיל (K.) Exult [Perceive
3 רִיב (K. Hi.) Strive
4 שִׂים (K. Hi. Ho.) Place, set
5 שִׁיר (P. Pol. Ho.) Sing
6 שִׁית (K. Ho.) Put

XXII. Verbs Pe Aleph.

1 אָבַד (K. Pi. Hi.) Perish
2 אָבָה (K.) Be willing
3 אָחַז (K. Ni. Pi. Ho.) Seize
4 אָכַל (K. Ni. Pi. Pu. Hi.) Eat
5 אָמַר (K. Ni. Hi. Hithp.) Say
6 אָפָה (K. Ni.) Bake

XXIII. Verbs Lamedh Aleph, occurring 25—5000 times.

1 בָּרָא (K.Ni.Pi.Hi.) Create
2 חָבָא (Ni. Pu. Hi. Ho. Hithp.) Hide
3 חָטָא (K.Pi.Hi.Hithp.) Sin
4 טָמֵא (K. Ni. Pi. Pu. Hithp. Hothp.) Be unclean
5 יָרֵא (K. Ni. Pi.) Be afraid
6 (כָּלָא)(K. Ni. Pi.) Restrain
7 מָלֵא (K.Ni.Pi.Pu.Hithp.)Be full
8 מָצָא (K. Ni. Hi.) Find
9 (נָבָא)(Ni. Hithp.) Prophesy
10 פָּלָא (Ni.Pi.Hi. Hithp.) Be wonderful
11 (צָמֵא)(K.) Be thirsty
12 קָנָא (Pi. Hi.) Be jealous
13 קָרָא { K.Ni.Pu. Call / K.Ni.Hi. Meet }
14 רָפָא (K. Ni. Pi. Hithp.) Heal
15 שָׂנֵא (K. Ni. Pi.) Hate

XXIV. Verbs Lamedh He, occurring 25—2000 times.

1 בָּזָה (K. Ni. Hi.) Despise
2 בָּכָה (K. Pi.) Weep
3 בָּלָה (K. Pi.) Fall away, decay
4 בָּנָה (K. Ni.) Build
5 גָּלָה (K. Ni. Pi. Pu. Ho. Hithp.) Reveal
6 (דָּגָה)(K.) Increase
7 (דָּלָה)(K. Pi.) Draw
8 דָּמָה (K. Ni. Pi. Hithp.) Be like
9 זָנָה (K. Pu. Hi.) Commit fornication
10 (כָּבָה)(K. Pi.) Quench
11 כָּלָה (K. Pi. Pu.) Complete
12 כָּסָה (K. Ni. Pi. Pu. Hithp.) Conceal
13 לָוָה (K. Ni. Hi.) Join
14 נָטָה (K. Ni. Hi.) Stretch out
15 סָפָה (K. Ni. Hi.) End
16 פָּדָה (K. Ni. Hi. Ho.) Redeem
17 פָּנָה (K.Pi.Hi.Ho.) Turn about
18 (פָּשָׂה)(K.) Spread
19 צָוָה (Pi.Pu.) Command
20 צָפָה (K.Pi.Pu.) Watch, cover
21 קָוָה (K. Ni. Pi.) Wait
22 קָנָה (K. Ni. Hi.) Get, obtain
23 קָצָה (K. Pi. Hi.) Cast off, send
24 קָשָׁה (K. Ni. Pi. Hi.) Be sharp, hard
25 רָדָה (K.Pi.Hi.) Have dominion
26 שָׁבָה (K. Ni.) Capture
27 שָׁחָה (K.Hi.Hithp.)Do obeisance
28 שָׁקָה (Ni. Pu. Hi.) Drink
29 שָׁתָה (K. Ni.) Drink
30 תָּלָה (K. Ni. Pi.) Hang

XXV. Verbs Ayin Vav and, at the same time, Guttural, or Lamedh Aleph, occurring 25—5000 times.

1 אוֹר (K. Ni. Hi.) Shine
2 בּוֹא (K. Hi. Ho.) Go in
3 נוּחַ (K. Hi Ho.) Rest
4 נוּעַ (K. Ni. Hi.) Move, nod
5 עוּד (K.Pi.Hi.Ho. Pil. Hithpal.) Testify
6 עוּף (K.Pol.Hi.Hithpol.) Fly
7 עוּר (K. Ni. Pol. Hi. Hithpol.) Awake
8 רוּעַ (Ni. Polal, Hi. Hithpol.) Shout

XXVI. Verbs Pe Nun and, at the same time, Guttural, Lamedh Aleph or Lamedh He, occurring 25—5000 times.

1 לָקַח (K.Ni.Pu.Ho.Hithp.) Take
2 נָאַף (K. Pi.) Commit adultery
3 נָאַץ (K. Pi. Hi. Hithp.) Despise
4 נָגַע (K. Ni. Pi. Pu. Hi.) Touch
5 נָדַח (K. Ni. Pu. Hi. Ho.) Drive
6 נָהַג (K. Pi.) Lead
7 נָחָה (K. Hi.) Lead forth
8 נָחַל (K. Pi. Hi. Ho. Hithp.) Inherit
9 נָטָה (K. Ni. Hi.) Stretch out
10 נָטַע (K. Ni.) Plant
11 נָכָה (Ni. Pu. Hi. Ho.) Smite
12 נָסָה (Pi.) Try, prove
13 נָסַע (K. Ni. Hi.) Depart
14 נָצַח (Ni. Pi.) Be preeminent
15 נָקָה (K. Ni. Pi.) Be innocent
16 נָשָׂא (K.Ni.Pi.Hi.Hithp.)Lift up

XXVII. Verbs Pe Yodh and, at the same time, Guttural, Lamedh Aleph or Lamedh He, occurring 25—5000 times.

1 יָגַע (K. Pi. Hi.) Labor, be weary
2 יָדָה (Hi. Hith.) Thank
3 יָדַע (K. Ni. Pi. Po. Pu. Hi. Ho. Hithp.) Know
4 יָהַב (K.) Give
5 יָחַל (Ni. Pi. Hi.) Wait
6 יָכַח (Ni.Pi.Ho.Hithp.)Reprove
7 יָעַץ (K.Ni.Hithp.) Give counsel
8 יָצָא (K. Hi. Ho.) Go forth
9 יָרֵא (K. Ni. Pi.) Be afraid
10 יָרָה (K. Ni. Hi.) Cast, instruct
11 יָרַשׁ (K. Ni. Pi. Hi.) Possess
12 יָשַׁב (K. Ni. Pi. Hi. Ho.) Sit, dwell
13 יָשַׁע (Ni. Hi.) Deliver

XXVIII. Verbs Pe and Ayin Guttural, and Lamedh He occurring 25–5000 times.

1 אָבָה (K.) Be willing (*Pe Aleph*)
2 אָלָה (K. Hi.) Swear
3 הָגָה (K. Po. Hi.) Meditate
4 הָיָה (K. Ni.) Be
5 הָמָה (K.) Make a noise
6 הָרָה (K. Pu. Po.) Conceive
7 חָיָה (K. Pi. Hi.) Live
8 חָלָה (K. Ni. Pi. Pu. Hi. Ho. Hithp.) Be sick
9 חָנָה (K.) Encamp
10 חָסָה (K.) Trust
11 חָרָה (K. Ni. Hi. Hithp.) Be angry
12 מָחָה (K. Ni. Hi.) Wipe off
13 מָרָה (K. Hi.) Rebel
14 עָלָה (K. Ni. Hi. Ho. Hithp.) Go up
15 עָנָה (K. Ni. Pi. Hi. / K. Ni. Pi. Pu. Hi. Hithp.) Answer, afflict
16 עָשָׂה (K. Ni. Pi. Pu.) Do, make
17 פָּרָה (K. Hi.) Be fruitful
18 צָפָה (K. Pi. Pu.) Watch, cover
19 קָרָה (K. Ni. Pi. Hi.) Meet [See
20 רָאָה (K. Ni. Pu. Hi. Ho. Hithp.)
21 רָבָה (K. Pi. Hi.) Multiply
22 רָעָה (K. Pi. Hi. Hithp.) Feed
23 רָפָה (K. Ni. Pi. Hi. Hithp.) Be feeble [pleased
24 רָצָה (K. Ni. Pi. Hi. Hithp.) Be

XXIX. Synopses in the Kal of ten common, but difficult verbs.

	(יָדַע)	(לָקַח)	(יָצָא)	(הָלַךְ)	(בּוֹא)

A

GRAMMAR

OF THE

HEBREW LANGUAGE.

BY

WILLIAM HENRY GREEN,

PROFESSOR IN THE THEOLOGICAL SEMINARY AT PRINCETON, N. J.

New Edition.

CAREFULLY REVISED THROUGHOUT
AND THE SYNTAX GREATLY ENLARGED.

NEW YORK:
JOHN WILEY & SONS, PUBLISHERS,
15 Astor Place.
1889.

COPYRIGHT, 1888, by
JOHN WILEY & SONS.

PREFACE.

THE twenty-seven years, which have elapsed since the first publication of this Grammar, have been exceedingly fruitful in the philological and exegetical study of the Old Testament. And important progress has been made toward a more thorough and accurate knowledge of the grammatical structure of the Hebrew language. This edition of the Grammar has been carefully revised throughout that it may better represent the advanced state of scholarship on this subject. Nearly every page exhibits corrections or additions of greater or less consequence. And the Syntax particularly, which was not fully elaborated before, has been greatly enlarged, and for the most part entirely rewritten. The plan of the Grammar, the method of treatment, and in general the order of the sections are unchanged. And little occasion has been found to alter the more general and comprehensive statements, which are distinguished by being printed in large type. The changes are chiefly in the addition of fuller details enlarging and multiplying the paragraphs in small type.

The principle of eschewing all supposititious forms and adducing none but such as really occur in the Old Testament, has been steadfastly adhered to as heretofore, with the view of rigorously conforming all rules and examples to the actual phenomena of the language. The text of Baer is preferred so far as published, the disputed orthophonic Daghesh-forte excepted, though it is recognized and its rules are stated. In the discussion of the

poetic accents free use has been made of the elaborate treatises of Baer and Wickes; and the names which they employ are given as well as those which previously were more familiar. The intricate rules for the employment of Methegh are also drawn from Baer. The position of the accent is indicated as in previous editions by a small vertical stroke above all Hebrew words except monosyllables.

The convenience of students has been consulted in removing the paradigms of pronouns, verbs, and nouns from the body of the volume and placing them together at the end. A new paradigm has been introduced, affording a succinct view of the formation of nouns of different classes, with their respective significations. The declensions of nouns have been simplified by an arrangement which corresponds at once with their etymological structure and with the vowel changes to which they are severally liable. While every part of the Syntax is much more fully developed than before, special attention has been paid to the use of the tenses, which is so thoroughly discussed in the admirable treatise of Dr. Driver. The old names preterite and future are, for reasons given on pp. 299–302, preferred to perfect and imperfect, which are now so generally adopted; but the latter are used in conjunction with the former for the convenience of those who like them better. The various kinds of compound sentences, involving relative, conditional, circumstantial, and co-ordinate clauses, receive the attention which is due to their peculiar character and separate importance. The different rules and statements of the Grammar, and particularly of the Syntax, are illustrated and confirmed by a copious citation of passages in which they are exemplified. Full indexes, as before, accompany the Grammar to facilitate its use.

PRINCETON, *August* 22, 1888.

CONTENTS.

PART I.—ORTHOGRAPHY.

Divisions of Grammar, § 1.

ORTHOGRAPHIC SYMBOLS.

THE LETTERS.—Alphabet, § 2; Sounds, § 3; Double forms, § 4; Names, § 5; Order, § 6; Classification, § 7; Words never divided, § 8; Abbreviations and Signs of Number, § 9.

THE VOWELS.—Masoretic Points, § 10; Vowel Letters, § 11; Signs for the Vowels, § 12; Mutual Relation of this twofold Notation, §§ 13, 14; Pure and Diphthongal Vowels, § 15.

Sh'va, silent and vocal, simple and compound, § 16.

Pattahh Furtive, § 17.

Syllables, § 18.

Ambiguous Signs.—Hhirik, Shurek, and Kibbuts, § 19. 1; Kamets and Kamets Hhatuph, § 19. 2; Silent and Vocal Sh'va, § 20.

POINTS AFFECTING CONSONANTS:—Daghesh-lene, §§ 21, 22.

Daghesh-forte, § 23; different kinds, § 24; omission of, § 25.

Mappik, § 26.

Raphe, § 27.

POINTS ATTACHED TO WORDS.—Accents, their design, § 28; forms and classes, § 29; like forms distinguished, § 30; poetic accents, § 31; position as determined by the character of the syllables, § 32. 1; in uninflected words, § 32. 2. 3; with affixes, suffixes and prefixes, § 33; use in distinguishing words, § 34; shifted in special cases, § 35.

Consecution of the Accents in Prose.—Clauses and their subdivisions, § 36; tabular view, § 37; explanation of the table, § 38; adaptation of the trains of accents to sentences, § 39.

Poetic Consecution.—Clauses and their subdivisions, § 40; tabular view and explanation, § 41; adaptation of the trains of accents to sentences, § 42.

Makkeph, § 43.

Methegh, its form and position, § 44; special rules, § 45; K'ri and K'thibh, meaning of the terms, § 46; constant K'ris not noted in the margin, § 47; their design and value, § 48.

Accuracy of the points, § 49.

ORTHOGRAPHIC CHANGES.

Significant mutations belong to the domain of the lexicon, §§ 50, 51; euphonic mutations to the domain of grammar, § 52.

MUTATIONS OF CONSONANTS at the beginning of syllables, § 53; at the close of syllables, § 54; at the end of words, § 55; special rules, § 56.

CHANGES OF CONSONANTS TO VOWELS in reduplicated syllables and letters and in quiescents, § 57.

MUTATIONS OF VOWELS, significant and euphonic, § 58; due to syllabic changes, § 59; to contiguous gutturals, § 60; to concurrent consonants, § 61; concurring vowels, § 62; proximity of vowels, § 63; the accent, § 64; pause accents, § 65; shortening or lengthening of words, § 66.

PART II.—ETYMOLOGY.

ROOTS OF WORDS.—Design of Etymology, three stages in the growth of words, § 67; pronominal and verbal roots, § 68; formation and inflection of words by external and internal changes, § 69; parts of speech, § 70.

PRONOUNS personal, § 71; pronominal suffixes, § 72; demonstrative, § 73; relative, § 74; interrogative and indefinite, § 75; paradigm I.

VERBS, the species and their signification, §§ 76-80.

PERFECT VERBS, § 81; formation of the species, §§ 82, 83; their inflection, §§ 84, 85; paradigm II.

Remarks on the Perfect Verbs.—Kal preterite, § 86; Infinitive, 87; Future, § 88; Imperative, § 89; Participles, § 90; Niphal, § 91; Piel, § 92; Pual, § 93; Hiphil, § 94; Hophal, § 95; Hithpael, § 96.

Paragogic and Apocopated Future, § 97; and Imperative, 98.

Vav Consecutive with the Future, § 99; with the Preterite, § 100.

Verbs with suffixes, §§ 101, 102; Remarks on the Perfect Verbs with suffixes, Preterite, § 104; Future, 105; Infinitive and Imperative, § 106; paradigm III.

IMPERFECT VERBS, classified, § 107.

Pe Guttural Verbs, their peculiarities, §§ 108, 109; Remarks, §§ 111-115; paradigm IV.

Ayin Guttural Verbs, their peculiarities, § 116 ; Remarks, §§ 118-122 ; paradigm V.

Lamedh Guttural Verbs, their peculiarities, § 123 ; Remarks, §§ 125-128; paradigm VI.

Pe Nun Verbs, their peculiarities, § 129 ; Remarks, §§ 131, 132 ; paradigm VII.

Ayin Doubled Verbs, their peculiarities, §§ 133-137 ; Remarks, §§ 139-142; paradigm VIII.

Pe Yodh Verbs, their peculiarities, §§ 144-146 ; Remarks, §§ 148-153 ; paradigm X.

Ayin Vav and Ayin Yodh Verbs, their peculiarities, §§ 154-156 ; Remarks, §§ 158-161 ; paradigm IX.

Lamedh Aleph Verbs, their peculiarities, § 164 ; Remarks, §§ 166-169 ; paradigm XI.

Lamedh He Verbs, their peculiarities, §§ 170, 171 ; shortened future and imperative, § 173; Remarks, §§ 174-179 ; paradigm XII.

Doubly Imperfect Verbs, § 180.

Defective Verbs, § 181.

Quadriliteral Verbs, § 182.

NOUNS, their formation, § 183; Class I. §§ 184-188 ; Class II. §§ 189, 190 ; Class III. §§ 191-194; Class IV. §§ 195, 196 ; paradigm, XIII.

SEPARATE PARTICLES.—Adverbs, § 236 ; with suffixes, § 237 ; Prepositions, § 238; with suffixes, §§ 239, 240 ; Conjunctions, § 241 ; Interjections, § 242.

PART III.—SYNTAX.

Simple and Compound Sentences, § 243. 2; Office of Syntax, 243. 1 ; Elements of the sentence, § 243. 3.

THE SUBJECT, a noun or pronoun, § 244; when omitted, 245 ; personal pronoun, § 246; its extension, § 247.

The Article, when used, § 248 ; nouns definite without it, § 249 ; omitted in poetry, § 250; indefinite nouns, § 251.

Attributive adjectives and demonstratives, § 252.

Numerals.—Cardinal numbers, §§ 253, 254; Ordinals, etc., § 255. 1, 2; fractional parts, § 255. 3; distributive numbers and numeral adverbs, § 255. 4.

Apposition or subordination, § 256.

The Construct State and Suffixes, §§ 257–259; resolved by the preposition ל, § 260.

THE PREDICATE, Copula, § 261; Nouns, § 262; Adjectives and demonstratives, § 263.

Comparison of adjectives, § 264.

Verbs.—Hebrew conception of time, § 265. 1, 2; subjective use of the tenses, § 265. 3; different names applied to them, § 265. 3, *a*; the primary tenses; use of the preterite or perfect, § 266; the future or imperfect, § 267; the preterite and future in combination, §§ 268, 269; the modal forms, § 270; the intentional or paragogic future, § 271; the jussive or apocopated future, § 272; the imperative, § 273; the precative particle, § 274; the primary tenses with Vav Conjunctive, § 275; the secondary tenses, Vav Consecutive with the future, § 276; Vav Consecutive with the preterite, § 277; participles, § 278; the infinitive, § 279; absolute infinitive, § 280; its emphatic use, § 281; change of construction to finite tenses, § 282; co-ordinate instead of dependent relation of verbs, § 283.

Object of Verbs.—The direct object of transitive verbs, § 284; transitive construction of intransitive verbs, § 285; indirect object of verbs, § 286; verbs with more than one object, § 287.

Adverbs and adverbial expressions, § 288.

Neglect of agreement, § 289; compound subject, § 290; dual nouns, § 292; nouns in the construct, § 293; changes of person, § 294; ellipsis, § 295.

Repetition of nouns, § 296; pronouns, § 297.

INTERROGATIVE, § 298, AND NEGATIVE SENTENCES, § 299.

COMPOUND SENTENCES.—Relative clauses, §§ 300, 301; the relative omitted, § 302; poetic use of the demonstrative, § 303; indefinite pronouns, § 304; relative conjunction, § 305; hypothetical sentences, §§ 306–308; circumstantial clauses, § 309; the conjunction Vav, §§ 310–312.

PART FIRST.

ORTHOGRAPHY.

§ 1. Language is the communication of thought by means of spoken or written sounds. The utterance of a single thought constitutes a sentence. Each sentence is composed of words expressing individual conceptions or their relations. And words are made up of sounds produced by the organs of speech and represented by written signs. It is the province of grammar as the science of language to investigate these several elements. It hence consists of three parts. First, Orthography, which treats of the sounds employed and the mode of representing them. Second, Etymology, which treats of the different kinds of words, their formation, and the changes which they undergo. Third, Syntax, which treats of sentences, or the manner in which words are joined together to express ideas. The task of the Hebrew grammarian is to furnish a complete exhibition of the phenomena of this particular language, carefully digested and referred as far as practicable to their appropriate causes in the organs of speech and the operations of the mind.

The Letters.

§ 2. The Hebrew being no longer a spoken tongue, is only known as the language of books, and particularly of the Old Testament, which is the most interesting and

important as well as the only pure monument of it. The first step towards its investigation must accordingly be to ascertain the meaning of the symbols in which it is recorded. Then having learned its sounds, as they are thus represented, it will be possible to advance one step further, and inquire into the laws by which these are governed in their employment and mutations.

The symbols used in writing Hebrew are of two sorts, viz. letters (אוֹתִיּוֹת) and points (נְקוּדִים). The number of the letters is twenty-two; these are written from right to left, and are exclusively consonants. The alphabetical table upon the opposite page exhibits their forms. English equivalents, names, and numerical values, together with the corresponding forms of the Rabbinical character employed to a considerable extent in the commentaries and other writings of the modern Jews.

§ 3. There is always more or less difficulty in representing the sounds of one language by those of another. But this is in the case of the Hebrew greatly aggravated by its having been for ages a dead language, so that some of its sounds cannot now be accurately determined, and also by its belonging to a different family or group of tongues from our own, possessing sounds entirely foreign to the English, for which it consequently affords no equivalent, and which are in fact incapable of being pronounced by our organs. The equivalents of the following table are not therefore to be regarded as in every instance exact representations of the proper powers of the letters. They are simply approximations sufficiently near the truth for every practical purpose, the best which can now be proposed, and sanctioned by tradition and the conventional usage of the best Hebraists.

1. It will be observed that a double pronunciation has been assigned to seven of the letters. A native Hebrew

Order.	Forms and Equivalents.	Names.	Rabbinical Alphabet.	Numerical values.
1	א ——	אָלֶף Áleph	א	1
2	ב Bh, B	בֵּית Bēth	ב	2
3	ג Gh, G	גִּימֶל Gímel	ג	3
4	ד Dh, D	דָּלֶת Dáleth	ד	4
5	ה H	הֵא Hē	ה	5
6	ו V or W	וָו Vāv (Wāw)	ו	6
7	ז Z	זַיִן Záyin	ז	7
8	ח Hh	חֵית Hhēth	ח	8
9	ט T	טֵית Tēth	ט	9
10	י Y	יוֹד Yōdh	י	10
11	כ ך Kh, K	כַּף Kaph	כ ך	20
12	ל L	לָמֶד Lámedh	ל	30
13	מ ם M	מֵם Mēm	מ ם	40
14	נ ן N	נוּן Nūn	נ ן	50
15	ס S	סָמֶךְ Sámekh	ס	60
16	ע ——	עַיִן Áyin	ע	70
17	פ ף Ph, P	פֵּא Pē	פ ף	80
18	צ ץ Ts	צָדֵי Tsádhē	צ ץ	90
19	ק K	קוֹף Kōph	ק	100
20	ר R	רֵישׁ Rēsh	ר	200
21	ש Sh, S	שִׁין Shīn	ש	300
22	ת Th, T	תָּו Tāv	ת	400

would readily decide without assistance which of these was to be adopted in any given case, just as we are sensible of no inconvenience from the various sounds of the English letters which are so embarrassing to foreigners learning our language. The ambiguity is in every case

removed, however, by the addition of a dot or point indicating which sound they are to receive. Thus בּ with a point in its bosom has the sound of *b*, ב unpointed that of the corresponding *v*, or as it is commonly represented for the sake of uniformity in notation, *bh;* גּ is pronounced as *g*, ג unpointed had an aspirated sound which may accordingly be represented by *gh*, but as it is difficult to produce it, or even to determine with exactness what it was, and as there is no corresponding sound in English, the aspiration is mostly neglected, and the letter, whether pointed or not, sounded indifferently as *g;* דּ is *d*, ד unpointed is the aspirate *dh*, equivalent to *th* in *the;* כּ is *k*, כ unpointed its aspirate *kh*, perhaps resembling the German *ch* in *ich*, though its aspiration, like that of ג, is commonly neglected in modern reading; פּ is *p*, פ unpointed *ph* or *f;* תּ is *t*, ת unpointed *th* in *thin*. The letter שׁ with a dot over its right arm is pronounced like *sh*, and called *Shin;* שׂ with a dot over its left arm is called *Sin*, and pronounced like *s*, no attempt being made in modern usage to discriminate between its sound and that of ס Samekh. Although there may anciently have been a distinction between them, this can no longer be defined nor even positively asserted; it has therefore been thought unnecessary to preserve the individuality of these letters in the notation, and both of them will accordingly be represented by *s*.

a. The double sound of the first six of the letters just named is purely euphonic, and has no effect whatever upon the meaning of the words in which they stand. The case of שׁ is different. Its primary sound was that of *sh*, as is evident from the contrast in Judg. 12 : 6 of שִׁבֹּלֶת *shibbōleth* with סִבֹּלֶת *sibbōleth*. In certain words, however, and sometimes for the sake of creating a distinction between different words of like orthography, it received the sound of *s*, thus almost assuming the character of a distinct letter, e. g. שָׁבַר *to break*, שָׂבַר *to hope*. That Sin and Samekh were distinguishable to the ear, appears probable from the fact that there are words of separate significations which differ only in the use of one or the other of these letters, and in which they are never interchanged, e. g. שָׂבַע *to be*

bereaved, שָׁכַל *to be wise*, סָכַל *to be foolish;* שָׁכַר *to be drunken*, שָׂכַר *to hire*, סָכַר *to shut up;* שׁוּר *to look*, סוּר *to rule*, שׂוּר *to turn back;* סָפָה *a lip*, שָׂפָה *to destroy*. The close affinity between the sounds which they represent is, however, shown by the equivalence of such roots as סָפַן and שָׂפַן, סָפַק and שָׂפַק, סָתַם and שָׂתַם, and by the fact that ס is in a few instances written for שׂ, e. g. נְסָה Ps. 4 : 7 from נָשָׂא, שִׂכְלוּת Eccles. 1 : 17 for סִכְלוּת; חֲרִסוּת Jer. 19 : 2 from חָרַשׂ, סַפַּחַת but שִׂפַּחַת Isa. 3 : 17. The original identity of שׂ and שׁ is apparent from their being used interchangeably in the alphabetic psalms Ps. 119 : 161—168 and other biblical acrostics Lam. 3 : 61—63, as well as from the etymological connection between שְׁאֹר *leaven* and מִשְׁאֶרֶת *a vessel in which bread is leavened*; שָׂעַר *to shudder*, שַׁעֲרוּרִי *horrible, causing a shudder;* שָׂכַר *to hire*, אֶשְׂכָּר *a recompense*. In Arabic the division of single letters into two distinguished by diacritical points is carried to a much greater length, the alphabet of that language being by this means enlarged from twenty-two to twenty-eight letters.

b. The palatal aspirate *gh* is still preserved in the spelling of many English words, although it is now lost in pronunciation, being either compensated by lengthening the vowel, e. g. *light* (Ger. *licht*), *knight* (Ger. *knecht*), *plough* (Ger. *pflug*), or changed to a labial, e. g. *laugh*, *tough*, or to an unaspirated surd, e. g. *hough*.

2. In their original power ט *t* differed from ת *t*, and כ *k* from ק *k*, for these letters are not confused nor liable to interchange, and the distinction is preserved to this day in the cognate Arabic; yet it is not easy to state intelligibly wherein the difference consisted. They are currently pronounced precisely alike.

3. The letter ח has a stronger sound than ה the simple *h*, and is accordingly represented by *hh;* ר is represented by *r*, although it had some peculiarity of sound which we cannot at this day attempt to reproduce, by which it was allied to the gutturals.

4. For two letters, א and ע, no equivalent has been given in the table, and they are commonly altogether neglected in pronunciation. א is the weakest of the letters, and was probably always inaudible. It stands for the slight and involuntary emission of breath necessary to the utterance of a vowel unattended by a more distinct consonant sound. It therefore merely serves to mark the beginning or the close of the syllable of which it is a

part, while to the ear it is entirely lost in the accompanying or preceding vowel. Its power has been likened to that of the smooth breathing (') of the Greeks or the English silent *h* in *hour*. On the other hand ע had a deep guttural sound which was always heard, but like that of the corresponding letter among the Arabs is very difficult of utterance by occidental organs; consequently no attempt is made to reproduce it. In the Septuagint it is sometimes represented by γ, sometimes by the rough and sometimes by the smooth breathing; thus עֲמֹרָה Γόμορρα, עֵלִי Ἠλί, עֲמָלֵק Ἀμαλήκ. Some of the modern Jews give it the sound of *ng* or of the French *gn* in *campagne*, either wherever it occurs or only at the end of words, e. g. שָׁמַע *Sh'mang*, עָמוֹד *gnāmodh*.

§ 4. The forms of the letters exhibited in the preceding table, though found without important variation in all existing manuscripts, are not the original ones. An older character is preserved upon the Jewish coins struck in the age of the Maccabees, which bears a considerable resemblance to the Samaritan and still more to the Phenician. Some of the steps in the transition from one to the other can still be traced upon extant monuments. There was first a cursive tendency, disposing to unite the different letters of the same word, which is the established practice in Syriac and Arabic. This was followed by a predominance of the calligraphic principle, which again separated the letters and reduced them to their present rectangular forms and nearly uniform size. The cursive stage has, however, left its traces upon the five letters which appear in the table with double forms; כ מ נ פ צ when standing at the beginning or in the middle of words terminate in a bottom horizontal stroke, which is the remnant of the connecting link with the following letter; at the end of words no such link was needed, and the

letter was continued vertically downward in a sort of terminal flourish thus, ן ף ץ ך, or closed up by joining its last with its initial stroke, thus ם.

a. The few instances in which final letters are found in the middle of words, as לְמַרְבֵּה Isa. 9 : 6, or their ordinary forms at the end, as חֻמּ Neh. 2 : 13, מָ Job 38 : 1, are probably due to the inadvertence of early transcribers which has been faithfully perpetuated since, or if intentional they may have had a connection now unknown with the enumeration of letters or the signification of words. The same may be said of letters larger than usual, as וְכַנָּה Ps. 80 : 16, or smaller, as בְּהִבָּרְאָם Gen. 2 : 4, or above the line, as מִיַּעַר Ps. 80 : 14, or inverted, as בְּנָסְעַ Num. 10 : 35 (in manuscripts and the older editions, e. g. that of Stephanus in 1541), or with extraordinary points, as וַיִּשָּׁקֵהוּ Gen. 33 : 4, לוּלֵא Ps. 27 : 13, in all which the Rabbins find concealed meanings of the most fanciful and absurd character. Thus in their opinion the suspended נ in מְנַשֶּׁה Judg. 18 : 30 suggests that the idolaters described were descended from Moses but had the character of Manasseh. In גָּחוֹן Lev. 11 : 42 the Vav, which is of unusual size, is the middle letter of the Pentateuch; וּבִרְנָעָה Gen. 16 : 5 with an extraordinary point over the second Yodh, is the only instance in which the word is written with that letter (the correct reading 1 Kin. 15 : 19 is וּבֵרִיתָה); the large letters in Deut. 6 : 4 emphasize the capital article of the Jewish faith. All such anomalous forms or marks, with the conceits of the Rabbins respecting them, are reviewed in detail in Buxtorf's Tiberias, pp. 152 etc.

§ 5. All the names of the letters were probably significant at first, although the meanings of some of them are now doubtful or obscure. It is commonly supposed that these describe the objects to which their forms originally bore a rude resemblance. If this be so, however, the mutations which they have since undergone are such, that the relation is no longer traceable, unless it be faintly in a few. The power of the letter is in every instance the initial sound of its name.

a. The opinion advocated by Schultens, Fundamenta Ling. Heb. p. 10, that the invention of the letters was long anterior to that of their names, and that the latter was a pedagogical expedient to facilitate the learning of the letters by associating their forms and sounds with familiar objects, has met with little favour and possesses little intrinsic probability. An interesting corroboration of the antiquity of these names is found in their preservation in the Greek alphabet, though destitute of meaning in that language, the Greeks having borrowed their letters at an early period from the Phenicians, and hence the appended *a* of Ἄλφα, etc., which points to the Aramæic form אַלְפָּא.

b. The Semitic derivation of the names proves incontestably that the alphabet had its origin among a people speaking a language kindred to the Hebrew. Their most probable meanings, so far as they are still explicable, are as follows, viz: Aleph, *an ox;* Beth, *a house;* Gimel, *a camel;* Daleth, *a door;* He, doubtful, possibly *a window;* Vav, *a hook;* Zayin, *a weapon;* Hheth, probably *a fence;* Teth, *a snake* or *a bag;* Yodh, *a hand;* Kaph, *the palm of the hand;* Lamedh, *an ox-goad;* Mem, *water;* Nun, *a fish;* Samekh, *a prop;* Ayin, *an eye;* Pe, *a mouth;* Tsadhe, *a fish-hook* or *a hunter's dart;* Koph, perhaps *an axe-head;* Resh, *a head;* Shin, *a tooth;* Tav, *a cross mark.*

Eusebius (Praep. Evang. x. 5) and Jerome give a mystical explanation of the alphabet, in which the names of the letters are read as a continuous sentence. See Fürst's Aramäisches Lehrgebäude, p. 26.

§ 6. The order of the letters appears to be entirely arbitrary, though it has been remarked that the three middle mutes ד ג ב succeed each other, as in like manner the three liquids ב מ ל. The juxtaposition of a few of the letters may perhaps be owing to the kindred signification of their names, e. g. Yodh and Kaph *the hand,* Mem *water* and Nun *a fish,* Resh *the head* and Shin *a tooth.* The antiquity of the existing arrangement of the alphabet is shown, 1. by psalms and other portions of the Old Testament in which successive clauses or verses begin with the letters disposed in regular order, viz. Ps. 25 (ק omitted), 34, 37 (alternate verses, י omitted), 111 (every clause), 112 (every clause), 119 (each letter eight times), 145 (נ omitted), Prov. 31 : 10—31, Lam. ch. 1, 2, 3 (each letter three times),4. In the first chapter of Lamentations the order is exactly preserved, but in the remaining three chapters ע and פ are transposed. 2. By the correspondence of the Greek and Roman alphabets, which have sprung from the same origin with the Hebrew.

a. The most ingenious attempt to discover a regular structure in the Hebrew alphabet is that of Lepsius, in an essay upon this subject published in 1836. Omitting the sibilants and Resh, he finds the following triple correspondence of a breathing succeeded by the same three mutes carried through each of the three orders, the second rank being enlarged by the addition of the liquids.

	Breathings.	Mutes.		Liquids.
Middle	א	ד ג ב		
Smooth	ה	ט ח ו	(כ)	נ מ ל
Rough	ע	ת ק פ		

Curious as this result certainly is, it must be confessed that the alleged correspondence is in part imaginary, and the method by which it is reached is too arbitrary to warrant the conclusion that this scheme was really in the mind of the author of the alphabet, much less to sustain the further speculations built upon it, reducing the original number and modifying the powers of the letters.

b. It is curious to see how, in the adaptation of the alphabet to different languages, the sounds of the letters have been modified, needless ones dropped, and others found necessary added at the end, without disturbing the arrangement of the original stock. Thus the Greeks dropped ו and ק, only retaining them as numerical signs, while the Roman alphabet has F and Q; on the other hand the Romans found כ and ס superfluous, while the Greeks made of them θ and ξ; ג and ז, in Greek γ and ζ, become in Latin C and G, while ח, in Latin H, is in Greek converted like the rest of the gutturals into a vowel η.

§ 7. The letters may be variously divided:

1. First, with respect to the organs by which they are pronounced.

Gutturals	א	ה	ח	ע	
Palatals	ג	י	כ	ק	
Linguals	ד	ט	ל	נ	ת
Dentals	ז	ס	צ	ש	
Labials	ב	ו	מ	פ	

ר has been differently classed, but as its peculiarities are those of the gutturals (אוֹת גְּרוֹנִית) it is usually reckoned with them.

2. Secondly, according to their respective strength, into three classes, which may be denominated weak, medium, and strong. The strong consonants offer the greatest resistance to change, and are capable of entering into any combinations which the formation or inflection of words may require. The weak have not this capacity,

but when analogy would bring them into combinations foreign to their nature, they are either liable to mutation themselves or occasion changes in the rest of the word. Those of medium strength have neither the absolute stability of the former nor the feeble and fluctuating character of the latter.

Weak,	א ה ו י א ה ח ע	Vowel-Letters, Gutturals.
Medium,	ר נ מ ל ש צ ס ז	Liquids, Sibilants.
Strong,	ב פ ג כ ק ד ת ט	Aspirates and Mutes.

The special characteristics of these several classes and the influence which they exert upon the constitution of words will be considered hereafter. It is sufficient to remark here that vowel-letters are so called because they sometimes represent not consonant but vowel-sounds.

a. It will be observed that while the *p*, *k*, and *t*-mutes agree in having smooth ב כ פ ת and middle forms ג ב ד, which may be either aspirated or unaspirated, the two last have each an additional representative ט ק which is lacking to the first. This, coupled with the fact that two of the alphabetic Psalms, Ps. 25, 34, repeat פ as the initial of the closing verse, has given rise to the conjecture that the missing *p* mute was supplied by this letter, having a double sound and a double place in the alphabet. In curious coincidence with this ingenious but unsustained hypothesis, the Ethiopic has an additional *p*, as the Greek alphabet has both *π* and *φ*.

3. Thirdly, the letters may be divided, with respect to their function in the formation of words, into radicals (אוֹתִיּוֹת שָׁרְשִׁיּוֹת) and serviles (אוֹתִיּוֹת הַשִּׁמּוּשׁ). The former, which comprise just one half of the alphabet, are never employed except in the roots or radical portions of words. The latter may also enter into the constitution of roots, but they are likewise put to the less independent use of the formation of derivatives and inflections, of prefixes and suffixes. The serviles are embraced in the memorial

words אֵיתָן מֹשֶׁה וְכָלֵב (Ethan Moses and Caleb); of these, besides other uses, אית are prefixed to form the future of verbs, and the remainder are prefixed as particles to nouns. The letters הֵאָבַנְתָּיו are used in the formation of nouns from their roots. The only exception to the division now stated is the substitution of ט for servile ת in a certain class of cases, as explained § 54. 4.

a. Kimchi in his Mikhlol (מִכְלוֹל) fol. 46, gives several additional anagrams of the serviles made out by different grammarians as aids to the memory, e. g. שמלאכתו בינה *for his work is understanding;* אני שלמה כותב *I Solomon am writing;* שלומי אך תבנה *only build thou my peace,* משה כתב אלינו כשתיל אב המון *like a branch of the father of multitude;* שם אליהו נכתב *Moses has written to us.* To which Elias Levita added *the name of Elias is written;* and Nordheimer שאל תון מכתבי *consult the riches of my book.*

§ 8. In Hebrew writing and printing, words are never divided. Hence various expedients are resorted to upon occasion, in manuscripts and old printed editions, to fill out the lines, such as giving a broad form to certain letters, ת ם ל ה א, occupying the vacant space with some letter, as ק, repeated as often as may be necessary, or with the first letters of the next word, which were not, however, accounted part of the text, as they were left without vowels, and the word was written in full at the beginning of the following line. The same end is accomplished more neatly in modern printing by judicious spacing.

§ 9. 1. The later Jews make frequent use of abbreviations. There are none, however, in the text of the Hebrew Bible; those which are found in the margin are explained in a special lexicon at the back of the editions in most common use, e. g. וגו׳ for וְגוֹמֵר *et completio*=etc.

2. The numerical employment of the letters, common to the Hebrews with the Greeks, is indicated in the table of the alphabet. The hundreds from 500 to 900 are represented either by the five final letters or by the combin-

ation of ת with the letters immediately preceding; thus ך or תק 500, ם or תר 600, ן or תש or תרק 700, ף or תת 800, ץ or תתק 900. Thousands are represented by units with two dots placed over them, thus א׳ 1000, etc. Compound numbers are formed by joining the appropriate units to the tens and hundreds, thus תכא 421. Fifteen is, however, made not by יה, which are the initial letters of the divine name Jehovah, יהוה, but by טו 9+6.

This use of the letters is found in the accessories of the Hebrew text, e. g. in the numeration of the chapters and verses, and in the Massoretic notes, but not in the text itself. Whether these or any other signs of number were ever employed by the original writers of Scripture, or by the scribes in copying it, may be a doubtful matter. It has been ingeniously conjectured, and with a show of plausibility, that some of the discrepancies of numbers in the Old Testament may be accounted for by assuming the existence of such a system of symbols, in which errors might more easily arise than in fully written words.

The Vowels.

§ 10. The letters now explained constitute the body of the Hebrew text. These are all that belonged to it in its original form, and so long as the language was a living one nothing more was necessary, for the reader could mentally supply the deficiencies of the notation from his familiarity with his native tongue. But when Hebrew ceased to be spoken the case was different; the knowledge of the true pronunciation could no longer be presumed, and difficulties would arise from the ambiguity of individual words and their doubtful relation to one another. It is the design of the Massoretic points (מָסוֹרָה *tradition*) to remedy or obviate these inconveniences by supplying what was lacking in this mode of writing. The

authors of this system did not venture to make any change in the letters of the sacred text. The signs which they introduced were entirely supplementary, consisting of dots and marks about the text fixing its true pronunciation and auxiliary to its proper interpretation. This has been done with the utmost nicety and minuteness, and with such evident accuracy and care as to make them reliable and efficient if not indispensable helps. These points or signs are of three kinds, 1. those representing the vowels, 2. those affecting the consonants, 3. those attached to words.

a. As illustrations of the ambiguity both as to sound and sense of individual words, when written by the letters only, it may be stated that דבר is in Gen. 12: 4 דִּבֶּר *he spake,* in Ex. 6: 29 דַּבֵּר *speak* and דִּבֵּר *speaking,* in Prov. 25: 11 דָּבָר *spoken,* in Gen. 37: 14 דָּבָר *word,* in 1 Kin. 6: 16 דְּבִר *the oracle* or most holy place of the temple, in Ex. 9: 3 דֶּבֶר *pestilence.* So וישק is in Gen. 29: 10 וַיַּשְׁקְ *and he watered,* and in the next verse וַיִּשַּׁק *and he kissed;* ויבא occurs twice in Gen. 29: 23, the first time it is וַיָּבֵא *and he brought,* the second וַיָּבֹא *and he came;* והשבתים is in Jer. 32: 37 first וַהֲשִׁבֹתִים *and I will bring them again,* and then וְהִשְׁכַּנְתִּים *and I will cause them to dwell;* שמים is in Gen. 14: 19 שָׁמַיִם *heaven,* and in Isa. 5: 20 שָׂמִים *putting.* This ambiguity is, however, in most cases removed by the connection in which the words are found, so that there is little practical difficulty for one who is well acquainted with the language. Modern Hebrew is commonly written and read without the points: and the same is true of its kindred tongues the Syriac and Arabic, though each of these has a system of points additional to the letters.

§ 11. 1. The alphabet, as has been seen, consisted exclusively of consonants, since these were regarded as a sufficiently exact representation of the syllables into which in Hebrew they invariably enter. And the omission of the vowels occasioned less embarrassment, because in the Semitic family of languages generally, unlike the Indo-European, they form no part, properly speaking, of the radical structure of the word, and consequently do not aid in expressing its essential meaning, but only its nicer shades and modifications. Still some notation of vowels was always necessary, and this was furnished in

a scanty measure by the vowel-letters, or, as they are also called, quiescents, or *matres lectionis* (guides in reading). The weakest of the palatals י was taken as the representative of the vowels *ī* and *e* of the same organ to which in sound it bears a close affinity; the weakest of the labials ו was in like manner made to represent its cognates *ū* and *ō;* and the two weak gutturals א and ה were written for the guttural vowel *ā*, as well as for the compound vowels *ē* and *ō* of which *a* is one of the elements. Letters were more rarely employed to represent short vowels; ה or י for *ĕ* is the most frequent case; others are exceptional.

a. Medial *ā* when written at all, as it very rarely is, is denoted by א, e. g. לאט *lāt* Judg. 4: 21, דאג *dāg* Neh. 13: 16 K'thibh, קאם *kām* Hos. 10: 14, זואזל *ʷzāzēl* Lev. 16: 8, ראש *rāsh* Prov. 10: 4 and in a few other passages, ראמות sometimes for *rāmōth*, ציאר *tsavār*, אבאסאך Hos. 4: 6 if not an error in the text perhaps for *emāsāk;* final *ā* which is much more frequently written, is denoted by ה, e. g. גלה *gālā*, מלכה *malkā*, אתה *atṯā*, rarely and only as an Aramæism by א, e.g. חגא *ḥhoggā* Isa. 19: 17, קרחא *ḳorḥhā* Ezek. 27: 31 K'thibh, גבחא *gāᵇḥ'hā* Ezek. 31: 5 K'thibh. The writing of *ē* and *ī*, *ō* and *ū* is optional in the middle of words but necessary at the end, e. g. צייתם or צוירים *tsivrīthīm*, צייתי *tsivrīthī;* שיבי or שובי *shūbbū*. In the former position י stands for the first pair of vowels, and ו for the second, e. g. מינקות *mēnīkōth*, נסיגתי *nˈsūghōthī;* א for *ē* and *ō* so situated is rare and exceptional, e. g. ראש *rēsh* Prov. 6: 11, 30: 8, and perhaps יגאץ *yāᵍēṣ* Eccles. 12: 5; זאת *zōth*, פראת *pōrōth* Ezek. 31: 8, בצאתו *bitsṣōthāv* Ezek. 47: 11. At the end of words *ē* is commonly expressed by י, and *ō* by ו, though ה is frequently and א rarely employed for the same purpose, e. g. מלכי *malkhē*, מלכי *malkō;* חיה *ḥᵉyē*, פרעה *parō;* לא *lō*. Final *ĕ* is represented by ה, medial *ĕ* by י, though this is only written in a few particular forms, e. g. יהיה *yih'ye*, תהיינה or תהינה *tih'yenā;* מלאתים *millēthĕm* Ezek. 11: 6, if not a textual error, is at least quite unusual.

b. The employment of the vowel-letters in conformity with the scale just given, is further governed, (1.) By usage, which is in many words and forms almost or quite invariable; in others it fluctuates, thus *sōbhᵉbh* is commonly סבב or סובב, only once סבבים 2 Kin. 8: 21; *yaᵃḳōbh* is יעקב except in Jer. 33: 26 where it is יעקוב; *thēāse* is תעשה, but in Ex. 25: 31 תיעשה; *ēthām* according to the analogy of similar grammatical forms would be אתם, but in Ps. 19: 14 it is איתם; *hōmīr* is in Jer. 2: 11 written in both the usual and an unusual way, חמיר and חמור; *mˈlākhīm* is מלכים except in 2 Sam. 11: 1, where it is מלאכים; *gˈʿhūlōth* is in Deut. 32: 8 גבלת, in Isa. 10: 13 גבולת, in Ps. 74: 17 גבולות; *lō* meaning *not* is לא, meaning *to*

him is לוֹ, though these are occasionally interchanged; *zō* is written both זה and זו; and *pō* פה, פו and פא. (2.) The indisposition to multiply the vowel-letters unduly in the same word, e. g. *ᵉlōᵃh* אלוה, *ᵉlōhīm* אלהים; *nāthūn* נתון, *n'thūnīm* נתנים or נתנם. (3.) The increased tendency to their employment in the later books of the Bible, e. g. כוח *kōᵃhh* Dan. 11: 6, always elsewhere כח; קודש *kōdhesh* Dan. 11: 30, for קדש; דויד *dāvīdh* in the books of Chronicles Ezra, Nehemiah and Zechariah, elsewhere commonly דוד. This must, however, be taken with considerable abatement, as is shown by such examples as *addīrīm* אדדרים Ex. 15: 10, אדרם Ezek. 32: 18.

It is to be observed that those cases in which א is used to record vowels must be carefully distinguished from those in which it properly belongs to the consonantal structure of the word, though from its weakness it may have lost its sound, as מצא *mātsā*, ראשין *rīshōn*, § 57, 2.

2. When used to represent the Hebrew vowels, *ā* is sounded as in *father*, *ă* as in *fat*, *ē* as in *there*, *ĕ* as in *met*, *ī* as in *machine*, *ĭ* as in *pin*, *ō* as in *note*, *ŏ* as in *not*, *ū* as in *rule*, and *ŭ* as in *full*. The quantity will be marked when the vowels are long, but not when they are short.

§ 12. There are nine points or massoretic signs representing vowels (תְּנוּעוֹת *motions*, viz., by which consonants are moved or pronounced); of these three are long, three short, and three doubtful. They are shown in the following table, the horizontal stroke indicating their position with reference to the letters of the text.

Long Vowels.			*Short Vowels.*	
קָמֶץ Kámets	*ā*	◌ָ	פַּתַח Páttahh	*ă* ◌ַ
צֵרֵי Tsérē	*ē*	◌ֵ	סֶגוֹל Séghol	*ĕ* ◌ֶ
חוֹלָם Hhólem	*ō*	◌ֹ	קָמֶץ חָטוּף Kámets Hhātúph	*ŏ* ◌ָ

Doubtful Vowels.

חִירִק Hhírik	◌ִ	*ī* or *ĭ*
שׁוּרֶק Shúrek	◌ּ	*ū* or *ŭ*
קִבּוּץ Kíbbuts	◌ֻ	

All these vowel-points are written under the letter after which they are pronounced except two, viz., Hholem

and Shurek. Hholem is placed over the left edge of the letter to which it belongs, and is thus distinguished from the accent R'bhi[a], which is a dot over its centre. When followed by שׂ or preceded by שׁ it coincides with the diacritical point over the letter, e. g. מֹשֶׁה *mōshe*, שׂוֹנֵא *sōnē;* when it follows שׂ or precedes שׁ it is written over its opposite arm, e. g. שֹׂמֵר *shōmēr*, תִּרְפֹּשׂ *tirpōs*. Its presence in these cases must accordingly be determined by the circumstances. Since a vowel-sign (or Sh'va § 16) is regularly written with every initial or medial consonant, שׂ must be *ōsh* and שׁ *ōs*, whenever it is preceded by a consonant without a vowel-sign; if it have itself no vowel-sign, שׁ will be *sō* and שׂ *shō*, except at the end of words. If Shin be preceded by a letter which itself represents a vowel the point over its right arm will not be Hholem, e. g. אִישׁ *īsh* not *iyōsh*, רָאשִׁים *rāshīm*, רִישׁוֹן *rīshōn*, but בְּאשׁ *b'osh* where א is a consonant. Shurek is a dot in the bosom of the letter Vav, thus וּ. It will be observed that there is a double notation of the vowel *u*. When there is a וּ in the text this vowel, whether long or short, is indicated by a single dot within it, and called Shurek; in the absence of וּ it is indicated by three dots placed obliquely beneath the letter to which it belongs, and called Kibbuts.

a. The division of the vowels given above differs from the common one into five long and five short, according to which Hhirik is counted as two, viz., Hhirik magnum ִי=*ī*, and Hhirik parvum ◌ִ=*ĭ;* and Shurek is reckoned a distinct vowel from Kibbuts, the former being *ū* and the latter *ŭ*. To this there are two objections. (1.) It confuses the massoretic signs with the letters of the text, as though they were coeval with them and formed part of the same primitive mode of writing, instead of being quite distinct in origin and character. The massoretic vowel-sign is not וּ but ◌ֻ. The punctuators never introduced the letter וּ into the text; they found it already written precisely where it is at present, and all that they did was to add the point. And instead of using two signs for *i*, as they had done in the case of *a*, *e*, and *o*, they used but one, viz., a dot beneath the letter, whether *i* was long or short. The confusion of things thus separate in their nature was pardonable at a time when the points were supposed

to be an original constituent of the sacred text, but not now when their more recent origin is universally admitted. (2.) It is inaccurate. The distinction between ◌ִ and ◌ֵ, ◌ֻ and ◌ֹ, is not one of quantity, for *ī* and *ū* are expressed indifferently with or without Yodh and Vav.

Gesenius, in his Lehrgebäude, while he retains the division of the vowels into five long and five short, admits that it is erroneous and calculated to mislead; and it has been discarded in the latest editions of his smaller grammar. That which was proposed by Gesenius, however, as a substitute, is perplexed and obscure, and for this reason, if there were no others, is unfitted for the wants of pupils in the early stage of their progress. On the other hand, the triple arrangement here adopted after the example of Ewald, has the recommendation not only of clearness and correctness, but of being, instead of an innovation, a return to old opinions. The scheme of five long and five short vowels originated with Moses and David Kimchi, who were led to it by a comparison of the Latin and its derivatives. From them it was adopted by Reuchlin in his Rudimenta Hebraica, and thus became current among Christians. The Jewish grammarians, before the Kimchis, however, reckoned Kibbuts and Shurek as one vowel, Hhirik as one, and even Kamets and Kamets Hhatuph as one on account of the identity of the symbol employed to represent them. They thus made out seven vowels, the same number as in Greek, where the distinction into long, short and doubtful also prevails.

b. The names of the vowels, with the exception of Kamets-Hhatuph, contain the sounds of the vowels which they are intended to represent, Kibbuts in the last, the others in their first syllable. Their signification is indicative either of the figure of the vowel or the mode of pronouncing it. Kamets and Kibbuts, *contraction*, i. e. of the mouth; Pattahh, *opening;* Tsere, *bursting forth;* Seghol, *cluster of grapes;* Hhirik, *gnashing;* Hholem, *strength;* Kamets-Hhatuph, *hurried Kamets;* Shurek, *whistling.* It is a curious circumstance that notwithstanding the diversity of the vowel-systems in the Syriac, Arabic, and Hebrew, the name Pattahh is common to them all.

§ 13. This later and more complete method of noting the vowels does not displace but is superinduced upon the scanty one previously described. Hence it comes to pass that such vowels as were indicated by letters in the first instance are now doubly written, i. e. both by letters and points. By this combination each of the two methods serves to illustrate and explain the other. Thus the added signs determine whether the letters אהוי (which have been formed into the technical word אֱהֱוִי *Ehᵉvī*) are in any given case to be regarded as vowels or as consonants. If these letters are themselves followed by a vowel or a

Sh'va, § 16, or have a Daghesh-forte, § 23, they retain their consonant sound; for two vowels never come together in Hebrew, and Sh'va and Daghesh-forte belong only to consonants: thus קֹרְקוֹ *kōrekū*, אָוֹן *āwōn*, מִצְרוֹת *mitsrōth* (where צ being provided with a separate point, the Hholem must belong after ו), עֶדְוֹת *ēdh'wōth*, וְהָיָה *v'hāyā*, קִיָּם *kiyyam*. Otherwise they quiesce in a preceding or accompanying vowel-sign, that is to say, they have the sound indicated by it, the vowel-sign merely interpreting what was originally denoted by the letter. At the end of words, where Sh'va and Daghesh-forte are rarely written, י is a vowel-letter if preceded by the sign for either of its homogeneous vowels *e* or *i*, and ו if accompanied by the sign for *o* or *u;* otherwise they are consonants, thus בִּי *bī*, בֵּי *mē*, גֵּיא *gĕ*, בּוֹ *bō*, לוּ *lū*, but שָׂרַי *sūray*, גּוֹי *gōy*, גָּלוּי *gālūy*, תָּוּ *tāw*, שָׁלֵוּ *shīlēw*, זִו *zīw;* the combination יָ is pronounced *āw*, עָנָיו and עָנָו *ānāw*, סָתָיו and סָתָו *s'thāw*. In consequence of its extreme weakness, א not only quiesces when it is properly a vowel-letter, but may give up its consonant character after any vowel whatever, e. g. טוֹאטָא *tōt*, רֹאשׁוֹן *rīshōn*, פֹּארָה *pōrā;* final א is always either quiescent or otiant, § 16. 1; ה is never used as a vowel-letter except at the end of words, and there it always quiesces unless it receives a Mappik, § 26.

a. As a letter was scarcely ever used to express *ŏ*, the quiescence of י in Kamets-Hhatuph is very rare, and where it does occur the margin always substitutes a reading without the י, e. g. רְבִינָה Jer. 27: 20, חֹבְנִים Ezek. 27: 15, בְּיָוְרִדְרְלוֹר Ps. 30: 4, רְמָיָוְדִדְלוֹ Isa. 44: 17, לְבָיְלִי Jer. 33: 8, וּגְדוֹלְבַּנַּח Nah. 1: 3. In אֲוֹנִיּוֹת 2 Chron. 8: 18, and בְּבָיְתִי Deut. 32: 13, ו represents or quiesces in the still briefer *ŏ* of Hhateph-Kamets, § 16. 3.

b. In a few proper names medial ה quiesces at the end of the first member of the compound, e. g. פְּדָהְצוּר Num. 1: 10, עֶשָׂהְאֵל 2 Sam. 2: 19, also written עֶשָׂהרְאֵל 1 Chron. 2: 16. In such words as גִּלְעָדָה Jer. 22: 6, שַׁבָּתָה Deut. 21: 7, ה does not quiesce in Kibbuts, for the points belong to the marginal readings גִּלְעָדִי, שַׁבְּתִי, § 46.

§ 14. On the other hand the vowel-letters shed light upon the stability of the vowels and the quantity of the

doubtful signs. 1. As *ĭ* was scarcely ever and *ŭ* seldom represented by a vowel-letter, Hhirik with Yodh (ִי) is almost invariably long and Shurek (וּ) commonly so. 2. The occasional absence in individual cases of the vowel-letters, does not determine the quantity of the signs for *i* and *u;* but their uniform absence in any particular words or forms makes it almost certain that the vowel is short. 3. The occasional presence of וּ and ִי to represent one of their homogeneous long vowels proves nothing as to its character; but if in any word or form these letters are regularly written, the vowel is, as a general rule, immutable. When וּ and ִי stand for their long homogeneous vowels, these latter are said to be written fully, e. g. קוֹל *kōl*, נִיר *nīr*, בִּיתֻ *mūth;* without these quiescent letters they are said to be written defectively, e. g. חָקְמֹתִי *hᵃkāmōthī*, בָּמֹס *kāmūs.*

a. Hhirik with Yodh is short in וַהֲרִיתִי *vahᵃrittīv* 1 Sam. 17: 35, בִּרְקוֹתֶיהָ *bikk'rōthekhā* Ps. 45: 10, לִרְקֹחַת *likk'hath* Prov. 30: 17, לִיסוֹד *lissōdh* 2 Chron. 31: 7. In צִיקְלַג 1 Chron. 12: 1, 20, *i* is probably long, although the word is always elsewhere written without the Yodh; as it sometimes has a secondary accent on the first syllable and sometimes not (see 1 Sam. 30: 1), it may have had a twofold pronunciation *tsīk'lag*, and *tsiklag.* Shurek as *ŭ* is of much more frequent occurrence, e. g. חֻקֵּי *hhukkē*, לְאֻמִּים *l'ummīm*, יֻלַּד *yulladh*, חֻקָּה *hhukkā* Ps. 102: 5, אֲלֻפֵּינוּ 2 Chron. 2: 7, זֻקָּה Ezek. 16: 34.

§ 15. The vowels may be further distinguished into pure, *a, i, u,* and diphthongal, *e, o; e* being a combination of *a* and *i*, or intermediate between them, and *o* holding the same relation to *a* and *u.*

Sh'va.

§ 16. 1. The absence of a vowel is indicated by ְ Sh'va (שְׁוָא *emptiness,* or as written by Chayuġ, the oldest of Jewish grammarians, שֵׁבָא), which serves to assure the reader that one has not been inadvertently omitted. It

is accordingly placed under all vowelless consonants except at the end of words, where it is regarded as unnecessary, the absence of a vowel being there a matter of course. If, however, the last letter of a word be ך, or if it be immediately preceded by another vowelless letter, or be doubled by the point called Daghesh-forte, § 23, Sh'va is written to preclude the doubt which is possible in these cases, e. g. בִּישְׁבֵרְכֶם, בִּילְבָּךְ, קִשְׁטְ, אֲמַרְתְּ, אַתְּ, נָתַתְּ. Sh'va is not given to a quiescent letter, since it represents not a consonant but a vowel, e. g. הֲרִיקָה, nor as a general rule to a final consonant preceded by a quiescent; thus וּבָאת, הַטְּאת Ruth 3: 4; וְהָלְיִת Isa. 62: 3, though in this case it is sometimes written, e. g. וּבָאתְ 2 Sam. 14: 3; וְהָלְיִתְ 2 Sam. 14: 2; וְהָרִית Judg. 13: 3; הוֹצֵאתְ 1 Kin. 17: 13. א at the end of a word, preceded either by a vowelless letter or a quiescent, is termed otiant, and is left unpointed, e. g. הַטָּא, נִקְרָא, רִבִּיא, הוּא; so likewise in the middle of a word, when followed by a vowel-letter and preceded by a consonant to which it has surrendered this vowel, its own consonant character being lost, § 57, 2 (3), e. g. יְרֵאוּ *y'rū* Josh. 24: 14, שְׁבֵאוֹל *s'mōl* Num. 20: 17, רֵאשׁוֹן *rīshōn* Job 15: 7, תְּשֵׁאִרְנָה *tissenā* Ezek. 23: 49.

a. Final ך may receive Sh'va for the sake of distinction not only from ה, as already suggested, but also from ר with which it might be in danger of being confounded in manuscripts; Freytag conjectures that it is properly a part of the letter, like the stroke in the corresponding final ـل in Arabic. In such forms as רַגְלֵי Sh'va is omitted with the closing letters because the י is not sounded.

2. Sh'va may be either silent (שְׁ *quiescens*), or vocal (שָׁ *mobile*). At the close of syllables it is silent. But at the beginning of a syllable the Hebrews always facilitated the pronunciation of concurrent consonants by the introduction of a hiatus or slight breathing between them; a Sh'va so situated is consequently said to be vocal, and has a sound approaching that of a hastily uttered *e*, as

in *given*. This will be represented by an apostrophe, thus, בְּמִדְבַּר *b'midhbar*, פְּקַדְתֶּם *p'kadhtem*.

a. According to Kimchi (Mikhlol fol. 189) Sh'va was pronounced in three different ways, according to circumstances. (1.) Before a guttural it inclined to the sound of the following vowel, e. g. יְצַבֵּד *y^{a}abbēdh*, עֶשֶׂת *s^{e}ēth*, דְּצוּ *d^{u}ū*, and if accompanied by Methegh, § 44, it had the full sound of that vowel, e. g. עֲשׂוּ *sūū*, תֶּחֱזֶה *tīhhī*, לְעֹלָם *lōōlām*. (2.) Before Yodh it inclined to *i*, e. g. בְּיַעֲקֹב *b'ya^{a}kōbh*, בְּיוֹם *k'yōm*, and with Methegh was sounded as Hhirik, e. g. בְּיָד *biyadh*. (3.) Before any other letter it inclined to *a*, e. g. בְּרָכָה *b^{a}rākhā*, גְּלִילִים *g^{a}līlīm*, and with Methegh was pronounced as Pattahh e. g. בַּמַּקְהֵלוֹת *bamakhēlōth*.

3. Sh'va may, again, be simple or compound. Sometimes, particularly when the first consonant is a guttural, which from its weakness is in danger of not being distinctly heard, the hiatus becomes still more audible, and is assimilated in sound to the short guttural vowel *ă*, or the diphthongal *ĕ* or *ŏ*, into which it enters. This assimilation is represented by combining the sign for Sh'va with those for the short vowels, thus forming what are called the compound Sh'vas in distinction from the simple Sh'va previously explained.

These are,

Hhātēph-Pattahh ֲ; thus, עֲמֹד *^{a}mōdh*.
Hhātēph-Seghol ֱ; thus, אֱמֹר *^{e}mōr*.
Hhātēph-Kamets ֳ; thus, חֳלִי *hh^{o}lī*.

a. Hhātēph (חָטַף *snatching*) denotes the rapidity of utterance or the hurried character of the sounds represented by these symbols.

b. The compound Sh'vas, though for the most part restricted to the gutturals, are occasionally written under other consonants in place of simple Sh'va, to indicate more distinctly that it is vocal. Luzzatto specifies the following cases: Hhateph Pattahh is found under the first of two similar letters, e. g. רַבַּּוֹת Num. 10: 36, or a letter from which Daghesh-forte has been omitted חַבֲרָה Gen. 27: 38, after initial ה, וַהֲכֹם Gen. 2: 12, וַשֲׁמַע Dan. 9: 18, וַשֲׁלֹחַ Lev. 25: 34, וְתַבֲקָשֵׁי Ezek. 26: 21, after a vowel which has arisen from Sh'va בָּבֲלִי, and in certain forms of אָבַל *to eat* and בָּרַךְ *to bless*, e. g. תְּאֻבֲלָה Gen. 3: 17, יְבָרֲכֶךָּ Gen. 12: 3. Hhateph-Kamets is less frequent, but sometimes occurs where Hholem has been dropped תְּקֳבָנָה (from תְּקֹם) Num. 23: 25, חָרְקֳדוּ Job 2: 7, חֳקָדָשִׁים Ezek. 41: 4, שָׁבְּקֳלִים Gen. 41: 5, נִשְׁבָּרִים Ps. 104: 17, אֶשְׁתַּחֳוֶה Isa. 27: 3, אֶהְתַּחֳנָה Jer. 31: 33, and in a few other

instances לְקָחָהּ Gen. 2: 23, אֲלַקְטָה Ruth 2: 2, 7, וְסָבְלָה 1 Kin. 13: 7, וְצַעֲקִי. Hhateph-Seghol occurs but once צְלְצֹלֵיהֶם 2 Sam. 6: 5 (edition of Stephanus). Manuscripts and editions differ greatly in this use of the compound Sh'vas; and the same word is differently written in the current text, e. g. בַּסְּנָלָה 2 Kin. 2: 1, בְּסַעֲרָה ver. 11.

Pattahh Furtive.

§ 17. A similar hiatus or slight transition sound was used at the end of words in connection with the gutturals. When ע, ח, or the consonantal ה at the end of words is preceded by a long heterogeneous vowel (i. e. another than *a*), or is followed by another vowelless consonant, it receives a Pattahh furtive ‗ , which resembles in sound an extremely short *a*, and is pronounced before the letter under which it is written, e. g. רוּחַ *rūᵃhh*, שָׁמֵעַ *shīmōᵃ*, מַגְבִּיהַּ *maghbīᵃh*, שָׁמַעְתָּ *shāmaᵃt*, יַחַד *yiᵃhhad*.

a. Some grammarians deny that Pattahh furtive (גְּנוּבָה *stolen*) can be found under a penultimate guttural, contending that the vowel-sign is in such cases a proper Pattahh, and that שָׁמַעְתָּ should accordingly be read *shāmaat*, and יַחַד *yihhad*. But both the Sh'va under the final letter, § 16, and the Daghesh-lene in it, § 21, show that the guttural is not followed by a vowel. The sign beneath it must consequently be Pattahh furtive, and represent an antecedent vowel-sound. In some manuscripts Pattahh furtive is written as Hhateph-Pattahh, or even as simple Sh'va; thus, רָקִיעַ or רָקִיעַ for רָקִיעַ.

Syllables.

§ 18. 1. Syllables are formed by the combination of consonants and vowels. As two vowels never come together in the same word in Hebrew without an intervening consonant, there can never be more than one vowel in the same syllable; and with the single exception of ו occurring at the beginning of words, no syllable ever consists of a vowel alone. Every syllable, with the exception just stated, must begin with a consonant, and may begin with two, but never with more than two. Syllables ending with a vowel, whether represented by

a quiescent letter or not, are called simple, e. g. לְךָ *l'khā*, עֹלָה *ō-lā*. (The first syllable of this second example begins, it will be perceived, with the consonant ע, though this disappears in the notation given of its sound.) Syllables ending with a consonant, or, as is possible at the close of a word, with two consonants, are said to be mixed: thus קַמְתֶּם *kam-tem*, הָלַכְתְּ *hā-lakht*. As the vocal Sh'vas, whether simple or compound, are not vowels properly speaking, but simply involuntary transition sounds, they, with the consonants under which they stand, cannot form distinct syllables, but are attached to that of the following vowel. Pattahh furtive in like manner belongs to the syllable formed by the preceding vowel. Thus זְרוֹעַ *z'rō*^{a}, אֲנִי *^{o}nī* are monosyllables.

2. Long vowels always stand in simple syllables, and short vowels in mixed syllables, unless they be accented. But accented syllables, whether simple or mixed, may contain indifferently a long or a short vowel.

a. The following may serve as a specimen of the division of Hebrew words into their proper syllables; thus,

אָדָם	אֱלֹהִים	בָּרָא	בְּיוֹם	אָדָם	תּוֹלְדֹת	סֵפֶר	זֶה
ā-dhā́m	^{e}lō-hī́m	b'rṓ	b'yṓm	ā-dhā́m	tō-l'dhṓth	sḗ-pher	zḗ

Gen. 5: 1. אֹתוֹ עָשָׂה אֱלֹהִים בְּרִאוּת

ō-thṓ ā-sā́ ^{e}lō-hī́m bidh-mṻ́th

b. The reason of the rule for the quantity of syllables appears to be this. In consequence of their brevity, the short vowels required the addition of a following consonant to make the utterance full and complete, unless the want of this was compensated by the greater energy of pronunciation due to the accent. The long vowels were sufficiently complete without any such addition, though they were capable of receiving it under the new energy imparted by the accent. This pervading regularity, which is so striking a feature of the Hebrew language, was the foundation of the *systema morarum* advocated by some of the older grammarians of Holland and Germany. The idea of this was, that each syllable was equal to three *morae*, that is, three rests, or a bar of three beats; a long vowel being equivalent to two *morae*, or two beats, a short vowel to one, and the initial or final consonant or consonants also to one: thus הָלַכְתְּ *k* (1) + *ā* (2) = 3, *t* (1) + *a* (1) + *lt* (1) = 3. An accented syllable might have one *mora* or beat either more or less than the normal quantity. This system

was not only proposed by way of grammatical explanation, but also made the basis of a peculiar theory of Hebrew prosody. See Gesenius, Geschichte d. Heb. Sprache. p. 123.

c. The cases in which short vowels occur in unaccented simple syllables, are mostly due to the disturbing influence exerted by the weak letters upon the normal forms of words; thus, דֶּשֶׁא, פֶּרֶא, פֶּלֶא, הֶגֶה, בֶּגֶד and the like are formed after the analogy of בֶּלֶךְ. A long vowel in an unaccented mixed syllable is found in but one word, and that of foreign origin, בְּלִי־שֵׁאת *bēl-t'shatstsar*, though here, the syllable receives, if not the primary, yet the secondary accent. The same is the case when a long vowel is retained before Makkeph, e. g. שֶׁת־לִּי; so also in the proper names בֶּרֶכְיָהוּ, שֶׁלֶמְיָהוּ, in which the first member of the compound preserves its segholate form as though it were a separate word. In the Arabic, which is exceedingly rich in vowels, there are comparatively few mixed syllables; nearly every consonant has its own vowel, and this more frequently short than long. The Chaldee, which is more sparing in its use of vowels than the Hebrew, observes in general the same rule with respect to the quantity of syllables, though not with the same inflexible consistency.

3. When the consonant which concludes one syllable is at the same time attached to that which follows, the first syllable is in strictness neither simple nor mixed but may be denominated intermediate. The vowel in an intermediate syllable is short as though the following consonant belonged to it entirely, while yet this is likewise linked to a succeeding vowel or vocal Sh'va, thus חַרְבֹּות *hhar'bhōth.*

a. Such syllables are often occasioned by the special characteristics of the guttural letters, thus חַיָּת in which י belongs in a measure to both syllables is for חַיַּת, הַהוּא *hahū* is for *hah-hū*, § 23. 3. *a*, יַהֲרֹג *yah^{a}rōg* is for יַהֲרֹג *yah-rōg*, נֶהֱפְכוּ *neheph'khū* is for נֶהְפְּכוּ *neh-p'khū*. See also § 20. 2 and § 22. *a*.

Ambiguous Signs.

§ 19. It will now be possible, by aid of the principles already recited, to determine the quantity of the doubtful vowels, and to remove the ambiguity which appears to exist in certain vowel-signs.

1. Hhirik, Shurek, and Kibbuts, in unaccented simple syllables, must be long, and in unaccented mixed syllables, short, e. g. יִרַשׁ or יְרַשׁ *yi-rash*, יִבְנוּ *yibh-nu*, גְּבוּלֹו or גִּבְלֹו

g'bhū-lō, יְגַבֵּל or יוּגַבֵּל *yul-ladh*, כֻּלָּם or כּוּלָּם *kul-lām*, מָשׁוּךְ or מָאוּךְ *māuzzī*. In accented syllables, whether simple or mixed, they are always long, e. g. שִׁיחִים or שִׂיחִים *sī-hhīm*, לִי *lī*, גְּבָל or גְּבוּל *g'bhūl*, דְּרָשׁוּהוּ or דְּרָשׁוּהוּ *d'rā-shū-hū*, the only exception being that Hhirik is short in the monosyllabic particles אִם, אִשׁ, עִם, בִּן, in בֵּן, and in some abbreviated verbal forms of the class called Lamedh-He, e. g. וַיֵּז, וַיִּשְׁבְּ, יְרֵב. The only cases of remaining doubt are those in which these vowels are followed by a letter with Sh'va, either simple or compound. If the former, it might be a question whether it was silent or vocal, and consequently whether the syllable was simple or mixed. If the latter, though the syllable is of course simple, the weak letter which follows may interfere with the operation of the law. Here the etymology must decide.

a. The vowel is long or short as the grammatical form may require; thus in יְחִיחַ, תְּחִלָּה, יְרֵאֶה־לּוֹ Gen. 22: 8, which follow the analogy of יִקְטֹל, and in סְבִבֵי Isa. 10: 34, קִמְצוֹ the first vowel is short; in גְּבֻלָּם, וְעִכְּרָה the first vowel is long. In a few instances the grammatical form in which Hhirik is employed is itself doubtful; the distinction is then made by means of Methegh, § 44, which is added to the vowel-sign if it is long, but not if it is short; thus, יִרְאוּ *yī-r'ū*, from יָרֵא *to fear*, and יִשְׁנוּ *yī-sh'nū* from יָשֵׁן *to sleep;* but יִרְאוּ *yir-ū* from רָאָה *to see*, and יִשְׁנוּ *yish-nū* from שָׁנָה *to do a second time.*

2. Kamets *ā* and Kamets-Hhatuph *ŏ* are both represented by the same sign (ָ), but may be distinguished by rules similar to those just given. In an unaccented simple syllable it is Kamets; in an unaccented mixed syllable it is Kamets-Hhatuph; in an accented syllable, whether simple or mixed it is Kamets, e. g. דָּבָר *dā-bhār*, חָפְשִׁי *hhoph-shī*. Before a letter with simple Sh'va, the distinction is mostly made by Methegh, § 44; without Methegh it is always Kamets-Hhatuph, with it commonly Kamets e. g. חָכְמָה *hhokh-mā*, חָכְמָה *hhā-kh'mā*. Before a guttural with Hhateph-Kamets or Kamets-Hhatuph it is frequently *ŏ*, though standing in a simple syllable and

accompanied by Methegh, e. g. בְּחֹרַי *bo-hh°rī*, תְּעָבֻם *to-obhdhem*. The surest criterion, however, and in many cases the only decisive one, is found in the etymology. If the vowel be derived from Hholem, or the grammatical form requires an *o* or a short vowel, it is Kamets-Hhatuph; but if it be derived from Pattahh, or the form requires an *a* or a long vowel, it is Kamets.

a. Thus וַאֲנִיּוֹת with the prefixed conjunction *vo°niyyōth*, הָאֲנִיָּה with the article *hā°niyyā;* נֶעֱצַר in the Hophal *yo°madh*, יִתְאֹשָׁחוּ Isa. 44: 13 in the Piel *y'thā°-rchū*. The first vowel is *ŏ* in צֹהֲרַיִם from צָהֳרַיִם, חֳדָשִׁים from חָדָשִׁים, שֹׁרֶשׁ from שָׁרָשׁ, עֹשְׁקֹה־בִּי from עָשְׁקָה־בִּי Isa. 38: 14, חָבְהֹ־בִּי Num. 22: 11, אָרְחֹ־בִּי Num. 23: 7 and the like, and the first two vowels in such words as פְּעָלְבֶם from פָּעַל, בְּאָכְבֶם Isa. 30: 12 from בָּאַס, חָרְבָּם Deut. 20: 2, חָטְאָה Hos. 13: 14, חָנְנֵי 2 Chron. 10: 10, חָבְלֵיהֶם 2 Kin. 15: 10, because they are shortened from Hholem. On the other hand the first vowel is *ā* in שָׁחֲרִי Job 16: 19 from שַׁחַר, חָרְשִׁים from חָרָשׁ, בָּגְלִי from בָּגָל. The word שָׁמְרָה is in Ps. 86: 2 the imperative *shomrā*, in Job 10: 12 the preterite *shāmr'rā*. The medial vowel is *ŏ* in the infinitive עָבְדָה Obad. ver. 11, and the future יַפְגְּשָׁהּ Gen. 32: 18, but *ā* in the preterite נָחְנָה 1 Sam. 24: 11. The best authorities decide that בָּתִּים should be pronounced *bāttîm*, not *bŏttîm*, as the rule would seem to require.

b. In a very few instances Kamets-Hhatuph is found in a syllable bearing a conjunctive accent, viz.: דָּדְךָ Ps. 38: 21 (in some editions), כָּל Ps. 35: 10, Prov. 19: 7, and in the judgment of Ewald סָגְרוּ Jndg. 19: 5 comp. ver. 8, and עָם Ezek. 41: 25; in Dan. 11: 12 וְרָם the points belong to the marginal reading וּרְם, and the vowel is consequently Kamets. There are also a few cases in which Kamets remains in a mixed syllable, deprived of its accent by Makkeph, § 43, without receiving Methegh, viz.: בָּנְתִי Ps. 16: 5 (in some editions), קָרְבִי Ps. 55: 19, 22, סָבְבוּ Ps. 74: 5; and a final unaccented Kamets is not affected by the insertion of Daghesh-forte conjunctive. § 24, in the initial letter of the following word, e. g. בָּשַׁחְתָּ שָׁם Gen. 31: 13. When an accent takes the place of Methegh, it serves equally to distinguish *ā* from *ŏ*, e. g. וְנָגְפוּ Ex. 21: 22 *v'nāgh'phū*, וְנָבְרְאוּ Ex. 21: 35 *ūmākh'rū*, § 45. 5.

c. Inasmuch as בָּחֳרֹת is derived from בָּחֹר *mākhār*, its first vowel might be suspected to be *ā;* but as it is so constantly written with Hhateph-Kamets, the preceding vowel is probably conformed to it. It is consequently regarded and pronounced as *ŏ*. Kimchi (Mikhlol, fol. 188) declares that the first vowel in דָּרְכָּן 1 Sam. 13: 21, דַּרְכֹּנוֹת Eccles. 12: 11 and הָלְכִי Num. 24: 7 was universally held to be Kamets, and that with the exception of Rabbi Jonah ben Gannach, who was of a contrary mind, the same unanimity prevailed in regard to the first vowel of חָרְבָן Ezek. 40: 43. As, however, this last word is in every other place written without the Methegh, and there is no analogy for such words as those mentioned above having *ā* in

their initial syllable, the best authorities are now agreed that the vowel is *ŏ*, and the words are accordingly read *dorbhān*, etc. In יָ֫שְׁפֵ֥ה *jasper*, and בָּרְקַ֫ת *emerald*, Ezek. 28: 13, which are mentioned by Kimchi in the same connection, the first vowel is Kamets.

d. In some manuscripts and a few of the older printed books, e. g. Stephanus' Hebrew Bible and Reuchlin's Rudimenta Hebraica, Kamets-Hhatuph is denoted by (֯). It then differs from Kamets, but is liable to be confounded with Hhateph-Kamets. It can, however, be distinguished from it by the circumstance that Kamets-Hhatuph is always followed either by simple Sh'va, Daghesh-forte, or Methegh; none of which ever immediately succeed Hhateph-Kamets. Such a form as כָּ֯כָּה Ezek. 26: 9 in some editions is an impossible one if (֯) have its ordinary meaning.

e. It is surprising that in so minute and careful a system of orthography as that of the Massorites, there should be no symbol for *ŏ* distinct from that for *ā;* and some have felt constrained in consequence to suppose that the signs for these two vowels were originally different, but became assimilated in the course of transcription. This seems unlikely, however. The probability is that *ā* and *ŏ*, whose resemblance even we can perceive, were so closely allied in the genuine Hebrew pronunciation, that one sign was thought sufficient to represent them, especially as the Massorites were intent simply on indicating sounds without concerning themselves with grammatical relations. This is further confirmed by the occasional selection of Hhateph-Kamets to accompany Kamets, as בָּסְעָ֯לָה, רָהְאָ֯לָה, וְצָעָ֯קִי Jer. 22: 20, אֲבָנָ֯לָה Isa. 27: 4, or to replace it, as חָרְבּ֯וֹת from חָרֵב Ezek. 36: 35, 38, and by the fact that the article undergoes the same euphonic change before ה and ח, § 231. 4.

§ 20. 1. As simple Sh'va is vocal at the beginning of a syllable and silent at its close, there can be no doubt as to its character when it stands under initial or final letters. Preceding the first vowel of a word it must of course be vocal, and following the last vowel it must be silent, זְכַרְתָּם *z'khartām*, זָכַרְתְּ *zākhart*. In the middle of a word, the question whether it belongs to the syllable of the preceding or the following vowel must be determined by the circumstances. If a complete syllable precedes, that is, either an unaccented long vowel or a vowelless consonant serving as the complement of a previous short vowel, it is vocal. If it be preceded by a short vowel which cannot make a complete syllable without the aid of a following consonant, or by a long accented vowel, it is silent: זֹכְרֵי *zō-kh'rē*, תִּזְכְּרוּ *tiz-k'rū*, לִבְנֶה *libh-ne*,

תִּקְטְלֶנָּה *tiktōl-nā*. Sh'va under a letter doubled by Dagheshforte, § 23, is vocal, such a letter being equivalent to two, the first of which completes the previous syllable, and the second begins the syllable which follows: הַזְּכָרִים = הַוְזְכָרִים *haz-z'khārīm*. Inasmuch as no syllable can begin with more than two consonants, § 18. 1, two vocal Sh'vas can never come together. And two silent Sh'vas can never come together except at the end of a word, since none but final syllables can close with two consonants. When two simple Sh'vas concur in the middle of a word, therefore, the first is necessarily silent and the second vocal: אֶזְכְּרָה *ez-k'rā*.

2. In addition to this it is to be remarked that Sh'va is vocal after intermediate syllables; that is to say, when the consonant under which it stands performs the double office of completing one syllable and beginning the next. Thus, when it follows a consonant from which Dagheshforte has been omitted, רַיְבְקְשֵׁהוּ *ray'bhak'shū* for *ray-y'bhak-k'shū*, or the first of two similar letters, in order that the reduplication may be made more distinct, הַלְלוּ *hal'lū*, קִלְלָת *kil'lath*, צִלְלוֹ *tsil'lō*, עַלְלַי *al'lay*, חִקְקֵי *hhik'kē*, and in several other cases, which will be more particularly described in § 22.

a. Elias Levita ingeniously represented the rules for vocal Sh'va by the first five letters of the Hebrew Alphabet, thus א (=1) when it stands under the first letter of a word; ב (=2) after another Sh'va; ג (=גְּדוֹלָה *long*) after a long vowel; ד (=דָּגֵשׁ) after Dagheshforte; ה (=הַדְּמִיִּים *the similar*) under the first of two similar letters.

Dagheshlene.

§ 21. The second class of signs added to the Hebrew text are those which are designed to guide in the pronunciation of the consonants. These are the diacritical point over Shin, Dagheshlene, Dagheshforte, Mappik,

and Raphe. The use of the first of these has already been sufficiently explained, § 3. 1.

1. Daghesh-lene (דָּגֵשׁ קַל) is a point inserted in the six letters ב ג ד כ פ ת (technically called *B'ghadh K'phath*), to indicate the loss of their aspiration, e. g. בּ *bh*, ב *b*, etc. As these letters are always aspirated after a vowel-sound, however slight, and never as an initial utterance or when following a consonant, they invariably require Daghesh-lene whenever they are not immediately preceded by a vowel or a vocal Sh'va. It is consequently inserted in the initial aspirate of a word which begins a verse, בְּרֵאשִׁית Gen. 1: 1, or which follows a word bearing a disjunctive accent (inasmuch as this represents a pause of longer or shorter duration), וּבְרִיחוֹ בָּאוּ Ex. 1: 1, עַתָּה וּפֶן Gen. 3: 22, or ending in a consonant, אֶל־בְּנֵי, מִצַּלְעִי הַזֶּה Gen. 24: 42; but not if it follows a word ending in a vowel and having a conjunctive accent, תֹּהוּ וָבֹהוּ, פְּנֵי תְהוֹם תֹּהוּ וָבֹהוּ Gen. 1: 2. The sacred name יְהוָה is followed by Daghesh-lene, even though it may have a conjunctive accent, Num. 10: 29, Deut. 3: 26, Josh. 10: 30, 11: 8, Ps. 18: 21, because in reading the Jews always substitute for it the word אֲדֹנָי, which ends in a consonant. In three instances, however, e. g. אֲדֹנָי בָּם Ps. 68: 18, קִרְאָתוֹהוּ Isa. 34: 11, שָׁלֵו בָּהּ Ezek. 23: 42, Daghesh-lene is not inserted after a vowel-letter, which retains its consonant sound.

2. Daghesh-lene is inserted in a medial or final aspirate preceded by a vowelless consonant, whether this be accompanied by silent Sh'va or Pattahh furtive, e. g. שָׁמַעְתָּ, נִסְתַּרְתָּ; but not if it be preceded by a vowel or vocal Sh'va, whether simple or compound, e. g. וּבְכִית, עֲבַדְתָּם.

a. The primary signification of the name Daghesh is commonly explained from the Syriac ܕܰܓܫ (דָּגֵשׁ), to which Castellus in his lexicon

gives the sense of *piercing*. This is by some applied to the puncture or point which is its written sign, by others to its power of sharpening the sound of letters by removing their aspiration or doubling them. Buxtorf, however, in his Chaldee Lexicon, disputes the existence of such a root in either Syriac or Chaldee, alleging that in Prov. 12: 18, the passage quoted to prove the word, the true reading is נִבְעָא (רגשא). The six letters which receive Daghesh-lene in Hebrew have the same twofold pronunciation in Syriac, a red dot called Rukhokh (ܪܘܟܳܐ *softness*), being written beneath them when they were to be aspirated, and another called Kushoi (ܩܘܫܝ *hardness*), being written above them when they were not.

b. Grammarians are not agreed whether the aspirated or unaspirated sound of these consonants was the original one. There being no data for the settlement of the question, each decides it by his own theory of phonetic changes. The correctness of the Massoretic punctuation has sometimes been questioned in regard to this matter, on the ground of the improbability of such fluctuation in the sound of these letters in the same word. But besides the Syriac analogy just referred to, the Sanskrit language shows the almost unlimited extent to which euphonic changes may be carried by a people possessing a sensitive and discriminating ear. The Sanskrit aspirates, besides being subjected to other mutations which cannot here be detailed, regularly lose their aspiration when finals, and under certain conditions when medials, throwing it back, where this is possible, upon a previous letter. Bopp Kritische Grammatik, pp. 30. 42. Similar laws prevail to some extent in Greek, e. g. *θρίξ, τριχός; τρέφω, θρέψω; θύω, ἐτύθην; οὐκ ἔχω, οὐχ ἕξω; μεθ' ὑμῶν.*

§ 22. The absence of Daghesh-lene in an aspirate sometimes shows a preceding simple Sh'va to be vocal when this would not otherwise have been known. In most of the cases referred to, a letter originally belonging to the succeeding syllable is by the prefixing of a short vowel drawn back to complete the syllable before it; instead, however, of giving up its previous connection altogether, it forms an intermediate syllable, § 20. 2, the Sh'va remaining vocal though the antecedent vowel is short: thus, לְבַב *l'bhabh* with the prefix בְּ becomes בִּלְבַב *bil'bhabh*, not בְּלְבַב *bil-babh*.

a. The particular instances in which this may occur are the following, viz.: (1) The Kal imperative of verbs and the Kal infinitive with suffixes, e. g. עִבְרוֹ, עָבְרָם, עָבְרָהּ, עָבְרָנִי from עָבַר; yet with occasional exceptions, as בְּאָסְפָם Lev. 23: 39, where ס necessarily closes the syllable, otherwise two successive letters would have vocal Sh'va, contrary to § 20. 1. (2) Those

forms of Pe Guttural verbs in which the first radical assumes a short vowel in place of the silent Sh'va in the regular inflexion, e. g. תֶּחְבְּרוּ, נַעְבְּדוּ for תֶּחְבְּרוּ, נַעְבְּדוּ. (3) The construct plural of nouns עִבְרֵי from עֲבָרִים, פִּתְחֵי from פְּתָחִים, חָרְבוֹת from חָרָבוֹת, though with occasional exceptions, as רָעֵי־שֶׂה Cant. 8: 6, but רֹעֵי־צֹאן Ps. 76: 4; צִבְאֵי Isa. 5: 10, חֵרְפֵי Ps. 69: 10, בִּרְכֵי Gen. 50: 23, but בִּרְכֵיהֶם Judg. 7: 6; בִּגְדֵי, בִּגְדוֹ from בֶּגֶד are peculiar in omitting Daghesh in the singular with suffixes. (4) Three feminine nouns ending in וֹת, מַלְכוּת from מַלְכֵּךְ, יַלְדוּת from יֶלֶד, עֲבָדָת (only occurring with suffixes) from עֶבֶד, but not מִרְדוּת. Also a few other nouns of different forms, viz.: רַחֲמִים, but רַחֲמֵי, אַבְדָן, בַּרְבֹּרִים, שַׁרְבִּיט, עַרְבָּה, עֲרָבִים, שַׁרְבִּיט, עַרְבָּה, עֲרָבִים. (5) After prefixes, as He interrogative, e. g. חֲיַדַּעְתֶּם Gen. 29: 5 from יָדַע, and inseparable prepositions, e. g. לְדַבֵּר from דִּבֵּר, בְּדַעַת from דַּעַת, כְּדַבֵּר from דִּבֵּר. Usage is not uniform in the case of Kal infinitives following inseparable prepositions, e. g. לְכָתוֹב, בְּכָתְבוֹ; בְּנָפְלוֹ, כְּנָפְלוֹ; לְצָבְאוֹ Isa. 31: 4, לִצְבֹּא Num. 4: 23, 8: 24; כְּזָכְרִי, לְפָדוֹת. (6) The suffixes of the second person ךָ, כֶם, כֶן never receive Daghesh-lene, בְּנֵךָ, בְּחֻקֵּכֶם, except once after Nun Epenthetic, § 101, 2 (5), אֶתְהֶלְנָךְ Jer. 22: 24.

These rules are sometimes of importance in etymology; thus, עָזְבוֹנֵךְ Ezek. 27: 12 must have as its ground form עָזָבוֹן, not עָזוּבוֹן; and אֶרְבָּם Hos. 7: 6, רָחֲבָם Ps. 90: 10 cannot be infinitives with suffixes, but must be from the segholates אֹרֶב, רֹחַב.

b. The omission of Daghesh-lene from the final letter of הוֹכֵחַ Prov. 30: 6, abbreviated from תּוֹסֵפְתּ or תּוֹסֵף, and from the aspirate in the proper names יָקְתְאֵל Josh. 15: 38, 2 Kin. 14: 7, and יָקְדְעָם Josh. 15: 56 is exceptional. The Daghesh occasionally occurring in initial aspirates after words ending in a vowel and having a conjunctive accent, is for the most part Daghesh-forte conjunctive, § 24, e. g. אַרְצָה כְּנַעַן Gen. 11: 31 and elsewhere, אַרְצָה גֹּשֶׁן Gen. 46: 28, גְּאָה גָּאָה Ex. 15: 1. 21, וְזוּ גְּאֻלָּתִי Ex. 15: 13, וְעַבַּדְתָּ פֶּסַח Deut. 16: 1 (comp. עַבַּדְתָּ בְּנִי Gen. 20: 9), וְאַבַּדְתֶּם מָהֵר Deut. 31: 28 (comp. וְאַבַּדְתָּ כִּי Isa. 8: 2), בָּלַקְתָּ פְּרִיץ Gen. 35: 29, נָשְׁקָה בּוֹ Isa. 40: 7, also Ex. 15: 11. 16, Isa. 54: 12, Jer. 20: 9. But Daghesh-lene may be inserted in the first of two similar aspirates, if it have no vowel, for greater distinctness of pronunciation; viz. in בְּ followed by ב Gen. 39: 12, Jer. 3: 25 or by פ Ex. 14: 4. 17, Lev. 25: 53, or by מ (in Baer's text) Gen. 32: 11, 40: 7; in כְּ followed by כ Josh. 8: 24, 10: 20, Isa. 10: 9; also in biblical Aramæic in ד followed by ת Dan. 3: 3 (in some copies) and in כ followed by ת Dan. 3: 3. The old strife as to the Daghesh in the word שְׁתַּיִם *two* is not yet settled. Kimchi explained it as Daghesh-lene upon the supposition that the word was abridged from אַשְׁתַּיִם; Schultens as Daghesh-forte arising from an assimilated נ, contending that it was for שִׁנְתַּיִם from שְׁנָתַיִם; Nordheimer as an anomalous Daghesh-lene, introduced as a euphonic expedient to prevent the combination of an aspirated ת with a sibilant, such as is obviated in the Hithpael of verbs by a transposition that would here be inadmissible. The puzzle is still further perplexed by the circumstance that it once appears with the preposition בְּ without the Daghesh, בִּשְׁתַּיִם Judg. 16: 28, and again with the same preposition with it, בְּשִׁתַּיִם Jon. 4: 11, the Methegh showing the Sh'va to be vocal, as might also be inferred from the fact that Daghesh-forte has been omitted.

Daghesh-Forte.

§ 23. 1. When the same consonant was repeated with a vowel or even the slightest hiatus intervening, so that successive movements of the organs of speech were required in the pronunciation, the Hebrews invariably wrote the letter twice. When, however, there was no interval between the reduplicated consonants, and the only audible result was a more protracted or vehement utterance of the same sound effected by a single effort of the organs, the letter was written but once. This fact the Massoretic punctuators have indicated by placing a point called Daghesh-forte (דָּגֵשׁ חָזָק) in the bosom of a letter so affected, to show that it is to be doubled in the pronunciation; thus, וַיְמַלֵּל *vayyimmāl.* Daghesh-forte may be found in any letter with the exception of the gutturals א ה ח ע, which on account of their weakness do not admit of reduplication. The letter ר, partaking of this with other peculiarities of the gutturals, receives it only in a very few exceptional cases, e. g. שֵׁרְאֶשֶׁת Cant. 5: 2, בֵּרַח Prov. 14: 10.

a. For other examples of Resh with Daghesh-forte see Prov. 11: 21, 15: 1, Jer. 39: 12, Ezek. 16: 4, also § 24. *b.*

2. The aspirates, when doubled, always at the same time lose their aspiration; thus, יִפֻּקֵד *yippākēdh.* Daghesh-forte in these letters is readily distinguishable from Daghesh-lene by the consideration that a consonant cannot be pronounced double except after a vowel. A point in one of the aspirates is, therefore, Daghesh-forte if a vowel precedes, otherwise it is Daghesh-lene.

3. Daghesh-forte in ו may be distinguished from Shurek in the same way. Inasmuch as two vowels cannot come together in the same word, if a vowel precedes it is Daghesh-forte, if not it is Shurek.

a. Some Grammarians speak of Daghesh-forte *implicitum* in the gutturals, by which they mean that these letters appear in certain cases to complete a foregoing syllable as well as to begin that in which they properly stand, in spite of the omission of Daghesh, which analogy would require them to receive.

b. The Arabs have a sign of reduplication, Teshdid (ـّـ), which is written above the doubled letter. The Syrians have no written sign for this purpose, and it is disputed whether their letters were ever doubled in pronunciation. According to Asseman Biblioth. Orient. III. 2. p. 379, the Western differed from the Eastern Syrians in this respect, "Occidentales nullibi literas geminant."

§ 24. Different epithets have been applied to Daghesh-forte to describe its various uses or the occasions of its employment. 1. When separate letters, whether originally alike, or made so by assimilation, are by the inflection or formation of words brought into juxtaposition, the Daghesh-forte which represents such a doubling is called compensative; e. g. בָּרַ֫תִּי, formed by appending the syllable תִּי to the root בָּרַת; נָתַ֫תִּי composed of the same syllable and the root נָתַן, whose last letter is changed to ת to conform with that which follows; סַבֵּ֫נִי from סָבַב. 2. When the reduplication is indicative of a particular grammatical form the Daghesh-forte is called characteristic, e. g. in the Piel, Pual, and Hithpael of verbs; as, חִזַּק, הִתְחַזֵּק, and certain forms of nouns, as, גִּבּוֹר. 3. When it has arisen from the necessity of converting a previous simple syllable into a mixed one in order to preserve the quantity of a short vowel which it contains, it is Daghesh-forte conservative; e. g. יַסֵּב for יַסֵּב. 4. When the initial letter of a word is doubled under the influence of the final vowel of the word preceding, it is Daghesh-forte conjunctive; e. g. מַה־דְּבָרְךָ, וַיְהִי־דָבָר, קוּמוּ צְאוּ. 5. When the last letter of an intermediate syllable is doubled in order to make the following hiatus or vocal Sh'va more distinct, it is Daghesh-forte dirimens or separative, because the letter which receives it is thus separated in part from the syllable to which it belongs; e. g. עִנְּבֵי *inn'bhē* for

עִנְבֵי *in'bhē*. 6. When the first letter of a final syllable is doubled under the influence of a previous vowel bearing the accent (mostly a pause accent, § 36. 2. *a*.), for the sake of increased fullness and force of pronunciation, it is Daghesh-forte emphatic; e. g. הֲלֵלוֹ for הֲלָלוֹ. 7. A letter following a guttural with silent Sh'va in some manuscripts and in the edition of Baer and Delitzsch regularly doubled by what is called Daghesh-forte orthophonic to show that there is no hiatus after the guttural; e. g. רַעֲמָה *rammā*, not *raʿmā* Gen. 10: 7, יַעְזֵר *yazzēr* Isa. 16: 9. In the first three uses named above Daghesh-forte is said to be essential, in the last four it is euphonic (לְחָבְּאֵת הַקְּרִיאָה).

a. Daghesh-forte conjunctive occurs regularly after the pronouns זֶה and זֹה followed by Makkeph, e. g. זֶה־לִּי וְזֶה־נָּעִים Ps. 133: 1, וְזֹה־יִהְיֶה Num. 34: 6. 7. 9; also in the initial letter of monosyllables and of words accented on the first syllable after a final Kamets or Seghol in words followed by Makkeph לָקָחָה־אֹתִי Gen. 2: 23, וּמָצָאוּ־בַסְּתֵם Gen. 43: 15, or having a conjunctive accent on the penult, עֲשָׂרֶת זֹאת Gen. 3: 14, אֲנָה בָּזֶה Gen. 33: 5, provided this was originally the accented syllable, or, if the accent has been shifted from the ultimate, was the place of the secondary accent Methegh בָּזְעוֹת (for בָּזֹעַת) Ps. 84: 4, but מָצָא חֵן Deut. 24: 1, עֲדֵי בֹּשֶׁת Ezek. 17: 8; this proviso does not attach to the futures and participles of לה verbs עֹשֶׂה פְּרִי Gen. 1: 11, יֹלְדָה כֵּן Ex. 21: 31. Final Kamets before Makkeph is not followed by Daghesh-forte unless the syllable containing the Kamets begins with two consonants וַתִּשְׁכַּב־נָא Gen. 27: 26 or is immediately preceded by Methegh וַתְּהִי־לִי Gen. 30: 1, but וְעֵינָיִךְ תְּצֻרֵךְ Ps. 45: 5. Words having the secondary accent Methegh on the first syllable likewise admit Daghesh after a final unaccented Kamets or Seghol, unless they begin with an aspirate עָשָׂה קֶבֶר Gen. 49: 31, but אֵלֶּה תּוֹלְדוֹת Gen. 2: 4. The inseparable particles בְּ, כְּ, לְ, מִ, when prefixed without a vowel, do not admit Daghesh-forte conjunctive, except לָּךְ which follows the ordinary rule וְעָשִׂיתָ לָּךְ Deut. 10: 1, and one additional instance יַלְּדָה לָּיְלָה Ps. 19: 3. Sibilants and liquids may be doubled after an unaccented final *ā* קוּמוּ צְאוּ Gen. 19: 14, יֹאכְלוּ נֹא Gen. 19: 2, 1 Sam. 8: 19. Daghesh-forte conjunctive is rarely found after an accented vowel, yet הִנֵּה נָא Gen. 19: 2, מִשֶּׁה אֲשֶׁר Ex. 6: 10, 29, 13: 1, 14: 1, Num. 31: 25. It also occurs in a few exceptional cases not embraced in the rules above given. See the preface to Baer's edition of Proverbs. In a few instances words thus united are written as one, e. g. מִזֶּה Ex. 4: 2 for מִן זֶה, so מִכֻּלָּם Isa. 3: 15, מִהֲלָאָה Mal. 1: 13, בְּמַאֲמָאָה Isa. 27: 8.

b. Daghesh-forte separative occurs only in the following examples:

אֶבְרֶה Hos. 3: 2.
בְּקִרְבֶּךָ Ps. 45: 10.
הַגְּבָלִים Am. 5: 25.
הַכִּצַּעֲקָתָהּ Gen. 18: 21.
הַכְּתֹנֶת Gen. 37: 32.
הַכְּנַעַן Gen. 17: 17.
הֲרֹאֵיכֶם 1 Sam. 10: 24, 17: 25. 2 Kin. 6: 32.
הַשְּׁרוּיָם Job 17: 2.
הַצְּפִינוֹ Ex. 2: 3.
הַרְרֶפָּהוּ (?) Judg. 20: 43.
הַתְּרוּמָה 1 Sam. 1: 6.
הַגָּדֵר Isa. 57: 6.
יְקַוַּת Gen. 49: 10.
לְיִקְּחַת Prov. 30: 17.
נְקֻבָּה 1 Sam. 28: 10.
נִפְתּוֹתֵרָנָה (?) Ezek. 13: 20.
פַּנְלוֹךָ Isa. 33: 1.
מַמְגֵרוֹת Joel 1: 17.
מַמְרִים Job 9: 18.
מְנַוְּדֵךְ Nah. 3: 17.
מְקַדֵּשׁ Ex. 15: 17.
מְקַדֵּשׁ Deut. 23: 11.
נְצָלָה Ps. 141: 3.
נְצָרָה Prov. 4: 13.
נַקְּנוּהוּ Judg. 20: 32.
סָבְבוּ Jer. 4: 7.
סָבָּלוֹ Isa. 9: 3, 10: 27, 14: 25.
עֶבְרִי Deut. 32: 32.
עַתְּתִי 2 Sam. 23: 27. Jer. 29: 27.
עַצַּבֵּיכֶם Isa. 58: 3.
עַצַּרְתִּיכֶם Am. 5: 21.
עִקְּבֵי Gen. 49: 17. Judg. 5: 22.
עִקְּבוֹת Ps. 89: 52.
עִקְּבוֹתֶיךָ Ps. 77: 20.
עֶשְׂבוֹת Prov. 27: 25.
צִמְּתֻנִי Ps. 119: 139.
צַמְּתֻנִי Ps. 88: 17.
קַשְׁתוֹתָם (?) Ps. 37: 15. Isa. 5: 28.
שַׁבְּלוּל Ps. 58: 9.

This list is corrected and enlarged from Gesen. Lehrg. pp. 86 ff. Those words which are followed by a note of interrogation (?) are found in some editions but not in others. Daghesh separative may be found after He interrogative in some instances not included in the above list.

c. Daghesh-forte emphatic occurs only in חָלְּפוּ Judg. 5: 7. 1 Sam. 2: 5; לָמּוּ Job 22: 12 (Edit. Baer); וַיַּחְפּוּ Job 29: 21; נַחְתּוּ or נַחֲתוּ Job 21: 13; נְצַתּוּ Isa. 33: 12, Jer. 51: 58; מִלְּמָה Ezek. 21: 15, 16; נָקְבוּ Ezek. 6: 9; נָשְׁמָה Isa. 41: 17; נָתְנוּ Ezek. 27: 19; קָמְצוּ (?) Isa. 19: 6; and probably תְּהַחְלְפוּ Job 13: 9 (not in pause).

d. Daghesh-forte orthophonic also occurs according to the Massora in the initial letter of a word, when the preceding word ends in the same letter; accordingly the edition of Baer and Delitzsch has אֵם־מְחוֹתֵם Gen. 14: 23, לְאֶבֶן־בֹּחַן Gen. 31: 54, and some manuscripts have חֲמֵשׁ שָׁנִים Gen. 5: 6. Occasional instances also occur of the doubling of an initial liquid after another final liquid, e. g. וַיֹּאמֶר ׀ כֹּא (suggesting the pronunciation *vayyōmel-lō*) 1 Kin. 11: 22 and in certain manuscripts לְאַשֶּׁר כֹּא Gen. 3: 17, כָּל־מַלְאָכָה Ex. 20: 10, and even (in manuscripts) of an initial sibilant after a final ת, e. g. אֶת־שָׁם probably *esh-sh'mām* Gen. 5: 2, מִבְּנוֹת שָׁאנוּ Gen. 4: 4, שִׁבְעַת־רְּעָת Lev. 15: 32. See Gesenius' Lehrgebäude pp. 90. 91.

§ 25. In order to the distinct utterance of a reduplicated consonant, it must be followed as well as preceded by a vowel-sound. Daghesh-forte is consequently never written in a final vowelless letter, with the exception of the two words אַתְּ, נַחַתְּ, both of which end in aspirates whose pronunciation would be changed by the removal of the Daghesh. In every other instance the doubling is

neglected, even though the letter be an aspirate, which will for this reason resume its aspiration; e. g. קַל, קַלּוּ; סֹב, סֹבִּי; וַיַּחַת abridged from וַיַּחֲתֵּם; וַיִּצַּת from וַיִּצַּתְּהוּ. In a medial letter with Sh'va Daghesh may be written, because the Sh'va being thus rendered vocal the reduplication can be made audible by means of the hiatus which it represents; it is, however, quite as frequently omitted, the Sh'va commonly remaining vocal as if it were inserted, and compound Sh'va being occasionally substituted for simple to indicate this fact, § 16. 3. *b.*; e. g. עִוְרִים for עִוֲּרִים, כְּסָאוֹ for כִּסְּאוֹ, יִקְחוּ for יִקֲּחוּ, וַתְּאַלֶּצֵהוּ Judg. 16: 16, particularly after prefixes, as Vav Conversive, the article and preposition בְּ, so וַיְהִי, הֲבִיבַקֵּשׁ, בְּעִבְרָתָם. It is seldom omitted from a medial aspirate on account of the change in its sound involved: yet even this is done occasionally, e. g. בִּיבָצִר Judg. 8: 2 for בְּבָצִר, תִּתְצוּ Isa. 22: 10 for תִּתֲּצוּ, זְבֻלוֹן from זְבֻלוֹן. In a few rare instances it is dropped from a letter followed by a vowel, when the laws of syllables will permit and the pronunciation will not be materially affected; e. g. תַּעְגֻּבָה Ruth 1: 13 for תִּתְעַגֻּבָה, so תַּאֲבֻנָה Isa. 60: 4.

Mappik.

§ 26. Mappīk (מַפִּיק *bringing out* or *uttering*), is a point in one of the letters א ה ו י, showing that it represents a consonant and not a vowel, or in other words that it does not quiesce in the preceding vowel-sign. It is unnecessary, however, to employ any notation for this purpose in the case of א ו and י, for their quiescence can be readily determined in all cases by the rules already given, § 13. Although it is much more extensively used in manuscripts, therefore, Mappik is in modern editions of the Hebrew Bible only inserted in final ה

when it retains its consonantal power; e. g. אַרְצָהּ *artsāh*, אַרְצָה *artsā*, לָקָחָהּ *l'kāhhāh*, לָקָחָה *lāk'hhā*. The point four times found in א, וַיָּבִיאוּ Gen. 43: 26, Ezra 8: 18, תָּבִיאוּ Lev. 23: 17, רְאוּ Job 33: 21, though called a Daghesh in the Massoretic notes in the margin, is probably to be regarded as Mappik.

a. In some manuscripts and in the Hebrew Bible printed at Brescia in 1494 Mappik is placed not in the body of the letter He, but underneath it.

Raphe.

§ 27. Rāphe (רָפֶה *weak*), is a small horizontal stroke placed over a letter, and denotes the opposite of Daghesh-lene, Daghesh-forte, or Mappik, as the case may be. As no inconvenience can arise from its omission, it is only occasionally used in modern Bibles, and not with entire uniformity in the different editions. It is chiefly found where a Mappik has been omitted in ה, which according to analogy might be expected to be inserted, e. g. הִנֵּסָּהּ Ex. 9: 18, וּשְׂעָרָהּ Lev. 13: 4, בְּהֶמְאָהּ Num. 15: 28, לָהּ Num. 32: 42, מִשְׁכְּבָהּ Job 31: 22 in some copies. In תַּעֲשֶׂה־לְּךָ Ex. 20: 4, Deut. 5: 8, it is the opposite of Daghesh-forte, and shows that ל may either be doubled agreeably to the point in its bosom or not. In לֹא תִרְצַח Ex. 20: 13, Deut. 5: 17, it is the opposite of Daghesh-lene, and shows that the ת may either have its unaspirated sound, as the Daghesh indicates, or may be aspirated.

Accents.

§ 28. The third class of Massoretic additions to the text are those which relate to the words. These are the accents, Makkeph, Methegh, and the K'ri. An accent (טַעַם) is written upon every word with a twofold design, 1st, of marking its tone-syllable, and 2dly, of indicating

its relation to other words in the sentence. The great number of the accents has respect entirely to this second function, there being no difference in the quality of the stress laid upon particular syllables, such for example as is marked by the Greek acute, grave, and circumflex, but only that difference in its amount which arises from the unequal emphasis naturally laid upon the different members of a clause or period. The punctuators have attempted not only to indicate the pauses to be made in reading, as is done by the stops in use in other languages, but to represent to the eye the precise position held by each word in the structure of the sentence, and the various grades of attraction or repulsion arising from the relations whether co-ordinate or subordinate which subsist among them. Every sentence is fancifully regarded as a territory, which, partitioned into its several clauses, forms empires, kingdoms, and principalities, ruled by their respective sovereigns, each of whom has his own train of inferiors and dependants. The accents are accordingly divided into Disjunctives or Rulers (מְלָכִים), and Conjunctives or Servants (עֲבָדִים). The former indicate that the word upon which they are placed is more or less separated from those that follow; they mark thus the end of a clause or of the section of a clause over which they exert control. The latter indicate that the word over or under which they are written is connected with what follows and belongs to the clause or section ruled by the next succeeding Disjunctive.

a. The stress of voice denoted by the accent must not be confounded with quantity. An accented syllable may nevertheless be short, the energy with which it is pronounced not necessarily affecting its length.

b. The Jews made use of the accents as musical notes in the cantillation of the synagogue, whence they are also called נְגִינוֹת. In the judgment of some this is a part, and perhaps a leading part, of their original design. Their great variety, the frequent occurrence of accents of opposite powers upon the same word, and the distinct system of poetical accents, favor

this opinion. Such as are curious to know the details may find the mode of their employment for this purpose explained at length in Bartoloccii Bibliotheca Magna Rabbinica, vol. iv. pp. 427—444.

§ 29. The Disjunctive accents may be divided into four classes of various rank or power, as follows, viz:

CLASS I. *Emperors.*

*1.	Sillūk	(ׅ)	סִלּוּק
*2.	Athnāhh	(ֽ)	אַתְנָח

CLASS II. *Kings.*

3.	S'ghōlta	(ֿ)	סְגוֹלְתָא *postp.*
4.	Zākēph Kātōn	(֔)	זָקֵף קָטֹן
5.	Zākēph Gādhōl	(֕)	זָקֵף גָּדוֹל
*6.	Tiphhhā	(֖)	טִפְחָא

CLASS III. *Dukes.*

*7.	R'bhīª	(֗)	רְבִיעַ
*8.	Shalsheleth	(֓)	שַׁלְשֶׁלֶת
*9.	Zarkā	(֒)	זַרְקָא *postp.*
10.	Pashtā	(֙)	פַּשְׁטָא *postp.*
11.	Y'thībh	(֚)	יְתִיב *prep.*
12.	T'bhīr	(֛)	תְּבִיר

CLASS IV. *Counts.*

*13.	Pāzēr	(֡)	פָּזֵר
14.	Karnē Phārā	(֠)	קַרְנֵי פָרָה
15.	T'līshā Gh'dhōlā	(֟)	תְּלִישָׁא גְדוֹלָה *prep.*
16.	Geresh	(֜)	גֵּרֵשׁ
17.	G'rāshayim	(֝)	גְּרַשַׁיִם
*18.	P'sīk	(׀)	פְּסִיק

The Conjunctive accents, or *Servants,* are the following, viz:

*19.	Merkā	(֥)	מֵרְכָא
*20.	Mūnāhh	(֣)	מוּנַח

21. Merkā Kh'phūlā	(ֽ)	מֵרְכָא כְפוּלָה
*22. Mahpakh	(ֿ)	מַהְפַּךְ
23. Dargā	(ֽ)	דַּרְגָּא
*24. Kadhmā	(ֽ)	קַדְמָא
*25. Yerahh ben Yōmō	(ֽ)	יֶרַח בֶּן־יוֹמוֹ
26. T'līshā K'tannā	(ֽ)	תְּלִישָׁא קְטַנָּה *postp.*

a. Merka Kh'phula has sometimes been reckoned among the Disjunctives, as by Gesenius in his Lehrgebäude; but the absence of Daghesh-lene in the word following that on which it stands in Ex. 5: 15, Ezek. 14: 4, proves that it is a Conjunctive.

b. According to their most probable significations, the names of the accents appear to be in part borrowed from their forms and in part from their uses. Thus the Disjunctives: Silluk, *end;* Athnahh, *rest;* Segholta *bunch of grapes;* Zakeph, small and great, *causing suspension;* Tiphhha, *palm of the hand;* R'bhi[a], *square* or *reposing;* Shalsheleth, *chain;* Zarka, *dispersion;* Pashta, *expansion* or *letting down* (the voice); Y'thibh, *sitting still;* T'bhir, *interruption;* Pazer, *separator;* Karne Phara, *a heifer's horns;* T'lisha, great and small, *shield;* Geresh, *expulsion;* G'rashayim, *double Geresh;* P'sik, *cut off.* Conjunctives: Merka, *prolonging;* Munahh, (a trumpet) *at rest,* i. e., in its proper position; Merka Kh'phula, *double Merka;* Mahpakh, (a trumpet) *inverted;* Darga, *progress;* Kadhma, *beginning,* Yerahh ben-Yomo, *moon a day old.*

§ 30. 1. Fourteen of the accents are written over, and eleven under, the words to which they are attached. P'sik, whose only use is to modify the power of other accents, is written after the word to which it belongs, and in the same line with it. The place of the accents is either over or under the letter preceding the tone-vowel, with the exception of the prepositives Y'thibh and T'lisha Gh'dhola, which always accompany the initial letter of the word, and the postpositives S'gholta, Zarka, Pashta, and T'lisha K'tanna, which stand upon the final letter. Y'thibh is only used when the first is the tone-syllable. Pashta is repeated if the word on which it stands is accented on the penult, e. g. תֹּהוּ Gen. 1: 2, or ends with two vowelless letters, e. g. וַתֵּשֶׁבְתְּ Ruth 3: 7, or if the last letter has Pattahh furtive, e. g. יִרְעֲךָ Gen. 33: 13, and in some manuscripts and editions there is a like re-

petition of S'gholta, Zarka and T'lisha K'tanna. When this is not the case, there is nothing to mark the tone-syllable of the word unless this may chance to be the one upon which the nature of the accent in question requires it to be placed.

2. Silluk has the same form as Methegh, § 44; but the former invariably stands on the tone-syllable of the last word in the verse, while Methegh is never written under a tone-syllable. Pashta is likewise distinguished from Kadhma only by its position upon the last letter of the word, and after the superscribed vowel, if there be one, e. g. אֲשֶׁר Gen. 1: 7, בִּלְאָבֹו Gen. 24: 7, while Kadhma is placed upon the letter preceding the tone-vowel, e. g. אֲשֶׁר Gen. 2: 19, where this chances to be a final letter the laws of consecution only can decide; thus, in זַרְעֲךָ Gen. 26: 4, בֵּאתְךָ Deut. 16: 3, the accent is Pashta, but in וּלְזַרְעֲךָ Gen. 17: 8, בֵּאתְךָ 1 Sam. 29: 6, it is Kadhma. Y'thibh is distinguished from Mahpakh by being written under the first letter of the word and taking precedence of its vowel if this be subscribed, e. g. עֵשֶׂב Gen. 1: 11, בִּי Gen. 31: 6, Deut. 10: 17; Mahpakh belongs under the consonant which precedes the tone-vowel, and after its vowel-sign if this be subscribed, e. g. הַגָּדֹל Gen. 2: 14, פִּי Gen. 32: 33, Deut, 4: 7. When the initial syllable bears the tone and there is no subscribed vowel, the laws of consecution must decide; thus, in הִוא the accent is Y'thibh in Gen. 3: 15, 44: 17; Deut. 10: 17; but Mahpakh in Josh. 17: 1.

§ 31. The accents already explained are called the prosaic accents, and are found in all the books of the Old Testament with the exception of the Psalms (תְּהִלִּים), Proverbs (מִשְׁלֵי), and the poetic portion of Job (אִיּוֹב), whose initials form the technical word אֱמֶ"ת. Here a different system of accentuation prevails. Thirteen of

the prosaic accents, one-half of the whole number, nowhere occur in the books just named, viz.: S'gholta, Zakeph-Katon, and Zakeph-Gadhol of the Kings, Pashta, Y'thibh, and T'bhir of the Dukes, Karne Phara, T'lisha Gh'dhola, Geresh, and G'rashayim, of the Counts, Merka Kh'phula, Darga, and T'lisha K'tanna of the Conjunctives. Such as are common to both systems are in the previous table distinguished by an asterisk. The powers of some of these, however, are altered, so that a new arrangement of them is necessary; and they are supplemented by additional signs formed by combining the prosaic accents or assigning them unusual positions. The scale of the poetical or metrical accents thus constituted is as follows, viz.:

Disjunctive Accents.

Class I.

1.	Sillūk	(◌ֽ)	סִלּוּק
2.	Merkā-Mahpakh or Ōlev'yōrēdh	(◌֖)	מֵרְכָא מַהְפַּךְ עוֹלֶה וְיוֹרֵד
3.	Athnāhh	(◌֑)	אַתְנָח

Class II.

4.	R'bhī[a]	(◌֒)	רְבִיעַ
5.	R'bhī[a] Mugrāsh	(◌֓)	רְבִיעַ מְגֻרָּשׁ
6.	Zarka or Tsinnōr	(◌֮)	צִנּוֹר *postp.*
7.	Tiphhhā initial or D'hhī	(◌֣)	דְּחִי *prep.*
8.	Pāzēr	(◌֡)	פָּזֵר
9.	Great Shalsheleth	(◌֔)	שַׁלְשֶׁלֶת גְּדוֹלָה
10.	Azlā L'gharmēh	(◌֕)	אַזְלָא לְגַרְמֵה
11.	Mahpakh L'gharmēh	(◌֥)	מַהְפַּךְ לְגַרְמֵה
12.	P'sīk	(◌׀)	פְּסִיק

CONJUNCTIVE ACCENTS.

13. Merkā	(֫)	מֶרְכָּא
14. Mūnāhh	(֣)	מוּנָח
15. Mūnāhh superior or Illūy	(׳)	עִלּוּי
16. Tiphhhā or Tarhhā	(֖)	טִרְחָא
17. Yerahh ben Yōmō or Galgal	(֥)	גַּלְגַּל
18. Mahpakh	(֤)	מַהְפַּךְ
19. Kadhmā or Azlā	(֒)	אַזְלָא
20. Shalsheleth	(֓)	שַׁלְשֶׁלֶת

Tsinnōrīth (֑) is not a distinct accent, but is written over a simple syllable preceding Merka or Mahpakh in the same word, מֶלֶךְ֫, בְּשִׂמְחָ֤ה, or in an antecedent monosyllable, in which case it supplies the place of Makkeph פִּי־חֶרֶב, לֹא־אֵל for לֹא אֵל, כִּי־חָרְבָה, כִּי־אֵל. The disjunctive Tsinnor has the same form but is written over the last letter of the word on which it stands, רַבִּים֙.

a. Olev'yoredh has a compound sign, resembling in form a combination of Merka and Mahpakh, the former written under the tone syllable, the latter over the syllable next preceding, רְדָפִ֥ים; or (if the tone be on the initial syllable) over the last syllable or letter of the preceding word, פָּעֳלֵי־אָ֥וֶן (Wickes) or פָּעֳלֵ֥י אָוֶן (Baer); or (if this word be accented on the ultimate) over the first letter of the word to which it properly belongs or between the two words, שָׁ֥וְא נָבִֽיא (Wickes) or שָׁ֥וְא נָבִֽיא (Baer). When the sign for Olev'yoredh is divided between two words, which should be united by Makkeph, Makkeph is not written אֶל֥ חָק or אֶל֥ חָק for אֶל־חָק. The sign for R'bhī^a Mugrāsh resembles a combination of R'bhī^a and Geresh, the former on the tone syllable, the latter on the initial letter of the word, לְאַזְמָלֵ֫ת, כְּל׳. P'sīk is occasionally used as with the prose accents, § 38. 1. *a*, to indicate a slight pause without affecting the consecution; but it may likewise, when combined with three of the Conjunctives Shalsheleth, Kadhma or Azla, and Mahpakh, convert them into weak Disjunctives, capable of governing small sections of their own.

b. The names of the accents occurring in prose are explained § 29. *b.* Olev'yoredh means *ascending and descending;* R'bhī^a Mugrāsh, *Gereshed-R'bhī^a;* Tsinnor and Tsinnorith, *a water-course;* D'hhi, *thrust back;* L'gharmeh, *by itself*, i. e. *independent;* Illuy, *high;* Tarhha, *toiling along;* Galgal, *wheel;* Azla, *going on.* Tiphhha and Shalsheleth, though Disjunctives in prose, are Conjunctives in poetry, hence the absence of Daghesh-lene after the former in בְּרֹ֣אשׁ פְּתָחִ֑ים Prov. 8: 3, and the presence of Daghesh-forte Conjunctive after the latter in יְשִׁיעָ֣תְךָ֣ לֹּ֑ו Ps. 3: 3.

Position of the Accent.

§ 32. The accent in Hebrew may fall either upon the ultimate or the penultimate syllable, but never at a greater remove from the end of the word. In the former case words are technically termed Milra (מִלְרַע *from below*), and in the latter Milēl (מִלְּעֵיל *from above*).

1. The position of the accent may be considered in relation either to the syllabic or to the etymological structure of a word, that is to say, as effected by the nature of its syllables on the one hand or of the elements of which it is composed as a significant part of speech on the other. It is so far determined by the syllabic structure of words, that a long mixed syllable or a short simple syllable, whether in the ultimate or the penultimate, must receive the accent, § 18. 2, thus: וַתַּעֲבֹרְנָה, יִצְחָק, יֹרֵב, טָהֹרָה. But the accent can never fall upon a vocal Sh'va, or upon a vowel which has arisen from Sh'va.

2. Considered in reference to their etymological structure, words exist in two conditions, (1.) their primary uninflected state, by which their essential and proper meaning is conveyed; (2.) with added affixes and prefixes, by which that meaning is variously modified. In their nude or primary state all words, whether primitives or derivatives, are accented upon the ultimate, and so continue to whatever flexion, involving no terminational appendages, they may be subjected. Thus, פֶּקֶד, פֶּקֶד, וְזָרוֹן, וְזָרוֹן; וְהִתְפַּקֵּד, וְפָקֹד, פֶּקֶד, פֶּקֶד, וּבְדַבֵּר, וּבְדַבֵּר; וְאַרְגָּמָן; וְיוֹמָם; כְּנַעֲנִי.

3. The only exception is a class of words called Segholates, in which the last vowel does not belong originally or essentially to the form, but is introduced for the sake of softening the pronunciation, § 61. 2; these

are accented on the penultimate, as בֶּלֶךְ, סֵפֶר, נָבִיא, בַּיִת, יִשְׁתַּחֲוֶה, תִּזְהָב, בָּחוּר, נֵגֶל, נֵגֶל, יִשְׁתַּחֲוֶה.

a. נַעֲבָדָה Is. 50: 8 is said to be the only instance of a word accented on the antepenult. The proper tone-syllable of this word is the ultimate, but upon the recession of the accent by § 35, the vowel next preceding, which has arisen from Sh'va and is unessential to the form, cannot receive it, so that it necessarily falls upon the one still further back. In נֶעֱרְמוּ Ex. 15: 8, a word of the same formation the accent takes the place of Methegh, § 45: 5, comp. תֵּעָרְכוּ Isa. 40: 18, וְיַהֲפְכוּ Job 12: 15; חָאֳחָלָה and צֹעָרָה are the only words in which the principal accent is followed by a compound Sh'va.

§ 33. The additions which words may receive at the beginning or end affect the accent in proportion to the respective weight accorded to them. Additions to the end of words are of two sorts, which may be distinguished as affixes and suffixes. Affixes are so welded to the word or merged in it that in the popular consciousness they have become an integral part of it, and their independent existence or separate origin is no longer thought of; such are the personal inflections of verbs and the terminations indicating gender and number in nouns and adjectives. Suffixes are not so intimately blended with the word to which they are attached as to have lost their individual identity and independent character, and consequently are of greater weight as respects the accent; such are the fragmentary pronouns appended to verbs, nouns, and prepositions.

1. If the appendage consists of a vowel (as ־ָה, ־ֹה, ־וּ, ־ִי, ־ֵי, ־ֶי, ־ָי, ־ֵה, ־ֶה, ־ָה, ־וֹת, ־ִים, ־ֵיו, ־ֶיךָ, ־ֶיהָ, ־ָם, ־ָן, ־ֵיהֶם, ־ֵיכֶם), or begins with one (as ־ָהּ, ־ֶיךָ, ־ֶיהָ, ־ֵיהֶם, ־ֵיכֶם), and can consequently only be pronounced by the aid of the final consonant of the word to which it is attached, it will attract the accent to itself or to its initial vowel from a noun, adjective, participle, or preposition, as דָּבְרִי, דָּבְרוֹ, דָּבְרֵךְ, דָּבְרֵי, דָּבְרִים, דָּבְרָיו from דָּבָר; קָדְשִׁי, קָדְשֵׁי from קֹדֶשׁ. Such an appendage to a verb, if a suffix, will receive the accent, unless the verb be in the 3 fem. sing. of the preterite, when the accent will retain

its original position unchanged. The accent will also remain in its original position on the verb, if the appendage be an affix, unless it is either dissyllabic or causes the rejection of the vowel previously accented; חֲתֻנִּים with a suffix חֲתֻנִּיכֶם, but with an affix חֲתֻנִּיהוּ; עָבַד with a suffix עֲבָדוֹ, but with an affix when the vowel is retained עָבְדוּ, when it is rejected עָבְדוּ; חָסָה, חָסְתָה, חָסוּ; קַל; קָלוּ with affixes קַלָּה, קַלִּי, קַלָּתִי; 3 fem. sing. pret. with suffixes, אֲבָלָתָם from אֲבָלָה (primitive form אֲבָלַת), so בְּקָשָׁתָם, אֲהָבָתָהּ. It is to be observed, however, that a paragogic הָ or ה, § 61. 6, attached to nouns, pronouns, and adverbs, and occasionally a paragogic י does not disturb the position of the accent, e. g. אֶרֶץ, אַרְצָה; גֵּב, גֵּבָה; so רַבָּתִי Lam. 1: 1, but בְּלֻאָתִי Isa. 1: 21; neither does the feminine ending תָ, which is a Segholate formation, § 185, e. g. יְדַבֶּרְתָּ, יְדַבָּרְתָּ.

a. The affix receives the accent in תַּעֲבִירִי Ruth 2: 8 from תַּעֲבֹר, but not in the corresponding form יַשְׁפִּיטוּ Ex. 18: 26 from יִשְׁפֹּט; though in the latter instance a monosyllable follows, in consequence of which the accent would have been shifted to the penult by § 35. 1, even though its proper place had been on the ultimate. Paragogic הָ receives the accent, though the preceding vowel remains, in the verbal form וָאֶתְרָאֶה 1 Sam. 28: 5.

2. The appending of a simple syllable, such as the suffixes כִי, נוּ, הוּ, הָ, וּ, or the verbal suffixes תָ, תִי, נוּ, נָה, will not alter the position of the accent provided it originally stood upon the ultimate; if, however, its original place was the penult, or if the syllable in question be attached to the word by a union vowel, the accent must be carried forward one syllable to prevent its standing on the antepenult, which is never admissible: בָּסָה, בְּסָהוּ, בָּסְתָה, בָּסוּ; בָּסִיתִי; בָּאתָ, בָּאתָה, בָּאתָהּ; בָּאתֶם, בָּאתֶן; קַל, קַלּוֹתָ, קַלּוֹתִי. Suffixes appended to a word ending with a consonant mostly require a connecting vowel, and consequently shift the position of the accent. Affixes, by reason of the less weight accorded to them, commonly do not. The suffix

דָּ follows the general rule when preceded by a union vowel, but draws the accent upon itself when it is not, e. g. יָד, יָדָהּ, יָדֵהוּ, אָבִיד. A consonantal appendage to a long unaccented vowel, inasmuch as it converts the ultimate into a mixed syllable, necessarily draws the accent upon it from the penult, § 32. 1, e. g. בָּאַסְתִּי, בָּאַסְתָּ֫ו, בָּאַסְתִּים; יָבוֹתִי, יָבוֹתִין.

3. A mixed syllable, whether an affix as תֶּם, תֶּן, or suffix as כֶּם, כֶּן, הֶם, הֶן, will attract the accent to itself, הֲלַכְתֶּם from הָלַךְ; בִּלְבַבְכֶם, בַּיִלְבֶכֶם from בֶּ֫לֶב; הֲרִמֹּתֶם from הֵרִים. In the unusual form פָּלֲּהֶם 2 Sam. 23: 6, the accent stands upon the union vowel.

4. The only prefixes which exercise any influence upon the position of the accent, are the Vav conversive of the future, which draws back the accent from a mixed ultimate to a simple penult, יֹאמֶר, וַיֹּאמֶר, יָשֹׁב, וַיָּשָׁב; and the Vav conversive of the preterite, which throws it forward from the penult to a simple ultimate, אָמַרְתָּ, וָאֹמַרְתָּ, יָשַׁבְתָּ, וַיָּשַׁבְתָּ, וַהֲשִׁיבוֹתִי, וַיָּשֶׁב.

a. Some languages invariably accent the same part of the word; thus, Bohemian and Lettish the initial syllable, Polish and Lazian, one of the Caucasian tongues, the penult of all polysyllables. Others, in which more freedom is allowed, have no respect to the etymological structure of words, but are guided entirely by the character of their syllables. Thus, in Arabic and Latin words are accented according to the quantity of the penult; the accent is given to the penult if it is long, to the antepenult if the penult is short. In others still the etymological principle is the prevailing one, and this often has a wider scope than in Hebrew. Thus, in Greek the accent has the range of the last three syllables. In Sanscrit it may stand upon any syllable whatever even of the longest words. In English it is almost equally free, e. g. *péremptorily, inconsidérátion*, its removal from its primary position upon the radical portion of the word being conditioned by the respective weight of the formative syllables appended, e. g. *pérson, pérsonate, pérsonally, persónify, personálity, personificátion.*

§ 34. The location of the accent being thus influenced by the etymological structure of words, it may serve to distinguish words of like appearance but different formation. Thus, יָתֹד Gen. 30: 1, בָּאָה Gen. 29: 6, are parti-

ciples, but בֹּאָה Gen. 35: 18, בָּאָה Gen. 29: 9, are preterites, the feminine affix receiving the accent in one case but not in the other, § 33. 1. So בָּנוּ *they built*, from בָּנָה, but בָּנוּ *in us*; שָׁבוּ *they carried captive* from שָׁבָה, but שָׁבוּ *they returned* from שׁוּב; אָחַז *he has seized*, but אֶחֱזֶה Job 23: 9 *I shall see* from חָזָה; יֵרַע *it shall be evil* from רָעַע, יִרְעֶה *he shall feed* from רָעָה; מָרָה *he was rebellious*, מָרָה *it was bitter* from מָרַר; קוּמִי *arise thou* (fem.), קוֹמִי *my rising up*.

§ 35. The position of the accent may be shifted from the following causes, viz:

1. A Conjunctive is frequently removed from the ultimate to a simple penult if a Disjunctive immediately follows, whether upon a monosyllable or a dissyllable accented on the penult, in order to prevent the unpleasant concurrence of two accented syllables in closely connected words, e. g. קָרָא לַיָּלָה Gen. 1: 5, בָּנָה עִיר Gen. 4: 17, אָזְלַת יָד Deut. 32: 36, וְתֹאבְדוּ דֶּרֶךְ Ps. 2: 12. In a few exceptional cases the secondary accent Methegh remains to mark the original tone-syllable, after the principal accent has been thrown back, לְבַעֲרֹ קָנֶן Num. 24: 22, גָּבַל צִיִּן Isa. 40: 7, הֲשָׁמַע עָם Deut. 4: 33.

a. But the accent will not be shifted from one of the so-called grave suffixes אֶם, חֶם, חֵם, בֶּם, בֵּן, § 33. 3, אֲבִיכֶם חַי Gen. 43: 7; nor to a penult which is a mixed syllable, וַיִּקְרָא לָהּ Num. 32: 42; nor ordinarily from a mixed ultimate having a long vowel, § 32. 1, יָרִיב לִי Judg. 6: 31, יָקוּם לִי Ps. 94: 16. A mutable Tsere or Hholem may, however, be shortened and the accent removed יָרֶב לִי (for יְרִיב) Judg. 6: 31, Isa. 36: 8. In the preterite infinitive and participles of verbs Tsere in the ultimate cannot be shortened to Seghol, but the accent may still be shifted and the secondary accent Methegh, § 44, be placed on the original tone-syllable לְבַעֲרֹ קָנֶן Num. 24: 22, גָּבַל צִיִּן Isa. 40: 7. 8, 49: 7, 66: 3, Ezek. 22: 25. Methegh will also stand on the ultimate after the removal of the accent, if the word ends with the same letter with which the next begins, in order that the stress of the voice may keep them distinct עֲלֹת חָשֶׁךְ Ps. 105: 28, הֲשָׁמַע עָם Deut. 4: 33, Num. 17: 23, or if it ends with the weak letter י preceded by Pattahh יִשְׁמַע לִי Gen. 24: 9.

2. The special emphasis given to the last word of a clause or section, and represented by what are called the pause accents, § 36, 2, *a*, is sometimes rendered more bistinct by a change of the accented syllable from the ultimate to the penult, e. g. אָנֹכִי, אָנֹכִי; אַתָּה, אַתָּה; עַתָּה, עַתָּה; בָּלוּ, בָּלוּ; or from the penult to the ultimate, particularly in the case of forms with Vav conversive of the future וַיֵּלֶךְ, וַיֵּלֶךְ; so וַיַּגְבֵּל, וַיָּקָם, וַיֹּאבֶר. The accent is in a few instances attracted to a short final syllable ending in a weak letter, e. g. יֵרֶא Gen. 41: 33 for יֵרֵא; so תֵּרֶא Zech. 9: 5, Mic. 7: 10, הָשַׁע Ps. 39: 14 for הֵשַׁע; or to a final ה֫ followed by an initial guttural, when greater energy of voice is necessary to distinctness of utterance, thus לָמָּה becames לָמָּה before א Gen. 27: 45, before ה Num. 20: 4. 5, 21: 5, before ע Judg. 12: 3, 15: 10; לִיבָּה becomes רִיבָּה before ר Ps. 74: 22; so הָבָּה Gen. 29: 21, סוּרָה Judg. 4: 18, שׁוּבָה Isa. 44: 22.

a. לָמָּה, שׁוּבָה, לִיבָּה, קוּמָה are accented on the ultimate before יהוה, which the Jews read אֲדֹנָי. In like manner תּוֹסִיפוּ becames תּוֹסִיפוּ before יְהוָֹה Isa. 47: 1, 5, to prevent the confusion of similar sounds concurring at the end of one word and the beginning of the next. In פַּדֶּנָה אֲרָם Gen. 28: 2, 5, 6, 7 the accent cannot be shifted, § 32. 1, but the secondary accent Methegh is given to the final syllable; so frequently to a final guttural preceded by Pattahh נוֹכַח אֵישׁ Hos. 4: 4, or Pattahh furtive, גְּבִיעַ הַכֶּסֶף Gen. 44: 2.

Consecution of Accents in Prose.

§ 36. 1. The second use of the accents is to point out the relation of words to one another. The Disjunctives indicate a greater or less separation between the word on which they stand and the following one; the Conjunctives indicate a connection. The greatest separation of all is effected by Silluk, which is written under the last word of every verse, and is followed invariably by two dots vertically placed (׃), called Sōph Pāsūk (סוֹף פָּסוּק *end of the verse*). The next in power are Athnahh and S'gholta. When a verse was to be divided into two

clauses, Athnahh was placed under the last word of the first clause, Silluk maintaining its position at the end of the verse. If it was to be divided into three clauses, which is the greatest number that any verse can have, the last word of the first clause receives S'gholta, the last word of the second Athnahh, and the last of all Silluk. Verses of one clause range from Gen. 26: 6, containing three words, to such as Jer. 13: 13 and 1 Chron. 28: 1, containing more than twenty: the most common division is into two clauses, e. g. Gen. 1: 1 אֱלֹהִים . . . הָאָרֶץ׃; three clauses are much less frequent, Gen. 1: 7 . . . . הָרָקִיעַ . כֵּן׃ 23: 16, 24: 30, 26: 28.

a. In Job 1: 8 (except in Baer's edition) S'gholta occurs in a verse of two clauses without Athnahh, probably because the accentuation is conformed to that of Job 2: 3.

2. Each of these clauses is capable of subdivision to whatever extent its length or character may seem to demand by the Disjunctives Zakeph Katon, Zakeph Gadhol, R'bhī[a], Pazer, and T'lisha Gh'dhola, according to the number of sections to be made and the various degrees of their completeness. Thus, in Josh. 1: 8 the clause of Athnahh is divided into five sections, יָבוֹשׁ . . . מִפִּיךָ . . . לַיְלָה . . לַעֲשׂוֹת . בְּי, in 2 Kin. 1: 6 into six, אֵלָיו . . יְהוָה . . בִּישְׂרָאֵל . שֹׁלֵחַ לִדְרֹשׁ . . . עֶקְרוֹן. The choice of the accent to govern a particular section depends not only upon its power, but likewise upon its rank, the more exalted officer standing in ordinary cases nearer the sovereign. Accordingly toward the beginning of a clause an inferior Disjunctive will be used, even though the separation is such as would require an accent of much higher power to indicate it in a more advanced portion of the same clause. These accents, moreover, have not a fixed value like the stops in other languages; their power is not absolute but relative, and

varies endlessly with the circumstances of the case. Athnahh in Gen. 1: 1 marks the greatest division in the verse, but that is not sufficient to require a comma. In the next verse Zakeph Katon is equal to a semicolon in the first clause and less than a comma in the second. In Gen. 27: 16 the separation indicated by R'bhī[a] is wholly rhythmical.

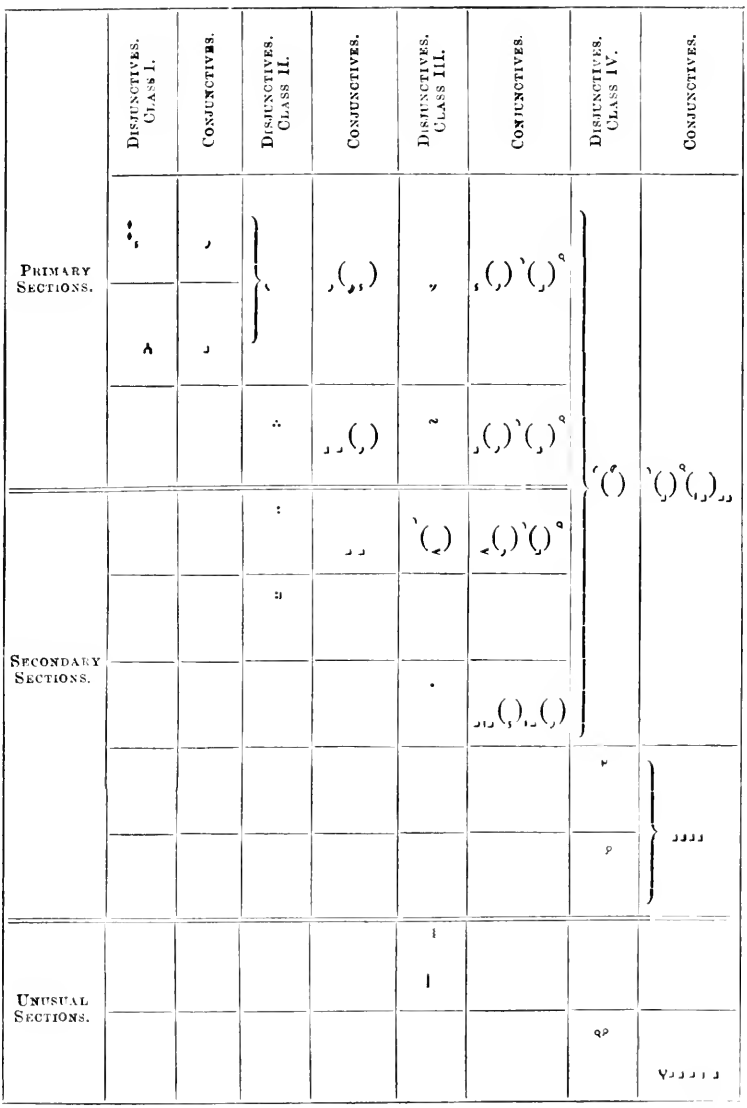
a. Those accents which, as above described, mark the limits of clauses and sections, are denominated pause accents.

§ 37. In the sections thus created the accents are disposed relatively to the Disjunctive which marks its close. Each ruler has his servant and subordinate officer, whose function it is to wait upon him. In other words, each Disjunctive is regularly preceded by a particular Conjunctive and inferior Disjunctive; and the train of accents in each section is formed by arranging the Disjunctives in their fixed order of succession with or without their regular Conjunctives until all its words are supplied. The trains proper to the different sections are shown in the following table (p. 52).

a. Accents of like forms are readily distinguishable in the table by the column in which they stand. Where perspicuity requires it the distinction will hereafter be made by appending their initial letters, thus: Kadhma ˈk Pashta ˈp, Mahpakh ˌm, Y'thibh ˌy.

§ 38. *Explanation of the Table.*—The trains preceding the three principal accents are exhibited in the horizontal lines of the uppermost division; those of the ordinary dependent sections in the middle division, and those of rare occurrence at the bottom.

1. *Train of Silluk.*—If Silluk be immediately preceded by a Conjunctive, it will be Merka; if a Disjunctive precede it in the same section, with or without an intervening Merka, it will be Tiphhha, Gen. 1: 1. If there be a Conjunctive before Tiphhha, it will be Merka, Gen. 1: 1; if two Conjunctives, which occurs but fourteen times,



they will be Merka Kh'phula and Darga, Gen. 27: 25, Lev. 10: 1, 2 Chron. 20: 30. The next Disjunctive before Tiphhha, in the same section, will be T'bhir, Gen. 1: 4. If T'bhir be preceded by one Conjunctive, it will be Darga,

Gen. 1: 12, or Merka, Gen. 1: 26; if by two, the second will be Kadhma, 1 Sam. 15: 33, or Munahh, Gen. 2: 4; and if by three, the third will be T'lisha K'tanna, Gen. 2: 19. The next Disjunctive before T'bhir, in the same section, will be Geresh, Gen. 26: 11, 27: 4, or G'rashayim, Ex. 23: 4. If Geresh be preceded by one Conjunctive, it will be Kadhma, Gen. 24: 7, or Munahh, Isa. 60: 17; if by a second, it will be T'lisha K'tanna, Gen. 2: 5, or Munahh with P'sik, Gen. 28: 9; if by a third, it will be Munahh, 1 Sam. 14: 34; if by a fourth, it will also be Munahh, Deut. 1: 19.

a. The parentheses of the table contain alternate accents. Thus, Merka is substituted for Darga and for Mahpakh (before Pashta in the clause of Zakeph Katon) if no more than one vowel intervenes between the Conjunctive and the king which it precedes, e. g. Gen. 1: 22; Gen. 1: 24, 26; Gen. 5: 17; Deut. 1: 2, 35. Munahh is also regularly substituted for Kadhma, whenever the accent stands on the initial letter of the word, Gen. 25: 8; Gen. 19: 35; 1 Kin. 19: 7; Deut. 1: 28; Gen. 19: 12; Eccl. 5: 7, unless T'lisha K'tanna precedes Gen. 2: 5. G'rashayim takes the place of Geresh provided the accent is on the ultimate and it is not preceded by Kadhma either on the same or the previous word, Ex. 16: 23, 36: 3. When two accents are included in a parenthesis the meaning is that if an additional accent is required, these two will take the place of the one before the parenthesis. P'sik has no separate place in the consecution, but is joined with the other accents to modify their power. It is constantly associated with the Disjunctive Shalsheleth to add to its strength, and occasionally with the different Conjunctives to reduce their strength, but without disturbing the order of their consecution, e. g. with Merka Ex. 16: 5, Munahh Gen. 22: 11, Mahpakh Ex. 30: 34, Kadhma Lev. 11: 32, Darga Gen. 42: 13, T'lisha K'tanna 1 Sam. 12: 3. It is frequently used to indicate a slight pause between closely related words, as where the same word is repeated, Gen. 22: 11, 46: 2, Ex. 16: 5, or before or after the name of God Gen. 1: 5, 10, 27.

2. *Train of Athnahh.*—If Athnahh be preceded by a Conjunctive, it will be Munahh, Gen. 1: 1; if by a Disjunctive in its own section, it will be Tiphhha, Gen. 1: 1. The accents which precede Tiphhha have already been mentioned in explaining the train of Silluk.

3. *Train of S'gholta.*—The first Conjunctive before S'gholta will be Munahh, Gen. 3: 3; if there be two, the

second will be Munahh, Lev. 8: 31, or Merka, Gen. 3: 14. The first Disjunctive in its section will be Zarka, Gen. 1: 28; and if this be preceded by one Conjunctive, it will be Munahh, Gen. 1: 7, or Merka, 1 Chron. 5: 18; if by two, the second will be Kadhma, Gen. 30: 16, 31: 32, or Munahh Ex. 20: 9; if by three, the third will be T'lisha K'tanna Gen. 3: 14, or the second may be Munahh and the third Kadhma, Lev. 4: 35. The next Disjunctive before Zarka will be Geresh, Gen. 24: 7, or G'rashayim, Ex. 39: 3. The accents preceding these have been explained in 1.

4. *Train of Zakeph Katon.*—The first Conjunctive before Zakeph Katon will be Munahh, Gen. 1: 2, the second likewise Munahh, Gen. 3: 12, 27: 45. The first Disjunctive will be Pashta, Gen. 1: 2; or, if the proper place of the accent be the first letter of the word, Y'thibh, Gen. 1: 11, 2: 11. The first Conjunctive before Pashta will be Mahpakh, Gen. 1: 9, or Merka, Gen. 1: 2; the second, Kadhma, Gen. 39: 19, or Munahh, Gen. 1: 12; the third will be T'lisha K'tanna, Ezr. 3: 11. The Disjunctive before Pashta will be Geresh, Gen. 1: 24, or G'rashayim, Gen. 1: 11; the further consecution is explained in 1.

a. In some instances Pashta is found not in the train of Zakeph Katon, but seeming to govern an independent section, e. g. Gen. 27: 37, Ex. 29: 20, Deut. 9: 6, Josh. 10: 11, 1 Sam. 14: 45, 2 Sam. 14: 7, 1 Kin. 18: 21, 2 Chron. 18: 23.

5. Zakeph Gadhol is mostly used instead of Zakeph Katon when no other accent precedes it in its own section, whether upon the same word or one before it.

6. *Train of R'bhī[a].*—The first Conjunctive before R'bhī[a] will be Munahh, Gen. 1: 9; the second, Munahh commonly with P'sik, Gen. 2: 5, or Darga, Gen, 6: 15; the third, Munahh with P'sik, Gen. 7: 23, 19: 14, 31: 29, or Merka, Ex. 14: 10. The Disjunctive before R'bhī[a] will

be Geresh, Ex. 16: 3, or G'rashayim, Deut. 1: 11, which are preceded as in 1.

7. *Train of Pazer.*—Pazer may be preceded by one Munahh, 1 Sam. 14: 34, by two, Ezek. 9: 2, by three, 1 Sam. 14: 34, or by four, Isa. 66: 20.

8. *Train of T'lisha Gh'dhola.*—T'lisha Gh'dhola is the weakest of the Disjunctives which are ever set to rule independent sections. Its weakness is in fact such, that it is sometimes drawn into the section of a stronger Disjunctive; thus, in Gen. 1: 12, Lev. 4: 7, 1 Sam. 17: 51, Isa. 9: 5, Neh. 5: 18, it takes the place of T'lisha K'tanna among the antecedents of Pashta, standing between it and Geresh or G'rashayim; in Gen. 13: 1, 21: 14, Deut. 26: 12, it stands similarly between T'bhir and Geresh or G'rashayim. And in many cases, perhaps in most, when it rules a section of its own, this is a mere subsection, not so much a division of one of the principal clauses as a fragment broken off from one of the larger sections at a point where T'lisha K'tanna would have stood had the connection been sufficiently close to require a Conjunctive, e. g. Gen. 19: 2, 1 Kin. 20: 28. That this is not always so appears, however, from examples like Gen. 7: 7, 37: 7, 1 Sam. 17: 51, 2 Sam. 14: 32, Isa. 66: 19, Jer. 39: 5. T'lisha Gh'dhola may be preceded by one Munahh, Gen. 27: 46, by two, Josh. 2: 1, by three, or by four, 1 Kin. 2: 5.

9. Shalsheleth occurs but seven times, viz., Gen. 19: 16, 24: 12, 39: 8, Lev. 8: 23, Isa. 13: 8, Am. 1: 2, Ezr. 5: 12, and in every instance stands upon the initial word of the verse, and is accompanied by P'sik. It has consequently no antecedents.

10. Kar ne Phara is only used sixteen times. Its section never contains less than three words: its immediate predecessor is always Yerahh ben Yomo, to which may be

added one Munahh, Num. 35: 5, Neh. 5: 13, 13: 5, 2 Chron. 24: 5; two, 2 Kin. 10: 5, Jer. 38: 25, Est. 7: 9, Neh. 1: 6, 2 Chron. 35: 7; three, Josh. 19: 51, 2 Sam. 4: 2, Jer. 13: 13; four, 1 Chron. 28: 1; or five, Ezek. 48: 21.

§ 39. 1. The complete trains of the several accents contain one Disjunctive from each of the inferior orders, disposed in due succession of rank, with one Conjunctive immediately preceding the first class of Disjunctives, two Conjunctives preceding the second class, three the third class, four or more the fourth class. These trains are adapted to sections of different length and character by omitting such of the Conjunctives, and more rarely by repeating such of the Disjunctives, as the mutual relations of the words may seem to require, and breaking off the series as soon as every word in the section is supplied. Thus, while the general order of consecution is fixed and invariable, there is the utmost liberty and variety in particular cases.

a. In a very few instances the Conjunctives go beyond the number here assigned. Thus, Athnahh is preceded by two Munahhs in Gen. 40: 16, Ex. 3: 4, 1 Sam. 17: 39, Isa. 48: 11. T'bhir is preceded by four Conjunctives, Josh. 10: 11, 2 Chron. 22: 11, Isa. 66: 20; Pashta by four, Ex. 5: 8, 1 Sam. 15: 9, 2 Kin. 5: 1, and even by five, Jos. 19: 51, 1 Sam. 7: 10.

2. If a section consists of but a single word, this will receive the appropriate Disjunctive, the entire antecedent series of the table being then omitted as unnecessary; thus, Silluk וַיָּמֹת׃ Gen. 5: 5; Athnahh וַיֹּאמֶר Gen. 24: 34; Zakeph Katon וּבָנָפֶת Isa. 1: 30; R'bhi[a] וַתְּהוֹם Gen. 7: 19; Pazer וַיֹּאבֶד Gen. 22: 2; T'lisha Gh'dhola בַּק Gen. 19: 8. This, as has been already said, is the regular length of the sections of Zakeph Gadhol and Shalsheleth; but those of S'gholta are never composed of less than two words, and those of Karne Phara never of less than three.

3. In sections of greater length there is a disposition towards a regular alternation of Disjunctives and Con-

junctives upon successive words, e. g. Gen. 23: 11, 24: 7, and consequently though two or more Conjunctives may be allowed before a particular Disjunctive, only the first of these is in the majority of cases employed. The actual relations of words may, however, so interfere with this regularity as on the one hand to cause the intervening Conjunctives to be dropped entirely, e. g. Gen. 1: 22, 1 Chron. 15: 18, or, on the other, to introduce as many Conjunctives as the table will admit, e. g. Gen. 3: 14. But if either of the three primary sections consist of but two words, the first must have a Disjunctive accent, however close its relation may be to the second, e. g. וַיִּשָּׂא קֹלָם Gen. 9: 20, וַנִּפָּקְחוּ עֵינֵיהֶם Gen. 3: 5, וַיִּשְׁכָּבוּ טֶרֶם Gen. 19: 4.

a. Sometimes an excluded term of the series will take the place of the secondary accent Methegh, § 44. Tiphhha is thus five times written upon the same word with Silluk, e. g. Num. 15: 21, and eleven times with Athnahh, e. g. Num. 28: 26. Munahh, Gen. 21: 17, often stands upon the same word with Zakeph Katon; if the accent stands upon a mixed syllable and upon another than the initial letter Kadhma will take its place, Gen. 18: 20, 44: 24, 45: 14. Kadhma is also joined in this manner with Darga, Job 1: 15, Munahh, Lev. 10: 12, Merka, Judg. 21: 21, Neh. 12: 44, Mahpakh, Lev. 25: 46, and Geresh, Ex. 16: 15, 21: 22, 35. Mahpakh with Munahh, Lam. 4: 9.

4. Occasionally a subordinate Disjunctive or its alternate is repeated in the same section with or without its antecedents. Thus, T'bhir, Deut. 26: 2 כִּי תָבֹא אֶל הָאָרֶץ, so Deut. 30: 20, 1 Sam. 20: 21, 2 Kin. 17: 36. Zarka, 2 Kin. 1: 16 כִּי מִבְּלִי אֵין אֱלֹהִים, so ver. 6, Gen. 42: 21, Jer. 21: 4, Neh. 2: 12. Pashta, Gen. 24: 14, 42, 48, 65; 1 Kin. 20: 9. Pashta, Pashta and Y'thibh, 2 Kin. 10: 30, Ezr. 7: 25. Geresh and G'rashayim, Gen. 28: 9.

a. There is a double accentuation of a part of Gen. 35: 22, and of the entire decalogue, both in Ex. 20: 2-17, and Deut. 5: 6-21, which involves a double vocalization in certain words, e. g. פָּנָי Ex. 20: 3, i. e. either פָּנַי or פָּנָי. Single words also occur with alternative accents, e. g. with G'rashayim or Geresh and T'lisha Gh'dhola זֹאת Gen. 5: 29, קָרְבָּה Lev. 10: 4, עֹבֵד 2 Kin. 17: 13, וְלַאֲלָמָּה Ezek. 48: 10, זֹאת Zeph. 2: 15.

Poetic Consecution.

§ 40. 1. The principle of the consecution is the same in the poetic as in the prosaic accents, although there is considerable diversity in the details. There is a like division of verses into clauses and sections ruled by a Disjunctive at the end, which imposes upon them its own special train of accents. The sections are fewer, however, and the trains shorter than in prose, on account of the greater brevity of the sentences in poetry for the most part. But this reduction is more than compensated by the new complexity arising from the latitude allowed in the choice of Conjunctives.

a. The numerous errors in the poetical accents as found in ordinary Hebrew Bibles have been carefully corrected by Baer in his edition of Job, Psalms and Proverbs; and the laws of their consecution are elaborately stated by him in the Appendix to Delitzsch's Commentary on the Psalter (1860) and by Dr. William Wickes in his Treatise on the Accentuation of the three so-called Poetical Books of the Old Testament (1881).

2. Verses may consist of one, two, or three clauses, distinguished by the three Disjunctives of the first class. If the verse contain but one clause, Silluk will be written upon the last word, Ps. 4: 1, 29: 7; if it contain two clauses, the division will be made by Athnahh, Ps. 1: 4, 5, 6, or by Olev'yoredh, Ps. 1 : 2, 3: 3, upon the last word of the first clause; if it contain three, the last word of the first will have Olev'yoredh, the last word of the second Athnahh, and the last word of the third Silluk, Ps. 1: 1, 2: 7, 3: 6. Clauses may consist of a single section when no subdivision of them is necessary; or they may consist of two or more sections, when the subdivision is effected by R'bhī[a], Pazer, Great Shalsheleth or L'gharmeh.

a. Thus the Silluk clause is subdivided by R'bhī[a] and L'gharmeh in Ps. 18: 51, and by Pazer Ps. 18: 2; the Athnahh clause by R'bhī[a] (twice),

Pazer, and L'gharmeh (3 times) in Prov. 30: 4; the Olev'yoredh clause by Pazer Ps. 5: 10 and by R'bhī[a] and L'gharmeh Ps. 5: 11. Great Shalsheleth is rarely used and only to subdivide the clause of Silluk, Ps. 34: 8, Job 32: 6; except in Job 11: 6 it is only found on the fourth word from the end of the verse.

§ 41. The order of the accents in the various sections is exhibited in the following table:

	Disjunctives. Class I.	Conjunctives.	Disjunctives. Class II.	Conjunctives.
Principal Sections.				
Secondary Sections.				

Explanation of the Table.

The accents, which are disposed horizontally, exhibit the series by which any given Disjunctive may be preceded. Alternate accents are disposed vertically or inclosed in parentheses. Illuy is represented thus ◌ִ, in distinction from Munahh ◌ֽ.

a. (1) *Train of Silluk.* If Silluk is preceded by a single Conjunctive, this is almost invariably Munahh, provided the tone is on the first syllable, Ps. 1: 1, 2: 10; otherwise it is Merka, Ps. 2: 7, 12, to which Tsinnorith will be added, if a simple syllable precede in the same word Ps. 3: 2, 4, or in an antecedent monosyllable, Ps. 18: 8, 20; if L'gharmeh precede, it will be Illuy, Ps. 3: 1, 10: 14. If it be preceded by two Conjunctives, they will be Munahh, Tarhha, Ps. 2: 9, 3: 6, or, (as Baer affirms, but Wickes, p. 71 denies) if they are on adjacent syllables, Merka, Tarhha, Ps. 12: 8, Job 15: 22; in the inscriptions to eight Psalms (36, 44, 47, 49, 61, 69, 81, 85) they are two Illuys, and in three exceptional instances they are Illuy and Azla, Ps. 109: 16, Prov. 8: 13 or Illuy and Mahpakh with Zinnorith Ps. 68: 20. If it be preceded by three Conjunctives, the first two will be Munahh and Tarhha, and the third Mahpakh, if the tone is on the first syllable, Ps. 24: 10, 39: 12, or Mahpakh with Tsinnorith, if the tone is preceded by a simple syllable in the same word, Ps. 3: 5, 28: 8, or in an antecedent monosyllable, Ps. 25: 15; otherwise it will be Azla, Ps. 25: 8, Prov. 3: 27; the occurrence of Illuy, Ps. 4: 8 is exceptional, and Wickes, p. 72, esteems it incorrect. Four Conjunctives only occur in the following instances, Ps. 3: 3, 32: 5, 42: 2, 47: 5, and in some editions 54: 5.

(2) *R'bhī[a] Mugrash.* If Silluk be preceded by a Disjunctive in its own section, it will be R'bhī[a] Mugrash. Silluk sections cannot have less than two, nor more than five words. If there be but one word before Silluk in its own section, this must have R'bhī[a] Mugrash, however closely it may be connected with that which follows Ps. 4: 6, 7: 11; unless it have three vowels or two vowels and a vocal Sh'va, in which case it may have Merka, Ps. 9: 17, 11: 5, 19: 10, 21: 10. If there be two or more words before Silluk, these may according to the nature of the case all have Conjunctives, or R'bhī[a] Mugrash may stand on the next before Silluk Ps. 5: 4. 8, or on the second with Munahh or Merka intervening Ps. 3: 7, 4: 4, or on the third with Illuy and Mahpakh L'garmeh between Ps. 3: 1, 10: 14. Two Conjunctives never come between Silluk and R'bhī[a] Mugrash; Baer excepts only Ps. 46: 8, 12, Wickes admits no exception. R'bhī[a] Mugrash may be preceded by one Conjunctive, Merka Ps. 5: 4, with Tsinnorith on a previous simple syllable in the same word, Ps. 5: 7, or in an antecedent monosyllable, Ps. 12: 2; by two Conjunctives Merka, Tarhha Ps. 5: 8, 18: 3; or by three, Merka, Tarhha, Mahpakh, Ps. 47: 8, 66: 20, with Tsinnorith if there be a simple syllable before the tone Ps. 119: 52; Ps. 18: 1, 34: 8, 68: 15, 137: 9 are exceptional.

b. (1) *Train of Athnahh.* If Athnahh be preceded by a single Conjunctive this is commonly Munahh, if it come after D'hhi, Ps. 2: 7, 3: 2, other-

wise it is commonly Merka, Ps. 3: 9, 5: 9. 10. If it be preceded by two Conjunctives, these will both be Munahhs, Ps. 2: 4, 3: 8, or with P'sik they will be Merka, Tarhha, Ps. 5: 2, 18: 50. If by three, the first two will be as before, and the third will be Mahpakh Ps. 2: 5, with Tsinnorith if there be a simple syllable before the tone, whether in the same word, Prov. 17: 12, or in an antecedent monosyllable, 1 s. 5: 5; if, however, there be two vowels or a vowel and a vocal Sh'va before the tone, the third Conjunctive will be Illuy, Ps. 32: 2, 40: 9. Ps. 72: 3, Prov. 1: 9, 6: 27 are exceptional. Athnahh is twice preceded by four Conjunctives, Ps. 65: 2, 96: 4; and once by five, Prov. 3: 12.

(2.) *D'hhi.* If Athnahh be preceded by a Disjunctive in its own section, this will be D'hhi. The section of Athnahh may consist of but a single word, if Olev'yoredh immediately precede Ps. 3: 6, 5: 13, 29: 9, otherwise of not less than two. In a section of two words Athnahh is sometimes preceded by D'hhi Ps. 7: 11, 11: 3, more commonly by Merka Ps. 4: 6. 10: 10, which with the sole exception of Job 33: 9 is always used after Olev'yoredh Ps. 10: 18, 14: 3. In sections of three or more words D'hhi may stand on the first word before Athnahh, Ps. 2: 8, 5: 11, or on the second, Ps. 2: 7, 3: 4, but never at a greater remove. D'hhi may be preceded by one Conjunctive, Munahh, Ps. 4: 4, 5: 6; or by two, when the first will be Munahh and the second will follow the same law as the third Conjunctive before Athnahh, thus it may be Mahpakh, Ps. 4: 3, 5: 3, with Tsinnorith, Ps. 6: 11, 32: 5, or it may be Illuy, Ps. 35: 15, 78: 45 It is once preceded by three Conjunctives, Job 34: 37; Baer finds two other examples Ps. 23: 6, 56: 1, which Wickes disputes. In a very few instances D'hhi occurs before Silluk in place of R'bhī[a] Mugrash, Ps. 25: 4, 31: 17, 109: 16, Prov. 8: 13; more frequently before R'bhī[a] Mugrash in verses which have no Athnahh clause, this being in a manner thus replaced, Ps. 4: 5, 6: 1, 7: 10, 11: 6, 22: 1.

c. (1.) *Train of Olev'yoredh.* Olev'yoredh may be preceded by one Conjunctive, and one only, which is almost always Galgal, Ps. 1: 1, 3: 3; but three times before P'sik it is Mahpakh, Ps. 68: 20, 85: 9, Prov. 30: 15, and three times Merka after Small R'bhī[a], Ps. 35: 10, 42: 5, Prov. 30: 9. The section of Olev'yoredh never has less than two words. If it has but two, the first must receive the Disjunctive Small R'bhī[a], Ps. 4: 5, 9: 21. If it has three or more, and a Disjunctive stand on the word next preceding Olev'yoredh, it will be Small R'bhī[a], Ps. 3: 6, 35: 20; if one stands on the second word before Olev'yoredh, whether followed by R'bhī[a] or by Galgal, or on any previous word of the section, it will be Tsinnor Ps. 3: 3, 22: 15, 28: 7. Small R'bhī[a] is in but three instances written on the second word before Olev'yoredh viz. those in which, as above stated, it is followed by Merka. Tsinnor is with like infrequency written immediately before Olev'yoredh, Ps. 55: 22, 106: 47, Prov. 8: 13.

(2.) *Small R'bhī[a].* R'bhī[a], when it immediately precedes Olev'yoredh and is included in its section, is called Small R'bhī[a] in distinction from Great R'bhī[a] or R'bhī[a] proper, which, though it has the same sign, fulfils

quite a different function, viz. that of dividing the principal clauses of a verse, and governing a section of its own, § 40. 2. Small R'bhī[a] may be preceded by one Conjunctive, Merka, Ps. 9: 7, 15, or by two, Merka, Mahpakh, Ps. 18: 1, Prov. 6: 26, to which Tsinnorith may be added, Prov. 23: 5.

(3.) *Tsinnor.* Tsinnor may be preceded by one Conjunctive, which will be Merka, if the tone is on the first syllable, Ps. 24: 8, 32: 9, or if the letter under which it stands has Daghesh either lene or forte, Ps. 6: 3, 16: 4; otherwise it is Munahh, Ps. 12: 7, 18: 7. If it have two Conjunctives, the second will be Mahpakh, Ps. 24: 10. 27: 4.

d. Train of R'bhī[a]. R'bhī[a], when governing an independent section of its own, i. e. Great R'bhī[a] may be without any antecedent, its section consisting of but a single word, Ps. 4: 4, 5: 4, or it may have one Conjunctive, which is commonly Mahpakh, Ps. 2: 8, Prov. 7: 7, unless Pazer or L'gharmeh precede, when it is mostly Illuy, Ps. 2: 12, 17: 14, though if a simple syllable stand immediately before the tone it will be Mahpakh with Tsinnorith, Ps. 4: 2, 15: 5; the Conjunctive, however, is Merka, when another R'bhī[a] precedes, Ps. 17: 1, Prov. 4: 4, and in a few other individual cases, Ps. 1: 1, 32: 2, Job 14: 19. It has two Conjunctives according to Baer in Ps. 55: 24, 86: 14; though Wickes points differently.

e. Train of Pazer. The section of Pazer may consist of but a single word, when it will have no antecedent, Ps. 17: 14, 18: 2. If it have one Conjunctive, this will be Galgal, Prov. 23: 29, except in a very few instances with P'sik, where it is Mahpakh, Ps. 50: 1, 59: 6. If it have two Conjunctives, the first will be as before, and the second Mahpakh if its place is on the initial letter of the word, Ps. 11: 2, 31: 11, otherwise it will be Azla, Ps. 13: 3, 31: 12. If it have three Conjunctives, the second and third will be Azla and Mahpakh, Ps. 22: 25, 23: 4, Prov. 6: 3, in all of which Wickes changes the pointing.

f. Train of Great Shalsheleth. Shalsheleth is preceded by Conjunctives in but three passages; it has Merka Ps. 89: 2, and Merka, Tarhha Job 32: 6, 37: 12.

g. Train of L'gharmeh. The section of Mahpakh L'gharmeh never consists of more than one word. The Conjunctive before Azla L'gharmeh follows the same rule as the third Conjunctive before Athnahh, see *b* (1); thus it may be Mahpakh, Ps. 8: 3, 12: 5, with Tsinnorith, Ps. 3: 8, 9: 21, or it may be Illuy, Ps. 7: 10, 9: 14. When it has two Conjunctives, the second is Merka; of this there are two examples, Ps. 117: 2, 143: 3.

§ 42. The trains of these several accents are adjusted to sections of varying length by expedients similar to those employed with the prose accents, viz.: 1. Omitting the Conjunctives in whole or in part. 2. Repeating the Disjunctives, e. g. " Ps. 14: 1 (in some editions), Ps.

17: 14, or their equivalents, e. g. D'hhi before ״ Ps. 7: 10, 9: 1 § 41. *b* (2). 3. Writing two accents upon the same word, בִּמְלֻכָּתוֹ־תָם Ps. 5: 11, הַוֹּרֵנִי Ps. 27: 11, וַיֵּרָאוּ Ps. 18: 16. 4. Uniting two or more words by Makkeph, so that they require but a single accent. 5. Writing the different parts of a compound accent upon separate words; thus, Olev'yoredh אֲנִי־לֵל Ps. 6: 3, Merka-Tsinnorith כִּי חָנֵּן Ps. 22: 9, Mahpakh-Tsinnorith כִּי־בָאתָ Prov. 6: 3.

MAKKEPH.

§ 43. Makkeph (מַקֵּף *joining*) is a horizontal stroke by which two, three, or even four words may be united. אִם־תַּעֲשֶׂה־כִּי, אֶתֵּן־לָךְ Gen. 30: 31, יֶשׁ־לִי־כֹל Gen. 33: 11, עַל־כָּל־דְּבַר־פֶּשַׁע, וְאֶת־כָּל־אֲשֶׁר־לוֹ Gen. 12: 20, 25: 5, Ex. 20: 11, עַל־כָּל־בְּנֵי־שָׁחַץ Ex. 22: 8, עַל־כָּל־בְּנֵי־שָׁחַץ Job 41: 26. It belongs properly to the accentual system, words which are closely related being often connected in this manner in order to obviate the necessity of unduly multiplying Conjunctive accents. Thus, the first fifteen words of Ex. 22: 8 are in this manner reduced to eight. Monosyllables are frequently, and some almost constantly, linked with the succeeding or preceding word, to which they are closely related. Examples are not wanting, however, of longer words similarly united, e. g. שְׁלֹשָׁה־עֲדִים Deut. 19: 15, נֶפֶשׁ־חַלֶּה 1 Kin. 17: 21, אֲבִי־יְהוֹנָה Isa. 31: 4. This use of Makkeph is not to be confounded with that of the hyphen in modern languages between the members of a compound, as *self-same, master-builder*. Words united by Makkeph are still as separate as ever in character and signification; but they are pronounced together and are accented as though they formed but one word. Hence, whatever number of words be thus joined, the last only will receive

an accent. And, as a further consequence, if a word preceding Makkeph properly ends in a long mixed syllable, its vowel, if mutable will, by the loss of the accent, be shortened, אֶת־שָׁלֹם, כָּל־לֹוחַ, הֶחָתַנְתָּ־נוּ, otherwise it will commonly receive the secondary accent Methegh, שֵׂם־לֹוהִים, הָעָם־הַזֶּה, כְּתֵב־הַדָּת, אֵין־יְרֵאַת.

a. The particles אֶל, אַל, אֵת, אִם, בֵּן, עַל, פֶּן are almost invariably followed by Makkeph, so are the nouns בֵּן, בַּת and כֹּל when in the construct state; the particle נָא is commonly preceded by it. Before monosyllables or dissyllables accented on the penult Makkeph is inserted after the particles אִי, לֹא, בַּל and the pronoun מִי, as well as sometimes after larger words which do not admit of the retrocession of the accent, e.g. אוֹי־לָהֶם Ex. 22:4, מִי־אֵלֶּה Gen. 27: 32, וַיַּכֵּהוּ־לֹו Hos. 8: 14, וַיַּקְחוּ־לֹו Gen. 15: 10. The pronoun זֹה is followed by Makkeph before words whose initial letter admits Daghesh-forte Conjunctive, זֶה־שִּׁבְעָה וְזֶה־שְּׁלֹשִׁים Ps. 133: 1. כִּי־אִם are joined together by Makkeph in Gen. 15: 4, Num. 35: 33, Neh. 2: 2; in all other passages אִם is followed but not preceded by Makkeph, כִּי אִם־בְּתֹורַת Ps. 1: 1. אֲשֶׁר־לֹו are joined by Makkeph but never לֹא אֲשֶׁר, the לֹא being always linked to the following word. כִּי־לֹא are united by Makkeph before a word bearing the disjunctive accent Tiphḥha, provided it has Sh'va under its initial letter; otherwise the Makkeph follows לֹא, thus כִּי־לֹא בָכָה but כִּי לֹא־בָאתֶם.

b. Tsere remains before Makkeph in אֵשׁ, בֵּן, גֵּר, יֵד, יֵין; it sometimes remains and is sometimes shortened in לֵב, שֵׂם, שֵׁשׁ *six*, עֵת e. g. Gen. 16: 13 שֵׂם־רְאִיָּה, but ver. 15 שֵׁם־בֵּן. It once remains according to some editions in אֵת־ Job 41: 26, a word which is three times written אֵת without Makkeph, Ps. 47: 5, 60: 2, Prov. 3: 12. Methegh remains in the place of the accent on יַקַּח and similar words ending in Pattahh and a guttural, when they are united by Makkeph to words having a disjunctive accent on the first syllable יָקַח־לֵב Gen. 34: 16, יָקַח־לִי Gen. 24: 7.

c. Makkeph is occasionally found in the middle of a long word, which has been erroneously divided into two, e. g. יִפַּח־קָלָה Jer. 46: 20, and perhaps פָּקַח־קֹוחַ Isa. 61: 1. Sometimes words are thus divided without a Makkeph to unite the sundered parts, e. g. כִּי עֲלִים Lam. 4: 3, בְּחֵר בְּחֹרֵיהֶם 2 Chron. 34: 6, and probably אֶחֱבֹא חֵבוּ Hos. 4: 18, לְחַפֹּר פְּלִישׁ Isa. 2: 20. (See Dr. Alexander's Commentary on this passage.) The last two examples are plainly intended by the punctuators to be read as separate words. This might likewise be done in the preceding examples if they were pointed בְּחֵר בְּחֹרֵיהֶם and כִּי עֲלִים.

Methegh.

§ 44. Methegh (מֶתֶג *bridle*), a small perpendicular stroke under the initial letter of the syllable to which it

belongs, is a secondary accent denoting a stress of voice inferior to the main accent. As this latter always has its place in Hebrew either upon the ultimate or the penult, distinctness was promoted and monotony relieved, especially in long words, by giving prominence to one or more of the antecedent syllables. There is a natural tendency to heighten the force of the accent by passing lightly over the immediately preceding syllable, this diminished force creating in its turn a new stress upon that next beyond it, and so on in alternate elevations and depressions to the beginning of the word. Agreeably to the principle just stated, Methegh regularly stands in polysyllables upon the second syllable before the accent, and again upon the fourth if the word have so many, e. g. הָאָדָם, נֵאָתִי, וְלִבְאֵי, בְּתֵיהֶם, בְּמִסְגְּרוֹתֵיהֶם, וּמַהֲתֻכּוֹלוֹת. And so upon two or more words connected by Makkeph, which are pronounced as one, e. g. וְרָאֲהּ־לוֹ Gen. 22: 8, בֵּי־אֵם־לֵהֶם 1 Sam. 21: 7.

a. When the nature of the syllables requires it, § 32. 1, Methegh takes the place of the principal accent before Makkeph irrespective of the position of the accent upon the following word, הִשְּׁאִיר־לוֹ Num. 21: 35, בְּלֵהּ־הַבָּשָׂן Num. 21: 33, בְּלֵהּ־הַבָּבֶל Jer. 34: 1.

b. It is to be observed that the position of Methegh is determined by that of the tone-syllable, not by that of the accentual sign when these are not coincident, as frequently happens with prepositives and postpositives, e. g. חַעִדְתִּי Deut. 4: 26, הִוֹרִישׁוּ Josh. 22: 27, where the tone falls on the penult; לְהוֹנְקִים Jer. 26: 21, where the tone is upon the ultimate.

§ 45. The secondary accent is liable to be shifted from its normal position for the following reasons, viz.:

1. If the syllable which should receive it is mixed, it may be given in preference to an antecedent simple syllable, e. g. וְאֶשְׁתַּמְּרָה 2 Sam. 22: 24, וְיִחְתַּהֵךְ Job 1: 7, בֵּיתַתְּחִתּוֹת Ezek. 42: 5, עֲלֵי־רֹאשׁ Gen. 43: 7; or if none such precede, it may be omitted altogether, e. g. וַיִּבְאֵם Jer. 33: 24, הַיִּזְרְעֵאלִי 1 Kin. 21: 1, אֶתְכָּל־הַמְּצוָה Deut.

6: 25, except in certain cases which require it, e. g. וַתִּתְהַפָּכָה Ex. 1: 10, וְהִתְהַלַּכְתִּי Lev. 26: 12.

a. Methegh regularly stands (see Baer in Merx Archiv for 1868):

(1) On a short vowel in a mixed syllable (except Kamets Hhatuph) in words having a disjunctive accent, provided it be separated from the accent or an antecedent Methegh by both a vowel and a vocal Sh'va (other than Hholem before a guttural with Hhateph Pattahh), וַיִּשְׁכָּ֥ם Gen. 3: 8, תִּשְׁחַ֥תְנָה Gen. 7: 2, מְמַשְׁנְרוֹתֵיהֶֽם׃ Ps. 18: 46, מְתְנוֹסָסוֹת Zech. 9: 16, but הַתְּאֻבָ֑ת׃ Gen. 24: 11.

(2) On *ĕ*, *ĭ* or *ŭ* in the first of two mixed syllables, immediately preceding a disjunctive accent, when the vowel of the second syllable is *ă* or *ĕ*, הַמְהַפֶּכֶת Gen. 3: 24, רְפִדִ֑ים Gen. 4: 26, אֶתְרְפָ֔ה Gen. 30: 31. Initial וּ followed by simple Sh'va is reckoned a short mixed syllable in the application of both the foregoing rules וְלְאַבְלָכֶם Gen. 47: 24, וְתְכַסֶּינָּה Jer. 3: 25.

(3) On the first syllable of the Kal future sing. of perfect verbs, when the second vowel is shortened to Kamets Hhatuph before Makkeph, יְשַׁפְּטֶ֣נּוּ Job 3: 5, but יִשְׁפְּטֵ֣ם Ps. 9: 9.

(4) With the first syllable of נַעֲשֶׂה and נַעֲשֶׂה־, when they have a disjunctive accent, as Gen. 3: 15, Lev. 26: 16; but נַעֲשֶׂה Gen. 17: 12, וְאֶת־נַעֲשֶׂה Gen. 9: 9, וְנַעֲשֶׂה Deut. 28: 46 and the like follow rule (1).

A very few isolated instances are not embraced in the preceding rules, e. g. וְלְשָׂרָאִ֔ל Gen. 17: 20, מְרַחֲשֶׂ֣דֶת Gen. 30: 16, עַלְתַּמּוּתָם Ex. 29: 21.

2. It is always given to a long vowel when followed by a vocal Sh'va, whether simple or compound; also to a short vowel followed by compound Sh'va or a vowel which has arisen from Sh'va, the slight pronunciation proper to the Sh'va or its derivative giving new prominence to the preceding vowel, יֹאכְלוּ, יְבָרֲכוּ, לָאִשָּׁה, בְּשָׂקְתוֹת Gen. 30: 38, סָבְבֵי Isa. 9: 17, 10: 34, יְחִרְדוּ; sometimes to other intermediate syllables, § 20. 2, e. g. מָשְׁכוּ Ex. 12: 21, עָרְבוֹת Num. 31: 12 (but מֵעַרְבוֹת Deut. 34: 1, where a simple syllable precedes), חָסְדֵי Isa. 63: 7, עֲבָדֶיךָ Obad. ver. 11, particularly before the first radical of הָיָה *to be* and חָיָה *to live* when pointed with Sh'va יְהִי, וְחָיִיתָ, לִהְיוֹת; rarely and only as an exception to a mixed syllable standing in the first place before the principal accent, e. g. תַּדְשֵׁא Gen. 1: 11, הַבְּתִּים Ex. 12: 7, Zech. 14: 2, אֲנָה Jon. 1: 14, 4: 2.

a. Monosyllables ending in a long vowel, when followed by Makkeph, take Methegh in the first place before the accent, provided a vocal Sh'va intervenes, בָּרִי־נָּהּ Gen. 19: 12, בָּרִי־וֹלֵא Gen. 22: 12, אֲבָרִי־שָׁם Gen. 34: 6: With dissyllables this is rare and exceptional וּמְרָרִי־וְצֹאן 1 Kin. 1: 19, שְׁלֹמֹה־בְנִי 1 Chron. 28: 9.

b. Methegh is regularly attached to intermediate syllables in the following cases (See Baer in Merx Archiv for 1868):

(1) To the article הַ or the inseparable prepositions בְּ, כְּ, לְ with the vowel of the article, before a vowelless consonant (other than Yodh) from which Daghesh forte has been omitted, provided they stand in the second place before the accent, חֲמִכְסֶה Lev. 3: 3, לַמְנַצֵּחַ Ps. 4: 1, but הַיְלָדִים Gen. 33: 5, לַכֶּלֶב Ps. 144: 1.

(2) To He Interrogative pointed with Pattahh (except before Yodh or a dagheshed letter), provided it stands in the second place before the accent, the Methegh in this case preceding the vowel for the sake of distinction, הֲמִכְסֶה Gen. 18: 17, הֲאֵלֵךְ Ex. 2: 7, but הֲיְדַעְתֶּם Gen. 29: 5, הֲמָשַׁל Judg. 9: 2. In the books of Psalms, Proverbs and Job Methegh follows the vowel, as otherwise it might be confounded with D'hhī הֲלְעוֹלָם Ps. 85: 6. Before Daghesh-forte, which sufficiently shows the following Sh'va to be vocal, Methegh is omitted as unnecessary, הַכְּבַדְתֶּ Isa. 27: 7.

(3) To the first syllable of וַיְהִי or וַיְהִי before Makkeph or with the accent Pashta, וַיְהִי־אוֹר Gen. 1: 3, וַיְהִי Gen. 4: 8, וַיְהִי־שֵׁת Gen. 5: 6. If a simple syllable precedes Methegh will in all cases be transferred to it, בָּא־חַמְשֶׁת 2 Kin. 9: 11.

c. It hence appears how Methegh comes to be of use in distinguishing the doubtful vowels, § 19, and to what extent it can be relied upon for this end. As it invariably accompanies the vowel of a simple syllable when followed by vocal Sh'va, it must always be found with *ā*, *ī*, and *ū* preceding Sh'va, inasmuch as this will necessarily be vocal. Initial וּ *ū*, the unemphatic conjunction, is an exception with which it is not written, e. g. וּזְהָב Gen. 6: 19, וּלְלֵאָה Gen. 31: 4, unless the Sh'va be compound, e. g. וְלַחֲבֹרֹל Gen. 1: 18, וְלֵבָב Judg. 5: 12, or it be required by the rules under 1. *a.* The absence of Methegh except in the case just mentioned, is consequently conclusive evidence of the shortness of the vowel. As, however, short vowels in intermediate syllables, and in a few rare instances even in mixed syllables, may receive Methegh, the presence of this sign does not of itself determine the vowel to be long; the ultimate decision must in this case depend on other considerations.

3. When by the operation of the preceding rule Methegh comes to stand in the first place before the accent, another Methegh is nevertheless occasionally found in the second place, the two thus standing in immediate succession, e. g. בְּמַחֲנֶה Gen. 32: 22, וַיַּעֲלוּ Gen. 45: 25; and even three occur upon successive syllables, e. g.

וּבְמִסְגַּרְתֶּךָ Isa. 22: 19 in some editions. But commonly where there is more than one Methegh, their position relatively to each other is governed by the same rules as the position of Methegh generally with relation to the principal accent, e. g. לְשׁוֹנֶךָ, וְהַשֵּׁבֶת, וְאַחֲרִיתְךָ, מְיַחֲלִים.

4. Methegh is sometimes written under an initial letter with Sh'va, e. g. דְּעוּ־אֵבֶל Job 19: 6, נִנָּתְקָה Ps. 2: 3, כְּמַהְפֵּכַת Jer. 49: 18.

a. A Methegh so situated is called Gayā (גַּעְיָא *bellowing*) by Jewish grammarians, and, according to Elias Levita, it occurs eighty-four times, the number yielded by its name arithmetically reckoned. The traditional rule was that the Sh'va, on which it stands, should be pronounced as a full vowel. Baer and others give the name of Gayā likewise to Methegh in mixed syllables. Methegh upon a short vowel before a compound Sh'va was called Maʾarikh (מַאֲרִיךְ *prolonging*), with a short Hhirik it was called Hhīrūk (חִירוּק *gnashing*).

5. The place of Methegh is frequently supplied by an accent chosen agreeably to the laws of consecution, § 39. 3. *a.*, e. g. אַנְחֵנוּ Isa. 66: 13, לַאלֹהֵיהֶם Deut. 12: 31, וְאֶסְעֲדֵם Zech. 7: 14, וַעֲלֵיכֶם Num. 10: 23, נִקְהֲלוּ Josh. 22: 12.

a. Methegh with Sh'va occurs chiefly in connection with the poetic accents, and has relation to the intoning which it is one of their functions to direct. It indicates that the vowelless letter, upon which it stands, is to be dwelt upon and thus additional space gained for the various modulations of the voice that are prescribed. Baer gives the following rules:

(1) When Methegh would regularly fall upon an initial simple syllable beginning with two consonants, in words having a strong disjunctive accent not preceded by a Conjunctive, it is transferred from the vowel to the antecedent vocal Sh'va, נָסְחוּ־עָלַי Ps. 4: 7. If the Sh'va is compound, Methegh is interposed between its two constituents, אֱלֹהֵיהֶם Ps. 79: 10.

(2) The divine names יְהוָה, אֲדֹנָי, אֱלֹהִים, אֱלֹהַי, when accented with R'bhīʿ not preceded by a Conjunctive, take Methegh on the initial Sh'va, e. g. Ps. 2: 7, 25: 2, 68: 8, 90: 1.

(3) Words accented with Olev'yōrēdh, R'bhīʿ or D'hhī not preceded by a Conjunctive take Methegh on initial Sh'va, provided there is at least one vowel between it and the accent, and this is without Methegh וְהָיָה Ps. 1: 3, לְהַשְׁבִּיתֵם Ps. 106: 23. The Methegh necessarily due to a following

compound Sh'va is not reckoned in this and the subsequent rules, כַּחֲרִיר־אֵל Ps. 36: 7, וְאֶעֱנֵֽהוּ Ps. 91: 15.

(4) אֲנִי with Munahh before D'hhī takes Methegh on the initial Sh'va, Ps. 17: 6, 116: 16.

Methegh falls on initial Sh'va with the prose accents

(1) When the word has G'rashayim or Pazer not preceded by a Conjunctive, provided there are at least two vowels before the tonesyllable and the first is without Methegh, (see rule (3) above), וְאֶת־פַּתְרֹסִֽים Gen. 10: 14, מְעֻשָּׂקוֹת Ex. 25: 33.

(2) When the word has Darga as the second Conjunctive before R'bhī[a], or Kadhma as the second Conjunctive before Pashta or T'bhir, or Munahh as the third Conjunctive before T'lisha, provided a vowel precedes the tonesyllable and is without Methegh, (see rule (3) above), שֶׁכָּבַ֥ם הֵם אֹתֽוֹ Gen. 34: 21.

Methegh in these cases requires a more vigorous pronunciation of the vowelless letter, which if slightly uttered might be inaudible.

K'RI AND K'THIBH.

§ 46. Various notes extracted from the Massora (מָסוֹרָה *tradition*), a collection of remarks upon the text, are found in the margin of the Hebrew Bible, which are explained in the glossary at the end of most editions. The most important of these are the various readings known as the K'rī (קְרִי *read*), and K'thībh (כְּתִיב *written*). If in any instance traditional usage sanctioned a reading different from that which was written in the text or the K'thibh, the punctuators did not venture to alter the text itself for the sake of making the correction; they went no further than to connect with the letters of the text the vowels of the word to be substituted for it in reading or the K'ri, with a reference to the margin where the letters of the substitute might be found. Thus, with the word וַיֹּאמֶר Josh. 6: 7 is connected the marginal note ויאמר קרי. The vowels here attached to the K'thibh belong not to it but to the unpointed word in the margin, which is accordingly וַיֹּאמֶר. The proper vowels for the pronunciation of the K'thibh are not written, but must

be supplied from a knowledge of the form indicated by the letters, which in this case is וַיֹּאמֶר. Again, in ver. 9, תְּקַנֵּוּ in the text refers to תקני ק׳ in the margin; the K'ri is here תְּקַנֵּי, and the K'thibh, whose vowels are left to be determined by the reader, תְּקַלּוּ. Jer. 42: 6 has אֲנַוּ where the marginal note is אנחנו קרי; the K'ri is accordingly אֲנַחְנוּ, and the K'thibh אֲנוּ. In order to indicate that a given word was to be omitted in reading, it was left unpointed, and the note כתיב ולא קרי, *written but not read*, placed in the margin, e. g. חבש Ezek. 48: 16, נא 2 Kin. 5: 18, ידך Jer. 51: 3. If, on the other hand, a word was to be supplied, its vowels were inserted in the text and its letters placed in the margin, with the note קרי ולא כתיב, *read but not written*, e. g. Judg. 20: 13 in the text בְּנֵי and in the margin בני, to be read בְּנֵי; so Jer. 31: 38 בָּאִים. In 1 Kin. 21: 8 the first letter of הַסֹּגְרִים is left unpointed as superfluous, and in Job 2: 7 עַד is explained by the margin to stand for וְעַד: so Jer. 18: 23 וְיָרְדוּ for וְרִידוּ.

a. The number of these marginal readings differs in different editions. Elias Levita states that there are 848. Others have computed them to be 1,000; others still, 1,200.

§ 47. Sometimes a different reading from that of the text is suggested by the points alone without a marginal note being added in explanation, as when a particular word or orthography is regularly substituted for another of frequent occurrence. These cases are presumed to be so familiar to the reader as to require no other index of their existence than the presence of the appropriate vowels. Thus, the divine name יהוה, which the Jews had a superstitious dread of pronouncing, was and still is read by them as if it were אֲדֹנָי Lord, whose points it accordingly receives, יְהֹוָה, unless these two names stand in immediate connection, when, to avoid repetition, it is

read אֲדֹנָי and pointed יְהֹוִה Gen. 15: 2, Hab. 3: 19. The antiquity of this superstition is attested by the Κύριος of the Septuagint, followed in the English as well as in other modern versions by the rendering LORD. The true sound of the name never having been noted, is now lost; the only clue that is left being its etymology and the form which it assumes in composition, § 62. 1, from which the conclusion has been drawn that it was יַהְוֶה *Yahve*. The common pronunciation Jehovah is manifestly founded upon the error of combining the consonants of this word with the vowels of another and an entirely different one. Other standing K'ris, unnoted in the margin, are הִוא, which is read הִיא, though the sound indicated by the letters is הוּא. So יְשַׁשְׂכָר read יִשָּׂשכָר, and יְרוּשָׁלַם read יְרוּשָׁלַיִם.

§ 48. In the absence of definite information respecting the origin and sources of these various readings, it is difficult to determine with absolute precision the weight to which they are respectively entitled. The current opinion of the ablest Hebraists, based upon a careful scrutiny of their internal character and the relation which ordinarily appears to subsist between them, is that while the K'ri may perhaps, in a few cases, correct errors in the K'thibh, and so restore the original reading, it is in the great majority of instances an explanatory gloss rather than an emendation. With the rare exceptions already suggested, the K'thibh is esteemed the true reading, the object of the K'ri being to remove orthographical anomalies, secure grammatical uniformity, substitute usual for unusual, prevailing for obsolete words and forms, and occasionally to introduce euphemistic expressions. While the K'ri is probably not to be esteemed the original reading, therefore, it deserves attention as

the grammatical or exegetical comment of a steadfast tradition.

Accuracy of the Points.

§ 49. 1. All the Massoretic additions to the text designed to facilitate its reading have now been considered. The correctness of the pronunciation, which they yield, is vouched for not only by the esteem in which they are universally held by the Jews, but by the scrupulous minuteness of the system, its consistency with itself and with the vowel-letters of the text, its affinity with and yet independence of the vocalization of the kindred languages the Arabic and Syriac, and the veneration for the already established text which evidently characterized its authors, since they did not venture to change the text even in the slightest particular.

2. The only additional information which has come down to us respecting the true sound of Hebrew words, is furnished by the mode of writing proper names in the Septuagint version, and the few Hebrew words preserved by ancient authors, particularly Origen and Jerome. These have been subjected to an elaborate comparison with the Massoretic punctuation, and the result has been to establish their substantial agreement in the main, with, however, not a few remarkable points of divergence. In relation to this subject it should be observed, that the Hebrew pronunciation of the Seventy is inferred entirely from their mode of spelling proper names, not from words in living use in the language. The chances of inaccuracy, on the part of the translators, are here peculiarly great. Many names were not familiar and were of rare occurrence; and as no system of vowel notation then existed, they were left entirely to their independent know-

ledge of the sound of each individual word. These words were written by them in a foreign alphabet, whose sounds did not coincide precisely with those of the Hebrew, and in which the proper equivalents varied somewhat according to their combinations. The true sound was also departed from sometimes because the laws of Greek euphony forbade its exact reproduction. The negligence with which they are chargeable elsewhere was also probably aggravated here, and in fact there are many instances in which they not merely deviate from the vowels but transpose or change the letters. Leaving out of view, therefore, such incidental discrepancies as are to be accounted for in the ways now suggested, a thorough and extended examination of the subject reveals, with all the general agreement, a number of regular and systematic deviations.

a. These are thus stated by Ewald, Lehrbuch, p. 71. (1) An *ĕ* or *ĭ* derived from *ă* is written *ă*, as תֶּרַח Θαρα, בִּלְעָם Βαλααμ, וְגִבְעֹן Γαβαων, מָרְיָם Μαριαμ; and on the other hand, *a* is sometimes written *ĕ*, אֲחֶלִיבָמָה Ολιβεμα, קֵנִז Κενεζ, גַּת Γεθ, especially before ח as קוֹרַח Κορε, זֶרַח Ζαρε. (2) *ĕ* is written for *ĭ* and *ŏ* for *ŭ*, כְּתִים Χεττιοι, גֵּיהִנֹּם Γεεννα, גְּדֵרֹן Γεδεων, בְּצַרִים Μεσραιμ, אֲחֻזַת Οχοζαθ, עֻזִּיָּה Οζια. (3) For the diphthongal *ē* and *ō* their constituents *aĭ* and *aŭ* are substituted, קֵינָן Καιναν, נָבוֹ Ναβαυ. (4) The vowel letters are softened into their homogeneous vowels נוּקְרָא ουικρα, וַיִּדַּבֵּר ουιδαβηρ. (5) Vocal Sh'va is written as a full vowel, commonly *a*, or if an *o* follow, *o*, צָבָאוֹת Σαβαωθ, רְטוּאֵל Ραγουηλ, כְּרוּבִים Χερουβιμ, סְדֹם Σοδομα; the final vowel of Segholates is also written *ŏ* if *o* precedes, מֹלֶךְ Μολοχ, עֹמֶר γομορ.

3. The regularity of these deviations seems to be best accounted for by the assumption that the pronunciation represented in the Septuagint is that which prevailed among the Jews in Egypt, which would naturally be less pure than that of Palestine represented in the vowel points, and which, moreover, betrays in the particulars recited above a strong leaning to Aramæan forms and sounds. Accordingly the view now commonly entertained is that the vowel notation of the Massorites is correct,

at least in all essential particulars, and that it is properly to be made the basis of all investigations into the phenomena of the language.

Orthographic Changes.

§ 50. The signs thus far described represent all the sounds of the Hebrew language. Its stock of words is formed by combining these in various significant ways. The laws of such combinations, and especially the mutations to which they are subject, or which they occasion, next demand attention. When a particular idea has been attached to a certain combination of sounds, its different modifications may naturally be expressed by slightly varying those sounds. This may take place,

1. By the substitution of one letter for another of like character, and for the most part of the same organ, e. g.:

הָיָה *to be, exist,* חָיָה *to live;* נָבַע *to pour forth,* נָבָא the same idea applied to words, *to prophesy;* חָנַק *to encircle the neck with an ornament,* אָנַק *to strangle,* applied to sounds uttered in strangulation, *to groan;* רָגַל *to go about as a spy,* רָכַל *to go about as a merchant;* כָּנַס *to collect,* גְּנָזִים *treasures;* גָּבִיעַ *a cup,* כּוֹבַע or קוֹבַע *a helmet* (of similar shape); רַךְ *tender, delicate,* רַק *thin;* תִּקֵּן *to make straight,* תִּכֵּן to straighten the beam of the balance, *to weigh;* בְּכוֹר *first born,* בִּכּוּר *first ripe,* בֹּקֶר the first portion of the day, *the morning;* תָּלָה *to suspend,* דָּלָה applied to a bucket, *to let down;* גָּזַר *to cut,* קָצַר *to reap;* זָהָב *gold,* צָהֹב *yellow;* טָמַן *to conceal,* שָׂפַן and צָפַן *to hide away* as treasures, סָכַן *to cover with boards;* נָתַץ *to destroy* by tearing down, נָתַשׁ *to destroy* by uprooting; טָבַח *to slay,* זָבַח *to sacrifice;* חָבַל *to bind,* גָּבַל *to bound;* פָּרַח *to break up, flee,* פָּרַח *to break out, blossom,* פָּרַק *to break in pieces;* קָצַב *to cut off,* חָצַב *to hew stone,* חָטַב *to cut wood;* כָּתַר *to surround,* עָטַר *to encircle the head with a crown;* נָסַךְ *to pour out,* זָסַךְ *to pour in libation or in casting metals;* צָחַר *to shine,* טָהַר *to be pure;* חָרַת *to engrave,* חָרַשׁ *to plough;* בָּחַן *to prove,* בָּחַר *to approve, choose;* שָׁתָה *to drink,* its causative הִשְׁקָה; חָתַר *to break through,* חָקַר *to investigate;* נָצַב *to place,* its reflexive הִתְיַצֵּב.

2. By the transposition of letters, e. g.:

פָּרַץ *to deal violently,* פָּצַר *to urge;* קָצַר *to cut with the sickle, reap,* קָרַץ

to cut with the teeth, bite; נָשַׁם *to blow,* נֶשֶׁם *breath;* כָּנַס *to collect,* כֶּסֶף *riches,* סִכְנוֹת *storehouses.*

3. By the addition of a letter:

Thus, from the letters צר, in which inheres the idea of compression are formed צָרַר *to bind,* צוּר *to press together,* אָצַר *to heap up,* יָצַר *to be straitened,* נָצַר *to guard, besiege,* עָצַר *to restrain,* חָצֵר *an enclosure;* from גז are formed גָּזַז *to cut,* גָּזַר *to cut off,* גּוּז *to cut loose, go away,* גָּזַז *to shear,* גָּזַל *to plunder,* גָּזִית *hewn stone;* פָּרַשׂ *to unfold, make distinct,* פָּרַשׁ *to spread out;* כֶּרֶם *a vineyard,* כַּרְמֶל *a garden.*

§ 51. Such literal changes as those just recited not only serve to express new shades of meaning, but even where the meaning remains precisely the same, they may represent diversities of other sorts. Thus, the distinction may be,

1. In point of currency or style: One form of the word being in more common and familiar use, the other more rare and savoring, perhaps, of the elevated or poetic style, e. g.:

נָצַר *to guard,* נָטַר poetic; בְּרוֹשׁ *cypress,* בְּרוֹת once in poetry; סָגַר *to shut,* rarely סָכַר; סְעָרָה *storm,* שַׂעֲרָה rare and poetic; סָכַךְ *to cover,* once שָׂכַךְ; דָּעַךְ *to be quenched,* once זָעַךְ; תָּעַב *to abhor,* once תָּאַב; סָכַל *to be foolish,* once בָּסַל; עַוְלָה *iniquity,* once בַּלָּוָה.

2. Of antiquity: The pronunciation of a word or its form may undergo changes in the lapse of time. Of the few instances of this sort, which our imperfect data enable us to fix upon with some measure of confidence, the following may be taken as specimens, e. g.:

To laugh in the Pentateuch צָחַק, in other books (Judg. 16: 25 excepted) שָׂחַק; *to cry out* in the Pentateuch צָעַק, only once (Ex. 2: 23) זָעַק which is the more frequent form in other books; כֶּבֶשׂ, כֶּשֶׂב *a lamb,* occur in the Pentateuch interchangeably with כִּבְשָׂה, כַּבְשָׂה, which are the only forms found in other books; *a sceptre* שֵׁבֶט, but in the book of Esther שַׁרְבִיט; *Damascus* דַּמֶּשֶׂק, in Chronicles דַּרְמֶשֶׂק; *how* 1 Chron. 13: 12, Dan. 10: 17 אֵיךְ, in earlier books הֵיךְ.

3. Of Dialect: The same word may come to be pronounced differently by those who speak distinct though related languages. Thus, the cognate dialects,

particularly the Biblical Aramæan and Syriac, in very many words regularly substitute א for the Hebrew final ה, and the corresponding linguals for the Hebrew sibilants, צ being sometimes still further weakened by the loss even of the lingual sound to that of the guttural ע, e. g.:

Heb. תָּעָה *to wander*, Aram. טְעָא, Syr. ܛܥܐ; Heb. זָהָב *gold*, Aram. דְּהַב, Syr. ܕܗܒ; Heb. צוּר *a rock*, Aram. טוּר, Syr. ܛܘܪ; Heb. שָׁלֹשׁ *three*, Aram. תְּלָת, Syr. ܬܠܬ, Arab. ثَلَاثٌ; Heb. אֶרֶץ *the earth*, Arab. أَرْضٌ, Aram. אַרְעָא, Syr. ܐܪܥܐ. Other consonant changes: Heb. בֵּן *a son*, Arab. إِبْنٌ, Aram. בַּר, Syr. ܒܪ; Heb. קָטַל *to kill*, Arab. قَتَلَ; Heb. יָקַל, Syr. ܩܠ; Heb. כִּסֵּא *a throne*, Aram. כּוּרְסְיָא, Syr. ܟܘܪܣܝܐ, Arab. كُرْسِيٌّ; Heb. חֶלְקָה *a field*, Aram. חַקְלָא, Syr. ܚܩܠܐ, Eth. ሐቅል፡.

4. Of simple euphony: An alternate form of a word may be produced to facilitate its pronunciation or make its sound more pleasing, e. g.:

אַרְגָּוָן, אַרְגְּוָן *purple;* שָׂטַם, שָׂנֵא *to hate;* לִשְׁכָּה, נְשְׁכָּה *chamber;* עָכָר, עָכָן *Achan;* נְבוּכַדְרֶאצַּר, נְבוּכַדְנֶאצַּר *Nebuchadnezzar;* דּוֹאֵג, דּוֹעֵג *Doeg;* אַלְגֻּמִּים, אַלְמֻגִּים *almug* or *algum trees;* מַלְתָּעוֹת, מַרְתָּעוֹת *teeth.*

a. Mere varieties of orthography must not be mistaken for consonantal changes, e. g. לֹא occasionally for לוֹ and *vice versâ*, probably שִׁבְלוֹת for סִבְלוֹת, and such permutations of gutturals as abound in the manuscripts of the Samaritans, who, making no distinction in the sounds of these letters, perpetually confounded them in writing, Gesen. Sam. Pent. p. 52. A like faulty pronunciation has been attributed to the Galileans, to which there is a probable allusion in Matt. 26: 73. Buxtorf Lex. Chald. p. 434.

§ 52. The changes thus far described result in the production of distinct words, and belong to the domain of the lexicon rather than of the grammar. The lexicographer regards such words as cognate, and traces them back to their common source; but, in the view of the grammarian, they are totally distinct. The mutations with which the latter concerns himself are such as take place in the direct derivation and inflection of words. These are altogether euphonic, are more restricted in

their character, and take place within far narrower limits, than those heretofore considered. When words are subjected to grammatical changes their sounds are brought into new connections, attended, it may be, with a difficulty of utterance which demands some measure of relief, or they pass readily and naturally into other sounds, which are easier of pronunciation or more agreeable to the ear. The mutations thus induced are of three sorts, viz.: Consonant Changes, the Conversion of Consonants into Vowels, and Vowel Changes. These will require to be considered separately.

Consonant Changes.

§ 53. The first class of changes embraces those which affect the consonants. These mostly arise from the concurrence of two consonants, creating a difficulty in the pronunciation or yielding a sound displeasing to the ear. This may take place either at the beginning or the close of a syllable. Syllables in Hebrew may, and often do, begin with two consonants, § 18. 1; but the necessity of this is avoided in certain cases by the following expedients:

1. In the beginning of words the weak letter ה is sometimes prefixed with a short vowel, thus creating a new initial syllable to which the first consonant may be transferred.

a. The only instances of this are afforded by the second and seventh conjugations of verbs, the Niphal and Hithpael, e. g. הִקָּטֵל=הִנָּקְטֵל for נִקְטַל; הִתְקַטֵּל probably for תִּתְקַטֵּל comp. Arab. *takattala*. In אֶהָדֵשׁ Ezek. 14:3 א is prefixed instead of ה. Prosthesis is more common in the domain of the lexicon, where א is always the letter used, e. g. אֶזְרוֹעַ, זְרוֹעַ *arm;* אֶתְמוֹל, הֶמּוֹל *yesterday*. A prefixed אָ is even occasionally employed to soften the pronunciation without the necessity stated above, e. g. אֲבַטִּחִים, אֲגַמִּים, אֲרַכְבִּים, אֲזַקִּים. So in Chaldee אָדָם *blood*, Heb. דָּם; אָגַן *garden*, Heb. גַּן. In Arabic the concurrence of two consonants at the beginning of a word is regularly obviated by prefixing ا. Comp. Greek χθές, ἐχθές.

2. The first of the concurrent consonants, if it has a comparatively feeble sound, is sometimes dropped.

a. This occurs regularly in verbs whose first radical is נ or י, and in nouns derived from such verbs, e. g. שֵׁב for יָשַׁב, הֶלֶךְ for הָלַךְ, בּוֹל for יָבוּל, תֵּן for נָתַן, הַ֫ Ezek. 2: 10 for הָנָה, חַשְׁמַל Ezek. 1: 4 for חַשְׁמַל, and perhaps בָּאֹר Am. 8: 8 for כְּיִאֹר.

א is thus dropped in נְחְנוּ for אֲנַחְנוּ, שֶׁ for אֲשֶׁר; also in a few instances from the beginning of the second syllable of words, e. g. יָאבְדָךְ Ezek. 28: 16 for יָאַבְדָךְ; אָזֹן Job 32: 11 for אַאֲזִין; הֶסוֹלִים Eccl. 4: 14 for הָאֶסוֹלִים; הָרְמֹלִים 2 Chron. 22: 5 for הָאֲרַמִּים; בָּסֹרֶת Ezek. 20: 37 for בַּאֲסוֹרֶת; אֶהֱב Prov. 8: 17 for אֹאֱהָב; בִּזֹּן Prov. 17: 4 for בְּאָזְן; שֶׁלָּהּ 1 Sam. 1: 17 for שְׁאֵלָתְךָ. These examples likewise admit of a different explanation; א may give up its consonantal power, losing its sound in that of the preceding vowel, agreeably to § 57. 2 (2), after which it may readily be dropped altogether.

מ is occasionally dropped from the participles of the Pual or fourth conjugation, as לֻקָּח for מְלֻקָּח; ל in קַח for לָקַח; ה in כַּבֹּת Ex. 3: 2 for הַלְהַבֹת; לֻבֵּשׁ Ex. 7: 22 for הַלְהַטֵּיהֶם Ex. 7: 11; and perhaps כ in סוּתָה Gen. 49: 11, which appears to be for כְּסוּתָה.

b. The rejection of a consonant from the beginning of a syllable, when not immediately followed by another consonant, is exceptional; as לַד Judg. 9: 11 for יָלַד; הֹתָה 2 Sam. 22: 41 for נָתַהּ; חַד Ezek. 33: 30 for צַחַד; חֻשְׁפוֹת Neh. 3: 13 for הַחֲשַׁפּוֹת; הֶחֱלַלְתִּי Judg. 9: 9 for הֶהֱחַלַלְתִּי, and perhaps שׁוֹב Jer. 42: 10, which seems to be for יָשׁוֹב.

3. The second consonant is sometimes dropped, if it is a letter of feeble sound.

a. This is regularly the case with ה of the article and of verbal prefixes, and י as the final radical of verbs, e. g. לַבַּיִת for לְהַבַּיִת; יִקְטֹל for יְהַקְטֵל; גָּלוֹ for גָּלְיוֹ.

It occurs besides in a few sporadic examples with these same letters, and more rarely still with א, ו, and נ, e. g. זִ for זֶהוּ; נִ Ezek. 2: 10 for נְהִי; יִשְׁבָּם for יַהְשְׁכֵּם, and יַקְבֵּלוּ for יַהְקְבֵּלוּ with Daghesh-forte conservative for יַהְקַבֵּלוּ and קַבַּלְתּוּ; נַהּ Lam. 3: 53 for נַיַּדּוּ, חֵיוֹלֶךָ Gen. 3: 16 for חֵילֶךָ; מַבַּפּוּ Job 35: 11 for מַאַבְּפֵנוּ; תִּמִּים Ex. 26: 24 for תְּאֹמִים; תַּחֹל Isa. 13: 20 for יַאֲהֹל, וַתַּזֹּלֵנִי 2 Sam 22: 40 for וַתְּאַזְּרֵנִי; פִּי Isa. 3: 24 for עֲיִי, בְּוֹר for עֲיִים, וַיָּמִים for וַיְעִים; בִּ as a particle of entreaty, probably for נִשְׁקָה, בְּעִי Am. 8: 8 (K'thibh) for נְשִׁקָּה; בֵּל the name of a Babylonish deity for בָּעַל is a foreign contraction. The conjecture that בְּנִי Mic. 1: 10 is for בְּעַכּוֹ *in Accho* is ingenious and favoured by the occurrence of בְּגַת *in Gath* in the parallel clause; but it is at variance with the points, which, upon this hypothesis, should be בְּעִי.

b. In rare cases this rejection occurs even after a mixed syllable, whose final consonant is thus drawn forward, e. g. אָנָּה for אָנַהּ, חֲנָה Job 29: 6

for חֲכְאָח, הֲכַבֵּב Ex. 2: 4 for תִּתְכַּבֵּב and probably אֶפֵּק Ps. 139: 8 with Dagheshforte conservative for אֶכֵּלֵּק.

§ 54. When the concurrence takes place at the close of a syllable, whether the second consonant belongs to the same syllable with the first as at the end of words, or to a different syllable as in the middle of words, the following changes may be produced.

1. An aspirate following another consonant loses its aspiration, § 21; or if it be brought into juxtaposition with its like so as to form a doubled letter, the aspiration of both will be removed, § 23. 2, unless the combination occurs at the end of a word, where the reduplication is not expressed, § 25. Thus, בַּתְּ for בַּתְּתָּ, הִתְמַמְּם for הִתְתַּמֵּם, לְבֶבֶּךָ for לְבָבְךָ, but רַב from רָבַב, מְשֻׁלַּחַת 1 Kin. 1: 15 for מְשֻׁלַּחַתְּ, בְּיָחֲבַת Ezek. 4: 3 for בְּיָחֲבָתָּת, בְּיָשֻׁחַת Mal. 1: 14 for בְּיָשְׁחַתְתָּ.

2. The first of two concurring consonants is in certain cases assimilated to the second, the doubling thus occasioned being expressed as in the case of letters originally alike by Dagheshforte, except at the end of words, § 25, where Dagheshforte disappears or is only virtually present, being resumed upon the addition of a fresh vowel or syllable. This is most frequently the case with the liquid נ, rarely with ל and ר and only in particular words; so ת of the Hithpael of verbs before ד and ט, and in a few instances before sibilant and other letters, and ד at the end of a few words before ת. Thus, יִתֵּן for יִנְתֵּן, בַּתָּת for בַּנְתָּת; יַקַּח for יִלְקַח, כַּפָּה Ezek. 27: 23 for כַּלָּה Am. 6: 2; שֶׁלִּי for לִי אֲשֶׁר; יִתַּכְּאוּ for יִתְדַּכְּאוּ, יִתַּמְּאוּ for יִתְטַמְּאוּ, הִתְזַפּוּ for הִתְזַפְּפוּ, תִּשֻּׁרֵם for תִּתְשֹׁרֵם, תִּתְחַשְּׁרֵם, הִתְנַבְּאוּ for הִתְתַּנְּבְאוּ, תִּתַּנָּה for תִּתְנַבָּה; לַת for לַדְתָּ, אַחַת for אַחַדְתָּ.

a. So perhaps ב in בָּמָּה according to Gesenius for מִבְמָה and בַּס for בַּכְּסֵא. Compare Greek *συγγενής* for *συνγενής*, *τέτυμμαι* for *τέτυπμαι*, and Eng. *il-logical*, *ir-religion*, *im-mature* formed by the negative prefix *in*.

3. A few isolated cases occur of the reverse process more common in Biblical Aramæic and Syriac, by which a doubled letter is resolved into two different consonants by the change of the first or the second member of the reduplication to a liquid ר or נ, e. g. בִּרְבָּל for בִּבְבָל, דִּרְדֶּשֶׁק for דִּמֶּשֶׂק, עֲרָגְלָתָה for עֲגָלָתָה Isa. 23: 11 for מְעֻזֹּתָהּ, קְנָצֵי Job 18: 2 in the judgment of some for קְצֵי *ends*, though others make the נ a radical, and give the word the sense of *snares*. The conjecture that תַּבְנִית Ps. 64: 7, Lam. 3: 22 is for תַּמּוּת is unnecessary and unwarranted.

4. When ת of the Hithpael of verbs would stand before a sibilant, it is transposed with ס and ש, and with צ it is in addition changed to ט. Thus, יִסְתַּתֵּר for מִתְסַתֵּר, יִשְׁתַּמֵּר for יִתְשַׁמֵּר, יִשְׁתָּעֵר for יִתְשָׁעֵר, יִצְטַדָּק for יִתְצַדָּק.

a. In הִתְשַׁלַּטְנָה Jer. 49: 3 the transposition does not take place in consequence of the number of similar letters which would thus be brought into proximity. In the cognate languages ת is likewise transposed with ז and changed to ד: thus, Aram. הִזְדַּמֵּן for הִתְזַמֵּן; so, also, in Syriac and Arabic. The only example of a Hebrew verb whose first letter is ז appearing in this conjugation is הִזָּבְּדוּ Isa. 1: 16, where ת is assimilated agreeably to 2. Compare with these transpositions the frequent Doric change of ζ (= δσ) into σδ, as *συρίσδω* for *συρίζω*.

§ 55. The occurrence of a consonant at the end of a word may, inasmuch as the succeeding word must necessarily begin with one, be regarded as an additional case of the concurrence of consonants. As the contact is less close, however, than when they meet in the same word, it is less fruitful of changes than in the cases already considered.

1. There are three instances in which it has been doubtfully conjectured that a final ן has been assimilated to a following initial ב; viz. יָשֻׁבוּם Isa. 35: 1 presumed to be for יָשֻׁבוּן: בְּדֵלִים Num. 3: 49 for פְּדִיֹן Ex. 21: 30, Ps. 49: 9; בָּם Gen. 28: 12.

a. Final consonants are in Sanskrit perpetually modified by the initial letter of the following word. But it is by no means clear that this is so in

Hebrew, even in the examples alleged, as the forms admit of a different explanation. See in regard to the first passage, Dr. Alexander's Commentary.

2. A few cases occur of the rejection of a letter, chiefly ן and ם, from the end of a word.

a. ן of the verbal endings ון and ין is almost always dropped, being only retained as an archaic or emphatic form, and chiefly at the end of a clause, e. g. יְדֹלֹון Deut. 8: 16, but mostly יְדֹלֹו; תְּכַבְּדוּן Gen. 32: 20, commonly תְּכַבְּדוּ; תֵּעָשֶׂין Ruth 3: 4, commonly תֵּעָשֶׂי. So, too, in some proper nouns, בָּגְדוֹן Zech. 12: 11, בָּגְדוֹ Josh. 12: 21; שֵׂילֹנִי, whose original ן is shown in the derivative שִׁלֹנִי and is perpetuated in the modern name *Seilûn*.

b. In like manner ם is rejected from the dual and plural terminations of nouns upon their entering into the close connection of the construct state with the following word, אָזְנֵי from אָזְנַיִם, פָּתֵי from פְּתָיִם.

c. If the feminine endings ת and ה have, as is probable, a common origin, this may be best explained by the assumption that ת is in many cases rejected from the termination, leaving only the vowel, though it is always retained when any addition is made to the word: thus, the construct state חָכְמַת, absolute חָכְמָה, but with a suffix חָכְמָתִי; קָנְאָה (comp. אָזְנַת Deut. 32: 36), קִנְאָתִי. It is to be observed here, that this phenomenon does not establish the possibility of an interchange between the consonants ת and ת, because ה in this case represents not *h* but the vowel *ā*.

§ 56. A few other changes remain to be mentioned which are due to special causes.

1. Nun is often inserted in certain forms of verbal suffixes to prevent the hiatus between two vowels, יַעַבְרֻנָהוּ Jer. 5: 22, or § 53. 3. *a* יַעַבְרֻנוּ Isa. 33: 21 for יַעַבְרֻהוּ, אֲרֹמְמֶנְהוּ Ex. 15: 2 for אֲרֹמְמֶהוּ. Comp. Gr. *ἀνόσιος* and the English indefinite article *an*.

2. Vav at the beginning of words is changed to י, e. g. יָעַד for וָעַד, יָלַד for וָלַד, יִקְטֹל for וְקָטַל. The only exceptions are the four words וָו, וָלָד Prov. 21: 8, וָלָד Gen. 11: 30, וֶלֶד 2 Sam. 6: 23 (K'ri), and the prefixes Vav Conjunctive and Vav Conversive.

3. Vav, though capable of being reduplicated, e. g. אַוֵּדָה is in most instances relieved from this necessity by the substitution of י, or by doubling the following letter in its stead, e. g. אֲקַוֵּם or אֲקוֹמֵם for אֲקַוֵּם.

a. In one instance after such a change of י to ו, a following י suffers the contrary change to י to prevent the triple recurrence of the same letter, אֲבָלֹוּךְ Isa. 16: 9 for אֲבָלֹיוּךְ.

4. Yodh before the plural termination ים is in a few cases changed to א to prevent the conjunction of like sounds, תְּלוּאִים Hos. 11: 7 for תְּלוּיִם Josh. 10: 26; עֲבוֹאִים Hos. 11: 8 for עֲבוֹיִם Gen. 10: 19; הוֹדָאִים from הוֹדָיִם; עֲבָאִים (also עֲבָאוֹת) for עֲבָיִים; בְּלוֹאֵי Jer. 38: 12 for בְּלוֹיֵי (or as some read, בִּלְוֵי) ver. 11.

a. In like manner י is changed to א before וֹת in the word נְאוֹת for נְוֹת from נָוֶה; it is consequently unnecessary to assume, as Gesenius does, a singular נָאָה which never occurs.

Change of Consonants to Vowels.

§ 57. The second class of changes is the conversion of consonants into vowels, or the substitution of the latter for the former. This occurs,

1. Occasionally in reduplicated syllables or letters, כּוֹכָב for כַּכָּב; טוֹטָפוֹת for טַטָּפוֹת; בָּבֶל for בִּלְבֶּל Gen. 11: 9; צֵלָחוֹת 2 Chron. 35: 13 from צַלַּחַת Prov. 19: 24.

2. Much more frequently with the quiescents.

(1) A prefixed וְ is softened to its homogeneous vowel *ū* before other labials or vowelless letters, e. g. וּבִית, וּדְבַר; the softening of an initial י to *ī* only occurs in אִישַׁי 1 Chron. 2: 13 for יִשַׁי ver. 12, אִשׁ 2 Sam. 14: 19, Mic. 6: 10 for יֵשׁ.

(2) Medial or final quiescents without vowels of their own often lose their sound in that of a preceding vowel. This is invariably the case with ו and י following their homogeneous vowels, e. g. הוֹלַד for חָוְלַד § 59, בֵּיהוּדָה for בְּיִהוּדָה, unless they are doubled, as מְיַשְּׁבֵי, בָּיָּה, and occasionally even then, e. g. בֵּיתֵי for בְּיִתֵי. Final א always, and medial א frequently, gives up its consonant sound after any vowel whatever, e. g. בָּנָא, בָּנוּ, מִצֵּאת for מִצֵּאת.

a. Medial א regularly loses its consonantal power in the future Kal of Pe Aleph verbs, e. g. יֹאכַל; in אֱמֹר preceded by ל, thus לֵאמֹר; in אֱלֹהִים and certain forms of אָדוֹן preceded by the prefixes ו, כ, ל, ב thus, לֵאלֹהִים, כֵּאלֹהִים but בֵּאלֹהֵי; לֵאדֹנָי, כַּאדֹנָי but בַּאדֹנֵי, לַאדֹנֵי. The following examples are of a more individual character, e. g. נָאֹה for נַאֲוָה, וַאֲצַוֶּה 1 Kin. 11: 39 for וָאֶעֱנֶה, וָאֲעַנֶּה Num. 11: 4, בָּאוּקִים Jer. 40: 1, בָּאסִּיתָ Isa. 14: 23. In a few cases this has led to a change of orthography, the א which is no longer heard being dropped, or another vowel letter substituted for it, e. g. יוֹבֵּל Ezek. 42: 5, and אוֹלִיל Hos. 11: 4 from אֱבַל, רְשִׁין Job 8: 8 for רְאשִׁין, רוֹשׁ Deut. 32: 32 for רֹאשׁ, and the examples cited § 53. 2, *a*.

b. The consonant ה never loses its sound in that of a preceding vowel like the rest of the quiescents. The letter ה is often used to denote a vowel, but if in any word it properly expresses a consonant this is never converted into a vowel, or *vice versâ*. The exceptions are apparent not real, as in the frequent abbreviation of the ending הָהּ in proper names to הָ, thus חִזְקָהוּ, חִזְקָה. The change here does not consist in the rejection of the vowel ו and the softening of the consonant ה, but the syllable הוּ is dropped, whereupon final Kamets is written by its appropriate vowel letter, § 11. 1, *a*, just as מִידָהוּ after the rejection of הוּ becomes מִידָה. So in those rare cases in which ה is substituted for the suffix ה, e. g. שִׁעָלָה Lev. 13: 4 for שְׁעָלָהּ. The proper name פְּדַהְאֵל Num. 34: 28 is derived not from פָּדָה but פָּדַה, a root of kindred meaning, of whose existence, though otherwise unattested, this word is itself a sufficient voucher.

(3) Medial א often gives its vowel to a preceding vowelless letter and rests in its sound; י occasionally does the same with a homogeneous vowel, when preceded by a vowelless prefix.

a. **Thus,** א: רָאשִׁים for רָאשִׁים, חַשָּׁאת for חַטָּאת; עֶאטְךָ Ezek. 25: 6 from שָׁאט ver. 1.; שָׁוּא 1's. 139: 20 for נָשְׂאוּ, so נָשׂוּא Jer. 10: 5; רֵאוּבֵן from רְאוּבֵן; בּוֹאֵם Neh. 6: 8 for בּוֹדְאָם; תּוֹא Isa. 51: 20, תְּאוֹ Deut. 14: 5; הִשְׁאִים 1 Sam. 14: 33 for חָטְאִים; כַּאבִּיר Isa. 10: 13 for כַּאֲבִיר; וַאֲשָׁר Zech. 11: 5 for וַאֲשָׁמְנוּ; this even occurs after mixed syllables, e. g. בְּלָאבָה for בְּלַאֲבָה; כַּלָּאבָה for לְקֹרַאת, particularly in proper nouns יְשָׁטָּאל for לְקָרַאת; נַזְאִרִין for נָזִיר, יְזַרְעֵאל, יְזַרְעֶאל for יִזְרְעֶאל, יְשַׁמְעֵאל for יִשְׁמָעֵאל. So, י: כְּיִתְלוֹן Eccles. 2: 13 for כִּיתְרוֹן; וְיִבְלַת Jer. 25: 36 for וְיִלְלַת; לְיִקְחַת Prov. 30: 17 for לְקִחַת. There is no instance of this with ו, on the contrary, קְיָצוֹת Cant. 5: 2, 12.

(4) At the end of words ו and י, when without a vowel of their own and preceded by a vowelless letter, invariably quiesce in their homogeneous vowels, ו in an unaccented *ū*, י in *ī*, which draws the accent upon itself and frequently causes the dissolution of a previous syllable and the rejection of its vowel, בֹּהוּ for בֹּהֶן, יִשְׁתַּחֲוֶה for יִשְׁתַּחֲוֶי; יְלוּ for יְלֶךְ, פְּרִי for פֶּרִי, דָּמִי for דָּמְיָ.

(5) When preceded or accompanied by heterogeneous vowels, ו and י are sometimes dropped, or if the vowel be *a*, they not unfrequently combine with it, forming the diphthongal *o* and *e*, § 62. 1, e. g. הוֹבִק for הָבִיא, גָּלֹה for גָּלוֹי, גָּלֵה for גָּלַי, קָם for קָוֹם, חֻקִּים for חֻקִּיִּים, בֵּית for בַּיִת; מָוֶת for מָוֶת; הוֹשִׁיב for הוֹשִׁיִב, נָדֹשׁ for נָדוֹשׁ, בֵּית construct state of בַּיִת, בֵּית const. of בַּיִת, הֵילִיל for הֵילִיל, יִגְלֵה for יִגְלַי.

a. Vav rarely remains with a heterogeneous vowel unless accompanied by weak letters, by contrast with which it becomes comparatively strong, e. g. רוּחַ, הָוָה, נִוֹּר.

Vowel Changes.

§ 58. 1. The third class of changes embraces those which take place in the vowels. The primary office of the vowels is to aid in pronouncing the consonants, to which consequently they are quite subordinate, merely occupying, so to speak, the interstices between them. Their number and variety being greater, however, than is demanded for this single purpose, they have besides to a certain extent an independent value and meaning of their own in the constitution of words. (1) Changes of vowels, while they cannot like a difference of consonants create distinct verbal roots, are yet fruitful of those minor modifications of which etymology takes cognizance, such as the formation of derivatives and grammatical inflexions, e. g. גָּדַל *to be great*, גֹּדֶל *greatness*, גָּדוֹל *great;* קָטַל *he killed*, קָטוֹל *to kill*, קְטֹל *kill thou*, קֹטֵל *killing*, קָטוּל *killed;* סוּס *a horse*, סוּסָה *a mare*. (2) They may indicate differences in the forms of words which have arisen in the lapse of time; יֶלֶד in the Pentateuch means indifferently *girl* or *boy*, in later books *girl* is יַלְדָּה; הוּא in the Pentateuch *he* or *she*, in other books *she* is always הִיא; the form of the demonstrative הַהֻוָּה is found only in Genesis, הַהִוֹּא in writers after the time of Moses, הַהִוֹּד in Ezekiel;

the plural of the demonstrative in the Pentateuch אֵל or אֵלֶּה, elsewhere, with a single exception, אֵלֶּה. The imperfect notation of the vowels in the original mode of writing by letters alone has, however, left us without the means of ascertaining to what extent such changes may have taken place. (3) They may indicate diversity of dialect, e. g. קָטַל *to kill,* Aram. קְטַל, Syr. ܩܛܰܠ, Arab. قَتَلَ, Ethiop. ቀተለ:.

2. The vowel changes with which orthography is concerned, on the other hand, are purely euphonic, being in themselves void of significance, and springing solely from the natural preference for what is easier of utterance or more agreeable to the ear. Orthographically considered, vowels are either mutable or immutable, the latter being unaffected by those circumstances which occasion changes in the former. A vowel may be immutable by nature, or made so by position. A short vowel in a mixed syllable before the accent is ordinarily immutable by position, being beyond the reach of the common causes of mutation, e. g. בִּדְבָר, בִּשְׂפָתַיִם. Long vowels are immutable by nature in certain words or classes of words; but they are only distinguishable as such by a knowledge of the etymological forms which require them. It may, however, be observed, as a general though not an invariable rule, that the vowels of such words and forms as are prevailingly written with the vowel letters are less liable to mutation than those which are prevailingly written without them. Mutable vowels are liable to changes both of quantity, from long to short, and the reverse, and of quality from pure to mixed (*u* to *o*, *i* to *e*, *a* to *ĕ*) and the reverse, these changes being confined, except in rare instances, to the cognate forms; thus, *i* never passes into *u* or *o*, nor these into *a*. Only as *ĕ* stands in relation to both *i* and *a*, it serves to mediate

the interval between them, and thus accounts for the occasional changes of *i* to *a* or the reverse, e. g. הַקְטִיל, הִקְטַלְתָּ; בַּת for בִּנְתִּ, בִּתִּי; דִּבְּכֶם, דָּם comp. דָּבְכֶם, דָּד.

a. The exceptional change from *u* or *o* to *e* occurs only in the pronouns, e. g. קַטַלְתֶּם, before suffixes קַטַלְתֶּ; and in the particle אֵת, before suffixes אֵת. There are also a few examples of the change of short vowels in mixed syllables before the accent, e. g. גֶּרְבָּה, construct גֶּרֶבֶת, plural גְּרָבַיִם.

§ 59. The mutations of vowels are due to one or other of the following causes, viz.: 1. Syllabic changes. 2. The influence of consonants. 3. The influence of vowels. 4. The accent. 5. The shortening or lengthening of words. As the vowel of unaccented mixed syllables is always short, and that of simple syllables long, § 18. 2, it is evident that a change in the character of a syllable will involve a corresponding change in its vowel, unless the accent interfere to prevent. Accordingly, when for any cause a mixed syllable becomes simple, its short vowel will be converted into a long one; and when a simple syllable becomes mixed, the reverse change will take place, e. g. חֲדָרִים, חָדָר; לָמָּה, לַמָּתָּ. In the case of the vowels *i* and *u* there is frequently an additional change of quality, viz., of *ĭ* to *ē* and *ŭ* to *ō*, e. g. הֵקִים for הֲקִימִים; פּוֹנַי for פִּנַּי in place of פָּנַי § 56. 3.

a. Daghesh-forte is thus resolved by the prolongation of the previous vowel in קָמוּשׁ, קְמוּשׁ; בִּילּוּשׁ, בְּלּוּשׁ; חֲמִישִׁי, חֲמֵשִׁי; בִּירִים, בֵּרוֹת; חֵקֶל, חֵיקוֹ; יוּכָלִים Eccles. 9: 12 for יָכָלִים § 53. 2. *a*; הֵהְפְּקוּ for נִהְפְּכָה; נִדָּה Lam. 1: 8, if this is for נְדָה see ver. 17; and if the conjecture of Gesenius (Thesaurus, p. 483) be correct as to the true reading in 1 Chron. 23: 6, 24: 3 וַחְלְקֵם for וַחְלְקֵם.

§ 60. Contiguous consonants may give rise to vowel changes by their individual peculiarities, as is the case with the gutturals, or by their concurrence. The peculiarities of the gutturals are fourfold, viz.:

1. A preference for the vowel Pattahh of the same organ, into which, consequently, a preceding or accom-

panying vowel is frequently converted, e. g. שֶׁלַּח for שְׁלָחָה; פַּעַם for פְּעָמָם; יִגְבַּהּ for יִגְבָּהּ; שִׁמַּע for שְׁמֹעַ; שִׁנַּאֲךָ for שִׁנְאָתְךָ from שִׂנְאָה.

a. The instances in which this permutation occurs cannot easily be embraced under any general rules. In some cases it was optional; in others, usage decides for it or against it without, however, being absolutely uniform. The following statements embrace what is of most importance. (1) The stability of the vowel often depends upon the weight attached to it in the etymological form; thus, שִׁבַּע in the imperative but not in the infinitive for שָׂבְעָה; רָצַּע for רָצְעָה, but שִׁבַּע not שָׂבַע for שָׂבְעָה. (2) The vowel preceding the guttural is more liable to change than that which succeeds it, e. g. יִשְׁלַּח always, but וְנִמְעַל and וְנִתַּן but וְנָתְנָה; וְנִבְרוּ but וְנִבְרְאוּ. (3) An accented vowel is sometimes retained where one unaccented would suffer change, e. g. רַחֲנוּ but נִרְחַם; נִרְחֵר. לָהֶם. (4) *O* and *u* are less subject to alteration than *i* and *e*, e. g. שָׂגַב for שָׂגֵב; *ā* which is already cognate with the gutturals is mostly retained, though it occasionally becomes *ă* before ר, e. g. אֲדֹם from אָדָם, מִבְטַח Job 31: 24 (in most copies) from מִבְטָח, רַמַּח from רָמְחָה. (5) א in many cases prefers the diphthongal vowels *e* and *o*, thus אֶקְטֹל, וְהִצְּאתִי, תֹּאסֵר but וַאֲסֹרִים; רֹאבֵל, נָבֵא. (6) ר partakes of this preference for *ă* to a limited extent, e. g. נָעַר for נָעָר or נַעַר; נִרְאָה from רָאָה.

2. The reception of Pattahh furtive, § 17, at the end of a word after a long heterogeneous vowel (i. e. any other than *ā*), or before a vowelless final consonant, e. g. רֵעַ, נִגְבַּהּ, נִהַּ, נִהַּת, נָגַעְתָּ.

a. This is necessary when the vowel preceding a final guttural cannot be converted into Pattahh. Sometimes the form with Pattahh and that with Pattahh furtive occur interchangeably, e. g. לְשַׁבַּח and לְשַׁבֵּחַ, or with a slight distinction, as אֲשַׁבַּח, in pause :אֲשַׁבֵּחַ; בְּזַבַּח, construct בִּזְבֵּחַ. In a few instances a guttural preceding a final vowelless letter takes simple Sh'va instead of Pattahh furtive, e. g. לָבַחְתְּ 1 Kin. 14: 3, and in most editions שָׁכַחְתְּ Jer. 13: 25. As final א is always either quiescent or otiant, it never receives Pattahh furtive. The letter ר never takes it unless it be in a single instance, and that in a penultimate syllable יִרְדֹּף Ps. 7: 6, which is probably to be read *yi^{a}rdōph;* though it might be pronounced *yirad'dōph,* which some conceive to be an anomalous form for יְרַדֵּף, after the analogy of יִצְחָק Gen. 21: 6, the compound Sh'va being lengthened into a vowel followed by euphonic Daghesh, as in the related words חַבּוּרָה Isa. 1: 6, and חֲבַלָּה Isa. 53: 5, while others adopt the explanation of the old Jewish Grammarians, that it is a peculiar combination of the Kal יִרְדֹּף and the Piel יְרַדֵּף.

3. A preference for compound rather than simple Sh'va, § 16. 3, whether silent or vocal, inasmuch as the

gutturals are more readily made audible at the beginning than at the close of a syllable, and the hiatus accompanying them assumes more of the complexion of a vowel than is usual with stronger consonants.

a. The gutturals occasionally retain simple Sh'va when silent. This is regularly done by a final radical ה, ח or ע, followed by a servile letter, e. g. וַתִּבְחָהּ, וַתִּלְעָנוּ, וַתִּשְׁמָהֶם, וַתִּשְׁמָהוּ, with few exceptions as וַתִּבְעָקֵהוּ Hos. 8: 2, וַתִּבְעָקֵהוּ Gen. 26: 29, הוֹקְעָנוּם 2 Sam. 21: 6. Other cases have more of a casual or sporadic character, and occur chiefly with the stronger gutturals ה and ח, וַתִּבְחָן, וַתִּחְמָה, וַתִּחְלָה, וַתִּחְבָּל, וַתִּהְחַשׁ, וַתִּחְבָּלִי but וַתִּשְׁבְּלִי, וַתִּחְבָּשׁ but וַתִּחְבְּשׁוּ, וַחֲלָה *a possession*, but וְחָלָה from נַחַל *a brook;* more rarely with א and ע, בְּעָלָם Lev. 4: 13, בְּעָשְׂא 1 Kin. 15: 16, בְּעָלָם Isa. 11: 15, שְׁעָרָה Deut. 25: 7 but in pause שְׂעֹרָה Isa. 28: 6, בְּאָהֳלֵי Ex. 15: 6; ר has for the most part simple Sh'va רִבִּית, יִגְרְשֵׁם, though in a few instances it has compound יִרְבַּדְתִּי, יִרְבַּדְתִּי.

b. (1) Among the compound Sh'vas the preference, unless there is some reason for choosing another, is ordinarily given to Hhateph Pattahh, as the simplest and most in accordance with the nature of the gutturals, and to this an antecedent Hhirik, when unessential to the form, is commonly made to correspond, e. g. יַעֲבֹד, יֶעֱבֹד for יִעְבֹּד. Sometimes, particularly with א (see 1. *a*. 5.) Hhateph Seghol is taken אֲכִלֵּת, אֲכִלָה, אֲבִדָה, אֲבִדַת, אֲבִדַּי, אֲבִדִּים, אֲלוּמִים, חֲרִיבֵם, עֲוִיתִּי, עֲוִיתֶם, עֲוִיתֶךָ Joel 2: 5, וְאֶחֱזֵךְ Jer. 13: 21, which not infrequently becomes Hhateph Pattahh upon the prolongation of the word אֲבִדֵי, אֲבָדֵךְ Prov. 25: 7, וְאַחֲזוּהוּ, אֲבִמֹּתִי Judg. 10: 2, or the carrying forward of its accent יִתְבַּרְכוּ, תִּתְבַּרְכִי, יִתְאַבְּדוּ, תִּאָבְדוּ, יִתְאַבְּדוּ.

(2) If, however, *ĭ* or *ŏ*, characteristic of the form, precede, this commonly determines the Sh'va to be selected, e. g. יֶחֱלַד for יֶחְלַד, יֶעֱבַד for יֶעְבַד, פֶּעֱלִי for פֶּעְלִי; though sometimes Hhateph Pattahh is retained and the intermediate syllable, § 18. 3, resolved into a simple one by prolonging the vowels, e. g. חֲבַלְתָּ Josh. 7: 7, הֲעָלָה פְּעָלִי Isa. 1: 31. Hhirik may, however, remain short, e. g. תְּחַלֵּךְ, יְשַׁחֵת Job 6: 22, particularly if a Daghesh-forte has been omitted from the guttural, e. g. נְאָצָה Jer. 3: 8, though even in this case the assimilation sometimes takes place, e. g. יֶחֱמֵּנִי Gen. 30: 39 for יֶחְמֵּנִי, אֶחֱרֵי Judg. 5: 28 for אֶחְרֵי. If a vowel has been rejected from the form, the corresponding Hhateph is generally preferred, e. g. עֲפָרִים from עֹפֶר, תְּשַׁחֲרִי, חֲדָשִׁים Ezek. 16: 33, רֵאִי Gen. 16: 13; חֲשַׁבְנִי 1 Kin. 13: 20 from חֲשִׁיבוֹ; חֲשַׁרְבוֹ Gen. 37: 22 from חֲשִׁירוֹ. There are occasional instances of the same word being variously written in this respect, e. g. אֲחֻזּוֹ Ruth 3: 15, אֶחֱזוֹ Cant. 2: 15; וַתַּאֲלֵהוּ and וַתַּאֲלֵהוּ Isa. 44: 13; הֲבִרְבָּרִי Job 16: 16 (K'ri in some copies), הֲבַרְבָּרִי Lam. 1: 20, הָאֲרִי Isa. 52: 14, הָאֲרִי 1 Sam. 28: 14.

c. Before another guttural the compound Sh'va is frequently replaced by the corresponding short vowel, e. g. הָאֲלָה for הֲאָלָה, הֶעֱדֹתִי for הֲעִידֹתִי, הָאֲחִיזָם for הַאֲחִיזֵם; and occasionally under א by a long vowel before other letters as well as gutturals, or by a short vowel with Daghesh, e. g.

אֶסֶר for אָסַר, עֶזוֹר for עָזַר, אֶבוּס for אָבַס, אֶרְחָתִי, אֶחָלִים for אֹחַלַּי. This disposition to render the gutturals more audible by the aid of a vowel is further shown by their attracting to themselves the vowel of another letter, particularly in triliteral monosyllables, e. g. זֶרֶד for זָרַד (זָרֵד), הֶשֶׁב, נֶעֱם, בֶּעֱט 2 Kin. 12: 9, בְּאֹשׁ for בָּאַשׁ, בֶּאֱר, also קָרְאוֹ Ex. 2: 20 for קָרָאן Ruth 1: 20, תְּאַהֲבוּ Prov. 1: 22 for תֶּאֱהַבוּ, תֶּאֱהַבְתִּי Job 20: 26 see § 111. 2. *e*, וְאֶסְעֲדֵם Zech. 7: 14 for וַיֶּאֱסְעֲדֵם, and by their sometimes causing an antecedent or accompanying vowel to be retained where analogy would require its rejection, e. g. מְוֻצָּאֵי for מְוֹצְאֵי from מוֹצָא, תֶּעֱבֹר, בַּעֲבֹר, וְנִעֲבְרָה Deut. 32: 10; תֶּעֱבַר, בֶּעֱבַר.

4. An incapacy for being doubled, whence they never receive Daghesh-forte, and the previous syllable thus becoming a simple one, its vowel is generally lengthened, § 59, *ă* to *ā*, *ĭ* to *ē*, *ŭ* to *ō*, e. g. בָּיְאָן for בִּיְאָן, בֵּיְאָן for בִּיְאָן, יְבָרֵךְ for יְבָרֵךְ, אֲדֹנִי, תְּעָזֵב.

a. Sometimes an intermediate syllable, § 18. 3, is formed, and the vowel remains short. (1) This is commonly the case before ח, frequently before ה, less often before ע, rarely before א, never before ר, e. g. נִחַם, נִאָץ, חֵלֵב, מַחַר, שֶׁחַת. (2) It is more likely to occur in the body of a word than after a prefix, e. g. יַחְלִיפוּ Ps. 119: 43 from חָלַף, but חֶלְפֵּק Job 38: 24 from חָלַק. (3) When the guttural comes to stand at the end of the word the short vowel is often resumed, e. g. תִּתְרַעַשׁ Prov. 22: 24 from תִּרְעַשׁ, תִּעְלַר Ps. 141: 8 from תֶּעֱרֶה but תִּתְעַבְּרוּ Deut. 2: 9. There are a very few instances in which Daghesh-forte is found in ר, e. g. בָּלַּת עָשְׂתֵךְ Ezek. 16: 4, בָּלַּת מַעֲנֶה־לַךְ Prov. 15: 1 (in some editions), שֶׁרְאַשֵּׁי Cant. 5: 2, see also § 24. *b*.

§ 61. The concurrence of consonants gives rise to the following vowel changes, viz.:

1. When two vowelless letters come together at the beginning of a syllable in contravention of the law in § 18, the impossible combination is relieved by giving to the first of them a short vowel. This, if there be no reason for preferring another, will be the briefest of the vowels, Hhirik, e. g. דִּבְרֵי for דְּבְרֵי, בִּרְכַת for בְּרְכַת, חִזְקוּ for חְזְקוּ. If a vowel has been omitted from the word, the corresponding short vowel is frequently employed, e. g. בִּלְבַד for בְּלְבַד from מִלְּךָ (מֶלֶךְ); מָלְכִי from מְלְכִי; חֶבֶל from חֶבְלְ; יְחִזְקֵךְ for יְחְזְקֵךְ from חָזַק. Or if one of the consonants be a guttural, the vowel mostly conforms to the compound Sh'va,

which it has or might have, e. g. עִבְרִי for עִבְרִי, וָחֹוקִי for וְחֹוקִי, וְחֹזְקִי for וְחֹזְקִי, לַחֲבֹר for לַחֲבֹר, בַּיְנֵלָה for בַּיְנֵלָה.

a. Vav before a guttural follows the rule just given; before י, and sometimes before ה or ח followed by י, it takes Hhirik; before other vowelless letters it gives up its consonant sound and quiesces in its homogeneous vowel Shurek, § 57. 2. (1), thus וַיַּעַבְדוּ, וַיִּתֵּן, וְהִיא and וְחַיָּה, וּלְבַב, וְזַהַב.

b. In triliteral monosyllables or final syllables with the vowel Pattahh, the first letter sometimes receives an accented Seghol, to which the following Pattahh is then assimilated, e. g. בֶּטֶן for בֶּטֶן construct of בֶּטֶן, נַעֲלֶת for נַעֲלַת, the Seghols being liable to be changed to Pattahhs by the presence of a guttural מִשְׁפַּחַת for מִשְׁפַּחַת.

c. In וַיִּשְׁאַבֵּם Gen. 32: 20 for וַיִּשְׁאַבֵּם the vowelless letters belong to different syllables, and the introduction of the new vowel makes it necessary to lengthen the one before it.

2. Although two vowelless letters are admissible at the end of a word, § 18, the harshness of the combination is commonly relieved by the insertion of Seghol, e. g. לֵךְ for לֵךְ, יֶרֶךְ for יֶרֶךְ, לֶכְתְּ for לֶכְתְּ. If either letter is a guttural, Pattahh is mostly used instead, e. g. גֹּבַהּ, בֹּעַל, יָדַעַן. If either letter is י, its homogeneous vowel Hhirik is used; if the second letter is ו, it will rest in Shurek, § 57. 2. (4.), e. g. בַּיִת, פָּלִי, תֹּהוּ, but בָּיִת.

a. The only instances in which two vowelless consonants concur at the end of a word are the pron. אַתְּ, the 2 fem. sing. pret. of verbs קָטַלְתְּ, certain jussive and Vav Conversive forms of ל״ה verbs §§ 174. 4, 177. 3, תֹּוסֶף § 153. 2, the nouns נֵרְדְּ, קִשְׁטְּ and forms with otiant Aleph.

b. When the penultimate letter is ה or ח, it in a few instances takes Seghol, as אֶהֱל, בֶּהֱן, לֶהֱם, רֶחֱם. When the final letter is א, it either remains otiant, § 16. 1, or requires Seghol, שֶׂרֶא, נִרְאֶא, לִבְרֶא, בָּרֶא; a penultimate א either quiesces in the antecedent vowel or attracts it to itself, § 60. 3. *c*, נִרְאֵת, שָׂאֵת or רֹאשׁ, שֵׂאֵת. The alternate mode of facilitating the pronunciation of gutturals before a vowelless letter at the end of a word by means of Pattahh furtive, has been explained § 60. 2.

3. When the same letter is repeated with or without a mutable vowel intervening, there is often a contraction into one doubled letter, and the vowel is rejected or thrown back upon the preceding consonant, e. g. יְסַבֵּב for יְסַבֵּב, יָסֹב for יָסֹב (Daghesh-forte disappearing at the end of the word), לֵב for לֵבָב, יְכוֹנֲנֵהוּ Job 31: 15 for יְכוֹנְנֵהוּ

(see 4. below); if another consonant immediately follow the contracted letters, a diphthongal vowel ֵי or וֹ may be inserted to render the reduplication more audible and prevent the concurrence of three consonants, סַבּוֹתִי, תְּסֻבֵּינָה.

4. In accented syllables the diphthongal vowels *e* and *o* are employed before two consonants or a doubled consonant in preference to the pure *ī* and *ū*, e. g. תָּשִׁיב, תָּשֻׁבְנָה; קוּם, קָמְנָה; תַּקְטִיל, תַּקְטֵלְנָה, so הָסֵבִּי, קְשֹׁט, וּבְךְ. This is still the case when at the end of a word an auxiliary Seghol or Pattahh has been inserted between the letters (according to 2.), e. g. וַנֵּצֶן, סֹבֵּב, פֹּעַל. מֵינֶקֶת from מֵינִיק, or the reduplication of the doubled letter is no longer heard and the Daghesh-forte does not appear, § 25, e. g. הֻקְטַל comp. הָקְטַל.

a. The vowel *ē* is in like circumstances often reduced to one of its constituents *a*, e. g. תַּלְבֶּנָה from תֶּלְבֶּנָה, תַּנְבֵּרְנָה, תַּסְבִּי, and occasionally to its other constituent *i*, e. g. תִּתְקַדַּשְׁתֶּם from תְּתַקַּדְּשׁוּ, וְנִשְׁתֶּם from וְנֵשְׁתֶּם. In קִטַּלְתִּי from קָטַל and חִקְטַלְתִּי from חָקְטַל, *a* is the original vowel of the second syllable, of which *ē* and *ī* are modifications. The only example of Shurek in a Segholate form is תְּשׁוּבָה Lev. 5: 21.

5. In unaccented syllables *ĭ* and *ŭ* are preferred to *ĕ* and *ŏ* before doubled letters, אִתִּי, אִתִּי; תִּתִּי, תִּתִּי; חֻסְבָּה from חֹסֶב; וְנֻסְבִּי, וְסֻבִּי; בֻּקְטַל comp. בָּקְטַל, חֻקִּי, חָקִּי, though such forms as חֲגֵרִי, עֲזוּבָה, כַּלַּת, מָלְאָה likewise occur; so עֲזוּבַי but עֲזֻבֵי.

6. A vowel is occasionally given to a final consonant to soften the termination of the word, and make the transition easier to the initial consonant of that which follows; thus, לַיְלָה, לַיִל; גַּבְלָתָה for גַּבַּת; חֲמָה, חֵם; אֵלָה, אֵל; אֲנָה, אַי; הֲבָלָה, הֶבֶל; מַגְבִּיהַּ, מַגְבִּיהַ; חַיַּת, חַיְתוֹ; כְּשָׁבוֹ Ex. 15: 10; כַּסְלֵמוֹ Ex. 15: 5.

a. These paragogic vowels have established themselves in the current forms of certain words, as לַיְלָה, חֲמָה, אֲנָה, אֵלִי, אֲבִי, אֲחִי, אֲבִי. But, with these exceptions, they are chiefly found in poetry. The vowels ֵי and וֹ are mostly attached to words in what is called the construct state, ה to words

in the absolute; and all of them to the feminine ending ת. Examples of בֹּגֵד Num. 23: 18, 24: 3, 15, חֹדֵשׁ several times, עֹשֵׂנִי Ps. 114: 8. Examples of י: אֹהֲבַתִּי Hos. 10: 11, אֹכְלִי Gen. 49: 11, בֹּגְדִי ibid., מְנַכְּלִי Gen. 31: 39, הַבָּתְחִי Ps. 110: 4, חֹפְפִי Ps. 114: 8, יֹשְׁבִי Ps. 123: 1, מַעֲבִירִי Ps. 113: 5, מַשְׁפִּילִי ver. 6, מְקִימִי ver. 7, הַמְשִׁיבִי ver. 8, מְיַשֵּׁבִי ver. 9, מְלַאֲתִי Isa. 1: 21, נֹאַלְתִּי Ex. 15: 6, עֹזְבִי Zech. 11: 17, רַפְּתִי Lam. 1: 1, שָׁלְחִי ibid., שָׁכְנִי Deut. 33: 16. It is also attached to the first member of the compound in many proper names, e. g. בִּלְדַּד, גַּבְרִיאֵל, to certain particles, as בִּלְתִּי, זִלְתִּי, כִּי, and perhaps to such participial forms as רַכְּבִי Jer. 22: 23. Of ה: אַרְבֶּה Ex. 15: 16, אַרְצָה Isa. 8: 23, Job 34: 13, 37: 12, חַדְשָׁה Judg. 14: 18, רַעֲלָה Ps. 3: 3, 80: 3, Jon. 2: 10, לַיְלָה almost constantly, לָוְתָה Ps. 116: 15, נַחְלָה Num. 34: 5, Ps. 124: 4, עֵילָה Ps. 92: 16 (K'ri), 125: 3, Ezek. 28: 15, Hos. 10: 13, עֲלָה Job 5: 16, עֻזָּה Ps. 44: 27, 63: 8, 94: 17, עֲבָטָה Job 10: 22, תַּגְלָה Josh. 19: 43, Judg. 14: 1, and regularly in the third person feminine of the preterite of ל״ה verbs. In modern Persian ī is similarly appended to nouns in close connection with a following word, to remove the obstruction of the final consonant and serve as a uniting link. And in Hebrew they seem to be traces of forms once current but which became obsolete § 201. *e*.

§ 62. The changes due to the influence of vowels may arise from their concurrence or proximity.

1. Concurring vowels may coalesce; *a* uniting with *a* forms *a*, uniting with *i* or *u* it forms the diphthongal *e* or *o*, e. g. הָאֲשְׁפוֹת Neh. 3: 13 from הָאֲשְׁפּוֹת after the rejection of א by § 53. 2. *b*; בַּיִת after the softening of ּ to *i* becomes בִּית; קְטָלָהוּ by the rejection of ה becomes קְטָלוֹ; יְהוֹ prefixed to proper names is from יְהוָ for יַהְוֶ, § 57. 2 (4), an abbreviation of יְהוָה, § 47.

2. One of them may be hardened into its corresponding semi-vowel: *ī* ִי with *ī* ִי may form *ī* ִי, or the first *ī* may be changed to *ǐy*, which, upon the reduplication of the י to preserve the brevity of the antecedent vowel, § 24. 3, becomes ִיי, e. g. עִבְרִי with ים becomes עִבְרִיִּים or עִבְרִיִּם. So, ִי before ה forms ֶה, and before ו forms וֹ, e. g. עִבְרָה, עִבְרוֹת; in like manner ּו is changed before ו into *ŭv*, forming וּ, which, by § 56. 3, becomes וֹ, e. g. בִּלְבֻּלוֹת, by the substitution of וֹת for ת, בִּלְבֻּלוֹת. *Ī* ִי followed by *ū* ּו forms *ūv*, קְטָלְתִּיו, קְטָלְתִּיהוּ; בֵּיתוֹ, בֵּיתוֹ: הֲבִיאֹתוֹ for הֲבִיאֹתִיהוּ Josh. 14: 8. *Ē* ֵי before *ī* ִי or *ū* ּו is resolved

into *ăy*, which, joined with the appropriate semi-vowels, becomes ◌ֵי and ◌ָיו, the virtual reduplication of the final consonant in the one case preserving the short vowel, which is lengthened in the other; thus סוּסִי with ◌ָי becomes סוּסַי, and with דּוֹדִי, סוּסָיו. The same resolution of ◌ֵי occurs before final דְּ, forming ◌ַיִךְ, and by § 61. 2 ◌ַיִךְ, thus נְעוּרַיִךְ with דְּ becomes נְעוּרָיִךְ.

a. Grammarians have disputed whether in such words as עִבְרִיִּים, מַלְכֻיּוֹת the point in י is Daghesh-forte or Mappik, § 26, and accordingly whether they are to be read *ibhriyyīm, malkhuyyōth*, or *ibhrīyīm, malkhūyōth*. If the explanation given above be correct, it is Daghesh-forte Conservative. Comp. חַיִּים, קַיִּם.

b. Such forms as פְּרִי, פְּרֵיוֹ, פְּרָיִם from פְּרִי are only apparent exceptions to the above rules. The word is properly פִּרְיִ, and to this the additions are made, the auxiliary Hhirik being dropped with the cessation of the cause from which it originated, § 57. 2. (4). In עַרְבִיאִים 2 Chron. 17: 11 from עֲרָבִי and ◌ִים the vowels are kept separate by an interposed א.

c. In words of ל״ה formation, such as עֲשָׂה, עֲשֹׂה, עֲשִׂים from עֲשֵׂה and ◌ָה, ◌וֹ, ◌ִים, it might appear as though one vowel were rejected before another. But the correct explanation is that ה is the true final radical, and the forms above given are for עֲשָׂיָה, עֲשָׂיוֹ, עֲשִׂיִים (like כְּכָלִים) from which ה is rejected by § 53. 3. In the same way עֹשֶׂךָ, עֲשֶׂיךָ, etc., from עֲשֵׂה are for עֲשָׂיְךָ, עֲשָׂיִךְ. In such alternate forms as פְּרִיָּה from פֶּרֶה, the radical ה is retained by preserving the antecedent vowel, which, before Daghesh-forte Conservative, becomes Hhirik, § 61. 5.

§ 63. The following euphonic changes are attributable to the proximity of vowels, viz.:

1. Pattahh before a guttural is often changed to Seghol if another *a* follows, and the same change sometimes occurs after a guttural if another *a* precedes.

The particular cases are the following:

a. When (◌ַ) stands before a guttural with (◌ָ) always before ח, e. g. הֶחָגִ for הַחָגִ, מִבְטֶחָה Prov. 21: 22, הֶחָכָם, הֶחְגַּחְתִּי (also when ח has Hhateph Kamets, e. g. הֶחֳלַלְתִּי, הֶחֳדָשִׁים Judg. 9: 9), often before ה and ע, particularly if it receives the secondary accent, e. g. הֶהָרִים for הָהָרִים, לֶהָבָה but לְהָבֹת, הֶהֱרוּ; הֶחֱשָׁה, חֶטְעָה, רarely before א and ר, הֶרָה Gen. 14 10, נֶאֱצוֹת Neh. 9: 18, 26 but נְאָצוֹתֶיךָ Ezek. 35: 12.

b. When (◌ַ) before a guttural is followed by another consonant with (◌ַ) or (◌ָ) יֶחֱלַם, יֶחֱלוֹ but יֶחֱלָמוּ, נֶחְבָּא but נֶחְבֵּאתָ, נֶחֱשָׁא, once before the liquid ל, e. g. אֶבְלָךְ Ex. 33: 3 for אֶבְכָּה, and once before נ, e. g. לֶחֱנָנָה for לְחַנָּנָה.

c. In יָאֲחָזָאֵהוּ 1 Sam. 28: 15 and the combination עֵילָם וְעַד a similar change takes place after a guttural to prevent the repetition of the vowel *ā*; so in יְרַשְׁתָּה Ps. 20: 4, and אָנֹה אָנָּה after the liquid נ.

2. Pattahh is sometimes assimilated to a following Seghol, or to a preceding Kamets or Tsere.

a. The assimilation to (ֶ) takes place regularly in what are called Segholate forms, in which an auxiliary Seghol has by § 61. 2 been introduced between two vowelless letters, מַלְכָּה for מַלְכָּה, לֶחֶם for לֶחֶם, אֶרֶץ for אֶרֶץ, but בֹּרֶת, פַּעַם; only before י, which can combine with *a* and not with *e*, *a* is retained and lengthened to (ָ) by § 59, אָיֵהּ, הָיָה. Rarely in other cases יַדֶּבֶם for יַדָּבֶם, where the change is facilitated by the preceding י.

b. The assimilation to (ָ) occurs in a few cases after a guttural with הַ prefixed, e. g. הָעֵב for הַעֵב, הָהָר for הַהָר; and in אָרֶץ (from אַרְעָא) uniformly after Kamets הָאָרֶץ, בָּאָרֶץ, לָאָרֶץ.

c. The assimilation to (ֻ) occurs in the Kal future of Pe Yodh verbs where the alternate forms are יֵשֵׁב and יֵרֵד.

§ 64. The following vowel changes are due to the accent, viz.:

1. If a long vowel in a mixed syllable be deprived of its accent, it will be shortened, § 18, e. g. הַשָּׁמַיִם, הַשָּׁמָיִם; וַיָּסָב, וַיָּסָב; וַיָּשֶׂם, וַיָּשֶׂם; וַיַּעֲזֹב, וַיַּעֲזֹב.

a. If a vowel preceding Makkeph is incapable of being shortened, it will receive the secondary accent Methegh, agreeably to § 43.

2. The accent prefers to be immediately preceded by a simple syllable and a long vowel. Accordingly an antecedent vowelless letter often receives what may be called a pretonic vowel. This is commonly the simplest of the long vowels *ā*, e. g. כָּל, כָּל, לָלַכְתְּ, יַהֲלֹךְ, occasionally *ē*, e. g. כֵּל, שֵׁבוּת, יֵלְכוּן, תֵּאבְדוּן, rarely *ō*, e. g. יְקֹטְלוּן. Such a vowel is sometimes inserted, even though a pre-existing mixed syllable is thereby destroyed, e. g. in the plurals of Segholates and of feminine nouns derived from them, מַלְכִים from מֶלֶךְ, מַלְכוּת from מַלְכָּה.

§ 65. The special emphasis, with which the last word of a clause is dwelt upon, gives rise to certain vowel changes in connection with the pause accents, § 36. 2. *a*.

These are (1) lengthening short vowels, viz., (ַ) and not infrequently (ָ) which has arisen from (ַ) to (ָ), e. g. אָבַד, עָבֶד, אָרֵץ; אֲרָצוֹת, כָּתַבְתָּ; כְּתָבְתָּ, אָמַר; אֲמָרִים, and bringing back Kamets Hhatuph shortened from Hholem to its original length וַיָּמָת, וָמֵת. (2) Restoring vowels which have been dropped in the course of inflection, e. g. עָבְדוֹ, עָבָדוּ; דִּבְּרוֹ, דִּבֶּרוּ; עִמְּדוֹ, עָמְדוּ. (3) Changing simple Sh'va in triliteral syllables and before the suffix ךָ to Seghol, e. g. בִּיתְךָ, בֵּיתֶךָ; יָחַד, יֶחֱדוּ; שָׂמֶם, שֶׂמֶם. (4) Changing compound Sh'va to the corresponding long vowel, e. g. אֲנִי, אָנִי; חֲלִי, חָלִי; חֲצִי (חָצְיוֹ), חֵצִי.

a. Pattahh sometimes remains without change, עַד Ps. 132: 12, הַגֶּרֶת 2 Sam. 2: 27, נְעָלְתִי Jer. 7, 10, נְגָבְתִי Prov. 30: 9, צָדָקְתִי Job 34: 5, אֲכָלְתִי Neh. 5: 14, and once restored in a simple syllable הִוָּשֵׁעַ 2 Sam. 3: 34. Seghol more frequently, בֶּגֶד, עֶגְלָה, קֶדֶם, צֶדֶק, הֶבֶל and הֶרֶב. Long vowels are mostly unaltered; only Tsere is in mixed syllables occasionally changed to Pattahh, תַּחְזִי Isa. 18: 5 for תֶּחֱזֶה, so הָשָׁב Isa. 42: 22, חֶבֶר Gen. 17: 14, וַיִּגְמַל Gen. 21: 8, וַיִּלֶּךָ Gen. 25: 34; in one word of Segholate formation it is converted to Seghol, נַעַשׂ, נֶעֱשׂ, and in another to Kamets, שֹׁכֶב, שָׁכֵב. Where the same word has alternate forms, one is sometimes selected as the ordinary and the other as the pausal form, thus וַיַּחְפֹּן, וַיֶּחְפֶּן; וַיֶּחְבַּשׁ, וַיַּחֲבשׁ; וַיִּרְדֹּם, וַיֵּרָדֶם; שָׁכַבְתִּי, שָׁכַלְתִּי Gen. 43: 14; דָּרְכָן Eccl. 12: 11, דַּרְכָּה 1 Sam. 13: 21; נוֹ, נָוֶה Gen. 49: 3, הִשְׁבַּת, הַשְׁבֶּת Lev. 26: 34, 35; יִפְעַשׂ, יִפְעֶשׂ. Sometimes, instead of changing the Sh'va before ךָ to Seghol, its vowel is shifted, thus בְּךָ, בָּךְ; לְךָ, לָךְ; בְּכָה, בָּכְה; אֹתָךְ, אֹתָכְה, and in Ex. 29: 35 אֹתָכָה. The position of the pause accent, so far as it differs from that of the ordinary accent, has been explained § 35. 2.

b. Of the pause accents, or those which mark the limits of clauses and sections, the first class, viz., Silluk, Athnahh and Olev'yoredh almost always give rise to the vowel changes which have been described; the second and third classes, S'gholta, Zakeph Katon, Zakeph Gadhol, R'bhīa and Shalsheleth, e. g. וְנִבְהָלוּ Isa. 13: 8, do so frequently; the fourth class, Pazer, e. g. 2 Kin. 3: 25, Prov. 30: 4, and T'lisha Gh'dhola, e. g. Ezek. 20: 21, but seldom. Pausal forms are occasionally found with other Disjunctives, thus, Tiphhha הֶלֶבְ Deut. 13: 5, Pashta תִּשְׁמֹרוּ ibid., Geresh שָׁמַע Ezek. 40: 4, and even with Conjunctives, e. g. אֲנִי Isa. 49: 18, תֵּצְאֶנָּה Ezek. 17: 15, עָשׂוּ 2 Chron. 24: 31.

§ 66. 1. The shortening and lengthening of words has an effect upon their vowels. The shortening may take place

(1) At the end of a word by the rejection of a vowel.

This occurs only with (ָ) or (ֶ) in certain forms of ל״ה verbs, e. g. תָּגֶל from תָּגְלֶה, נָצִי for נִצְיָה, נִיצְלִי 1 Sam. 21: 14 for נִצְיָלָה, נַיִּשְׁתִּי for נַיִּשְׁתֶּה. In the last two examples the short vowel is lengthened upon its receiving the accent, comp. § 64. 1. If the rejected vowel was preceded by two consonants, these will now stand together at the end of the word, and be liable to the changes described § 61. 2, e. g. חֹרֶם for חֲרֵמָה.

(2) In the body of a word by shortening a long vowel in a mixed syllable, which must, of course, be the one bearing the accent, § 32. 1, or rejecting a long vowel in a simple syllable before the accent (the pretonic vowel, § 64. 2), דְּבַר, דָּבָר; מַלְכִּי, מַלְכִּי; מִקְדָּשׁ, מִקְדָּשׁ.

a. This is in general the only reduction possible. The vowel of a mixed syllable, if short already, is capable of no further abbreviation, though ă and ĕ are in a very few instances attenuated to ĭ, כִּרְבִּין const. כִּרְבִּין, מִרְבַּץ const. מִרְבַּץ, מִפְתַּח const. מִפְתַּח, יְחִזְקֵאל but יְחִזְקָאל; and it cannot be rejected, or there would be a concurrence of vowelless consonants which the language seeks to avoid (תּוֹכֶךָ Prov. 30: 6 is an exception). And the vowel of a simple syllable, if short, must have the accent, § 32. 1, which preserves it from rejection. The changes above recited are confined to the last two, or, in case the accent is upon the penult, the last three syllables of the word; for the antecedent portions of polysyllables are already abbreviated to the utmost. Contractions due to the peculiarities of certain letters, as the gutturals and quiescents, which have been before explained, are not here taken into the account, e. g. שָׁמַע, שָׁמַע, בָּלַע, בֹּלַע; יְדֵי, יָדַיִם.

b. Where the last vowel cannot be shortened, it sometimes experiences a change of a quality from pure to diphthongal, such as is produced by the pressure of two following consonants, § 61. 4, e. g. נַבְהֵל, נִבְהָל; הִשְׁלֵב, הִשְׁלָב; כֶּלֶת, כֶּלֶת; כֶּשֶׁב, כֶּשֶׁב; כִּסְלִים, כִּסְלִי.

2. If a word be lengthened by additions at the end, its vowels are liable to changes in consequence.

(1) Such additions create a tendency to shorten the previous part of the word in the manner just described. For the normal length of words in Hebrew being dissyllabic, the genius of the language is opposed to transcending this limit any further than is absolutely necessary. If the addition is not of sufficient weight to affect the position of the accent, no abbreviation results. But if it is of weight enough to remove the accent, an abbreviation

follows if it is possible for one to be made, e. g. דָּבָר, דְּבָרִים, דִּבְרֵיכֶם for דְּבָרֵיכֶם by § 61. 1.

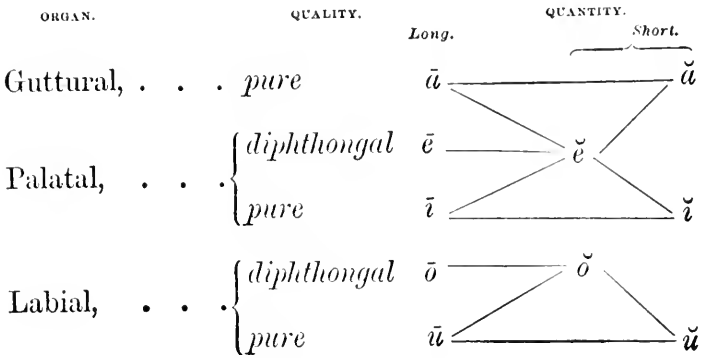
(2) They produce changes in an ultimate mixed syllable. If the appendage begin with a consonant, the antecedent vowel will now be succeeded by two consonants and be liable to the changes consequent upon such a position, § 61. 4, e. g. תַּקְטְלָנָה from תִּקְטֹלְנָה; קְטָנָה from קָטֹן; הִקְטַלְתִּי from הִקְטַלְתִּי; קַטַּלְתִּי from קָטַל. If the appendage begin with a vowel, it will attach itself to the final consonant, which will in consequence be drawn away from its own syllable to begin the new one. This may occasion the following changes:

(*a*) If the preceding vowel is an auxiliary Seghol or Pattahh, introduced to facilitate the pronunciation of the second of two vowelless consonants, § 61. 2, it will be rejected, inasmuch as it is no longer required for this purpose, e. g. מַלְכּוֹ from מֶלֶךְ, סְתֹרוֹ from סְתֹר.

(*b*) If it be a short vowel, it must either be lengthened to adapt it to the simple syllable in which it now stands, or rejected on account of the disposition to abbreviate words upon their receiving accessions at the end, e. g. קָטָלָה and קָטְלָה from קָטַל. The cases are very rare in which a short vowel remains unchanged in consequence of its having the accent, § 18. 2, e. g. יִרְדַּבְרָה 1 Kin. 19: 15 from יָרַד, חַשְׁמַלָּה Ezek. 8: 2 from חַשְׁמַל.

(*c*) If it be a long vowel, it may be rejected, as יִקְטְלוּ from יִקְטֹל, שְׁמִי from שֵׁם, or retained either unaltered, as הַקִּיבּוֹתָ from הַקִּים, בִּשְׁבָנִי from בִּשְׁכֵן, or with a change of quality from pure to diphthongal or the reverse, בְּיתוֹקָה from בָּתוֹק, נְסוֹגְתִי from נָסוֹג, הֲקִמֹנוּ from הֲקִים, פְּלֵיטִים from פָּלִיט.

TABLE SHOWING THE CHARACTER AND AFFINITIES OF THE VOWELS AND THE ORDINARY LIMITS OF EUPHONIC CHANGES.



PART SECOND.

ETYMOLOGY.

Roots of Words.

§ 67. Etymology treats of the various kinds of words, their formation and inflections. Three successive stages are here to be distinguished. The first is the root or radical portion of words. This embraces those fundamental sounds, in which the essential idea originally inheres. Roots do not enter, in their nude or primitive form, into the current use of language, but they constitute the basis upon which all actually occurring words, with the exception of the inorganic interjections, are constructed. The second stage is the word itself in its simple uninflected state; this is formed, if a primitive, directly from the root, if a derivative, from a pre-existing primitive, by certain changes or additions, which serve to convert the radical idea into the precise conception intended, which is as yet, however, expressed absolutely. The third and only remaining stage is the word as it appears in the actual utterances of speech, so modified by inflections as to suggest the definite qualifications of the idea, such as the tense of verbs, the gender and number of nouns, and the degree of adjectives, or its relations whether of agreement or subordination, such as the persons and modes of verbs and the cases of nouns.

§ 68. There are in Hebrew, as in most languages, two

classes of roots, which may be denominated respectively pronominal and verbal. Pronominal roots form the basis of such words as express the relations of things to the speaker or to one another, viz., pronouns and certain prepositions, adverbs, and other particles. From verbal roots, which are by far the more numerous, spring words expressive of ideas, viz., verbs, nouns, and such particles as are derived from them. Verbal roots consist exclusively of consonants, and are almost invariably triliteral. The introduction of a vowel or vowels, even for the sake of pronouncing them, destroys their abstract radical character, and converts them into specific words of this or that description. Nevertheless, for reasons of convenience, the letters of the root are usually pronounced by the aid of the vowels belonging to them in the simplest form of the corresponding verb, which is mostly the third person singular of the preterite, e. g. קָטַל, גָּדַל. This must not be suffered, however, to lead to the confusion of identifying that particular verbal form with the proper radical, nor of supposing the verb to be the radical part of speech from which nouns in all cases are derived: verbs and nouns are rather to be regarded as co-ordinate branches springing from a common root.

a. The few quadriliterals and quinqueliterals which occur are mostly formed from pre-existing triliterals by the addition of a weak letter, or a letter similar to one of the original radicals, e. g. בָּרְסַם *to lay waste* comp. בָּסַם; זָלְעַט *to burn* comp. זָעַט; כַּרְעָפָה *a branch* comp. כְּסָפָה; עַרְעַפִּים *thoughts* comp. שִׂעַפִּים; שַׁרְבִיט *a sceptre*, comp. שֵׁבֶט; שַׁלְאֲנָן *tranquil* comp. שָׁאַן; פָּרַשׂ *to spread* comp. פָּלַשׂ; or by blending two different roots, e. g. רָעֲנַן *to be fresh* composed of רָעַן and נָעַשׁ; פַּלְמֹנִי *a certain one*=פְּלֹנִי אַלְמֹנִי; צְפַרְדֵּעַ *a frog* from צָפַד *to leap* רָדַע (in Arabic) *a marsh*. Some, which are not thus reducible, may perhaps be of foreign origin.

b. Many of the triliteral roots appear to be based upon pre-existing biliterals. Thus, the cognates גָּזַר, גָּדַל, גָּזַז, גָּדַד, גָּדַע, גָּדַר, have in common the two letters גד with the associated idea of cutting, § 50. 3. The frequent examples of this description, together with the fact of the existence of a few biliterals, e. g. אָב *father*, אָח *brother*, אֵם *mother*, have suggested the thought that the ultimate roots may in all cases have been biliterals, and

that the triliterals were a secondary formation. Various ingenious but unsuccessful attempts have been made to demonstrate this position by an actual analysis, and to effect the reduction of all roots to two primitive letters. Still more extravagant and fanciful is the endeavour, which has actually been made, to explain the origin of roots from the individual letters of which they are composed, and to deduce their meanings from the names, the shapes, or other peculiarities of those letters. The existence of roots and the meanings attached to them must be accepted as ultimate facts. Some have arisen, no doubt, from the imitation of sounds in nature; but in most cases no satisfactory reason can be given why a given combination of sounds has that particular sense, which is in fact connected with it.

§ 69. The formation of words and their inflection are accomplished partly by internal changes and partly by external additions. The internal changes are the insertion of vowels and the reduplication of consonants in various significant ways, e. g. קָטַל, קִטַּל, קִטֵּל, קִטֵּל. The external additions are significant syllables welded to the root or to the word, either at the beginning or the end, e. g. קָטַל, קָטַלְתָּ, יִקְטֹל, הִתְקַטַּלְתִּי.

a. The triliteral and exclusively consonantal character of Semitic roots is their most remarkable peculiarity in distinction from those of the Indo-European languages which are as prevailingly monosyllabic, the vowel being an essential constituent, while the number of consonants is variable. The fact of the vowel being an integral part of the root in these languages interferes with their employment of internal changes for purposes of derivation and inflection, and confines them almost entirely to external additions, e. g. *voco*, *vocabam*, *vocatio*, *vocabulum*, *vocito*, etc. The composition of words of which such large use is made in the Indo-European tongues, e. g. *ad-voco*, *in-voco*, etc., is almost unknown in Hebrew except in the formation of proper names.

b. Different languages differ greatly in their flexibility, that is to say, in the variety of words which may spring from a common root, and the number of forms which the same word may assume to express the various relations into which it enters. Relations, which in some languages are expressed by flection, as the cases of nouns, tenses of verbs, concord of adjectives, are in others indicated by additional words, as prepositions, auxiliary verbs, etc., or suggested by the order of words in the sentence.

c. Formative syllables, added either at the beginning or the end of words for the sake of inflection, are, in the ordinary consciousness of those who use the language, completely amalgamated with them, so that their separate origin and signification is never thought of. They are thus to be distinguished from those words which, by reason of their dependent character, are attached to others as prefixes or suffixes, but yet preserve

their separate identity as prefixed conjunctions and prepositions and suffixed pronouns.

§ 70. The parts of speech in Hebrew are either declinable as pronouns, verbs, and nouns (including adjectives); or indeclinable, as the article, adverbs, prepositions, conjunctions, and interjections. As most if not all of the syllables employed in the formation and inflection of verbs and nouns are of pronominal origin, it will be necessary to consider the pronouns first.

a. The classification usual with the Jewish grammarians is into verbs (פְּעָלִים *actions*), nouns (שֵׁמוֹת *names*), and particles (מִלִּים *words*).

Pronouns.

PERSONAL PRONOUNS.

§ 71. The Hebrew pronouns are personal, demonstrative, relative, and interrogative or indefinite. The personal pronouns are the following, viz.:

		SINGULAR.			PLURAL.	
1.	I	אָנֹכִי,	אָנִי	We	אֲנַחְנוּ,	נַחְנוּ, אָנוּ
2.	Thou *m.*	אַתָּה		Ye *m.*	אַתֶּם	
	Thou *f.*	אַתְּ,	אָתְּ	Ye *f.*	אַתֶּן,	אַתֵּנָה
3.	He	הוּא		They *m.*	הֵם,	הֵמָּה
	She	הִיא		They *f.*	הֵן,	הֵנָּה

There are, it will be perceived, distinct forms for singular and plural in the three persons, and for masculine and feminine in the second and third. There is no form for the neuter, as that gender is not recognized in Hebrew.

a. (1) The alternate forms of the first person singular אָנֹכִי (in pause אָנֹכִי with the accent on the penult except Job 33: 9), and אָנִי (in pause אָנִי) are used interchangeably and with perhaps equal frequency. It has been observed, however, that while the former is the more common in the Pentateuch, it never occurs in the books of Chronicles, and but once in Ezekiel, viz., 36: 28, a passage borrowed from the Pentateuch. The usual

plural of this person is אַתֶּנָּה; כֻּנָּה occurs but six times, viz., Gen. 42: 11, Ex. 16: 7. 8, Num. 32: 32, 2 Sam. 17: 12, Lam. 5: 42; אֵנָּה though common in later Hebrew, occurs but once in the Old Testament, viz., Jer. 42: 6 K'thibh, where the K'ri substitutes the usual form.

(2) The second person masc. sing. אַתָּה (in pause occasionally אָתָּה Ps. 2: 7, 25: 27, 40: 18, 70: 6, but mostly אָתָּה) is in five instances written אַתְּ without the final He, which is however restored in the K'ri, viz., 1 Sam. 24: 19, Ps. 6: 4, Job 1: 10, Eccles. 7: 22, Neh. 9: 6, and in three instances אַתְּ without the final vowel Num. 11: 15, Deut. 5: 24, Ezek. 28: 14. The feminine אַתְּ is occasionally written אַתִּי Judg. 17: 2, 1 Kin. 14: 2, 2 Kin. 4: 16, 23, 8: 1, Jer. 4: 30, Ezek. 36: 13; the K'ri invariably retrenches the superfluous י, though it is probable that the original pronunciation proper to this orthography was אַתִּי. The feminine plural אַתֶּן occurs only Ezek. 34: 31, where a few manuscripts read אַתֵּן; the alternate form אַתֶּנָּה occurs Gen. 31: 6, Ezek. 13: 11, 34: 17; in Ezek. 13: 20 most editions have אַתֶּנָּה.

(3) The third person fem. sing. הִיא occurs but eleven times in the books of Moses, viz., Gen. 14: 2, 20: 5, 38: 25, Lev. 11: 39, 13: 10. 21, 16: 31, 20: 17, 21: 9, Num. 5: 13, 14. In its stead is found הִוא a combination of the letters of the masculine with the vowel of the feminine. The explanation of this is that הוּא *hū* was at that early period of common gender and used indifferently for both masculine and feminine. As this primitive usage subsequently became obsolete, the word, when used for the feminine, was read הִיא *hī* according to the uniform practice of the later books, and the punctuators have suggested this by giving it the corresponding vowel, § 47. According to Kimchi הֵן Ruth 1: 13 and הֵנָּה 2 Sam. 4: 6, Jer. 50: 5, stand for the masculine plural; this assumption is unnecessary, however, as in the first passage the feminine may have the sense of the neuter "*these things*," and in the last two it is an adverb of place, meaning *here*.

b. Words in such constant and familiar use as the pronouns are subject to more or less irregularity in all languages. The original plural termination, as will be shown more fully hereafter in the case of verbs and nouns, is ם or ן §§ 85. 1. *a* (1), 201. *e*. In the first person the nasal is omitted, אֲנוּ, אַתֶּנָּה. The plurals of the second and third persons were originally חוּמ, אַתוּמ, which are still preserved in the Arabic, and have left their traces in the inflections of verbs, e. g. קְטַלְתּוּנִי, וַיִּקְטְלוּן. The vowel *ū* however, which in the plurals of masculine nouns has been converted into *ī*, has in the pronouns undergone a still further modification into the diphthongal *ē* הֵם or *ĕ* אֶתֶם. The distinction of gender is indicated in the plural not by affixing the characteristic termination of that gender as in nouns, but by a change of the final nasal. An unaccented ה֫ is often added by § 61. 6, to relieve the harshness of the consonantal ending.

c. In the technical language of the Jewish grammarians pronouns are called כִּנּוּיִים *cognomina;* the first person is מְדַבֵּר *the speaker*, the second נִמְצָא *present*, the third נִסְתָּר *hidden* or *absent*.

§ 72. When the pronouns are used in their separate form as distinct words they have the forms already given.

When, however, they stand in a relation of dependence to verbs, nouns, and particles, they are appended to them in the following abbreviated forms, called the pronominal suffixes: (See Paradigm I, at the end of the volume.)

		SINGULAR.		PLURAL.	
1.	*Com.*	־ִי	־נִי		־נוּ
2.	*Masc.*		־ךָ		־כֶם
	Fem.		־ךְ		־כֶן
3.	*Masc.*		־הוּ	־ם	־הֶם
	Fem.	־הִ	־הָ	־ן	־הֶן

In the first person singular ־ִי is attached to nouns, and ־נִי to verbs. In the second person the palatal כ is substituted for the lingual ת of the separate pronoun. For a similar change in the first person see § 85. *a.* (1). The modifications in the forms of the suffixes, occasioned by the endings of the words to which they are attached, will be considered hereafter, §§ 101, 222. The third plural forms ־הֶם, ־הֶן are used with plural nouns; ־ם, ־ן with verbs and singular nouns.

The suffixes of the second and third persons plural ־כֶם, ־כֶן, ־הֶם, ־הֶן are called *grave*, the rest are *light*. The former being mixed syllables, always receive the accent, § 33. 3, and tend more strongly to shorten the words to which they are attached than the latter.

Demonstrative Pronouns.

§ 73. 1. The ordinary demonstrative is—

	Masc.	*Fem.*		*Common.*	
Singular,	זֶה	זֹאת	*this.*	Plural, אֵל	אֵלֶּה *these.*

The poetic form זוּ is sometimes a demonstrative, Ps. 12: 8, Hab. 1: 11, but more frequently a relative (like the English *that*), in which case it is used without change

for both genders and numbers. The feminine is occasionally written without the final ת and with a different vowel letter זֹה or זוֹ. The plural, coming from a different root, is sufficiently distinguished without the usual termination; אֵל occurs eight times in the books of Moses and once in 1 Chron. 20: 8; in all other places the consonantal termination is softened by an appended הֶ֫.

2. The singular of this pronoun is in a few instances compounded with ל either without any change of meaning, or, as Ewald and Nordheimer follow Jarchi in supposing, in the sense of the remote demonstrative *that*. Thus (with the article הַ prefixed)—

	Masc.	*Fem.*	*Com.*
Sing. *this* or *that*	הַלָּזֶה	הַלָּזוֹ	הַלָּז

a. The first form occurs twice in Genesis (24: 65, 37: 19), the third six times in the post-Mosaic books as a masculine (Judg. 6: 20, 1 Sam. 14: 1, 17: 26, 2 Kin. 23: 17, Dan. 8: 16, Zech. 2: 8), and once as a feminine (2 Kin. 4: 25), the second once in Ezekiel (36: 35).

3. The personal pronoun of the third person הוּא is used for the remote demonstrative *that*.

Relative Pronoun.

§ 74. The relative *who, which* is אֲשֶׁר, which may be employed as a separate word, or may be shortened to a prefix שֶׁ֫ with Daghesh-forte compensative in the following letter, unless it be a guttural and consequently incapable of receiving it, § 23. 1. In a few instances the prefix שׁ takes the vowel (ָ) followed by Daghesh-forte, Judg. 5: 7, Cant. 1: 7, Job 19: 29; once it has (ֶ) before א Judg. 6: 17, and twice (ְ) Eccl. 2: 22 (in some copies), 3: 18. The relative suffers no change for gender or number either in its separate or its prefixed state. Its objective relation to verbs and particles and its possessive relation to nouns are expressed without changing the

relative itself, or removing it from its position at the beginning of its clause by appending the appropriate pronominal suffix to the governing word, e. g. אֲשֶׁר שְׁלָחוֹ *who he sent him*, i. e. whom he sent, אֲשֶׁר זַרְעוֹ *which its seed*, i. e. whose seed. It may also receive an adverbial sense from being followed by the pronominal adverb שָׁם *there*, e. g. אֲשֶׁר—שָׁם *where*, אֲשֶׁר—שָׁמָּה *whither*, אֲשֶׁר—מִשָּׁם *whence*.

a. The prefix שֶׁ occurs to the exclusion of the full form of the relative in the Song of Solomon, and with great frequency in Ecclesiastes. There are besides occasional examples of it in other books, e. g. Judg. 5: 7, 6: 17, 7: 12, 8: 26, 2 Kin. 6: 11, 1 Chron. 5: 20, Job 19: 29, Ps. 122—124, 129, 133—137, 144, Lam. 2: 15, 16. The word בְּשַׁגַּם Gen. 6: 3 is in several ancient versions and in the common English translation rendered as though it were made up of the preposition בְּ, the relative שֶׁ and the particle גַּם *for that also;* but the most recent interpreters derive it from the verb שָׁגָה *to err*, and translate *in their erring.*

b. אֲשֶׁר or שֶׁ is also used for the conjunction *that.* Comp. Lat. *quod.*

Interrogative and Indefinite Pronouns.

§ 75. 1. The pronouns מִי *who?* or *whoever* relating to persons, and מָה *what?* or *whatever* relating to things, are employed both as interrogatives and in an indefinite sense. They experience no change for gender or number.

The vowel of מִה is regulated by the initial sounds of the succeeding word. Before a letter capable of receiving Daghesh-forte it is pointed מַה and the following letter is doubled, e. g. מַהַשְּׁבֹּת Ex. 3: 13. Before the stronger gutturals ה and ח it also commonly receives (ַ), e. g. מַהחָרֵא Ps. 39: 5, מַה חָשָׁאתִי Gen. 31: 36. Before the weaker gutturals א, ע and ר, it commonly takes (ָ), e. g. מָהאֵלֶּה Zech. 1: 9, מָה עֲבְדָךְ 2 Kin. 8: 13, מִי רָאִיתָם Judg. 9: 48. Before ה, ח and ע with Kamets it takes (ָ), § 63. 1. *a*, e. g. מָהדָּעָה לּוֹ Ex. 32: 1, מָהחָשָׁאתִי Gen. 20: 9, מָהעָשִׂיתָ ib.; and occasionally before other letters especially when it has a disjunctive accent מָה קוֹל 1 Sam. 4: 14,

בֶּ֫ה מְשֻׁפָּט 2 Kin. 1: 7. In a few instances the final vowel letter is omitted and the interrogative is joined with the following word, e. g. בִּזֶּה Ex. 4: 2, בִּלָּכֶם Isa. 3: 15, בִּתְלָאָה Mal. 1: 13, בָּהֶם Ezek. 8: 6 K'thibh.

2. Another interrogative is formed by prefixing the particle אֵי to the pronoun זֶה, זֹאת, thus אֵי זֶה *which?* or *what?* 1 Kin. 13: 12, Eccles. 11: 6, אֵי לָזֹאת *for what? why?* Jer. 5: 7.

3. The words פְּלֹנִי אַלְמֹנִי which are always used in combination, or contracted into one פִּלְמֹנִי, are in usage equivalent to an indefinite or indeterminate pronoun, Eng. *a certain one*, Lat. *quidam*, Gr. *ὁ δεῖνα*; they are, however, derived not from pronominal but verbal roots.

Verbs.

their species.

§ 76. 1. Hebrew verbs have seven different forms which have been denominated species or conjugations (בִּנְיָנִים *buildings*). These represent as many modifications of the verbal idea, and are as follows, viz.:

1.	קַל	Kal	Simple active.
2.	נִפְעַל	Niphal	„ passive.
3.	פִּעֵל	Piēl	Intensive active.
4.	פֻּעַל	Pual	„ passive.
5.	הִפְעִיל	Hiphīl	Causative active.
6.	הָפְעַל	Hophal	„ passive.
7.	הִתְפַּעֵל	Hithpaēl	Reflexive.

a. The term *conjugations* was introduced by Reuchlin, and is very generally employed in Hebrew grammars and in those of the cognate languages. It must be borne in mind, however, that Hebrew conjugations are totally unlike the conjugations of Latin and Greek. The latter denote the various modes of inflection adopted by different roots. The former are modifications of the same root, which differ in meaning while their inflections are substantially alike. They correspond rather with voices or with derivative verbs, such as frequentatives and causatives, although they not

infrequently require to be translated by words radically distinct. The term *species* proposed by Schultens, though less commonly adopted, is more descriptive.

2. Kal means *light*, and denotes that species in which no other than the three radical letters appear, and these only in their single power. The other species are called *heavy* (כְּבֵדִים), because burdened by the reduplication of the radicals or the addition of other letters. Their names are derived from פָּעַל *to do*, which was the model for inflection, the form assumed by this verb in each species serving as its designation. Unusual verbal forms are in like manner denoted by the corresponding forms imposed upon its radicals.

3. Other technical expressions, such as the names of the various classes of verbs, are also to be traced to this source. A verb whose first radical is a guttural, a Nun, or a Yodh, is called a Pe Guttural, Pe Nun (פ״נ), or Pe Yodh (פ״י) verb, Pe as the initial of פָּעַל becoming the technical designation of a first radical generally. So a verb whose second radical is Vav is called an Ayin Vav (ע״ו); one in which He takes the place of the third radical, a Lamedh He (ל״ה); one whose second and third radicals are alike an Ayin Doubled (ע״ע), etc.

§ 77. The general idea of the several species already stated is liable to certain modifications in the variety of cases to which it is applied.

1. The Niphal is commonly the passive of Kal or of the simple idea of the verb, גָּנַב *to steal*, Ni. *to be stolen;* כָּתַב *to write*, Ni. *to be written.*

2. Sometimes, like the Greek middle voice which coincides with the passive in certain of its forms, it has a reflexive signification, טָמַן *to hide*, Ni. *to hide one's self;* שָׁמַר *to keep*, Ni. *to keep one's self*, φυλάττεσθαι; נָחַם Ni. *to repent*, lit. *to grieve one's self*, μεταμέλεσθαι; or expresses

reciprocal action, יָעַץ *to counsel*, Ni. *to take counsel together;* לָחַם Ni. *to fight*, *μάχεσθαι*, lit. *to devour one another*. In some verbs it has both a passive and a reflexive sense, מָכַר Ni. *to be sold* and *to sell one's self;* רָאָה Ni. *to be seen* and *to let one's self be seen, to appear*.

3. Sometimes when the Kal is intransitive and does not admit of a proper passive, the Niphal is either identical with it in signification, קָרַב K. and Ni. *to approach*, or retains a shade of its original force by representing the state or condition not absolutely as in Kal, but as something effected and involving a change from another previous condition, מָלֵא *to be full*, Ni. *to be filled*, הָיָה *to be*, Ni. *to become*.

§ 78. 1. The Piel gives new intensity to the simple idea of the verb, by which its meaning is variously modified according to the nature of the case, מָעַט *to be few*, Pi. *to be very few;* רָדַף *to follow*, Pi. *to follow ardently, to pursue;* פָּחַד *to fear*, Pi. *to fear constantly, to be timid;* שָׁאַל *to ask*, Pi. *to ask repeatedly and earnestly, to beg;* בָּרָא *to create*, as God, Pi. *to form* with pains and labour, as man; כָּתַב *to write*, Pi. *to write much* with the implication that it is to little purpose, *to scribble;* קָבַר *to bury*, Pi. *to bury great numbers*.

2. The energy resident in this species displays itself by signifying the producing or causing of that which is denoted by the simple idea of the verb, thus quickening intransitive verbs into transitives, and making such as were transitive before to be doubly so. In this, which is the more frequent case, it becomes virtually equivalent to a causative, אָבַד *to perish*, Pi. *to make to perish, to destroy;* לָמַד *to learn*, Pi. *to teach*, i. e. *cause to learn*. Both these senses are occasionally found united in the same verb, קָרַב Pi. *to be very near* and *to bring near;* שָׁחַת Pi. *to be very corrupt* and *to corrupt or destroy*.

a. If the action be directed to the removal of its object, the Piel becomes privative, חָטָא *to sin*, Pi. *to free from sin, expiate*, בָּקַל *to stone*, Pi. *to free from stones.*

3. Pual is the passive of Piel, and therefore can only exist when the sense of the latter is such that a passive is possible.

§ 79. 1. The Hiphil denotes the causing or producing of that which is signified by the simple form of the verb, and, as in the corresponding case of Piel, intransitive verbs become transitive, and such as admitted of one object before are now capable of receiving two: יָרַד *to descend*, Hi. *to cause to descend, bring down;* בּוֹא *to come*, Hi. *to bring;* רָאָה *to see*, Hi. *to show.*

a. The causative sense in both Piel and Hiphil is sometimes weakened into a simple permissive, חִיָּה *permit to live* Ex. 22: 17, Deut. 20: 16, עִוָּה perhaps *permit to suffer* Ex. 22: 21, הֶפְדָּה *permit to be redeemed* Ex. 21: 8.

2. In some verbs Hiphil has an intransitive sense, but in most of these cases there is either an ellipsis of the object or the idea of production and causation can still be obscurely traced, קָשַׁב Hi. *to be attentive*, prop. *to make* (*one's ear*) *attend;* בָּיַת Hi. *to be sweet*, prop. *to cause sweetness;* שָׂכַל Hi. *to be wise*, prop. *to act wisely, exhibit wisdom;* אָמַץ Hi. *to be brave*, prop. *to act bravely;* זָקַן Hi. *to grow old*, prop. *to acquire age.* In a few instances both senses are found united in the same verb, פָּרַח Hi. *to cause to bud* and *to put forth buds;* אָרַךְ Hi. *to prolong* and *to be long;* עָשַׁר Hi. *to enrich* and *to grow rich;* שָׁמַן Hi. *to make fat* and *to become fat* (comp. Eng. *fatten*).

3. Hophal is the passive of Hiphil.

a. When Kal has both a transitive and an intransitive sense, Hiphil, as the causative of the latter, becomes substantially identical with the former, נָטָה K. *to extend* or *to bend*, trans. and intrans., Hi. *id*, trans. In Job 23: 11, Ps. 125: 5, Isa. 30: 11, where the Hiphil of this verb appears to be used intransitively in the sense of *turning aside*, there is an ellipsis of its proper object, *to bend* (*the steps*).

§ 80. 1. The Hithpael is reflexive or reciprocal of the idea of the verb, mostly as this is expressed in the Piel

species (from which it is formed, § 82. 5), the particular shade of meaning being modified according to the circumstances of the case. (1) It indicates that the subject is likewise the direct object of the action, מִלֵּט Pi. *to deliver*, Hith. *to escape, deliver one's self;* צִדֵּק Pi. *to justify*, Hith. *to justify one's self;* חִפֵּשׂ Pi. *to seek*, Hith. *to disguise one's self*, prop. *to let one's self be sought for;* חִלָּה Pi. *to make sick*, Hith. *to make one's self sick* whether in reality or in the esteem of others, i. e. *to feign sickness;* חִכַּם Hith. *to show one's self wise* whether in reality or in his own conceit. (2) Or that he is the indirect object of the action, which is for his benefit, or relates entirely to him, פִּתַּח Pi. *to open*, Hith. *to open for one's self;* נָחַל Hith. *to inherit* (*for one's self*); חָנַן Pi. *to make gracious*, Hith. *to implore favour*, prop. *to make to be gracious to one's self.* (3) Or that the action is mutual between two or more parties, קִשֵּׁר Pi. *to bind*, Hith. *to conspire*, prop. *to band together;* רָאָה *to see*, Hith. *to look upon one another.*

2. This species is sometimes a mere passive like the Niphal שָׁכַח *to forget*, Hith. *to be forgotten;* כִּפֶּר Pi. *to atone*, Hith. *to be atoned;* עִתֵּד Pi. *to prepare*, Hith. *to be prepared.* In a few instances the reflexive and the passive senses are found in the same verb, נִיבַּר Hith. *to sell one's self* and *to be sold.*

a. (1) The affinity between the Piel and Hiphil species is such as in very many verbs to render it unnecessary to retain them both, and one or the other has been allowed to fall into disuse. Where both exist, they are often nearly or quite synonymous, and are used indiscriminately, קִדֵּשׁ Pi. and Hi. *to sanctify*, or differ only in the frequency of their employment, שִׁלַּח Pi. and Hi. (rare) *to send*, שִׁמַּע Pi. (rare) and Hi. *to cause to hear.* In other cases they are distinguished by adhering to those significations of the species in which they depart palpably from one another, צִמַּח Pi. (intens.) *to grow luxuriantly*, Hi. (caus.) *to make to grow*, סִכֵּל Pi. (caus.) *to make foolish*, Hi. (intrans.) *to act foolishly;* or by developing them from different significations of the root, בִּשֵּׁל Pi. *to cook* (food), Hi. *to ripen* (fruit); בֵּרַךְ Pi. *to bless* (prop. to kneel in worship), Hi. *to cause to kneel* (as a physical act), עִצֵּם Pi. *to break the bones* (עֶצֶם), Hi. *to render strong;* or by restricting them to special applications, קִטֵּר Pi. *to burn incense* (to idols), Hi. *to burn*

incense (to God); חָלַף Hi. *to change*, Pi. *to change* (the clothes); פָּשַׁט Hi. *to strip*, Pi. *to strip* (the slain in battle).

(2) It is still less common to find both Niphal and Hithpael in the same verb. Where this does occur they are sometimes used interchangeably, at others a distinction is created or adhered to, שָׁפַךְ Ni. and Hith. *to be poured out;* דָּבַר Ni. and Hith. *to talk with one another;* בָּרַךְ Ni. *to be blessed*, Hith. *to bless one's self;* חָרַשׁ Ni. *to be ploughed*, Hith. *to keep (one's self) quiet;* חָגַר Ni. *to be bound*, Hith. *to conspire.*

(3) When in particular verbs two species have substantially the same sense, it sometimes happens that parts only of each are in use, one supplementing the deficiencies of the other, or that one of the active species, losing its proper passive, is supplied by another whose corresponding active is wanting. Thus יָכֹל *to be able* has a Kal preterite and infinitive; but its future is Hophal (strictly, *to be made able*, but in usage the equivalent of Kal); בָּסַס *to be pale*, נָגַשׁ *to draw near*, נָסַךְ *to be poured out*, have their futures in the Kal but their preterites in the Niphal; כָּשַׁל *to stumble*, has a Kal preterite but future Niphal (Ni. pret. only in Daniel); נָחָה *to lead* has the preterite and imperative Kal, but future and infinitive Hiphil (Hi. pret. twice); קָוָה *to wait for* is used in the Piel except the participle which is Kal; יָסַף *to add* has both a Kal and a Hiphil preterite, which are synonymous, but only a Hiphil future. Again, in בָּדַל *to separate* and שָׁמַד *to destroy*, the Kal has yielded to the Hiphil (strictly, *to cause separation, destruction*) but the Niphal is retained as its passive; רָחַץ *to bathe* and זָרַק *to sprinkle*, have in the active the Kal form and in the passive the Pual.

(4) All verbs are found in one or more of these species or conjugations, but very few in the whole of them. Of the 1,332 triliteral verbs in the Hebrew Bible, 530 appear in some one species only, 360 in two species, 235 in three, 118 in four, 70 in five, 12 in six, and but 7 in the entire number, viz.: בָּקַע *to cleave asunder*, גָּלָה *to uncover*, חָלָה *to be sick*, יָדַע *to know*, יָלַד *to bring forth*, פָּקַד *to visit*, רוּם *to be high*. The number of species in which a given verb appears, is sometimes limited by the necessity of the case, as when its meaning will not admit of the modifications denoted by all the species; or by usage, as when certain species are dropped as unnecessary, the ideas which they would convey being expressed in another manner; or by the circumstance that in the small volume of the Old Testament, examples may not occur of all the species which actually were in use.

b. Instances occur in which the active species, and less frequently the passives, derive their meanings not directly from the root, but from some noun which has sprung from it. These are called Denominatives. Thus, עָרַף K. *to break the neck* (עֹרֶף); עָשַׂר K. *to tithe* (עֶשֶׂר *ten*); לָבַן *to make bricks* (לְבֵנָה); נִלְבַּב Ni. *to be possessed of understanding*, or, according to others, *to be devoid of understanding* (לֵבָב *heart*); כִּהֵן Pi. *to act as priest* (כֹּהֵן); חָנַן Pi. *to build a nest* (חֵן); מְרֻבָּע Pu. part. *square* (אַרְבַּע *four*); מְשֻׁקָּד Pu. *almond-shaped* (שָׁקֵד); מְתֻלָּע Pu. *dyed scarlet* (תּוֹלָע); הִשְׁלִיג Hi. *to snow* (שֶׁלֶג); הֶאֱזִין Hi. *to give ear* (אֹזֶן); הֶחֱפִיר Hi. *to snare* (פַּח); הָמְלַח Ho. *to be salted* (מֶלַח); הִתְיַהֵד Hith. *to make one's self a Jew* (יְהוּדִי); הִתְעַבֵּר Hith. *to*

supply one's self with provision (צַיִד). A verbal form may occasionally arise even from an adverb, נֶהֱלָאָה Ni. part. *removed far away* (הָלְאָה), or an interjection, וַיַּהַס Hi. *and he stilled* (הַס *hush!*).

Perfect Verbs.

§ 81. There is one normal standard for the formation of these several species and their further inflection, to which all verbs conform unless prevented by the character of their radicals. There are no anomalous or irregular deviations from this standard, such as are found in other languages, for which no explanation can be given but the fact of their occurrence. Whatever deviations do occur result from the presence of letters in the root which do not admit of certain combinations and forms, and compel the adoption of others in their stead. Verbs are hence distinguished into perfect and imperfect. They are styled perfect when their radical letters are capable of entering into all those combinations and exhibiting all those forms which conformity with the standard requires. They are imperfect when the root contains a weak letter, § 7. 2, or is otherwise so constituted as to lead to a departure from the standard inflections.

§ 82. 1. In perfect verbs the Kal is formed by giving Pattahh, or more rarely one of its compounds, Tsere or Hholem, to the second radical as its essential or characteristic vowel, and to the first radical a pretonic Kamets, § 64. 2, thus: קָטַל, קָבֵד, קָטֹן.

a. The number of verbs, perfect and imperfect, whose second radical has Tsere or Hholem or as they are technically called *middle ē* and *middle ō*, is quite inconsiderable. They are mostly of an intransitive signification.

(1) The following have Tsere, viz.:

זָקֵן *to be old.*	חָצֵב *to hew.*	טָמֵא *to be unclean.*
חָפֵץ *to delight.*	טָהֵר *to be clean.*	יָבֵשׁ *to be dry.*

יָרֵא *to fear.* מָלֵא trans. or intrans. (Esth. 7:5 מָלָא trans.) *to fill or be full.* צָמֵא *to thirst.*
כָּבֵד (Isa. 24:20 כָּבַד) *to be heavy.* קָמֵל (Isa. 33:9 קָמַל) *to wither.*
כָּשֵׁר *to be right.* מֵת *to die.* שָׂנֵא *to hate.*
לָבֵשׁ and לָבַשׁ *to put on.* נָבֵל *to fade.* שָׁפֵל *to be brought low.*

(2) The following have Tsere in pause, § 65, or as a pretonic vowel, § 64. 2, before a suffix, but Pattahh in other cases. Such as only occur in pause or with suffixes are printed with Tsere.

אָהֵב *to love.* חָסֵר *to lack.* חָדַשׁ *to be holy.*
אָשֵׁם *to be guilty.* חָפֵר *to blush* (distinguished from חָפַר *to dig*). קָרַב *to come near.*
בָּצֵק *to swell.* רָעֵב *to be hungry.*
גָּבֵר *to prevail.* שָׂבֵע *to be sated.*
גָּדֵל *to be or become great.* יָעֵף *to be weary.* שָׂמֵחַ *to rejoice.*
דָּבֵק *to cleave to.* יָרַשׁ *to possess.* שָׁכֵחַ *to forget.*
דָּשֵׁן *to grow fat.* נָעַם *to be pleasant.* שָׁכַן *to dwell.*
חָדֵל *to cease.* עָצַם *to be strong.* שָׁמֵם *to be desolate.*
חָמֵץ *to be leavened.* צָלַח *to come upon, to prosper.* שָׁמַע *to hear.*
חָנֵף *to be profaned.*

Several others are marked with Tsere in the lexicon of Gesenius, in which that vowel does not occur.

(3) The following have Hholem:

אוֹר *to shine.* יָכֹל *to be able.* רֹב (Ps. 18:15 רָב) *to shoot.*
בּוֹשׁ *to be ashamed.* יָקֹשׁ *to snare.*
טוֹב *to be good.* יָסֹד (see § 86. *a*) *to flow.* שָׁכֹל (Gen. 43:14 שָׁכַלְתִּי) *to be bereaved.*
יָגֹר *to dread.* קָטֹן *to be small.*

2. The Niphal is formed by prefixing נִ to the letters of the root; thus, נִקְטַל, which by § 61. 1, becomes נִקָּטֵל.

3. The Piel and Pual are formed by doubling the second radical and attaching the appropriate vowels; thus, קִטֵּל, קֻטַּל.

4. The Hiphil and Hophal are formed by prefixing הִ with the proper vowels; thus, הִקְטִיל, הָקְטַל.

5. The Hithpael is formed by prefixing הִתְ to the construct infinitive of the Piel; thus, הִתְקַטֵּל. If the first radical be one of the sibilants ס, שׁ or שׂ, the ת of the prefixed syllable will be transposed with it, הִסְתַּבֵּל, הִשְׁתַּבֵּר, הִשְׂתַּכֵּל. If the first radical be צ, the ת will be transposed,

and in addition changed to ט, e. g, הִצְטַדֵּק. If the first radical be one of the linguals ד, ט or ת, the ת will be assimilated or united to it by Daghesh-forte, הִדַּבֵּק, הִטַּהֵר, הִתַּמֵּם, הִתַּמֵּהּ.

a. In one instance הִתְשׁוֹעַטְנָה Jer. 49: 3 ת remains before שׁ without transposition, which would bring three linguals in close connection, and once it is assimilated to שׁ, Eccl. 7: 16 וְיִשְׁתּוֹמֵם, elsewhere וְתִשְׁתּוֹמֵם; ת is likewise assimilated to the sibilant ז in the only Hithpael form in which that letter is the initial of the root הִזְדַּמֵּן Isa. 1: 16; in the Aramæan הִזְדַּמֵּן the ת is transposed and changed to ד. In one instance מִתְתַּפְּקִים Judg. 19: 22 ת remains without assimilation before ד. The ת may either be assimilated or not to the initial נ of two verbs נָגַשׁ, נָצָא, and the initial כ of two כוּן, כָּפַר. It is assimilated to the כ of כָּבַשׁ, which occurs but twice in the Hithpael, to the נ of נָצַן, which only occurs once and in one instance to ר, viz. אֵרוֹמָם Isa. 33: 10 but יִתְרוֹמָם Dan. 11: 36.

b. The seven species may, agreeably to their formation, be reduced to three with their derivatives, viz.:

Active	1. Kal	2. Piel	3. Hiphil
Passive		Pual	Hophal
Middle	Niphal	Hithpael	

(1) The prefixed letters of the Niphal and Hithpael נ and ת (with ה prosthetic, § 53. 1. *a*) are probably in their origin fragmentary pronouns signifying *self*. The idea primarily suggested is that of performing an action upon one's self; but in the Niphal usually, and in the Hithpael occasionally, the reflexive signification has, as in certain tenses of the Greek middle and in the reciprocal verbs of some modern languages, given place to the passive. In the Aramæan the forms with a prefixed אִתְ have not only quite lost their original character as reflexives, but have superseded all other passives.

(2) The idea of causation in the Hiphil and Hophal, is not due, as in the Indo-European causatives, to the introduction of a syllable directly suggesting it. It appears to be primarily another intensive form, with which usage has ordinarily connected, as it frequently has with the Piel, the notion of productive energy or the quickening of an intransitive into a transitive As in the Piel and its derivatives, the idea of intensity is suggested by giving a doubled and consequently more intense pronunciation to the central radical; so in the Hiphil, by a like symbolism, the power of the root is augmented by the accession of a new initial syllable, the weak letter ה merely supporting the vowel, like the corresponding א in Aramæan and Arabic.

(3) The distinction between active and passive in the intensive and causative species is made by the vowels alone. In Arabic all the active forms have the vowel *a*, *katala, kattala* etc., and the passives *u* and *i*, *kutila, kuttila* etc. So in Hebrew, as is obvious from their inflections, *a* was originally the vowel not of Kal only but of all the active species, קִטֵּל and

הִקְטִיל being modifications of *kattal* and *haktal*. When in Arabic *i* or *u*, as in Hebrew *ē* or *ō*, is the second vowel of the first or Kal species, it has an intransitive signification.

§ 83. If קָטַל *to kill* be taken as the representative of the regular verb, the various species with their significations will be as follows, viz.:

1. Kal	קָטַל	*to kill.*
2. Niphal	נִקְטַל	*to be killed.*
3. Piel	קִטֵּל	*to kill many* or *to massacre.*
4. Pual	קֻטַּל	*to be massacred.*
5. Hiphil	הִקְטִיל	*to cause to kill.*
6. Hophal	הָקְטַל	*to be caused to kill.*
7. Hithpael	הִתְקַטֵּל	*to kill one's self.*

a. It is in each case the third person masculine singular of the preterite which is given above, and the strict signification therefore is *he has killed*, etc. These being the simplest forms of the various species, however, and destitute of any sign of tense or person, are commonly used to represent the species; and in this sense the proper equivalent is the infinitive, which is the form used for designating verbs in English.

b. The verb קָטַל is well fitted for a model, and is now generally so employed. The consonants, which compose its root, have no peculiarities to interfere with its inflection, it has a signification capable of being carried through all the species, and as it exists likewise in the cognate languages, it offers a good basis for their comparison. It occurs, indeed, but three times in the Bible, Job 13: 15, 24: 14, Ps. 139: 19, and in but one species; still the very rarity of its occurrence only restricts it more completely to its use as a representative or typical verb. The old Jewish model פָּעַל, § 76. 2, is objectionable on account of its weak letter ע, and on account of the twofold sound of its initial radical פ, which, with its Dagheshlene, might prove perplexing to beginners.

c. (1) The existence of other and less usual species is a needless assumption. The Poel, Pilel, Pilpel and the like, are not additional species but identical in character and signification with those already named. The more copious Arabic, with its nicer shades of distinction, has greatly multiplied the number of its species or conjugations, incorporating into its standard paradigm forms corresponding to some of these which the Hebrew only occasionally employs. In the latter language, however, they are at the utmost alternate forms substituted in place of the ordinary ones, and found for the most part in the imperfect verbs, to the nature of whose radicals they owe their peculiarities of structure. When, as is the case in a very few instances, there is a double form to a particular species in the same verb, usage has mostly created an arbitrary distinction between them,

e. g. Pi. שָׁרַשׁ *to uproot* and שֹׁרֶשׁ *to take root;* Pi. קַיֵּם *to cause to stand,* applied to covenants and oaths, *to ratify,* and קוֹמֵם, in a physical sense, *to raise up;* Hi. הֵנִיחַ *to cause to rest, to set down,* and הִנִּיחַ *to leave, to let alone.* There is no objection to the employment of these names as convenient designations of particular modes of formation, provided it is understood that they mean nothing more.

(2) There are very few instances of what may be called compound species: thus, Niphal of Pual נְגֹאַל Isa. 59: 3, Lam. 4: 14, *to be exceedingly defiled,* stronger than the simple Niphal נִגְאַל; Niphal of Hithpael נִסְתָּרוּ Ezek. 23: 48, נִכַּפֵּר Deut. 21: 8, נִשְׁתַּיֵּת Prov. 27: 15.

§ 84. To each of these species belong a preterite or perfect and future or imperfect, two forms of the infinitive, an absolute and a construct, a participle, and, except to the Pual and Hophal which as pure passives cannot express a command, an imperative. The Kal has both an active and a passive participle, one more, consequently, than the other species. The preterite or perfect of each species is the form already described, § 83. The remaining parts are formed in the following manner, viz.:

1. The absolute infinitive is formed by changing the last vowel in Hiphil and Hophal to Tsere, and in each of the other species to Hholem, observing likewise that Hhirik in the penult of Piel and Hiphil is to be changed to Pattahh. (See Paradigm of the Perfect Verb.) This rule gives to Niphal the infinitive נִקְטֹל, which form actually occurs, § 91. *b.* If, however, the original Sh'va be suffered to remain after the prefixed נ, § 82. 2, thus, נִקְטֹל, a prosthetic הִ will be required in order to its pronunciation, § 53. 1. *a,* after which נ will be assimilated to the following letter, § 54. 2, and a pretonic Kamets, § 64. 2, added to the ק in order to give full effect to the reduplication; thus הִקָּטֹל, which is the form written in the paradigm.

2. The construct infinitive is formed from the absolute in the Kal by rejecting the pretonic Kamets, § 82. 1, in

Niphal by changing the last vowel to Tsere, and in the remaining species by making the last vowel conform to the corresponding vowel of the preterite.

3. The future or imperfect is formed from the construct infinitive by the appropriate personal prefixes; if the first letter of the infinitive be ה, it is rejected, § 53. 3, and its vowel given to the prefix.

a. As the preterite tense is in certain cases used of the present or the future, and the future of the present or the past, it has been supposed that primarily and radically they denote the mode of an action as complete or incomplete rather than the time of its occurrence. It has hence become customary to designate them as the Perfect and the Imperfect.

b. (1) Some verbs take Pattahh in the last syllable of the Kal future instead of the Hholem of the construct infinitive. This is particularly the case with intransitive verbs. Such as have Tsere in the preterite regularly take Pattahh in the future; of the list given § 82. 1. *a.* (1) and (2) but three חָצַב, נָבַל, שָׁכַן take Hholem, and two חָפַץ and שָׂמַח take indifferently Hholem or Pattahh. Of verbs with middle *ō* in the preterite three גָּוַל, רָכַן and שָׁכַב take Pattahh in the future; the rest either do not occur in the future, or have imperfect letters in their root which obscure their true formation.

(2) The following verbs with Pattahh in the preterite have Pattahh likewise in the Kal future. Those which do not occur in the Kal preterite, or occur only in forms which do not reveal the character of the vowel following the second radical, are distinguished by an asterisk. Verbs having a Pattahh in the future, which is due to imperfect letters in the root, (e. g. Pe Yodh, Ayin Guttural, Lamedh Guttural), are not included in this list.

אָבַל *to mourn.*	נָגַשׁ *to come near.*	*חָשַׁב *to be attentive.*
*אָלַף *to learn.*	נָשַׁל (intrans.) *to fall off.*	רָבַץ *to lie down.*
*אָמַץ *to be strong.*	נָשַׁק *to kiss.*	רָגַז *to rage* or *tremble.*
*אָנַף *to be angry.*	*נָתַךְ *to be poured.*	*רָטַב *to be wet.*
*הָבַל *to become vain.*	סָלַק (§ 86. *b.*) *to ascend.*	רָכַב *to ride.*
חָזַק *to be strong.*	עָגַב *to love.*	*רָפַד *to spread.*
חָכַם *to be wise.*	עָשַׁן *to smoke.*	*רָקַב *to rot.*
חָשַׁךְ *to be dark.*	*עָתַק *to be removed.*	שָׁכַב *to lie down.*
*כָּסַל *to be foolish.*	*צָדַק *to be righteous.*	שָׁלַט *to rule.*
לָמַד *to learn.*	קָלַל *to be lightly es-*	*שָׁלַם *to be complete.*
מָתַק *to be sweet.*	*teemed.*	*שָׁמַן *to grow fat.*

(3) The following with Pattahh in the preterite have both Pattahh and Hholem in the future.

בָּגַד *to deal treacherously.*	חָמַם *to be hot.*	נָשַׁךְ *to bite.*
גָּזַר fut. ō, *to tear,* fut. *a, to resolve.*	חָנַן *to be gracious.*	פָּעַל *to do.*
	*חָרַשׁ fut. ō, *to plough,* fut. *a, to be silent.*	פָּשַׁט *to strip off.*
הָלַךְ (mostly fut. ē) *to go.*	טָרַף *to tear.*	קָסַם *to use divination.*
זָעַם *to curse.*	יָצַר *to form.*	קָצַר fut. ō, *to cut off,* fut. *a, to be short.*
*חָבַשׁ *to bind.*	כָּעַל *to trespass.*	שָׁבַת *to rest.*
*חָלַשׁ fut. ō, *to subdue,* fut. *a, to be weak.*	נָדַר *to flee.*	תָּמַם *to be finished.*
	נָזַר *to vow.*	

c. Some imperfect verbs, chiefly Pe Yodh, take Tsere in the second syllable of the Kal future, e. g. יֵשֵׁב, יֵלֵךְ.

4. The imperative has the same form with the construct infinitive except in Hiphil, where the last vowel is Tsere as in the infinitive absolute.

a. Where the Kal future has Pattahh or Tsere the imperative takes the same.

5. The Kal active participle takes the form קֹטֵל and the passive קָטוּל. The participle of the Niphal lengthens the last vowel of the preterite from Pattahh to Kamets; those of the other species are formed by prefixing מְ to the construct infinitive, rejecting ה where this is the initial letter, § 53. 3, and lengthening the last vowel where this is short.

§ 85. 1. The preterite and future are inflected through three persons, the imperative only in the second person, a command presupposing the form of direct address. There are also distinct forms for the singular and plural numbers and for the masculine and feminine genders. Verbal inflections are made by means of pronominal fragments added to the end of the preterite and imperative, and for the most part prefixed to the future.

a. The following are the fragments used for this purpose in the various parts of the verb:

Preterite or Perfect (עָבָר).

(1) Singular. *3rd pers. masc.* The third person alone has no personal ending in any of its forms; as each of the others has such a termi-

nation, none was needed for the sake of distinction. Nothing more was required than to indicate the gender and number. The masculine singular is expressed by the simple form of the species with no appended sign whatever.

3 *fem.* The original feminine termination is תָ_, which, appended to the masculine, would give קָטַלְתָ, a form used before suffixes, § 101. 1, in Lamedh He verbs and occasionally elsewhere, § 86. *b*. Commonly, however, in verbs as in nouns and adjectives, the final ה is dropped, § 55. 2. *c*, and the previous vowel, which thus comes to stand in a simple syllable, is lengthened, קָטַלְתָּ.

2 *masc.* The appended תָ is derived from אַתָּה.

2 *fem.* תְ from אַתְּ.

1 *com.* תִי changed from כִי of אָנֹכִי; compare the similar relation of the suffixes כָ, כֶם to the pronouns אַתָּה, אַתֶּם § 72. The Ethiopic retains the *k* unaltered, *katalku*.

Plural. 2 *com.* The original plural termination § 71. *b*. is a nasal ם or ן preceded by the vowel ו. The full ending וֹן is still found in a very few instances, § 86. *b*, generally the ן is dropped § 55. 2. *a*.

2 *masc.* תֶם from אַתֶּם.

2 *fem.* תֶן from אַתֶּן.

1 *com.* נוּ from אָנוּ.

Future or Imperfect (יָתֹד).

(2) In the inflections of this tense the signs for person are prefixed, those for gender and number are mostly affixed; the fragmentary pronoun stands first as the subject and the verbal predicate assumes the appropriate forms of gender and number to agree with it.

Singular. 3*rd pers. masc.* The prefixed יְ is from הוּא; the vowel *ū*, which distinguishes the masculine pronoun, is changed to the corresponding semivowel וְ, and this at the beginning of words becomes וַ, § 56. 2.

3 *fem.* תְ, the sign of the feminine, is here prefixed.

2 *masc. and fem.* The prefixed תְ is from אַתָּה, אַתְּ, from the latter of which is derived the appended י_ of the feminine.

1 *com.* The prefixed אֶ is from אֲנִי.

Plural. 3 *masc. and* 2 *masc.* The same plural termination as in the preterite is appended to the corresponding singular forms.

3 *fem. and* 2 *fem.* The feminine plural is, as in the pronouns הֵנָּה, אַתֶּנָּה, denoted by נָה appended to the singular, the 2 fem. sing. termination י_ being dropped as superfluous.

1 *com.* The prefixed נְ is from אֲנַחְנוּ.

Imperative (צִוּוּי), *etc.*

(3) No designation of the person is here necessary as the second is the only one in use. Gender and number are indicated by the same terminations as in the corresponding person of the future. The future forms will, in fact, in every case directly yield those of the imperative by rejecting the prefixed תְּ, the sign of the second person, and restoring the ה in those cases in which it has been suppressed.

(4) The *Infinitive* (מָקוֹר *fountain*, whence other forms are derived) is an abstract verbal noun commonly masculine, but sometimes with a feminine termination.

(5) The *Participle* (בֵּינוֹנִי *intermediate* between the preterite and the future) shares the inflections of nouns and adjectives. The מ prefixed in several of the species is from the indefinite pronouns מִי or מָה.

2. The inflections of the perfect verb in all the species are shown by Paradigm II at the end of the volume.

a. In order to a better understanding of the paradigm, it should be observed that certain changes result, from attaching the personal inflections to the verb, which are to be explained by the general laws of sounds and syllables.

(1) The prefixes of the future occasion no changes unless they stand before ה which is rejected, and its vowel given to the prefix, § 53. 3, e. g. יִקְטֹל for יִהְקְטֹל, or stand before a vowelless letter when the Sh'va of the prefix becomes Hhirik, § 61. 1, thus forming a new syllable to which the initial radical is attached, e. g. יִקְטֹל for יְקְטֹל. Where א of the first person singular would receive Hhirik, it takes the diphthongal Seghol instead, § 60. 1. *a* (5), e. g. אֶקְטֹל, אֶהְקְטֹל.

(2) Terminations consisting of a vowel, viz., ה֫ and י֫ of the feminine singular and וּ of the plural, occasion the rejection of the vowel in the ultimate, § 66. 2, which is no longer needed, except in the Hiphil whose long י֫ is retained in the preterite and future, and takes the place of (֗) in the imperative, e. g. קָטְלָה, תִּקְטֹלִי but הַקְטִילָה. In the Kal imperative the rejection takes place although it creates a necessity for the formation of a new syllable, קִטְלִי, קִטְלוּ for קִטְלִי, קִטְלוּ from קְטֹל, § 61. 1.

(3) Terminations consisting of a consonant תְּ or of a simple syllable תָ, תִי, נוּ, תֶּם, נָה occasion no change, except the compression of the antecedent vowel, which now stands before two consonants, to (֗) in the preterite, and from י֫ to (֗) in the future, תִּקְטֹלְנָה, § 61. 4. But verbs with middle *o* retain the Hholem in the Kal preterite, רָכַלְתִּי.

(4) Terminations consisting of a mixed syllable תֶּם, תֶּן occasion the same compression of the vowel of the ultimate, and inasmuch as they always receive the accent, § 33. 3, they likewise cause the rejection from the penult of the Kal preterite of the pretonic Kamets, which owes its existence to the proximity of the tone syllable, § 82. 1, קְטַלְתֶּם from קָטַל.

Remarks on the Perfect Verbs.

KAL.

§ 86. *a.* Preterite. Verbs with middle Tsere exchange this for Pattahh upon the accession of a personal affix beginning with a consonant. Those with middle Hholem retain this vowel, unless it be deprived of the accent when it is shortened to Kamets Hhatuph, כָּתַבְתִּי, כָּתַבְתָּ, כָּתַבְתְּ, כָּתַבְנוּ, כְּתַבְתֶּם, כְּתַבְתֶּן, כָּתְבוּ. The second vowel, whatever it be, is regularly dropped before affixes beginning with a vowel, but here, as elsewhere throughout the paradigm, is restored and if need be lengthened on the reception of a pause accent, e. g. חָפַצְתָּ, חָפַצְתָּה, חָפְצוּ. The words זָלְפוּ Judg. 5: 5, זָלְפוּ Isa. 63: 19, 64: 2, are by Kimchi, Mikhlol fol. 5 regarded as Kal preterites from זָלַל *flowed*, in which case the second must be added to the list of forms with Dagheshforte emphatic, § 24. *c*, by Gesenius as Niphal preterites from זָלַל *shook*, comp. נִבְלָה Gen. 11: 7, נִבְּלוּ Am. 3: 11 from בָּלַל, בָּלָה.

b. Sing. 3 *fem.* The old form with ת is found constantly in Lamedh He verbs, occasionally in Lamedh Aleph, and in two instances besides, אָזְלַת Deut. 32: 36 (with the accent on the penult because of a following monosyllable, § 35. 1), and עָבַת Ezek. 46: 17 from שׂוּם. The vowel letter א is once written in place of ה, גָּבְהָא Ezek. 31: 5 *K'thibh*, § 11. 1. *a.*

2 *masc.* The vowel letter ה is sometimes appended as in the pronoun אַתָּה from which the termination is taken, בָּגַדְתָּה Mal. 2: 14, שָׁמַטְתָּה Jer. 17: 4; so in other species besides Kal, נִסַּכְתָּה Gen. 31: 30, נִלְחַמְתָּה Job 38: 12 *K'thibh*, חִנַּנְתָּה Ps. 73: 27. In the last example the ת of the root is united by Daghesh-forte with the ת of the personal affix; this union regularly occurs between roots ending with ת and affixes beginning with the same letter נָצַלְתִּי Job 23: 17, חִשַּׂבְתָּ Ps. 89: 45, חִשַּׂבְתִּי Isa. 16: 10, חִשַּׂבְתֶּם Ex. 5: 5, לַחְתָּ Ezek. 28: 8, לַחְתִּי Gen. 19: 19, יַחַתְתִּי Jer. 49: 37.

2 *fem.* The full termination תְּ of אַתְּ is frequently added in Jeremiah and Ezekiel and occasionally elsewhere, זָנִית Ezek. 16: 22, and repeatedly in the same chapter, יָלַדְתְּ Ruth 3: 3; so in other species דִּבַּרְתְּ Jer. 3: 5, לִמַּדְתְּ Jer. 13: 21. See also Jer. 4: 19, 22: 23, 46: 11.

1 *com.* The vowel letter י is, contrary to the ordinary rule, § 11. 1. *a*, omitted in four instances in the K'thibh, though it is supplied by the K'ri, יָדַעְתִּ Ps. 140: 13, Job 42: 2, בָּנִתִּ 1 Kin. 8: 48, עָשִׂתִּ Ezek. 16: 59; and perhaps אָמַרְתִּ Ps. 16: 2 may in like manner be for אָמַרְתִּי.

Plur. 3 *com.* The full ending וּן only occurs in יָדָעוּן Deut. 8: 3, 16, צָקוּן Isa. 26: 16, and יְקָשׁוּן Isa. 29: 21 from יָקַשׁ, the restoration of the Hholem before the pause accent causing the rejection of the Kamets, which is a pretonic vowel and can only remain in the immediate vicinity of the accent; the form is thus sufficiently explained without the necessity of assuming it to be the future of a verb קוּשׁ which nowhere else occurs. An otiant א, § 16. 1, is twice added to this person, as is regularly the case in Arabic, חָלְפוּא Josh. 10: 24, אָבְדוּא Isa. 28: 12. The forms of similar

appearance נָשׂוֹא Ps. 139: 20, וְנָשׂוֹא Jer. 10: 5, are in reality of different character as the א is in these a radical, whose vowel has been shifted to the preceding letter, § 57. 2. (3). The occasional omission of the vowel letter ו from the K'thibh, e. g. אֶבֶל 1 Sam. 13: 19, קִבֵּל Esth. 9: 27, שִׁבָּה Deut. 21: 7, חִיָּה Josh. 18: 12. 14. 19, שִׁבֶּה Ezek. 35: 12 indicates a difference of reading. The words of the text are in the singular, and require the pointing אָמַר etc. שָׁפָה etc.; the K'ri has substituted אָמְרוּ, שָׁפוּ etc. for the sake of a more exact concord of the verbs with their subjects, § 48.

2 *masc. and fem.* There is no example of a verb middle *ō* in the second person plural; the forms in the paradigm are inferred from analogy, to indicate which they are enclosed in parentheses. In הִשְׁכַּבְתֶּנָה Am. 4: 3, ה֫ is added to the 2 *fem.* as to the corresponding pronoun.

1 *com.* When the last radical is נ it combines with the נ of this person by Daghesh-forte, נָתַנּוּ Gen. 34: 16, נְשַׁלַּנּוּ 2 Chron. 14: 10, נַּנּוּ Judg. 19: 13.

§ 87. INFINITIVE. The Hholem of the construct is usually written without ו, בְּגֹד Isa. 33: 1, though not invariably, שְׁכֹן and שְׁכוֹן, כְּבֹשׁ and כְּבוֹשׁ, and before Makkeph is shortened to Kamets Hhatuph, § 64. 1, בְּלָקֹד Gen. 36: 31, חָסְכוֹ Ezek. 21: 26. 28. 34, עֲבוֹר Nah. 2: 1. The Hholem of the absolute infinitive is usually though not invariably written with ו, e. g. בָּגוֹד Isa. 48: 8 but שָׁכֵב Lev. 15: 24, and is immutable. The construct infinitive has Pattahh in place of Hholem in שָׁכַב 1 Kin. 1: 21 *et passim* and שָׁפַל Eccles. 12: 4. The feminine form of the construct infinitive occurs repeatedly in imperfect though it is of rare occurrence in perfect verbs, e. g. הָבָלָה Deut. 11: 22, פָּקְדָה Ex. 29: 29, קָרְבָה Ex. 36: 2, בָּרְחָה Ezek. 21: 16, רִבְעָה Lev. 20: 16, שִׁגְאָה, רִאָה, הֶאֱבָה, אֲהָבָה Jer. 31: 12, חֶמְלָה Ezek. 16: 5, טָבְאָה Lev. 15: 32. The prep. לְ is invariably prefixed to infinitives of this description with the exception of שַׁחֲטָה Hos. 5: 2. In Pe Yodh and Lamedh He verbs the feminine is the customary form.

§ 88. FUTURE. 3 *masc.* The Hholem is commonly written without Vav, though often with it יִבְלֹעַ, יִבְחֹר and יִבְחוֹר, and before Makkeph is shortened to Kamets Hhatuph, § 64. 1, יִבְלָקֹד Isa. 32: 1, the Vav being in such cases rejected by the K'ri if found in the K'thibh, e. g. אֶבְחָיֵב Hos. 8: 12; in יִגְבֹל Josh. 18: 20 the Hholem remains. The vowel of the last syllable is rejected, as is the case throughout the paradigm, upon the reception of a vowel affix, § 66. 2, unless retained or restored by the pause accent, § 65. 2, יִבְלָעֵנוּ Prov. 8: 15, תִּלְמָדוּ Jer. 10: 2; twice, however, instead of rejection Hholem is changed to Shurek יִשְׁפּוֹטוּ Ex. 18: 26, תִּשְׁכּוֹבִי Ruth 2: 8. A like form appears in the K'thibh, Prov. 4: 16 יִכְשׁוֹלוּ.

3 *fem.* The sign of the feminine is in two instances added both at the beginning and the end of the verb, viz.: תְּבוֹאָתָה Deut. 33: 16, תְּבוֹאֶיהָ Job 22: 21, paragogic ה֫ being appended to the former, § 97. 1, and a pronominal suffix to the latter. A like duplication of the sign of the second person feminine occurs in תְּבֹאת 1 Sam. 25: 34 K'ri, where the K'thibh has the fuller ending תבאתי, comp. §§ 168. 1, 171. 1.

2 *fem.* ן is sometimes added to the long vowel with which this person ends תִּרְבָּקְרִין Ruth 2: 8, תַּעֲשִׂין Ruth 3: 4, תִּשְׁכְּבְרִין 1 Sam. 1: 14, תִּחִילִין Isa. 45: 10. Occasionally the feminine ending is omitted and the masculine form used instead, e. g. תִּכְרָתִי Isa. 57: 8.

1 *com.* אֶסָּק Ps. 139: 8, though by some grammarians referred to נָסַק, is probably for אֶסְלַק from סָלַק, the liquid ל being excluded, and Dagheshforte conservative inserted in the previous letter, § 53. 3.

Plur. 2 *masc. and* 3 *masc.* The full plural termination ון is of more frequent occurrence here than in the preterite, the vowel of the second radical being either retained or rejected, תְּקַטֵּלוּן Ruth 2: 9, תְּעַבְדוּן Josh. 24: 15, תְּחַדְּלוּן Ex. 9: 29, תְּשָׁאֲלוּן Josh. 4: 6, תְּלַקְּטוּן, תִּבְלָעֵם Ps. 104: 28, תְּדַבְּרוּן 1 Sam. 2: 22, Josh. 2: 8, תְּשַׁכְּחוּן Deut. 11: 22, תְּאַכְּלוּן Jer. 21: 3; so in other species, תְּדַבְּרוּן Job 19: 23, תְּקַבְּצוּן Job 21: 24, תְּהַבְּרוּן Gen. 32: 20 and תְּהַבְּלוּן Ps. 58: 2, תְּכַבְּסוּן 2 Kin. 6: 19, תְּפַשְּׁטוּן Mic. 2: 8, תְּסַפְּרוּן Job 9: 6. It is chiefly found at the end of a clause or verse, the pausal emphasis delighting in lengthened forms, or before words beginning with a weak letter, to separate the final vowel more completely from that of the following initial syllable. In the judgment of Nordheimer יְשַׁשְּׂכוּם Isa. 35: 1 preserves this ending in a still older form; Ewald thinks the final ן has been assimilated to the initial ב of the following word, § 55. 1; possibly however, ם may here be, as it usually is, the 3 plur. suffix, and may be rendered as in the common English version *shall be glad for them.*

3 *fem.* In a very few cases the initial ת of the masculine form is retained, the distinction of gender being sufficiently marked by the termination תַּעֲבַדְנָה Dan. 8: 22, תַּחְנָה Gen. 30: 38, תַּצֵּרְנָה 1 Sam. 6: 12; or, on the other hand, the termination ה of the masculine is retained, the gender being sufficiently indicated by the prefixed ת: תִּבְטַחְנָה Jer. 49: 11, תִּקְרַבְנָה Ezek. 37: 7; sometimes the gender is neglected entirely and the masculine form used for the feminine, e. g. יִקְחֻנָּה Hos. 14: 1. The assumption that the 3 *fem. plur.* is used for the 3 *fem. sing.* in תִּקְרֶאנָה Ex. 1: 10, תִּדְרְנָה Job 17: 16, תִּרְבַּסְנָה Isa. 28: 3, תִּשְׁבַּרְנָה Isa. 27: 11, תִּשְׁלַחְנָה Judg. 5: 26, is unnecessary; in the first passage תִּלָּחֲמָה, the subject of the verb, is used in a collective sense, *wars shall occur.* Comp. 1 Kin 5: 17; the others are to be similarly explained with the exception of the last, where נָה may be the suffix with Nun epenthetic in place of the more usual form תִּשְׁלָחָה *her hand—she puts it forth.* Comp. Obad. ver. 13.

2 *and* 3 *fem.* The vowel letter ה is occasionally in the Pentateuch, and more rarely in other books, omitted from the termination נָה, particularly when there are other vowel letters in the word, תָּבוֹאן Gen. 27: 1, תָּבֹאן Gen. 30: 38, יְהִשְׁנֶן Gen. 33: 6, תִּזְנֶן Ezek. 3: 20, תְּהִירֶן, nine times in the Pentateuch, three times in Ezekiel, and once in 1 Samuel.

When the root of the verb ends with ן this is united by Dagheshforte with the affix נָה, תִּכְבַּנָּה Ezek. 17: 23, תְּקוֹנַּנָּה Ezek. 32: 16, or without Daghesh, § 25, תֶּעֱנֶנָּה Ruth 1: 13, תְּאֻמָּנָה Isa. 60: 4, תְּרֻמֶּנָּה Ps. 71: 23 in most editions. So in the fem. plur. imperative, הָאֲזֶנָּה Gen. 4: 23.

§ 89. Imperative. *Sing. masc.* The Hholem of the last syllable, as in the future and infinitive construct, is mostly written without ו, e. g. פָּקֹד, yet not always, שָׁפֹךְ and שְׁפוֹךְ; before Makkeph it is similarly shortened to Kamets Hhatuph מָלְכוּ־ Judg. 9: 14. It may perhaps be similarly shortened without Makkeph in סָרוּ Judg. 19: 5, comp. ver. 8, § 19. 2. *b*, or the vowel may be Kamets lengthened from Pattahh by the accent, which does occur, though rarely, with conjunctives, § 65. *b*.

Fem. sing. and masc. plur. The vowel of the first syllable is commonly Hhirik, but under the influence of the rejected Hholem it is occasionally Kamets Hhatuph, § 61. 1, מָלְכָי Judg. 9: 10, מָשְׁכָה Ezek. 32: 20 (but מָשְׁכוּ Ex. 12: 21, for the Methegh see § 45. 2), עָלְזִי Zeph. 3: 14, חָרְחִי Mic. 1: 16, and (with ו retained in the K'thibh) קָסָמִי 1 Sam. 28: 8, Judg. 9: 12. Upon the restoration of the original vowel by the pause accent, the vowel under the first radical is dropped as no longer necessary, שְׁפָכוּ Zech. 7: 9, עָבְרוּ Nah. 2: 9. When the third radical is an aspirate it rarely receives Dagheshlene in this mood though preceded by Sh'va, § 22. *a*. (1); such cases as חָשְׂפִי Isa. 47: 2, אָסְפִי Jer. 10: 17, are exceptional.

Fem. plur. The final vowel ָה is dropped in עָמַדְנָ Gen. 4: 23, § 61. 2; occasionally ה is not written though the vowel remains, בָּאְנָ Ruth 1: 9, קָרְאְנָ Ruth 1: 20.

§ 90. Participles. *Active.* The Hholem of the first syllable is written indifferently with or without Vav, בֹּגֵד and בּוֹגֵד, mostly without when additions are made to the word. In מוֹגֶדֶת Prov. 25: 19 Shurek is substituted for Hholem, unless, as Ewald suggests, it is a Pual participle with מְ omitted; or, as others propose, it is to be taken as an abstract noun. The Tsere of the second syllable is written without י except סֹבְבִים 2 Kin. 8: 21; it is shortened to Seghol in חֹלֶם Isa. 41: 7, upon the recession of the accent, and to Pattahh in אֹבַד Deut. 32: 28. תֹּמְכִי Ps. 16: 5 and יֹסְכִי Isa. 29: 14, 38: 5, Eccles. 1: 18 have been improperly regarded as participles with Hhirik in place of Tsere. The former is the Hiph. fut. of the verb יָמַךְ, which is found in Arabic though it occurs only in this place in Hebrew, and means *thou wilt enlarge;* the latter is the ordinary Hiphil future of יָסַף, and the construction is elliptical, *I* (*am he who*) *will add.* Participles are rarely formed from neuter verbs, yet נֹבֵל *fading*, שֹׁמֵם *desolate*, עָצוּם *strong;* verbal adjectives of the same form with the preterites middle *ē* and *ō* being mostly used instead, מָלֵא *full*, זָקֵן *old*, יָרֵא *afraid.*

Passive. This, in the few cases in which it is in use in intransitive verbs, has the sense of the active, לָבֵשׁ and לָבוּשׁ *wearing*, שָׁכֵן and שָׁכוּן *dwelling*, בָּטוּחַ *trusting;* there are occasional instances of the same thing in transitive verbs, זָכוּר *remembering*, אָחוּז *holding.* The last vowel is with few exceptions as פָּקֻם Deut. 32: 34, עָתֻם, נָאֻם written with Vav.

There are a very few instances in which participles appear to be inflected in the different persons by means of the terminations proper to the preterite. This, although common in Syriac and Palestine Aramæic, occurs in Hebrew only in the following examples.

2 *fem. sing.* יָלַדְתְּ Gen. 16: 11, Judg. 13: 5. 7; and with the fuller ending יָשַׁבְתִּי, יְקֹנַנְתִּי Jer. 22: 23, שָׁגַיְתִּי Jer. 51: 13. The punctuators must have regarded these terminations as personal inflections, because the simple form of the feminine participle and that which it always has when joined with a noun of the third person, is יֹלֶדֶת Gen. 17: 19, and with ־ paragogic אֹהֲבָתִי Hos. 10: 11 or in the K'thibh יֹשֶׁבְתִּי Ezek. 27: 3.

2 *masc. plur.* מְשַׁתַּחֲוִיתֶם Ezek. 8: 16, the Hithpael participle of שָׁחָה. The prophet instead of simply describing their act, may be supposed to repeat the language of the idolaters themselves regarding it, thus indicating their complacency in their iniquitous worship, *and they* (said to one another) *ye are worshipping;* the anomalous word, which is less surprising in Ezekiel than it would be elsewhere, being indicative, as Lightfoot and others suggest, of the anomalous character of the transaction. Such, however, is the abruptness and the difficulty of the construction that the greater number of interpreters assume an error of the text for מְשַׁתַּחֲוִים the proper plural of the participle.

3 *plur.* :מְקַלְלֻנִי *they are cursing me*, Jer. 15: 10. Kimchi explains this word as a compound of the roots קָלַל *to curse*, and מָלָה *to treat as vile;* Gesenius, as a confusing of two distinct readings, the participle מְקַלְלֵנִי and the preterite קִלְלוּנִי; and Ewald changes the text to מְקַלְלֵנִי, though his conjecture is unsustained by a single manuscript, and Nun epenthetic never occurs with participles. The word may be regarded as the plural of the participle inflected after the manner of the preterite, with the added suffix, so that the proper pointing would be מְקַלְלִינִי. It has been plausibly suggested that the initial מ belongs to the preceding word, comp. 2 Sam. 23: 6, and that the verb is a preterite.

NIPHAL.

§ 91. *a.* Preterite Sing. 3 *masc.* Some copies have נֶגְהַת Jer. 50: 23 with Seghol under the prefixed Nun for נִגְהַת.

b. Infinitive. The following may be mentioned as examples of the shorter form of the absolute נָכֹה Gen. 31: 30, נָלֹחֵם Judg. 11: 25, נָגֹלֹה 1 Sam. 2: 27, נָקֹא 2 Sam. 1: 6; of the longer form given in the paradigm הָנָתֹן Jer. 32: 4, which once appears with prosthetic א in place of ה Ezek. 14: 3 אֵהָרֵשׁ, § 53. 1. *a.* The construct infinitive usually has Tsere הֵשָׁפֵךְ Ezek. 16: 36, but is in one instance הִנָּחֵם Ps. 68: 3, formed as in Kal by rejecting the pretonic Kamets from the absolute. There are a few examples of the construct form used for the absolute הִפָּלֵד 1 Kin. 20: 39, הִשָּׁבֵר Deut. 4: 26. The prosthetic ה is commonly retained after prefixed prepositions לְהִפָּלֵד which are less closely connected with the word than the formative prefixes of the future; it is, however, rejected in בְּשָׁלֵי Prov. 24: 17, comp. בְּהִשָּׁלֵם Dan. 11: 34, three times in לֵרָאוֹת Ex. 34: 24, Deut. 31: 11, Isa. 1: 12 (where some suspect that the infinitive is Kal and propose to point לִרְאוֹת) but לְהֵרָאוֹת 2 Sam. 17: 17, and in לֵעָנֹת Ex. 10: 3. The Tsere of the last syllable of the construct infinitive, as well as of the future and imperative which are formed from it, is shortened to Seghol upon losing its accent.

חָסְתֵּר Job 34: 22, חָתְּכֵם Judg. 9: 38, רָבְּבוּ Eccles. 7: 26, rarely to Pattahh, חָתָּזוּב Job 18: 4. In the Imperative חֲתָמֵר the form with Seghol is the usual one, that with Tsere only occurring in Isa. 7: 4. The pretonic Kamets of this species is singular in not being liable to rejection on the shifting of the tone, e. g. תְּזַבְּרֵם Ezek. 21: 29, וְבָהֳתוּן Ps. 37: 9.

c. Future Sing. 1 *com.* The prefixed א occasionally has Hhirik, אֶשְׁפֹּךְ Ezek. 20: 36, 1 Sam. 12: 7, אֶהֱלֹשׁ Ezek. 14: 3, אֶפְקְדָה, אֶזְכְּרָה but אֶזְכֹּר־.

Plur. *fem.* Tsere rarely remains in the second syllable תֵּקְנֶינָה Ruth 1: 13, being, as in the Piel preterite, commonly changed to Pattahh before the concurring consonants, תֶּאֱבֶלְנָה Jer. 24: 2, so with a pause accent, תִּשְׁכֶּבְנָה Isa. 13: 16 K'ri, Zech. 14: 2 K'ri, תֵּרֶכֶסְנָה Isa. 28: 3; the first, as the original form, is, however, placed in the paradigm.

d. Imperative. Ewald regards נְקֻבְצוּ Isa. 43: 9, Joel 4: 11, נְלֻוּ Jer. 50: 5, as imperatives without the usual ה prosthetic; Böttcher as preterites used in a precative sense; both assumptions appear to be needless and unwarranted.

e. Participle. In 1 Sam. 15: 9 נְמְבָזָה *contemptible*, is in form a Niphal participle from the noun בְּזָיוֹן *contempt*.

PIEL.

§ 92. *a.* The intensive species is usually formed by doubling the second radical; in נְפַלֵּל Ezek. 28: 23, and the passive form אָמְלַל the third radical is doubled instead, an expedient resorted to repeatedly in Ayin Vav verbs and occasionally in Ayin guttural. In צִמְּאָתְנִי Ps. 88: 17 both radicals are doubled; the entire second syllable is repeated in סְחַרְחַר Ps. 38: 11, חֲמַרְמַר Lam. 2: 11, 1: 20 a passive form, as shown by the Hhateph-Kamets, § 82. 5. *b* (3), and in אֲהֻבוּחֻבּוּ Hos. 4: 18, which is probably to be read as one word, § 43. *b*; according to the division in the Massoretic text, חֻבּוּ is a separate word, and is the imperative of יָהַב *to give*, though this is always elsewhere pointed הָבוּ. In רָפַדְתָּ Ps. 45: 3, the first syllable might seem to be repeated; but as such a formation would be unexampled, it is more probably a passive (hence *ŏ* under the first letter) of רֻפְּדָה, which reduplicates the last syllable of רִפָּה=רִפֵּי § 170.

b. Intensity may likewise be denoted without a reduplication by inserting the long vowel Hholem in the first syllable of the root. This is often done in Ayin doubled verbs, but only in the following instances in others, *pret.* רוֹבַבְתִּי 1 Sam. 21: 3, שׁוֹלַלְתִּי Isa. 40: 24, זוֹלְלוּ Ps. 77: 18, שׁוֹעַעְתִּי Isa. 10: 13 *fut.* יוֹסֵף Hos. 13: 3 *inf. abs.* הוֹגֹה and הוֹדֹד Isa. 59: 13, *inf. const.* בּוֹשַׁסְתָּם Am. 5: 11, *part.* מְשׁוֹבֵבְתִּי Job 9: 15, מְלוֹשְׁנִי Ps. 101: 5 K'thibh. These are called Poel forms, and those in the preceding paragraph Pilel, Pulal, Pealal, etc. to denote their peculiar formation. They are in reality, however, only modified forms of the Piel, whose signification they share.

c. Preterite Sing. 3 *masc.* The original Pattahh of the first syllable § 82. 5. *b* (3) is preserved in נַשַּׂנִי Gen. 41: 51. The second syllable has

Seghol in דִּבֶּר (in pause דִּבֵּר), בָּסַס, בָּסֵס (twice בַּסֵּס), Pattahh in גָּלַל, אָבַד (גָּלֵל in pause), חָנַק, פָּצַע, חָלַשׁ, חָלַם, שָׁכַב (in pause שָׁכְבוּ Isa. 19: 21), שָׁשַׁק, and before Makkeph in לִמַּד־ (לָמְדוּ in pause); *a* appears likewise in the pausal form חָבְצָה Mic. 1: 7. The Tsere is always retained in the infinitive construct and future, and with the exception of פָּצַע Ps. 55: 10, in the imperative; though throughout the species it is shortened to Seghol upon losing the accent, חָבְצָךְ Deut. 30: 3, קַדֵּשׁ־ Ex. 13: 2, יְשַׁלַּח־ Deut. 7: 10.

d. Infinitive. The primitive form of the infinitive absolute is of rare occurrence, e. g. רַסֹּר Ps. 118: 18, קָנֹא 1 Kin. 19: 10, רַצֹּא Ex. 21: 19, בָּרוֹךְ Josh. 24: 10. Most commonly it has Tsere in the second syllable like the infinitive construct, אַבֵּד Jer. 12: 17, לַמֵּד Jer. 32: 33, בַּצֵּעַ Jer. 39: 18, קַבֵּץ Mic. 2: 12, שַׁלֵּם Ex. 21: 36; and in one instance it has Hhirik in the first syllable like the preterite נְאֵץ 2 Sam. 12: 14. There is no need of assuming a similar form for the infinitive construct in חַלֵּץ Lev. 14: 43, which can readily be explained as a preterite. Tsere of the construct is shortened to Seghol before Makkeph, הַבֵּר־ Isa. 59: 13, or on the recession of the accent צַחֵק Gen. 39: 14, 17, and in one instance besides, לָחֵם Judg. 5: 8. There are a few examples of the construct infinitive with a feminine termination, יַסֵּרָה Lev. 26: 18, זַמֵּרָה Ps. 147: 1, שַׁלֶּבֶת Isa. 6: 13, צַהֲלָתֵךְ Ezek. 16: 52.

e. Future Sing. 1 *com.* א is commonly prefixed with Hhateph-Pattahh; it has, however, the diphthongal Hhateph-Seghol in אֶזָּרָה Lev. 26: 33, § 60. 3. *b*, and draws to itself the full vowel which has hence arisen to a preceding י, in וְאֶסָּגְרֵם Zech. 7: 14 for וְאֶסָּגְרֵם, § 60. 3. *c*.

Plur. 2 *and* 3 *fem.* Tsere under the second radical is sometimes changed to Pattahh, though not with the same frequency as in the Niphal, תִּרַּעְנָה Isa. 13: 18, but תִּרְבַּרְנָה Job 27: 4, and in pause Prov. 24: 2.

PUAL.

§ 93. *a.* Of the vowels proper to the first syllable of the passive, § 82. 5. *b* (3), Pual ordinarily has *ŭ*, which is preferred before a doubled consonant שֻׁלַּם, § 61. 5, and Hophal *ŏ* before concurrent consonants הָשְׁבַּד. This distinction is not steadfastly adhered to, however, and Pual occasionally appears with Kamets Hhatuph, כָּלַת Ezek. 16: 4, שָׁחָה Nah. 3: 7, בָּצַע Ps. 72: 20, כָּסִי Ps. 80: 11, Prov. 24: 31, יְחֻכָּךְ Ps. 94: 20, מָאָסְתָּ *passim*. This seems to furnish the best explanation of the disputed words תְּרֻצַּחְנָה or תְּרָצַחְנָה Ps. 62: 4, מְלֻבָּבִי Ps. 101: 5 K'ri, תְּאֻכְלֶהּ Job 20: 26. Gesenius regards these as Piel forms with (ֻ) lengthened to (ָ) on the omission of Daghesh forte, § 59. *a*; but the absence of Methegh, which Gesenius inserts without authority, shows the vowel to be *ŏ* not *ā*. Others think that תְּאֻכְלֶהּ is the Kal future for תֹּאכְלֶהּ, the vowel being attracted to the guttural from the previous letter, § 60. 3. *c*. There is no difficulty, however, in regarding them all as Pual forms, and translating severally *may you be slain, armed with the tongue* (of a slanderer), *shall be made to consume him*. In Ps. 62: 4 the reading of Ben Naphtali תְּרֻצַּחְנָה is probably to be preferred to that of Ben Asher, which is found in the common text; the former is a Piel and

has an active sense: (how long) *will ye slay or murder?* In Ps. 101: 5 the K'thibh is מְלוֹשְׁנִי an active Poel form, *slandering*.

b. The vowel *ŭ* of the first syllable is occasionally written with Vav, זוּנָה Ezek. 16: 34, הוּלַּל Ps. 78: 63, יוּבַּד Judg. 18: 29, 13: 8, Job 5: 7, מְאוּבָל Ezek. 27: 19, but mostly without it.

c. PRETERITE SING. 3 *masc.* An instance of paragogic ה appended to the preterite is found in עָלְפָה Ezek. 31: 15, unless it may better be regarded as a verbal adjective.

d. INFINITIVE. The absolute form occurs in גָּבֹב Gen. 40: 15; there is no example of the construct.

e. PARTICIPLE. As מְסֻבָּן, מְמֻשָּׁח, מְשֻׁקָּד; in a few instances the initial מ is omitted, אָבָל Ex. 3: 2 for מְאֻבָּל, לָקָח 2 Kin. 2: 10 for מִלֻּקָּח, מֹרְטָה (with Daghesh-forte euphonic) Ezek. 21: 15, 16, יוּקָשִׁים Eccles. 9: 12 for מְיֻקָּשִׁים, § 59. *a.* Some of the forms in which this has been alleged may however be better explained as preterites.

HIPHIL.

§ 94. *a.* PRETERITE. The first vowel is usually Hhirik but occasionally Seghol, e. g. הֶכְלִמוּם 1 Sam. 25: 7, particularly in Pe guttural and a few Lamedh He verbs. Once א is prefixed instead of ה, אֶגְאֲלָהִי: Isa. 63: 3; in Isa. 19: 6 הֶאֱזִינוּ is not a double Hiphil with both א and ה prefixed, but is a denominative from אֹזֶן, a derivative of זָנַח, which does not indeed occur in its simple form but is justified by the analogy of אָכְזָב from כָּזַב. ת takes the place of ה in הִרְגַּלְתִּי Hos. 11: 3; so likewise the future תְּהַחֶלְנָה Jer. 12: 5, and participle מְהַתָּלָה Jer. 22: 15, though the corresponding preterite is הֶחֱרָה Neh. 3: 20.

SING. 3 *masc.* The *ē* of the second syllable is almost always written with Yodh, rarely without it, e. g. הִגְדִּל 1 Sam. 12: 24, but in every other place הִגְדִּיל. So inf. const. הַהְגִּישָׁהּ 1 Sam. 1: 6; fut. יַקְדֵּשׁ Lev. 27: 14, נַמְלֵךְ 2 Kin. 10: 5, תַּכְנִסֶנָּה 1 Sam. 1: 7; part. מַגְדִּל Ps. 18: 51, מַכְלִם Job 11: 3.

b. INFINITIVE. *Absolute.* The Tsere of the second syllable which before Makkeph is shortened to Seghol הַכֶּר־ Prov. 24: 23, 28: 21, is mostly written without י, thus הַכְבֵּד, הַכְחֵד, הַחְבֵּשׁ, הַחְקֵשׁ, הַסְכֵּן, הַתְּשֵׁל, הַשְׁכֵּב, though sometimes with it הַשְׁמִיד Am. 9: 8 but הַשְׁמֵד Isa. 14: 23, and הַשְׁכֵּל, הַשְׁכִּיל twice, הַשְׁכִּים nine times, הַשְׁכֵּם. הַקְשֵׁר. Hhirik in this syllable is rare and exceptional, הַשְׁפִּיל Ezek. 21: 31, הַקְשִׁיר Josh. 7: 7. א is prefixed instead of ה in אַשְׁכִּים Jer. 25: 3 and אַבְלֵךְ Gen. 41: 43, provided the latter is a Hebrew and not a Coptic word.

Construct. The second vowel is commonly Hhirik written with י, הַחְרִישׁ, הַשְׁלִיךְ rarely and as an exception without י, לַעְמֹד Isa. 23: 11, or with Tsere הַנְהֵל Deut. 32: 8, לַעֲשֹׂר Deut. 26: 12, Neh. 10: 39, הַסֵּךְ Jer. 44: 19, לְלַבֵּן Dan. 11: 35. In a few instances the first vowel is Hhirik as in the preterite הִשְׁמִידָךְ Deut. 7: 24, 28: 48, Joh. 11: 14, 1 Kin. 15: 29, הִרְגִּיז Jer. 50: 34, הִרְרִיבָהּ Jer. 51: 33, הִקְצוֹת Lev. 14: 43. The initial ה is mostly retained after prefixed prepositions, though it is sometimes rejected, as

לְהַשְׁחִית Am. 8: 4 but לְהַשְׁחִית Ps. 8: 3, לְשַׁחֵת once but לְהַשְׁחִית fifteen times, לְבַלּוֹת Isa. 3: 8.

c. Future Sing. Tsere is substituted for Hhirik in תַּגִּיד Ex. 19: 3, יַחֲלֹל 2 Chron. 5: 2, and without Yodh יָחֵל 1 Kin. 8: 1, יִסַּע Num. 22: 19, נִשְׁאַר 1 Sam. 14: 36, אֲחַזֵּק Isa. 42: 6.

Plur. In a very few instances Hhirik is rejected upon the addition of the masculine plural termination וּ 1 Sam. 14: 22, 31: 2, נִדְבְּקוּ Jer. 9: 2. There is no example of this without the presence of Vav conversive unless it be תַּחְבִּירוּ Job 19: 3, which may be regarded as Kal.

d. Imperative Sing. *masc.* The second syllable usually has Tsere without Yodh חַשְׁקֵנִי, חַשְׁקָה, and before Makkeph, Seghol חַכְמֵךְ Job 22: 21, חַגֵּר, 1 Sam. 23: 11, חַכְמֵי Isa. 64: 8. There are a very few examples with Hhirik in pause, הוֹצִיאֵנִי Ps. 94: 1, to which some would add הוֹצִיא Isa. 43: 8, but see Alexander, הוֹלִיכֵם Prov. 19: 25, חָבִיא Jer. 17: 18.

e. Participle. In מֹצֵא Ps. 135: 7, Tsere is taken in place of Hhirik upon the recession of the accent; מָסֵךְ Isa. 53: 3 is not a participle but a noun, Alexander *in loc.* Hhirik is, in a few exceptional cases occurring in the later books, rejected in the plural, מְחֻלָּלִים Zech. 3: 7 for מְחֻלָּלִים, מְחֻלָּלִים Jer. 29: 8, מְיֻשָּׁרִים 2 Chron. 28: 23, מְחֻצָּרִים 1 Chron. 15: 24 K'ri, 2 Chron. 7: 6 K'ri. Comp. Chald. מְחֻלָּלִין Dan. 3: 25.

HOPHAL.

§ 95. *a.* The first vowel, though mostly Kamets Hhatuph הָ, הָכְלְמָה, הָשְׁלְמָה, is occasionally Kibbuts, both vowels even appearing in the same verb, הֻשְׁבַּב Ezek. 32: 32, הָשְׁכְּבָה ver. 19, הֻשְׁכַּב 2 Kin. 4: 32; הָקְמָה Dan. 8: 11, הָכְלְמָה Isa. 14: 19, הֻשְׁלְכוּ Ezek. 16: 5, הֻשְׁלְכָה 2 Sam. 20: 21; הָקְטַר Lev. 6: 15, הֻקְטַר Mal. 1: 11, הָפְקְדִים, הֻפְקְדוּ; הָכְשְׁלִים, הָדְבַּק, הָלְחָה Ezek. 29: 18.

b. Preterite. In הֻחְלַלְתִּי *am I obliged to leave?* Judg. 9: 9. 11. 13, the characteristic הָ is rejected after ה interrogative.

c. Infinitive. The absolute has Tsere in the second syllable, הָחְלֵל Ezek. 16: 4, הָגֵּד Josh. 9: 24. The construct has Pattahh, הוּסַד Ezr. 3: 11.

d. Imperative. This mood occurs twice, הָשְׁכְּבָה Ezek. 32: 19, הָגְּלוּ Jer. 49: 8.

e. Participle. In מֻחְצָצוֹת Ezek. 46: 22 ה remains after the preformative מ.

HITHPAEL.

§ 96. *a.* Preterite. In two instances אֶ is prefixed instead of חֶ, viz., אֶתְחַבַּר 2 Chron. 20: 35, אֶשְׁתּוֹלֵל Ps. 76: 6. In the verb סָבַב Daghesh-forte is omitted in the second radical and the previous vowel lengthened § 59. *a.* וְהִסְתַּבְּבוּ, וְהִסְתַּבְּבוּ Judg. 20: 15. 17, וְהִסְתַּבְּבוּ Judg. 21: 9, in addition to which the vowel of the prefixed syllable is ŏ in הִסְתַּפְּקוּ Num. 1: 47, 2: 33, 26: 62, 1 Kin. 20: 27. In three verbs upon the assimilation of ת to the first radical,

the prefix takes *ŭ*, § 61. 5, הֻלַּשְׁנָה (the accentuation is unusual) Isa. 34: 6, הֻכְּאָה Deut. 24: 4 (but in the future always יִכָּאֵא Lev. 21: 1 and repeatedly elsewhere), הֻכַּבַּס (*inf. const.*) Lev. 13: 55. 56. These are sometimes called Hothpaal and regarded as passives of Hithpael. Where both forms exist in the same verb, however, as in פֻּקַּד and פָּקַד, there appears to be no distinction in their meaning; they seem rather to have arisen from a disposition to give to the Hithpael, where it has a passive signification, § 80. 2, the vowels of a proper passive species, § 82. 5. *b*. (3). In הִתְגֹּעֲשׁוּ Jer. 25: 16, יִתְגֹּעֲשׁוּ Jer. 46: 8 (elsewhere יִתְגָּעֲשׁוּ), and הִתְגֹּאָיִן Isa. 52: 5, *ō* prolonged from *ŭ* on account of the absence of Daghesh-forte, is for a like reason given to the first radical.

b. The last vowel of the preterite, infinitive construct, future, imperative and participle, is Tsere written without Yodh, which before Makkeph is shortened to Seghol, הִתְחַלֵּךְ־ Isa. 30: 29, הִתְחַלֶּךָ Gen. 6: 9, יִתְעַלֶּם־ Job 6: 16. Frequently, however, Pattahh is used, or, with a pause accent, Kamets, הִתְקַצֵּף *pret.*, הִתְחַנַּק *pret.* and *imper.* (but *inf. const.* and *part.* with *ē*, fut. *a* and *ē*), אֶתְנַפַּל, נִצְטַדָּק, יִתְחַדָּשׁוּ, הִתְגָּאָיִן Isa. 52: 5. Pattahh is also sometimes found in the feminine plural of the future, תִּתְחַבָּרְנָה Zech. 6: 7 but תִּשְׁתַּפַּכְנָה Lam. 4: 1, where some copies have תִּשְׁתַּפֵּכְנָה. Hhirik occurs instead of Pattahh in the preterites, וְיִתְחַדַּלְתִּי, וְיִתְקַדְּשׁוּ־ Ezek. 38: 23, וְיִתְקַדַּשְׁתֶּם Lev. 11: 44, 20: 7, each of which has Vav conversive, throwing the accent more strongly on the final syllable.

c. There is no example of the infinitive absolute. The infinitive construct once has a feminine ending הִתְחַבְּרוּת Dan. 11: 23, comp. § 128.

Paragogic and Apocopated Future and Imperative.

§ 97. The paucity of moods in Hebrew is partially compensated by modifications of the future, known as the paragogic and apocopated futures.

1. The paragogic or intentional is formed from the ordinary future by appending the termination הָ to the first person singular or plural, and in a very few instances to the third person singular, thus converting it from a simple declaration of futurity to an expression of desire or determination, אֶשְׁמְרָה *I shall keep,* אֶשְׁמְרָה *I will surely keep* or *let me keep,* Ps. 39: 2; נִנְתְּקָה *let us break,* נַשְׁלִיכָה *let us cast away,* Ps. 2: 3; יָחִישָׁה *let him hasten,* Isa. 5: 19.

a. The name "intentional" proposed by Böttcher seems more appropriate than "cohortative", which though commonly adopted is only applicable to the plural forms. The third person of the paragogic future occurs

besides the example just given, in הָבוֹאָה *let it come* Isa. 5: 19, הָעֻפָּה *be it dark* (by some explained as a noun, *darkness*) Job 11: 17, יִדַּשְׁנָּה *may he accept* (as fat), or, according to Kimchi, *may he reduce to ashes*, Ps. 20: 4, הָרֹנָּה Prov. 1: 20, 8: 3, and after Vav conversive וַתַּעְזָבָה Ezek. 23: 20, and ver. 16 K'ri. It has also been suspected in יקרהה Lev. 21: 5 K'thibh.

b. Instead of ה֫, ה֬ is appended in וְאֶקְרָאָה 1 Sam. 28: 15, יִדַּשְׁנָּה Ps. 20: 4, § 63. 1. *c;* so in the imperative הַשָּׁה or הַשֵּׁה Prov. 24: 14.

2. The apocopated or jussive future is an abbreviation of the second or third person singular and expresses a wish or command, or with a negative, dissuasion or prohibition. In the perfect verb it has a separate form only in the Hiphil species, the י of the ultimate being changed to (ֶ), or before Makkeph to (ַ), יַדְבֵּק *he will cause to cleave,* יַדְבֵּק *may he* or *let him cause to cleave;* תַּשְׂכֵּיל *thou wilt understand,* תַּשְׂכֵּל *thou mayest understand* or *understand thou,* Dan. 9: 25, אַל־תַּשְׁלֵט־ *may it not* or *let it not rule,* Ps. 119: 133. In some classes of imperfect verbs, as in the Ayin-Vav and particularly the Lamedh-He, it is used in other species still.

a. The 2nd. pers. of the Jussive is rare except with אַל. The 1st. pers. of the future is abbreviated in a very few instances, 1 Sam. 14: 36, 2 Sam. 17: 12, Job 23: 9. 11, Isa. 41: 23 K'thibh, 28.

b. The paragogic and apocopated futures, which have been aptly denominated voluntatives, may be regarded as mutually supplementary, and as forming together something like a complete Optative or Subjunctive mood. The apocopated future has, it is true, no separate form for the *second fem. sing.* or the *second* and *third pers. plur.*, in which the verb has terminal inflections, but it may be regarded as coinciding in these with the ordinary future, except that it never has the final ן. See Ruth 2: 8 and comp. Deut. 20: 3 with 1: 29. So in those species in which it is indistinguishable from the ordinary future, it may yet be regarded as included under it. Neither the apocopated nor the paragogic futures occur in the strictly passive species, viz., the Pual and Hophal, self-determination and command both implying that the subject is the originator of the action. The more flexible Arabic has three varieties of the future in addition to the ordinary one, to express as many modifications or moods.

c. The apocopated future derives its name from the apocopation of the final letter by which it is characterized in ל״ה verbs; the brevity of its form is adapted to the energy and rapid utterance of a command. On the other hand, the speaker dwells upon the word expressive of his own desire or determination, thus giving rise to the prolonged form of the paragogic future. The appended ה֫ may perhaps be identical with a like

termination added to nouns to indicate motion or direction, denoting as it does the direction of the speaker's will or wishes towards that which the verb expresses.

§ 98. 1. Paragogic הָ֫ is sometimes appended to the masculine singular of the imperative, softening the command into an earnest entreaty or expression of strong desire, שְׁמַע *hear* (thou), שְׁמָעָה *oh, hear!* or *pray, hear!* הַקְשִׁיבָה *listen,* הַקְשִׁיבָה *pray, listen!* The addition of this vowel to the imperative and to the future causes, as in the regular inflections of the paradigm, § 85. 2. *a.* (2), the rejection of the vowel of the ultimate syllable, except in the Hiphil where י֫ remains in the future and is restored in the imperative. In the Kal imperative this rejection occasions the concurrence of two vowelless consonants, the first of which must accordingly take a short vowel, § 61. 1; if the rejected vowel was Hholem this will be Kamets-Hhatuph, otherwise it will be the briefest of the vowels, Hhirik, עֲזֹב, עָזְבָה Jer. 49: 11; זְכֹר, זָכְרָה 2 Chron. 6: 42, שְׁכַב, שָׁכְבָה Gen. 39: 7. 12. When the vowel of the second radical is restored by a pause accent the inserted vowel falls away יְרֻשָּׁה׃ Deut. 33: 23, סְעֻדָה 1 Kin. 13: 7; so in the ל״א form רְפָאָה Ps. 41: 5. In the Hiphil הַקְטֵל becomes הַקְטֵלָה.

a. In a few instances the vowel-letter remains in the K'thibh though invariably thrown out in the K'ri, e. g., צרופה K'thibh, צָרְפָה K'ri Ps. 26: 2, מלוכה K'thibh, מָלְכָה K'ri Judg. 9: 8; ואשקולה K'thibh, וְאֶשְׁקָלָה K'ri Ezr. 8: 25; אשקוכה K'thibh, אֶשְׁקָפָה K'ri Isa. 18: 4. This may not indicate, however, the retention of the full vowel but only of an audible remnant of it, § 13. *a*, which is likewise attested by the occasional appearance of Hhateph Kamets, וְאֶשְׁקְחֵ֫ 1 Kin. 19: 20, וְאֶשְׁמְעָה Dan. 8: 13 (in some copies) or Hhateph Pattahh וְאֶשְׁחֲטָה Ezr. 8: 26, Jer. 32: 9, and by the fact that the resulting Sh'va, even when simple, is always vocal, § 22. *a.* (1). Occasionally Kamets-Hhatuph is found in the paragogic imperative when the vowel of the ordinary imperative is Pattahh; thus, קָרְבָה Lev. 9: 7, קָרְבָה Ps. 69: 19, and on the contrary, טְבָחָה Gen. 25: 31, *fut.* וְכִפַּר Ex. 21: 7, נְצָרָה (with Daghesh separative) Ps. 141: 3, though Delitzsch regards it as a noun.

2. As the imperative is itself a shortened form there is little room for further abbreviation; it sometimes, how-

ever, suffers apocopation of the final ה of the feminine plural, שִׁבְעֶן Gen. 4: 23 for שִׁבְעָנָה, § 61. 2, קְרֶאן Ex. 2: 20 for קְרֶאנָה, § 60. 3. *c*, and in Lamedh He verbs of final ה of the masculine singular, הַקִּד 2 Kin. 6: 18 for הַכֵּה Ezek. 6: 11, גַּל Ps. 119: 18 for גַּלֵּה; וָתֶן Deut. 9: 14 for הַרְפֵּה Judg. 11: 37, but without any evident change of meaning.

Vav Conversive or Consecutive.

§ 99. 1. The primary tenses the preterite and the future are supplemented by two secondary tenses, formed in a peculiar manner by what is called Vav Conversive (וְ הַפּוּךְ) or Vav Consecutive. This prefix has the remarkable effect, from which its name is derived, of converting the ordinary future into a preterite and the ordinary preterite into a future. The following appear to be the reasons of this singular phenomenon. Past and future are relative and depend for their signification in any given case upon the point of time from which they are reckoned. This may be the moment of speaking, when all anterior to that moment will be past, and all posterior to it future. Or by some conventional method understood between the speaker and his hearers, an ideal present may be fixed distinct from the real present and the measurements of past and future made from the former. Now Vav Consecutive placed before a future indicates that its tense is to be reckoned not from the actual present but from the time denoted by some previous word, whether verb, noun, or adverb. And when the standpoint is thus taken in the past, events may be described as future with reference to it, though they have actually taken place at the time of narration. Vav is properly the copula *and;* when this is prefixed to the future for the purpose already designated, it is followed by Pattahh

and Daghesh-forte, which give to it the force of *and then* or *and so*, indicating that what follows is the sequel of what precedes. Consequently a narration begun in the preterite may be continued in the future with Vav Consecutive, the opening words fixing the initial point from which all that come after proceed in regular succession; and the future so employed is converted into what may be called a continuative preterite. Thus, in the account of the creation in Gen. 1, the original condition of things is described in the preterite, ver. 2, *the earth was* הָיְתָה *without form and void.* The subsequent scene is then surveyed from this point. The next statement is accordingly made by a future with Vav Consecutive, ver. 3, וַיֹּאמֶר *and God said,* in its primitive import, *and then God says* or *will say,* his speaking being future to the state of things previously described. This fixes a new standpoint from which the next step in the process is a fresh advance; it is hence followed by another future with Vav Consecutive, ver. 4, וַיַּרְא *and he saw;* and so on, וַיַּבְדֵּל *and he divided,* ver. 5, וַיִּקְרָא *and he called,* etc.

a. The nature of this prefix is more precisely expressed by calling it Vav Consecutive, as Ewald and others propose. But as Vav Conversive is the name in common use, and as this sufficiently characterizes its most striking effect, there is no impropriety in retaining it. There have been various conjectures respecting its origin. Some have fancied that וַ is an abbreviation of the verb הָיָה *was,* hence וַיֹּאמֶר *he was* or *it was* (so that) *he will say* i. e. *he was about to say* or *was saying,* which is then likened to the Arabic combination of the preterite of the substantive verb with the future tense to express past action; but וְ evidently has the sense of the conjunction *and,* וַיֹּאמֶר does not mean *he said,* but *and he said.* Others have regarded it as an abbreviation of וְהָיָה *and he was;* Ewald of וְאָז *and then.* Schultens, *Instit.* p. 424, conjectured that וַיֹּאמֶר may be for וְהַיֹּאמֶר, by § 53. 3; הַ prefixed to a noun is the definite article, and points it out as one previously known; its use in this particular case might be to define the time of the action of the verb before which it stands by pointing it out as known from what preceded. The vowel of this prefix would upon this hypothesis be analogous both in its origin and its effects to the augment *ε* in Greek, or *a* in Sanskrit, by which a preterite is formed from a present or a future, *τύπτω, ἔτυπτον; τύψω, ἔτυψα,* and which is traced by Bopp to

a pronominal root having a demonstrative sense, *Vergleichende Grammatik* pp. 786 ff. The fact that the Samaritan Pentateuch sometimes substitutes ה for ו consecutive might seem to lend confirmation to this theory of its derivation. But as ה stands with equal frequency for ו copulative, and ו for the article ה, it is probable that these commutations are to be classed with the other numerous inaccuracies of this edition. Perhaps the best suggestion is that of Rödiger, who attributed no inherent significance to the vowel, but thought that it was attached to Vav Consecutive on account of the emphasis of its peculiar use.

2. Vav Consecutive, it has already been stated, is prefixed to the future with Pattahh and Daghesh-forte in the following letter, וַיִּקְבֹּץ, וַתְּבִלֵּיכוּ, וַנֵּרֶד. If the first letter of the future be Yodh with Sh'va, Daghesh is commonly omitted, § 25, but rarely if it be נ, and never if it be תּ, since its removal in this case would change the sound of the letter by restoring its aspiration, וַיִּסַּב, וַיִּדַּבֵּר but וַתִּדַּבֵּר, וַנִּסַּב. Before א of the first person singular, which cannot receive Daghesh, § 23. 1, Pattahh is lengthened to Kamets, § 60. 4, וָאֲדַבֵּר, וָאֶלֵּךְ. In the Hiphil י is, with few exceptions, e. g. וַיַּהֲשֶׁךְ Ps. 105: 28, compressed to (ֵ) as in the apocopated future, וַיַּקְשֵׁב, וַתַּגְדֵּל, and before Makkeph it is shortened to (ֶ) וַנַּגֶּד־. In the first person singular, however, י remains in the Hiphil, and a paragogic ה is not infrequently appended in all the species, e. g. וָאַשְׁלִיךְ, וָאַשְׁלֵךְ or וָאַשְׁלִיכָה; וָאַגִּיד or וָאַגִּידָה; וָאַשְׁמִיד; וָאַמְלִיטָה; וָאַדַבְּרָה or וָאֲדַבֵּר; paragogic ה also occurs though more rarely in the first pers. plur. וַנַּהֲלִיכָה Gen. 41: 11, וַנַּבְקִשָׁה, וַנַּצְוֵּמָה Ezr. 8: 23, וַנִּסְעָה ver. 31.

a. The tendency to abbreviation produced by Vav Consecutive is much more apparent in some classes of imperfect verbs. Thus, final ה is rejected from ל״ה verbs as in the apocopated future וַיִּגֶל, וַנִּגֶל, וַתִּגֶל, וַנִּגֶּה; the accent is drawn back from a mixed ultimate to a simple penult in the Kal and Hiphil of Ayin doubled verbs and of those which have a quiescent for their first or second radical, in consequence of which the vowel of the last syllable, if long, is shortened, § 64. 1, וַיָּסָב, וַיָּסָבּ; וַיֹּאבַל, וַיֹּאכַל; וַיֵּשֶׁב, וַיֵּשֶׁב; וַיֹּשֶׁב, וַיֹּשֶׁב; וַיָּקָם, וַיָּקָם; וַיָּקֶם, וַיָּקֶם. The same drawing back of the accent and shortening of the ultimate syllable occurs in the Piel of the following verbs, whose middle radical is ר, וַיְבָרֶךְ, וַיְבָרֵךְ, וַיְשָׁרֵת but not in וַיְחַלֵּם; so in וַיְמוֹדֵד Hab. 3: 6, and the Hithpael וַיִּתְפָּעֵם Dan. 2: 1. It oc-

curs also in the Niphal of a few verbs, which form the exception, however, not the rule, וַיִּגַּע, וַיִּחַם, וַיִּאָסֹף or וַיֵּאָסֹף but וַיִּבָּחֵר, וַיִּגָּלֵה, וַיִּמָּלֵךְ, וַיִּשָּׁפֵךְ, etc. The first person singular is mostly exempted from shortening or change of accent, וָאֵשֵׁב, וָאֵלֵךְ or וָאֵלֶךְ, וָאֵקִים, though it sometimes suffers apocopation in ל״ה verbs וָאֵרֶא, וָאֵחִי. The prolonged plural ending וּן is very rarely used after Vav Consecutive; it does, however, occur, e. g. וַתִּתְקָרְבוּן Deut. 1: 22, וַתִּשְׁמַדּוּן Deut. 4: 11, וַיַּחֲנוּן Judg. 11: 18.

b. In a very few instances Vav Consecutive takes Pattahh before אֲ, its vowel being conformed to the compound Sh'va, which follows, e. g. וַאֲגַלֵּשׁ Judg. 6: 9, וַאֲמִתֶּתְהוּ 2 Sam. 1: 10, וָאֲבַשֵּׁךְ Ezek. 16: 10 but וָאֶבַשֶּׁה ver. 8, וַאֲחַשְׁבָה Job 30: 26, וַאֲחַלָּה Ps. 73: 16.

§ 100. 1. Vav Consecutive prefixed to the preterite makes of it a continuative future or imperative, by connecting with it the idea of futurity or command expressed in a preceding verb. It is properly the conjunction וְ *and*, whose pointing it takes, its peculiar force being derived from its connecting power. Accordingly, in speaking of coming events, the stand-point is first fixed in the future by the opening words, and the description is then continued by the preterite with Vav Consecutive. Thus, in Samuel's recital, 1 Sam. 10: 1—8, of what was to happen to Saul, he first refers the whole to the future by the word, ver. 2, בְּלֶכְתְּךָ *upon thy departing*, and then proceeds with preterites with Vav prefixed, וּמָצְאוּ *thou shalt find*, וְאָמְרוּ *and they shall say*, ver. 3, וְחָלַפְתָּ *and thou shalt pass on*, etc. etc. In like manner injunctions begun in the imperative are continued in the preterite with Vav Consecutive. Thus the Lord directed Elijah, 1 Kin. 17: 3 לֵךְ (imper.) *go*, וּפָנִיתָ (pret.) *and turn*, וְנִסְתַּרְתָּ (pret.) *and hide*, וְהָיָה (pret.) *and it shall be*.

2. This prefix commonly has the effect of removing the accent to the ultimate in those forms in which it ordinarily stands upon the penult; and if the penult be a long mixed syllable, as in the Kal preterite of verbs with Hholem, it will in consequence be shortened, יָכֹלְתָּ, וַיּוּכַלְתָּ.

a. The shifting of the accent, which served in some measure to indicate to the ear the alteration in the sense, takes place chiefly in the following cases, viz.:

(1) It occurs with great regularity in the first and second persons singular of every species, חָלַכְתָּ *thou hast gone*, וְחָלַכְתָּ *and thou shalt go*, וְחָלַכְתִּי *and I will go*, so וְדִבַּרְתָּ, וְחָשַׁבְתִּי, וְיִתְהַלַּכְתִּי, though וַהֲצִדֹּתִי Zeph. 1: 17, except in ל״א and ל״ה verbs, where the accent usually remains in its original position although the usage is not uniform, וּפָנִיתִי Lev. 26: 9, וּבָאתִי 1 Kin. 18: 12, וְהִרְבֵּיתָ 1 Chron. 4: 10, וְחִשַּׁחְתִּיתִי 1 Sam. 15: 30, וְחִפֵּיתִי Isa. 8: 17 but וְאָצַרְתָּ Lev. 24: 5, וּבָאתָ Gen. 6: 18, וְהִרְבֵּיתִי וְהִפֵּרְתִּי Lev. 26: 9, וְהֵבֵאתָ Ex. 26: 33. In the first person plural of all verbs the accent generally remains upon the penult, וְנֵלְכָה, וְנִזְבְּחָה Ex. 8: 23, וְנִלְקְחָה Gen. 34: 17.

(2) It occurs, though less constantly, in the third feminine singular and third plural of the Hiphil of perfect verbs, and of the various species of Ayin-Vav and Ayin-doubled verbs, וְהִבְדִּילָה Ex. 26: 33, וְהֵבִיאָה Lev. 15: 29. וְנָחָה Isa. 11: 2, וְקַבּוּ, וְחַדּוּ Hab. 1: 8 but יְהַשְׁלִיכוּ Ezek. 43: 24, וְפָשׁוּ Hab. 1: 8,

Verbs with Suffixes.

§ 101. Pronouns are frequently suffixed to the verbs of which they are the object. The forms of the suffixes have already been given § 72. It only remains to consider the changes resulting from their combination with the various parts of the verb.

1. The personal terminations of the verbs undergo the following changes:

Preterite.

Sing. 3 *fem.* The old ending ת_, § 85. 1. *a* (1), takes the place of ה_.

2 *masc.* תָּ sometimes shortens its final vowel before the suffix נִי of the first person.

2 *fem.* The old ending תִי, § 86. *b*, instead of תְּ.

Plur. 2 *masc.* תּוּ from the old pronominal ending תֻּם, § 71. *b*, takes the place of תֶּם. The feminine of this person does not occur with suffixes.

Future.

PLUR. 2 *and* 3 *fem.* The distinctive feminine termination is dropped, and that of the masculine assumed, תִּקְטֹלְנָה for תִּקְטֹלְנָה.

a. In several of these cases it would be more correct to say that it is he uncompounded state of the verb in which the change has taken place, and that before suffixes the original form has been preserved, the added syllable having as it were protected it from mutation.

2. (1) Changes in the suffixes: The suffixes are joined directly to those verbal forms which end in a vowel; those forms which end in a consonant insert before the suffixes of the second pers. plur. כֶם, כֶן, and the second masc. sing. ךָ, a vocal Sh'va, and before remaining suffixes a full vowel, which in the preterite is mostly *a* and in the future and imperative mostly *e*.

(2) The 3 fem. sing. preterite inserts *ă* before the suffixes of the third pers. plural, and *ĕ* before the second fem. singular; when it stands before the third sing. suffixes הוּ, הָ, there is frequently an elision of ה, requiring Daghesh-forte conservative in the verbal ending ת to preserve the quantity of the previous short vowel, קָטְלַתּוּ for קָטְלַתְּהוּ, קָטְלַתָּה for קָטְלַתְהָ, see § 57. 2. *b*.

(3) When the third masc. sing. suffix הוּ is preceded by (ָ), the ה may be elided and the vowels coalesce into וֹ, קָטָלוֹ for קְטָלָהוּ; when it is preceded by (ִ), Shurek may be hardened to its corresponding semi-vowel וּ, קְטַלְתִּיו for קְטַלְתִּיהוּ § 62. 2.

(4) When the third fem. suffix הָ is preceded by (ָ), final Kamets is omitted to prevent the recurrence of the same sound, קָטְלָהּ for קְטָלָהָ.

(5) When הוּ, הָ of the third pers. singular are preceded by (ְ), the vowel of union for the future, a נ, called Nun Epenthetic, is sometimes inserted, particularly in emphatic and pausal forms, to prevent the hiatus between the two vowels, (ְ) being at the same time shortened to

(ָ); ה is then commonly elided and a euphonic Dagheshforte inserted in the Nun, יִקְטָלַּנּוּ for יִקְטָלֵהוּ. The same shortening of the (ֵ) and insertion of Daghesh may occur in the first person singular and plural and the second masculine singular; this, like the preceding, takes place chiefly at the end of clauses.

a. The Nun Epenthetic of the future and the Preterite vowel of union *a*, which is abbreviated to Sh'va before הָ, כֶם, כֶן, may be relics of old forms of the verb still represented in the Arabic, where the preterite ends in *a*, and one mode of the future has an appended Nun. Daghesh-forte in the suffixes of the first and second persons may be explained, as is usually done, by assuming the insertion and assimilation of Nun Epenthetic, יִקְטָלָּךְ for יִקְטָלַנְךְ; or it may be Daghesh-forte emphatic, § 24. 6, and the few cases in which Nun appears in these persons may be accounted for by the resolution of Daghesh, § 54. 3, instead of the Daghesh having arisen from the assimilation of Nun, so that יִקְטָלַנְךְ may be for יִקְטָלָּךְ instead of the reverse.

b. The suffixes, since they do not in strictness form a part of the word with which they are connected, are more loosely attached to it than the pronominal fragments which make up the inflections; hence vowels of union are employed with the former which serve to separate as well as to unite. Hence too the vocal Sh'va, inserted before the suffixes of the second person, does not so completely draw the final consonant of the verb to the appended syllable as to detach it from that to which it formerly belonged; this latter becomes, therefore, not a simple but an intermediate syllable, § 20. 2. A like distinction exists between prefixed prepositions, etc., and the personal prefixes of the future. The latter form part and parcel of the word, while the former preserve a measure of their original separateness. Hence when they form a new initial syllable by the aid of the first consonant of the word, this is properly a mixed syllable after a personal prefix but intermediate after a preposition, יִכְתֹּב but בִּכְתֹּב, § 22. *a*. Hence, too, a liability to contraction in one case which does not exist in the other, יִקָּטֵל but לְהִקָּטֵל, יִפָּל but בִּנְפֹּל.

3. Changes in the body of the verb:

(1) Except in the Kal preterite those forms which have personal terminations experience no further change from the addition of suffixes; those which are without such terminations reject the vowel of the last syllable before suffixes requiring a vowel of union and shorten it before the remainder, יִקְטְלוּ, יִקְטְלוּנִי, יִקְטֹל, יִקְטְלֵנִי, יִקְטָלְךָ; but ִי of the Hiphil species is almost always preserved, יַקְטִילֵנִי, תַּקְטִילֵנִי.

(2) In the Kal imperative and infinitive the rejection of the vowel occasions the concurrence of two vowelless letters at the beginning of the word, which impossible combination is obviated by the insertion of Hhirik to form a new syllable; or, if the rejected vowel was Hholem, by the insertion of Kamets Hhatuph.

(3) In the Kal preterite, where both vowels are liable to mutation, a distinction is made by rejecting the first before suffixes and the second before personal inflections where this is possible, e. g. קָטַל, קָטְלָה, קָטְלוּ but קָטָלָה, קָטָלוּ. Accordingly upon the reception of a suffix the vowel of the second radical, whether it be *a*, *e*, or *o*, must be restored, and if need be lengthened, whenever, in the course of regular inflection, it has been dropped, and the vowel of the first radical, wherever it remains in the regular inflection, must be rejected.

a. Final mixed syllables, as shown in 2 *b*, ordinarily become intermediate upon appending כֶם, כֶן, הָ, and consequently take a short vowel notwithstanding the following vocal Sh'va. This is invariably the case before כֶם and כֶן, unless the word to which they are attached has a long immutable vowel in the ultimate which is of course incapable of being shortened; it is also usually the case before הָ, the principal exception, so far as verbal forms are concerned, being the *a* and *e* of the Kal preterite, *a* of the Kal future, and *i* of the Hiphil, נְתָנָהּ, גְּמָלָהּ, אֲהֵבָהּ, אֶשְׂאָלָהּ, אֶנְחָנָהּ, אֶשְׁרָבָהּ, הֶשְׁרִבָהּ but אֶצְּרָהּ, תְּכַבְּדָהּ.

§ 102. 1. The first and second persons of the verb do not receive suffixes of the same person with themselves, for when the subject is at the same time the object of the action the Hithpael species is employed or a reciprocal pronoun is formed from the noun נֶפֶשׁ *soul, self*, as נַפְשִׁי *myself*. Suffixes of the third person may, however, be attached to the third person of verbs, provided the subject and object be distinct.

a. There is a single example of a verb in the first person with a suffix of the first person, but in this case the pronoun expresses the indirect object of the verb, עָשִׂיתִנִי *I have made for me*, Ezek. 29: 3.

2. Neuter verbs and passive species, whose signification does not admit of a direct object, may yet receive suffixes expressive of indirect relations, such as would be denoted by the dative or ablative in occidental languages, צַמְתָּנִי *ye fasted for me* Zech. 7: 5, תִּנָּשֶׁנִּי *thou shalt be forgotten by me*, Isa. 44: 21.

3. The infinitive may be viewed as a noun, in which case its suffix is to be regarded as a possessive, and represents the subject of the action; or it may be viewed as a verb when its suffix represents the object, דַּבְּרִי *my speaking*, שָׁלְחִי *my sending*, הָרְגֵנִי *to kill me*, נַחֲמֵנִי *to comfort me*. The participle may also receive the suffix either of a verb or a noun, the pronoun in either case denoting the object, רֹאֵנִי *seeing me* Isa. 47: 10, שֹׂנְאַי *hating me*, lit. *my haters*, Ps. 35: 19.

a. In a few exceptional cases a verbal suffix with the infinitive represents the subject בְּשׁוּבִי *at my returning* Ezek. 47: 7, or a nominal suffix the object הַתֵּתּוֹ *to permit me* Num. 22: 13, בַּמֹּתִי Deut. 25: 7, עָצְבִּי 1 Chron. 4: 10.

§ 103. Paradigm III. exhibits certain portions of the regular verb קָטַל with all the suffixes.

a. The parts of the verb selected are sufficient representatives of all the rest, and by the aid of the rules already given will enable the student to determine any other required form for himself. The third person singular of the Hiphil preterite, which undergoes no change in the body of the verb, will answer *mutatis mutandis* for all the forms in that species ending with the final radical. The third singular of the Piel preterite, which suffers a change in its last syllable only, will in like manner answer for all the forms in that species ending with the final radical. The Kal preterite is given in all the persons, both on account of the peculiarity of that tense, which suffers changes in both its vowels, and in order to exhibit the changes in the personal terminations which apply equally to the preterites of the other species. The Kal infinitive and imperative are peculiar in forming a new initial syllable which echoes the rejected vowel. The third person singular of the Kal future affords a type of all the forms in that tense which end with the final radical; and the third plural of the same tense is a type of all the future forms in this and in the other species which have personal terminations appended. The participles undergo the same changes in receiving suffixes with nouns of like formation and are therefore not included in this table.

Remarks on the Perfect Verbs with Suffixes.

PRETERITE.

§ 104. *a*. There are a few examples of (ֵ) as the union vowel of the preterite, יְסַלֵּנִי Isa. 8:11, עָשֵׂאתֵךְ 4:20, 1 Sam. 25:32, Ezek. 27:26, Daghesh-forte euphonic is twice inserted in the suffix of the first pers. sing., יְסַלֵּנִי Ps. 118:18, דָּגַּנִי Gen. 30:6.

b. The suffix of the second masc. sing. is occasionally ךָ in pause: פְּאֵרֶךָ Isa. 55:5, so with the infinitive, הַשְׁבִּיעֶךָ Deut. 28:24. 45; and a similar form with the future may perhaps be indicated by the K'thibh in Hos. 4:6 אֶמְאָסְךָ, § 11. 1. *a*, where the K'ri has אֶמְאָסֶךָּ. With ל״א and ל״ה verbs this form of the suffix is of frequent occurrence, עָנֶךָ Isa. 30:19, Jer. 23:37, הִבְרָאֶךָ Ezek. 28:15. In a few instances with the future and infinitive the final *a* is represented by the vowel letter ה, and the suffix is written כָה, יְכַצַּרְכָה, וַיְכַצַּרְכָה 1 Kin. 18:10. 44, Prov. 2:11, Ps. 145:10, Jer. 7:27, Ezek. 40:4.

c. The suffix of the second fem. sing. is commonly ךְ, קָרָאךְ Isa. 54:6, פָּגָעֵךְ Isa. 60:9, except after the third fem. sing. of the verb, when it is ֵךְ, אֲהֵבָתֵךְ Ruth 4:15, שִׁכְבָתֵךְ Isa. 47:10; sometimes, especially in the later Psalms, it has the form כִי corresponding to the pronoun אַתִּי, אֲזַבְּלֵכִי Ps. 137:6, הַמַּשְׂבִּיעֵכִי Ps. 103:4.

d. The suffix of the third masc. sing. is written with the vowel letter ה instead of ו in פְּרָשָׂה Ex. 32:25, קִבָּה Num. 28:8, and in some copies אֲכָלָה 1 Sam. 1:9, where it would be feminine; this form is more frequently appended to nouns than to verbs.

e. In a few instances the ה of the third fem. suffix is not pointed with Mappik, and consequently represents a vowel instead of a consonant, שְׁמָרָה (with the accent on the penult because followed by an accented syllable) Am. 1:11, so with the infinitive, הַזְנָחָה Ex. 9:18, חֲנָצָבָה Jer. 44:19, and the future, וַתַּחְמָלָה Ex. 2:3.

f. The suffix of the third masc. plur. receives a paragogic וֹ once in prose, וְרָגָשָׂתְמוֹ Ex. 23:31, and repeatedly in poetry, תְּמָלָאֵמוֹ, תְּוֹרִישֵׁמוֹ Ex. 15:9; once וּ is appended, וְכַסָּלְמוּ Ex. 15:5; הֶם is used but once as a verbal suffix, אַפְאִירֵהֶם Deut. 32:26.

g. The suffix of the third fem. plur. ן is seldom used, וְרָגָמְתָּן Isa. 48:7, 34:16, Hab. 2:17, Zech. 11:5; more frequently the masculine ם is substituted for it, סְחַבְתִּים Gen. 26:15, 18, וְגֵרַשְׁתִּים Ex. 2:17, וַיַּאֲסָרוּם 1 Sam. 6:10, so Num. 17:3, 4, Josh. 4:8, 2 Kin. 18:13, Hos. 2:14, Prov. 6:21; הֵן is never used with verbs. When attached to infinitives a paragogic ה ָ is sometimes added to ן, בּוֹאָנָה Ruth 1:19, לְרַחֲנָה Job 39:2.

h. Verbs, which have Tsere for the second vowel in the Kal preterite, retain it before suffixes, אֲהֵבָהּ Deut. 7:13, לְבֵשָׁם Lev. 16:4, שְׂנֵאָהּ Deut. 24:3, רֵאֵיהוּ Job 37:24. The only example of a suffix appended to a preterite whose second vowel is Illholem, is יְבַלְּהֵנִי Ps. 13:5 from בָּלַהּ,

the Hholem being shortened to Kamets Hhatuph by the shifting of the accent. Tsere of the Piel species is mostly shortened to Seghol before ה, וְקִבְּצָה Deut. 30: 3, וְקִבְּצָהּ ver. 4, but occasionally to Hhirik, אֲאַמְּצֶם (the Methegh in most editions is explained by § 45. 2) Job 16: 5, אֲרַוֶּטְךָ Isa. 25: 1, וְקִדְּשֶׁם Ex. 31: 13, פָּרְשֶׂם Isa. 1: 15; before the Seghol introduced by a pause accent it is rejected, וְבֵרֶךָ Gen. 49: 25, אֲשַׁבֵּחֲךָ 2 Sam. 11: 12. Hhirik of the Hiphil species is retained before all suffixes with very few exceptions, וַיַּשְׁלִיכֵנִי 1 Sam. 17: 25, Ps. 65: 10; in וַיַּדְרֶךָ Deut. 32: 7, the verb has the form of the apocopated future.

i. The third fem. preterite sometimes takes the third masc. sing. suffix in its full form, גְּמָלָתְהוּ Prov. 31: 12, Ezek. 15: 5, so in pause אֲחַבָּתְהוּ: 1 Sam. 18: 28, אֲבָלָתְהוּ Gen. 37: 20, כְּבָכָתְהוּ: Isa. 59: 16, and sometimes contracted by the exclusion of ת, גְּמָלָהוּ 1 Sam. 1: 24, יְלָלָהוּ Ruth 4: 15, גְּנָבָהוּ Job 21: 18. The third fem. suffix is always contracted, אֲחָזָהּ Jer. 49: 24, חֲלָצָהּ Isa. 34: 17, פְּצָצָהּ 1 Sam. 1: 6. The suffix of the third masc. plural is ־ֶם, not ־ָם, with this person of the verb, the accent falling on the penult, גְּנָבָם Gen. 31: 32, מָצָאתָם Ex. 18: 8, נְצָרָם Ps. 119: 129, עֲרָבָם Isa. 47: 14. In the intermediate syllable before ה the vowel is usually short in this person, יְלָלָהּ Jer. 22: 26, אֲבָלָהּ Ezek. 28: 18, though it is sometimes long, חֲבָלָהּ Cant. 8: 5, as it regularly is in pause וְלָדָהּ: *ibid.*; so before נִי and נוּ of the first person, אֲבָלָנִי Ps. 69: 10, מָצָאתָנוּ: Num. 20: 14.

j. The second masc. sing. preterite usually takes Pattahh before נִי except in pause, חֲקַרְתַּנִי Ps. 139: 1, חִתַּתָּנִי Job 7: 14, עֲנִבְתָּנִי Ps. 22: 2. It takes the third masc. sing. suffix either in its full form, כְּפַרְתָּהוּ: Ezek. 43: 20, or contracted, אֲסַפְתּוֹ 2 Kin. 5: 6, עַכְתּוֹ Hab. 1: 12, כַּבְתּוֹ (accent thrown back by § 35. 1) Num. 23: 27, חֲקַמְתּוֹ Ps. 89: 44.

k. The second fem. sing. preterite assumes (ָ), commonly without Yodh, § 11. 1. *a*, before suffixes, and is accordingly indistinguishable from the first person except by the suffix which it receives, § 102. 1, or by the connection in which it is found, יְלָדְתִּנִי Jer. 15: 10, בְּשַׁרְתָּהוּ Ex. 2: 10, Judg. 11: 35, 1 Sam. 19: 17, Cant. 4: 9, Jer. 2: 34, Ezek. 16: 19. 58; once it takes (ַ), הוֹרַדְתָּנוּ Josh. 2: 18, and in a few instances the masculine form is adopted in its stead, הִשְׁבַּעְתָּנוּ: Josh. 2: 17, 20, Cant. 5: 9, יְלָדָתְנוּ Jer. 2: 27 K'ri, הֲבָאתּוֹ 2 Sam. 14: 10.

l. The plural endings of the verb may be written fully וּ or defectively (ֻ), thus, in the third person, סָבְבוּנִי Ps. 18: 6, סָבְבֻנִי Hos. 12: 1; the second צְבִיתֻנִי Zech. 7: 5, הֶעֱלִיתֻנוּ Num. 20: 5, 21: 5; and the first דְּרַשְׁנֻהוּ 1 Chron. 13: 3.

FUTURE.

§ 105. *a.* The union vowel *a* is sometimes attached to the future, thus יַדְבְּקוּנִי, ־ֵנִי Gen. 19: 19, יַאֲהַבֵנִי Gen. 29: 32, Ex. 33: 20, Num. 22: 33, Isa. 56: 3, Job 9: 18; רַבִּיתֶנּוּ Isa. 63: 16; וֹ (for הוּ), יְרַדֵּנוֹ Hos. 8: 3, Ps. 35: 8, Eccles. 4: 12, 1 Sam. 21: 14, so in the K'thibh, 1 Sam. 18: 1 יִיאהבי, where the K'ri has וַיֶּאֱהַבֵהוּ; ה (for הָ), וַיִּבְרָהּ Gen. 37: 33, 2 Chron. 20: 7, Isa. 26: 5; ם, יְלָבְּשֵׁם Ex. 29: 30, Deut. 7: 15, Num. 21: 30, Ps. 74: 8.

Ps. 118: 10; וְכִתְּשָׁנָן Ex. 2: 17. In 1 Kin. 2: 24 the K'ri has וְהוֹלִידַנִי, while the K'thibh has the vowel letter י representing the ordinary *e*, וְהוֹלִיד֫נִי. The union vowel *ā* is also occasionally found with the imperative, גְּאָלָהּ Ps. 69: 19, Deut. 31: 19, Isa. 30: 8, Am. 9: 1.

b. The suffixes with Daghesh inserted occur chiefly in pause; thus נִּי, יוֹלַדְתִּנִּי Jer. 50: 44; נּוּ, חִבַּרְתָּנּוּ Gen. 27: 19, Job 7: 14, 9: 34; נּוּ (1st plur.), רְמִיתָנּוּ Job 31: 15; הָּ, אֲמַפְּתָּהּ Isa. 43: 5, 44: 2, Ps. 30: 13; נּוּ (3 masc. sing.), תִּפְקְדֶנּוּ Job 7: 18, 41: 2 K'ri, Hos. 12: 5; נָּה, תַּעְשְׂרֶנָּה Ps. 65: 10, (once with an infinitive חֲמָתָנָּה Gen. 30: 41), or without Daghesh, הִשְׂלַחְתָּנָה Judg. 5: 26, Obad. ver. 13; the unemphatic form of the suffix and that with Daghesh occur in conjunction, יַשְׂפִּילֶנָּה יַשְׁפִּילָהּ Isa. 26: 5. There are a very few examples, found only in poetry of נ inserted between the verb and the suffix without further change, יְכַבְּדֵנִי Ps. 50: 23, אֶחְסֵנְךָ Jer. 22: 24, יְעַבְּדֻנוּהוּ Jer. 5: 22, וְבָרְכֻנוּהוּ Ps. 72: 15, וְצִוָּנוּהוּ Deut. 32: 10, אֲרוֹמְמֶנְהוּ Ex. 15: 2.

c. The plural ending וֹן is in a few instances found before suffixes, chiefly in pause, יִסְּרוֹנִי Prov. 1: 28, יְשַׁבְּחוּנְךָ Ps. 63: 4, יְצַוֶּאנְךָ Ps. 91: 12, וְשָׂרְתוּנְךָ Isa. 60: 7, 10, יְעַבְּדֻנוּהוּ Jer. 5: 22, יְמַצְּאוּנְהוּ Jer. 2: 24: twice it has the union vowel *a*, יְלַכְּדָנוּ Job 19: 2, יְלַכְּדֶנּוּ Prov. 5: 22.

d. When the second vowel of the Kal future is *o*, it is rejected before suffixes requiring a union vowel, compound Sh'va being occasionally substituted for it in the place of simple, אֶסְרֹם Hos. 10: 10, יְהַפְּדֵנוּ Num. 35: 20, אֲשַׁבְּרֵנָּה Isa. 27: 3, יְקַבְּצֵנוּ Isa. 62: 2, יְהַפְּכֵהָ Ezek. 35: 6, אֶכְתְּבֵנָּה Jer. 31: 33; once the vowel remains, but is changed to Shurek, תִּשְׁמֹרֵם Prov. 14: 3; *a*, on the other hand, is retained as a pretonic vowel, § 64. 2, יִלְבָּשֵׁנִי Job 29: 14, יִלְבָּשֵׁם Ex. 29: 30, Cant. 5: 3, Gen. 19: 19; and even restored, where it is dropped in the regular inflection, יְקַלְלוּהוּ Isa. 62: 5, יְקַלְלֻהוּ Gen. 37: 24, Job 3: 5, Jer. 13: 17; so in the Imperative עָשְׂנִי Gen. 23: 11, Ps. 6: 3, עָשְׂתִּיהוּ Gen. 23: 8, 1 Chron. 28: 2. Hholem is shortened before הָ, כֶם, כֶן, though the vowel letter ו is occasionally written in the K'thibh, אֶצְרְךָ Jer. 1: 5.

e. The following are examples of feminine plurals with suffixes: 2 *fem. plur.* תִּרְאֶינִי Cant. 1: 6, 3 *fem. plur.* תַּחְשֹׁבְנִי Job 19: 15, תְּוֹלִדְתֶּךָ Jer. 2: 19. The masculine form is sometimes substituted for the feminine, וְחַלְּצוּהָ, וְצַפְּנוּהָ Cant. 6: 9.

INFINITIVE AND IMPERATIVE.

§ 106. *a. Kal infinitive.* Before הָ, כֶם, כֶן, Hholem is shortened to Kamets Hhatuph, אֲבָדָהּ Gen. 2: 17, שְׁמָדָךְ (Methegh by § 45. 2) Obad. ver. 11, אֲבָדְכֶם Gen. 3: 5, אֲיָרְכֶם Mal. 1: 7. Pattahh remains in the single example, חֲנָנְכֶם Isa. 30: 18; sometimes the vowel of the second radical is rejected before these as it is before the other suffixes, and a short vowel given to the first radical, commonly Kamets Hhatuph, עָבְרָהּ Deut. 29: 11, עָשְׂתָהּ 2 Kin. 22: 19, עָבְרְכֶם Deut. 27: 4, rarely Kibbuts, קָצְרְכֶם Lev. 19: 9, 23: 22, sometimes Hhirik, שָׁכְבָהּ Gen. 19: 33. 35 but שָׁכְבוֹ Ruth 3: 4, שָׁטְנוֹ Zech. 3: 1, נָפְלוּ 2 Sam. 1: 10, פָּתְחוּ Neh. 8: 5, and occasionally Pattahh, רָקְחָהּ

Ezek. 25: 6. In the feminine form of the infinitive, as in nouns the old feminine ending ת is substituted for ה, שָׁמְעָתוֹ Isa. 30: 19, חָבְקָתוֹ Hos. 7: 4, Ex. 30: 32. The Niphal infinitive retains its pretonic Kamets before suffixes, הִזָּכְרָם Ezek. 21: 29, Deut. 28: 20, Ps. 37: 33. Hhirik of the Hiphil Infinitive becomes Pattahh before Resh in הַזְכַּרְכֶם Ezek. 21: 29.

b. Kal Imperative. The first radical commonly receives Kamets Hhatuph upon the rejection of Hholem, זָכְרֵנִי, פָּקְדֵנִי Jer. 15: 15, but occasionally it takes Hhirik, נִצְּרָה (with Daghesh-forte euphonic) Prov. 4: 13. In the Hiph. imp. 2 masc. sing. Hhirik is restored before suffixes הַזְכִּירֵנִי Isa. 43: 26.

Imperfect Verbs.

§ 107. Imperfect verbs depart more or less from the standard already given, as the nature of their radicals may require. They are of three classes, viz.:

I. Guttural verbs, or those which have a guttural letter in the root.

II. Contracted verbs, two of whose radicals are in certain cases contracted into one.

III. Quiescent verbs, or those which have a quiescent or vowel letter in the root.

These classes may again be subdivided according to the particular radical affected. Thus there are three kinds of guttural verbs:

1. Pe guttural verbs, or those whose first radical is a guttural.

2. Ayin guttural verbs, or those whose second radical is a guttural.

3. Lamedh guttural verbs, or those whose third radical is a guttural.

There are two kinds of contracted verbs:

1. Pe Nun verbs, or those whose first radical is Nun, and is liable to be contracted by assimilation with the second.

2. Ayin doubled verbs, or those whose second and third radicals are alike, and are liable to be contracted into one.

There are four kinds of quiescent verbs:

1. Pe Yodh verbs, or those whose first radical is Yodh.

2. Ayin Vav and Ayin Yodh verbs, or those whose second radical is Vav or Yodh.

3. Lamedh Aleph verbs, or those whose third radical is Aleph.

4. Lamedh He verbs, or those in which a quiescent He takes the place of the third radical.

The guttural differ from the perfect verbs in the vowels only; the first division of the contracted verbs differ only in the consonants; the quiescent and the second division of the contracted verbs differ from the perfect verbs in both vowels and consonants.

a. The third class of imperfect verbs may either be regarded as having a quiescent letter in the root, which in certain forms is changed into a vowel, or as having a vowel in the root, which in certain forms is changed into a quiescent letter. As the settlement of this question is purely a matter of theory, the usual name of quiescent verbs has been retained as sufficiently descriptive.

b. The origin of these various technical names for the different kinds of imperfect verbs is explained § 76. 3.

Pe Guttural Verbs.

§ 108. Gutturals have the four following peculiarities, § 60, viz.:

1. They often cause a preceding or accompanying vowel to be converted into Pattahh.

2. They receive Pattahh furtive at the end of a word after a long heterogeneous vowel or before a vowelless final consonant.

3. They take compound in preference to simple Sh'va.

4. They are incapable of being doubled, and consequently do not receive Daghesh-forte.

§ 109. Pe guttural verbs are affected by these peculiarities as follows, viz.:

1. The Hhirik of the preformatives is changed to Pattahh before the guttural in the Kal future, if the second vowel be Hholem, יַעֲמֹד for יִעְמֹד; but if the second radical has Pattahh this change does not occur, because it would occasion a repetition of the same vowel in successive syllables, § 63. 1. *b*. In the Kal future *a*, therefore, in the Niphal preterite and participle, where the vowel of the second syllable is likewise *a*, and in the Hiphil preterite, where *i* is characteristic and therefore less subject to change, Hhirik is compounded with Pattahh, or, in other words, is changed to the diphthongal Seghol, יֶחֱזַק, נֶעֱבַד, הֶעֱבִיד. Seghol accompanying א of the first person singular of the Kal future, § 60. 1. *a* (5), and Kamets Hhatuph, characteristic of the Hophal species, suffer no change. The same is true of Hholem in the first syllable of the Kal participle, Hhirik of the Piel preterite, and Kibbuts of the Pual species, for the double reason that these vowels are characteristic of those forms, and that their position after the guttural renders them less liable to mutation, § 60. 1. *a* (2); the second reason applies likewise to the Hhirik of the feminine singular and masculine plural of the Kal imperative, which, as the briefest of the short vowels, is besides best adapted to the quick utterance of a command, עִבְדִי, עִבְדוּ.

2. As the guttural does not stand at the end of the word, there is no occasion for applying the rule respecting Pattahh furtive; this consequently does not appear except in יַרַח, apocopated future of יָרֵחַ, and in one other doubtful example, § 114.

3. Wherever the first radical should receive simple Sh'va the guttural takes compound Sh'va instead; this, if there be no reason for preferring another, and especi-

ally if it be preceded by the vowel Pattahh, will be Hhateph Pattahh, whose sound is most consonant with that of the gutturals; this is the case in the Kal second plural preterite, construct infinitive, future and imperative with Hholem, and in the Hiphil, infinitives, future, imperative, and participle, יַעַמְדוּ, עֲמֹד, עֲמִידְתָּם. If, however, the guttural be preceded by another vowel than Pattahh the compound Sh'va will generally be conformed to it; thus, after Seghol it becomes Hhateph Seghol as in the Kal future and imperative *ā*, the Niphal preterite and participle, and the Hiphil preterite, יֶחֱזַק, הֶעֱמִיד, and after Kamets Hhatuph it becomes Hhateph Kamets as in the Hophal species, הָעֳמַד. If this compound Sh'va in the course of inflection comes to be followed by a vowelless letter, it is changed to the corresponding short vowel, § 61. 1, thus, (ֶ) becomes (ַ) in the second feminine singular and the second and third masculine plural of the Kal future; (ֵ) becomes (ֶ) in the third feminine singular and the third plural of the Niphal preterite; and (ָ) becomes (ֳ) in the corresponding persons of the preterite and future Hophal, הָעְמְדָה, נֶעֶמְדָה, תָּעֳמַדְנָה, הָעֳמַדְתָּ.

a. The simple Sh'va following a short vowel thus formed, remains vocal as in the corresponding forms of the perfect verb, the new syllable being not mixed but intermediate, and hence a succeeding aspirate will retain its aspiration, thus יַעַמְדוּ *yaam'dhū*, not יַעַמְדוּ *yaamdū*, § 22. *a*. In like manner the Kal imperative has עִמְדִי, עִמְדוּ not עִמְדִי, עִמְדוּ, showing that even in the perfect verb קָטְלִי, קָטְלוּ were pronounced *kit'li*, *kit'lū*, not *kitlī*, *kitlū*.

4. The reduplication of the first radical being impossible in the infinitive, future and imperative Niphal, the preceding vowel, which now stands in a simple syllable, is lengthened in consequence from Hhirik to Tsere, § 60. 4, הֵעָמֵד for הֵעָמֵד.

§ 110. 1. The verb עָמַד *to stand*, whose inflections are shown in Paradigm IV, may serve as a representative of

Pe guttural verbs. The Piel, Pual, and Hithpael are omitted, as they present no deviation from the regular verbs. The Niphal of עָבַד is not in use, but is here formed from analogy for the sake of giving completeness to the paradigm.

2. The Kal imperative and future of those verbs which have Pattahh in the second syllable may be represented by חָזַק *to be strong* in the same Paradigm.

3. Certain verbs, whose first radical is א, receive Hholem in the first syllable of the Kal future after the following, which is distinctively called the Pe Aleph (פ״א) mode.

Future of Pe Aleph Verbs.

	3 *masc.*	3 *fem.*	2 *masc.*	2 *fem.*	1 *com.*
Sing.	יֹאבַל	תֹּאבַל	תֹּאבַל	תֹּאבְלִי	אֹבַל
Plur.	יֹאבְלוּ	תֹּאבַלְנָה	תֹּאבְלוּ	תֹּאבַלְנָה	נֹאבַל

Five verbs uniformly adopt this mode of inflection, viz.: אָבַד *to perish,* אָבָה *to be willing,* אָכַל *to eat,* אָמַר *to say,* אָפָה *to bake;* a few others indifferently follow this or the ordinary Pe guttural mode, אָהַב *to love,* אָחַז *to take hold,* אָסַף *to gather.*

Remarks on Pe Guttural Verbs.

§ 111. 1. The preformative of the Kal future *a* has (ַ) in one instance, וַתַּחְגֹּב Ezek. 23: 5. That of the Kal future *ō* has (ֶ) in יֶחֱזַק Prov. 10: 3, יֶחֱשַׁךְ Ps. 29: 9. Three verbs with future *ō*, חָלַם, חָלַשׂ, חָגַר have Pattahh in the first syllable when the Hholem appears, but Seghol in those forms in which the Hholem is dropped, יַחֲלֹוס Job 12: 14, יַחֲרֹשׁ 2 Kin. 3: 25 but יֶחֱרְשׁוּ Ex. 19: 21, 24; so with suffixes, יֶחֱלָמֵנִי Ps. 141: 5, יֶחֱרְשֵׁךְ Isa. 22: 19, נֶחְגְּרָהוּ Isa. 53: 2. חָפַר has יַחְפְּרוּ but יֶחֱפְרוּ.

2. *a.* If the first radical be א, the preformative takes Seghol in most verbs in the Kal future, whether *a* or *ō*, יֶאֱסֹף, יֶאֱסֹר, יֶאֱהַב, יֶאֱחֹז as well as יַאֲסֹף, יַאֲסֹר, יַאֲהַב, יַאֲחֹז; in a few with future *a*, § 110. 3, it takes Hholem, the (ַ) of the second syllable usually becoming (ָ) in pause, and in a few

instances without a pause accent, יֹאבֵד, יֹאבֶד, יֹאבְדוּ, יֹאחֵז, but יֹאמֵר; in two verbs it becomes (ֶ) after Vav conversive, וַיֹּאחֶז, וַיֹּאמֶר, but with a pause accent וַיֹּאכַל, וַיֹּאמֶר or in the first verses of several chapters of Job: וַיֹּאמַר. Hholem in these verbs is probably modified from *ā*, so that יֹאכַל is for יָאכַל from יָאכַל, § 201. *e*.

b. As א is always quiescent after Hholem in this latter form of the future, § 57. 2. (2) *a*, Pe Aleph verbs might be classed among quiescent verbs, and this is in fact done by some grammarians. But as א has the double character of a guttural and a quiescent in different forms sprung from the same root, and as its quiescence is confined almost entirely to a single tense of a single species, it seems better to avoid sundering what really belongs together, by considering the Pe Aleph as a variety of the Pe guttural verbs. In a few instances א gives up its consonantal character after (ָ), which is then lengthened to (ָ), תֹּאחָה Mic. 4: 8. When thus quiescent after either Tsere or Hholem, א is always omitted in the first person singular after the preformative א, אֹחַז Gen. 32: 5 for אֶאֱחַז, אֹהַב Prov. 8: 17 for אֶאֱהַב, אֹכַל Gen. 24: 33 for אֶאֱכַל, and occasionally in other persons, תֹּזַלִּי Jer. 2: 36 for תֵּאָזַלִּי; so תֹּחַ Deut. 33: 21, תֹּבַא Prov. 1: 10, תֹּסַךְ Ps. 104: 29, תֹּמְרוּ 2 Sam. 19: 14, וַתֹּחֲזִי 2 Sam. 20: 9, וַתֹּפַהוּ 1 Sam. 28: 24; in a few instances the vowel letter וּ is substituted for it, יֹוכְלוּ Ezek. 42: 5 for יֹאכְלוּ, אוֹמַר Neh. 2: 7, Ps. 42: 10.

c. A like quiescence or omission of א occurs in וַיֹּצַל Num. 11: 25 Hi. fut. for וַיַּאצֵל, תָּכִיל Ezek. 21: 33 Hi. inf. for הָאֲבִיל, אָזַן Job 32: 11 Hi. fut. for אֶאֱזַן, מְזַן Prov. 17: 4 Hi. part. for מַאֲזִין, § 53. 2. *a*, מְבַגְּנוּ Job 35: 11 Pi. part. for מְאַבְּגֵנוּ, § 53. 3, תְּזַלְּנִי 2 Sam. 22: 40 Pi. fut. for תְּאַזְּרֵנִי, וַיְּרֶב 1 Sam. 15: 5 Hi. fut. for וַיַּאֲרֶב, תְּתִי Isa. 21: 14 Hi. pret. for הָאֱתִי, חָלַל Isa. 13: 20 Pi. fut. for יְאַחֵל, and after prefixes לֵאמֹר for לֶאֱמֹר, the Kal infinitive of אָמַר with the preposition ל, וַאֲבָרְכָה Ezek. 28: 16 Pi. fut. with Vav conversive for וְאֶאֱבָרֶךָּ, וְאֵעָשֶׂר Zech. 11: 5 Hi. fut. with Vav conjunctive for וְאַעֲשֵׂר, הַסּוּרִים Eccles. 4: 14 Kal pass. part. with the article for הָאֲסוּרִים.

d. Hholem is further assumed by Pe Aleph roots once in the Niphal preterite, נֹאחֲזוּ Num. 32: 30 for נֶאֱחֲזוּ, and five times in the Hiphil future, אוֹבִידָה Jer. 46: 8 for אַאֲבִידָה, אוֹכִיל Hos. 11: 4 for אַאֲכִיל, אוֹצְלָה Neh. 13: 13 for אַאֲצִילָה, וַיֹּאֶל 1 Sam. 14: 24 abbreviated from וַיֵּאָלֶה for וַיַּאֲלֶה, וַיּוֹתֶר 2 Sam. 20: 5 K'ri for וַיֵּאָחֶר.

e. א draws the vowel to itself from the preformative in תֹּאחֲבוּ Prov. 1: 22 Kal fut. for תֶּאֱהֲבוּ in pause תֹּאהֲבוּ Zech. 8: 17, Ps. 4: 3, § 60. 3. *c*. Some so explain תֹּאכְלֶהוּ Job 20: 26, regarding it as a Kal future for תֹּאכַלֶהוּ with the vowel attracted to the א from the preformative; it is simpler, however, to regard it as a Pual future with Kamets Hhatuph instead of Kibbuts, § 93. *a*, as מָאָתָם Nah. 2: 4, יָחְבְּרָךְ Ps. 94: 20.

3. *a*. Kamets Hhatuph for the most part remains in the Kal infinitive and imperative with suffixes or added vowels, as עָבְדָה, עָזְבָךְ. עָמְדִי, being rarely changed to Pattahh, as in חָבְלָהוּ Prov. 20: 16, or Seghol, as אָסְפָה־ Num. 11: 16, עָרְלָה Job 33: 5. In the inflected imperative Seghol occurs

once instead of Hhirik, חֻפְּשִׁי Isa. 47: 2, and Kamets Hhatuph twice in compensation for the omitted Hholem, עָלוֹ Zeph. 3: 14 but עָלוּ Ps. 68: 5, חָרְבוּ Jer. 2: 12 but חָרְבוֹ Jer. 50: 27, though the *o* sound is once retained in the compound Sh'va of a pausal form, חָרְבוֹ Isa. 44: 27. Ewald explains תַּעַבְדֵם Ex. 20: 5, 23: 24, Deut. 5: 9, and יַעַבְדֵם Deut. 13: 3 as Kal futures, the excluded Hholem giving character to the preceding vowels; the forms, however, are properly Hophal futures, and there is no reason why the words may not be translated accordingly *be induced to serve*. In a few Kal infinitives with a feminine termination ה has (ֶ), הֲמֻלָּה Ezek. 16: 5, חֲמֻצָתוֹ Hos. 7: 4.

b. In a very few instances Pattahh is found in the first syllable of the Niphal preterite and participle and of the Hiphil preterite, נַעֲשָׂה, נַעֲשׂוּ, נַעֲשָׂה but נֶעֱשָׂה, נַעֲרָץ Ps. 89: 8, הַחֲרִיבֻם Judg. 8: 19.

§ 112. 1. The guttural invariably receives compound Sh'va in place of simple, where this is vocal in the perfect verb; and as in these cases it stands at the beginning of the word, it is more at liberty to follow its native preferences, and therefore usually takes (ֲ). In חֲרַשְׁתֶּם 2 plur. pret., חֲרוֹת inf., חֲרֵה imper. of חָרָה, the initial ח has (ֲ) under the influence of the following ר; א receives (ֲ) in the second plural of the Kal preterite, and in the feminine and plural of the passive participle, אֲבַדְתֶּם, אֲבֻלָּתֶם, אֲבוּלִים, but commonly (ֱ) in the imperative and infinitive, § 60. 3. *b*, אֱבֹל imper., אֱבֹל and אֲבֹל inf., אֱחֹז and אֲחֹז inf., אֱלֹף imper., אֱמֹר inf. and imper. (but הַאֲמֹר Job 34: 18 with ה interrogative), אֱנֹס, אֲנֹס (with ה paragogic אֲנָסָה), and in a very few instances the long vowel (ֳ), § 60. 3. *c*, אֳפֵה Ex. 16: 23 for אֲפֵה, אֳהָיוּ Isa. 21: 12.

2. Where the first radical in perfect verbs stands after a short vowel and completes its syllable, the guttural does the same, but mostly admits an echo of the preceding vowel after it, inclining it likewise to begin the syllable which follows. In the intermediate syllable thus formed, § 20. 2, the vowel remains short, only being modified agreeably to the rules already given by the proximity of the guttural, which itself receives the corresponding Hhateph. The succession is, therefore, usually (ַ ֲ), (ֶ ֱ) or (ָ ֳ). In a very few instances this correspondence is neglected; thus, in תֶּהֱלַךְ 3 fem. fut. of הָלַךְ *to go* (comp. יִצְחַק from צָחַק *to laugh*) the Hhirik of the preformative remains and the guttural takes Hhateph Pattahh; in חִטְּאָה (once, viz., Hab. 1: 15 for הֶחֱטִיאָה) and הָטְּאָה Hiphil and Hophal preterites of עָלָה *to go up*, and הֶחֱבַרְתָּ (once, viz., Josh 7: 7 for הֶעֱבַרְתָּ) Hi. pret. of עָבַר *to pass over*, the guttural is entirely transferred to the second syllable, and the preceding vowel is lengthened. The forms לָהֳיוֹת, רָהֳיָה, נִהְיָה, נִהְיֵתֶם from הָיָה *to be*, and like forms from חָיָה *to live*, are peculiar in having simple vocal Sh'va.

3. Where (ֲ) or (ֱ) are proper to the form these are frequently changed to (ַ) or (ֶ) upon the prolongation of the word or the removal of its accent forward. Thus, in the Kal future, יֶאֱסֹף 2 Kin. 5: 3, תֶּאֱסֹפְנָה Ex. 4: 29, יֶאֱסֹפְנִי Ps. 27: 10, תֶּאֱסֹף Josh. 2: 18; יֶאֱרֹג Isa. 59: 5, תֶּאֱרֹג Judg. 16: 13; the Niphal, נֶעֱלָם 1 Kin. 10: 3, נֶעֱלָמָה Nah. 3: 11, נֶעֱלָמִים Ps. 26: 4;

and especially in the Hiphil preterite with Vav conversive, וְהֶאֱבַדְתָּ Job 14: 19, וְתַאֲבַדְתָּ Deut. 7: 24, וְתַאֲבַדְתָּם Deut. 9: 3 (comp. תַּאֲכִלֵם Ps. 80: 6), וְהַאֲבַדְתִּי Lev. 23: 30; וְתַאֲבַלְתִּי Isa. 49: 26; וְתֶחֱזַקְתִּי Neh. 5: 16, וְהַחֲזַקְתִּי Ezek. 30: 25; וְהַעֲבַדְתִּיךְ Isa. 43: 23, וְתַעֲבַדְתִּיךְ Jer. 17: 4; הֶאֱזִין Deut. 1: 45, וְתַאֲזִנָהּ Ex. 15: 26, וְהַחֲתַתִּי Jer. 49: 37; after Vav conjunctive, however, the vowels remain unchanged, וְהֶחֱזַקְתִּי 1 Sam. 17: 35, וְהֶחֱלַשְׁתִּי Ps. 50: 21, Neh. 10: 33, Ezek. 37: 2. The change from (ֶ) to (ַ) after Vav conversive occurs once in the third person of the Hiphil preterite, וַתַּאֲזֵן Ps. 77: 2, but is not usual, e. g. וְהֶעֱבִירוֹ . . . וְהֶעֱלִיךְ Lev. 27: 8. There is one instance of (ֶ) instead of (ַ) in the Hiphil infinitive, הֶחֱזִיקוֹ Jer. 31: 32.

4. A vowel which has arisen from Sh'va in consequence of the rejection of the vowel of a following consonant, will be dropped in guttural as in perfect verbs upon the latter vowel being restored by a pause accent, נַעַמְדוּ, נַעֲבָדוּ; נַעֲבֹדוּ, נַעֲמֹדוּ.

5. Sometimes the silent Sh'va of the perfect verb is retained by the guttural instead of being replaced by a compound Sh'va or a subsidiary vowel which has arisen from it. This is most frequent in the Kal future, though it occurs likewise in the Kal infinitive after inseparable prepositions, in the Niphal preterite and participle, in the Hiphil species, and also though rarely in the Hophal. There are examples of it with all the gutturals, though these are most numerous in the case of ח, which is the strongest of that class of letters. In the majority of roots and forms there is a fixed or at least a prevailing usage in favour either of the simple or of the compound Sh'va; in some, however, the use of one or the other appears to be discretionary.

a. The following verbs always take simple Sh'va under the first radical in the species whose initial letters are annexed to the root, viz.:

אָדַם Hi. *to be red.*
אָהַל Ni. Hi. *to be illustrious.*
אָטַם Hi. *to close.*
*אָטַר K. *to shut.*
אָלַף K. *to learn.*
אָפַד K. *to gird on.*
אָשַׁם K. Ni. (not Hi.) *to be guilty.*
הָבַל K. Hi. *to be vain.*
הָגָה K. Hi. *to meditate.*
הָדַם K. *to thrust.*
הָדַר K. Ni. *to honour.*
הָוָה K. Ni. *to be.*
*חָבַר K. *to injure, wound.*
חָבָא Ni. Hi. Ho. *to hide.*
חָבַט K. *to beat off.*
חָבַר Hi. *to join together.*
חָגַר K. *to gird.*
חָדַל K. (not Ho.) *to cease.*
חָבַב K. *to cut.*
חָיָה K. (not Hi.) *to live.*
חָכַם K. Hi. *to be wise.*
*חָלַם K. meaning doubtful.
חָמַד K. Ni. *to desire.*
חָמַל K. *to spare.*
חָמַס K. Ni. *to do violence to.*
חָמֵץ K. *to be leavened.*
חָמַר K. *to ferment.*
חָנַךְ K. *to dedicate.*
חָסַל K. *to devour.*
חָסַם K. *to muzzle.*
חָסַר K. Hi. *to lack.*
חָפָה Ni. *to cover.*
חָפַז K. Ni. *to be panic-struck.*
חָפַן K. *to delight.*
חָפַר K. *to dig.*

* ἅπαξ λεγόμενον.

חָפַר K. Hi. *to blush.*
חָפַשׂ K. Ni. *to search.*
חָצַב K. (not Hi.) *to hew.*
†חָקַר K. Ni. *to investigate.*
*חָרַג K. *to tremble.*
חָשָׂה K. *to take up.*
חָתַךְ Ni. *to be destined.*
חָתַל Ho. *to be swaddled.*
חָתַם K. Ni. Hi. *to seal.*
חָתַף K. *to seize.*
חָתַר K. *to break through.*
חָשַׁק K. *to love, dote.*
חָתָה K. *to put on as an ornament.*
חָתַת Hi. *to gather much.*
חָתַר Ni. *to be wanting.*
חָתַר K. Ni. *to trouble.*
חָתַל Hi. *to be presumptuous.*
חָתַר K. Ni. *to pervert.*
חָתַר K. Hi. *to tithe.*
*חָתַם Ni. *to be burnt up.*
חָתַק K. Hi. *to be removed.*
חָתַר K. Ni. Hi. *to entreat.*

b. The following are used with both simple and compound Sh'va, either in the same form or in different forms, viz.:

אָסַר *to bind.*
הָפַךְ *to turn.*
חָבַל *to take in pledge.*
חָבַשׁ *to bind.*
חָזַק *to be strong.*
חָלָה *to be sick.*
חָלַק *to divide.*
חָסָה *to trust.*
חָשַׂךְ *to withhold.*
חָשַׂף *to uncover.*
חָשַׁב *to think.*
חָשַׁךְ *to be dark.*
חָתַר *to pass over.*
חָתַר *to help.*
חָטָה *to wear.*
חָתַר *to encircle.*
חָתַם *to conceal.*
חָתַר *to shut up, restrain.*
חָתַר *to supplant.*
חָתַן *to smoke.*
חָתַר *to be rich.*

c. The following have simple Sh'va only in the passages or parts alleged, but elsewhere always compound Sh'va, viz.:

אָהַב 2 Chr. 19: 2, Pr. 15: 9, *to love.*
אָזַר Ps. 65: 7, *to gird.*
אָסַף Ps. 47: 10, *to gather.*
הָלַךְ Ps. 109: 23, *to go.*
הָרַג 2 Kin. 10: 9, *to slay.*
חָלַם Job 39: 4, Jer. 29: 8, *to dream.*
חָלַף Job 20: 24, *to change, pierce.*
חָרַד Ezek. 26: 18, *to tremble.*
חָשָׁה Hi. part. *to be silent.*
חָתַת Jer. 49: 37, *to be dismayed.*
עָבַד Eccl. 5: 8, *to serve.*
עָלַז Jer. 15: 17, Ps. 149: 5, and
עָלַץ Ps. 5: 12, *to exult.*
עָרַךְ Isa. 44: 7, *to set in order.*

All other Pe guttural verbs, if they occur in forms requiring a Sh'va under the first radical, have invariably compound Sh'va.

The use or disuse of simple Sh'va is so uniform and pervading in certain verbs, that it must in all probability be traced to the fixed usage of actual speech. This need not be so in all cases, however, as in other and less common words its occurrence or non-occurrence may be fortuitous; additional examples might have been pointed differently.

§ 113. 1. The Hhirik of the prefix is in the Niphal future, imperative and participle, almost invariably lengthened to Tsere upon the omission of Daghesh-forte in the first radical, יֵחָסֶן, יֵאָצֵר, Isa. 23: 18, יֵחָבֵא (the retrocession of the accent by § 35. 1) Isa. 28: 27, יֵחָלֵף Job 38: 24, נֵחָלִין Num.

* ἅπαξ λεγόμενον. † Except Ps. 44: 22.

32: 17, וַיִּחָנֵק 2 Sam. 17: 23, which is in one instance expressed by the vowel letter י, תִּרְעֶשֶׂה Ex. 25: 31. The only exception is בֶּהֱרֵג (two accents explained by § 42. *a*) Ezek. 26: 15 for בְּהֶהָרֵג; Baer's edition has בֶּהֱרֵג. According to some copies, which differ in this from the received text, Seghol likewise occurs in אֶעֱנֶה Job 19: 7, הֶעֱשׂוֹתוֹ Ezek. 43: 18, וַיִּחֲלֶקֶם 1 Chron. 24: 3, בֶּעֱטֹה Lam. 2: 11. In Job 34: 31 הֶאֱמַר is neither the infin. nor the imper. Niph., as it has sometimes been explained, but the Kal pret. אָמַר with He Interrogative, § 232. 4.

2. The initial ה of the Hiphil infinitive is, as in perfect verbs, rarely rejected after prefixed prepositions, as לַחֲלֹק Jer. 37: 12 for לְהַחֲלִק לַחֲטִיא Eccles. 5: 5, לַעֲבִיר 2 Sam. 19: 19, לְעַשֹּׂר Deut. 26: 12, בַּעֲשֹׂר Neh. 10: 39, לעזיר 2 Sam. 18: 3 K'thibh; and still more rarely that of the Niphal infinitive, בֶּעֱטֹה Lam. 2: 11 for בְּהֵעָטֹה, בֶּהָרֵג Ezek. 26: 15.

§ 114. The letter ר resembles the other gutturals in not admitting Daghesh-forte, and in requiring the previous vowel to be lengthened instead, וַיִּדְרָם Jon. 1: 5, וַיִּהְגּוּ Ps. 106: 25. In other cases, however, it causes no change in an antecedent Hhirik, יִרְהֹם Deut. 19: 6, יִרְגֹּז 2 Sam. 7: 10, תִּרְפַּסְנָה Ps. 66: 12, except in certain forms of the verb רָאָה *to see*, viz., וַיַּרְא Kal future with Vav conversive, shortened from וַיִּרְאָה, הֶרְאָה which alternates with הֶרְאָה as Hiphil preterite, and once with Vav conversive preterite, וְתַרְאִיתִי Nah. 3: 5. It is in two instances preceded by Hhirik in the Hiphil infinitive, הַרְגִּיז הַרְגִּיזוּ Jer. 50: 34. In the Hophal species the participles מֻרְהָם Isa. 14: 6, מֻרְבֶּכֶת Lev. 6: 14 take Kibbuts in the first syllable, but רָעָל, רָעָה have the ordinary Kamets Hhatuph. Resh always retains the simple Sh'va of perfect verbs whether silent or vocal רְהֹם Gen. 44: 4, רְדָפוּנִי Ps. 129: 86, except in one instance, יְרַהֲמוּם Ps. 7: 6, where it appears to receive Pattahh furtive contrary to the ordinary rule which restricts it to the end of the word § 60. 2. *a*.

§ 115. The verb אָמַל reduplicates its last instead of its second radical in the Pual, אֻמְלַל; חָמַר reduplicates its last syllable, חֻמַּרְמְרוּ Lam. 2: 11, § 92. *a*.

חָתַל is a secondary root, based upon the Hiphil of חָלַל. See ע״ע verbs.

For the peculiar forms of אָסַם and הָלַךְ see the פ״י verbs, רָסַם and רָלַךְ.

Ayin Guttural Verbs.

§ 116. Ayin guttural verbs, or those which have a guttural for their second radical, are affected by the peculiarities of these letters, § 108, in the following manner, viz.:

1. The influence of the guttural upon a following vowel being comparatively slight, this latter is only converted into Pattahh in the future and imperative Kal,

and the feminine plural of the future and imperative Niphal, Piel, and Hithpael, where the like change sometimes occurs even without the presence of a guttural יִגָּאֵל for יִגְאַל; תִּתְגָּאֲלָנָה for תִּתְגַּאַלְנָה.

2. No forms occur which could give rise to Pattahh furtive.

3. When the second radical should receive simple Sh'va, it takes Hhateph Pattahh instead as the compound Sh'va best suited to its nature; and to this the new vowel, formed from Sh'va in the feminine singular and masculine plural of the Kal imperative, is assimilated, גֲּאָלִי for גְּאָלִי.

4. Daghesh-forte is always omitted from the second radical in Piel, Pual, and Hithpael, in which case the preceding vowel may either remain short as in an intermediate syllable, or Hhirik may be lengthened to Tsere, Pattahh to Kamets, and Kibbuts to Hholem, § 60. 4, גֵּאֵל, גָּאַל, גֹּאַל.

§ 117. The inflections of Ayin guttural verbs may be shown by the example of גָּאַל, (Paradigm V.) which in some species means *to redeem*, and in others *to pollute*. The Hiphil and Hophal are omitted, as the former agrees precisely with that of perfect verbs, and the latter differs only in the substitution of compound for simple Sh'va in a manner sufficiently illustrated by the foregoing species.

a. The Pual infinitive is omitted from the paradigm as it is of rare occurrence, and there is no example of it in this class of verbs. As the absolute infinitive Piel mostly gives up its distinctive form and adopts that of the construct, § 92. *d*, it is printed with Tsere in this and the following paradigms.

Remarks on Ayin Guttural Verbs.

§ 118. 1. If the second radical is ר, the Kal future and imperative commonly have Hholem; but the following take Pattahh, אָרַךְ *to be long*, בָּרַךְ *to kneel*, חָרַב *to be dried* or *desolate*, חָרַד *to tremble*, חָרַף *to reproach, to*

winter, חָרַן *to sharpen*, עָרַב (עָרֵב) *to be sweet*, קָרַב *to come near*, קָרַם *to cover*; טָרַף *to tear in pieces*, has either Hholem or Pattahh; חָרַשׁ *to plough* has fut. *ō*, *to be silent* has fut. *a*.

2. With any other guttural for the second radical the Kal future and imperative have Pattahh; only נָהַם *to roar*, and רָחַם *to love*, have Hholem, זָעַם *to curse*, שָׁעַל *to trespass*, and פָּעַל *to do*, have either Pattahh or Hholem; the future of אָחַז *to grasp*, is יֶאֱחֹז or יֹאחַז.

3. Pattahh in the ultimate is as in perfect verbs commonly prolonged to Kametz before suffixes, where Hholem would be rejected, אֶהֱבָהּ Prov. 4: 6, וַיִּשְׁחָטוּם 2 Kin. 10: 14, אֶשְׁתָּחֲוֶה 2 Sam. 22: 43, שְׁאָלוּנִי Isa. 45: 11, וַאֲהַבֵנִי Gen. 29: 32.

4. The feminine plurals of the Niphal and Piel futures have Pattahh with the second radical whether this be ח or another guttural, תִּבָּהַלְנָה Ezek. 7: 27, תִּשְׁרַעְנָה Prov. 6: 27, תֵּחָרַגְנָה Ezek. 16: 6, תְּנָאַפְנָה׃ Hos. 4: 13, but Tsere occasionally in pause, תְּכַהֵרְנָה Jer. 9: 17.

§ 119. 1. With these exceptions the vowel accompanying the guttural is the same as in the perfect verb; thus the Kal preterite *mid. ē*: אָהֵב Gen. 27: 9, אֲהֵבָה Deut. 15: 16; infinitive זְעֹק 1 Sam. 7: 8, סְחֹב Jer. 15: 3, with Makkeph, פְּרֹת־ 1 Kin. 5: 20; Niphal infinitive, הֵחָלֵם Ex. 17: 10, with suffixes, הֵחָשְׁכָהּ 2 Chron. 16: 7, 8, with prefixed כ, נֶהֱלַם Judg. 11: 25, נֶעֱצַב 1 Sam. 20: 6, 28, and once anomalously with prefixed א, אֶהָדֵשׁ Ezek. 14: 3 (a like substitution of א for ה occurring once in the Hiphil preterite: אֶגְאַלְתִּי Isa. 63: 3); future יֶהֱלַם Ex. 14: 14, with Vav conversive, וַיִּגְאַל Job 7: 5, וַיִּקְחַל Ex. 32: 1, וַיִּזְעַק Judg. 6: 34, וַיֶּהֱבַד Ex. 9: 15, וַיֶּהֱתַךְ Num. 22: 25, or with the accent on the penult, וַיֶּהֱלַם Ex. 17: 8, וַיֶּהֱפַךְ Gen. 41: 8; imperative, הֵחָלֵם 1 Sam. 18: 17, or with the accent thrown back, חֲפָרֵד Gen. 13: 9; Hiphil infinitive, הַבְאִישׁ 1 Sam. 27: 12, הַרְחִיק Gen. 21: 16, הַחֲלִים Deut. 7: 2, apocopated future, וַיַּרְעֵם 1 Sam. 2: 10, תַּכְחִית Deut. 9: 26, יַרְעֵל Ps. 12: 4, with Vav conversive, וַיַּכְעֵס 1 Kin. 22: 54, וָאַבְחִד Zech. 11: 8; imperative, הַחֲמֵל Ex. 28: 1, with Makkeph, הַרְחֵב־ Ps. 81: 11, הַוְעֵק־ 2 Sam. 20: 4, הַחֲחֵל־ Deut. 4: 10, with a pause accent the last vowel sometimes becomes Pattahh, הַרְחֵק Job 13: 21, הַכְעֵד Ps. 69: 24, though not always, הַחֲחֵל Lev. 8: 3. Hophal infinitive, הָחֳלֵב 2 Kin. 3: 23. Tsere is commonly retained in the last syllable of the Piel and Hithpael, which upon the retrocession or loss of the accent is shortened to Seghol, בְּחֶשׁ Lev. 5: 22, רַכֶּשׁ Hos. 9: 2, לְצַחֶק Gen. 39: 14, לְשַׁחֵק Ps. 104: 26, וָחֶרֶם 74: 10, וַיֶּעֱרֶם Gen. 39: 4, וַתְּחַפֶּשׂ Dan. 2: 1, חִתָּלֵב 2 Kin. 18: 23, and occasionally before suffixes to Hhirik, פָּרְשָׂם Isa. 1: 15, מְבַשַּׂחְתֵּהּ (fem. form for מְבַשַּׂחֲתֶךָ, § 61. 5) 1 Sam. 16: 15 but לְהַחֲרִבָם Isa. 30: 18, שַׁחֲתֵם Ezek. 5: 16; in a few instances, however, as in the perfect verb, Pattahh is taken instead, thus in the preterite, לָהַט Mal. 3: 19, רָחַם Ps. 103: 13, חָתַךְ Isa. 6: 12, אָלַשׁ Deut. 20: 7, בָּרַךְ Gen. 24: 1 (בָּרַךְ rarely occurs except in pause), פָּלַשׁ Isa. 25: 11, and more rarely still in the imperative, קָרַב Ezek. 37: 17, and future יִתְעָרַב Prov. 14: 10, וַתִּגְאַל, וַיִּתְגָּאַל׃ Dan. 1: 8.

2. שָׁאַל, which has Kametz in pause, שָׁאֵל, שָׁאֲלוּ, but most commonly Tsere before suffixes, שְׁאֵלָהּ, שָׁאֲלוּנִי, exhibits the peculiar forms, שְׁאֵלָם

1 Sam. 12: 13 שְׁאִלְתִּיו׃ 1 Sam. 1: 20, שְׁאִלְתִּיהוּ Judg. 13: 6, הִשְׁאִלְתִּיהוּ 1 Sam. 1: 28.

3. Kamets Hhatuph sometimes remains before the guttural in the Kal imperative and infinitive with suffixes or appended ה, אֲהָבֶם Hos. 9: 10, גְּאָלֶךָּ Ruth 3: 13, בְּאָבֶם Am. 2: 4, מְאָכֶם (by § 61. 1) Isa. 30: 12, חֳרְבֶם Deut. 20: 2 (the alternate form being חָרְדֶם Josh. 22: 16), רָחְצָה Ex. 30: 18, רֳחָקָה Ezek. 8: 6, and sometimes is changed to Pattahh, זָעֲקָה Isa. 57: 13, כַּעֲסָם Ezek. 20: 27, שַׁחֲטָה Hos. 5: 2, אַהֲבָה Deut. 10: 15, הַאֲבָה Jer. 31: 12, or with simple Sh'va under the guttural, צַעֲקָךְ Ps. 68: 8, זַעֲפוֹ 2 Chron. 26: 19. In זְעֲקָה Num. 23: 7, Kamets Hhatuph is lengthened to Hholem in the simple syllable. Once the paragogic imperative takes the form שְׁאָלָה Isa. 7: 11, comp. סְלָחָה, שְׁמָעָה Dan. 9: 19, רְפָאָה Ps. 41: 5.

4. Hhirik of the inflected Kal imperative is retained before ר, בְּרֹתוּ Josh. 9: 6, and once before ח, שְׁחָלוּ Job 6: 22; when the first radical is א it becomes Seghol, אֱחֹז Ps. 31: 24, אֱחֻזוּ Cant. 2: 15; in other cases it is changed to Pattahh, זַעֲקוּ Isa. 14: 31, זַעֲקוּ Judg. 10: 14.

§ 120. 1. The compound Sh'va after Kamets Hhatuph is (ֳ), after Seghol (ֱ), in other cases (ְ), as is sufficiently shown by the examples already adduced. Exceptions are rare, אֲחֻזוֹ Ruth 3: 15, תִּשְׁחֲרִי Ezek. 16: 33, יִתְאַרְהוּ *y'thā°rēhū* Isa. 44: 13.

2. The letter before the guttural receives compound Sh'va in יִצְחָק Gen. 21: 6; in נֶאֱשָׁאר Ezek. 9: 8, this leads to the prolongation of the preceding vowel and its expression by the vowel letter א, § 11, 1. *a*. This latter form, though without an exact parallel, is thus susceptible of ready explanation, and there is no need of resorting to the hypothesis of an error in the text or a confusion of two distinct readings, נִשְׁאַר and אֶשָּׁאֵר.

3. Resh commonly receives simple Sh'va, though it has compound in some forms of בָּרַךְ, e. g. תְּבֹרַכוּ Num. 6: 23, בְּרֻכוֹ Gen. 27: 27.

§ 121. 1. Upon the omission of Daghesh-forte from the second radical the previous vowel is always lengthened before ר, almost always before א, and prevailingly before ע, but rarely before ה or ח. The previous vowel remains short in בָּעַת *to terrify*, כָּעַס *to provoke*, מָעַט *to be few*, נָעַר *to shake*, and צָעַק *to cry*. It is sometimes lengthened, though not always, in בָּאַר *to make plain*, נָאַף *to commit adultery*, נָאַץ *to despise*, נָאַר *to reject*, שָׁאַל *to ask*; בָּעַר *to consume*, שָׁעַר *to sweep away by a tempest*, תָּעַב *to abhor*; בָּהַל *to affright*, כָּהָה *to be dim*, נָהַל *to lead*. It is also lengthened in קָהָה *to be dull*, which only occurs Eccl. 10: 10. The only instances of the prolongation of the vowel before ח are לָחֵם Pi. inf. Judg. 5: 8, בּוֹחַן Pu. pret. Ezek. 21: 18, הוֹחַז Pu. pret. Ps. 36: 13, הִתְרַחַצְתִּי Job 9: 30, the first two of which may, however, be regarded as nouns. Daghesh-forte is retained and the vowel consequently remains short in כָּהַת Ezek. 16: 4, רָאֹה Job 33: 21, unless the point in the latter example is to be regarded as Mappik, § 26.

2. When not lengthened, Hhirik of the Piel preterite commonly remains unaltered before the guttural, בָּחֲנוּ Job 15: 18, שָׁחֲטוּ Jer. 12: 10,

though it is in two instances changed to Seghol, אֲחֵרוּ Judg. 5: 28, רְחֵצֵנִי Ps. 51: 7.

3. When under the influence of a pause accent the guttural receives Kamets, a preceding Pattahh is converted to Seghol, § 63. 1. *a*, חִנָּחֲתִי Ezek. 5: 13, יִתְנָחֵם Num. 23: 19, חִשָּׂחֲרוּ: Num. 8: 7.

§ 122. 1. רִעֲנַן and שִׁאֲנַן are Piel forms with the third radical reduplicated in place of the second; סְחַרְחַר doubles the second syllable; and אֲהֵבוּ חֵבוּ Hos. 4: 18, is by the ablest Hebraists regarded as one word, the last two radicals being reduplicated together with the personal ending, § 92. *a*.

2. שָׁרַשׁ and סָעַר have two forms of the Piel, שִׁלַּשׁ and שֹׁרֵשׁ, סָעַר and סֹעֵר, § 92. *b*.; and גָּעַשׁ two forms of the Hithpael, וְיִתְגָּעֲשׁוּ, וְיִתְגֹּעֲשׁוּ Jer. 46: 7. 8; מְבֹאָר Isa. 52: 5, follows the analogy of the latter; יָנָאץ Eccl. 12: 5, is sometimes derived from נָאַץ *to despise*, as if it were for יְנַאֵרִיץ; such a form would however be unexampled. The vowels show it to be the Hiphil future of נוּץ or rather נָצַץ *to flourish* or *blossom*, the א being inserted as a vowel letter, § 11. 1. *a*, נְגֹאֲלוּ Isa. 59: 3, Lam. 4: 14 is a Niphal formed upon the basis of a Pual, § 83. *c*. (2). דָּרוֹשׁ Ezra 10: 16 is an anomalous infinitive from דָּלַשׁ, which some regard as Kal, others as Piel.

Lamedh Guttural Verbs.

§ 123. Lamedh guttural verbs, or those which have a guttural for their third radical, are affected by the peculiarities of these letters, § 108, in the following manner, viz.:

1. The vowel preceding the third radical becomes Pattahh in the future and imperative Kal, and in the feminine plurals of the future and imperative Piel, Hiphil, and Hithpael, יִשְׁלַח.

2. Tsere preceding the third radical, as in the Piel and Hithpael and in some forms of the other species, may either be changed to Pattahh or retained; in the latter case the guttural takes Pattahh-furtive, § 17, after the long heterogeneous vowel, e. g. יְשַׁלַּח or יְשַׁלֵּחַ.

3. Hhirik of the Hiphil species, Hholem of the Kal and Niphal infinitives, and Shurek of the Kal passive participle, suffer no change before the final guttural, which receives a Pattahh-furtive, הַשְׁלִיחַ, שְׁלֹחַ.

4. The guttural retains the simple Sh'va of the perfect verb before all afformatives beginning with a consonant, though compound Sh'va is substituted for it before suffixes, which are less closely attached to the verb, שָׁלַחְתָּ, שָׁלְחָה.

5. When, however, a personal afformative consists of a single vowelless letter, as in the second feminine singular of the preterite, the guttural receives a Pattahh-furtive to aid in its pronunciation without sundering it from the affixed termination, שָׁלַחַתְּ.

a. Some grammarians regard this as a Pattahh inserted between the guttural and the final vowelless consonant by § 61. 2, and accordingly pronounce שָׁלַחְתְּ *shālahhat* instead of *shālaʰht*. But as these verbs do not suffer even a compound Sh'va to be inserted before the affixed personal termination, it is scarcely probable that a full vowel would be admitted. And the Daghesh-lene in the final Tav and the Sh'va under it show that the preceding vowel sign is not Pattahh but Pattahh-furtive, § 17. *a.*

6. There is no occasion in these verbs for the application of the rule requiring the omission of Daghesh-forte from the gutturals.

§ 124. The inflections of Lamedh guttural verbs may be represented by שָׁלַח *to send* (Paradigm VI). The Pual and Hophal, which agree with perfect verbs except in the Pattahh-furtive of the second feminine preterite and of the absolute infinitive, are omitted from the paradigm. The Hithpael of this verb does not occur, but is here formed from analogy, the initial sibilant being transposed with ת of the prefix, according to § 82. 5.

a. Instead of the Niphal infinitive absolute with prefixed ה, which does not happen to occur in any verb of this class, the alternate form with prefixed ־, § 91. *b*, is given in the paradigm, נִשְׁלֹחַ being in actual use.

Remarks on Lamedh Guttural Verbs.

§ 125. 1. The Kal future and imperative have Pattahh except יִבַּח Gen. 43: 16; in one instance the K'thibh inserts ו, אסלוח Jer. 5: 7, where the

K'ri is אֲסַלַּח־. The vowel *a* is retained before suffixes, remaining short in בְּצַעֲם Am. 9: 1, but usually lengthened to Kamets, יְבָקְעֵיהָ 2 Chron. 21: 17, שְׁמָעֲנִי Gen. 23: 11. It is also retained in pause before paragogic ה, אֶזְעֲקָה Ps. 77: 2, סְלָחָה שְׁגָלָה Dan. 9: 19; elsewhere it is rejected אֶשְׁלְחָה 2 Sam. 14: 32, and in the imperative Hhirik is given to the first radical, שִׁמְתָה־ Job 32: 10, שִׁלְחָה Gen. 43: 8. Hhirik appears in בִּכְרָה Gen. 25: 31, but verbs whose last radical is ר commonly take Kamets Hhatuph like perfect verbs both before paragogic ה, and suffixes, שָׂמְרָה־ 1 Chron. 29: 18, קָשְׁתֹם Prov. 3: 3.

2. The Kal infinitive construct mostly has *o*, לִבְלֹעַ Jon. 2: 1, לָגֹעַ: Num. 17: 28, גָּעֳרִי Isa. 54: 9, rarely *a*, שָׁלַח Isa. 58: 9, גָּעַל Num. 20: 3, מָשְׁחָהּ 1 Sam. 15: 1. With a feminine ending, the first syllable takes Kamets Hhatuph, גָּבְרָה Zeph. 3: 11; so sometimes before suffixes, זָבְחוֹ 2 Sam. 15: 12, שָׁמְעֵי Neh. 1: 4, שָׁרְצֵם Josh. 6: 5, but more commonly Hhirik, בְּקָעֵם Am. 1: 13, פִּגְעוֹ Num. 35: 19, פִּתְחוֹ Neh. 8: 5, rarely Pattahh, רַקָּחָהּ Ezek. 25: 6.

3. Most verbs with final ר have Hholem in the Kal future and imperative. But such as have middle *ē* in the preterite take Pattahh, § 82. 1. *a;* and in addition the following, viz.: אָמַר *to shut*, אָמַר *to say*, הָדַר *to honour*, חָוַר *to grow pale*, נָעַר *to shake*, עָשַׁר *to be rich*, עָתַר *to entreat*, פָּסַר *to slip away*, צָרַר *to press*, שָׁכַר *to drink* or *be drunken*. The following have Pattahh or Hholem, גָּזַר *to decree*, נָדַר *to vow*, קָצַר fut. *o*, *to reap*, fut. *a*, *to be short*.

§ 126. 1. Tsere is almost always changed to Pattahh before the guttural in the preterite, infinitive construct, future and imperative; but it is retained and Pattahh-furtive given to the guttural in pause, and in the infinitive absolute and participle which partake of the character of nouns and prefer lengthened forms. Thus, Niphal: infin. constr., הִשָּׁמֵעַ Esth. 2: 8, הִשָּׁחֵת Isa. 51: 14, future, יִשָּׁבַח Ps. 9: 19, יִתָּקֵעַ: Job 17: 3, imperative, even in pause, הֵאָנַח. Piel: preterite, גִּפֶּה Lev. 14: 8, גִּבֵּעַ 2 Chron. 34: 4, infin. constr., בַּלַּע Hab. 1: 13, בַּלָּע Lam. 2: 8, future, יְפַגַּע Job 16: 13, תְּחַבְּקֵנוּ: 2 Kin. 8: 12, תְּהַגֶּעִין Deut. 7: 5, imperative, שַׁגַּח Ex. 4: 23. Hiphil: apocopated future, יַבְטַח 2 Kin. 18: 30, fut. with Vav consecutive, וַיַּכְנַע Judg. 4: 23, fem. plur., תַּבֶּעְנָה Ps. 119: 171, imperative, הוֹשַׁע Ps. 86: 2, and even in pause, הַצְלַח 1 Kin. 22: 12. Hithpael: תִּתְנַגַּע Prov. 17: 14, יִתְנַגַּח Dan. 11: 40, הִשְׁתַּבַּח Ps. 106: 47; this species sometimes has Kamets in its pausal forms, תִּתְחַבָּקוּ Josh. 9: 13, תִּתְכַּבָּע: Ps. 107: 27. On the other hand, the absolute infinitives: Piel, שַׁגֹּחַ Deut. 22: 7, Hiphil, הַגְבֵּהַ Isa. 7: 11, Hophal, הָמְלֹחַ Ezek. 16: 4. Participles: Kal, בָּטֹחַ Deut. 28: 52, but occasionally in the construct state with Pattahh, נֹגַשׂ Ps. 94: 9, רֹגַע Isa. 51: 15, רֹקַע Isa. 42: 5, שֹׁמַר Lev. 11: 7, Piel, מְזַבֵּחַ 1 Kin. 3: 3, Hithpael, מִשְׁתַּגֵּעַ 1 Sam. 21: 15. Tsere is retained before suffixes of the second person instead of being either changed to Pattahh or as in perfect verbs shortened to Seghol, Pi. inf. const. שַׁגֵּחֲךָ Deut. 15: 18, fut. אֲשַׁגֵּחֲךָ Gen. 31: 27. There is one instance of Pattahh in the Hiphil inf. const., הוֹכַח Job 6: 26, and one before a grave suffix חַזְּרָכֶם Ezek. 21: 29, comp. fut. יִשְׁרָצֵם Isa. 35: 4; הַפְצֵר 1 Sam. 15: 23 Hiph. abs. inf. in pause is by § 65. *a*.

2. In verbs with final ר Pattahh takes the place of Tsere for the most part in the Piel preterite (in pause Tsere), and frequently in the Hithpael (in pause Kamets); but Tsere (in pause Tsere or Pattahh, § 65. *a*) is commonly retained elsewhere, שִׁבֵּר Ps. 76: 4, שִׁבֶּר Ex. 9: 25, תִּתְחַבֵּר Prov. 25: 6, תִּתְחַזֵּר Ps. 93: 1, יֵאָבֵר Gen. 22: 14, יֵאָבֶר Gen. 10: 19, תֵּעָקֵר Zeph. 2: 4. Two verbs have Seghol in the Piel preterite, דִּבֶּר (in pause, דִּבֶּר) and כִּפֶּר.

§ 127. 1. The guttural almost always has Pattahh-furtive in the second fem. sing. of the preterite, שָׁמַעַתְּ Ruth 2: 8, עָשִׂיתָ Ezek. 16: 28, חִגַּעַתְּ Esth. 4: 14, חִבַּלַחְתְּ Ezek. 16: 4, scarcely ever simple Sh'va, לָקַחְתְּ 1 Kin. 14: 3, שָׁבַחְתְּ Jer. 13: 5, and never Pattahh (which might arise from the concurrence of consonants at the end of a word, § 61. 2), unless in לָקַחַת Gen. 30: 15, and נָקַחַת Gen. 20: 16, the former of which admits of ready explanation as a construct infinitive, and the latter may be a Niphal participle in the feminine singular, whether it be understood *it is rectified* or *thou art righted*, i. e. justice is done thee by this indemnification. Pattahh is once inserted before the abbreviated termination of the feminine plural imperative, שְׁמַעְנָה Gen. 4: 23 for שִׁמַּעְנָה.

2. The guttural takes compound instead of simple Sh'va before suffixes, not only when it stands at the end of the verb, יְנָצְּךָ Num. 24: 11, רְשָׁעֲךָ Prov. 25: 17, but also in the first plural of the preterite, שְׁכָחֲנוּךָ Ps. 44: 18 (שָׁכַחֲנוּ ver. 21), Isa. 59: 12, Ps. 35: 25, 2 Sam. 21: 6, Ps. 132: 6; ר retains simple Sh'va before all personal terminations and suffixes, אָבַרְתְּ Judg. 4: 20, אֲבַרְכֶם Mal. 1: 7, בָּרְכֶם Josh. 4: 23.

3. In a few exceptional cases the letter before the guttural receives compound Sh'va, אֶפְעֶה Isa. 27: 4, לְקָחָהּ Gen. 2: 23.

§ 128. The Hiphil infinitive construct once has the feminine ending וּת, הַשְׁלֹשׁוּת Ezek. 24: 26; וַתְּגַבְּהֶינָה Ezek. 16: 50 for וַתְּגַבַּהְנָה perhaps owes its anomalous form to its being assimilated in termination to the following word, which is a Lamedh He verb. In נשקה Am. 8: 8 K'thibh for נְשַׁקָּה the guttural ע is elided, § 53. 3.

Pe Nun (פ״ן) Verbs.

§ 129. Nun, as the first radical of verbs, has two peculiarities, viz.:

1. At the end of a syllable it is assimilated to the following consonant, the two letters being written as one, and the doubling indicated by Daghesh-forte. This occurs in the Kal future, Niphal preterite and participle, and in the Hiphil and Hophal species throughout; thus, יִנְגַּשׁ becomes יִגַּשׁ, written יִגַּשׁ, so נִגַּשׁ for נִנְגַּשׁ, הִגִּישׁ for הִנְגִּישׁ. In the Hophal, Kamets Hhatuph becomes Kibbuts before the doubled letter, § 61. 5, הֻגַּשׁ for הָנְגַּשׁ.

2. In the Kal imperative with Pattahh it is frequently dropped, its sound being easily lost from the beginning of a syllable when it is without a vowel, גָּשׁ for נָגַשׁ, § 53. 2. A like rejection occurs in the Kal infinitive construct of a few verbs, the abbreviation being in this case compensated by adding the feminine termination ת; thus, גֶּשֶׁת for גַּשְׁתְּ (by § 63. 2. *a*), the primary form being נָגַשׁ.

a. In the Indo-European languages likewise, *n* is frequently conformed to or affected by a following consonant, and in certain circumstances it is liable to rejection, e. g. *ἐγγράφω, ἐμβάλλω, συστρέφω.*

§ 130. 1. The inflections of Pe Nun verbs may be represented by נָגַשׁ *to approach* (Paradigm VII). In the Piel, Pual, and Hithpael, they do not differ from perfect verbs. The last column of the paradigm is occupied by the Kal species of נָתַן *to give*, which is peculiar in assimilating its last as well as its first radical, and in having Tsere in the future.

a. The Kal of נָגַשׁ is used only in the infinitive, future, and imperative, the preterite and participle being supplied by the Niphal, which has substantially the same sense: the missing parts are in the paradigm supplied from analogy.

b. The future of נָתַן has Pattahh in one instance before Makkeph, נְתַךְ־ Judg. 16: 5.

Remarks on Pe Nun Verbs.

§ 131. 1. If the second radical be a guttural or a vowel letter, Nun becomes strong by contrast and is not liable to rejection or assimilation, נָחַל Num. 34: 18, נָהַג 2 Kin. 4: 24, הִנְחַנִי Gen. 24: 48, אַנְיֵהוּ Ex. 15: 2. It is, however, always assimilated in נָחַם the Niphal preterite of נָחַם *to repent*, and occasionally in נָחַת *to descend*, e. g. יֵחַת Jer. 21: 13, תֵּחַת Prov. 17: 10, נֶחַתּוּ Ps. 38: 3 but תִּנָּחַת ibid., חַנָּחַת Joel 4: 11.

2. Before other consonants the rule for assimilation is observed with rare exceptions, viz.: תִּנְגְּשׁוּ Isa. 58: 3, תִּנְהֹם Ps. 68: 3, יִנְכֹּר Jer. 3: 5, יִנְצְרוּ: Deut. 33: 9 (and occasionally elsewhere), יִנְקָבוּ־ Job 40: 24, יִנְקְפוּ: Isa. 29: 1, הַנְתֵּךְ Ezek. 22: 20, לַנְּפָל (for לְהַנְפִּיל) Num. 5: 22, פַּנְלָחָה (for פְּהַנְלָחָה with Daghesh-forte separative, § 24. 5) Isa. 33: 1, חָנְתָּקוּ Judg. 20: 31.

3. Nun is commonly rejected from the Kal imperative with *a*, גַּשׁ 2 Sam. 1: 15 (once before Makkeph, גְּשׁ־ Gen. 19: 9, in plural גְּשׁוּ 1 Kin. 18: 30 and in order to permit the retrocession of the accent, § 35. 1, גֹּשׁוּ Josh. 3: 9,

1 Sam. 14: 38), שַׁל־ Ex. 3: 5, גַּד Job 1: 11, סַר Deut. 2: 24, פְּתַר Ezek. 37: 9, וְשַׁקַּת־ Gen. 27: 26, though it is occasionally retained, נְעַשׂ 2 Kin. 19: 29, נְשָׂא Ps. 10: 12, or by a variant orthography, נְסָה Ps. 4: 7 but always elsewhere נָשָׂא. In imperatives with *ō*, and in Lamedh He verbs which have *ē* in the imperative, Nun is invariably retained, נְטוֹשׁ Prov. 17: 14, נְצֹר Ps. 24: 14, נְקֹם Num. 31: 2, נְתֹן Ps. 58: 7, נְהָה Gen. 30: 27, נְעֵה Ex. 8: 1.

4. The rejection of Nun from the Kal construct infinitive occurs in but few verbs; viz.: גֹּשׁ (with suffix, גָּשְׁתּוֹ) from נָגַשׁ, פֹּחַ from נָפַח, גַּעַ (twice) and נָגַעַ from נָגַע, כַּעַס (once) and נְכַעַס from נָכַע, עָשָׂא has עֹשֶׂת (by § 60. 3. *c*), with the preposition לְ, לְשֹׂאת by § 57. 2. (3), once שַׂת (§ 53. 3) Job 41: 17, once without the feminine ending, שׂוֹא Ps. 89: 10, and twice נְשׂא; נָתַן has commonly תֵּת (for תִּתֶת), with suffixes תִּתִּי, but נְתֹן Num. 20: 21, and נְתַךְ־ Gen. 38: 9.

5. The absolute infinitive Niphal appears in the two forms הִנָּתֹן Jer. 32: 4, and נִגֹּף Judg. 20: 39.

6. The ת of the prefix in the Hithpael species is in a few instances assimilated to the first radical, § 82. 5. *a*, הִנָּחֲמְתִּי Ezek. 5: 13, חִנַּבָּאתִי Ezek. 37: 10, Jer. 23: 13, הִנַּשֵּׂא Num. 24: 7, Dan. 11: 14, יִנַּאֲצוּן Isa. 52: 5.

§ 132. 1. The last radical of נָתַן is assimilated in the Niphal as well as in the Kal species, נִתַּם Lev. 26: 25. The final Nun of other verbs remains without assimilation, נָשַׁנְתָּ, צָנַפְתָּ, בָּנַהּ. In 2 Sam. 22: 41 תַּתָּה is for נָתַתָּה which is found in the parallel passage Ps. 18: 41. תִּתֵּן 1 Kin. 6: 19. 17: 14 K'thibh, is probably, as explained by Ewald, the Kal construct infinitive without the feminine ending (תֶּן) prolonged by reduplication, which is the case with some other short words, e. g. בִּלְתִּי from בְּלִי, בִּרְתִּי for בְּרִי; others regard it as the infinitive תִּת with the 3 fem. plur. suffix or with ן paragogic; Gesenius takes it to be, as always elsewhere, the 2 masc. sing. of the Kal future. תְּנָה is the imper. with parag. ה֫ except in Ps. 8: 2, where it is the Kal const. inf. with the fem. ending ה֫ instead of ת, comp. רְדָה Gen. 46: 3.

2. The peculiarities of Pe Nun verbs are shared by לָקַח *to take*, whose first radical is assimilated or rejected in the same manner as נ, Kal inf. const. קַחַת (with prep. לְ, לָקַחַת, to be distinguished from לָקַחְתְּ 2 fem. sing. pret.), once קַחַת־ (by § 60. 3. *c*) 2 Kin. 12: 9, with suffixes קָחֲתִי־, fut. יִקַּח, imper. קַח, קְחִי, rarely לְקַח, לְקְחִי, Hoph. fut. יָקַּח, but Niph. pret. נִלְקַח. In Hos. 11: 3 קָחָם is the masculine infinitive with the suffix for קָחָתָם; the same form occurs without a suffix, קָח Ezek. 17: 5, or this may be explained with Gesenius as a preterite for לָקַח.

3. In Isa. 64: 5 יִבָּל has the form of a Hiphil future from בָּלַל, but the sense shows it to be from נָבַל for נִבֵּל, Daghesh-forte being omitted and the previous vowel lengthened in consequence, § 59. *a*.

Ayin Doubled (ע״ע) Verbs.

§ 133. The imperfect verbs, thus far considered, differ from the perfect verbs either in the vowels alone or in

the consonants alone; those which follow, differ in both vowels and consonants, § 107, and consequently depart much more seriously from the standard paradigm. The widest divergence of all is found in the Ayin doubled and Ayin Vav verbs, in both of which the root gives up its dissyllabic character and is converted into a monosyllable; a common feature, which gives rise to many striking resemblances and even to an occasional interchange of forms.

§ 134. 1. In explaining the inflections peculiar to Ayin doubled verbs, it will be most convenient to separate the intensive species Piel and Pual with their derivative the Hithpael from the other four. That which gives rise to all their peculiar forms in the Kal, Niphal, Hiphil, and Hophal species, is the disposition to avoid the repetition of the same sound by uniting the two similar radicals and giving the intervening vowel to the previous letter, thus, סַב for סָבַב, סֹב for סְבֹב § 61. 3.

2. In the Kal species this contraction is optional in the preterite; it is rare in the infinitive absolute though usual in the construct, and it never occurs in the participles. With these exceptions, it is universal in the species already named.

§ 135. This contraction produces certain changes both in the vowel, which is thrown back, and in that of the preceding syllable.

1. When the first radical has a pretonic Kamets, § 82. 1, as in the Kal preterite and infinitive absolute, and in the Niphal infinitive, future and imperative, this is simply displaced by the vowel thrown back from the second radical, thus סָבַב, סַב, סָבוֹב, סֹב; הָסַבַּב, הָסֹבַב; הִסָּבֵב, הִסַּב.

2. When the first radical ends a mixed syllable as in the Kal future, the Niphal preterite, and throughout the

Hiphil and Hophal, this will be converted into a simple syllable by the shifting of the vowel from the second radical to the first, whence arise the following mutations:

In the Kal future יִסְבַּב becomes יִסֹּב with *ĭ* in a simple syllable, contrary to § 18. 2. This may, however, be converted into a mixed syllable by means of Daghesh-forte, and the short vowel be retained, thus יִסַּב; or the syllable may remain simple and the vowel be lengthened from Hhirik to Tsere, § 59, thus, in verbs fut. *a*, יֵמַר for יִמְרַר; or as the Hhirik of this tense is not an original vowel but has arisen from Sh'va, § 85. 2. *a* (1), it may be neglected and *ā*, the simplest of the long vowels, given to the preformative, which is the most common expedient, thus יָסַּב. The three possible forms of this tense are consequently יָסֹּב, יִסַּב and יֵמַר.

In the Niphal preterite נִסְבַּב becomes by contraction נָסַב. In a few verbs beginning with ה the short vowel is retained in an intermediate syllable, thus נֵהַר for נְהָרַר; in other cases Hhirik is lengthened to Tsere, נֵחַן for נְחָנַן, or as the Hhirik is not essential to the form but has arisen from Sh'va, § 82. 2, it is more frequently neglected, and Kamets, the simplest of the long vowels, substituted in its place, thus נָחַן. The forms of this tense are, therefore, נָסַב, נֵחַן, נָהַר.

In the Hiphil and Hophal species the vowels of the prefixed ה are characteristic and essential. They must, therefore, either be retained by inserting Daghesh-forte in the first radical, or be simply lengthened; no other vowel can be substituted for them, הִסְבִּיב for הִסַּב, יַסֵּב or יָסֵּב for יַסְבִּיב, יָסַּב (Kibbuts before the doubled letter by § 61. 5) or הוּסַּב for הָסְבַּב.

3. The vowel, which is thrown back from the second radical to the first, stands no longer before a single consonant, but before one which, though single in appear-

ance, is in reality equivalent to two. It is consequently subjected to the compression which affects vowels so situated, § 61. 4. Thus, in the Niphal future and imperative Tsere is compressed to Pattahh, יִסַּב, יִסַּב; הִסָּבֵּב, הִסַּב (comp. קִטַּלְתְּ, קְטַל) though it remains in the infinitive which, partaking of the character of a noun, prefers longer forms. So in the Hiphil long Hhirik is compressed to Tsere, הֵסֵב, הֵסֵב (comp. יַקְטִיל, תַּקְטִלְנָה).

§ 136. Although the letter, into which the second and third radicals have been contracted, represents two consonants, the doubling cannot be made to appear at the end of the word. But

1. When in the course of inflection a vowel is added, the letter receives Daghesh-forte, and the preceding vowel, even where it would be dropped in perfect verbs, is retained to make the doubling possible, and hence preserves its accent, § 33. 1, סַבָּה, יְסֹבְבוּ.

2. Upon the addition of a personal ending which begins with a consonant, the utterance of the doubled letter is aided by inserting one of the diphthongal vowels, *ō* (וֹ) in the preterite, and *e* (ֶי) in the future. By the dissyllabic appendage thus formed the accent is carried forward, § 32, and the previous part of the word is shortened in consequence as much as possible, הֵסֵב, הֵסִבּוֹתָ; יָסֹב, תְּסֻבֶּינָה.

3. When by the operation of the rules already given, § 135. 2, the first radical has been doubled, the reduplication of the last radical is frequently omitted in order to relieve the word of too many doubled letters. In this case the retention of the vowel before the last radical, contrary to the analogy of perfect verbs, and the insertion of a vowel after it, are alike unnecessary, and the accent takes its accustomed position, יְסֻבּוּ, תְּסֻבֶּנָה.

§ 137. The Piel, Pual, and Hithpael sometimes pre-

serve the regular form, as הִגֵּל, הָגַּל, הִתְהַגֵּל. The triple repetition of the same letter thus caused is in a few instances avoided, however, by reduplicating the contracted root with appropriate vowels, as סִכְסֵךְ, הִתְקַלְקֵל. Or more commonly, the reduplication is given up and the idea of intensity conveyed by the simple prolongation of the root, the long vowel Hholem being inserted after the first radical for this purpose, as סוֹבֵב, הִתְגּוֹלֵל.

§ 138. In Paradigm VIII the inflections of Ayin doubled verbs are shown by the example of סָבַב *to surround.* The Pual is omitted, as this species almost invariably follows the inflections of the perfect verb; certain persons of the Hophal, of which there is no example, are likewise omitted. An instance of Piel, with the radical syllable reduplicated, is given in סִכְסֵךְ *to excite.*

a. The Hithpael of סָבַב does not actually occur; but it is in the paradigm formed from analogy, the initial sibilant being transposed with the ת of the prefix, agreeably to § 82. 5.

Remarks on Ayin Doubled Verbs.

§ 139. 1. The uncontracted and the contracted forms of the Kal preterite are used with perhaps equal frequency in the third person; the former is rare in the first person, זַמֹּתִי Zech. 8: 14. 15, בָּזֹנוּ Deut. 2: 35, and there are no examples of it in the second; רֹבּוּ Gen. 49: 23 and רֹמּוּ Job 24: 24 are preterites with Hholem, § 82. 1. In Ps. 118: 11, סַבּוּנִי גַם־סְבָבוּנִי the uncontracted is added to the contracted form for the sake of greater emphasis. Compound Sh'va is sometimes used with these verbs instead of simple to make its vocal character more distinct, § 16. 1. *b*, גָּלְלוּ Gen. 29: 3, 8, צָלֲלוּ Ex. 15: 10, חָלְלוּךָ Isa. 64: 10, עָגְלִי Gen. 9: 14, תְּחֻבֵּנִי Num. 23: 25.

2. The following are examples of the contracted infinitive absolute, כֹּב Num. 23: 25. שֹׁל Ruth 2: 16, פֹּר Isa. 24: 19, רֹעָה (with a paragogic termination) ibid.; of the uncontracted, גָּלוֹן, חָנוֹן, אָרוֹר, פָּתוֹת, עָפוֹת, פָּתוֹת, שָׁרוֹד; of the infinitive construct, גּוֹז and גֹּז, סָבֵב and סֹב, שָׁרֹד, בָּסֹס, בֹּז, תֹּם, once with *ū* as in Ayin Vav verbs, בּוּז Eccles. 9: 1, and occasionally with *a*, רַד Isa. 45: 1, שַׁךְ Jer. 5: 26, בָּלַם (with 3 plur. suf.) Eccl. 3: 18, חֲנָנֵם Isa. 30: 18 (חָנְנָהּ Ps. 102: 14); לָחֳמָם Isa. 17: 14, though sometimes explained as the noun לֶחֶם with the suffix *their bread*, is the infinitive of חָמַם *to grow warm;* בְּשַׁגָּם Gen. 6: 3 Eng. ver. *for that also*, as if compounded of the prep. בְּ, the abbreviated relative and גַּם, is by the latest authorities regarded

as the infinitive of שָׁגַג *in their erring;* תְּעֹו Job 29: 3 has Hhirik before the suffix. The feminine termination וֹת is appended to the following infinitives, חַנּוֹת Ps. 77: 10. Job 19: 17, שַׁחֲוֹת Ezek. 36: 3, זַמֹּתִי Ps. 17: 3. The imperative, which is always contracted, has mostly Hholem, סֹב, הוֹם and הֹם but sometimes Pattahh, גַּל Ps. 119: 22 (elsewhere גֹּל), כַּבֵּת Ps. 80: 16. Fürst regards תַּת as a contracted participle from תָּתַת, analogous to the Ayin Vav form קָם.

3. The following uncontracted forms occur in the Kal future, יִתְּנֵנּ Am. 5: 15, יְהוֹדֵד and תְּהֹדֵד from נָדַד; in the Niphal, יִבָּבֵב Job 11: 12; Hiphil, הַשְׁמֵם Mic. 6: 13, מְיַתְּמִים Ezek. 3: 15, וְהַתְהַתֵּתִי Jer. 49: 37, and constantly in רָנַן and יָלַל; Hophal, הָדַד Job 20: 8 from נָדַד. In a few instances the repetition of the same letter is avoided by the substitution of א for the second radical, רְמָאַסּוּ = רְמָסְסוּ Ps. 58: 8 and perhaps also Job 7: 5, מְבָאֲאִיר = מְבָרְרִיר Ezek. 28: 24, Lev. 13: 51, 52, שְׁאסִיךְ = שְׁסָסֵיךְ Jer. 30: 16 K'thibh. Comp. in Syriac ܡܵܐ part. of ܡܵܐ. According to the Rabbins בָּזְאוּ = בָּזְזוּ Isa. 18: 2, but see Alexander in loc.

§ 140. 1. Examples of different forms of the Kal future: (1) With Daghesh-forte in the first radical, רִדַּם, אֶאֱפֹת, רִפַּד, רִתַּם, רִשַּׁם; or with *a* as the second vowel, רִגַּל, רִגֵּר, רִתְמוּ: (2) With Tsere under the personal prefix, תֵּתַם, תֵּתַת, נֵבֵר, תֵּחַלְחַל, תֵּחַמּוּ, *ē* being once written by means of the vowel letter י, אֵרֵתֶם. (3) With Kamets under the personal prefix, נָחֹן, נָסֹב, נָשֹׁחַ, נָרֹעַ, נָרֹק, נָצֹר, נָשֹׁו; this occurs once with fut. *a*, נָחַד Prov. 27: 17. With Vav Consecutive the accent is drawn back to the simple penult syllabe in this form of the future, and Hholem is consequently shortened, § 64. 1, נָגָּז, נָמָד, נָמָט, נָחָתּ, נָחָם, נָחָץ. There are a few examples of *ū* in the future as in Ayin Vav verbs, יָרוּץ Prov. 29: 6, יָרוּץ Isa. 42: 4, Eccles. 12: 6, תָּתֻם Ezek. 24: 11 and perhaps יָגֻר Gen. 49: 19, Hab. 3: 16, יָשֻׁד Ps. 91: 6, though Gesenius assumes the existence of גּוּד and שׁוּד as distinct roots from גָּדַד and שָׁדַד.

2. The Niphal preterite and participle: (1) With Hhirik under the prefixed נ, נִגְרוֹת Job 20: 28, נִחַל, נִחַר, נִחַת. (2) With Tsere under the prefix, נֵחַוְתֶּר Jer. 22: 23, נֵאָרִים Mal. 3: 9, נֵחָמִים Isa. 57: 5. (3) With Kamets under the prefix, נָסַב, נָחַר, נָבַר; sometimes the repetition of like vowels in successive syllables is avoided by exchanging *a* of the last syllable for Tsere, נָבֵל and נָכֵל, נָמַס and נָמֵס, נָסְבָה and נָסֵבָּה Ezek. 26: 2, or for Hholem as in Ayin Vav verbs, נָלֹן Eccl. 12: 6, נָבְזוּ Am. 3: 11, נָגֹזוּ Nah. 1: 12, נָגֹפוּ Isa. 34: 4.

3. The Niphal future preserves the Tsere of perfect verbs in one example, תֵּחַל, Lev. 21: 9, but mostly compresses it to Pattahh, יִבַּל, יִרַל, יִוַּת, יִשַּׁח, יִשַּׁם, יִסַּף, יִדַּד, אֵאָבֵק, יִשַּׁח, יִסַּס, יִדַּם, יִבַּשׁ; like the preterite it sometimes has Hholem, תִּבּוֹז Isa. 24: 3, תִּבּוֹק ibid. If the first radical is a guttural and incapable of receiving Daghesh, the preceding Hhirik is lengthened to Tsere, יֵרָחֵל, אֵחַל, יֵחָתֵם, יֵחָרֵם, יֵחָרֵץ. The Kal and Niphal futures, it will be perceived, coincide in some of their forms; and as the signification of these species is not always clearly distinguishable in intransitive verbs, it is often a matter of doubt or of indifference to which a given form should be referred. Thus,

נִלְכַּד, נִשְׁבַּת are in the Niphal according to Gesenius, while Ewald makes them to be Kal, and Fürst the first two Niphal and the third Kal.

4. The Niphal infinitive absolute: הִבּוֹז Isa. 24: 3, הָמוֹק ibid. or with Tsere in the last syllable, הִמֵּס 2 Sam. 17: 10. The infinitive construct: הִמֵּס Ps. 68: 3, הֵחֵל Ezek. 20: 9, and once with Pattahh before a suffix, הֵחֵלּוֹ Lev. 21: 4. The imperative: הִבָּרוּ Isa. 52: 11, הִשָּׁמוּ Num. 17: 10.

5. In the Hiphil preterite the vowel of the last syllable is compressed to Tsere, הֵסֵב, הֵפֵר (in pause הֵפֵר, so הִשְׁמִיד, הִתְמִיד), or even to Pattahh, הֵחֵל, הֵצַר, הֵצַר, הֵרַע, הֵשַׁח, הֵלַע, הֵרַג, הֵצַר, הֵקַל, הֵרַק, הִסְבִּיא. Both infinitives have Tsere, thus the absolute: הָכֵר, הָרֵק, הָפֵר, הָפֵחַ, הָבֵר, הָקֵל; the construct: הָכֵר, הָרֵק, הָפֵר, הָפֵר (הָפִיר Zech. 11: 10), הָקֵל, הָתֵם, in pause הָכֵר, הָרֵק, with a final guttural, הָרֵעַ, הָרֵעַ. The imperative: הָכֵב, הָפֵר, הָקֵל, הָקֵל, הָתֵם; הָשֵׁמּוּ Job 21: 5 is a Hiphil and not a Hophal form as stated by Gesenius, the first vowel being Kamets and not Kamets Hhatuph. Futures with a short vowel before Daghesh-forte in the first radical: יָכֵב, יָתֵם, יָכֵר; יָבֵהּ, יָתֵר, יָכֵל, יָרֵק, יָקֵל, יָפֵר, יָשֵׁשׁ, יָגֵן, יָרֵק, יָחֵל or יָחַל, יָכֵל, יָתֵר and יָתֵר, יָכֵהּ, יָאֵץ (ē expressed by the vowel letter א, § 11. 1. *a*) Eccles. 12: 5. When in this latter class of futures the accent is removed from the ultimate, whether by Vav Consecutive or any other cause, Tsere is shortened to Seghol, וַיָּגֶל, וַיָּרֶק, וַיָּקֶל, וָאָחֵל, וָאָסֵךְ, וַיָּעֶר, וַיָּפֶר, וַיָּחֶל, וַיָּחֶר, וַיָּחֶן Judg. 9: 53 (וַיָּחֵן would be from יחן) before a guttural it becomes Pattahh, וַיָּרַע, וַיָּחַד, וַיָּצַר־. Participles: מֵכֵב, מֵפֵר, מֵחֵל, מֵצַל Ezek. 31: 3, מֵרַע Prov. 17: 4. In a very few instances the Hhirik of the perfect paradigm is retained in the last syllable of this species as in Ayin Vav verbs, מֵסִיךְ Judg. 3: 21, מֵגִים Jer. 49: 20, וַעֲשִׂים Num. 21: 30.

6. Hophal preterites: הוּחַל, הוּכְּתָה; futures: יוּכַם, יוּאַר, יוּדַק, יוּתַן, יוּכַן, יוּשַׁד, יוּפַר, יוּכַב, יוּפַת, יוּסַךְ; participles: מוּגָּד, מֻכָּן or in some copies מֻגָּד 2 Sam. 23: 6; infinitive with suffix, הָשַׁבָּה Lev. 26: 34, with prep., בְּהָשַׁבָּה ver. 43.

§ 141. 1. Upon the addition of a vowel affix and the consequent insertion of Daghesh-forte in the last radical, the preceding vowel and the position of the accent continue unchanged, זַבְתִּי, רָבְתָה, נָשַׁמְתָּ (distinguished from the fem. part. נְשָׁמָה); יָחַלְתִּי; if the last radical does not admit Daghesh-forte a preceding Pattahh sometimes remains short before ח, but it is lengthened to Kamets before other gutturals, מָרָה, וְרָעִי (100. 2), חָכְרוּ, שָׂחָה and שָׂחוּ. When the first radical is doubled, Daghesh is omitted from the last in the Kal fut. *ō* יָהֹלּוּ, יָהֹלּוּ, יָקֹלּוּ, יָתֹמּוּ, and occasionally elsewhere יָהֹלּוּ Hi. fut. הָמְבוּ Ho. pret. Other cases are exceptional, whether of the shifting of the accent, רַבּוּ Ps. 3: 2, רַבּוּ Ps. 55: 22, קַלּוּ Jer. 4: 13, and consequent shortening of the vowel, גֻּדִּי Jer. 7: 29 for גֻּדֵּי, רָנִּי for רָנֵּי, רִנִּי, רִנִּי, עֻדְּדוּ Jer. 49: 28 (with the letter repeated instead of being simply doubled by Daghesh, so likewise in רָשְׁדֻּם Jer. 5: 6, חָנְנִי Ps. 9: 14) for שֹׁדְדוּ; the omission of Daghesh, נְבָזָה 1 Sam. 14: 36, הֻשְּׁוָה Prov. 7: 13, הֻצְבוּ Cant. 6: 11, 7: 13, יָחְקוּ Job 19: 23, קָבְהּ־ Num. 22: 11, 17 (Kal imper. with ה parag. for קָבָה־, shortened by Makkeph from קָבָה, so אָרְהּ־ *orā* Num. 23: 7), or in addition, the rejection of the vowel, יָזְמוּ K. fut. Gen. 11: 6 for יְזֻמּוּ, נָבְלָה

Gen. 11: 7 K. fut. for נָבְלָה, נָבְקָה Isa. 19: 3 Ni. pret. for נָבַקָּה or נָבֻקָּה, נִסְבָּה Ezek. 41: 7 Ni. fut. for נִסַּבָּה; נָזְלוּ Judg. 5: 5 according to Gesenius for נָזֹלּוּ Ni. pret. of זָלַל *to shake*, according to others K. pret. of נָזַל *to flow;* וְתֶעֱלֶה Ezek. 36: 3 for וְתַעֲלֶה (Ewald) from עָלַל *to enter*, or for וְתֶעָלֶה Ni. fut. of עָלָה *to go up*, נֶחֱלוּ Ezek. 7: 24 Ni. pret. for נֶחָלוּ, נֶחֱרוּ Cant. 1: 6 Ni. pret. for נֶחָרוּ. Once instead of doubling the last radical ר is inserted, דַּלְיוּ Prov. 26: 7 for דַּלּוּ, comp. דַּהְרוּשׁ Ezr. 10: 16 for דַּהֲרוּשׁ; or it may be for דָּלָה from דָּלָה § 174. 1.

2. Upon the insertion of a vowel before affixes beginning with a consonant, the accent is shifted and the previous part of the word shortened if possible; thus, with *ō* in the preterite, קַלּוֹתָ, וְאָרוֹתִי (Kamets before ר which cannot be doubled), בַּזּוֹנוּ, עַסּוֹתֶם, נָבַלְתִּי, נָבַקְתֶּם, הֲרִקּוֹת, הֲצֵלֹתִי (the vowel remaining long before ר), חֲחַתָּ (Pattahh instead of compound Sh'va on account of the following guttural, § 60. 3. *c*), הֲחִפֹּתִי, once with *ū*, נְשֻׂלְנוּ Mic. 2: 4; with *e* in the future, תְּסֻבֶּרְנָה, תְּצֻבֶּרְנָה, תְּחֻפֶּרְנָה. If the first radical be doubled, Daghesh is omitted from the last, and the customary vowel is in consequence not inserted, תְּצַלְנָה, תְּבַלְנָה; other cases are rare and exceptional, חֲפַרְתָּה, נָחַלְתִּי, נְבַלְתֶּם, תַּמְנוּ which is first plur. pret. for תַּבְנוּ not third plur. for תָּמוּ (Ewald), § 54, 3; שְׁנִיתִי Deut. 32: 41, חֲמוֹתִי Isa. 44: 16, הֲפוֹתִי Ps. 116: 6 have the accent upon the ultimate instead of the penult.

3. Before suffixes the accent is always shifted, and if possible the vowels shortened, חֲרָפֻנִי from חֵרֵפוּ, וְכָבְחוּ from וְכֹבֵחוּ, וְסָבֵנִי from וְסֹבְבוּנִי, וְשָׁפּוּךָ from וְשֹׁפּוּךָ, חֲדָלֻנוּ from חֲדַל, הֲפָרָם from הֲפַר; in הֲחָנָךְ Gen. 43: 29, Isa. 30: 19, from חָנַן הַפְרֵכֶם Lev. 26: 15 from הָפַר, the original vowels have been not only abbreviated but rejected, and the requisite short vowel given to the first of the concurring consonants, § 61. 1. In a very few instances a form resembling that of Ayin Vav verbs is assumed, Daghesh being omitted from the last radical and the preceding vowel lengthened in consequence, חוּלָּנוּ Prov. 8: 29 for חָקַק ver. 27, תְּתִרְמָךְ Isa. 33: 1 for תַּחְמֹךְ, הֲשַׁמּוֹתִיהוּ Ezek. 14: 8 for הַשַּׁמּוֹתִיהוּ, הִזִּרְמוּנִי Lam. 1: 8 for הִזִּנְּיהוּ Hi. pret. of זָלַל, וְיִחְתָּן, Hab. 2: 17 for וְיִתֵּן Hi. fut. of חָתַת with 3 fem. plur. suf., אֲרַכֶּם 2 Sam. 22: 43 in a few editions for אֲדַכֶּם. Nun is once inserted before the suffix in place of doubling the radical, קָבְנוֹ Num. 23: 13 for קָבוֹ.

§ 142. 1. Of the verbs which occur in Piel, Pual, or Hithpael, the following adopt the forms of perfect verbs, viz.:

אָרַר *to curse.*	רָבַב *to cry.*	קָנַן *to make a nest.*
בָּזַז *to plunder.*	כָּתַת *to smite, break.*	קָצַץ *to cut off.*
בָּרַר *to purify.*	לָבַב *to take away the heart.*	רָבַב *to be many.*
גָּשַׁשׁ *to grope.*	לָקַק *to lick.*	רָכַךְ *to be tender.*
זָקַק *to refine.*	מָשַׁשׁ *to feel, to grope.*	שָׂרַר *to harrow.*
חָמַם *to warm.*	פָּזַז *to leap.*	שָׂרַר *to rule.*
חָצַץ *to divide.*	פָּלַל *to judge, to intercede.*	שָׁנַן *to sharpen.*
חָתַת *to be broken.*		תָּמַם *to be perfect.*
טָלַל *to cover.*		

2. The following, which are mostly suggestive of a short, quick, repeated motion, reduplicate the radical syllable, viz.:

חָרַר *to burn.*	הָהָה *to linger.*	שָׁעַע *to sport, delight.*
כָּרַר *to dance.*	סָבַב *to excite.*	שָׁקַק *to run.*
לָהַהּ *to be mad.*	צָפַף *to chirp.*	תָּעַע *to mock.*

3. The following insert Hholem after the first radical, viz.:

אָנַן *to complain.*	נָדַד *to fly.*	רָעַע *to break.*
בָּלַל *to mix.*	נָסַס *to lift up.*	שָׁחַח *to sink.*
בָּקַק *to empty.*	סָפַף *to occupy the thres-*	שָׁלַל *to spoil.*
גָּדַד *to cut.*	*hold.*	שָׁמַם *to be desolate* or
גָּרַר *to sweep away.*	צָרַר *to bind.*	*amazed.*
דָּמַם *to be still.*	קָסַס *to cut off.*	תָּפַף *to beat.*
חָלַח *to break loose.*	קָשַׁשׁ *to gather.*	

4. The following employ two forms, commonly in different senses, viz.:

גָּלַל and גּוֹלֵל *to roll.*
חָלַל *to praise,* חוֹלֵל *to make mad.*
חָלַל *to profane,* חוֹלֵל *to wound.*
חָנַן *to make gracious,* חוֹנֵן *to be gracious.*
יָלַל *to speak,* יוֹלֵל *to mow.*
סָבַב *to change,* סוֹבֵב *to surround.*
עָנַן *to gather clouds,* עוֹנֵן *to practise sorcery.*
פָּרַר *to burst,* פֵּרֵר *to shake to pieces.*
קָלַל *to curse,* קוֹלֵל *to whet.*
רָצַץ and רוֹצֵץ *to crush.*
שָׁדַד and שׁוֹדֵד *to treat with violence.*

5. The following use different forms in different species, viz.:

חָקַק Pi. *to decree,* Pu. חֻקַּק.
מָדַד Pi. *to measure,* Hith. הִתְמוֹדֵד.
מָרַר Pi. *to make bitter,* Hith. הִתְמָרְרוּ.
סָלַל Pi. *to exalt,* Hith. הִסְתּוֹלֵל.
עוֹלֵל Pi. *to maltreat,* Hith. הִתְעַלֵּל and הִתְעוֹלֵל,
רָנַן Pi. *to shout,* Hith. הִתְרוֹנֵן.*
רָשַׁשׁ Pi. *to break,* Pu. רֻשַּׁשׁ.
שָׁנַן Pi. *to inculcate,* Hith. הִשְׁתּוֹנֵן *to pierce.*

6. The following examples exhibit the effect of gutturals upon reduplicated forms: Preterite, שָׁעֲשַׁע Isa. 11: 8; Infinitive, לְחַחֲרֵ֫ Prov. 26: 21, הִתְמַהְמַהּ Ex. 12: 39; Future, אֶשְׁתַּעֲשַׁע Ps. 119: 47, יִשְׁעַשְׁעוּ Ps. 94: 19; Imperative, חִשְׁתַּעֲשַׁע Isa. 29: 9; Participle, מְתַעְתֵּעַ Gen. 27: 12, מְתַהֲלֹהֵל Prov. 26: 18.

§ 143. 1. The Pual species adheres to the analogy of perfect verbs with the exception of the preterites, נוֹדַד Nah. 3: 17, יוֹלַל Lam. 1: 12, the future תְּשֻׁעֲשָׁעִי Isa. 66: 12, and the participles, מְיֻלָּלָה Isa. 9: 4, מָחֳלָל Isa. 53: 5.

* מְתֹרוֹנָן Ps. 78: 65 is not from רוּן (Gesenius) but from רָנַן, see Alexander in loc.

2. תִּתְבָּרַר 2 Sam. 22: 7 is contracted for תִּתְבַּרֵּר Ps. 18: 27; in regard to תִּתַּפָּל in the same verse, Nordheimer adopts the explanation of Alting that it is a similar contraction of the Hithpael of פָּלַל *thou wilt show thyself a judge*, but as it answers to תִּתְפַּתָּל Ps. 18: 27, the best authorities are almost unanimous in supposing a transposition of the second radical with the first and its union with ת of the prefix.

3. הָלַל and הָלַל. The prefixed ה remains in the Hiphil future of הָלַל, e. g. יְהַלֵּל, יְהַלְלוּ, תְּהַלֵּלִי and in the derivative nouns תְּהִלִּים, מְהֻלָּל, whence these forms are in the lexicons referred to the secondary root הָהַל.

Pe Yodh (פ״י) Verbs.

§ 144. In quiescent verbs one of the original radicals is א, ו or י, which in certain forms is converted into or exchanged for a vowel. As א preserves its consonantal character when occupying the second place in the root, and also (with the exception of the Pe Aleph future, § 110. 3, and a few occasional forms, § 111. 2) when it stands in the first place, verbs having this letter as a first or second radical belong to the guttural class; those only in which it is the third radical (Lamedh Aleph) are properly reckoned quiescent. On the other hand, if the first, second, or third radical be either Yodh or Vav, the verb is classed as quiescent. All verbs into which either ו or י enter as a first radical are promiscuously called Pe Yodh, as the modes of inflection arising from these two letters have been blended, and Yodh in either case appears in the Kal preterite from which roots are ordinarily named, § 83. *a*. In the second radical the Vav forms (Ayin Vav) preponderate greatly over those with Yodh (Ayin Yodh). In the third radical the Yodh forms have almost entirely superseded those with Vav, though the current denomination of the verbs is derived from neither of these letters but from He (Lamedh He), which is used to express the final vowel of the root in the Kal preterite after the proper radical has been rejected.

a. Verbs whose third radical is the consonant ה belong to the guttural class, e. g. גָּבַהּ, הָבַהּ and are quite distinct from the quiescent verbs ל״ה in which ה always represents a vowel, e. g. גָּבָה, פָּנָה.

§ 145. 1. In Pe Yodh verbs the first radical is mostly Yodh at the beginning, § 56. 2, and Vav at the close of a syllable. It is accordingly Yodh in the Kal, Piel, and Pual species, and commonly in the Hithpael, יָשַׁב, יְשַׁב, יֻשַּׁב, הִתְיַשֵּׁב. It is Vav in the Niphal and commonly in the Hiphil and Hophal species, נוֹשַׁב, הוֹשִׁיב, הוּשַׁב.

2. In the Kal future, if Yodh be retained, it will quiesce in and prolong the previous Hhirik, and the second radical will take Pattahh, e. g. יִיבַשׁ; if the first radical be rejected the previous Hhirik is commonly lengthened to Tsere, יֵלֵךְ, the Pattahh of the second syllable being sometimes changed to Tsere to correspond with it, § 63. 2. *c*, e. g. יֵשֵׁב; in a few instances Hhirik is preserved by giving Daghesh-forte to the second radical as in Pe Nun verbs, the following vowel being either Pattahh or Hholem, יִצַּת, יִצֹּק.

3. Those verbs which reject Yodh in the Kal future, reject it likewise in the imperative and infinitive construct, where it would be accompanied by Sh'va at the beginning of a syllable, § 53. 2. *a*, the infinitive being prolonged as in Pe Nun verbs by the feminine termination, שֶׁבֶת, שֶׁבֶת.

§ 146. 1. In the Niphal preterite and participle Vav quiesces in its homogeneous vowel Hholem, נוֹשַׁב, נוֹשָׁב; in the infinitive, future, and imperative, where it is doubled by Daghesh-forte, it retains its consonantal character, הִנָּשֵׁב, יִנָּשֵׁב.

2. In the Hiphil Vav quiesces in Hholem, הוֹשִׁיב, יוֹשִׁיב; a few verbs have Yodh quiescing in Tsere, הֵישִׁיב, יֵישִׁיב; more rarely still, the first radical is dropped and the

preceding short vowel is preserved, as in Pe Nun verbs, by doubling the second radical, הִצִּיג, יַצִּיעַ.

3. In the Hophal Vav quiesces in Shurek, הוּשַׁב, יוּשַׁב; occasionally the short vowel is preserved and Daghesh-forte inserted in the second radical, יֻצַּב.

a. The Hholem or Tsere of the Hiphil arises from the combination of *a*, the primary vowel of the first syllable in this species, § 82. 5. *b*. (3), with *u* or *i*, into which the letters ו and י are readily softened, § 57. 2. (5). The Hholem of the Niphal is to be similary explained: the Hhirik of this species, which has arisen from Sh'va and cannot combine with Vav, is exchanged for the simplest of the vowels *a* (comp. נָסַב, נָקוֹם), and the union of this with ו forms *ō*. The Hophal retains the passive vowel *u*, which is occasionally found in perfect verbs, § 95. *a*.

§ 147. The inflections of Pe Yodh verbs may be represented by those of יָשַׁב *to sit* or *dwell*, (Paradigm X). The Piel, Pual, and Hithpael are omitted as they do not differ from perfect verbs. The alternate form of the Kal future is shown by the example of יָבֵשׁ *to be dry*.

Remarks on Pe Yodh Verbs.

§ 148. 1. The following verbs retain Yodh in the Kal future, **viz.:**

יָבֵשׁ *to be dry.*	יָסַךְ *to be poured.*	יָרֵא *to fear.*
יָגַע *to toil.*	יָעַד *to appoint.*	יָרָה *to cast.*
יָחַר *to delay.*	יָעַף *to be weary.*	יָרַשׁ *to possess.*
יָנָה *to oppress.*	יָעַץ *to counsel.*	יָשַׂם *to put.*
יָנַק *to suck.*	יָפֶה *to be beautiful.*	יָשֵׁן *to sleep.*

The concurrence of Yodhs in the third person of the future is sometimes prevented by omitting the quiescent יִרְאֶה, יִשְׁבֶּת, יִשְׁנֶה, the long vowel receiving Methegh before vocal Sh'va, and thus distinguishing the last two words from the Lamedh He forms, יִרְאֶה from רָאָה and יִשְׁנֶה from שָׁנָה, § 45. 2.

2. The following have Tsere under the preformative; those in which the second vowel is likewise Tsere are distinguished by an asterisk:

יֵדַע *to know.*	* יֵלֵד *to bear.*	יֵקַע *to be dislocated.*
יֵחַד *to be joined.*	* יֵצֵא *to go out.*	* יֵרֵד *to go down.*
יֵחַם *to conceive.*	יֵצַר *to be straitened.*	* יֵשֵׁב *to sit, dwell.*

The second syllable has Pattahh in תֵּרַד Jer. 13: 17, Lam. 3: 48, and in the feminine plurals, תֵּלַכְנָה, תֵּרַדְנָה; תֵּצֶאנָה has Seghol after the analogy of Lamedh Aleph verbs; תֵּרְשַׁבְנָה (with the vowel-letter ר for *e*) occurs only in the K'thibh, Ezek. 35: 9, and of course has not its proper vowels. In יְרֻדָנִי Ps. 138: 6 the radical Yodh remains and has attracted to itself the Tsere of the preformative. Comp. § 60. 3. *c*.

3. The following insert Daghesh-forte in the second radical, viz.: יָסַר *to chastise, instruct,* יָצַת *to burn.* In תְּיֻרַהּ Isa. 44: 8 short Hhirik remains before a letter with Sh'va; יְרֻכְּנִי Job 16: 11 is explained by some as a Kal future, by others as a Piel preterite.

4. The following have more than one form: יָטַב *to be good* fut. יִיטַב, once תֵּיטְבִי Nah. 3: 8; יָצַק *to pour* וַיִּצֹק, once וַיִּצֶק 1 Kin. 22: 35; יָצַר *to form,* יָצֹר and וַיֹּצֶר; יָקַד *to burn,* יִקַּד Isa. 10: 16, and תִּיקַד Deut. 32: 22; יָקַץ *to awake,* יִקַּץ once יִקָּץ 1 Kin. 3: 15; יָקַר *to be precious,* יִיקַר and יָקַר, or with a vowel letter for *ē,* יֵקַר; יָשַׁם *to be desolate,* תֵּשַׁמְנָה once תִּישַׁמְנָה Ezek. 6: 6; יָשַׁר *to be right,* יִישַׁר, once יְשֻׁרְנָה (3 fem. plur., § 88) 1 Sam. 6: 12. Some copies have וְגָּעוּ Isa. 40: 30 for וְיָגֵעוּ.

5. In futures having Tsere under the preformative, the accent is shifted to the penult after Vav Consecutive in the persons liable to such a change, viz.: 3 sing., 2 masc. sing., and 1 plur., Tsere in the ultimate being in consequence shortened to Seghol, וַיִּדַּע, וַתֵּלֶךְ, וַיֵּרֶד. Pattahh in the ultimate becomes Seghol in וַיִּצֶּר, וַיֵּצֶא (with a postpositive accent) Gen. 2: 7, 19, וַיִּרְשֶׁם Gen. 50: 26; but וַיִּטַּב, וַיִּרַשׁ, וַיִּרְקַע, וַיִּרְקַן, only once before a monosyllable, § 35. 1, וַיִּרְקָן Gen. 9: 24. The accent remains on the ultimate in the Lamedh Aleph form וַיֵּצֵא, unless the following word begins with an accented syllable, e. g. וַיֵּצֵא Gen. 4: 16, 8: 18. The pause restores the accent in all these cases to its original position, וַיִּשְׁכַּב: Ruth 4: 1, וַתֵּדַע: Ps. 139: 1, וַיֵּרַד Ps. 18: 10, § 35. 2.

§ 149. 1. Kal construct infinitives with Yodh: יְבֹשׁ and with a feminine ending יְבֹשֶׁת, יָלְדָה, יְסֹד with suf. יְסָדָי, once with prep. לִירֹוד 2 Chron. 31: 7, Daghesh conservative after *ĭ*, § 14. *a*; יִרְאָה, § 87, once יִרֹא Josh. 22: 25 and with prep. לֵירֹא 1 Sam. 18: 29 from יָרֹוּם once יָרוּא 2 Chron. 26: 15 from יָרָה, יְשׁוֹן.

2. Infinitives without Yodh: יַדַּעְתִּי (with suf. יְדָעְתִּי), הֱיֹה Ex. 2: 4, and without the feminine termination יֵד, לֶדֶת (with suf. לִדְתִּי) and לֵדָה, once לַת 1 Sam. 4: 19, § 54. 2. צֵאת (with suf. צֵאתִי), רֶדֶת, צֶקֶת (with suf. רִדְתִּי), once רְדָתִי Gen. 46: 3, רֶשֶׁת (with suf. רְשָׁתָהּ), שֶׁבֶת (שֶׁבְתִּי, with suf. שִׁבְתִּי once שַׁבְתִּי Ps. 23: 6). Yodh is perhaps dropped from the absolute infinitive שׁוֹב Jer. 42: 10, which is usually explained to be for יָשׁוֹב; it may, however, be derived from the Ayin Vav verb שׁוּב.

3. Imperatives with Yodh: יְדֵה, יְרֵא, יְרֵה. Without Yodh: דַּע (with ה parag. דְּעָה Prov. 24: 14), הַב (with ה parag. הָבָה; for הֵבוּ Hos. 4: 18, see § 92. *a*), צֵא (צְאָה, fem. plur. צֶאֱינָה Cant. 3: 11), שֵׁב (שְׁבָה, שְׁבִי־). With both forms: צַץ and יָצַץ (יְצַקּוּ), רֵד (רְדָה), twice יְרַד Judg. 5: 13, רַשׁ and יְרָשָׁה.

§ 150. 1. The Niphal of נָגַהּ has *ū* instead of *ō*, נוּגֹר Zeph. 3: 18, נוּגוֹת Lam. 1: 4; נוּדָלוּ 1 Chron. 3: 5, 20: 8 has *ŭ* followed by Daghesh. נִצַּת, which according to Gesenius is from נָצַת, has *ĭ;* Ewald assumes the root to be צָתַת, and refers to it likewise the Kal future and the Hiphil ascribed to נָצַת, § 148. 3. and § 151. 4. In that case the Daghesh in יִצָּהוּ Isa. 33: 12, Jer. 51: 58, will not require the explanation suggested in § 24. *c*, but the K'thibh הוּצִיתִיהָ 2 Sam. 14: 30 will be unexplained. נוּקָשׁ Ps. 9: 17 is not the Niphal preterite or participle of נָקַשׁ, but the Kal participle of נָקַשׁ.

2. Yodh appears in the Niphal future of two verbs instead of Vav, נִוָּחֵל Gen. 8: 12, 1 Sam. 13: 8 K'ri, יִוָּדֶה Ex. 19: 13. In the first person singular א always has Hhirik, אִוָּדֵעַ, אִוָּלֵד, אִוָּסֵר, אִוָּרֵשׁ, אִוָּשֵׁעַ, אִוָּתֵר.

§ 151. 1. In the Hiphil the following verbs have Yodh preceded by Tsere, viz.: יָטַב *to be good*, יָלַל *to howl*, יָמַן *to go to the right*, יָמַר *to change*, יָנַק *to suck*. Yodh is likewise found in הֵימִישׁוּנִי Judg. 16: 26 K'thibh, and in the following instances in which the prefix has Pattahh as in perfect verbs, אַיְסִירֵם Hos. 7: 12, יַיְשִׁירוּ Prov. 4: 25, הֵיְשַׁר Ps. 5: 9 K'ri (K'thibh הוֹשִׁיר, comp. Isa. 45: 2 K'thibh אוֹשִׁר, K'ri אֲיַשֵּׁר), הֵיְצִא Gen. 8: 17 K'ri (K'thibh הוֹצִא), מַיְמִירִים 1 Chron. 12: 2.

2. In יְיַטֵּב Job 24: 21 (elsewhere יֵיטִב and יְיַלֵּל (once אִיְּלָה Mic. 1: 8), the radical Yodh attracts to itself the vowel of the preformative, comp. § 148. 2. He remains after the preformative in יְהֵיְלִילוּ Isa. 52: 5, יְהוֹדֶה Neh. 11: 17, Ps. 28, 7, יְהוֹשִׁיעַ 1 Sam. 17: 47, Ps. 116: 6. Both Yodh and Vav, quiescing in their appropriate vowels, are liable to omission, הַמְרִן, הַנְרִקוּ, הֹלִיד, הֹבִישׁוּ, and once the vowel Tsere is dropped before a suffix, תְּנִיקֶהָ Ex. 2: 9 for תֵּינִיקֶהָ.

3. Vav consecutive draws the accent back to the penultimate Tsere or Hholem of the Hiphil future in the persons liable to be affected by it, § 148. 5, and shortens the final vowel, וַיַּיְטֶב, וַיֵּיטֶב, וַיּוֹשֶׁב, וַיֹּאשֶׁב, וַתֹּאפֶה; but with a pause accent וַתֹּאמֶר Ruth 2: 14.

4. The following verbs insert Daghesh in the second radical in the Hiphil, viz.: יָצַג *to set, place*, יָצַע *to spread*, יָצַק *to pour*, except מוֹצְקָה 2 Kin. 4: 5 K'ri (K'thibh מיצקת), יָצַת *to burn*, except הוּצִיתִיהָ 2 Sam. 14: 30 K'thibh, see § 150. 1.

5. In the Hophal a few examples occur of *ŭ* followed by Daghesh, יֻצַּג Ex. 10: 24, יֻצַּע Isa. 14: 11, Esth. 4: 3, מוּטָּד Isa. 28: 16, מֻצָּק Job 11: 15 and a few of Hholem, הוּלַע Lev. 4: 23, 28, יוּרָא Prov. 11: 25 for הוּרֶה from יָרָה. The construct infinitive: הוּסַד Ezr. 3: 11, and with the feminine termination הוּסָּדַת Ezek. 16: 4, חֻשָּׁדַת Gen. 40: 20, Ezek. 16: 5.

§ 152. 1. In the Kal preterite Yodh is once dropped, רַד Judg. 19: 11 for יָרַד. Hhirik occurs with the second radical of יָלַד and יָרַשׁ in the first and second persons singular with suffixes, and in the second person plural, which is perhaps due to the assimilating power of the antecedent Yodh, e. g. יְרִשְׁתִּים, יְלִדְתִּינִי, יְרִשְׁתֶּם, יְרִשְׁתֶּהָ.

2. In the Piel future the prefix Yodh of the third person is contracted

with the radical after Vav consecutive, וַיִּבָּשֵׁהוּ Nah. 1: 4 for וַיִּבַּשֵּׁהוּ, וַיִּגֶּה Lam. 3: 33, וַיִּדֹּוּ Lam. 3: 53, וַיְשַׁלֵּם 2 Chron. 32: 30 K'ri (K'thibh וַיְיַשֵּׁרֵם).

3. Three verbs have Vav in the Hithpael, הִתְנַבֵּא, הִתְנַצֵּל, הִתְנַגֵּד; ת is assimilated to the following נ and contracted with it in נִתְּפַלְּלוּ Ezek. 23: 48 for נִתְנַסְּלוּ a peculiar Niphal formed on the basis of a Hithpael, § 83. *c.* (2). In תִּתְנַצֵּב Ex. 2: 4 for תִּתְיַצֵּב Yodh is rejected and its vowel given to the preceding letter, § 53. 3. *b.*

§ 153. 1. הָלַךְ and יָלַךְ. הָלַךְ *to go* in the Hiphil and for the most part in the infinitive construct, future and imperative Kal follows the analogy of Pe Yodh verbs, as though the root were יָלַךְ. Thus, Kal inf. const. לֶכֶת (לֶכְתִּי, with suf.) rarely הֵלֹךְ; fut. יֵלֵךְ (once with the vowel letter י for *ē*, אֵילְכָה Mic. 1: 8, fem. pl. תֵּלַכְנָה), occasionally in poetry יָהֲלֹךְ (3 fem. sing. תֵּהָלַכְנָה); imper. לֵךְ (with ה parag. לְכָה, or without the vowel letter לְכָ, fem. pl. לֵכְנָה and לֵכֶן) once הֵלְכוּ Jer. 51: 50. Hiphil: הוֹלִיךְ once in the imper. הֵילִיכִי Ex. 2: 9, and once in the participle מֵהֲלְכִים Zech. 3: 7 for מַהֲלִכִים, § 94. *e.*

2. אָסַף *to gather* and יָסַף *to add* are liable to be confounded in certain forms. In the Hiphil future of יָסַף, *ō* is twice represented by the vowel letter א, וַיֹּאסֶף 1 Sam. 18: 29. תֹּאסִפוּן Ex. 5: 7; אָסַף drops its א in the Kal future, when it follows the Pe Aleph inflection, § 110. 3, which it does only in the following instances, וַיֹּסֶף 2 Sam. 6: 1, תֹּסֶף Ps. 104: 29, אָסְפָה Mic. 4: 6, אָסְפָה 1 Sam. 15: 6, where the Hhirik, being abbreviated from Tsere, is short, notwithstanding the Methegh in the intermediate syllable, § 45. 2. The apoc. Hiph. fut. of יָסַף when joined with the negative particle אַל is accented on the penult, אַל־תּוֹסֶף Deut. 3: 26, and in one instance the vowel of the ultimate is dropped entirely, אַל־תּוֹסֵף Prov. 30: 6.

3. תּוֹשְׁבִיתִים Zech. 10: 6 is probably, as explained by Gesenius and Hengstenberg, for תּוֹשֵׁבְתִּים from יָשַׁב *to dwell*, though Ewald derives it from שׁוּב *to return*, as if for תְּשִׁיבוֹתִים, and Kimchi supposes it to be a combination of both words suggesting the sense of both, in which he is followed by the English translators, *I will bring them again to place them.*

הִבְאִישׁ Isa. 30: 5 "is regarded by Gesenius as an incorrect orthography for הוֹבִישׁ; but Maurer and Knobel read it הֶבְאִישׁ and assume a root בָּאַשׁ synonymous with בּוֹשׁ". Alexander in loc.

תּוֹמִיךְ Ps. 16: 5, see § 90.

Ayin Vav (ע״ו) and Ayin Yodh (ע״י) Verbs.

§ 154. Yodh and Vav, as the second radical of verbs, have the following peculiarities, viz.:

1. They may be converted into their homogeneous vowels *i* and *u*.

2. They may be rejected when accompanied by a

heterogeneous vowel, which is characteristic of the form. Yodh forms are confined to the Kal of a few verbs; in the other species Vav forms are universal.

a. Yodh is never found as a quiescent middle radical in any species but Kal: it enters as a consonant into the Piel of two verbs, and the Hithpael of two, § 163. 1, the Niphal of הָיָה *to be*, and the Hiphil of חָיָה *to live.*

§ 155. 1. In the Kal preterite and active participle and in the Hiphil and Hophal species, the quiescent is rejected and its vowel given to the preceding radical. Thus,

Kal preterite: קָם for קָוַם where *ā*, which arises from blending *ă* with the pretonic Kamets, § 62. 1, is in partial compensation for the contraction, בֵּת for בָּיְתָה, בֹּשׁ for בָּוֹשׁ, רָב for רָבַב. For an exceptional formation, see § 160. 1.

Active participle: קָם for קָוֹם, בֵּת for בָּיִת, בֹּשׁ for בָּוֹשׁ, רָב for רָבָב, the ordinary participial form being superseded by that of another verbal derivative, as is the case in some perfect verbs of a neuter signification, § 90.

Hiphil and Hophal: הֲקִים for הַקְוִים, יָקִים for יְקֻוַּם, הוּקַם for הָקְוַם, the short vowel of the prefix being prolonged in a simple syllable, § 59.

2. In the Kal construct infinitive, future, imperative and passive participle, the quiescent is softened into its homogeneous vowel, קוּם, רִיב; in the future the preformative commonly takes the simplest of the long vowels *ā*, יָקוּם, יָרִיב, comp. יָסֹב.

3. In the Kal absolute infinitive and in the Niphal species a similar softening of ו occurs, which, with the accompanying or preceding *a*, forms *ō*, § 57. 2. (5), קוֹם (kōm = kāūm) for קָוֹם; נָקוֹם for נָקְוַם, the prefix usually taking the simplest of the long vowels *ā;* יָקוֹם for יְקֻוַּם.

4. In the first and second persons of the Niphal and Hiphil preterites *ō* (וֹ) is inserted before the affixed termination in order to preserve the long vowel of the root

from the compression incident to standing before two consonants, § 61. 4; in the feminine plurals of the Kal future *ĕ* (ֶ) is sometimes inserted for a similar reason, this prolongation of the word being attended by a shifting of the accent and a consequent rejection of the pretonic vowel of the first syllable, נִקּוֹבוֹתָם, הַקִּימוֹתָ, תְּקוּמֶינָה. In the Niphal preterite, when the inserted וֹ receives the accent, the preceding וֹ is for euphony changed to וּ, e. g. נָקוּמוֹתִי.

5. In the Kal and Hiphil species the apocopated future takes the diphthongal vowels *ō* and *ē* in distinction from the ordinary future, which has the pure vowels *ū* and *ī*, § 66. 1. (2) *b*, thus יָשֹׁב, יָשֵׁב. With Vav Conversive the accent is drawn back to the simple penult, and the vowel of the last syllable is shortened, וַיָּשָׁב, וַיָּשֶׁב.

§ 156. 1. In the Piel, Pual, and Hithpael, the form of perfect verbs is rarely adopted, the second radical appearing as וּ, e. g. עֻוַּד, or as י, e. g. קִיַּם.

2. Commonly the third radical is reduplicated instead of the second, which then quiesces in Hholem, Pi. קוֹבֵם, Pu. קוֹבַם, Hith. הִתְקוֹבֵם.

a. In the Pual *o* is the passive vowel here adopted in preference to *u:* in the Piel and Hithpael it arises from the combination of *u*, to which וּ is softened, with the antecedent *a*, קוּבַּם for קֻוַּם, § 82. 5. *b* (3).

3. Sometimes the quiescent letter is omitted from the root, and the resulting biliteral is reduplicated, Pi. כִּלְכֵּל, Pu. כֻּלְכַּל.

a. The two forms of the intensive species, which depart from the regular paradigm, precisely resemble in appearance those of Ayin doubled verbs, though constructed upon a different principle, as already explained.

§ 157. The inflections of Ayin Vav verbs are shown in those of קוּם *to stand* or *rise*, in Paradigm IX; the divergent forms of Ayin Yodh verbs in the Kal species are exhibited by רִיב *to contend.*

a. Ayin Vav and Ayin Yodh verbs are named not from the Kal preterite, in which the quiescent is rejected, but from the construct infinitive, the simplest form in which all the radicals appear.

b. No Hophal forms occur in those persons in which the inflective terminations begin with a consonant. The same is true of the Ayin Yodh imperative.

Remarks on Ayin Vav and Ayin Yodh Verbs.

§ 158. 1. Medial Yodh and Vav remain without quiescence or rejection in a few verbs, whose root contains another feeble consonant by contrast with which these letters acquire new strength. This is always the case in Lamedh He verbs, e. g. חָיָה, נָוָה; so likewise in the following guttural verbs and forms, גָּוַע *to expire*, : תֵּחָוֵרוּ Isa. 29: 22, : רְצוּיָחוּ Isa. 42: 11, אָיַב *to be an enemy*, עוֹיֵן 1 Sam. 18: 9 K'ri (K'thibh עין), עֲיָפָה Jer. 4: 31, which are confined to the Kal species, and in רָוַח *to be airy* or *refreshing*, which is besides found in the Pual participle.

2. The Kal preterite has Pattahh in two instances as in Ayin Vav verbs, בַּז Zech. 4: 10, שַׁח Isa. 44: 18 but שָׁח Lev. 14: 42. It has Tsere in מֵת *to die*, נֵד Isa. 17: 11 (unless this is a noun as explained by Delitzsch and in the common English version) but נָדוּ Jer. 50: 3, and Hholem in אוֹר *to shine*, בּוֹשׁ *to be ashamed*, טוֹב *to be good*, § 82. 1. *a*, and in בָּאוּ Jer. 27: 18, elsewhere בֹּאוּ, זָרוּ Isa. 1: 6, Ps. 58: 4, elsewhere זֹרוּ. Hhirik once occurs instead of Pattahh in the second person plural, פְּגִשְׁתֶּם Mal. 3: 20. The following participles have Tsere, לֵדִים, לֵץ, בֵּץ, בֵּת, שֵׂר; the following have Hholom, בּוֹסְסִים, בּוֹשִׁים, קוֹמִים 2 Kin. 16: 7 (comp. קוֹמִיתֶם Ex. 32: 25 in the Samaritan copy), elsewhere קָמִים, חוֹלָה Jer. 4: 31 if from חוּל and not from חָלָה.

3. The vowel letter א is written for *ā*, § 11. 1. *a*, once in the preterite, קָאַם Hos. 10: 14, and occasionally in the participle, לָאֵט Judg. 4: 21, רָאֵבוֹת Prov. 24: 7, רָאֵשׁ 2 Sam. 12: 1, 4, Prov. 10: 4, 13: 23, שָׂאֵטִים *despising* Ezek. 16: 57, 28: 24, 26, to be distinguished from שָׂטִים *rowing* Ezek. 27: 8, 26. The consonant א is once introduced in place of the omitted ו, רָאֵבָה Zech. 14: 10 for רָבָה; the ancient versions favour the assumption, that כָּאֲרִי Ps. 22: 17 is in like manner for כָּרִים *piercing*, though the most recent and ablest expositors take it to be a preposition and noun *like the lion*.

4. The accent regularly remains upon the radical syllable before affixes consisting of a vowel or a simple syllable, though with occasional exceptions, e. g. קָאָה Lev. 18: 28, רָבּוּ Gen. 26: 22, עָשׂוּ Gen. 40: 15, תָּרוּ Num. 13: 32. In a few instances it is shifted by Vav conversive preterite, § 100. 2, וְלָכוּ Obad. ver. 16, וְסָפוּ Am. 3: 15, וְנָחָה Isa. 11: 2, וְנָחוּ Isa. 7: 19 but וּבָאוּ ibid., וּבָאָה Zech. 5: 4, וְלָנָה ibid., where the feminine ending is ה֫ instead of ה֗; so in the passive participle, זוּרָה Isa. 59: 5 for זֹרָה.

§ 159. 1. Hholem is in a few instances found instead of Shurek in the construct infinitive, בּוֹא, בּוֹשׁ Judg. 3: 25, כּוֹם, נוֹחַ and נֹחַ, נוֹעַ Isa. 7: 2, elsewhere נֹעַ, עוֹז Isa. 30: 2, which is not from עָזַז, שׂוֹם Josh. 2: 16, else-

where שׂוּם, and with suf. רוֹמְמֵם Ezek. 10: 17, גִּילְּךָ Ps. 71: 6, which is not the participle from גָּוָה (Gesenius), גִּחַי *my breaking forth*, i. e. the cause of it Ps. 22: 10, see Alexander in loc.; Gesenius explains this form as a participle, but is obliged in consequence to assume a transitive sense which nowhere else belongs to the verb.

2. The following imperatives have Hholem, אֹזְרִי Isa. 60: 1, בּוֹשׁ, בֹּא, גְּחִי Mic. 4: 10, הוֹשִׁי Mic. 4: 13. With paragogic ה, קוּמָה, קוּמָה or שׁוּבָה, שׁוּבָה or שׁוּבָה. Examples of the feminine plural, לְכֶנָה, שְׁבֶנָה.

3. The following futures have Hholem, יָבוֹא, יָדוֹן Gen. 6: 3, elsewhere יָדִין, יָסוֹג Ps. 80: 19, יָחוֹשׁ and יָחֻשׁ, יָבוֹשׁ where the Hhirik of the perfect paradigm is lengthened to Tsere under the preformative. Examples of the feminine plural: תְּבֹאֶינָה and תָּבֹאנָה, תְּבוֹרֵרְנָה, תְּפוּצֶינָה and Zech. 1: 17 תְּפוּצֶנָּה (in Baer's edition without Daghesh), תְּשׁוּבֶרְנָה and תָּשׁוּבְנָה, תָּאֹרְנָה, תְּבוּחֶנָה Ezek. 13: 19 (Baer no Daghesh). The accent is shifted and Kamets rejected from the preformative upon the addition of a suffix or paragogic Nun, the latter of which is particularly frequent in this class of verbs both in the Kal and Hiphil future, יְשׁוּפֶךָּ, אֲשֻׁחֲךָ, תְּזוֹלְלָה, יְכַלְכְּלוּם, יְקוֹמְמוֹן, יְבוּחֻנוֹן, תְּבוּחֻנָּה Ezek. 4: 12, with Daghesh euphonic in the ג and נ which Baer omits. Apocopated future: יָשֹׁב, יָשֹׁב and יָשֻׁב־, יָגֹר, תָּקֹן, תָּגֹר, יָקָם with the accent thrown back to the penult יָקָם. Future with Vav consecutive: וַיָּגָר (in pause וַיָּגָם), וַיָּשָׁב (וַיֵּשֶׁב), וַיָּגָל, וַיָּקָם, וַיָּקָן, וַיָּצוֹם; the last vowel is changed to Pattahh before a final guttural, וַיָּגַע, וַיָּגַח, and sometimes before ר or after an initial guttural וַיָּזַר but וַיָּגֶר, וַיָּשֶׁם *he was weary*, וַיָּקָם *he flew*, וַיָּחַשׁ; the vowel of the preformative is likewise changed to Pattahh in וַיַּחַשׁ Job 31: 5, וַיַּעַשׂ 1 Sam. 14: 32, וַיַּחַשׂ 1 Sam. 15: 19 but וַיָּעַשׂ 1 Sam. 25: 14.

§ 160. 1. The verbs which exhibit peculiar Ayin Yodh forms in Kal, with unimportant exceptions, either do not occur in the Hiphil or retain the same signification in both these species. This has led some grammarians to entertain the opinion that these are not Kal but abbreviated Hiphil forms, while others suppose that the Hiphil in these verbs is a secondary formation, and has arisen from the Kal future having the form of the Hiphil. Only three examples occur of quiescent Yodh in the Kal preterite, רִיבוֹתָ Job 33: 13 (רַבָּה Lam. 3: 58), בִּינֹתִי Dan. 9: 2 (בַּנְתָּה Ps. 139: 2) הִרְגּוֹם Jer. 16: 16; בִּין Dan. 10: 1 has been variously explained as 3 pers. preterite, imperative or infinitive.

2. The following verbs have י in the Kal future and imperative, בִּין *to understand*, גְּחִי (once גִּחַי Mic. 4: 10) *to break forth*, גִּיל (once יָגִיל Prov. 23: 24 K'thibh) *to exult*, דִּין (once יָדוֹן Gen. 6: 3) *to judge*, לִין *to lodge*, רִיב *to contend*, שִׂיחַ *to muse*, שִׂים (once יָשׂוֹם Ex. 4: 11) *to put*, שִׂישׂ (once יָשׂוּשׂוּ Isa. 35: 1) *to rejoice*, שִׁיר (once יָשׁוֹר Job 33: 27) *to sing*, שִׁית *to place;* חִיל or חִיל *to twist, writhe*, has both Yodh and Vav. To these are to be added נִירוּ Jer. 4: 3, Hos. 10: 12, חִישָׁה Ps. 71: 12 K'thibh, K'ri חוּשָׁה as always elsewhere; אָצִין *to urge*, צָצִין *to flourish*, רָחִיד *to wander*, are in the Hiphil according to Gesenius: but as the corresponding preterites are not Hiphil but Kal, and there are no other forms of the Kal future, they

might with equal propriety be regarded as Kal futures of Ayin Yodh roots; the second of them is so regarded by Ewald. Apocopated futures: יָבֹן, יָגֹל and יָגֶל, יָשֶׂם, יָרֶב, יָשֶׁת, תָּלֶן and :תָּלֶן. With Vav consecutive: וַיָּגֶל, וַיָּשֶׂם, וַיָּתָבֶן, וַתָּחַל, וַתָּשֶׁר. With paragogic Nun and suffixes: תָּגֹלְנָה. יָשׂרְנָם, תָּתִילֹן, רָגִילֹן. Feminine plural: תָּגֹלְנָה.

3. The infinitives show a stronger disposition to adopt Vav forms. Yodh is only retained in the following absolute infinitives: בִּין Prov. 23: 1, גֹּחַ and גָּחַ, גִּיל Prov. 23: 24 K'ri (גול K'thibh), רִיב Jer. 50: 34, elsewhere רוב. Construct infinitives: לִין, דִּין Gen. 24: 23, elsewhere לוּן, רִיב once רוּב Judg. 21: 22 K'thibh, שִׂחַ and שׂוּחַ, שִׂים Job 20: 4, 2 Sam. 14: 7 K'ri, elsewhere שׂוּם, שִׁיר 1 Sam. 18: 6 K'ri (K'thibh שור), שִׁית, also with suf. דִּשׁוֹ Deut. 25: 4, elsewhere דּוּשׁ. In the difficult verse Hos. 7: 4 מֵעִיר has been variously explained, as the Kal infinitive preceded by the preposition מִן or as the Hiphil participle. The only certain instance of a Kal passive participle of Ayin Yodh verbs is שׂוּמָה 2 Sam. 13: 32 K'ri (K'thibh שׂוּמָה); some explain שָׂם Num. 24: 21, Obad. ver. 4, as a passive participle, others as an infinitive.

4. Ayin Yodh verbs adopt the Vav forms in all the derivative species, e. g. יְבוּן, נְבוֹנוֹתִי, רְבוֹנְנָהּ, הִתְבּוֹנֵן, יְוּשַׁת; נָוִד *cooked*, i. e. *pottage*, is the only instance of a Niphal participle with Yodh.

§ 161. 1. Examples of the Niphal preterite: נָסוֹג, נָסוֹן, נָאוֹר; the accidental Hhirik of the perfect paradigm is preserved in נִבּוֹל by means of Daghesh-forte in the first radical; in נָעוֹר it is lengthened to Tsere before the guttural; in :נָמַר Jer. 48: 11 the radical ו is rejected, which gives it the appearance of an Ayin doubled verb. Inflected forms: נָבוֹנָה (part. fem. נְבוֹנָה), נָבֹבוּ, נָסוֹגוּ, נָמוֹלוּ, נָסוֹגֹתִי, נְפוּצוֹתִי, נְפוּצֹתֶם, נָקֹטֶם.

2. Infinitive absolute: הָמוֹל. Construct: הָמוֹל, הָשׁוֹחַ, with ח rejected after the preposition לָאוֹר Job 33: 30, § 91. *b;* once it has Shurek, הָדוּשׁ Isa. 25: 10. Imperative, הָכוֹן, הָמוֹלוּ.

3. Future: יָכוֹן, יָמוֹט, יָמוֹל, יָנוֹן Ps. 72: 17 K'ri (K'thibh ינין), יָפוּצוּ, נָבֹכִים, נָסוֹגִים, נָפוּצִים, נָלוּז, נָבוֹן, יֵאוֹר, יֵאֹרוּ, יֵעוֹר, נָמוּלִים. Participle:

§ 162. 1. The short vowel of the perfect paradigm is in a few instances preserved in the Hiphil by doubling the first radical, thus הִנִּיחַ and הֵנִיחַ, חִסִּית and חֵסִית, הֵטִּיב, הֵרַּעְתָּ, and הֵרַע, יָתִיר and וַיּוֹתֶר 2 Sam. 22: 33.

2. Hiphil preterite inflected: הֵצִיקָה, הֵלִינוּ and הֵלִנוּ; with syllabic affixes: הֲכִינוֹתָ, הֲבִישׁוֹתָ, הֲרִימוֹתָ and הֲרֵמֹתָ, הֲרֵעֹתֶם and הֲרֵעֹתֶם, הֲשִׁיבֹתֶם, or when the first radical is a guttural, הֲעִידוֹתִי, הֲעִידֹתָ, and הֲנִיחוֹתִי, הֲנִיחֹתָה, or without the inserted Hholem, הֵנַחְתִּי and הֵנַחְתִּי, הֵכִינוּ and הֲכִינוּ, הֲבִיאֹתֶם and הֲבִיאֹתֶם, הֲמִיתֹתֶם and הֲמִיתֹתֶם, § 61. 4. *a*. With suffixes, הֲכִינוֹ, הֲכִילָנִי, הֲכִירָהּ, הֲכִירוֹ, הֲקִאתוֹ.

3. Hiphil future inflected: הָכִינוּ, feminine plural הָשֵׁבְנָה, הָקִימְנָה, תְּהִימֶנָה. With Nun paragogic and suffixes: הֲמִיתֵם, הֲמִיתֵנִי. Apocopated future: הָמֵת, הָשֵׁב, הָפֵחַ, הָרַח. With Vav consecutive: וַיָּמָת, וַיָּקָם, וָאָעֵד, וַיָּרַח, וַיָּפַח and וָאָעִיר, if the last radical be a guttural, וַיָּרַע, וַיָּפַח, or א, וַיָּבֵא

once נְגַבְיָא and once נְגַבְיָא; upon the reception of a suffix the vowel is restored to its original length, נְגִישַׁיִךְ, נְגִידַהוּ.

4. Hiphil infinitive absolute: הָשֵׁב, הָכֵת, הָכֹם once הָקֵם Jer. 44: 25; construct, הָכִיל, הָמִית, הָשִׁיב, הָקִים, with suffix הַרְדֵּנִי, הֲסִירְךָ, הֲקִימֹתָם, הֲנִיפָם and once with a feminine termination הֲנִיפָה Isa. 30: 28.

5. In a few instances *ŭ* is found in the Hophal before Daghesh-forte or Sh'va, הֻנַּחָה Zech. 5: 11, הֻנָּח Ezek. 41: 9, 11 but הוּנַח Lam. 5: 5, and in some editions הֻקַּם 2 Sam. 23: 1, יֻעַל Job 41: 1, הֻכְתָּה 2 Sam. 21: 9, though others read הֻכַּם, יֻעָל, הֻכָּתָה.

§ 163. 1. The following verbs, which are only found in one or more of the three reduplicated species, double the middle radical either as Vav or as Yodh, viz.: חוּב *to render liable*, עוּל *to do wickedly*, עוֹר *to blind*, עִוַּת *to pervert*, שׁוּעַ *to cry for help*, חֻצַּצְתֶּנִּי Josh. 9: 12, יֻצַּעְתֶּנִּי Josh. 9: 4; so also קוּם fut. יָקוּם and יָקֹם, עוֹד fut. יְעוֹדֵד, which have quiescent Vav in other species, and חוּל, which has consonantal Vav likewise in the Kal.

2. The following omit the quiescent in the Piel and double the resulting biliteral, כִּלַּכֵּל *to sustain*, טְאַטְאתִיהָ Isa. 14: 23, מְיַלֶּלְנָה Isa. 22: 17, יְזַעֲזָעֵךְ Hab. 2: 7, יְצַפְצְפֻנִי Job 16: 12 but יְצָפְצֵן Jer. 23: 29, בָּרַכְתָּ Num. 24: 17 and מְבָרְכֶיךָ Isa. 22: 5, תְּשַׁגְּשֵׁנִי Isa. 17: 11; יְיַשְּׁרוּ Isa. 15: 5 is for יְשַׁרְשֵׁרוּ, § 57. 1; יְשַׁלְשֵׁנִי Job 39: 3 is perhaps for יְשַׁלְּשֵׁנִי from שׁוּל, comp. אֲאַפְּקֶנָּה Ps. 139: 8 for אֲאַבְּקֶנָּה, § 88, though Gesenius conjectures that it is an erroneous reading for יְשַׁלְּשֵׁנִי from לוּשׁ. The only Hithpael formed by a like reduplication is הִתְחוֹלֵל Esth. 4: 4, elsewhere הִתְחוֹלֵל.

3. Other verbs double the third radical in the Piel and Hithpael. Examples of the feminine plural: תְּצוֹלַלְנָה, תְּקוֹמַמְנָה, תְּהֵילַלְנָה, תְּחֻשַּׁלַּמְנָה. Hholem is changed to *ŭ* before the doubled letter in the contracted form, וַיְרִיעֻנֵּנִי Job 31: 15 for וַיְרִיעֵנֵּנִי, § 61. 3. Fürst explains וַהֲבִיעֻנָּנִי Isa. 64: 6 as in like manner for וַהֲבִיעֵנָּנִי, while Gesenius makes it a Kal future, used in this single instance in a transitive sense. בְּיַסְּכֻם Am. 5: 11 is probably a variant orthography for בְּיַסְּכֵם, § 92. *b*.

4. The following are the only examples of the Pual in Ayin Vav verbs, viz.: With ו doubled, עֻלַּת Eccles. 1: 15, מְרֻוַּחִים Jer. 22: 14. Reduplicated biliteral, בֻּלְבְּלָה 1 Kin. 20: 27. The third radical reduplicated, הוּלַל *to be born*, יֻלְּדוּ Ezek. 28: 13, Ps. 37: 23, תְּיֻלַּדְנָה Ps. 75: 11 and מְרוֹמָם Neh. 9: 5, יֻרְגַּע Isa. 16: 10, יְרוֹמָמֻנִי Job 26: 11, בְּשׁוֹבָבֶת Ezek. 38: 8.

5. הֲפִיצֹתֵיכֶם Jer. 25: 34 is an anomalous preterite from פוּץ *to scatter*, with ת prefixed and inflected after the analogy of Niphal; some copies have the noun תְּפִיצֹתֵיכֶם *your dispersions*.

In וְהֻכְבְּדִי Ezek. 36: 11 for וְהֻכְבַּדְתִּי from כּוֹב, Tsere is retained under the prefix as though the word were from the related Pe Yodh verb יָכַב, e. g. וְיֻכְבַּד־בִּי. On the other hand, in וַתְּנִיקֵהוּ Ex. 2: 9 from יָנַק, Tsere is rejected as though it were from an Ayin Vav verb.

LAMEDH ALEPH (ל״א) VERBS.

§ 164. 1. Aleph, as the third radical of verbs, retains its consonantal character only when it stands at the beginning of a syllable, יָמְצָא, הִמְצִיאוּ.

2. At the end of the word it invariably quiesces in the preceding vowel, § 57. 2. (2), מָצָא, מִצְאוּ, הִמְצִיא. If this vowel be Pattahh, as in the Kal and Niphal preterites and in the Pual and Hophal species, it is in the simple syllable lengthened into Kamets, § 59, יָצָא for יָצַא, נִמְצָא for נִמְצַא; so likewise in the Kal future and imperative, where א as a guttural requires *a*, יִמְצָא for יִמְצַא, מָצָא for מְצָא. A like prolongation of Pattahh to Kamets occurs before medial א in the first and second persons of the Kal preterite, מָצָאתָ, מָצָאתֶם.

3. With the single exception just stated, medial א quiesces in the diphthongal vowel *e* before syllabic affixes; thus, in the first and second persons of the preterites of the derivative species in Tsere, נִמְצֵאתָ, הִמְצֵאתִי, in the feminine plurals of all the futures and imperatives in Seghol, מָצֶאנָה, תִּמְצֶאנָה.

a. This *e* may arise from the diphthongal preferences of א, § 60. 1. *a* (5), or it may be borrowed from the corresponding forms of ל״ה verbs, between which and ל״א verbs there is a close affinity and a strong tendency to mutual assimilation. In Palestine Aramaeic and Syriac no distinction is made between them.

§ 165. This class of verbs is represented in Paradigm XI by יָצָא *to find;* the Piel and Hithpael, though wanting in this verb, are supplied from analogy. The Pual and Hophal are omitted because they are of rare occurrence, and they present no peculiarities but such as are common to the other species.

a. In their ordinary inflection Lamedh Aleph verbs differ from the perfect paradigm in the vowels only.

Remarks on Lamedh Aleph Verbs.

§ 166. 1. Verbs having Tsere as their second vowel, § 82. 1. *a*, retain it in the first and second persons of the Kal preterite, וָרָאתָ (but וְרָאתֶם Josh. 4: 24), עָשִׂאתִי, עָשִׂאתָ.

2. Quiescent א is occasionally omitted from the body of the word, e. g. Kal pret. בָּצֹתִי Job 1: 21 for בָּצֹאתִי, בָּצֹתָ Num. 11: 11, צָמֹתִי Judg. 4: 19, בָּלֹתִי Job 32: 18, בָּנוּ 1 Sam. 25: 8 for בָּאנוּ: fut. תְּשֵׂנָה and תְּשֵׂאנָה; יֹצַת Deut. 28: 57 part. fem. sing. for יֹצֵאת; מְשֵׂתוֹ Job 41: 17 for מְשָׂאתוֹ const. inf. with prep. and suf. from נָשָׂא. Niph. pret. נִחְבֹּתֶם Josh. 2: 16, נִעְמֹתֶם Lev. 11: 43. Otiant א, § 16. 1, may in like manner be dropped from the end of the word after quiescent Vav or Yodh, e. g. חֲבוֹר Gen. 20: 6 for חֲבוֹאר, חֲטוֹא 1 Kin. 12: 12 for וַיָּבוֹא, וַיְחֲבֹר 2 Kin. 13: 6, חֲחָבֹר Jer. 32: 35, יָנִי Ps. 141: 5, יַשׁ Ps. 55: 16, אָבִי 1 Kin. 21: 29, Mic. 1: 15, בְּבִי 2 Sam. 5: 2, and in three other passages; חָבִי Ruth 3: 15 is Hiph. imper. fem. for חָבִיאִי, § 62. 2.

3. The vowel following א is in a few instances given to a preceding vowelless consonant, and the א becomes otiant or quiescent, § 57. 2 (3), נָשׂוּא Ps. 139: 20 for נָשָׂאוּ, וְנָשׂוּא Jer. 10: 5 for וְנָשָׂאוּ, רְאִי imp. for רְאִיאִי, יְצָא Eccles. 10: 5 Kal part. fem. for יוֹצְאָה, חֹטְאִים 1 Sam. 14: 33 for חֹטְאִים, בּוֹדָם Neh. 6: 8 Kal part. with suf. for בּוֹדְאָם, נִרְפָּא Ezek. 47: 8 for נִרְפָּאוּ; and, on the contrary, quiescent א attracts to itself the vowel of the preceding consonant in קְרָאן Ex. 2: 20 Kal imp. for קִרְאָנָה and צְאֶינָה Cant. 3: 11 for צֶאנָה from יָצָא.

4. Final א resumes its consonantal character upon the addition of suffixes נָשָׂאוֹ, receiving (ַ) before ךָ, כֶם and כֶן, in consequence of which a previous Tsere or Sh'va is converted into Pattahh, § 60. 1, נְשָׂאֲךָ, שִׂנְאֲךָ, בְּרָאֲךָ, חִבְּרָאֲךָ, כִּסְּאֲךָ Pi. inf., מְצָאֲכֶם, עַמְּאֲכֶם Kal inf. for מְצָאכֶם, § 61. 1. *c*.

5. Kamets in the ultimate is mostly retained before suffixes and paragogic ה, וְכִצְּאָה, רְפָאָה Ps. 41: 5, וְאֶחֳרָאָה 1 Sam. 28: 15, but נִכְבְּאָה Isa. 56: 12. Tsere is rejected אֲצָאָה Neh. 2: 13, 2 Chron. 1: 10, or retained only in pause: צֵאָה Judg. 9: 29.

§ 167. 1. He is, in a few instances, substituted for א, רָפָה Ps. 60: 4 for רָפָא, הֵרְפָּה Jer. 19: 11 for חֲרָפָא, נָטָה Ps. 4: 7 for נָשָׂא, § 3. 1. *a*, נָחְבָה Jer. 49: 10 for נֶחְבָּא, הֶחְבֵּה 1 Kin. 22: 25, 2 Kin. 7: 12 for הֶחְבֵּא, רַמֵּה Job 8: 21 for רַמֵּא.

2. Sometimes א remains, but the vowels are those of ל״ה forms, כָּלֵאתִי Ps. 119: 101 for כָּלָאתִי, חֹטֵא Eccl. 8: 12, 9: 18, Isa. 65: 20 for חֹטֵא, נְשֵׂא 1 Sam. 22: 2, Isa. 24: 2, בּוֹצֵא Eccl. 7: 26, נְשֵׂא 1 Kin. 9: 11, Am. 4: 2 Pi. pret. for נִשֵּׂא, הָבֵא Ps. 143: 3 for הֵבֵא, בִּצֵּא Jer. 51: 34 for בִּצֵּא, רִפֵּאתִי 2 Kin. 2: 21 for רִפֵּאתִי, רִפֵּאנוּ Jer. 51: 9 for רִפֵּאנוּ, רְגֵמֵא Job 39: 24 for רְגֵמֵא, הֶחְבֵּא Deut. 28: 59 Hiph. pret. for הֶחְבִּיא, בּוֹצֵא from בּוֹצִיא; to which may be added תְּשֵׂאנָה Ezek. 23: 49, תְּמֵצֵאנָה Jer. 50: 20, with י inserted as in ל״ה verbs.

3. Sometimes the ל"ה form is adopted both in consonants and vowels, מָלוּ Ezek. 28: 16 for מָלְאוּ, כָּלוּ 1 Sam. 6: 10, נְשׂוּ Ezek. 39: 26, כִּלֹּתִנִי 1 Sam. 25: 33 for כִּלְּאתִנִי, צָמֹת Ruth 2: 9 for צָמְאת, וְכָלֹה Gen. 23: 6 for וְכִלְּא, תְּרֻפִּינָה Job 5: 18 for תְּרֻפְּאנָה comp. Jer. 8: 11, 51: 9, 2 Kin. 2: 22, קְרוּ Jer. 25: 27 is 2 pl. imp. of קוּא, נְשׂוֹר Ps. 32: 1 for נְשׂוּא, נִבְּרֹתָ Jer. 26: 9 for נִבְּאתָ, תְּהִנְבְּרוֹת 1 Sam. 10: 6, תְּהִנַּבְּאוֹת 1 Sam. 10: 13, חָמְצִרְתָּ 2 Sam. 3: 8, צֵבֵרָה Isa. 29: 7 for צְבְאֵיהָ; מַקְנִיא Ezek. 8: 3 is by some interpreters thought to be for מַקְנֶיֹא *provoking to jealousy*, and by others explained in the sense of the ל"ה verb *selling* (Israel to their foes).

§ 168. 1. The 3 fem. preterite has the old ending תָ, § 86. *b*. in חָטָאת Ex. 5: 16 for חָטְאָה, קָרֵאת Deut. 31: 29, Isa. 7: 14, Jer. 44: 23, חָבֵאת Gen. 33: 11 Hoph. from בוֹא, נִפְלָאת Ps. 118: 23 (נִפְלֵאת Deut. 30: 11 is the feminine participle), to which the customary ending ה is further added in נִפְלְאָתָה 2 Sam. 1: 26, חֻחְבְּאָתָה Josh. 6: 17 for חֻחְבְּאָה.

2. A feminine termination ת, ת, or as in ל"ה verbs וֹת, is occasionally added to the construct infinitive, e. g. Kal, שִׁנְאָה, טָמְאָה, יִרְאָה, קְרַאת from קָרָא *to meet*, distinguished from קְרֹא and קְרֹאוֹת Judg. 8: 1 from קָרָא *to call*, מְלֹאת and מְלֹאוֹת never מָלֵא, שְׂנֹאת Prov. 8: 13, with suf. חֲמַאתּוֹ Ezek. 33: 12. Niphal, חִנָּבְאתּוֹ Zech. 13: 4. Piel, מַלֹּאוֹת and מַלֵּא, כַּנֹּאתוֹ 2 Sam. 21: 2; מַשָּׂאוֹת Ezek. 17: 9 is a Kal inf. const., formed as in Chaldee by prefixing מ.

3. There are two examples of the Niphal infinitive absolute, נִקְרֹא 2 Sam. 1: 6 and הִמָּצֹא Ex. 22: 3: the analogy of the former has been retained in the paradigm for the sake of distinction from the construct. Piel infinitive absolute: קַנֹּא, רַפֹּא, בָּרֹא. Hiphil inf. abs.: הַכֵּא, הַשֵּׂא.

4. The Hiphil future with Vav consecutive commonly has Tsere in the ultimate, though Hhirik also occurs וַתַּחְבִּא, וַיַּכֵּא, וַיַּחְבִּא, וַתַּחְבִּא and וַיּוֹצִא, וַיָּבֵא, once וַיָּבִיא Ezek. 40: 3, and once וַיָּבְרִא Neh. 8: 2.

5. Kamets sometimes occurs in the ultimate of the Hithpael future, וְתִנַּשָּׂא Num. 23: 24 but תִּתְחַשֵּׂא Ezek. 29: 15, so וְתִרְחַצְנָה, וְתִשְׁמָּא, וְתִתְחַפָּא; וְתִתְמַלָּאן; more rarely in the preterite, הִשְׁתַּמָּאתָ.

§ 169. 1. The following are the only Pual forms which occur. Pret.: חֻבְּאוּ, קֻלָּא. Fut.: יְדֻלָּא. Part.: מְדֻלָּא, מְטֻמָּאָה, מְטֻמָּאִים, מְסֻלָּאִים, מְטֻמָּאוֹת, with suf. מְקֻרָּאַי.

2. The following are the only Hophal forms: Pret. הָחְבָּאוּ, הוּצָּאָה, הוּבָּא, הָבָאת, הָבָאתָה, הָבְאוּ. Fut.: יוּבָא, יוּבָאוּ. Part.: בּוּצָּאת, מוּבָּא.

3. For the anomalous forms, תָּבוֹאָתָה Deut. 33: 16, תְּבוֹאָתָהּ Job 22: 21, תָּבֹאת 1 Sam. 25: 34 (K'thibh תבאתי), see § 88 (sing. 3 fem.).

LAMEDH HE (ל"ה) VERBS.

§ 170. In these verbs the third radical, which is Yodh or Vav, does not appear at the end of the word except

in the Kal passive participle, e. g. גָּלוּי; in all other cases it is rejected or softened, the resulting vowel termination being usually expressed by the letter ה, § 11. 1. *a*.

In the various preterites ה stands for the vowel *a*, and is hence pointed ה֫.

In the futures and participles it stands for *ĕ*, and is pointed ה֑.

In the imperatives it stands for *ē*, and is pointed ה֣.

In the absolute infinitives it stands for *ō* or *ē*; in the Kal it is pointed ה, in the Hiphil and Hophal ה֥, in the Niphal and Piel ה֤ or ה֣. There are no examples in Pual and Hithpael.

The construct infinitives have the feminine ending וֹת.

a. In this class of verbs the Yodh forms have almost entirely superseded those with Vav. The latter are confined to the construct infinitive where וֹת, occurring in all the species, is best explained by assuming ו to be radical (comp. רַאֲוָה Ezek. 28: 17 as an alternate of רְאוֹת) and to a few other sporadic cases, viz.: a single Kal preterite, שָׁלַוְתִּי Job 3: 25, the reduplicated forms of three verbs, נְאַוָּה, כְּנַחֲלוֹ, חִשְׁתַּחֲוָה, and the peculiar form, אֲרַלָּוֵהּ Isa. 16: 9.

b. In the Kal preterite, Yodh is rejected after the heterogeneous vowel Pattahh, § 57. 2. (5), which is then prolonged to Kamets in the simple syllable, גָּלָה for גָּלַי. As Pattahh is likewise the regular vowel of the ultimate in the preterites of Niphal and Hophal, and besides was so originally in all the active species, as is shown by the Arabic § 82. 5. *b* (3), the final Kamets of these species may be similarly explained. Yodh is in like manner rejected after the heterogeneous Hholem of certain infinitives, while it leaves the homogeneous Tsere of others unmodified.

c. The futures, imperatives, and participles of certain of the species, (including the Hiphil as shown by some of its inflections) have *e* (Arabic *i*) as the normal vowel of their ultimate; in this Yodh can quiesce, leaving it unchanged. Those of the other species have or may have *a* in the ultimate; this, combined with the *i* latent in י, will again form *e*. In the future this becomes *ĕ* (ֶ) in distinction from the ending *ē* (ֵ) of the more energetic imperative; and the absolute is distinguished from the construct state of the participle in the same way.

§ 171. 1. Before personal endings beginning with a vowel the last radical is occasionally retained as י, particularly in prolonged or pausal forms, חָסָיְתָה, חָסָיוּ, חָסָיִין; it is, however, commonly rejected and its vowel given to

the antecedent consonant, גָּלוּ for גָּלְיוּ, תִּגְלִי for תִּגְלְיִי; so in the preterite 3 fem., which in these verbs retains the primary characteristic ת֫, § 86. *b*, גָּלָה for גָּלְיָת, to which is further appended the softened ending ה֫, thus גָּלְתָה, in pause גָּלְתָה.

a. The ה֫ of the 3 fem. pret. is frequently explained as a second feminine ending added after the first had lost its significance in the popular consciousness. It might, perhaps with equal propriety, be regarded as paragogically appended, § 61. 6, comp. such nouns as רִשְׁעָתָה, עַוְלָתָה, אַרְמָתָה, in order to produce a softer termination and one more conformed to that which obtains in the generality of verbs. Nordheimer's explanation of the ת as hardened from ה, גָּלְתָה for גָּלְהָה, labours under the double difficulty that there is neither proof nor probability for the assumption that the consonant ה could be exchanged for ת, and that ה in the preterite of these verbs is not a radical nor even a consonant, but simply the representative of the vowel *a*.

2. Before personal endings beginning with a consonant the third radical י remains but is softened to a vowel, so that in the Kal preterite it quiesces in Hhirik, in the Pual and Hophal preterites in Tsere, in the Niphal, Piel, Hiphil, and Hithpael preterites in either Hhirik or Tsere, and in the futures and imperatives of all the species in Segholֿ, גָּלִיתָ, גָּלִיתִי, תִּגְלֶינָה.

3. Forms not augmented by personal endings lose their final vowel before suffixes, e. g. גָּלַנִי, גָּלָךְ, from גָּלָה, יִגְלֵהוּ from יִגְלֶה, הִגְלָךְ from הִגְלָה. The preterite 3 fem. takes its simple form, e. g. גָּלַתְהוּ or גָּלָתְהוּ, and in pause גָּלְתָה֫וּ.

§ 172. The Lamedh He verbs will be represented in Paradigm XII by גָּלָה *to uncover, reveal*, which is used in all the species.

SHORTENED FUTURE AND IMPERATIVE.

§ 173. 1. The final vowel ה֫ is rejected from the futures when apocopated or when preceded by Vav consecutive. The concurrence of final consonants thence re-

sulting in the Kal and Hiphil is commonly relieved by inserting an unaccented Seghol between them, § 61. 2, to which the preceding Pattahh is assimilated in the Hiphil, § 63. 2. *a*, the Hhirik of the Kal either remaining unchanged or being lengthened to Tsere in the simple syllable.

	KAL.			NIPHAL.	PIEL.	HIPHIL.	HITHPAEL.
Future.	יִגְלֶה			יִגָּלֶה	יְגַלֶּה	יַגְלֶה	יִתְגַּלֶּה
Apoc. Fut.	יִגְלְ	or	יִגֶל	יִגָּלְ	יְגַלְ	יַגְלְ	יִתְגַּלְ
Vav Consec.	וַיִּגְלְ	or	וַיִּגֶל	וַיִּגָּלְ	וַיְגַלְ	וַיַּגְלְ	וַיִּתְגַּלְ

2. The final vowel ה_ is sometimes rejected from the imperative in the Piel, Hiphil, and Hithpael species, e. g. Pi. גַּל for גַּלֵּה, Hiph. הָגֶל for הַגְלֵה, Hith. הִתְגַּל for הִתְגַּלֵּה.

Remarks on Lamedh He Verbs.

§ 174. 1. Kal preterite: The third person feminine rarely occurs with the simple ending ת_, עָשָׂת Lev. 25: 21, חרת 2 Kin. 9: 37 K'thibh; so in the Hiphil, הֶלְאַת Ezek. 24: 12, הִרְצַת Lev. 26: 34, and Hophal, הָגְלַת Jer. 13: 19. Yodh is occasionally retained before asyllabic affixes, חָכָתָה Ps. 57: 2, the only instance in which the feminine has the ending usual in other verbs, חָכָתּוּ Deut. 32: 37, נָטָתּוּ Ps. 73: 2 K'ri, and perhaps הַלְיוּ Prov. 26: 7, see § 141. 1; so in the imperative, אָבָיוּ, בָּגָיוּ Isa. 21: 12; future, יִבְנוּן, יִרְבוּן, יִרְבֶּיָן, יִהְבֶּיָן, יִחְבֶּיָן, יִחְזוּן, יִחְסוּן, יִרְתוּן, יִרְבָּיָן, יִרְעוּן, יִרְגוּן, יִרְאוּן, Niphal preterite, נִטְּיוּ, Piel future, יְרַמְיוּן, יְכַסְּיוּ, Hiphil future, תַּגְלִיוּן, imperative, הַגְלוּ for הַגְלֵיוּ.

2. Infinitive: Vav is sometimes written for the final vowel of the infinitive absolute instead of ה, בָּנוֹ, בָּכוֹ, גָּלוֹ, חָגוֹ, חָדוֹ, טָמוֹ, כָּשׁוֹ, כָּנוֹ, קָנוֹ, רָאוֹ, שָׂחוֹ, and in a few instances the feminine termination is added, אָלוֹת, רָאוֹת, שָׂחוֹת. There are also examples of the omission of this termination from the construct infinitive, עֲשֹׂת and עֲשׂוֹ (with suf. עֲשׂוֹתוֹ Ex. 18: 18), קְנֹת, רְאֹת, שְׂחוֹ; once it has the form רַאֲוֹת Ezek. 28: 17.

3. Future: There are a very few examples of Tsere as the last vowel of the future, תֵּרָאֶה Dan. 1: 13, תַּעֲשֶׂה Josh. 7: 9, 9: 24, 2 Sam. 13: 12, תְּהִתֵּה־ Jer. 17: 17; so in the Piel, תְּגַלֶּה Lev. 18: 7 ff., Nah. 1: 3; and, on the other hand, there is one instance of an imperative ending in Seghol, viz., the Piel, רַבֶּה Judg. 9: 29. The radical י remains and rests in Hhirik in יַהֲוִי (3 fem.) Jer. 3: 6, in the Hiphil, תֵּבִחִי (2 masc.) Jer. 18: 23, and in the Kal imperative, חֲבִי (2 masc.) Isa. 26: 20. Yodh appears once as a consonant before a suffix, יְאַתֶּנִּי Job 3: 25, and once before ה paragogic,

אֲהֻבָה Ps. 77: 4, which is very rare in these verbs, but perhaps displaces the final vowel in אֶשְׁעָה Ps. 119: 117, and the Hithpael, נְשְׂתָּנָה Isa. 41: 23. In a few instances י is restored as a quiescent before suffixes, יְחַיֵּרְנוּ Hos. 6: 2, חַכְּרִנִי 1 Kin. 20: 35, יְכַסֵּרְמוֹ Ps. 140: 10 K'ri, אַפְאֵיהֶם Deut. 32: 26. Examples of the feminine plural: תִּבְכֶּינָה, תִּדְלֶנָה, וַתְּהָרֶינָה, וַתַּעֲלֶינָה, תַּעֲלֶינָה and תַּעֲנֶנָּה, תִּרְאֶינָה Mic. 7: 10.

4. The future of a few verbs when apocopated or preceded by Vav consecutive simply drops its last vowel, either retaining Hhirik under the personal prefix or lengthening it to Tsere, נִפֹּץ, נִשֹּׁב, נִדֹּד, נִבֹּךְ, יִשֹּׁק, נִשֹּׁת; so in the Pe Nun forms, נִגַּשׁ and נִגַּשׁ, נֵט, and Pe Yodh נִרַשׁ, with Pattahh-furtive under the first radical of the Pe guttural, יַחַד, § 17. 4, or the vowel of the personal prefix changed to Pattahh, § 60. 1, נַעַשׂ נַעֲרֹ but לֵרֹא, וַתֵּרֹא. Most commonly Seghol is inserted between the concurring consonants, יֵלֶךְ, נֵלֵךְ, נֵזֶר, יֵגֶל, יֵבֶל and נֵתֶן, נֵתְּנָה and נֵתֵּן, נֵקֶב, נֵקֵב, נֵקֶשׁ, נֵקֵר, נֵרֶב and נֵתֵּב, נֵרֶם, נֵתֵּרֶץ, נֵגֶא, נֵתֵּלֶא, יֵשֶׁל, or Pattahh if one of the consonants is a guttural, § 61. 2; thus, in Ayin guttural verbs, נֵלַשׁ, נֵתַּכָּה, נֵרַע, תֵּתַע, in Pe guttural נַתָּן from נָתַן, § 60. 1. *a*. (3), יַחַר from יֶחֱרָה, or with the additional change of the vowel of the prefix to Pattahh, נַתַּחַר from תֵּחֱזֶה, נַתָּחֵן from יֶחֱצֶה, נַתַּעַר נַתַּעַב Isa. 59: 17 (in 1 Sam. 15: 19, 14: 32 K'ri, this same form is from עוּט or עִיר, § 159. 3), נַעַל, נַעֲנַן, נַעַשׂ. The rejection of the final vowel takes place frequently even in the first person singular, which in other verbs is commonly exempt from shortening, § 99. 3. *a*, וָאֹמַן, וָאֹכַל, וָאֹסַף, וָאֹחַז, אֹכַל (from נָכָה), וָאֹבַל, וָאֹבַן, וָאֹשַׂם and וָאֹשֵׂמָה. In a few instances the final vowel is retained in other persons after Vav consecutive, e. g. וַתַּעֲשֶׂה 1 Kin. 16: 25, וַיַּבְנֶה 2 Kin. 1: 10, וַיִּבְנֶה Josh. 19: 50, וַתִּבְכֶּה 1 Sam. 1: 9, וַיַּכֶּה 1 Kin. 16: 17, וַיִּרְאֶה 1 Sam. 17: 42, וַיַּכֶּה 2 Kin. 6: 23, תֵּשֵׁר Deut. 32: 18 is fut. apoc. of עָשָׂה as יֵהַר or יִהַר of חָלָה.

5. The passive participle drops the final י in צָפוּר Job 15: 22 for צָפוּי, עָשׂוּ Job 41: 25 for עָשׂוּי, and fem. plur. נטוּות Isa. 3: 16 K'thibh (K'ri נְטוּיוֹת), עטוּות 1 Sam. 25: 18 K'thibh.

§ 175. 1. In the Niphal preterite Yodh may quiesce in either Tsere or Hhirik, though the former is more frequent, נִקְרֵיתִי and נִקְרִיתִי, נִגְלֵית and נִגְלִית, נִגְלֵינוּ and נִגְלִינוּ, נִפְלֵיתִי and נִפְלִיתִי.

2. Examples of the infinitive absolute: הָגֹלָה, נָדֹמָה, נָגֹלָה. Construct: הָגֹלוֹת and הָגֹלֹת, הָרָאוֹת, הָרָאֹת and הֲרָאֹת; with suffixes, הֲשָׁלְתּוֹ, once as though it were a plural noun, הַזְרוֹתֵיכֶם Ezek. 6: 8, so the Kal infin., בְּנוֹתַיִךְ Ezek. 16: 31.

3. Future apocopated and with Vav consecutive: תִּגֹּל, וַתִּגֹּלָה, וַיִּפֹּת, תִּחַן, תֵּשֵׁב, וַיִּרָא, וַיִּקַּר, and in one verb with Pattahh before ח וַיִּפַּח Gen. 7: 23, Ps. 109: 13, though Baer's edition omits the Daghesh-forte in the former passage, thus making it a Kal future.

§ 176. 1. Piel: Two verbs, נָאָה *to be becoming* and נָטָה *to draw* (the bow), having a guttural for their second radical, double the third instead, which in the reduplication appears as Vav, though the general law is ad-

hered to requiring its rejection from the end of the word and the substitution of the vowel letter ה. The only forms which occur are, of the former, the preterite נָאָוָה Ps. 93: 5, נָאִיתִי Cant. 1: 10, Isa. 52: 7, and of the latter the participle plur. constr. בְּקֹחֵי Gen. 21: 16. There are three examples of Hholem inserted after the first radical, § 92. *b*, שׁוֹשַׁתִּי Isa. 10: 13 from שָׁסָה, the שׁ being an orthographic equivalent for ס, § 3. 1. *a*, and in the infinitive, הֹגוֹ, הֹגִי Isa. 59: 13.

2. In the first person singular of the Piel preterite י sometimes quiesces in Tsere; in all the other persons, however, and even in the first singular, when a suffix is added, it invariably quiesces in Hhirik, גִּבַּרְתִּי and גִּבַּרְתִּי, קִוִּיתִי, once קִוֵּיתִי, כִּבַּרְתִּיךָ and כִּבַּרְתִּי, כִּבַּרְתִּים.

3. Infinitive absolute: קוֹם and קוּם, כְּפֹה, נְקֹה, טְמֹא, הֹגוֹ, הֹגִי, עָלוֹת. The construct always ends in וֹת with the exception of כְּפֹה also כַּפּוֹת, and חַבֹּי Hos. 6: 9.

4. Future: in אֲרַוֶּיךָ Isa. 16: 9 from רָוָה, the second radical is doubled as ו, § 156. 1, and the third appears as ו, § 170. *a*; אֶכַּבְּדָה Ex. 33: 3 is for אֲכַבְּדָה, § 63. 1. *b*. With Vav consecutive: וַיִּגַּל, וַיִּכַּס, וַיִּצַּו, וַיְהַלֵּשׁ, וַיִּצַּו, וַיְאַבֵּל, וַיְאַבֵּל; once Pattahh is lengthened to Kamets, וַיְחַלְּ 1 Sam. 21: 14; so in pause, תְּגֹלְ Prov. 25: 9.

5. The imperative has Seghol in a single instance, רַבֶּה Judg. 9: 29 and sometimes drops its final vowel אֲגַל, חַל, נַן, נַס, צוּ and צֵוֵּה.

6. Pual infinitive construct with suffix: עֻוָּתוֹ Ps. 132: 1.

§ 177. 1. Hiphil preterite: The prefixed ה has occasionally Seghol, הֵגְלָה and הֶגְלָה, הֶחְלָאת, הִכְפָּה, הֶרְאָה, הֶרְאִיתִיךָ. Yodh may quiesce in Hhirik or Tsere, הִגְלִיתָ, הִגְלֵיתִי, הִזְנֵיתִ, הִטְלֵיתִ, הִטְלֵיתִי. Yodh once remains as a quiescent in the 3 masc. sing., הֶחֱלִי Isa. 53: 10, and once in the 3 masc. plur., הִכְּסִיוּ Josh. 14: 8 for הִכְסוּ, § 62. 2.

2. The infinitive absolute has Kamets in הַרְבָּה by way of distinction from הַרְבֵּה and הַרְבֵּה Jer. 42: 2, which are always used adverbially. Construct: The prefixed ה has Hhirik in one instance, הַקְצוֹת Lev. 14: 43; לְהַשְׁאוֹת 2 Kin. 19: 25 K'thibh is for לְהַשְׁאוֹת.

3. The future, when apocopated or preceded by Vav consecutive, sometimes simply rejects its final vowel, יִגְלֶה, יִגְרָא, יִגְרֵשׁ, יִגְרַשׁ, וַיִּגַּר from וַיִּגְרֶה, וַיִּגַּל from וַיִּגְלֶה, וַיִּגַּל from וַיִּגְלֶה, וַיִּגַּל from וַיִּגְלֶה; commonly, however, Seghol is inserted between the concurring consonants, וַיֹּאכֶל from וַיֹּאכַל, § 111. 2. *a*, וַיִּגֶּל, וַיִּגֶּר, וַיִּכֶּס, וַיִּכֶּר, וַיִּגֶּב, וַיִּגֶּר, וַיִּכֶּס, or Pattahh if one of the consonants is a guttural, וַיִּגַּר, וַיִּגַּל, וַיִּגַּח. Occasionally the final vowel remains, וַיַּגְלֶה 1 Kin. 16: 17, 18: 42, תַּרְבֶּה Ezek. 23: 19, once the radical ה appears quiescing in Hhirik, תֶּרְבִּי (2 masc. apoc. for תֶּרְבֶּה) Jer. 18: 23. The retention or rejection of the vowel is optional in the first person singular, אֶרְבֶּה, אֶרְבֵּה, אֶכֶּה and אֶכֵּה from נָכָה, אֶכַּל, אֵכַל from נָכַל.

4. The imperative is sometimes abbreviated, הַרְבֵּה and הַרְבֵּב, הַרְפֵּה and הַרְפֵּ, הַכֵּה for הַכֵּנֶּה, הַטֵּה and הַטֵּ, הַבֵּה and הַבֵּ; הַשֵּׁג (accent on the

ultimate) Ps. 39: 14 is for הַשְׁעֵה, the same word Isa. 6: 9 is from שָׁעַע, § 140. 5.

5. Hophal infinitive absolute: הָפְדֵּה Lev. 19: 20.

§ 178. 1. Hithpael: One verb שָׁחָה reduplicates its third radical, which appears as ו, הִשְׁתַּחֲוָה *to worship*, fut. יִשְׁתַּחֲוֶה, with Vav conv. וַיִּשְׁתַּחוּ for וַיִּשְׁתַּחֲוֻיִ, § 61. 2, plur. וַיִּשְׁתַּחֲווּ, infin. הִשְׁתַּחֲוֹת, and once with suf. הִשְׁתַּחֲוָיָתִי 2 Kin. 5: 18, the accent being thrown back by a following monosyllable. For the inflected participle, מִשְׁתַּחֲוִיתֶם Ezek. 8: 16, see § 90, page 126.

2. In the preterite י mostly quiesces in Tsere in the first person singular, and in Hhirik in the other persons, הִתְאַוִּיתִי, הִשְׁתַּחֲוִיתִי, הִשְׁתַּחֲוִיתָ, הִשְׁתַּחֲוִית, הִתְגָּרִית, הִתְרַפִּית, הִשְׁתַּנִּית, הִשְׁתַּחֲוִיתֶם.

3. The future apocopated and with Vav consecutive: וַיִּתְּפֹס, וַיִּתְּכֹס, וַיִּתְּחַר, וַיִּתְּלַל, תִּתְּכֹס, תִּשְׁתַּכַּח, or with Kamets in the accented syllable, וַיִּתְּאָו, תִּתְּגָּר, so always in pause, וַיִּתְּחַל, וַתִּתְּכָס׃ Gen. 24: 65.

4. The shortened imperative: הִתְּגָר, הִתְּחַל.

§ 179. 1. הָוָה *to be*, fut. יִהְוֶה, Hhirik being retained before the guttural under the influence of the following Yodh, whence the Sh'va, though vocal, remains simple; so in the inf. const. with prep. בִּהְוֹת, לִהְוֹת, מֵהְוֹת, though without a prefix it is הֱוֹת, once הֱוֵה Ezek. 21: 15. The apocopated future יְהִי (in pause יֶהִי) and with Vav consecutive וַיְהִי, is for יִהְיֶה, and תְּהִי Nah. 3: 11 is apoc. 2 fem. sing. for תִּהְיִי, the vowel of the prefix returning to the Sh'va from which it arose, § 85. 2. *a* (1), when the quiescence of the middle radical gives a vowel to the first. The same thing occurs in the peculiar form of the future יְהוּא Eccl. 11: 3, where the second radical appears as ו, which it sometimes does in the imperative, הֱוֵה and הֱוִי Gen. 27: 29 or הֱוֵא Job 37: 6, and in the participle הֹוֶה Neh. 6: 6, Eccl. 2: 22, fem. הוֹוָה Ex. 9: 3.

2. חָיָה *to live.* The root חָיַי is usually inflected as a Lamedh He verb pret. חָיָה, fut. יִחְיֶה, apoc. יְחִי, with Vav consecutive וַיְחִי, though in the preterite 3 masc. it occasionally takes an Ayin doubled form, חַי, e. g. Gen. 3: 22, 5: 5, and once in the 3 fem. an Ayin Yodh form חָיְתָה׃ Ex. 1: 16, or it may be explained as an Ayin doubled form with Daghesh-forte omitted, § 25.

3. In a few instances א is substituted for the third radical in Lamedh He verbs, רָצְאתִי Ezek. 43: 27, אָתָא Isa. 21: 12, נָשֹׂא Jer. 23: 39, יְרוּא 2 Chron. 26: 15, הֹבֵא Prov. 1: 10 from אָבָה, וַתֵּבֵא Deut. 33: 21 from אָתָה, וַיַּחֲלֵא 2 Chron. 16: 12, וַיִּשְׂנֵא Lam. 4: 1, שָׂנְאָה 2 Kin. 25: 29, וְיִשְׂנָא Eccl. 8: 1, הַכְלָאִים 2 Sam. 21: 12 K'ri for הַכְלוּאִים, הָכְלוּאִים Hos. 11: 7, Deut. 28: 66 for הַכְלוּאִים, § 56. 4, וַיִּרְאוּ הַמְּרֹרְאִים 2 Sam. 11: 24 from רָרָה; the vowels are those of Lamedh Aleph verbs in אָתְיוּ Jer. 3: 22 for אָתִינוּ, תְּבָלֵּה 1 Kin. 17: 14 for תְּכַלֶּה, יְקָרֵה Dan. 10: 14 for יִקְרֶה; and the full Lamedh Aleph form is adopted in יַפְרִיא Hos. 13: 15 for יְפָרֶה.

Doubly Imperfect Verbs.

§ 180. Verbs which have two weak letters in the root, or which are so constituted as to belong to two different classes of imperfect verbs, commonly exhibit the peculiarities of both, unless they interfere with or limit one another. Thus, a verb which is both פ״א and ל״ה will follow the analogy of both paradigms, the former in its initial and the latter in its second syllable. But in verbs which are both ע״ו and ל״ה the ו is invariably treated as a perfect consonant, and the ל״ה peculiarities alone preserved. All such cases have been remarked upon individually under the several classes of verbs to which they respectively belong.

Defective Verbs.

§ 181. 1. It has been seen in repeated instances in the foregoing pages that verbs belonging to one class of imperfect verbs may occasionally adopt forms from another and closely related class. Thus a ל״א verb may appear with a ל״ה form, or an ע״ו verb with an ע״י form or *vice versâ*. The occurrence of an individual example, or of a few examples of such divergent forms, may be explained in the manner just suggested without the assumption of an additional verb as their source. Sometimes, however, the number of divergent forms is so considerable, or the divergence itself so wide, that it is simpler to assume two co-existent roots of the same signification, and differing only in the weak letter which they contain, than to refer all to a single root.

a. Thus, כָּלָא means *to shut up* or *restrain*, and כָּלָה *to be finished:* yet a few ל״ה forms occur in the sense not of the latter but of the former verb. They are accordingly held to be from כָּלָא, but assimilated in inflection to the ל״ה paradigm. On the other hand, קָרָא means *to call*, and קָרָה *to meet;* but so many ל״א forms are found with this latter signification tha'

it seems necessary to assume a second root רָצָא having that meaning. The verb *to run* is ordinarily רוּץ; but רָצוֹא Ezek. 1: 14 is too remote from an ע״ו form to be referred to that root; hence it is traced to another verb רָצָא of the same sense. No clear line of distinction can be drawn between the cases in which divergent forms are to be traced to a single root, and those in which the assumption of a second is admissible or necessary. This must be decided in detail, and the best authorities not infrequently differ in their judgment of particular examples.

2. Where two verbs exist which are thus radically connected and identical in signification, it not infrequently happens that they are defective or mutually supplementary, that is to say, that one of them is in usage restricted to certain parts or species, the remainder being supplied by the other.

a. The following are examples of defective verbs: טוֹב *to be good*, used in the Kal species only in the preterite, the corresponding future is from יָטַב; יָגֹר Kal pret. *to fear*, the fut. and imper. from גּוּר; יָרַק Kal pret. and inf. *to spit*, fut. from יָרֹק; נָפַץ Kal pret. and inf. *to break* or *disperse*, fut. and imp. from פּוּץ; נָקַק Kal pret. *to be alienated*, fut. from יָקַק; שָׂרָה Kal pret. *to be a prince*, fut. from שׂוּר; רָבַב Kal pret. and inf. *to be many*, fut. from רָבָה which is used throughout the species; יָחַם Kal fut. *to be hot*, pret. and inf. from חָמַם, which is also used in the future; יָעַץ *to counsel*, borrows its Kal imper. from עוּץ; יָקַץ Kal fut. *to awake*, pret. from the Hiphil of קוּץ, which is also used in inf. imper. and fut.; נָצַב *to place*, the reflexive is expressed by הִתְיַצֵּב from יָצַב; שָׁתָה *to drink*, the causative is הִשְׁקָה from שָׁקָה; הוֹבִישׁ from בּוֹשׁ is used as the causative of בּוֹשׁ *to be ashamed*, as well as הֵבִישׁ; הָלַךְ *to go*, derives many of its forms from יָלַךְ; יָהַב *to give*, is only used in the Kal imperative, it is supplemented by נָתַן of totally distinct radicals.

Quadriliteral Verbs.

§ 182. Quadriliteral verbs are either primitives formed from quadriliteral roots, whose origin is explained, § 68. *a*, or denominatives, the formative letter of the noun or adjective being admitted into the stem along with the three original radicals. The former class adopt the vowels and inflections of the Piel and Pual species, while the latter follow the Hiphil.

a. The only examples of quadriliteral verbs are the following, viz.. Piel pret. פִּרְשֵׂז *he spread*, Job 26: 9, where the original Pattahh of the

initial syllable of the Piel, § 82. 5. *b* (3), is preserved; fut. with suf. וְרִכְרְכָתָהּ *he shall waste it*, Ps. 80: 14. Pual pret. רֻעַשׁ *it freshened*, Job 33: 25, the Methegh and the Hhateph Pattahh being used to indicate that the Sh'va is vocal, and that the form is equivalent to רֻעְשׁ; part. מְחֻסְפָּס *scaled off* or *resembling scales*, Ex. 16: 14, מְכֻרְבָּל *clothed*, 1 Chron. 15: 27. Hiphil pret. הֵאְוִילוּ *they stank*, Isa. 19: 6 for הֵאְוִילוּ as נֶעֱבַדְתָּ for נֶעֱבַדְתָּ, derived from אָוִל *putrescent*, which is simpler than to make it with Gesenius a double or anomalous Hiphil from זוּל, § 94. *a*, comp. Alexander in loc.; fut. אַשְׂמְאִילָה *I will turn to the left*, Gen. 13: 9; תַּשְׂמְאִילוּ Isa. 30: 21, part. מַשְׂמְאִלִים 1 Chron. 12: 2 from שְׂמֹאל *the left hand*, elsewhere reduced to a triliteral by the rejection of א, לְהַשְׂמִיל 2 Sam. 14: 19, תַּשְׂמֵלִי Ezek. 21: 21. To these may be added the form, which occurs several times in the K'thibh מחצצרים 1 Chron. 15: 24, etc., and מחצררים 2 Chron. 5: 12, for which the K'ri substitutes מַחֲצֹצְרִים or מַחֲצֵרִים. As it is a denominative from חֲצֹצְרָה *a trumpet*, it has been suspected that the form first mentioned should be pointed מְחֻצְצָרִים; the other, if a genuine reading, is probably to be read מְחֻצָּרִים.

Nouns.

their formation (See Paradigm XIII).

§ 183. Nouns, embracing adjectives and participles as well as substantives, may be primitive, i. e. formed directly from their ultimate roots, or derivative, i. e. formed from preexisting words. Those which are derived from verbs are called verbals; those which are derived from nouns are called denominatives. The vast multiplicity of objects to which names were to be applied and the diversity of aspects under which they are capable of being contemplated, have led to a variety in the constitution of nouns greatly exceeding that of verbs, and also to considerable laxity in the significations attached to individual forms. But whatever complexity may beset the details of this subject, its main outlines are sufficiently plain. All nouns are, in respect to their formation, reducible to certain leading types or classes of forms, each having a primary and proper import of its own. The derivation of nouns, as of the verbal species, from their respective roots and themes calls into requisition all the expedients,

whether of internal or external changes, known to the language, § 69. Hence arise four classes of nouns according as they are formed by internal changes, viz.:

1. The introduction of one or more vowels.

2. The reduplication of one or more of the letters of the root. Or by external changes, viz.:

3. The prefixing of vowels or consonants at the beginning of the root.

4. The affixing of vowels or consonants at the end.

a. The mass of nouns are to be regarded as primitives and not as derived from their cognate verbs. Many roots are represented by nouns alone, without any verbs from which they could have sprung, e. g. אָב *father*, אֶרֶץ *earth*. And where verbs of kindred meaning do exist, it is probable that they are not the source or theme of the nouns, but that both spring alike directly from their common root, as מָלַךְ *to reign*, and מֶלֶךְ *king* from the root מלך. Since, however, these roots or elemental themes are destitute of vowels, and consequently are incapable of being pronounced in their primitive or abstract state, it is customary and convenient in referring to them to name the verb which though a derivative form has the advantage of simplicity and regularity of structure, and is often the best representative of the radical signification. Accordingly, מֶלֶךְ *king* may be said to be derived from the root מָלַךְ *to reign*, that is, it is derived from the root מלך of which that verbal form is the conventional designation, § 68.

b. Infinitives, participles, nouns which follow the forms of the secondary or derived species, § 189. 2. *a*, and some others, are evidently verbals. Most nouns of the fourth class, as well as some others, are denominatives.

Class I.—*Nouns formed by the insertion of vowels.*

§ 184. The first class of nouns, or those which are formed by means of vowels given to the root, embraces three distinct forms, viz.:

1. Monosyllables, or those in which the triliteral root receives but one vowel.

2. Dissyllables, in which the second is the principal vowel and the first a pretonic Kamets or Tsere.

3. Dissyllables, in which the first is the principal vowel and the second a mutable Kamets or Tsere.

1. *Triliteral Monosyllables.*

§ 185. The formative vowel may be given either to the second radical קַטֹּל, קִטֵּל, קֻטֹּל, קְטֹל, or to the first, קַטָל, קַטָל, קִטָל; in the latter case an unaccented Seghol is commonly interposed between the concurring consonants, § 61. 2, to which a preceding Pattahh assimilated, § 63. 2. *a*, קַטֶל, קִטֶל, קֶטֶל. Forms thus augmented by the introduction of an auxiliary vowel are termed Segholates.

a. In this and the following sections קטל is used as a representative root in order more conveniently to indicate to the eye the formation of the different classes of nouns. No root could be selected which would afford examples in actual use of the entire series of derivative forms; קטל has but one derivative קֶטֶל *slaughter*, and this only occurs in Obad. ver. 9.

b. As *ĭ*, *ŏ* and *ŭ* rarely or never occur in mixed accented syllables, § 19, they are excluded from monosyllabic nouns. Every other vowel is, however, found with the second radical, thus *ă*, מְעַט *a little* prop. *paucity*, דְּבַשׁ *honey*, גֶּבֶר *man*; *ā*, אֱלָל *strength*, כְּתָב *writing*, שְׁאָר *residue*; *ĕ*, שֶׁכֶם *shoulder*, סְנֶה *bush*; *ē*, יֵלֶל *howling*, בְּאֵב *grief*, זְאֵב *a wolf*; especially *ī*, *ō*, and *ū*, which occur with greater frequency than any others. When the first radical receives the vowel, *ī* and *ū* are likewise excluded, in as much as they rarely or never stand before concurrent consonants, § 61. 4. Few of these nouns remain without the auxiliary Seghol גֵּיא *a valley*, שָׁוְא *vanity*, חֵטְא *sin*, נֵרְד *spikenard*, קֹשְׁט *truth*. Kamets is only found before Vav, § 63. 2. *a*, גָּוֹת, and in pause, § 65, אָבֶן, בָּרֶם.

c. When the second radical receives the vowel, there is a concurrence of consonants at the beginning of the word, which is sometimes relieved by prefixing א, § 53. 1. *a*, with a short vowel, mostly *ĕ*, § 60. 1. *a* (5), but occasionally *à*, אֶצְבַּע *finger* for צַבַּע, אֶשְׁנָב *lattice*, אַבְנֵט *belt*, אֶזְרוֹעַ and זְרוֹעַ *arm*, אֶתְמוֹל and תְּמוֹל *yesterday*.

§ 186. These nouns, standing at the first remove from the root, express as nearly as possible its simple idea either abstractly, e. g. אֱלִיל *emptiness*, שִׁכּוֹל *bereavement*, עֻזּוּז *strength*, צֶדֶק *righteousness*, עֵזֶר *help*, גֹּדֶל *greatness*, or as it is realized in some person or object which may be regarded as its embodiment or representative, גְּבִיר *lord* from גָּבַר *to be mighty*, אֱנוֹשׁ *man* from אָנַשׁ *to be sick*, גְּבוּל *boundary*, נֶסֶךְ *libation* prop. *pouring out*, עֵמֶק *valley* prop. *depth*, חֹמֶץ *vinegar* prop. *sourness*.

a. That the position of the formative vowel before or after the second

radical does not materially affect the character of the form, appears from the following considerations: (1.) The sameness of signification already exhibited, and which may be verified in detail. (2.) The occasional appearance of the same word in both forms, e. g. גֶּבֶר and גִּבֹּר *man*, נֶעֱצ and נְעָצ *plant*, כֶּלֶא and כֶּלְיָא *prison*, בֹּהֶן and בְּהֹן *thumb*, נֹגַהּ and נְגֹהָה *brightness*. (3.) The concurrence of both forms in the Kal construct infinitive קְטֹל and קָטְלָה, § 87, קָטְלִי and קָטְלָכֶם. (4.) The fact that Segholates may arise alike from קַטַל and קַטְלָ, § 61. 1. *b*. (5.) The cognate languages; monosyllables in Arabic, whose vowel precedes the second radical, answer to those whose vowel succeeds the same radical in Aramæan, and both to the Hebrew Segholates, e. g. עֶבֶד *servant*, Aram. עַבְדָ, Arab. عَبْدٌ.

b. The presence of imperfect letters in the root may occasion the following modifications:

א״פ *roots*. Aleph, as a first radical, sometimes receives a long vowel (ֵ) instead of Sh'va (ְ), § 60. 3. *c*, אֵמוּן *fidelity* for אֱמֶת, אֵזוֹר *girdle* for אֱזוֹר.

ע׳ *Guttural and* ל״ *Guttural*. If the third radical be a guttural, Pattahh is substituted for the auxiliary Seghol, § 61. 2, בָּטַח *confidence*, שֶׁמַע *hearing*, גֹּבַהּ *height*; if the second radical be a guttural, the preceding vowel if Hholem remains unchanged, otherwise it also commonly becomes Pattahh נַעַר *young man*, נֹעַר *youth*, פַּחַד *fear* but אֹהֶל *tent*, לֶחֶם *bread*.

י״פ *and* נ״פ *roots*. A vowelless י or נ is in a few instances rejected from the beginning of a word, § 53. 2. *a*, בּוּל *produce* for יְבוּל, סוֹד *familiarity* for יָסוֹד, שֵׂא *elevation* for נְשֵׂא, חִי *lamentation* for נְחִי, particularly in feminines and secondary derivatives; thus, חֶמָה, חֲדָה, עֲצָה, רֶשֶׁת drop an initial Yodh, and קֹבָה, פִּרְיָ an initial Nun. Nun may also experience assimilation when it is a second radical, אַף *anger* for אַנְפ, כּוֹס *cup* for כֹּנְס.

ע״ו *and* ע״י *roots*. In Segholates ו is preceded by Kamets עָוֶל (according to Baer עֶוֶל in Ezek. 28: 18) *wickedness*, תָּוֶךְ *midst*, unless the last radical is a guttural, לֵוַח *space*; י is preceded by Pattahh and followed by Hhirik, לַיִל *night*, עַיִן *eye*. These letters frequently give up their consonantal character and become quiescent, § 57. 2. Vav is rejected in a few words as כִּר *brand* for כִּוֹר, אִי *island* for אִיִּי, רִי *watering* for רִוְי, § 53. 3.

ל״ה *roots*. In a very few instances the proper final radical is rejected, as it is in verbs, and the final vowel written ה, as סֹכָה *bush*, בֶּכָה *weeping*, הֶגֶה *thought*. When י appears as the radical, it prefers the form בְּכִי *weeping*, פְּרִי *fruit*, כְּלִי *vessel;* ו retains its consonantal character in סְתָו *winter*, שְׂלָו *quail*, or it may be changed to its cognate vowel *ū*, which combines with the preceding *ā* to form *ō*, § 62. 1, דְּיוֹ (for *d'yaū*) *ink*, תְּאוֹ *antelope*. In Segholates ו quiesces in Shurek, § 57. 2. (4), שָׂחוּ *swimming* for שַׂחְוָ, בְּחוּ *emptiness*; the lexicon of Gesenius contains the forms בֶּדוּ *garment*, קֶצוּ *end*, שֶׁלְוִ *security*, but these words only occur in the plural or with suffixes, and the absolute singular is quite as likely to have been בֶּדְ, קֶצְ, שֶׁלְ, and חֲגוּ may similarly be referred to חָגוּ *cleft*.

2. The main vowel in the ultimate.

§ 187. **1.** The second form of this class is a dissyllable with one of the long vowels in the second which is its principal syllable, and in the first a pretonic Kamets, for which Tsere is occasionally substituted when the second vowel is Kamets, thus קָטָל or קָטֵל, קָטֵל, קָטִיל, קָטוֹל, קָטוּל.

2. These are properly adjectives, and have for the most part an intransitive signification when the vowel of the ultimate is *ā*, *ē*, or *ō*, and a passive signification when it is *ī* or *ū*, קָטָן and קָטֵן *small*, דָּשֵׁן *fat*, נְחוּשׁ *made of brass*, בָּחוּר *chosen*. Those with *ā* and *ī* in the ultimate are, however, prevailingly and the others occasionally used as substantives, and designate objects distinguished by the quality which they primarily denote, יָרָק *herbs* prop. *green*, שֵׁכָר *strong drink* prop. *intoxicating*, נָמֵר *leopard* prop. *spotted*, צָנִיף and צָנוֹף *turban* prop. *wound around*, כָּבוֹד *glory, that which is glorious*.

a. The intransitive adjectives supply the place of Kal active participles to neuter verbs, § 90, and in לה verbs they have superseded the regular formation, § 155. 1, קָם for קָוֹם. Kal passive participles are verbals with *ū*. This formation with *ī* in the ultimate is adopted in several names of seasons, אָבִיב *Abib, the time of ears of corn*, אָסִיף *ingathering* prop. *the being gathered*, בָּצִיר *vintage*, זְמִיר *pruning-time*, חָרִישׁ *ploughing-time*, קָצִיר *harvest*, Comp. § 203. 1. *b*.

b. Adjectives with *ō* commonly express permanent qualities, those with *ē* variable ones, גָּדוֹל *great*, גָּדֵל *growing great*; חָזָק *strong*, חָזֵק *becoming strong*; קָרוֹב *near*, קָרֵב *approaching*; רָחוֹק *remote*, רָחֵק *receding*. Hence the former are used of those physical and moral conditions which are fixed and constant, such as figure, colour, character, etc., אָרֹךְ *long*, עָגֹל *round*, עָמֹק *deep*, גָּבֹהַּ *high*; אָדֹם *red*, בָּרֹד *spotted*, נָקֹד *speckled*, יָרֹק *green*, עָקֹד *striped*, צָחֹר *white*, שָׁסֹף *bay*, שָׁחֹר *black*; מָתוֹק *sweet*, טָהוֹר *pure*, קָדוֹשׁ *holy*. And the latter are employed of shifting and evanescent states of body and of mind, צָמֵא *thirsty*, רָעֵב *hungry*, שָׂבֵעַ *sated*, יָעֵף *weary*, אָבֵל *grieving*, חָפֵץ *desiring*, חָרֵד *fearing*, עָלֵז *exulting*.

c. The active signification asserted for the form קָטִיל in a few instances cannot be certainly established; אָמוֹן *architect*, prop. *reliable* (in building) is intransitive in Hebrew conception; so perhaps is קָרוּשׁ or קָרוֹשׁ *fowler*, comp. Lat. *aucupari*, *aucupatus*. Other alleged cases are probably not

nouns but absolute infinitives of Kal, בָּחוֹן Jer. 6: 27 may as well be rendered *I have set thee to try* as *for a trier* (of metals); חָבוּץ Isa. 1: 17 is not *oppressor* nor *oppressed* but *wrong-doing*, τὸ ἀδικεῖν, see Alexander in loc.; and even עָשׁוֹק Jer. 22: 3 may in like manner be *oppression* instead of *oppressor*.

d. ל״ה roots are restricted to forms with *i*, in which the radical י quiesces, טָרִי *fresh*, עָנִי *afflicted*, נָקִי or נָקִיא with otiant א, § 16. 1, *pure*, or with *a* which combines with it to form *ĕ*, ֶ, עֲדַי and עֲדֵה *field*, יָפֶה *fair*, גָּאֶה *high*; in a few nouns this final vowel is dropped, דָּג *fish* for דָּגֵה, תָּו *mark* for תָּוֵה, עֵץ *tree* for עֵצֶה, בֵּן *son* for בִּנֵה, פֶּה *mouth* for פִּוֵה, unless, indeed, these and the like are to be regarded as primitive biliterals. Vav, as a final radical, may be preceded by *ā*, עָנָו *meek*, or *ē*, שָׁאֵו *secure*.

3. *The main vowel in the penult.*

§ 188. 1. The third form of this class is a dissyllable having an immutable vowel, mostly Hholem, though occasionally Shurek or Tsere in the first, which is its principal syllable, and a mutable Kamets or Tsere in the second, thus קוֹטֵל, קוֹטֵל, קוֹטֵל, קוֹטֵל, קִיטֵל.

2. These indicate the agent, and are either active participles, קוֹטֵל *killing*, or substantives, חוֹתָם *signet-ring* prop. *sealer*, אוֹיֵב *enemy, one practising hostility*, שׁוּעָל *fox* prop. *digger*, בִּילָם *hammer* prop. *pounder*, הֵילֵל *morning star* prop. *shining one*.

a. A number of nouns, indicative of occupation, follow the participial form, which thus serves to express permanent and professional activity, בּוֹקֵר *herdsman*, חוֹבֵל *sailor* prop. *rope-handler*, חוֹרֵשׁ *ploughman*, יוֹצֵר *potter* prop. *former*, כּוֹבֵס *fuller*, כּוֹהֵן *priest*, כּוֹרֵם *vine-dresser*, סוֹחֵר *merchant*, סוֹפֵר *scribe*, רוֹכֵל *trafficker*, רוֹעֶה *shepherd*, רוֹפֵא *physician*, רוֹקֵחַ *dealer in unguents*, רוֹקֵם *embroiderer*, שׁוֹמֵר *watchman*, שׁוֹעֵר *porter* prop. *gate-keeper*, שׁוֹפֵט *judge*.

b. In a very few instances *u* in the first syllable is shortened and followed by Daghesh-forte conservative, עֻגָּב and עֻגָּב *pipe*, גֻּמָּץ *pit*.

c. עי״ע *roots.* The contraction of עי״ע and the quiescence of ע״י roots, by reducing them to biliteral monosyllables, obliterates to a considerable extent the distinctions which have been described and which are possible only in triliterals. The contracted forms which arise from עי״ע roots are סָב, סַב, סָב, סָב, סֹב, § 185. *b*. Of these סֹב = סֹבֵב belongs to the monosyllabic formation, and is chiefly used of abstracts, בֹּר *purity*, רֹב *multitude*, תֹּם *integrity*, עֹל *yoke;* and סָב = סָבֵב to the first species of dissyllables, embracing adjectives and concrete nouns, תָּם *perfect*, חָג *feast;* while סַב and סָב may arise indifferently from either, סָךְ *rottenness* is an abstract noun for מְסֻכָּךְ, but רַךְ *tender* is an adjective for רָכֵךְ, Kamets being compressed to

Pattahh before the doubled letter, comp. § 135. 3; לֵב *heart* is for the dissyllable לֵבָב, and חֵת *fat* for חֶתֶת, but חֵן *favour* for the monosyllable חֶנֶן.

ע״ו and ע״י *roots.* Nouns from quiescent ע״ו and ע״י roots may be divided into three pairs of forms, קָם, רָב; קוּם, רִיב; קוֹם, רִיב. Of these the last pair (with the exception of Kal passive participles) belong to the primitive monosyllabic formation, רִיב *strife*, טוּב *goodness*; the first pair to the first species of dissyllables, רָשׁ *poor*, זֵד *proud*, אֵל *God* prop. *the mighty one*; and the second pair may belong to either, רֵישׁ = רָאשׁ *poverty*, רִיק = רֵאק *empty* אוֹן = אָוֶן *strength*, טוֹב = טֵוֹב *good.*

Class II.—*Nouns with reduplicated radicals.*

§ 189. 1. The simple form proper to adjectives is explained § 187; it may be converted into an intensive by doubling the middle radical, retaining the long vowel of the second syllable and giving a short *ĭ* or *ă* to the first. This reduplicated or intensive form denotes what is characteristic, habitual, or possessed in a high degree. Adjectives of this nature are sometimes used as descriptive epithets of persons or things distinguished by the quality, which they denote, חַלָּשׁ *very weak*, פִּקֵּחַ *seeing* prop. (having eyes) *wide open*, צַדִּיק *righteous*, גִּבּוֹר *mighty man*, חַנּוּן *full of grace*, רַחוּם *merciful.*

a. As a general though not an invariable rule, the first syllable has Pattahh when a pure vowel *ā*, *ī*, or *ū* stands in the ultimate, but Hhirik when the ultimate has one of the diphthongal vowels *ē* or *ō*. Several nouns with *ā* in the second syllable are descriptive of occupations or modes of life, comp. § 188. 2. *a*, אַכָּר *husbandman*, דַּיָּג *fisherman*, דַּיָּן *judge*, חָרָשׁ (= חַרָשׁ) *workman*, טַבָּח *cook*, טַבָּח *seaman* (from טֶבַח *salt*), כַּבָּל *bearer of burdens*, צַיָּד *hunter*, קַשָּׁת *bowman*, גַּנָּב *thief*, not a mere equivalent to גּוֹנֵב one who steals, but one who steals habitually, who makes stealing his occupation.

b. Since the idea of intensity easily passes into that of excess, the form קַטֵּל is applied to deformities and defects, physical or moral, אִלֵּם *dumb*, גִּבֵּן *hump-backed*, חֵרֵשׁ (= חֲלֵשׁ) *deaf*, עִוֵּר *blind*, פִּסֵּחַ *lame*, קֵרֵחַ *bald*, עִקֵּשׁ *perverse.*

c. In a few instances instead of doubling the second radical, the previous Hhirik is prolonged, § 59. *a*, קִמּוֹשׁ קִרְמוֹשׁ and *nettle* prop. *badly pricking*, קִישׁוֹר *smoke*, שִׁיחוֹר *the Nile* prop. *very black*, צִינּוֹק *prison*, כִּידּוֹד *spark*, כִּידּוֹר *battle*, נִיצּוֹץ *spark.*

d. The following double the third radical in place of the second, פִּרְחָה *brood*, רַעֲנָן *green*, שַׁאֲנָן *quiet*, נָאוֶה *comely* from נָאָה, the last radical ap-

pearing as וּ, § 170, אֻמְלָל *feeble*, where the long vowel Tsere is inserted to prevent the concurrence of consonants.

e. ע״ע and more rarely ע״ו roots reduplicate the biliteral formed by their contraction, גַּלְגַּל and גִּלְגֵּל *wheel* prop. *roller*, חַתְחַת *frightful*, זַרְזִיר *girt*, קָדְקֹד *crown of the head* prop. *dividing* (the hair); so fem. חַלְחָלָה *severe pain*, עַלְעֵלָה *casting down*, גֻּלְגֹּלֶת *skull*, and plur. סַלְסִלּוֹת *baskets*, עִוְעִים *turning upside down* from עָוָה = עָוַת, לֻלָאוֹת (sing. לוּלָאָה) *loops* and לוּלִים (sing. probably לוּלָה = לִוְיָה) *winding stairs* from לָוָה = לָוַי; a root לוּל is needlessly assumed by Gesenius. Sometimes the harsh concurrence of consonants is prevented by the insertion of a long vowel, צִלְצַל (const. צִלְצַל) *cymbal* prop. *tinkling*, עֲרֻעָר and עֲרוֹעֵר *stark naked, totally destitute*, קִלְקֵל *despicable*, or the softening of the former of the two consonants to a vowel, § 57. 1, כּוֹכָב *star* for כַּכְבָּב, טוֹטָפוֹת *bands* worn on the forehead for קִרְקְלֹן, עֲטָפוֹת (with the ending וֹן added) *ignominy* for קִלְקֹל, בָּבֶל *Babylon* for בַּלְבֵּל, or its assimilation to the succeeding consonant, כְּבָר *something circular, a circuit* for כִּרְבָּר. The second member of the reduplication suffers contraction or change in שַׁרְשָׁה *chain* for שַׁרְשֶׁרֶת and קַרְקַע *floor* for קִרְבַּר.

2. Abstracts are formed with a doubled middle radical by giving *ā* to the second syllable and *ĭ* to the first, חִבֻּק *folding* the hands, שִׁפּוּם *retribution*, שִׁקּוּץ *abomination*, and in the plural כִּפֻּרִים *atonement*, פִּקּוּדִים *commandments*, שִׁלּוּחִים *divorce*.

a. These may be regarded as verbals formed from the Piel. A like formation is in a few instances based upon other species, e. g. Hiphil תִּהּוּךְ *melting* from נָהַךְ, חֲדָלִים *cessation* from the ל״י root חָדַל, Niphal נִפְתּוּלִים *wrestlings*; נִחוּמִים when derived from the Niphal means *repentings*, when from the Piel *consolations*.

b. ע״ע roots reduplicate the biliteral to which they are contracted, חֲרָרָה *inflammation*, שַׁעֲשֻׁעִים *delight*.

c. A few roots, which are either ע״י or ע״ guttural, or have a liquid for their third letter, double the last radical with *ū* in the final syllable, נַעֲצוּץ *thorn-hedge*, פָּאֳרוּר (= פְּאֵרוּר) *ruddy glow*, תְּרוּרִים *upright columns* designed for way-marks, שַׁעֲרוּרָה *horror*, נַאֲפוּפִים *adulteries*, גַּבְנֻנִים *ridges*, also with *ō* or *ī* in the last syllable, נִיחוֹחַ *acquiescence*, נַהֲלֹל *pasture*, סַגְרִיר *shower*, כְּמַרְמִיר *obscuration*, שַׁעֲטִיר (K'thibh שפרור) *tapestry*, חַכְלִיל whence חַכְלִילִי *dark*. The concurrence of consonants is relieved in שַׁבְלוּל (in some editions) *snail* by Daghesh-forte separative.

§ 190. A few words reduplicate the two last radicals. These may express intensity in general, פְּקַח־קוֹחַ *complete opening*, יְפֵה־פִיָּה *very beautiful*, or more particularly repetition, הֲפַכְפַּךְ *twisted* prop. *turning again and again*, חֲלַקְלַק *slippery*, עֲקַלְקַל *crooked*, תַּהְפֻּכוֹת *perverse*, אַסְפַּסְתָּא *mixed*

multitude prop. *gathered here and there*, חֻבְרְבֵּרוֹת *spots* or *stripes*, חֻפַּרְפֶּרוֹת *moles* prop. *incessant diggers*. As energy is consumed by repeated acts or exhibitions and so gradually weakened, this form becomes a diminutive when applied to adjectives of colour, אֲדַמְדָּם *reddish*, יְרַקְרָק *greenish*, שְׁחַרְחֹר *blackish*.

a. The first of two concurring consonants is softened to a vowel in חֲצֹצְרָה *trumpet* for חַצְרָצָה, and probably עֲזוֹזְאֵל Lev. 16: 8 for עַזָּזְאֵל.

b. פ״י roots drop their initial radical, הַבְהָבִים *gifts* from יָהַב, צֶאֱצָאִים *offspring, issue* from יָצָא.

Class III.—*Nouns formed by prefixes.*

§ 191. The third class of nouns is formed by prefixing either a vowel or a consonant to the root. In the following instances the vowel *ā* is prefixed with *ā* in the ultimate to form adjectives of an intensive signification, אַכְזָב *utterly deceitful*, אַכְזָר *violent*, אֵיתָן (=אַיְתָן) *perennial*, אַזְמָן (only represented by a derivative, § 94. *a*) *very foul, fetid*, אַשְׁמָן *exceedingly gross or thick* (applied to darkness, Isa. 59: 10), or verbal nouns borrowing their meaning from the Hiphil species, אַזְכָּרָה *memorial*, אַתְוָדָה *declaration*.

a. This form corresponds with أَفْعَلُ the Arabic comparative or superlative. Its adoption for Hiphil derivatives corroborates the suggestion, § 82. 5. *b* (2), respecting the formation of the Hiphil species and the origin of its causal idea.

b. The letter א is merely the bearer of the initial vowel and has no significance of its own in these forms; ה is substituted for it in הֵיכָל (= אַיְכָל) *palace, temple* prop. *very capacious* from יָכֹל in the sense of its cognate כוּל *to contain*. So, likewise, in a few verbals with feminine terminations, הַכְשָׁלוֹת Ezek. 24: 26 *causing to hear* used for the Hiph. infin., § 128, הַצָּלָה *deliverance* from נָצַל, הֲנָחָה *grant of rest* (= הַנְיָחָה) from נוּחַ, הַבָּטָה *aspect* from נָבַט; הֲדוּת *praises* from יָדָה may perhaps be regarded as a like formation with the passive vowel *u*, corresponding to the Hophal, § 95. *a*, and with Daghesh-forte separative, § 24. In some rare instances a sibilant is prefixed instead of א or ה, as in the Shaphel species in Aramaeic, שַׁלְהֶבֶת *flame* from לָהַב, שַׁבְלוּל *snail* from בָּלַל, שַׁקְעוּרוֹת *depressions* from קָעַר.

c. The short vowel prefixed with א to monosyllables of the first species, as explained § 185. *c*, has no effect upon the meaning, and does not properly enter into the constitution of the form.

§ 192. The consonants prefixed in the formation of nouns are מ, ת, and י. They are sometimes prefixed without a vowel, the stem letters constituting a dissyllable of themselves, מְקַטֵּל, מְסוֹבֵב, תְּבַגֵּל, תְּאַשּׁוּר; more commonly they receive *ă* or *ĭ* followed by a long vowel in the ultimate, e. g. מִקְטָל, מַיְקְטֵל.

a. Pattahh commonly stands before *ē*, *ī* and *ū*, and Hhirik before *ā* and *ō*, unless the first radical is a guttural or an assimilated Nun when Pattahh is again preferred, בַּאֲכָל *food*, בַּשָּׁת *planting*, בַּשּׁוּר *saw*, תַּחְמָס *a species of bird*, יַחֲלֹם *a kind of gem*. Seghol is occasionally employed before a guttural or liquid followed by *ā*, § 63. 1. *b*, מֶחְקָר *depth*, מֶרְכָּב *chariot*, מֶלְקָחַיִם *pair of tongs*. These rules are not invariable, however, as will appear from such forms as מִזְבֵּחַ, מִכְפֵּר, מַלְקוֹשׁ, מַשְׁקוֹף. A few words have *ă* in the ultimate, מַחֲלַת *harp*, מַחֲנַק *strangling*. The insertion of Daghesh-forte separative in the first radical is exceptional, מִקֻּלָּשׁ Ex. 15: 17, מַמְּרִים Job 9: 18, מַמְּגֵרוֹת Joel 1: 17.

b. פ״י *roots*. The first radical appears as י resting in Hhirik or Tsere, מִישׁוֹר and מֵישָׁר *rectitude*, תִּירוֹשׁ *new wine*, תֵּימָן *south*, or as ו resting in Hholem or Shurek, מוֹעֵד *appointed time*, מוּסָר *correction*, תּוֹשָׁב *sojourner*, תּוּגָה *sorrow*. In a few instances it is rejected, תֵּבֵל *world*, or assimilated to the following radical, מַצָּע *bed*, מַדָּע *knowledge*.

ע״ו *and* ע״י *roots*. The root is reduced to a monosyllabic biliteral by the quiescence or rejection of the second radical, the prefix receiving Sh'va, מְצָד *citadel*, מְקוֹם *sound place*, תְּהוֹם *ocean*, קוֹם *living thing*, or more commonly a pretonic Kamets or Tsere, מָאוֹר *luminary*, גָּדוֹן, מְדָנָן and מָדָן *strife*, מֵרוֹץ *race*, צָרֵר *adversary*. The feminine form is almost always adopted after ת, תְּשׁוּעָה *salvation*, תְּרוּמָה *oblation*.

ע״ע *roots*. The root is mostly contracted to a biliteral and the vowel compressed to *ă*, *ā*, *ē* or *ō*, § 61. 4, the prefix sometimes receiving Sh'va which gives rise to a Segholate form, § 61. 1. *b*, מֶכֶס *tribute* for מָכַס, מֶרֶר *bitterness* for מָרַר, תֶּבֶל *defilement* for תָּבַל, מֹרֶךְ *fear* for מָרַךְ, תֹּרֶן *mast* for תָּרַן; more frequently it receives a pretonic Kamets or Tsere, כָּסָךְ *covering*, מָגֵן *shield*, מָעוֹז *fortress*, צֵר *anguish*. In מָשַׁךְ *running*, the short vowel of the perfect root is preserved by means of Daghesh-forte in the first radical. ת is almost always followed by the feminine ending, תַּחְלָה *folly*, תְּחִלָּה *beginning*, תְּפִלָּה *prayer*.

ל״ה *roots*. The ultimate has ה֫, דָּוֶה *disease*, מִרְעֶה *pasture*, which is apocopated in a few words, מִגֶּל *lifting up*, מַעַל *higher part*, מִכֶּן and מִכֵּן *on account of*, and always disappears before the feminine ending ה֫, § 62. 2. *c*, מַעֲלָה *ascent*, מִצְוָה *commandment*, תִּקְוָה *hope*, תְּלָאָה *weariness*. Before the feminine termination ת the final radical appears as quiescent י or ו, תַּרְבִּית, תַּרְבּוּת *interest*, תַּזְנוּת *whoredom*, תַּחֲנוּת *encamping*, מִרְעִית *pasture*. Yodh is retained as a consonant after *ū*, מַחֲלֻיִים *diseases*.

§ 193. The letter בִּ is a fragment of the pronoun מִי *who* or מָה *what*. Nouns, to which it is prefixed, denote

1. The agent *who* does what is indicated by the root, as the participles, § 84. 5, formed by an initial מִ, and a few substantives, מַשְׂכִּיל *didactic psalm* prop. *instructor*, מֹץ (from נָצַל) *chaff* prop. *what falls off*.

2. The instrument *by which* it is done, מַפְתֵּחַ *key* from פָּתַח *to open*, מִלְמָד *goad* from לָמַד *to learn*, מַשּׂוֹר *saw* from נָשַׂר *to saw*.

3. The place or time *in which* it is done, מִזְבֵּחַ *altar* from זָבַח *to sacrifice*, מְעָרָה *lair*, מוֹשָׁב *period of residence*.

a. Several denominatives are formed by prefixing מִ in a local sense, מְרַאֲשׁוֹת, מַרְאֲשׁוֹת *place at the head* from רֹאשׁ, מַרְגְּלוֹת *place at the feet* from רֶגֶל, מַדְמֵנָה *dunghill* from דֶּמֶן, מַלְבֵּנָה *brickkiln* from לְבֵנָה, מַמְגֵרָה *storehouse* from מָגַר, מַגְּרָה *wagon rampart* from עָגָלָה, מַעְיָן *place of fountains* from עַיִן, מִקְשָׁה *field of cucumbers* from קִשּׁוּא, מְתֵבֶן *heap of straw* from תֶּבֶן.

4. The action or the quality *which* is expressed by the root, מִטְבַּח *slaughter*, מִסְפֵּד *mourning*, מַדְוֶה *sickness*, מִשְׁגֶּה *error*, מִישׁוֹר *straightness*. Verbals of this nature sometimes approximate the infinitive in signification and construction, as מִהְפֻּכַת *overturning*, מִשְׁאֵרֵת Ezek. 17: 9, § 168. 2. In Palestinian Aramaeic the infinitive regularly takes this form, e. g. מְקַטָּל *to kill*.

5. The object upon *which* the action is directed or the subject in *which* the quality inheres, מַאֲכָל *food* from אָכַל *to eat*, מִזְמוֹר *psalm* from זָמַר *to sing*, מַלְקוֹחַ *booty* from לָקַח *to take*, מַשְׁמָנִים *fat things* from שָׁמַן *to be fat*, מִצְעָר *that which is small*, מֶרְחָק *that which is remote*.

a. These different significations blend into one another in such a manner that it is not always easy to distinguish the precise shade of meaning originally attached to a word: and not infrequently more than one of these senses co-exist in the same word. Thus, מָאוֹר *luminary*, may suggest the idea of agency, *dispenser of light*, or of place, *reservoir of light*; מַאֲכֶלֶת *knife*, may be so called as an agent, a *devourer*, or as an instrument, *used in eating*; מִקְדָּשׁ means both a *holy thing* and a *holy place*; מִמְכָּר *sale* and *something sold* or *for sale*; מַמְלָכָה *royal authority* and *kingdom*; מוֹצָא *the*

act, place, and time of going forth and *that which goes forth*; מוֹשָׁב *the place and time of sitting* or *dwelling* as well as *they who sit* or *dwell.*

§ 194. Nouns formed by prefixing י or ת denote persons or things to which the idea of the root is attached.

1. י is identical in origin with the prefix of the 3 masc. future in verbs, and is largely used in the formation of names of persons, יִצְחָק *Isaac,* יִפְתָּח *Jephthah,* but rarely in forming appellatives, יָרִיב *adversary* prop. *contender,* יָסוֹר *apostate* prop. *departer,* יָלְקוּט *bag* prop. *gatherer,* יָקוּם *living thing* prop. *that (which) stands,* יִצְהָר *fresh oil* prop. *that (which) shines.*

2. ת, probably the same with the prefix of the 3 fem. future of verbs, which is here used in a neuter sense, is employed in the formation of a few concrete nouns, תְּדִרָה *oak* prop. *that (which) endures,* תַּבְרִיךְ *cloak* prop. *that (which) wraps up,* תַּנּוּר *furnace* prop. *that (which) burns,* תַּפּוּחַ *apple* prop. *that (which) exhales* fragrance. But it more frequently appears in abstract terms like the feminine ending in other forms, תְּבוּן *understanding,* תַּמְרוּר *bitterness,* תַּעֲנוּג *delight.* It is very rarely found in designations of persons, and only when they occupy a relation of dependence and subordination, and may consequently be viewed as things, תַּלְמִיד *learner,* תּוֹשָׁב *one dwelling* on another's lands, *tenant, vassal.*

a. The great majority of nouns with ת prefixed have likewise a feminine ending, תַּרְדֵּמָה *deep sleep,* תְּשׁוּעָה *salvation,* תִּפְאֶרֶת *beauty,* תַּרְמִית *fraud.*

b. The few nouns formed by prefixing Nun are originally Niphal participles, נִצָּב *handle* of a dagger from נָצַב, נִצָּה *excrement* from the crop of a bird from נָצָא, נִסָּבָה *turn, course* of things from סָבַב.

CLASS IV.—*Nouns formed by affixes.*

§ 195. The nouns formed by means of an affixed letter or vowel are chiefly denominatives. The consonant ן appended by means of the vowel *ō*, or less frequently *ā*, forms

1. Adjectives, אַחֲרוֹן *last* from אַחַר *after*, רִאשׁוֹן *first* from רֹאשׁ *head*, תִּיכוֹן *middle* from תָּוֶךְ *midst*, נְחֻשְׁתָּן *brazen* from נְחֹשֶׁת *brass*. A very few are formed directly from the root, אֶבְיוֹן *poor*, עֶלְיוֹן *most high*, אַלְמָן *widowed*.

2. Abstract substantives, the most common form of which is קִטָּלוֹן, e. g. עִוָּרוֹן *blindness*, בִּטָּחוֹן *confidence*, עִצָּבוֹן *pain*, יֶרָקוֹן *paleness*, though various other forms likewise occur, e. g. אֲבַדּוֹן and אַבְדָן *destruction*, פְּרָזוֹן *dominion*, פִּשָּׁרוֹן *success*, קָרְבָּן *offering*.

a. In a few words the termination וֹן has been thought to be intensive, שַׁבָּת *sabbath*, שַׁבָּתוֹן *a great sabbath*, זָד *proud*, זָדוֹן *exceedingly proud*, and once diminutive אִישׁ *man*, אִישׁוֹן *little man*, i. e. the *pupil* of the eye, so called from the image reflected in it. The word יְשֻׁרוּן *Jeshurun* from יָשָׁר *upright*, is by some explained as a diminutive or term of endearment, while others think that the termination וּן has no further meaning than to make of the word a proper name, comp. זְבֻלוּן. See Alexander on Isaiah 44: 2.

b. ן is occasionally affixed with the vowel ĕ, גַּרְזֶן *axe*, צִפֹּרֶן *nail*.

c. A few words are formed by appending ם, e. g. פְּדוּיִם and פִּדְיוֹן *ransom*, סֻלָּם *ladder* from סָלַל *to lift up*, חַרְטֹם *sacred scribe* from חֶרֶט *stylus*, דָּרוֹם *south* from דָּרַר *to shine*; or ל, e. g. גַּרְמָל *garden* from גֶּרֶם *vineyard*, גַּבְעָל *calyx* or *cup of a flower* from גָּבִיעַ *cup*, קַרְסֹל *ankle* from קֶרֶס *joint*, חַרְגֹּל *locust* from חָרַג indicative of tremulous motion, עֲרָפֶל *thick darkness* from עָרָפִל *cloud*, בַּרְזֶל *iron* probably from בָּרַז *to pierce*.

§ 196. The vowel ִי forms adjectives indicating relation or derivation.

1. It is added to proper names to denote nationality or family descent, עִבְרִי *Hebrew*, יְבוּסִי *Jebusite*, פְּלִשְׁתִּי *Philistine*, אֲרַמִּי *Aramæan*, מִצְרִי *Egyptian*, יִשְׂרְאֵלִי *Israelitish, an Israelite*, דָּנִי *Danite*, קְהָתִי *Kohathite*, גֵּרְשֻׁנִּי *Gershonite*.

2. It is also added to other substantives, צְפוֹנִי *northerner*, נָכְרִי *foreigner*, פְּרָזִי *villager*, רַגְלִי *footman*, עִתִּי *timely*, פְּנִימִי *inner* from the plural פְּנִים; to a few adjectives, אַכְזָר and אַכְזָרִי *violent*, אֱוִיל and אֱוִילִי *foolish*, and even to prepositions, תַּחְתִּי *lowest* from תַּחַת, לְפָנִי *front* from לִפְנֵי + ִי, § 62. 2.

a. The feminine ending ה ָ is dropped before this ending, יְהוּדִי *Jew* from יְהוּדָה, בְּרִיעִי *Beriite* from בְּרִיעָה, or the old ending ת ָ takes its place, מַעֲכָתִי *Maachathite* from מַעֲכָה, or נ is inserted between the vowels,

שִׁלְנִי *Shelanite* from שֵׁלָה. Final ־ִי combines with the appended ־ִי into ī, § 62. 2, לֵוִי *Levite* and *Levi*, שׁוּנִי *Shunite* and *Shuni*.

b. In a very few instances ־ַי takes the place of ־ָי, e. g. חוֹרַי *white stuffs*, הוֹרַי *basket*, לוּלַי *loop*, and perhaps חֲפֹנַי, in a collective sense *windows*, חֲכוּפַי *uncovered*, פִּרְכַי (for נִכְרַי) *crafty*.

Multiliterals.

§ 197. 1. Quadriliteral nouns are for the most part evenly divided into two syllables, עַקְרָב *scorpion*, גִּזְבָּר *treasurer*, חֶרְמֵשׁ *sickle*, בַּלְמוּד *barren*. Sometimes the second radical receives a vowel, that of the first radical being either rejected, דִּמֶּשֶׂק *damask*, חַנָּמֶל *frost*, סְמָדַר *vine blossom*, or preserved by the insertion of Daghesh-forte, חַלָּמִישׁ *flint*, עַכָּבִישׁ *spider*, פִּגֶּגֶשׁ and פִּילֶגֶשׁ *concubine*. Occasionally the third radical has Daghesh-forte, עֲטַלֵּף *bat*, סְנַפִּיר *fin*.

2. Words of five or more letters are of rare occurrence and appear to be chiefly of foreign origin, אַרְגָּמָן *purple*, צְפַרְדֵּעַ *frog*, שַׁעַטְנֵז *cloth*, אֲחַשְׁתְּרָן *mule*, אֲחַשְׁדַּרְפָּן *satrap*.

3. Compound words are few and of doubtful character, צַלְמָוֶת *shadow of death*, בְּיאוּמָה *anything* prop. *what and what*, בְּלִיָּעַל *nothing* prop. *no what*, בְּלִימָה *worthlessness* prop. *no profit*, מְיַאֲפֵלָה *darkness of Jehovah*, שַׁלְהֶבְיָה *flame of Jehovah*, except in proper names, מַלְכִּי־צֶדֶק *Melchizedek, king of righteousness*, עֹבַדְיָהוּ *Obadiah, serving Jehovah*, יְהוֹיָקִים *Jehoiakim, Jehovah shall establish*.

Gender and Number.

§ 198. There are in Hebrew, as in the other Semitic languages, but two genders, the masculine (זָכָר) and the feminine (נְקֵבָה). The masculine, as the primary form, has no characteristic termination; the feminine ends in ־ָה or ־ַת, e. g. קֹטֶל *masc.*, קָטְלָה or קָטַלְתְּ *fem.*

a. The only trace of the neuter in Hebrew is in the interrogative, מָה *what* being used of things as מִי *who* of persons. The function assigned to the neuter in other languages is divided between the masculine and the feminine, being principally committed to the latter.

b. The original feminine ending in nouns as in verbs, § 85. 1. *a* (1), appears to have been ה, which was either attached directly to the word, קַטָּלָה which, by § 61. 2, becomes קַטָּלַת, or added by means of the vowel *a*, קָטְלָה or קָטְלַת, which by the rejection of the consonant from the end of the word, § 55. 2. *c*, becomes קָטְלָה. The termination ת_ or ת֫ is still found in a very few words, בָּרְקַת *emerald*, קָאַת *pelican*, שִׁפְעַת *company* 2 Kin. 9: 17, מָחָרַת *morrow*, מִנָת *portion*, קָצַת *end*, מַטֵּה Josh. 13: 13, and the poetic forms, זִמְרַת *song*, נַחֲלַת *inheritance*, עֶזְרַת *help*, פִּרְיַת *fruitful*, שְׁנָת *sleep*. Two other words, חַיַת Ps. 74: 19 and נְגִינַת Ps. 61: 1, have been cited as additional examples, but these are in the construct state, which always preserves the original ת final; it is likewise always retained before suffixes and paragogic letters, § 61. 6. *a*, רְשׁוּעָתָהּ, רְשׁוּעָתָהּ, חַיָּתוֹ, רְשׁוּעָתָהּ.

c. The feminine ending ה֫ receives the accent and is thus readily distinguished from the unaccented paragogic ה֫. In a few instances grammarians have suspected that forms may perhaps be feminine, though the punctuators have decided otherwise by placing the accent on the penult, e. g. בְּעֵרָה *burning* Hos. 7: 4, גְּלִילָה *Galilee* 2 Kin. 15: 29, קְטֹרֶת *destruction* Ezek. 7: 25, רָחָמָה *vulture* Deut. 14: 17, שַׁפָּלָה *low* Ezek. 21: 31.

d. The vowel letter א, which is the usual sign of the feminine in Aramaeic takes the place of ה in דִּישָׁא *threshing* Jer. 50: 11, חֵמָא *terror* Isa. 19: 17, חֵמָא *wrath* Dan. 11: 44, לְבָיָא *lioness* Ezek. 19: 2, מְשָׁלָא *mark* Lam. 3: 12, מָרָא *bitter* Ruth 1: 20, קָרְחָא *baldness* Ezek. 27: 31, שְׁנָא *sleep* Ps. 127: 2. No such form is found in the Pentateuch unless it be זָרָא *loathing* Num. 11: 20, where, however, as Ewald suggests, א may be a radical since it is easy to assume a root זָרָא cognate to זור. The feminine ending in pronouns of the second and third persons, and in verbal futures is ī ֫; an intermediate form in *e* appears in זֵלֶה Isa. 59: 5 and עֶשְׂרֵה the numeral *ten*, or rather *teen*, as it only occurs in numbers compounded with the units. For like unusual forms in verbs see § 86. *b*, and § 158. 4.

e. The sign of the feminine in the Indo-European languages is a final vowel, corresponding to the vowel-ending in Hebrew; the Latin has *a*, the Greek *α* or *η*, the Sanskrit *ī*. And inasmuch as the feminine in Hebrew covers, in part at least, the territory of the neuter, its consonantal ending ת may be compared with *t*, the sign of the neuter in certain Sanskrit pronouns, represented by *d* in Latin, *id, illud, istud, quid;* in English *it, what, that.*

§ 199. It is obvious that this transfer to all existing things, and even to abstract ideas, of the distinction of sex found in living beings, must often be purely arbitrary. For although some things have marked characteristics or associations in virtue of which they might readily be classed with a particular sex, a far greater number hold an indeterminate position, and might with quite as much or quite as little reason be assigned to either. It hence

happens that there is no general rule other than usage for the gender of Hebrew words, and that there is a great want of uniformity in usage itself.

a. The following names of females are without the proper distinctive feminine termination:

אֵם *mother.* אָתוֹן *she-ass.* פִּילֶגֶשׁ *concubine.* שֵׁגַל *queen.*

So the names of double members of the body, whether of men or animals, which are feminine with rare exceptions:

אֹזֶן *ear.*	זְרוֹעַ *arm.*	כַּף *palm.*	קֶרֶן *horn.*
אֶצְבַּע *finger.*	יָד *hand.*	כָּתֵף *shoulder.*	רֶגֶל *foot.*
בֹּהֶן *thumb.*	יָרֵךְ *thigh.*	עַיִן *eye.*	שֵׁן *tooth.*
בֶּרֶךְ *knee.*	כָּנָף *wing.*	צֶלַע *side.*	שׁוֹק *leg.*

The following nouns are also feminine:

אָח *brazier.*	חֶרֶב *sword.*	עִיר *city.*	פַּת *morsel.*
אָשׁוּר *footstep.*	כּוֹס *cup.*	עַיִשׁ *Great Bear.*	צָהַר *light.*
בְּאֵר *well.*	נֹגַהּ *brightness.*	עֶרֶשׂ *couch.*	רִבּוֹא *myriad.*
בֶּטֶן *belly.*	נַעַל *shoe.*	עֲשֵׂיָה *workmanship.*	תֵּבֵל *world.*

b. The following nouns are of doubtful gender, being sometimes construed as masculine and sometimes as feminine. Those which are commonly masculine are distinguished thus (*); those which are commonly feminine are distinguished thus (†).

†אֶבֶן *stone.*	דֶּרֶךְ *way.*	*מִבְצָר *fortress.*	†פַּעַם *time (repetition).*
*אוֹר *light.*	*הֵרֵכָל *temple.*	*מִזְבֵּחַ *altar.*	
אוֹת *sign.*	*הָמוֹן *multitude.*	מַחֲנֶה *camp.*	*צָבָא *host.*
אֳנִי *fleet.*	זָקָן *beard.*	*מַטֶּה *rod.*	צָפוֹן *north.*
אָרוֹן *ark.*	חַלּוֹן *window.*	*מָקוֹם *place.*	קֶשֶׁת *bow.*
אֹרַח *path.*	חָצֵר *court.*	נְחֹשֶׁת *brass.*	†רוּחַ *spirit.*
†אֶרֶץ *earth.*	יוֹבֵל *jubilee.*	†נֶפֶשׁ *soul.*	†רְחוֹב *street.*
†אֵשׁ *fire.*	†יָמִין *right hand.*	סִיר *pot.*	*רֶחֶם *womb.*
*בֶּגֶד *garment.*	יָתֵד *peg.*	†סֹלֶת *flour.*	*רֹתֶם *juniper.*
*בַּיִת *house.*	*כָּבוֹד *glory.*	עָב *cloud.*	שְׁאוֹל *Sheol.*
גֶּדֶר *wall.*	כַּד *pail.*	*עֹבִי *cord.*	*שֵׁבֶט *sceptre.*
גַּיְא *valley.*	†כִּכָּר *circuit.*	*עַם *people.*	שַׁבָּת *sabbath.*
גַּן *garden.*	*כֶּרֶם *vineyard.*	†עֶצֶם *bone.*	שֶׁמֶשׁ *sun.*
†גֶּפֶן *vine.*	*לֵב *heart.*	עֶרֶב *evening.*	שַׁעַר *gate.*
*גֹּרֶן *threshing-floor.*	לֶחֶם *bread.*	†עֵת *time (duration).*	תְּהוֹם *ocean.*
	†לָשׁוֹן *tongue.*		*תֵּימָן *south.*
†דֶּלֶת *door.*	*מַאֲכָל *food.*	*פָּנִים *face.*	*תַּעַר *razor.*

Gesenius ascribes only one gender to a few of these words, but לֵב is once fem. Prov. 12: 25; so בְּאֵבָל fem. Hab. 1: 16, מִכְעַר fem. Hab. 1: 10, מִזְבֵּחַ fem. Ezek. 43: 13, עֵגֶב masc. Ezek. 24: 10. The list might be reduced by referring the vacillation in gender, wherever it is possible, to the syntax rather than the noun. Verbs, adjectives, and pronouns, which belong to feminine nouns may in certain cases, as will be shown hereafter, be put in the masculine as the more indefinite and primary form. While, on the other hand, those which belong to masculine names of inanimate objects are sometimes put in the feminine as a substitute for the neuter.

c. Some species of animals exhibit a distinct name for each sex, the feminine being formed from the masculine by the appropriate termination, פַּר *bullock*, פָּרָה *heifer*, עֵגֶל *calf*, fem. עֶגְלָה, כֶּבֶשׂ *lamb*, fem. כִּבְשָׂה, or being represented by a word of different radicals, חֲמוֹר *ass*, fem. אָתוֹן. When this is not the case, the name of the species may be construed in either gender according to the sex of the individual spoken of, as גָּמָל *camel*, בָּקָר *cattle*, צִפּוֹר *bird*, or it may have a fixed gender of its own irrespective of the sex of the individual; thus, כֶּלֶב *dog*, זְאֵב *wolf*, שׁוֹר *ox*, are masculine, אַרְנֶבֶת *hare*, יוֹנָה *dove*, רָחֵל *sheep*, are feminine.

d. The names of nations, rivers, and mountains are commonly masculine, those of countries and cities feminine. Accordingly, such words as אֱדוֹם *Edom*, מוֹאָב *Moab*, יְהוּדָה *Judah*, מִצְרַיִם *Egypt*, כַּשְׂדִּים *Chaldees*, are construed in the masculine when the people is meant, and in the feminine when the country is meant.

§ 200. The feminine ending is frequently employed in the formation of abstract nouns, and is sometimes extended to the formation of official designations (comp. *his Honour, his Excellency, his Reverence*), פֶּחָה *governor*, כְּנָת *colleague*, קֹהֶלֶת *preacher*, and of collectives (comp. *humanity* for *mankind*), דָּג *a fish*, דָּגָה *fish*, עָנָן *a cloud*, עֲנָנָה *clouds*, עֵץ *a tree*, עֵצָה *timber*, אֹרֵחַ *a traveller*, אֹרְחָה *caravan*, צְלֵלָה Zeph. 3: 19 *the halting*, פְּלֵטָה *the escaped*.

a. (1) The feminine ending added to Segholates gives new prominence to the originally abstract character of this formation, לֶשַׁע and רִשְׁעָה *wickedness*, distinguished by Ewald as *τὸ ἄδικον* and *ἀδικία*, חֶרְפָּה *shame*, עַצְלָה *slothfulness*.

(2) So to monosyllables whose second radical receives the vowel, צְדָקָה *righteousness*, which is more abstract and at the same time used more exclusively in a moral sense than the Segholate, צֶדֶק *rightness*, אֲפֵלָה *darkness*, equivalent to אֹפֶל, נְגֹהָה (= נֹגַהּ) *brightness*, יְשׁוּעָה (= יֶשַׁע) *salvation*. Or nouns of this description might be supposed to have sprung from the adjectives belonging to the second form of Class I., the pretonic vowel falling away upon the addition of the feminine ending, אָפֵל *dark*, אֲפֵלָה *the dark*, *τὸ σκοτεινόν*, יְשׁוּעָה *the being saved* from רָשׁוּעַ, פְּלִילָה *justice* from

פָּלִיל *judge*. The following nouns, descriptive of the station or functions of a particular class, follow this form, מֶלֶךְ *king*, מְלוּכָה *kingly office or sway*, נָבִיא *prophet*, נְבוּאָה *prophecy*, כֹּהֵן *priest*, כְּהֻנָּה *priesthood or priestly duty*, רֹכֵל *merchant*, רְכֻלָּה *traffic*.

(3) The feminine ending occasionally gives an abstract signification to reduplicated forms, עִוֵּר *blind*, עִוֶּרֶת *blindness*, גִּבֵּחַ *having a bald forehead*, גִּבֶּחֶת *baldness in front*, חַטָּא *sinner*, חַטָּאת and חֲטָאָה *sin*, בַּהֲלָה *terror*, קַלָּסָה *scoffing*, חֲלָחֲלָה *anguish*, or to those which have a prefixed letter מ, מַהְפֵּכָה *overthrow*, מֶמְשָׁלָה *dominion*, מְהוּמָה *confusion*, or particularly ת, תְּשׁוּעָה *salvation*, תְּעוּדָה *testimony*, תִּקְוָה *hope*, תְּלָאָה *weariness*.

(4) It is likewise added to forms in ־ָ, פְּלִילָה *judgment*, עֲלִילָה *working*, רֵאשִׁית *beginning*, אַחֲרִית *end*, שְׁאֵרִית *remnant*, the termination וֹת being often found in place of ־ִית, חֲפִשִּׁית 2 Chron. 26: 21 K'ri, חפשות K'thibh, *disease* prop. *freedom* from duty, חָפְשִׁי *free*; חַכְלִילוּת *redness*, חַכְלִילִי *red*; מְרִירוּת *bitterness*, מָרִירִי *bitter*; כְּבֵדוּת *heaviness*, אַלְמָנוּת *widowhood*. In a very few instances the termination וֹת is superimposed upon ־ִי, viz.: אַכְזְרִיּוּת, קֻלְטְרִיּוּת. The termination ־ִית or וֹת in abstracts derived from ל״ה roots is of a different origin from that just explained and must not be confounded with it; ־ִי or וּ is there the final radical softened to a vowel, § 170, as שְׁבִית or שְׁבוּת *captivity* from שָׁבָה *to lead captive*.

b. In Arabic, nouns of unity, or those which designate an individual, are often formed by appending the feminine termination to masculines which have a generic or collective signification. This has been thought to be the case in a few words in Hebrew, אֳנִי *fleet*, אֳנִיָּה *ship*, שֵׂעָר *hair*, שַׂעֲרָה *a hair*, עֵנָב *swarm*, דְּבוֹרָה *a bee*.

c. Some names of inanimate objects are formed from those of animated beings or parts of living bodies, which they were conceived to resemble, by means of the feminine ending, taken in a neuter sense, אֵם *mother*, אֲמָה *metropolis*, יֶרֶךְ *thigh*, יַרְכָה *hinder part, extremity*, כַּף *palm* of the hand, כַּפָּה *palm-branch*, מֵצַח *forehead*, מִצְחָה *greave*, פֶּה *mouth*, פְּאָה *edge*.

§ 201. There are three numbers in Hebrew, the singular (לְשׁוֹן יָחִיד), dual (לְשׁוֹן שְׁנַיִם), and plural (לְשׁוֹן רַבִּים). The plural of masculine nouns is formed by adding ־ִים, or defectively written ־ִם, to the singular, סוּס *horse*, סוּסִים *horses*, צַדִּיק *righteous* (*man*), צַדִּיקִים or צַדִּיקִם *righteous* (*men*). The plural of feminine nouns is formed by the addition of וֹת, also written ־ֹת, the feminine ending of the singular, if it has one, being dropped as superfluous, since the plural termination of itself distinguishes the gender, כּוֹס *cup*, כּוֹסוֹת *cups*, בְּתוּלָה *virgin*, בְּתוּלוֹת and בְּתוּלֹת *virgins*, חֲטָאת חֲטָאוֹת *sin*, חֲטָאוֹת *sins;* in two instances the vowel-

letter א takes the place of ו, § 11. 1. *a*, פְּרָאת Ezek. 31: 8, בְּצָאת Ezek. 47: 11.

a. The masculine plural sometimes has ־ִין instead of ־ִים, e. g. בְּלִין oftener than בְּלִים in the book of Job. בִּלְבִין Prov. 31: 3, רָצִין 2 Kin. 11: 13, עָלִין Mic. 3: 12, שִׁיטִבִין Lam. 1: 4, חָטִין Ezek. 4: 9, רָבִין Dan. 12: 13. This ending, which is the common one in Aramaeic, is chiefly found in poetry or in the later books of the Bible.

b. Some grammarians have contended for the existence of a few plurals in ־ִי without the final ם, but the instances alleged are capable of another and more satisfactory explanation. Thus, בָּלִי 2 Kin. 11: 4, כְּרֵתִי, פְּלֵתִי 2 Sam. 8: 18, שָׁלִשִׁי 2 Sam. 23: 8, and חִצִּי 1 Sam. 20: 38 K'thibh (K'ri חִצִּים), are singulars used collectively; עֲנִי 2 Sam. 22: 44, Ps. 144: 2, Lam. 3: 14, and רְמִזִּי Cant. 8: 2, are in the singular with the suffix of the first person; כִּנּוֹר Ps. 45: 9 is not for כִּנִּים *stringed instruments*, but is the poetic form of the preposition מִן *from;* מְרָאֵי Ps. 22: 17 is not for מְרִים *piercing*, but is the noun אֲרִי with the preposition כ *like the lion*, § 158. 3.

c. There are also a few words which have been regarded as plurals in ־ַי. But חֲנַי Zech. 14: 5 and שֹׁנַי Judg. 5: 15, are plurals with the suffix of the first person. In חוֹרַי 2 Chron. 33: 19, which is probably a proper name, and גֹּבַי Am. 7: 1, Nah. 3: 17, which is a singular used collectively, final ־ַי is a radical as in שָׂדַי = שָׂדֶה. חוּרַי Isa. 19: 9 is a singular with the formative ending ־ַי, § 196. *b;* חַלּוֹנַי Jer. 22: 14 and חֲשׂוּפַי Isa. 20: 4, might be explained in the same way, though Ewald prefers to regard the former as an abbreviated dual for חַלּוֹנַיִם *double* (i. e. *large and showy*) *windows*, and the latter as a construct plural for חֲשׂוּפֵי; the diphthongal *ē* being resolved into *ay*, comp. § 57. 2 (5). יָדַי Ezek. 13: 18 is commonly regarded as an absolute dual for יָדַיִם, though it is always elsewhere *my hands* with 1 pers. suf., and may be so explained here. The divine name שַׁדַּי *Almighty* is best explained as a singular; the name אֲדֹנָי *Lord* is a plural of excellence, § 203. 2, with the suffix of the first person, the original signification being *my Lord.*

d. In a few words the sign of the feminine singular is retained before the plural termination, as though it were one of the radicals, instead of being dropped agreeably to the ordinary rule, דֶּלֶת *door* pl. דְּלָתוֹת. So, כֶּסֶת *pillow*, קֶשֶׁת *bow*, קֶשֶׁת *trough*, חֲנִית *spear*, אַלְמָנוּת *widowhood*, כְּרִיתוּת *divorce*, תַּזְנוּת *whoredom*, שְׂפָה *lip* pl. שִׂפְתוֹת. To these must be added שְׁחִית, provided it be derived from שָׁחָה in the sense of *pit*; it may, however, signify *destruction*, from the root שָׁחַת, when the final ת will be a radical.

e. The Arabic noun has three case-endings, nom. *un*, gen. *in*, acc. *an*, which drop their nasal in the construct nom. *u*, gen. *i*, acc. *a*. Although these have become obsolete in Hebrew, there are traces of their existence in ו and ־ִ occasionally added to the construct, § 222, and in ־ָה or ־ָם added to nouns in an accusative sense to indicate direction, § 223, or to form adverbs, § 236. 2 (1). The plural endings are formed by lengthening those of the singular, nom. *ūna*, gen. *īna*. The former is identical with the plural ending in verbs, in Heb. וּן; the latter corresponds to the Hebrew

plural in ־ִים. In Arabic the fem. sing. ending is *at*, plur. *āt* = וֹת, *ā* as in the Kal part. (*kātil* = קֹטֵל), the Piel of ע״ע verbs (סוֹבֵב = Arab. 3 conj. *kātala*) and the פּ״א fut. (*yakul* = יֹאכַל) answering to *ō* in Heb.

§ 202. The gender of adjectives and participles is carefully discriminated, both in the singular and in the plural, by means of the appropriate terminations. But the same want of precision or uniformity which has been remarked in the singular, § 199, characterizes likewise the use of the plural terminations of substantives. Some masculine substantives take וֹת in the plural, some feminines take ־ִים, and some of each gender take indifferently ־ִים or וֹת.

a. The following masculine nouns form their plural by adding וֹת: those which are distinguished by an asterisk are sometimes construed as feminine.

אָב	*father.*	*גֹּרֶן	*threshing-floor.*	לַיִל	*night.*	פָּרַע	*leader.*
אַגָּן	*bowl.*			*מִזְבֵּחַ	*altar.*	צִנּוֹר	*tube.*
אוֹב	*familiar spirit.*	הַרְבָּן	*goad.*	מָטָר	*rain.*	צְרוֹר	*bundle.*
		זָנָב	*tail.*	מַעֲשֵׂר	*tithe.*	קוֹל	*voice.*
אוֹצָר	*treasure.*	חוּץ	*street.*	*מְצַד	*summit.*	קִיר	*wall.*
*אוֹת	*sign.*	חָזֶה	*breast.*	*מָקוֹם	*place.*	קֶרֶב	*war.*
*אֹרַח	*path.*	חִזָּיוֹן	*vision.*	מַקֵּל	*staff.*	*רְחוֹב	*street.*
אַרְמוֹן	*palace.*	חֲלוֹם	*dream.*	נֹאד	*bottle.*	רְתוֹק	*chain.*
אֶשְׁכֹּל	*cluster.*	חִשָּׁבוֹן	*invention.*	נֵר	*lamp.*	שֻׁלְחָן	*table.*
בּוֹר	*pit.*	טֶפַח	*hand-breadth.*	עוֹר	*skin.*	שֵׁם	*name.*
גָּג	*roof.*			עָפָר	*dust.*	שׁוֹפָר	*trumpet.*
גּוֹרָל	*lot.*	כִּסֵּא	*throne.*	*עֶרֶב	*evening.*	שֵׁת	*pillar.*
		לוּחַ	*tablet.*	עֵשֶׂב	*herb.*	*תְּהוֹם	*deep.*

b. The following feminine nouns form their plural by adding ־ִים: those marked thus (†) are sometimes masculine:

†אֶבֶן	*stone.*	†דֶּרֶךְ	*way.*	כֻּסֶּמֶת	*spelt.*	פִּשְׁתָּה	*flax.*
אֵלָה	*terebinth.*	דָּת	*law.*	לְבֵנָה	*brick.*	פַּת	*morsel.*
אַלְמָנוּת	*widowhood.*	זְמוֹרָה	*branch.*	מִלָּה	*word.*	רָחֵל	*sheep.*
אִשָּׁה	*woman.*	זְנוּת	*whoredom.*	נְמָלָה	*ant.*	שְׂעֹרָה	*barley.*
גַּחֶלֶת	*coal.*	חִטָּה	*wheat.*	סְאָה	*measure.*	שִׁבֹּלֶת	*ear of corn*
†גֶּפֶן	*vine.*	חֲשֵׁכָה	*darkness.*	עֵז	*she-goat.*	שִׁטָּה	*acacia.*
דְּבֵלָה	*fig-cake.*	יוֹנָה	*dove.*	עִיר	*city.*	תְּאֵנָה	*fig.*
דְּבוֹרָה	*bee.*	†כַּד	*pitcher.*	פִּלֶגֶשׁ	*concubine.*		

Also בֵּיצִים *eggs* which is not found in the singular.

c. The following nouns form their plural by adding either יִם־ or וֹת:

MASCULINE NOUNS.

אוּלָם *porch.*	לֵב *heart.*	מֶעֱדָן *delicacy.*	פֶּרֶץ *breach.*
אֲרִי *lion.*	מָאוֹר *light.*	מַעְיָן *fountain.*	צַוָּאר *neck.*
הוֹר *generation.*	מִגְדָּל *tower.*	מִשְׁכָּב *bed.*	קֶבֶר *grave.*
זֶבַח *sacrifice.*	מוֹסָד *foundation.*	מִשְׁכָּן *dwelling.*	קָנֶה *reed.*
זִכָּרוֹן *memorial.*	מוֹסֵר *bond.*	נָהָר *river.*	קַרְדֹּם *axe.*
יוֹם *day.*	מוֹשָׁב *seat.*	סַף *basin.*	שָׂדֶה *field.*
יַעַר *forest.*	מִזְרָק *bowl.*	עָוֹן *iniquity.*	שָׁבוּעַ *week.*
כִּיּוֹר *laver.*	מַכְאוֹב *pain.*	עָקֵב *heel.*	תַּעֲנוּג *delight.*
כִּנּוֹר *harp.*	מַסְמֵר *nail.*		

FEMININE NOUNS.

אֵימָה *terror.*	אֲשִׁישָׁה *grape-cake.*	נַעַל *shoe.*	פַּרְסָה *hoof.*
אֲלֻמָּה *sheaf.*	אַשְׁרָה *Astarte.*	עֲרֵמָה *heap.*	שָׁנָה *year.*
אֻמָּה *people.*	חֲנִית *spear.*		

NOUNS CONSTRUED IN EITHER GENDER.

אֲהָלִים, אֲהָלוֹת *aloes.*	חַלּוֹן *window.*	מַטֶּה *rod.*	עֶצֶם *bone.*
בֶּגֶד *garment.*	חָצֵר *court.*	נֶפֶשׁ *soul.*	עֵת *time.*
גַּב *rim.*	כִּכָּר *circle.*	סִיר *thorn.*	פַּעַם *foot.*
הֵיכָל *temple.*	מִבְצָר *fortress.*	עָב *cloud.*	צָבָא *host.*
זְרוֹעַ *arm.*	מַחֲנֶה *camp.*	עֲבֹת *cord.*	צֶלַע *side.*

d. The two forms of the plural, though mostly synonymous, occasionally differ in sense as in Latin *loci* and *loca*. Thus כִּכָּרִים is used of round masses of money, *talents*, כִּכָּרוֹת of bread, round *loaves*; סִירִים *thorns*, סִירוֹת *hooks*; עֲקֵבִים *heels*, עֲקֵבוֹת *foot-prints*; פְּעָמִים *footsteps* of men, פְּעָמוֹת *feet* of articles of furniture. Comp. § 200. *c*. Sometimes they differ in usage or frequency of employment: thus יָמוֹת *days*, שָׁנוֹת *years*, are poetical and rare, the customary forms being יָמִים, שָׁנִים.

e. Nouns mostly preserve their proper gender in the plural irrespective of the termination which they adopt; though there are occasional exceptions, in which feminine nouns in יִם־ are construed as masculines, e. g. נָשִׁים *women* Gen. 7: 13, מִלִּים *words* Job 4: 4, נְמָלִים *ants* Prov. 30: 25, and masculine nouns in וֹת are construed as feminines, e. g. מִשְׁכָּנוֹת *dwellings* Ps. 84: 2.

§ 203. 1. Some substantives are, by their signification or by usage, limited to the singular, such as material nouns taken in a universal or indefinite sense, אֵשׁ *fire*, זָהָב *gold*, אֲדָמָה *ground;* collectives, עַם *children*, עוֹף *fowl*, עַיִט *birds of prey*, בָּקָר *large cattle* (noun of unity שׁוֹר *an ox*), צֹאן *small cattle* (noun of unity שֶׂה *a sheep or goat*);

many abstracts, יְשׁוּעָה *salvation*, עִוְרוֹן *blindness*. On the other hand some are found only in the plural, such as nouns, whose singular, if it ever existed, is obsolete, מַיִם *water*, פָּנִים *face* or *faces*, שָׁמַיִם *heaven*, מְעִים *bowels*, אֲנָשִׁים *men*, מְרַאֲשׁוֹת *adjacent to the head*, and abstracts, which have a plural form, חַיִּים *life*, אֲהָבִים *love*, רַחֲמִים *mercy*, תַּחְבּוּלוֹת *government*.

a. The intimate connection between **a** collective and an abstract is shown by the use of the feminine singular to express both, § 200. In like manner the plural, whose office it is to gather separate units into one expression, is used to denote in its totality or abstract form that common quality which pervades them all and renders such a summation possible, comp. *τὰ δίκαια right*, *τὰ ἄδικα wrong*. Some abstracts adopt indifferently the feminine or the plural form, אֱמוּנָה and אֱמוּנִים *fidelity*, גְּאֻלָּה and גְּאֻלִּים *redemption*, חַיָּה and חַיִּים *life*, חֶשְׁכָה and חֲשֵׁכִים *darkness*, מִשְׁבְּצָה and מִשְׁבְּצוֹת *setting* of gems.

b. The form קְטוּלִים is adopted by certain words which denote periods of human life, נְעוּרִים *childhood*, עֲלוּמִים *youth*, בְּחֻרִים *adolescence*, בְּתוּלִים *virginity*, כְּלוּלוֹת *period of espousals*, זְקֻנִים *old age*.

c. Abstracts, which are properly singular, are sometimes used in the plural to denote a high degree of the quality which they represent, or repeated exhibitions and embodiments of it, גְּבוּרָה *might*, גְּבוּרוֹת *deeds of might*, חָכְמוֹת *exalted wisdom*, הוֹלֵלוֹת *intense folly*.

2. There are a few examples of the employment ot the plural form when a single individual is spoken of, to suggest the idea of exaltation or greatness. It is thus intimated that the individual embraces a plurality, or contains within itself what is elsewhere divided amongst many. Such plurals of majesty are אֱלֹהִים *God*, the supreme object of worship, אֲדֹנִי *Supreme Lord* prop. *my Lord*, § 201. *c*, and some other terms referring to the divine being, בּוֹרְאֶיךָ Eccles. 12: 1, גְּבוֹהִים Eccles. 5: 7, עֹשֶׂיךָ Isa. 54: 5, קְדוֹשִׁים Hos. 12: 1; also, אֲדֹנִים (rarely with a plural sense) *lord*, בְּעָלִים (when followed by a singular suffix) *master*, בְּהֵמוֹת *Behemoth, great beast*, and possibly תְּרָפִים *Teraphim*, which seems to be used of a single image, 1 Sam. 19: 13, 16.

§ 204. The dual is formed by adding ־ַיִם to the sing-

ular of both genders, ת as the sign of the feminine remaining unchanged, and ה reverting to its original form ת, § 198. *b*, יָד *hand* du. יָדַיִם, דֶּלֶת *door* du. דְּלָתַיִם, שָׂפָה *lip* du. שְׂפָתַיִם.

a. The dual ending in Hebrew, as in the Indo-European languages, Bopp Vergleich. Gramm. § 206, is a modified and strengthened form of the plural ending. The Arabic goes beyond the Hebrew in extending the dual to verbs and pronouns. The Aramaeic scarcely retains a trace of it except in the numeral two and its compounds.

§ 205. The dual in Hebrew expresses not merely two, but a couple or a pair. Hence it is not employed with the same latitude as in Greek of any two objects of the same kind, but only of two which belong together and complete each other. It is hence restricted to

1. Double organs of men or animals, אָזְנַיִם *ears*, אַפַּיִם *nostrils*, קַרְנַיִם *horns*, כְּנָפַיִם *wings*.

2. Objects of art which are made double or which consist of two corresponding parts, נַעֲלַיִם *pair of shoes*, מֹאזְנַיִם *pair of scales*, מֶלְקָחַיִם *pair of tongs*, דְּלָתַיִם *folding doors*.

3. Objects which are conceived of as constituting together a complete whole, particularly measures of time or quantity, יוֹמַיִם *period of two days, biduum*, שְׁבֻעַיִם *two weeks, fortnight*, שְׁנָתַיִם *two years, biennium*, סָאתַיִם *two measures*, כִּכָּרַיִם *two talents*, דְּרָכַיִם Prov. 28: 6, 18 *double way* (comp. in English *double dealing*), נַהֲרַיִם *pair of rivers*, i. e. the Tigris and Euphrates viewed in combination.

4. The numerals שְׁנַיִם *two*, כִּפְלַיִם *double*, מָאתַיִם *two hundred*, אַלְפַּיִם *two thousand*, רִבּוֹתַיִם *two myriads*, שִׁבְעָתַיִם *sevenfold*, כִּלְאַיִם *of two sorts*.

5. A few abstracts, in which it expresses intensity, עַצְלָתַיִם *double-slothfulness*, יִרְתַּיִם *double-rebellion*, צָהֳרַיִם *double-light*, i. e. *noon*, רִשְׁעָתַיִם *double-wickedness*.

a. Names of objects occurring in pairs take the dual form even when a higher number than two is spoken of, שְׁלֹשׁ חֲשֻׁבָּיִם 1 Sam. 2: 13 *the three*

teeth, אַרְבַּע כְּנָפַיִם Ezek. 1: 6 *four wings*, שֵׁשׁ כְּנָפַיִם Isa. 6: 2 *six wings*, שִׁבְעָה עֵינָיִם Zech. 3: 9 *seven eyes*, כָּל־יַדַיִם וְכָל־בִּרְכַּיִם *all the hands and all knees* Ezek. 7: 17. Several names of double organs of the human or animal body have a plural form likewise, which is used of artificial imitations or of inanimate objects, to which these names are applied by a figure of speech, § 200. *c*, קַרְנַיִם *horns*, קְרָנוֹת *horns* of the altar, כְּנָפַיִם *wings*, כְּנָפוֹת *extremities*, כְּתֵפַיִם *shoulders*, כְּתֵפוֹת *shoulder-pieces* of a garment, עֵינַיִם *eyes*, עֲיָנוֹת *fountains*, רַגְלַיִם *feet*, רַגְלַיִם *times* prop. beats of the foot. In a few instances this distinction is neglected, שִׂפְתַיִם and שִׂפְתוֹת *lips*, יָדַיִם and יָדוֹת *sides*, יַרְכָתַיִם *extremities*.

b. The dual ending is in a very few words superadded to that of the plural, חוֹמוֹת *walls* of a city, חוֹמֹתַיִם *double walls*, לוּחוֹת *boards*, לְהֹתַיִם *double boarding* of a ship, גְּדֵרֹתַיִם name of a town in Judah, Josh. 15: 36.

c. The words מַיִם *water* and שָׁמַיִם *heaven* have the appearance of dual forms; they are, however, commonly regarded as plurals, and compared with such plural forms in Aramaeic as שְׁמַיִן Dan. 5: 9 from the singular שְׁמַיָּא. In יְרוּשָׁלַיִם *Jerusalem*, or as it is commonly written without the Yodh יְרוּשָׁלַם, the final Mem is not a dual ending but a radical, and the pronunciation is simply prolonged from יְרוּשָׁלֵם, comp. Gen. 14: 18, Ps. 76: 3, though in this assimilation to a dual form some have suspected an allusion to the current division into the upper and the lower city.

§ 206. It remains to consider the changes in the nouns themselves, which result from attaching to them the various endings for gender and number that have now been recited. These depend upon the structure of the nouns, that is to say, upon the character of their letters and syllables, and are governed by the laws of Hebrew orthography already unfolded. These endings may be divided into two classes, viz.:

1. The feminine ת, which, consisting of a single consonant, causes no removal of the accent and produces changes in the ultimate only.

2. The feminine ה, the plural ים and וֹת, and the dual ַיִם, which remove the accent to their own initial vowel, and may occasion changes in both the ultimate and the penult.

§ 207. Nouns which terminate in a vowel undergo no change on receiving the feminine characteristic ת, מוֹאָבִי *Moabite*, מוֹאָבִית *Moabitess*, מוֹצֵא *finding*, fem. מוֹצֵאת, חַטָּא

sinner, חַטָּאת *sin*, § 200. Nouns which terminate in a consonant experience a compression of their final syllable, which upon the addition of ת, ends in two consonants instead of one, § 66. 2, and an auxiliary Seghol is introduced to relieve the harshness of the combination, § 61. 2. In consequence of this the vowel of the ultimate is changed from *ā* or *ă* to *ĕ*, § 63. 2. *a*, from *ē* or *ī* to *ĕ*, or in a few words to *ē*, and from *ō* or *ū* to *ŏ*, § 61. 4. שְׁבָרִי *broken* fem. שְׁבֻרָת, אַדְמוֹנִי *reddish* fem. אַדְמֹנִית, הוֹלֵךְ *going* fem. הוֹלֶכֶת, גְּבִיר *master*, גְּבֶרֶת *mistress*, חֹמֶשׁ *fire* fem. חֲמֶשֶׁת, אִישׁ *man*, אִשָּׁה *woman*, § 216. 1. *b*, נְפוּצִים *scattered* fem. נְפוּצוֹת, נְחוּשָׁה and נְחֹשֶׁת *brass*. When the final consonant is a guttural, there is the usual substitution of Pattahh for Seghol, שֹׁמֵעַ *hearing* fem. שֹׁמַעַת, נֹגְעִי *touching* fem. נֹגַעַת.

a. In many cases the feminine is formed indifferently by ת or by תָ; in others usage inclines in favor of one or of the other ending, though no absolute rule can be given upon the subject. It may be said, however, that adjectives in ִי almost always receive ת; active participles, except those of ע״ע, ע״ו and ל״ה verbs, oftener take תָ than ת; ת is also found, though less frequently, with the passive participles except that of Kal, from which it is excluded.

b. A final ן, ד or ת is sometimes assimilated to the feminine characteristic ת and contracted with it, § 54, בַּת for בַּנְתּ *daughter*, מַתָּת for מַתְנַת *gift*, אֱמֶת for אֱמוּנַת *truth*, אַחַת for אֶחָדַת *one*, מְשַׁרַת 1 Kin. 1: 15 for מְשָׁרַתַת *ministering*, מָשַׁחַת Mal. 1: 14 for מָשְׁחָתַת *corrupt*, מָהֳבַת for מָהֳבָדַת *pan*. The changes of the ultimate vowel are due to its compression before concurring consonants.

c. The vowel *ū* remains in תְּנוּמֶת Lev. 5: 21 *deposit*, and the proper name תַּחְנֻמֶת *Tanhumeth*. From אָח *brother*, חָם *father-in-law* are formed אָחוֹת *sister*, חֹתֶת *mother-in-law*, the radical ־, which has been dropped from the masculine, retaining its place before the sign of the feminine, comp. § 101. 1. *a*; נִפְלָאת *difficult* Deut. 30: 11 is for נִפְלֵאת from נִפְלָא.

§ 208. The changes which result from appending the feminine termination תָ, the plural terminations ־ִים and ־וֹת, and the dual termination ־ַיִם, are of three sorts, viz.:

1. Those which take place in the ultimate, when it is a mixed syllable.

2. Those which take place in the ultimate, when it is a simple syllable.

3. Those which take place in the penult.

§ 209. When the ultimate is a mixed syllable bearing the accent, it is affected as follows, viz.:

1. Tsere remains unchanged, if the word is a monosyllable or the preceding vowel is Kamets, otherwise it is rejected; other vowels suffer no change, מֵת *dead* fem. מֵתָה, pl. מֵתִים; יָרֵךְ *thigh* du. יְרֵכַיִם, שָׁלֵם *complete* fem. שְׁלֵמָה, pl. שְׁלֵמִים, f. pl. שְׁלֵמוֹת; הֹלֵךְ *going* fem. הֹלֶכֶת, pl. הֹלְכִים, f. pl. הֹלְכוֹת.

a. The rejection of Tsere is due to the tendency to abbreviate words which are increased by additions at the end, § 66. 1. It is only retained as a pretonic vowel, § 64. 2, when the word is otherwise sufficiently abbreviated, or its rejection would shorten the word unduly. Tsere is retained contrary to the rule by שְׁלִשִׁים, רִבֵּעִים *children of the third and fourth generations*, by a few exceptional forms, e. g. בְּגֵדָה Jer. 3: 8. 11, כְּשֵׁפָה Ex. 23: 26, נְעֵרָה Cant. 1: 6, שְׁוֵבָה Isa. 54: 1, and frequently with the pause accents, § 65, e. g. יְוֵלֵדָה Isa. 21: 3, שְׁוֵעִים Lam. 1: 16, :שְׁוֵבוֹת Isa. 49: 8, אַבְנֵטִים Ex. 28: 40, סַנְוֵרִים Gen. 19: 11, 2 Kin. 6: 18 (once with Tiphhha), :עַכְבֵּרִים Isa. 2: 20, פַּרְחֵסִים Eccles. 2: 5, נִזְבֵּרוֹת Isa. 2: 4. It also appears in several feminine substantives, both singular and plural, e. g. מַהְפֵּכָה *overthrow*, מוֹעֲצוֹת *counsels*, תּוֹעֵבָה *abomination*, מִשְׁעֶנֶת *staff*, מְכַשֵּׁפָה *witch*. On the other hand, the following feminines reject it though preceded by Kamets, דְּיָל *wild-goat*, fem. דַּיָּה, יַעֵן *ostrich*, fem. יַעֲנָה, יָרֵךְ *thigh*, fem. יַרְכָה. It is also dropped from the plural of the monosyllable בֵּן *son*, and its place supplied by a pretonic Kamets, בָּנִים *sons*, בָּנוֹת *daughters*, the singular of the feminine being בַּת for בַּנְתָ, § 207. *b*; so מַזְלֵג *fork* pl. מְזָלְגוֹת.

b. Kamets in the ultimate is retained as a pretonic vowel, לָבָן *white*, fem. לְבָנָה, pl. לְבָנִים, f. pl. לְבָנוֹת; מִבְצָר *fortress*, pl. מִבְצָרִים and מִבְצָרוֹת, only disappearing in a few exceptional cases, שֵׂעָר *hair*, fem. שַׂעֲרָה, שֶׂלְוִ *quail*, pl. שַׂלְוִים, מַעְבָּרוֹת and מִעְבָּרוֹת *fords*, כִּכָּר *talent* du. כִּכְּרַיִם but in pause כִּכָּרַיִם, נָהָר *river* du. נַהֲרַיִם, מִגְרָשׁ *pasture*, pl. מִגְרָשִׁים once מִגְרָשׁוֹת (with Hholem). So in the ל״א participles נִבָּא *prophesying* pl. נִבְּאִים, נִבְּאָה *polluted* pl. נִבְּאִים, נִמְצָא *found* pl. נִמְצְאִים; but with the pause accents Kamets returns, נִבָּאִים Ezek. 13: 2, :נִמְצָאִים Ezr. 8: 25. The foreign word פַּרְוָר *suburbs* forms its plural irregularly פִּרְוָרִים.

c. Hholem and Hhirik commonly suffer no change; but in a few words Shurek takes the place of the former, and in one Tsere is substituted for the latter, § 66. 2 (*c*), מָגוֹר *terror* pl. מְגוּרִים, מָעוֹן *habitation* pl. מְעוֹנִים, מָתוֹק *sweet* fem. מְתוּקָה pl. מְתוּקִים, צוֹק *distress* fem. צוּקָה, לִין *lodging* fem. מְלוּנָה, מָלִיט *flight* fem. פְּלֵטָה, מָנוֹחַ *rest* fem. מְנוּחָה, מָצוֹר *fortification* fem. מְצוּרָה, עָמֹק *deep* fem. עֲמֻקָּה Prov. 23: 27 and עֲמֻקָּה, רְתוֹק *chain* pl. רְתוּקוֹת 1 Kin. 6: 21 K'ri; פָּלִיט *escaped* pl. פְּלֵטִים or פְּלִיטִים fem. פְּלֵטָה or פְּלִיטָה.

d. Hholem is dropped from the plural of צִפּוֹר *bird* pl. צִפֳּרִים, as well as from the plural of nouns having the feminine characteristic ת in the singular; thus גֻּלְגֹּלֶת *skull*, by the substitution of the plural ending וֹת for ֶת, § 201, becomes גֻּלְגֹּלוֹת, מַהֲלֶכֶת *course*, pl. מַהֲלָכוֹת, or with Hhateph-Kamets under a doubled letter, § 16. 3. *b*, בֻּתֹּנֶת *coat* pl. בֻּתָּנוֹת, שִׁבֹּלֶת *ear of corn*, pl. שִׁבֳּלִים; in two instances a pretonic Kamets is inserted, בַּצֹּרֶת *drought* pl. בַּצָּרוֹת, עַשְׁתֹּרֶת *Astarte* pl. עַשְׁתָּרוֹת.

e. Seghol in nouns with the feminine characteristic ת affixed mostly follows the law of the vowel from which it has sprung, § 207; if it has been derived from Tsere it is rejected, if from any other vowel it is still in some instances rejected, though more commonly it reverts to its original form and is retained, יוֹנֶקֶת *sucker* (from יוֹנֵק) pl. יוֹנְקוֹת, אִגֶּרֶת *epistle* (from אִגֵּר) pl. אִגְּרוֹת, מַאֲכֶלֶת *knife* (from מַאֲכָל) pl. מַאֲכָלוֹת, אַדְמֹדֶמֶת *reddish* (from אַדְמֹדֵם) pl. אַדְמֹדְמוֹת, יֶנֶקֶת *nurse* (from יֹנֵק) pl. יֶנְקוֹת, קַשְׂקֶשֶׂת *scale* pl. קַשְׂקַשִּׂים and קַשְׂקְשׂוֹת. Pattahh, which has arisen from a Seghol so situated under the influence of a guttural, follows the same rule, טַבַּעַת *ring* pl. טַבָּעוֹת, נַגַּעַת (from נֹגֵעַ) *touching* pl. נְגָעוֹת.

f. A few nouns with quiescents in the ultimate present apparent exceptions which are, however, readily explained by the contractions which they have undergone. Thus חוֹחַ for חָוֹחַ, § 57. 2 (5), *thorn*, has its plural חוֹחִים or חֲוָחִים; יוֹם (יָוֹם) *day*, pl. יָמִים (יְוָמִים); דָּיוֹן (דִּוְיוֹן) *strife*, pl. דְּיָנִים; שׁוֹר (שָׁוְרָ) *ox*, pl. שְׁוָרִים; הוֹד for הָוְד or הַיְד, § 188. 2. *c*, *pot*, pl. הוֹדִים or הְוָדִים, § 210. 3; שׁוּק (שָׁיְקָ or שָׁיְקָ) *street*, pl. שְׁוָקִים; עִיר (עֵיְרָ or עֲיָרָ) *city*, pl. once עֲרִים Judg. 10: 4 usually contracted to עָרִים; רֹאשׁ (רֵאְשׁ) *head*, pl. רָאשִׁים. So מָאָה *measure* becomes in the dual מָאתַיִם for מָאָתַיִם and מֵאָה *one hundred*, du. מָאתַיִם for מֵאָתַיִם; בָּלָאבָה for בַּלָּאבָה, § 57. 2 (3)), *work*, probably had in the absolute plural בָּלָאבוֹת, whence the construct is בְּלָאבוֹת.

2. The final consonant sometimes receives Dagheshforte before the added termination, causing the preceding vowel to be shortened from *ā* to *ă*, from *ē* or *ī* to *ĭ*, and from *ō* or *ū* to *ŭ*, § 61. 5. This takes place regularly in nouns which are derived from contracted ע״ע roots, תֻּם *perfect* fem. תַּמָּה, יָם *sea* pl. יַמִּים; מָגֵן (from מָגָנ) *shield*, pl. מָגִנִּים and מָגִנּוֹת; חֹק *statute* pl. חֻקִּים, fem. חֻקָּה, pl. חֻקּוֹת, or in whose final letter two consonants have coalesced, אַף for אַנְף du. אַפַּיִם *nose;* עֵז for עֵנְז *she-goat* pl. עִזִּים; עֵת for עֵדְת *time* pl. עִתִּים and עִתּוֹת; אִישׁ for אֱנְשׁ *man*, אִשָּׁה *woman*, and it not infrequently occurs in other cases.

a. Nouns with Pattahh in the ultimate with few exceptions double their final letter being either contracted forms, רַךְ *weak* pl. רַכִּים fem. רַכָּה pl. רַכּוֹת, or receiving Dagheshforte conservative in order to preserve the

short vowel, אֲגַמִּים *pool* pl. אֲגַמִּים; so אוֹפָן *wheel*, הֲדַס *myrtle*, זְעֵיר *few*, חֲתַחַת *frightful*, יְרַקְרַק *greenish*, כְּאֵלִי *desire*. Before ח Pattahh may be retained in an intermediate syllable, לַח *fresh* pl. לְחִים; before other gutturals it is lengthened to Kamets, § 60. 4, שַׂר *prince* pl. שָׂרִים fem. שָׂרָה; so אֶצְבָּעוֹת *fingers*, אַרְבָּעָה *four*, כּוֹבָעִים *helmets*, מְצָרִים *straits* and הוּדָאִים *baskets*, גֻּלָּאוֹת *loops*, which do not occur in the singular, but are commonly referred to הוּגְלֵי, לוּלֵי, § 196. *b*, י being changed to א as in § 210. 3. *d*; also שַׁד *breast*, which omits Daghesh du. שָׁדַיִם. Pattahh is in the following examples changed to Hhirik before the doubled letter, § 58. 2, בַּז *prey* fem. בָּזָּה, חַת *fear* fem. חֲתָּה, גַּת *wine-press* pl. גִּתּוֹת, בֶּגֶד *garment* pl. בְּגָדִים and מִדִּים, מַס *tribute*, סַף *basin*, פַּת *morsel*, צַד *side*, גַּלְגַּל *wheel*, כַּלְכֹּלִית *baskets*, סַמְסְנִים *palm-branches*, מוֹרַג *threshing-sledge* pl. מוֹרְגִים or by the resolution of Daghesh-forte, § 59. *a*, מְוֹרְרִגִים. It is rejected from צֶלֶצַל *cymbal* pl. צְלָצְלִים, זַן *sort* pl. זָנִים, גַּרְגַּר *berries*, probably from גַּרְגְּרִים and מְתִים *men*, from the obsolete singular, מֵת. The plural of עַם *people* is עַמִּים and in a very few instances with the doubled letter repeated, עַמְמִים; so הַר *mountain* pl. הָרִים and חָרְרִים Deut. 8: 9, צֵל *shadow* pl. צְלָלִים, חֹק *statute* pl. חֻקִּים, and twice in the construct, חֻקְקֵי Judg. 5: 15, Isa. 10: 1, which implies the absolute form חֻקְקִים.

b. The final letter is doubled after Kamets in the following words besides those from ע״ע roots, אוּלָם *porch* pl. אֻלָּמִים; so אֶתְנָן *hire*, גָּמָל *camel*, זְמַן *time*, כַּסְלָה *darkness*, מֶרְחָק *distance*, קָטָן *small*, רַעֲנָן *green*, שַׁאֲנָן *quiet*, שׁוֹשָׁן *lily*, שָׁפָן *coney*, to which should perhaps be added עַקְרָב Deut. 8: 15 *scorpion*, though as it has a pause accent in this place which is the only one where it is found with Kamets, its proper form may perhaps have been עַקְרָב, § 65. The Niphal participle נִכְבָּד *honored* has in the plural both נִכְבָּדִים and נִכְבַּדִּים. Several other words, which only occur in the plural, are in the lexicons referred to singulars with Kamets in the ultimate; but the vowel may, with equal if not greater probability, be supposed to have been Pattahh. Kamets is shortened to Pattahh before ח, which does not admit Daghesh-forte, in the plurals of אָח *brother* pl. אַחִים, חָח *hook*, מִבְטָח *confidence*, § 60. 4. *a.*

c. The following nouns with Hholem in the ultimate fall under this rule, in addition to those derived from ע״ע roots, גֵּבֶן *peak* pl. גְּבָנִים, חֹטֵם *sacred scribe*, חֹצֵב *band*, לֹאם *nation*, עֹרֹם *naked*, and several adjectives of the form קָטֹל, which are mostly written without the vowel-letter ו, § 14. 3, e. g. אָדֹם *red* fem. אֲדָמָה, אֲדֻמִּים, אֹיֵם *terrible*, אָרֹךְ *long*, etc.; אַשְׁפֹּת *dunghill* takes the form אַשְׁפּוֹתוֹת in the plural.

d. There are only two examples of doubling when the vowel of the ultimate is Shurek, חֲרֻלִּים Prov. 24: 31 *nettles* or *brambles* from חָרוּל, רְאוּמוֹת Esth. 2: 9 from רָאוּי Kal pass. part. of רָאָה.

e. אִישׁ (אֱנוֹשׁ) *man* is not contracted in the plural אֲנָשִׁים *men;* in the feminine, for the sake of distinction, the initial weak letter is dropped, נָשִׁים *women*, which is used as the plural of אִשָּׁה *woman;* אִישִׁים *men* and אִשּׁוֹת *women* are rare and poetic. אֵת *ploughshare* has either אִתִּים or אֵתִים in the plural.

§ 210. 1. Segholate nouns, or those which have an unaccented vowel in the ultimate, drop it when any addition is made to them, § 66. 2. (*a*). As this vowel arose from the concurrence of vowelless consonants at the end of the word, the necessity for its presence ceases when that condition no longer exists. Segholates thus revert to their original form of a monosyllable ending in concurrent consonants, § 185.

2. Monosyllables of this description receive the feminine ending with no further change than the shortening due to the removal of the accent, in consequence of which *ō* becomes *ŏ* or more rarely *ŭ*, *ē* becomes *ĭ* or more rarely *ĕ;* *ĕ* may be restored to *ă* from which it has commonly arisen, § 185, or like *ē* it may become *ĭ* or *ĕ*, עֹצֶם (עֹצֶם) *strength* fem. עָצְמָה, חֹפֶשׁ (חָפְשׁ) fem. חָפְשָׁה *freedom*, אֹמֶר (אֵמֶר) *saying* fem. אִמְרָה and אֶמְרָה, מֶלֶךְ (מֵלֶךְ) *king*, מַלְכָּה *queen*, טֶבַח *slaughter* fem. טִבְחָה.

a. Nouns having either of the forms קָטְלָה, קֶטֶלָה, קִטְלָה, קָטֶלָה, קֶטְלָה, are consequently to be regarded as sprung from monosyllables with the vowel given to the first radical.

3. Before the plural terminations a pretonic Kamets is inserted, and the original vowel of the monosyllable falls away, מֶלֶךְ (מֵלֶךְ) *king* pl. מְלָכִים, מַלְכָּה *queen* pl. מְלָכוֹת, אֹמֶר (אֵמֶר) *saying* pl. אֲמָרִים, אִמְרָה *id.* pl. אֲמָרוֹת, פֹּעַל (פֹּעֵל) *work*, pl. פְּעָלִים, חֵטְא *sin* pl. חֲטָאִים.

a. Pretonic Kamets is not admitted by the numerals עֶשְׂרִים *twenty* from עֶשֶׂר *ten*, שִׁבְעִים *seventy* from שֶׁבַע *seven*, תִּשְׁעִים *ninety* from תֵּשַׁע *nine*. The words בָּטְנִים *pistachio-nuts*, הָבְנִים *ebony*, צֳאָלִים Job 40: 21. 22, רַחֲמִים *mercies*, and שִׁקְמִים *sycamores*, which do not occur in the singular, have been regarded as examples of a like omission; though the first is derived by Fürst from בָּטְנָה, and the second by Gesenius from הָבְנִי. The plural of חָכְמָה *wisdom* is not חָכְמוֹת but חָכְמֹת. Quadriliteral Segholates also receive pretonic Kamets in the plural כְּנַעֲנִי pl. כְּנַעֲנִים *merchants*, unless the new letter creates an additional syllable, in which case the introduction of Kamets would prolong the word too much, פִּלֶגֶשׁ *concubine* pl. פִּלַגְשִׁים, צִפֹּרֶן *nail* צִפָּרְנִים.

b. The superior tenacity of Hholem, § 60. 1. *a* (4), is shown by the

occasional retention of *o*, not only as a compound Sh'va under gutturals אָרַח *way* pl. אֳרָחוֹת, so חֹדֶשׁ *month*, חֹרֶשׁ *thicket*, כֶּבֶשׂ *sheaf*, עֹפֶר *fawn;* but as Hhateph-Kamets or Kamets-Hhatuph in גֹּרֶן *threshing-floor* pl. with art. הַגֳּרָנוֹת, קֹדֶשׁ *holiness* pl. קָדָשִׁים and with art. הַקָּדָשִׁים, שֹׁרֶשׁ *root* pl. שֳׁרָשִׁים, § 19. 2. *a*, or as a long vowel in אֹהֶל *tent* pl. אָהֳלִים, אֲרֻחָה *stall* pl. אֲרֻחֹת, § 60. 3. *c*, or shifted to the following letter so as to take the place of the pretonic Kamets in בֹּהֶן *thumb* pl. בְּהֹנוֹת, נֹגַהּ *brightness* pl. נְגֹהוֹת, § 186. *a*. Comp. פֶּסֶל (פְּסֶל) *graven image* pl. פְּסִילִים. In the other nouns it is rejected, בֹּקֶר *morning* pl. בְּקָרִים; so גֹּרֶן *threshing-floor*, כֹּפֶר *cypress*, קֹמֶץ *handful*, רֹמַח *spear*, רֹתֶם *juniper*, שֹׁעַל *hollow of the hand.*

c. Middle Vav quiesces in the plural of the following nouns: מָוֶת *death* pl. מוֹתִים, עָוְלָה *iniquity* pl. עוֹלוֹת. Gesenius regards אוֹנִים Prov. 11: 7, Hos. 9: 4, as the plural of אָוֶן, while others derive it from אוֹן, translating it *riches* in the former passage and *sorrow* in the latter, the primary idea out of which both senses spring being that of *toil*. Middle Yodh quiesces in the plural of אַיִל *ram* pl. אֵילִים, זַיִת *olive* pl. זֵיתִים, לַיִל *night* pl. לֵילוֹת, but not in חַיִל *strength* pl. חֲיָלִים, עַיִן *fountain* pl. עֲיָנוֹת, עַיִר *ass-colt* pl. עֲיָרִים, תַּיִשׁ *goat* pl. תְּיָשִׁים. The plural of גַּיְא *valley* is גְּאָיוֹת by transposition from the regular form גיאות which is twice found in the K'thibh 2 Kin. 2: 16, Ezek. 6: 3; בַּיִת *house* has as its plural בָּתִּים *bāttīm* § 19. 2. *a*, whether this be explained as for בָּנְתִים from בָּנָה *to build* or for בָּתְתִים from בוּת *to lodge*. Middle Yodh always quiesces before the feminine and dual endings, צַיִד *provision* fem. צֵידָה, עַיִן *eye* du. עֵינַיִם.

d. Monosyllables in י from ל״ה roots belong properly to this formation, § 57. 2 (4) and § 186. *b*, and follow the rules given above both in the feminine חֵלְיָה (חֵלְיָ) *necklace* fem. חֵלְיָה, and the plural אֲרִי (אַרְיֵ) *lion* pl. אֲרָיוֹת and אֲרָיוֹת, גְּדִי *kid* pl. גְּדָיִים, or with the change of י to א, § 56. 4, which also occurs in verbs, § 179. 3, חֵלְיָ *necklace* pl. חֲלָאִים, פְּתִי *simple* pl. פְּתָיִם, פְּתָיִם and פְּתָאִים, צְבִי *gazelle* pl. צְבָיִים, צְבָיִים and צְבָאוֹת; in like manner עֳנָפִים *branches*, לְבָאִים *lions* are referred to עֳנָפִי and לְבִי though these singulars do not occur; כְּלִי (כֶּלְיָ) *utensil* does not receive Kamets in the plural כֵּלִים. No absolute plurals occur of Segholates with final Vav, only the construct forms חַנְוֵי, קַצְוֵי.

4. The dual sometimes takes a pretonic Kamets like the plural, but more frequently follows the feminine in not requiring its insertion, דֶּלֶת (דַּלְתֵּ) *door* du. דַּלְתַיִם, דֶּרֶךְ (דַּרְכֵּ) *way* du. דַּרְכַּיִם, קֶרֶן (קַרְנֵ) *horn* du. קַרְנַיִם and קַרְנָיִם, לֶחִי *cheek* du. לְחָיַיִם, בֶּרֶךְ (בִּרְכֵּ) *knee* du. בִּרְכַּיִם, so מָתְנַיִם, צָהֳרַיִם, עֶרְבַּיִם, נַעֲלַיִם.

§ 211. When the ultimate is a simple syllable, the following cases occur, viz:

1. Final ה rejects before the feminine and plural

endings, יָפֶה *beautiful* fem. יָפָה f. pl. יָפוֹת, בַּעֲשֵׂה *work* pl. בַּעֲשֵׂי: so בַּחֲנֵה *camp* du. בַּחֲנַיִם.

a. The last radical in words of this description is properly י, which is rejected after a vowelless letter, § 62. 2. *c*, so that יָפָה is for יָפְיָה and בַּעֲשֵׂים for בַּעֲשֵׂיִם. In a very few instances the radical י remains, e. g. עֲיָטִים Cant. 1: 7 from עַיִט (עַיִט) מְרָחֲמִים Isa. 25: 6 from מְרָחָה (מְרָחִי) and is even strengthened by Daghesh-forte, § 209. 2, בְּיִרְיָה Lam. 1: 16 from בּוּכָה, פְּרִרָה and פְּרָר, § 196. *b*, fem. of פֹּרֵה, חֲרִיּוֹת Hos. 14: 1, elsewhere חֲרוֹת, פֶּה *mouth. edge* pl. פִּים, פִּיּוֹת and פִּיּוֹת, or changed to א, § 56. 4, עֵגְלָה (עֵגְלִי) *young lamb* עֵגְלָאִים (עֵגְלִים), so that it is not necessary to assume a singular עֵגְלָא which no where occurs; חלכה Ps. 10: 8 has as its plural חלכאים ver. 10.

2. Final י may combine with the feminine and plural endings, so as to form יָה., ִים., ִיוֹת., or it may in the masculine plural be contracted to ִים., § 62. 2, עִבְרִי *Hebrew* pl. עִבְרִים and עִבְרִיִּם fem. עִבְרִיָּה f. pl. עִבְרִיּוֹת; צִי *ship* pl. צִים and צִיִּים, חָפְשִׁי *free* pl. חָפְשִׁים, נָקִי *pure* pl. נְקִיִּים. So nouns in ִית. upon the exchange of the feminine singular for the plural termination עַמּוֹנִית *Ammonitess* pl. עַמּוֹנִיּוֹת, חִתִּית *Hittitess* חִתִּיּוֹת.

a. In עֲרַבְיִאים 2 Chron. 17: 11 *Arabians* from עֲרָבִי an א is interposed, elsewhere דָּלִיּוֹת; עֲנָפִים *branches*, זָוִיּוֹת *corners* and נְקִיּוֹת *bowls*, which do not occur in the singular, are assumed to be from דָּלִית, זָוִית and נְקִית.

b. A few monosyllables in ִי form their feminines in this manner, though in the masculine plural they follow the rule before given, § 210. 3. *d*, גְּדִי *kid* fem. גְּדָיָה, לְבִי *lion*, לְבָאָה *lioness*, § 198. *d*, צְבִי *gazelle* fem. צְבִיָּה (צְבָיָה and צְבָאָה are used as proper names), שְׁתִי *drinking* fem. שְׁתִיָּה.

3. There are few examples of final וּ or וֹ with added endings. The following are the forms which they assume: שִׁקּוּי *drink* pl. שִׁקּוּיִם, מַלְכוּת *kingdom* pl. מַלְכֻיּוֹת, § 62. 2, עֵדוּת *testimony* pl. עֵדוֹת, אָחוֹת *sister* pl. אָחוֹת and אַחְיוֹת for אֲחָיוֹת, רִבּוֹ and רִבּוֹא רִבּוֹא *myriad* pl. רִבּוֹת, רִבְאוֹת and רִבְאוֹת; the dual רִבְּתַיִם inserts the sign of the feminine, or as others think of the plural § 205. *b*.

a. חֲנִיּוֹת or חֲנִיִּית Jer. 37: 16 *cells* is referred to the assumed singular חֲנִיָּה; נִצִּית Isa. 3: 16 K'thibh and עִשִּׂית 1 Sam. 25: 18 K'thibh are formed from נִצַּת. עִשַּׂת abbreviated Kal passive participles, § 174. 5, but in the absence of the appropriate vowel points their precise pronunciation cannot be determined.

b. Nouns ending in a quiescent radical א may be regarded as terminating

in a consonant, since this letter resumes its consonantal power upon an addition being made to the word. Comp. § 164. נִמְצָא *found* fem. נִמְצְאָה, פֶּרֶא *wild ass* pl. פְּרָאִים.

§ 212. The changes, which occur in the penult, arise from the disposition to shorten the former part of a word, when its accent has been carried forward by accessions at the end, § 66. 2. They consist in the rejection of Kamets or Tsere, גָּדוֹל *great* fem. גְּדוֹלָה pl. גְּדוֹלִים f. pl. גְּדוֹלוֹת, דָּבָר *word* pl. דְּבָרִים, זִכָּרוֹן *memorial* pl. זִכְרוֹנוֹת, כָּנָף *wing* du. כְּנָפַיִם, מֵשִׁיב *restoring* pl. מְשִׁיבִים fem. מְשִׁיבָה, מֵצַר *distress* pl. מְצָרִים, לֵוִי *Levite* pl. לְוִיִּם, except from nouns in ה֫ in which the place of the accent is not changed by the addition of the terminations for gender and number, § 211. 1, יָפֶה *beautiful* fem. יָפָה pl. יָפוֹת, שָׂדֶה *field* pl. שָׂדוֹת, קָשֶׁה *hard* pl. קָשִׁים, מִלָּה pl. מִלִּים and מֵעוֹת *bowels*, נָגֻף *smitten* pl. נְגָפִים. Other penultimate vowels are mostly exempt from change.

a. Kamets, which has arisen from Pattahh in consequence of the succeeding letter not being able to receive Daghesh-forte, as the form properly requires, is incapable of rejection. Such a Kamets is accordingly retained without change before ר, e. g. חָרָשׁ for חַרָשׁ, § 189. 1, *workman* pl. חָרָשִׁים, so פָּרָשׁ *horseman*, בָּרִיחַ *fugitive*, סָרִיס (const. סְרִיס) *eunuch*, עָרִיץ *terrible*, פָּרִיץ *violent*, חָרוּץ *diligent*, or shortened to Pattahh before ח, § 60. 1. *a* (4), בָּחוּר *young man* pl. בַּחוּרִים. Kamets is also retained in certain עִ֫, עִי and לֵ֫ derivatives as a sort of compensation for the reduction of the root by contraction or quiescence, e. g. מָגֵן *shield* pl. מָגִנִּים and מָגִנּוֹת, מָעוֹז *fortress* pl. מָעֻזִּים, דָּלִית *branch* pl. דָּלִיּוֹת, זָוִית *corner* pl. זָוִיּוֹת, רָמָה (from רוּם) *height*, du. רָמָתַיִם. Other instances of its retention are rare and exceptional, בָּגוֹד *treacherous* fem. בָּגוֹדָה, שָׁבוּעַ (const. שְׁבֻעַ) *week* pl. שָׁבֻעִים and שָׁבוּעוֹת but du. שָׁבֻעַיִם, שָׁלִישׁ *warrior* pl. שָׁלִשִׁים.

b. When Kamets following a doubled letter is rejected, and Daghesh-forte is omitted in consequence, § 25, the antepenultimate vowel is in a few instances changed from Hhirik to Seghol, § 61. 5, חִזָּיוֹן *vision* pl. חֶזְיוֹנוֹת, עִשָּׂרוֹן *a tenth* pl. עֶשְׂרֹנִים, but זִכָּרוֹן *memorial* pl. זִכְרוֹנוֹת.

c. Tsere is not rejected if it has arisen from Hhirik before a guttural in a form which properly requires Daghesh-forte, חֵרֵשׁ for חִרֵּשׁ, § 189. 1. *b*, *deaf* pl. חֵרְשִׁים, or if it is commonly represented by י, § 14. 3, כֵּלַי or כֵּלָי, § 188, *hammer* pl. כֵּלָפוֹת, or a radical י quiesces in it, אֵיתָן or אֵתָן (from יָתַן, § 191) *perennial* pl. אֵיתָנִים or אֵתָנִים, הֵיכָל *temple* pl. הֵיכָלִים and הֵכָלוֹת, מֵישָׁרִים and מֵשָׁרִים *rectitude*, זֵדוֹנִים (from זוּד or זִיד) *proud*. Other cases are rare and exceptional, e. g. אֵמֻלָּלִים Neh 3: 34 *feeble*.

d. Hholem is almost invariably retained in the penult, yet it yields to the strong tendency to abbreviation in the following trisyllables: אַשְׁדּוֹדִית *Ashdoditess* pl. אַשְׁדּוֹדִיּוֹת Neh. 13: 23 K'ri (K'thibh אשדודיות), עַמּוֹנִית *Ammonitess* pl. עַמּוֹנִיּוֹת id. (K'thibh עמונות, 1 Kin. 11: 1 עַמֹּנִיּוֹת), צִידֹנִי *Sidonian* f. pl. צִדְנִיּוֹת where long Hhirik becomes Tsere before concurrent consonants, § 61. 4.

e. When the penult is a mixed syllable containing a short vowel, it is ordinarily not subject to change, § 58. 2. The tendency to the greatest possible abbreviation is betrayed, however, in a few examples by the reduction of the diphthongal Seghol to Pattahh, comp. § 60. 3. *b.* אֶשְׁכֹּל *cluster* pl. אַשְׁכּוֹלוֹת Cant. 7: 8, מֶרְכָּב *chariot* fem. מֶרְכָּבָה pl. מַרְכָּבוֹת, מֶרְחָק *distance* pl. מֶרְחַקִּים and מֶרְחָקִים, or of Pattahh to the briefest of the short vowels Hhirik, comp. § 209. 2 *a*, זַלְעָפָה *fury* pl. זַלְעַפּוֹת, מִזְלֵג *fork* pl. מִזְלָגוֹת, § 192. *a*, צַלָּחַת *dish* pl. צַלָּחוֹת by the resolution of Daghesh-forte for צַלְחוֹת, § 59. *a*; אַחֵר for אַחֵר *other* has in the plural אֲחֵרִים, אֲחֵרוֹת as if from אָחֵר, גַּחֶלֶת *coal* has pl. גֶּחָלִים by § 63. 1.

§ 213. As precisely the same changes result from appending the feminine ה֫ and the plural endings, except in the single case of Segholate nouns or monosyllables terminating in concurrent consonants, § 210, nouns in ה֫ become plural with no further change than that of their termination מַמְלָכָה *kingdom* pl. מַמְלָכוֹת; only in the exceptional case referred to a pretonic Kamets must be inserted בַּלְכָּה *queen* from בֶּלֶךְ, pl. by § 210. 3. מְלָכוֹת. Nouns in ת, after omitting the feminine ending, are liable to the rejection or modification of the vowel of the ultimate in forming the plural, as explained § 209. 1. *d.* and *e*, אִגֶּרֶת *epistle* (from אִגֵּר) pl. אִגְּרוֹת, מִשְׁמֶרֶת *observance* (from מִשְׁמָר) pl. מִשְׁמָרוֹת. As the dual ending is not substituted for that of the feminine singular, but added to it, it is simply necessary in applying the rules for the formation of the dual, to observe that the old ending ת֫ takes the place of ה֫, § 204. Thus שָׁנָה (שָׁנָת) *year*, by § 212, becomes in the dual שְׁנָתַיִם, דֶּלֶת *door* by § 210. 4, du. דַּלְתַּיִם, נְחֹשֶׁת *brass* du. נְחֹשְׁתַּיִם.

a. In the following examples a radical, which has been rejected from the singular is restored in the plural, אָמָה (for אמהה) *maid-servant* pl. אֲמָהוֹת, בְּנָת (for בְּנָיָת from בָּנָה) *portion* pl. בְּנָיוֹת and בְּנָיֹת, comp. § 210. 3. *d*,

חֲצֹת (for חֲצָוֹת from חָצָה) pl. חֲצִיֹּת; in like manner כְּנִיֹּת *colleagues* is referred to the assumed singular כְּנָיֹת. פֶּחָה (פַּחֲוָה) *governor* has in the plural both פַּחֲוֹת (const. פַּחֲוֹת) and פַּחוֹת.

The Construct State.

§ 214. When one noun stands in a relation of dependence on another, the second or specifying noun is, in occidental languages, put in the genitive case; in Hebrew, on the other hand, the second noun undergoes no change, but the first is put into what is commonly called the construct state (סְמוּכָה or נִסְמָךְ *supported*). A noun which is not so related to a following one is said to be in the absolute state (בְּתוּרָה *cut off*). Thus, דָּבָר *word* is in the absolute state; but in the expression דְּבַר הַמֶּלֶךְ *verbum regis, the word of the king,* דְּבַר is in the construct state. By the juxtaposition of the two nouns a sort of compound expression is formed, and the speaker hastens forward from the first noun to the second, which is necessary to complete the idea. Hence results the abbreviation, which characterizes the construct state.

a. The term *absolute state* was introduced by Reuchlin; he called the construct *the state of regimen.*

§ 215. The changes, which take place in the formation of the construct, affect

1. The endings for gender and number.

2. The final syllable of nouns, which are without these endings.

3. The syllable preceding the accent.

§ 216. The following changes occur in the endings for gender and number, viz:

1. The feminine ending ה_ is changed to ת_, שִׁפְחָה *handmaid* const. שִׁפְחַת; the ending ת remains unchanged, מִשְׁמֶרֶת *observance* const. מִשְׁמֶרֶת.

a. The explanation of this appears to be that the construct state retains the old consonantal ending ת_, the close connection with the following

noun preserving it as if in the centre of a compound word, § 55. 2. *c*; whereas in the isolation of the absolute state, the end of the word is more liable to attrition and the consonant falls away.

b. Some nouns in ־ָה preceded by Kamets adopt a Segholate form in the construct, מַמְלָכָה *kingdom* const. מַמְלֶכֶת instead of מַמְלְכַת § 61. 1. *b*, מִמְשָׁלָה *dominion* const. מֶמְשֶׁלֶת, מְלָאכָה *work* const. מְלֶאכֶת, מֶרְכָּבָה *chariot* const. מֶרְכֶּבֶת, צְעָרָה *crown* const. צַעֲרַת, לַהֲבָה *flame* const. לַהֲבַת, עֲשָׂרָה *ten* const. עֲשֶׂרֶת, or with the Seghols changed to Pattahhs under the influence of a guttural, מִשְׁפָּחָה *family* const. מִשְׁפַּחַת, אַרְבָּעָה *four* const. אַרְבַּעַת; so חֲבִלָּה *fig-cake* const. חֲבִלַּת; אִשָּׁה *woman*, though it occurs in the absolute, Deut. 21: 11, 1 Sam. 28: 7, Ps. 58: 9, is mostly used as the construct of אֵשֶׁת. On the other hand, חֵמָה *bottle* has in the construct חֲמַת Gen. 21: 14 (the accent thrown back by § 35. 1) as if from חֲמָאָה; מָנָה *portion* const. מְנָת.

2. The ending ־ִים of the masculine plural and ־ַיִם of the dual are alike changed to ־ֵי, עַמִּים *nations* const. עַמֵּי, קַרְנַיִם *horns* const. קַרְנֵי; ־וֹת of the feminine plural suffers no change קֹלוֹת *voices* const. קֹלוֹת.

a. In a very few instances the vowel ending of the masculine plural construct is added to feminine nouns בָּמָתֵי (the accent invariably thrown back by § 35. 1), commonly in the K'thib במות־ const. of בָּמוֹת *high-places*, מְרֹאֲשֵׁי 1 Sam. 26: 12; this takes place regularly before suffixes, § 219. 2.

§ 217. 1. In a mixed final syllable Kamets is commonly shortened to Pattahh: so is Tsere when preceded by Kamets; other vowels remain without change, יָד *hand* const. יַד, מוֹשָׁב *seat* const. מוֹשַׁב, צַוָּאר *neck* const. צַוַּאר, זָקֵן *old* const. זַקַן, לֵב *heart* const. לֵב, גִּבּוֹר *mighty man* const. גִּבּוֹר.

a. Kamets remains in the construct of אוּלָם *porch*, כָּתָב *writing*, מַתָּן *gift*, עָב *cloud* (once const. עַב Ex. 19: 9), פִּתְגָם *decree* and יָם *sea*, e. g. יַם־הַמֶּלַח *sea of salt*, except in the phrase יַם סוּף *sea of weed*, i. e. *Red Sea*; so too in יָתֵר *portion*, and קָצֶה *end*, which are contracted from ל״ה roots, § 213. *a*; חָלָב *milk* becomes חֲלַב, and לָבָן *white* לִבְנֵי Gen. 49: 12 in the construct.

b. Tsere remains in חֹמֶשׁ *fire* const. חֹמֶשׁ, יֵוֵן *mire* const. יֵוֵן, נְפֶחַ *breathing* const. נְפַח, עֵקֶב *heel* const. עֲקַב, in the ע״ע derivative מָגֵן *shield* const. מָגֵן and in אָבֵל found in several proper names. It is occasionally shortened to Seghol before Makkeph in אֲבֵל *mourning* const. אֲבֵל־, אֵת *time* const. עֵת, עֵת־ and עֶת־, שֵׁם *name* const. שֵׁם־ and שֶׁם־; בֵּן *son*, which in the absolute retains Tsere before Makkeph, Gen. 30: 19, Ezek. 18: 10, has in the construct בֶּן, בֶּן־ or בֵּן־. Tsere is shortened to Pattahh in a few cases not embraced in the rule, viz.: קֵן *nest* const. קַן. שֵׁבֶט *rod* const. שַׁבַּט and שַׁבָּט, אֹבֵד Deut. 32: 28 *perishing* const. of אֹבֵד, the Kal participles of Lamedh guttural verbs, § 126. 1, and the following nouns with prefixed מ

in several of which a preceding Pattahh is likewise changed to Hhirik, § 192. *a*, מַעֲשֵׂר *tithe* const. מַעֲשַׂר, מִסְפֵּד *mourning* const. מִסְפַּד, מַפְתֵּחַ *key* const. מַפְתַּח and מִפְתָּח, מַרְבֵּץ *lair* const. מִרְבַּץ, מִרְזֵחַ *clamour* const. מִרְזַח, מַשְׁבֵּר *matrix* const. מִשְׁבַּר, מַשְׁחֵת *corruption* const. מִשְׁחַת, מִזְבֵּחַ *altar* const. מִזְבַּח.

c. Hholem is shortened to Kamets-Hhatuph before Makkeph in the construct of monosyllables from ע״ע roots, חֹק *statute* const. חֹק and חָק, rarely in other words גְּדֹל־ Prov. 19: 19, Ps. 145: 8, Nah. 1: 3 (in the last two passages the K'thibh has גדול), טְהָר־ Job 17: 9, Prov. 22: 11, קִנְיַן־ Ex. 30: 23, שְׁלָשׁ־ Ex. 21: 11; this becomes Pattahh before the guttural in גְּבַהּ־ for construct of גָּבֹהַּ *high*. כָּל *kŏl* construct of כֹּל *all* occurs twice, viz.: Ps. 35: 10, Prov. 19: 7, without a Makkeph following, § 19. 2. *b*; it must not be confounded with כָּל *kāl* Isa. 40: 12 *he comprehended* pret. of כּוּל.

d. The termination ־ִי becomes ־ֵי in the construct, § 57. 2 (5), דַּי *enough* const. דֵּי, חַי *life* const. חֵי.

e. Three monosyllabic nouns form the construct by adding a vowel, אָב *father* const. אַב Gen. 17: 4, 5, elsewhere אֲבִי, אָח *brother* const. אֲחִי, רֵעַ *friend* const. רֵעֵהּ 2 Sam. 15: 37, 1 Kin. 4: 5, or רֵעֶהָ 2 Sam. 16: 16, Prov. 27: 10 K'thibh. These may be relics of the archaic form of the construct, § 222, or the monosyllables may be abridged from ל״ה roots, § 187. 2. *d*.

2. In a simple final syllable ־ֶה is changed to ־ֵה, שֶׂה *sheep* const. שֵׂה, רֹעֶה *shepherd* const. רֹעֵה, שָׂדֶה *field* const. שְׂדֵה; other vowels remain unchanged.

a. This is an exception to the general law of shortening, which obtains in the construct. It has, perhaps, arisen from the increased emphasis thrown upon the end of the word, as the voice hastens forward to that which is to follow. In like manner the brief and energetic imperative ends in Tsere in ל״ה verbs, while the future has Seghol, § 170. *c*. An analogous fact is found in the Sanskrit vocative. The language of address calls for a quick and emphatic utterance; and this end is sometimes attained by shortening the final vowel, and sometimes by the directly opposite method of lengthening it. Bopp Vergleich. Gramm. § 205.

b. פֶּה *mouth* has פִּי in the construct.

c. Nouns ending in quiescent א preserve their final vowel unchanged in the construct, יָרֵא *fearing* const. יְרֵא, צָבָא *host* const. צְבָא.

§ 218. 1. Kamets and Tsere are commonly rejected from the syllable preceding the accent, מָקוֹם *place* const. מְקוֹם, שָׁנָה *year* const. שְׁנַת, שָׁנִים *years* const. שְׁנֵי, אוֹצָרוֹת *treasures* const. אוֹצְרוֹת, יָדַיִם *hands* const. יְדֵי, לֵבָב *heart* const. לְבַב, חֵמָה *wrath* const. חֲמַת.

a. Kamets preceding the accented syllable is retained (1) when it has arisen from Pattahh before a guttural in consequence of the omission of Daghesh-forte, חָלָשׁ (for חַלָּשׁ) *workman* const. חָלַשׁ, פָּרָשׁ (פַּרָשׁ) *horseman*

const. פָּלַשׁ, פָּלֶשׁ (פְּלֶשֶׁת) *vail* const. פְּלֶכֶת, פָּלָה (צָלָה) *dist. ess* const. צְלַת; (2) in words from ע״י and ל״י roots, עָרִים (from עִיר) *cities* const. עָרֵי, בָּאִים (from בּוֹא) *coming* const. בָּאֵי; so likewise where Kamets quiesces in א, רָאשִׁים *heads* const. רָאשֵׁי; (3) under מ prefixed to ע״ע roots, מָסָךְ (from סָכַךְ) *covering* const. מָסַךְ, מָגֵן (from גָּנַן) *shield* const. מָגֵן, מָעוֹז (from עָזַז) *fortress* const. מָעוֹז; (4) in לה derivatives of the form גָּלוּת (from גָּלָה) *exile* const. גָּלוּת, הֲגוּת *meditation* const. הֲגוּת. (5) in the construct dual and plural of triliteral monosyllables or Segholates from ל״א and ל״ה roots, לְחָיַיִם (from לְחִי) *cheeks* const. לְחָיַי, גְּדָיִם (from גְּדִי) *kids* const. גְּדָיֵי, חֲטָאִים (from חֵטְא) *sins* const. חֲטָאֵי; (6) in the following nouns in most of which it stands immediately before or after a guttural, § 60. 3. *c*, אָלָה *curse*, מְעָרָה *cave*, תְּעָלָה *conduit*, and the plurals, קְרָבַיִם, חֲדָשֵׁי, רוּחֲצֵי Lev. 7: 38, צְפָצְפֵי, מְוֹצְאֵי, מְוֹשָׁבֵי, מַעֲלֵי, מַבָּחֵי 2 Kin. 12: 8, מַיְטַבֵּי Ezek. 27: 9, מִתְקְרֵי Job 34: 25, עֲבָרֵי Eccles. 9: 1, תְּוֹשָׁבֵי.

b. Tsere is retained in words in which it quiesces in the vowel-letters א or י, רֵאשִׁית *beginning* const. רֵאשִׁית, הֵיכָל *temple* const. הֵיכַל, and in addition in the following, אֵבוּס *crib*, אֵזוֹר *girdle*, אֵטוּן *thread*, נֵכָר *foreign land* const. נִכְרֵי, אֵבֶדָה *loss* const. אֲבֵדַת, so אֲפֵלָה Isa. 58: 10 *darkness*, בְּרֵכָה *pool*, גְּזֵלָה *robbery*, גְּנֵבָה Ex. 22: 2 *theft*, מַגֵּפָה *plague*, מַהֲפֵכָה *overthrow*, מְכֵרָה Gen. 49: 5 *sword*, מַסֵּכָה *molten-image*, מְרֵרָה Job 16: 13 *gall*, עֲרֵמָה *heap*, צֹאָה *excrement*, תְּאֵנָה *fig-tree*, תַּרְדֵּמָה *deep sleep*, and the plurals אֲבֵלֵי *mourning* from אֲבֵלִים (אָבֵל), so חֲמֵצֵי *desiring*, יְשֵׁנֵי *sleeping*, עַמֵּחֵי and שְׂמֵחֵי *rejoicing*, שְׁכֵחֵי *forgetting*, זְאֵבֵי *wolves* from זְאֵבִים (זְאֵב); יְגֵעִים *weary* becomes יְגִיעֵי in the construct, and פְּלֵטֵי *escaped* פְּלֵטִים. Tsere also remains in the const. זֵעַת *sweat*, מֵתֵי from מֵת *dead*, עֵדֵי from עֵד *witness*, which are from ע״ו roots, and רֵעֵי, רֵעֵה from רֵעַ *friend*, root רָעָה.

c. Hholem is rejected from the syllable before the accent in אַרְמְנוֹת const. pl. of אַרְמוֹן *palace*, אֶשְׁכְּלוֹת and אֶשְׁכְּלֹת const. pl. of אֶשְׁכֹּל *cluster*, תְּאוֹמֵי Cant. 4: 5 and תְּאַמֵּי Cant. 7: 4 *twins*, בָּמֳתֵי from בָּמוֹת *high-places*, see § 216. 2. *a*; it is changed to *ū* in מַטְמֻנֵי from מַטְמוֹנִים *treasures*, comp. § 88.

d. Medial Vav and Yodh, though they may retain their consonantal power in the absolute, quiesce in Hholem and Tsere in the construct, תְּוֹךְ *midst* const. תּוֹךְ, קְשׂוֹת *cups* const. קְשׂוֹת, בַּיִת *house* const. בֵּית, עֲלוֹת *fountains* const. עֲלוֹת, גֵּיא *valley* const. גֵּיא, pl. גְּאָיוֹת, § 210. 3. *c*, const. גֵּיאוֹת Ezek. 35: 8. Exceptions are rare, עֵיל (according to Kimchi and Baer עֵיל) Ezek. 28: 18 *iniquity*, מְדָנֵי Prov. 19: 13 *contentions*, צַוָּאר *neck* const. צַוַּאר and צַוְּארֵי, עָוֹן *iniquity* const. עֲוֹן.

e. A few nouns of the forms קָטֶל, קָטֶל, קֶטֶל have קֶטֶל or קָטֶל in the construct instead of קִטַּל, § 61. 1. *b*, גֶּדֶר *wall* const. גֶּדֶר, גָּזֵל *robbery* const. גָּזֵל, יֶרֶךְ *thigh* const. יֶרֶךְ, כָּבֵד *heavy* const. כְּבַד and כֶּבֶד, כָּתֵף *shoulder* const. כֶּתֶף, עֵרֶל *uncircumcised* const. עֲרַל and עֶרֶל, עָשָׁן *smoke* const. עֲשַׁן and עֶשֶׁן, צֶלַע *side* const. צַלַע and צְלַע; אֹרֶךְ *long* is only found in the construct, the corresponding absolute was probably אָרַךְ; כּוֹבַע *helmet* simply shifts its accent in the construct, כּוֹבַע. On the other hand, while most Segholate nouns suffer no change in the construct, a few adopt the form קָטֶל, חֶדֶר *chamber* const. חֲדַר, זֶרַע *seed* const. once זַרְעִי Num. 11: 7 else-

where זֶרַע, גֶּפֶן *plant* const. גֶּפֶן, שֶׁגֶר *fœtus* const. שֶׁגֶר, שֶׁבַע *seven* const. שֶׁבַע, תֵּשַׁע *nine* const. תֵּשַׁע; in like manner הֶבֶל *vanity* const. הֶבֶל.

2. When this rejection occasions an inadmissible concurrence of vowelless consonants at the beginning of a syllable, § 61. 1, it is remedied by inserting a short vowel between them, commonly Hhirik, unless it is modified by the presence of gutturals, צִלְצַל *tinkling* const. צִלְצַל for צְלָצַל, דִּבְרִים *words* const. דִּבְרֵי for דִּבְרֵי, צְדָקָה *righteousness* const. צְדָקַת, pl. צְדָקוֹת const. צְדָקוֹת, בְּהֵמָה *beast* const. בְּהֵמַת, חֲכָמִים *wise* const. חַכְמֵי. In the construct plural and dual of Segholates, however, the vowel is frequently regulated by the characteristic vowel of the singular which has been dropped, comp. § 210. 2, מְלָכִים from מֶלֶךְ (מלכ) *kings* const. מַלְכֵי, שְׁבָטִים (שֵׁבֶט) *tribes* const. שִׁבְטֵי, גָּרְנוֹת (גֹּרֶן) *threshing-floors* const. גָּרְנוֹת, חֲרָפוֹת (חֶרְפָּה) *reproaches* const. חֶרְפּוֹת, דַּלְתַיִם (דֶּלֶת or דַּלְתּ) *folding doors* const. דַּלְתֵי; yet not invariably שְׁעָלִים (שֹׁעָל) *handfuls* const. שַׁעֲלֵי, שֹׁקֶת *trough* (pl. שְׁקָתוֹת) const. שִׁקְּתוֹת.

a. When in the construct plural the introduction of a new vowel is demanded by the concurrence of consonants, the syllable so formed is an intermediate one, so that the following Sh'va is vocal, and the next letter, if an aspirate, does not receive Daghesh-lene, thus, גִּלְגֲלֵי, גַּלְגַּלִּים, חֲרָבוֹת not חָרְבוֹת etc. § 22. *a.* 3. Exceptions are infrequent as אֲשֻׁדּוֹת Deut. 3: 17, חַסְדֵּי Lam. 3: 22 (in some editions) but חַסְדֵי Ps. 89: 2, חֶרְפּוֹת Ps. 69: 10, טַרְפֵּי Ezek. 17: 9, צִמְּדֵי Isa. 5: 10, רִשְׁפֵּי Cant. 8: 6 but רִשְׁפֵי Ps. 76: 4; so with grave suff. כַּסְפֵּיהֶם Gen. 42: 25, 35, נִסְבֵּיהֶם Lev. 23: 18 and in some editions מַשְׁחִתֵּיהֶם Neh. 4: 7. In a few instances Daghesh-forte separative is inserted to indicate more distinctly the vocal nature of the Sh'va, § 24. 5, חַלְּבוֹת Isa. 57: 6, עִבְּרִי Lev. 25: 5, עֲבֹדֵי Isa. 58: 3, עִקְּבוֹת Gen. 49: 17, עִקְּבוֹת Ps. 89: 52, עִשְּׁבוֹת Prov. 27: 25, or compound Sh'va is taken instead of simple for the same reason, שְׁקָתוֹת Gen. 30: 38. The presence or absence of Daghesh-lene in the dual construct depends upon the form of the absolute, thus שִׂפְתַי from שְׂפָתַיִם *lips* but בִּרְכֵי from בִּרְכַּיִם *knees*. When the concurring consonants belong to different syllables a new vowel is not needed between them; one is sometimes inserted, however, after a guttural, מַעֲרָבֵי, מַחֲשָׁבוֹת but מַעַרְבוֹת. In the opinion of Ewald מְקַדְּשֵׁי Ezek. 7: 24 is for מְקָדְּשֵׁי from מְקַדְּשִׁים, and מְקַצַּעְתּ Ex. 26: 23, 36: 28 for מְקֻצַּעְתּ; they may be better explained, however, as Piel and Pual participles.

b. The second syllable before the accent rarely undergoes any change. In a very few instances Seghol becomes Hhirik or Pattahh, the pure vowels

being reckoned shorter than the diphthongal, comp. § 212. *e.* מֶרְכָּבָה *chariot* const. מַרְכֶּבֶת. The changes in לֶהָבָה *flame* const. לַהֶבֶת pl. לְהָבוֹת const. לַהֲבוֹת, גֶּחָלִים *coals* const. גַּחֲלֵי are due to the influence of the proximate vowels, § 63. 1; those in חִזָּיוֹן *vision* const. חֶזְיוֹן, כֻּתֹּנֶת *coats* const. כְּתֹנֶת are consequent upon the dropping of Daghesh-forte, § 61. 5; that in אָהָלִים (from אֹהֶל) *tents* const. אָהֳלֵי arises from the conversion of a simple into an intermediate syllable, § 18. 3.

Nouns with Suffixes.

§ 219. The pronominal suffixes, whose forms are given § 72, are appended to nouns in the sense of possessive pronouns, יָד *hand*, יָדִי *my hand*, etc. They suffer, in consequence, the following changes, viz:

1. Of the suffixes, which begin with a consonant, ךָ, כֶם, כֶן of the second person are connected with nouns in the singular by a vocal Sh'va, נוּ of the first person plural and ךְ of the second fem. singular by Tsere, and הוּ, הָ, ם, ן of the third person by Kamets; הָ֫ is invariably contracted to וֹ, rarely written ה֑, § 62. 1, and הָ֫ to ה֫, § 101. 2.

a. There is one example of a noun in the construct before the full form of the pronoun, יְמֵי הִיא *her days* Nah. 2: 9; but this is best explained as an abbreviated relative clause *the days* that *she* has existed.

b. First person: נוּ is in a few instances preceded by Kamets, מִמֶּנּוּ Ruth 3: 2, קִרְבָּנוּ Job 22: 20.

Second person. The final vowel of ךָ is occasionally expressed by the vowel letter ה, יָדָהּ Ex. 13: 16, בְּשָׂרָהּ Jer. 29: 25. In pause the Sh'va before ךְ becomes Seghol, § 65, עִבְדֵּךְ Gen. 33: 5, נַפְשֵׁךְ Ps. 139: 5, or Kamets may be inserted as a connecting vowel, particularly after nouns in ה֫, whereupon the final Kamets is dropped to prevent the recurrence of like sounds, חֶנְגֵּךְ Ps. 53: 6. In the feminine the connecting vowel *e* is rarely written י, עֲשָׂיתִיךְ Ezek. 5: 12; י֫, which belongs to the full form of the pronoun, § 71. *a* (2), is sometimes added to the suffix, יָדֵ֫כִי Jer. 11: 15, בְּחוֹלָבִי Ps. 116: 19, נִשְׁרֵ֫כִי 2 Kin. 4: 7 K'thibh, where the K'ri has נִשְׁלֶ֫ךָּ. Sometimes the distinction of gender is neglected in the plural and כֶם is used in place of the feminine כֶן, אֲבִיכֶם Gen. 31: 9, אֲזְנֵכֶם, בְּנוֹתֵיכֶם Jer. 9: 19; ה֫ is sometimes added to the feminine suffix as to the full pronoun, זְמֹרָתֶ֫נָּה Ezek. 23: 49.

Third person. The connecting vowel before הוּ and הָ is occasionally *e*, לְבִרְיָתֵהוּ Gen. 1: 12, פִּילַגְשֵׁהוּ Judg. 19: 24, מִשָּׁהוּ Nah. 1: 13, אוֹרְחֵהוּ Job 25: 3, so רֵעֵהוּ from רֵעַ and מֵרֵעֵהוּ from מֵרֵעַ and frequently with nouns in ה֫,

מַרְאֵהוּ and מַרְאֵהָ from מַרְאֶה, עָשְׂתָהוּ from עָשְׂתָה, מַחֲנֵהוּ, קְצֵהוּ; *e* does not occur before the plural ם unless it is represented by the vowel-letter י in מִזְבְּחוֹתֵיכֶם 2 Chron. 34: 5 K'thibh, where the K'ri has מִזְבְּחוֹתָם; it is once found in the fem. plural קִרְבֵּנָה Gen. 41: 21. The form ה in the masc. sing. is commonly reckoned an archaism, אֲהֵבָה Gen. 12: 8, שִׁירָה Ps. 42: 9, כָּפָּה Jer. 2: 21, so several times in the K'thibh שירה, כותה Gen. 49: 11, בעירה Ex. 22: 4, כסיתה Ex. 22: 26, נסכה Lev. 23: 13, שִׁלֵּשָׁה 2 Kin. 9: 25, תביאתה Ezek. 48: 18, where the K'ri in each instance substitutes וֹ. In a few instances the consonant is rejected from the feminine, ה being retained simply as a vowel-letter; where this occurs it is commonly indicated in modern editions of the Bible by Raphe, שְׁעָלָה Lev. 13: 4, חֲטָאָה Num. 15: 28, or by a Massoretic note in the margin, אֲהֵנָה Isa. 23: 17. 18 for אֶתְנַנָּה; once א is substituted for ה, כָּלְאָא Ezek. 36: 5. The longer forms of the plural suffixes הֶן, הֶם are rarely affixed to nouns in the singular, לְבַבְהֶן Gen. 21: 28, מִגְּבַהֶּן Ezek. 13: 17, שָׁבוּתְהֶן Ezek. 16: 53, or with the connecting vowel Kamets, כָּנָפָם 2 Sam. 23: 6, or with ה֫ appended, כָּנָפָהּ 1 Kin. 7: 37, תּוֹלָחָנָה Ezek. 16: 53. The vowel ה֫ is also sometimes added to the briefer form of the fem. plural, לְבָנָהּ Gen. 21: 29, כְּנָפָהּ Gen. 42: 36. The distinction of gender is sometimes neglected in the plural, ם or הֶם being used for the feminine, כָּנָפָם Cant. 4: 2, 6: 6 for כְּנָפֶן, יְדֵיהֶם Job 1: 14 for יְדֵיהָן.

c. The nouns אָב *father*, אָח *brother*, פֶּה *mouth* take the ending י֫ before suffixes, as they do likewise in the construct state, אֲבִיכֶם, אֲבִיהֶם; so too חָם *father-in-law* חֲמִיהָ, חֲמִיהּ; י֫ of the first person coalesces with this vowel, אָבִי, אָחִי, פִּי and הוּ of the third person, commonly becomes וֹ § 62. 2, אָבִיו, אָחִיו, פִּיו more frequent than אֲבִיהוּ, אֲחִיהוּ, פִּיהוּ. In גּוֹי Zeph. 2: 9 the vowel-letter י of the first person suffix is dropped after the final י of the noun.

2. The masculine plural termination ִים and the dual ַיִם are changed to ֵי before suffixes as in the construct state; the same vowel is likewise inserted as a connective between suffixes and feminine plural nouns § 216. 2. *a*. This ֵי remains unchanged before the plural suffixes; but before ךָ the second masc. singular and הָ third fem. singular it becomes ֶי, and before the remaining suffixes the diphthongal vowel is resolved into ַי, which combined with י the first singular forms ָי, with ךְ the second feminine ַיִךְ, and with הוּ the third masculine ָיו, § 62. 2.

a. In a very few instances suffixes are appended to feminine plurals without the vowel ֵי or its modifications, הַחֲלֹתַי 2 Kin. 6: 8 for חֲלָתַי, יְרֹתָי Ps. 132: 12 for יְרָתַי, כַּכֹּתְךָ Deut. 28: 59 for כַּכֹּתֶךָ, מִבֹּתֶיהָ, אֲחֹתֵיהֶם Ezek. 16: 52 for אֲחָיוֹתַיִךְ, אֲבֹתָם and אֲבֹתֵיהֶם, אוֹתָם Ps. 74: 4, חַשֹּׁאתָם, תַּרְכֹּתָם, מִזְבְּחֹתָם, מִצְּבֹתָם. On the other hand, suffixes proper to plural nouns are occasionally

appended to feminine nouns in the singular, perhaps to indicate that they are used in a plural or collective sense, חֲבָשָׁתִי Lev. 5: 24, תְּחִתָּתִי Ps. 9: 15, שְׂנָאָתִי Ezek. 35: 11, עֲצָתֵךְ Isa. 47: 13.

b. The vowel-letter י is not infrequently omitted after plural and dual nouns, דְּרָכֹךְ Ex. 33: 13 for דְּרָכָיִךְ, יְדֵכֶם Ps. 134: 2 for יְדֵיכֶם, מִירוּ Ex. 32: 19 K'thibh (K'ri מָיְרוּ), עִבְרוּ 1 Sam. 18: 22 K'thibh (K'ri עֻבְדָי), גְּוִיֹּתֵם Gen. 10: 5 for גְּוִיֵּיהֶם, חֶלְבֹּהֵן Gen. 4: 4 for חֶלְבֵּיהֶן.

c. Second person. The vowel ֶ remains unchanged before the fem. sing. ךְ in אַשֶּׁרֶךְ Eccl. 10: 17 and with ה appended מַלְאֲכָתֶהּ: Nah. 2: 14. Sometimes, as in the full pronoun, ִי is appended to the fem. sing. suffix and ה to the plural, תַּחְלוּאֵיכִי: Ps. 103: 3, תַּיְרֵכִי: ver. 4, כְּסָתְרוֹתֵיכִנָּה Ezek. 13: 20.

Third person. The uncontracted form of the masc. sing. יהוּ occurs in גְּבוֹלֵיהוּ Nah. 2: 4 for גְּבוּלָיו, יָלֵיהוּ Hab. 3: 10, עִילֵּיהוּ Job 24: 23; *ēhū* = *aihu* by transposition of the vowels becomes *auhi* = *ōhī* וֹהִי which is found once הַגְּבוּלֹהִי Ps. 116: 12, and is the ordinary form of this suffix in Palestine Aramaeic. The final *a* of the fem. sing. is once represented by א, אַתִּילָתָא Ezek. 41: 15. In a few instances ה is appended to the plural of either gender, אֲלֵיהֶנָּה Ezek. 40: 16, גְּוִיֹּתֵיהֶנָּה Ezek. 1: 11, and וּ to the abbreviated masc. אֲלֵיהֵמוֹ, ם Deut. 32: 37, זְבֹחֵימוֹ ver. 38, כַּפֵּימוֹ Job 27: 23, פָּנֵימוֹ Ps. 11: 7.

3. The suffixes thus modified are as follows, viz.:

Appended to	SINGULAR.					PLURAL.				
	1 *c.*	2 *m.*	2 *f.*	3 *m.*	3 *f.*	1 *c.*	2 *m.*	2 *f.*	3 *m.*	3 *f.*
Sing. Nouns	ִי	ְךָ	ֵךְ	וֹ	ָהּ	ֵנוּ	ְכֶם	ְכֶן	ָם	ָן
Dual and Plur. Nouns	ַי	ֶיךָ	ַיִךְ	ָיו	ֶיהָ	ֵינוּ	ֵיכֶם	ֵיכֶן	ֵיהֶם	ֵיהֶן

§ 220. Certain changes likewise take place in nouns receiving suffixes, which arise from the disposition to shorten words, which are increased at the end, § 66. 2. These are as follows, viz.:

1. The grave suffixes, § 72, כֶם, כֶן, הֶם, הֶן shorten the nouns, to which they are attached, to the greatest possible extent. Before them, therefore, nouns of both genders and all numbers take the form of the construct, לֵב *heart*, לְבַבְכֶם *your heart*, לִבָּם *their hearts*; שָׂפָה *lip* du. שִׂפְתַיִם pl. שִׂפְתוֹתֵיהֶם *their lips*.

a. דָּם *blood* becomes דִּמְּכֶם and יָד *hand* יֶדְכֶם, §§ 58. 2, 63. 2. *a*.

2. Feminine nouns, both singular and plural, take the construct form before the light suffixes likewise, with

the exception that in the singular the ending תַ becomes תָ in consequence of the change from a mixed to a simple syllable, § 59, שָׂפָה *lip*, שְׂפָתוֹ *his lip*, שְׂפָתָם *their lip*, שְׂפָתוֹתֶיךָ *thy lips*, שְׂפָתוֹתָיו *his lips*.

a. If the construct has a Segholate form it will experience the change indicated in 5, מַכָּלֶת const. מֶכֶּשֶׁלֶת suf. מַכַּשַׁלְתּוֹ. If two consonants have coalesced in the final letter, it will receive Daghesh-forte agreeably to 6, בַּתּוֹ from בַּת, אַמָּתוֹ from אָמָה, בְּעַטְּתָךְ 1 Sam. 16: 15 from the fem. of בַּעַל, § 207. *b*.

b. In a few exceptional instances the absolute form is preserved before suffixes, נִבְלָתִי Isa. 26: 19 from נִבְלָה but נִבְלָתָהּ, נִבְלָתוֹ; רָפְתִּי Cant. 2: 10 from רָפָה const. רַפַּת; so אַלָּתִי, גְּדֵרָתִיו, חֲתֻרָתִיו, שֶׁבְעָתֵיכֶם but const. שִׁבְעַת, comp. מֵעֶיהֶם const. מְעֵי.

3. Masculine nouns, both singular and plural, on receiving light suffixes take the form which they assume before the absolute plural termination, לֵבָב *heart*, לִבִּי *my heart*, לִבֵּךְ *thy heart*, לִבֵּינוּ *our hearts*.

a. Tsere in the ultimate is shortened to Hhirik or Seghol before הָ, כֶם, כֶן, e. g. בִּנְהָּ, מִקְדָּשְׁכֶם, מַלְכֶּכֶם, or with a guttural to Pattahh, אַחֲרִיתָהּ, גְּאֻלָּתָם, though with occasional exceptions, אַבְנֵיטָהּ Isa. 22: 21, שׁוֹלֵחָהּ 1 Sam. 21: 3, כְּסָאֵי from כִּסֵּא. Before other suffixes it is rejected from some monosyllables, which retain it in the plural, שְׁמוֹ from שֵׁם plur. שֵׁמוֹת, בְּנוֹ from בֵּן plur. בָּנִים but גּוֹי, גּוֹיִךְ, רֵעִי, רֵעֵהָ, חֲמָנֶיהָ Ezek. 5: 7 from חָמוֹן is exceptional.

4. Dual nouns retain before light suffixes the form which they have before the absolute dual termination, שְׂפָתַי *my lips*, שְׂפָתֵינוּ *our lips*, אָזְנַי *my ears*, אָזְנֵינוּ *our ears*; קַרְנַיִם and קְרָנַיִם *horns*, קַרְנָיו and קְרָנָיו *his horns*.

5. Segholate nouns in the dual and plural follow the preceding rules, but in the singular they assume before all suffixes, whether light or grave, their original monosyllabic form as before the feminine ending הָ, § 210, מֶלֶךְ *king*, מַלְכִּי *my king*, מַלְכָּכֶם *your king*; אֹזֶן *ear*, אָזְנִי *my ear*; in like manner יוֹנֶקֶת *sucker*, יוֹנַקְתּוֹ *his sucker*.

a. Tsere in the first syllable of Segholates is commonly shortened to Hhirik before suffixes, § 210. 2, but if the first radical be ח or ע it usually becomes Seghol e. g. חֵלֶב, חֶלְבּוֹ; עֵגֶל and עֵבֶר retain the Seghol of the first syllable. Hholem is commonly shortened to *ŏ*, but in a few instances to *ŭ*, קָמְצוֹ, גְּדֵלּוֹ and גָּדְלוֹ; חֹטֶן, חָטְנוֹ and נֹכַח irregularly take Hhirik before וֹ 3 pers. suf. חִצְנוֹ but חָצְנוֹ. When the middle radical is a guttural it takes

compound instead of simple Sh'va before suffixes, which before הָ and כֶם is changed into the corresponding short vowel, נַעֲרָהּ, נַעֲרָכֶם. When the first radical has Hholem in the absolute, Hhateph-Kamets or Kamets-Hhatuph is sometimes given to the second radical before suffixes, פָּעֳלִי and פָּעָלִי from פֹּעַל, חָמְכָה Hos. 13: 14, with Daghesh-forte separative, חָמְכָּי Ezek. 26: 9, חָמָכְתָּ 1 Kin. 12, 10, כָּבְלִי Isa. 9: 3, סָבְבִי Jer. 4: 7; בֶּגֶד *garment* has בִּגְדִי, בִּגָדִי instead of בִּגְדִי, בִּגְדוֹ.

b. Middle Yodh and Vav mostly quiesce in *ē* and *ō* before suffixes, עֵינִי from עַיִן *eye*, מוֹתִי from מָוֶת *death;* but עִירִי Gen. 49: 11 from עַיִר *young ass*, שִׁירִי Isa. 10: 17 from שַׁיִת *thorn*, עֲוֹנִי Ezek. 18: 26, 33: 13 from עָוֶל *iniquity*. Final Yodh, which quiesces in the abs. sing. resumes its consonant character before suffixes פָּרְיִי from פֶּרִי, חָלְיִי from חֳלִי; so Vav שַׁלְוִי, בַּדְיוֹתָם.

c. Triliteral monosyllables sometimes shift their vowel from the second radical to the first, thus assuming the same form with Segholates, comp. § 186. *a*, רִבְשִׁי from רִבֵּשׁ, הֶבְלִי from הֶבֶל, but כַּלְתִּי from כָּלָה; כָּלְתָּה from כָּלַי; פֶּרְיָהּ, פִּרְיָהּ, פִּרְיָם, פֶּרְיָם but פִּרְיָהֶם from פְּרִי; שִׁבְתִּי from שֶׁבֶת; שָׁבְתָּה but שִׁבְרָם from שִׁבֵּר. By a like transposition עִנְּבָם Ezek. 36: 8 is for עִנְבָּם from עֲנָבָה.

d. The noun אֶשֶׁר *blessedness*, which only occurs in the plural construct and with suffixes, preserves before all suffixes the construct form, אַשְׁרֵי, אַשְׁרֵיהָ not אַשְׁרֶיהָ, אַשְׁרָיו.

6. Nouns in whose final letter two consonants have coalesced, or which double their final letter in the plural, § 209. 2, receive Daghesh-forte likewise before suffixes, the vowel of the ultimate being modified accordingly, עָדֵי and עָדַי from עֹד (root עָדָה), בִּתָּם from בַּת (בְּנוֹת), אֲתֹנָהּ from אָתוֹן (pl. אֲתֹנוֹת).

a. אֶשֶׁב *lattice*, כַּרְמֶל *garden*, מִשְׂגָּב *refuge*, which do not occur in the plural, take Daghesh-forte before suffixes; שַׁבָּת has in the plural שַׁבָּתוֹת but before suffixes שַׁבַּתֹּתַי, שַׁבַּתְכֶם; בֵּן (root בָּנַן) *base* has בַּנַּי, כַּנַּי. Pattahh becomes Hhirik before the doubled letter as in the fem. and plur., § 209. 2. *a*, in the following from ע"ע roots, חַת *fear*, כַּת *garment* (כַּתּוֹ and כָּתּוֹ), סַף *basin*, פַּת *morsel*, צַד *side*.

b. In a very few instances a final liquid is repeated instead of being doubled by Daghesh, comp. § 209. 2. *a*, חֲרָרִי Jer. 17: 3, חֹרַרִי Ps. 30: 8, חֹרַרְתָּם Gen. 14: 6 from חָרַר; צִלְלוֹ Job 40: 22 and צִלָּיו from צֵל; שָׁחַךְ Ezek. 16: 4 and שָׁרַכְתְּ Cant. 7: 3. Once Daghesh-forte is resolved by the insertion of ו, בָּצָרְתָּה Isa. 23: 11 for בָּצָרָתָּה, § 54. 3.

7. Nouns ending in ה drop this vowel before suffixes as before the plural terminations, § 211. 1, שָׂדֶה *field* שָׂדֵי, שָׂדַי, שָׂדוֹת; בְּהֵמָה *cattle* בְּהֶמְתִּי.

a. The vowel *e* commonly remains as a connecting vowel before suf-

fixes of the third person singular, § 219. 1. *b*; and in a few instances the radical ה is restored, giving to singular nouns the appearance of being plural, עֶשְׂרֵה Isa. 22: 11, מְפַלֵּרָה Hos. 2: 16, נְוֵיהֶם Isa. 42: 5, שֶׂה *sheep* becomes שֵׂיוֹ or שֵׂיהוּ.

§ 221. As the changes produced by the terminations for gender and number, the construct state and suffixes are thus dependent upon the character of the syllables, of which the nouns so affected severally consist, the declension of nouns may be best represented by dividing them according to their syllabic structure. Hence results the following scheme.

A. Masculine Nouns.

Declension 1. Segholates.

Segholates drop their unessential vowel and revert to their primary monosyllabic form in the singular before suffixes; if the second radical is a guttural, it will take compound Sh'va, which before דָּ, כֶם, becomes a short vowel § 220. 5; in the plur. (as other nouns in both numbers) they take with light suffixes the same form as before the abs. plur. ending, with grave suffixes the form of the construct, § 220. 1 and 3. In the plur. abs. they drop their principal vowel and take pretonic Kamets § 210. 3; this too is dropped in the plur. const., which gives rise to a new syllable § 218. 1 and 2. Medial Vav and Yodh quiesce except in the sing. abs. § 210. 3. *c*, 218. 1. *d*, 220. 5. *b*.

Declension 2. Mutable Kamets or Tsere in the penult.

Nouns of this declension may be dissyllables or polysyllables whose first vowels are unchangeable as זָקֵן.

These vowels are dropped in the const. § 218, before fem. and plur. endings, § 212, and suffixes. Kamets in the ultimate and Tsere preceded by Kamets are in the const. sing. changed to Pattahh, § 217. 1, and in the const.

plur. rejected, thus giving rise to a new syllable § 218. 1 and 2.

Declension 3. Kamets or Tsere in the ultimate and no other mutable vowel.

Nouns belonging to this declension may be monosyllables or may have in the penult either a long unchangeable vowel as יוֹצֵר or a short vowel in a mixed syllable as מִזְבֵּחַ. The few words in which Kamets in the ultimate is unchangeable as כָּתָב, בִּינָה, קְצָת § 217. 1. *a* do not belong to this declension.

Kamets becomes Pattahh in the const. sing. § 217. 1, and is dropped in the const. plur. § 218. 1. Tsere commonly becomes ֵ or ֶ before ךָ, כֶם and כֶן, § 220. 3. *a*; it is dropped in the plur. and before light suffixes except from monosyllables, which retain it in the abs. plur., § 209. 1, and sometimes also before light suffixes, § 220. 3. *a*.

Declension 4. With final ה֫ (accented).

These nouns are from ל״ה roots; ה֫ becomes ה֑ in the const. sing., § 217. 2, and is dropped before fem. and plur. endings, § 211, and before light suffixes. Kamets or Tsere in the penult, though rejected in the const., § 218. 1, is retained before fem. and plur. endings, § 212.

Declension 5. Nouns which double their final consonant.

These are mostly from ע״ע roots and shorten their last vowel (if long) before the doubled letter.

a. The first three declensions, as above given, correspond remarkably with the three divisions of Class I of nouns according to their formation, § 184. Declension 1 is identical with the first division. Declension 2 embraces the second division and in addition all other nouns, of whatever class they may be, which have mutable Kamets or Tsere in the penult. Declension 3 embraces the third division and in addition all other nouns which have but one mutable vowel and that a Kamets or Tsere in the ultimate. The two remaining declensions include peculiar forms arising from imperfect roots. Those belonging to 4 are from ל״ה, and a large proportion of 5 are from ע״ע roots. Declension 1 in feminine nouns answers to masc. declension 1; fem. 2 and 3 embrace to a certain extent forms derived from masc. 2 and 3.

B. Feminine Nouns.

Declension 1. The feminines of Segholates.

This embraces the forms קַטְלָה, קִטְלָה, קֻטְלָה, קָטֶלֶת, קָטֹלֶת, which reject their first vowel in the plur. abs. and insert pretonic Kamets §§ 210. 3, 213, which in its turn is rejected in the construct thus causing the return of the original vowel, § 218. 1 and 2. Nouns in ה֫ have ת֫ in the const. sing., § 216. 1, and וֹת in the plur. § 201; before suffixes they take the form of the const. except that they have ת֫ in the sing. before light suffixes § 220. 2.

Declension 2. Nouns in ה֫ with pretonic Kamets or Tsere.

These are rejected in the const. and before suffixes, thus giving rise to a new syllable, if an initial vowelless consonant precedes § 218. 1 and 2.

Declension 3. Nouns with the fem. ending ת.

See §§ 213, 209. 1. *d* and *e*.

These declensions are shown in Paradigms XIV, XV and XVI. Nouns not embraced in these declensions undergo no change in the body of the word, whether in the construct or on receiving fem. and plur. endings or suffixes; they may be represented by סוּס and סוּסָה, which are shown in all the forms that they assume in both numbers and with suffixes in Paradigm XV.

Paragogic Vowels.

§ 222. The termination י֫ or וֹ is sometimes added to nouns in the construct singular, § 61. 6, בְּנִי Gen. 49:11 for בֶּן, מְלֵאָתִי Isa. 1:21 for מְלֵאָת, רַבָּתִי Lam. 1:1 for רַבַּת, מַשְׁפִּילִי Ps. 113:6 for מַשְׁפִּיל, חַיְתוֹ Gen. 1:24 for חַיַּת. This occurs chiefly in poetry and is regarded as an

archaism, § 201. *e*. These vowels for the most part receive the accent, and commonly occasion the rejection of Pattahh or Tsere from the ultimate.

a. Examples of this antique formation of the construct are likewise preserved in proper names, as מַלְכִּי־צֶדֶק *Melchizedek*, מְתוּשֶׁלַח *Methuselah*.

§ 223. 1. The unaccented vowel ה֫ added to nouns indicates motion or direction towards a place, § 201. *e*, צָפוֹנָה *northward*, נֶגְבָּה *southward*, שָׁמַיְמָה *heavenward*, הַבַּיְתָה *to the house, οἰκόνδε* הָהָרָה *to the mountain*, whence it is called He directive or He local. The subsidiary vowel of Segholates is rejected before this ending, § 66. 2 (2) *a*, but other vowels are mostly unaffected, גְּרָנָה from אַרְצָה from אֶרֶץ, מִדְבָּרָה from מִדְבָּר, 1 Kin. 19:15 from the construct state מִדְבַּר.

a. He directive is appended to the adverb שָׁם *there*, שָׁמָּה *thither*, and to the adjective חָלִיל *profane* in the peculiar phrase חָלִילָה *ad profanum* i. e. *be it far from*, etc. It is rarely used to indicate relations of time, יָמִים יָמִימָה 1 Sam. 1: 3 *from days to days* i. e. *yearly*, שְׁלִשֹׁתָה Ezek. 21: 19 *for the third time*, עַתָּה *now* prop. *at (this) time*. For the sake of greater force and definiteness a preposition denoting direction is sometimes prefixed to words, which receive this ending, so that the latter becomes in a measure superfluous, לְמַעְלָה *upwards*, לְמַטָּה *downwards*, כַּמּוּרָחָה 2 Chron. 31: 14 *to the east*, לְשֵׁאוֹלָה Ps. 9: 18 *to Sheol*, comp. *ἀπὸ μακρόθεν*.

b. The ending ה֫ rarely receives the accent מִזְרָחָה Deut. 4: 41; in פַּדֶּנָה אֲרָם it receives in some editions an alternate accent, § 39. 4. *a*, in others the secondary accent Methegh, § 35. 1. In הֶרָה Gen. 14: 10 and פַּדְנָה *a* is changed to *e* before this ending, § 63. 1, in דְּלָתָה Ezek. 25: 13, נֹבָה 1 Sam. 21: 2 the vowel of the ending is itself changed to *e*.

2. Paragogic ה֫ is sometimes appended to nouns, particularly in poetry, for the purpose of softening the termination without affecting the sense, § 61. 6.

Numerals.

§ 224. 1. The Hebrew numerals (שְׁמוֹת הַמִּסְפָּר) are of two kinds, cardinals and ordinals. The cardinals from one to ten are as follows, viz.:

	Masculine.		Feminine.	
	Absol.	*Constr.*	*Absol.*	*Constr.*
One	אֶחָד	אַחַד	אַחַת	אַחַת
Two	שְׁנַיִם	שְׁנֵי	שְׁתַּיִם	שְׁתֵּי
Three	שְׁלֹשָׁה	שְׁלֹשֶׁת	שָׁלֹשׁ	שְׁלֹשׁ
Four	אַרְבָּעָה	אַרְבַּעַת	אַרְבַּע	אַרְבַּע
Five	חֲמִשָּׁה	חֲמֵשֶׁת	חָמֵשׁ	חֲמֵשׁ
Six	שִׁשָּׁה	שֵׁשֶׁת	שִׁשׁ	שֵׁשׁ
Seven	שִׁבְעָה	שִׁבְעַת	שֶׁבַע	שִׁבְעַ
Eight	שְׁמֹנָה	שְׁמֹנַת	שְׁמֹנֶה	שְׁמֹנֶה
Nine	תִּשְׁעָה	תִּשְׁעַת	תֵּשַׁע	תִּשְׁעַ
Ten	עֲשָׂרָה	עֲשֶׂרֶת	עֶשֶׂר	עֶשֶׂר

a. אֶחָד is for אַחָד, § 63. 1. *a*; the Seghol returns to Pattahh from which it has arisen, upon the shortening of the following Kamets in the construct and in the feminine, אַחַת for אַחָדַת, § 54. 2, but in pause אֶחָת; אַחַד occurs in the absolute in Gen. 48: 22, 2 Sam. 17: 22, Isa. 27: 12, Ezek. 33: 30, Zech. 11: 7, and once חַד Ezek. 33: 30. The plural אֲחָדִים is also in use in the sense of *one* or *the same*, Gen. 11: 1, *joined in one* Ezek. 37: 17, or *some*, Gen. 27: 44, 29: 20. Comp. Span. *unos*.

שְׁתַּיִם is for שִׁנתים; for the Daghesh in ת see § 22. *b*; this is once omitted after Daghesh-forte, בִּשְׁתֵּי Judg. 16: 28.

A dual form is given to some of the units to denote repetition, אַרְבָּתַיִם *fourfold*, שִׁבְעָתַיִם *sevenfold*.

שִׁבְעָה occurs once with a paragogic syllable, שִׁבְעָנָה Job 42: 13, and once with a suffix in the form שִׁבְעָתָם 2 Sam. 21: 9 K'ri.

2. In all the Semitic languages the cardinals from *three* to *ten* are in form of the singular number, and have a feminine termination when joined to masculine nouns, but omit it when joined to feminine nouns. The explanation of this curious phenomenon appears to be that they are properly collective nouns like *triad*, *decad*, and as such of the feminine gender. With masculine nouns they appear in their primary form, with feminine nouns, for the sake of distinction, they undergo a change of termination.

a. An analogous anomaly meets us in this same class of words in Indo-

European tongues. The Sanskrit cardinals from *five* to *ten*, though they agree in case with the nouns to which they belong, are in form of the neuter gender and in the nominative, accusative and vocative they are of the singular number. In Greek and Latin they are not declined.

§ 225. The cardinals from *eleven* to *nineteen* are formed by combining עָשָׂר or עֶשְׂרֵה modifications of the numeral *ten* with the several units, those which end in ה preserving the absolute form and the remainder the construct. Thus,

	MASCULINE.	FEMININE.
Eleven	אַחַד עָשָׂר	אַחַת עֶשְׂרֵה
	עַשְׁתֵּי עָשָׂר	עַשְׁתֵּי עֶשְׂרֵה
Twelve	שְׁנֵים עָשָׂר	שְׁתֵּים עֶשְׂרֵה
	שְׁנֵי עָשָׂר	שְׁתֵּי עֶשְׂרֵה
Thirteen	שְׁלֹשָׁה עָשָׂר	שְׁלֹשׁ עֶשְׂרֵה
Fourteen	אַרְבָּעָה עָשָׂר	אַרְבַּע עֶשְׂרֵה
Fifteen	חֲמִשָּׁה עָשָׂר	חֲמֵשׁ עֶשְׂרֵה
Sixteen	שִׁשָּׁה עָשָׂר	שֵׁשׁ עֶשְׂרֵה
Seventeen	שִׁבְעָה עָשָׂר	שְׁבַע עֶשְׂרֵה
Eighteen	שְׁמֹנָה עָשָׂר	שְׁמֹנֶה עֶשְׂרֵה
Nineteen	תִּשְׁעָה עָשָׂר	תִּשַׁע עֶשְׂרֵה

a. There have been many vain conjectures as to the origin of עַשְׁתֵּי, the alternate of אַחַד in the number *eleven*. R. Jona thought it to be an abbreviation for עַד שְׁתֵּי עָשָׂר *next to twelve*. Comp. Lat. *undeviginti, nineteen*. Kimchi derived it from עָשַׁת *to think*, *ten* being reckoned upon the finger, and *eleven* the first number which is mentally conceived beyond. It has how been discovered to be another form of the numeral *one*, of which this is the only trace in Hebrew, but which has been preserved in the Assyrian *istin* = *one*.

חֲמִשָּׁת עָשָׂר *fifteen* occurs Judg. 8: 10, 2 Sam. 19: 18, and שְׁמֹנַת עָשָׂר *eighteen* Judg. 20: 25.

§ 226. 1. The tens are formed by adding the masculine plural termination to the units, עֶשְׂרִים *twenty* being, however, derived not from *two* but from ten עֶשֶׂר.

Twenty	עֶשְׂרִים	Forty	אַרְבָּעִים
Thirty	שְׁלֹשִׁים	Fifty	חֲמִשִּׁים

Sixty	שִׁשִּׁים	Eighty	שְׁמֹנִים
Seventy	שִׁבְעִים	Ninety	תִּשְׁעִים

a. These numbers have no distinct form for the feminine, and are used indifferently with nouns of either gender. עֶשְׂרֵת Ex. 18: 21, 25, Deut. 1: 15 means not *twenty* but *tens.*

2. The units are added to the tens by means of the conjunction וְ *and*; the order of the precedence is not invariable, though it has been remarked that the earliest writers of the Old Testament commonly place the units first, e. g. שְׁתַּיִם וְשִׁשִּׁים *two and sixty* Gen. 5: 18, while the latest writers as commonly place the tens first, שִׁשִּׁים וּשְׁנַיִם *sixty and two* Dan. 9: 25.

§ 227. Numerals of a higher grade are מֵאָה *one hundred,* אֶלֶף *one thousand,* רְבָבָה, רִבּוֹ or רִבּוֹא *ten thousand.* These are duplicated by affixing the dual termination מָאתַיִם *two hundred,* אַלְפַּיִם *two thousand,* רִבּוֹתַיִם or שְׁתֵּי רִבּוֹת *twenty thousand.* Higher multiples are formed by prefixing the appropriate units שְׁלֹשׁ מֵאוֹת *three hundred,* שְׁלֹשֶׁת אֲלָפִים *three thousand,* שֵׁשׁ רִבְאוֹת *sixty thousand,* אֶלֶף אֲלָפִים *one million.*

§ 228. 1. The ordinals are formed by adding ִי to the corresponding cardinals, the same vowel being likewise inserted in several instances before the final consonant; רִאשׁוֹן *first* is derived from רֹאשׁ *head.*

First	רִאשׁוֹן	Sixth	שִׁשִּׁי
Second	שֵׁנִי	Seventh	שְׁבִיעִי
Third	שְׁלִשִׁי	Eighth	שְׁמִינִי
Fourth	רְבִיעִי	Ninth	תְּשִׁיעִי
Fifth	חֲמִישִׁי or חֻמְשִׁי	Tenth	עֲשִׂירִי

The feminine commonly ends in ִית, occasionally in ִיָּה.

a. There are two examples of the orthography רִאישׁוֹן Josh. 21: 10, Job 15: 7, and one of רִישׁוֹן Job 8: 8, in all of which the K'ri restores the customary form.

2. There are no distinct forms for ordinals above ten, the cardinal numbers being used instead.

3. Fractional parts are expressed by the feminine ordinals, שְׁלִישִׁית *one third*, רְבִיעִית *one fourth*, etc., and by the following additional terms, חֵצִי *one half*, רُבַּע and רֹבַע *one quarter*, חֹמֶשׁ *one fifth*, עֶשְׂרוֹן *one tenth*.

Prefixed Particles.

§ 229. The remaining parts of speech are indeclinable, and may be comprehended under the general name of particles. These may be divided into

1. Prefixed particles, which are only found in combination with a following word, viz. the article, He interrogative, the inseparable prepositions, and Vav conjunctive.

2. Those particles, which are written as separate words, and which comprise the great majority of adverbs, prepositions, conjunctions, and interjections.

a. No word in Hebrew has less than two letters; all particles of one letter are consequently prefixes. There is one example of two prefixes combined constituting a word הַל Deut. 32: 6, though editions vary; three are combined in בְּשֶׂל Eccles. 8: 17.

The Article.

§ 230. 1. The Definite Article (הָא הַיְדִיעָה) consists of ה with Pattahh followed by Daghesh-forte in the first letter of the word to which it is prefixed, מֶלֶךְ *a king*, הַמֶּלֶךְ *the king*.

a. As the Arabic article اَلْ is in certain cases followed by a like doubling of the initial letter, it has been imagined that the original form of the Hebrew article was הַל and that the Daghesh-forte has arisen from the assimilation of ל and its contraction with the succeeding letter. Since, however, there is no trace of such a form, it seems better to acquiesce in the old opinion, which has in its favour the analogy of other languages, that the article ה is related to the personal pronoun הִוא, whose principal consonant it retains, and that the following Daghesh is conservative, § 24. 3.

The Arabic article is supposed to be found in the proper name אַלְגּוּדָד Gen. 10: 26, אֶלְגְּבִישׁ *hail*, the equivalent of גָּבִישׁ, and possibly in אַלְקוֹם Prov. 30: 31.

b. There is, properly speaking, no indefinite article in Hebrew, although the numeral אֶחָד *one* is so employed in a few instances, as נָבִיא אֶחָד *a prophet* 1 Kin. 20: 13.

2. If the first letter of the word have Sh'va, Daghesh-forte may be omitted except from the aspirates, § 25, הַיְאֹר, הַיְדִיד but הַבְּרָכָה, הַתְּחִנָּה.

a. Daghesh-forte though usually omitted in this case is occasionally retained e. g. הַמְּשָׁכָה 2 Kin. 9: 11, הַמְּעָנָה Jer. 6: 2, הַצְּפַרְדְּעִים Ex. 8: 1 but הַצְפַרְדֵּעַ ver. 2, הַיְעָפִים Judg. 8: 15, הַיְעָפִים 1 Sam. 24: 3, and it is always written in הַיְהוּדִי *the Jew* and הַיְהוּדִים *the Jews*.

3. Before gutturals, which cannot receive Daghesh-forte, § 60. 4, Pattahh is lengthened to Kamets; the short vowel Pattahh is, however, commonly retained before ח and ה, and sometimes before ע, the syllable being converted into an intermediate, § 18. 3, instead of a simple one, הָאֹהֶל, הָהָר, הָעֵגֶל Gen. 15: 11, הֶהָרָשׁ but הַהוּא, הַעֵגֶל Jer. 12: 9.

a. The article very rarely has Kamets before ח, הָחַי Gen. 6: 19, הֶחֳמָנִים Isa. 17: 8; in a very few instances initial א quiesces in the vowel of the article, הָאַסַּפְסֻם Num. 11: 4.

4. Before ח with Kamets or Hhateph-Kamets, Pattahh is changed to Seghol: before ה or ע with Kamets, it is likewise changed to Seghol if it stands in the second syllable before the accent, and consequently receives the secondary accent Methegh, הֶהָגֶה, הֶחָכָם, הֶחֳדָשִׁים, הֶהָרִים, הֶעָרִים.

a. This change very rarely occurs before א, הֶאֱסֹף Mic. 2: 7. When ח is followed by Kamets-Hhatuph, Pattahh remains הַחֳכָמָה.

b. The article does not usually affect the vowels of the word before which it stands; in הַר *mountain* and עַם *people*, however, Pattahh is changed to Kamets to correspond with the vowel of the article הָהָר, הָעָם, so אֶרֶץ *earth* but הָאָרֶץ. The plurals of אֹהֶל *tent* and קֹדֶשׁ *holiness* without the article are אָהֳלִים Gen. 25: 27, קָדָשִׁים Ex. 29: 37, but with the article בָּאֳהָלִים (for בְּהָאֳהָלִים) Judg. 8: 11, הַקֳּדָשִׁים Ex. 26: 33, § 210. 3. *b.* קָאַת *pelican* Isa. 34: 11, Zeph. 2: 14, is pointed הַקָּאַת Lev. 11: 18, Deut. 14: 17 upon

receiving the article; so פַּר Num. 7: 15, but הַפָּר Judg. 6: 26. 28. The emphasis due to the article has in these few instances an effect analogous to that of the pause accent in prolonging the principal vowel of the word.

5. When preceded by the inseparable prepositions the letter ה of the article is mostly rejected, and its vowel given to the preposition, § 53. 3, בַּשָּׁמַיִם for בְּהַשָּׁמַיִם, see § 232. 5.

He Interrogative.

§ 231. 1. The letter ה (הֵא הַשְׁאָלָה) may also be prefixed to words to indicate an interrogation; it is then pointed with Hhateph-Pattahh, הֲנֵלֵךְ *shall we go?* הֲלֹא־הוּא *is he not?*

2. Before a vowelless letter this becomes Pattahh, § 61. 1, הַבְזוֹנָה Gen. 34: 31, הֲלְמַעֲנֵךְ Job 18: 4, הַצָרֵי Jer. 8: 22.

a. The new syllable thus formed is an intermediate one, § 22, and the succeeding Sh'va remains vocal, as is shown by the absence of Dagheshlene in such forms as הֲיְדַעְתֶּם Gen. 29: 5. In order to render this still more evident recourse is frequently had to Daghesh-forte separative, § 24. 5, הַגִּבְעֹן Gen. 17: 17, הַכִּצְעֲקָתָהּ 18: 21, Methegh, § 45. 2, הֲמָשַׁל Judg. 9: 2, הֲחָשַׁבְתָּ Job 38: 35, or compound Sh'va, § 16. 3. *b*, הֲבֵרָכָה Gen. 27: 38.

b. He interrogative has Pattahh and Daghesh-forte in one instance before a letter with a vowel of its own, הַיִרְעַב Lev. 10: 19.

3. Before gutturals it likewise usually becomes Pattahh, הַאֵלֵךְ Ex. 2: 7, הַאֲשֶׁר 2 Kin. 6: 22, הֲהֵיטִיב Jer. 2: 11, הַעֵת Hag. 1: 4, הַחִנָּם Job 22: 3.

a. There are a few examples of He interrogative with Kamets before א, הָאֹרֶשׁ Num. 16: 22, Neh. 6: 11, הָאַתֶּם Judg. 6: 31, הָאֶפְרָתִי 12: 5, הֲיִהוּדָה Jer. 8: 19 (in some editions) pointed as if before אֲדֹנָי: so too most probably הָאָדָם Deut. 20: 19.

4. Before gutturals with Kamets it is changed to Seghol, הֶאֱמֹר Ezek. 28: 9, הֲהֵרוּתָה Joel 1: 2, הֶחָכָם Eccles. 2: 19; see also Num. 11: 12, 13: 18, 2 Sam. 19: 43, Job 13: 25, 21: 4.

a. This rule does not apply to Resh, הֲרָפָה Num. 13: 18, הֲרָאִיתָ 1 Kin. 20: 13.

Inseparable Prepositions.

§ 232. 1. The prepositions בְּ *in*, כְּ *according to*, לְ *to*, are regularly prefixed with Sh'va, בְּרֵאשִׁית *in the beginning*, כְּכֹל *according to all*, לְאַבְרָהָם *to Abraham*.

2. Before vowelless letters this Sh'va is changed to Hhirik, בִּרְקִיעַ for בְּרְקִיעַ, לִמְשֹׁל for לְמְשֹׁל, כִּדְבַר for כְּדְבַר, in which Yodh quiesces בִּיהוּדָה, כִּילוּד.

3. Before gutturals with compound Sh'va it is changed to the corresponding short vowel, בַּאֲחֵי, לֶאֱכֹל, בֶּחָרִי.

a. Occasionally לְ takes Pattahh or Seghol before an infinitive, whose first letter is a guttural with simple Sh'va, לַאֲסֹר Ps. 105: 22, לַחְבֹּט Deut. 19: 5. Initial א quiesces in the following words after the inseparable prepositions, § 57. 2. (2) *a*, אָדוֹן *master* when connected with singular suffixes, אֲדֹנָי *Lord*, אֱלֹהִים *God*, and also in the inf. const. אֱמֹר *to say* after ל, בֶּאדֹנָי, כֶּאדֹנָיו, לַאדֹנָיו, בֵּאלֹהִים for בֶּאֱלֹהִים the Seghol lengthened to Tsere in the simple syllable, לֵאלֹהִי but לֶאֱלֹהֵי, לֵאמֹר but לֶאֱמֹר, בֵּאמֹר but בֶּאֱמֹר. Before the divine name יהוה the inseparable prepositions are pointed as they would be before אֲדֹנָי or אֱלֹהִים, whose vowels it receives, § 47, לַיהוָה Gen. 4: 3, לַיהוָה Ps. 68: 21.

b. In a very few instances א with Pattahh and י with Hhirik give up their vowel to the preposition and become quiescent, כַּאֲבִיר Isa. 10: 13 for כְּאַבִּיר, כִּיתְרוֹן Ecles. 2: 13 for כְּיִתְרוֹן, § 57. 2. (3).

4. Before monosyllables and before dissyllables, accented upon the penult, these prepositions frequently receive a pretonic Kamets, § 64. 2, בָּאֹזֶן, כָּזֹאת, לָנֶפֶשׁ.

a. This regularly occurs with the Kal construct infinitive of פֹּ֫ל, פֹּ֫ר, עֹ֫ל, כֹּ֫ל and כֹּ֫ר verbs when preceded by ל, e. g. לָגֶ֫שֶׁת, לָתֵ֫ת, לָלֶ֫דֶת, לָלֶ֫כֶב, לָרִ֫יב; also with different forms of the demonstrative זֶה and with personal suffixes; and with monosyllabic or Segholate nouns when accompanied by disjunctive and especially pause accents. Before the pronoun מָה *what* they are commonly pointed בַּמָּה, כַּמָּה, לָמָּה or followed by a guttural, לָמָּ֫ה; לָמָּ֫ה occurs three times, all in the same verse 1 Sam. 1: 8.

5. Before the article its ה is rejected and the vowel given to the preposition, כַּהָדָבָר for כַּדָּבָר, לָאָרֶץ for לְהָאָרֶץ, בֶּהָרִים for בְּהָרִים.

a. ה remains eight times in בְּהַיּוֹם e. g. Gen. 39: 11; also in such individual instances as בְּהַשְׂמִים Ps. 36: 6, בְּהַזְרֵהּ Neh. 9: 19, כְּהַיּוֹם Eccles. 8: 1, כְּהַחֲלֹמֹת Ezek. 40: 25, לְהַפְרִדְמִים 1 Sam. 13: 21, לְהַחֹדֶשׁ Neh. 12: 38, לְהָעֹם

2 Chron. 10: 7, לְהַדְּרוֹר 25: 10, לְהַמְּבַחַ 29: 27, לְהַעֲלִים Ezek. 47: 22, לְהַנְּחִיל Dan. 8: 16. The initial ה of the Hiphil and Niphal infinitives is occasionally rejected in like manner, לַעֲשְׂרִית Am. 8: 4 for לְהַעֲשְׂרִית, בְּנָשְׂלִי Prov. 24: 17 for בְּהִנָּשְׂלִי.

§ 233. The preposition מִן *from*, though used in its separate form, may also be abbreviated to a prefix by the assimilation and contraction of its final Nun with the initial letter of the following word, which accordingly receives Daghesh-forte, מִבֵּיתֶךָ for מִן בֵּיתֶךָ. Before ח Hhirik is commonly retained in an intermediate syllable, but before other gutturals it is for the most part lengthened to Tsere, מִיהוּדָה for מִן יהוּדָה, but מֵחֲטֹא מֵהַלֵּל 1 Sam. 12: 23; מֵאָרֶץ, מֵעָם, מֵהָלוֹךְ, but מִיהוּדָה, מִירֹק.

a. If the first letter of the word have Sh'va, Daghesh-forte may be omitted. This is occasionally the case even when it is an aspirate מִבְצִיר Judg. 8: 2, מִעִבּוּרָם Ezek. 32: 30. Daghesh-forte is twice retained in an initial vowelless Yodh, מִיִּשְׁעִי 2 Chron. 20: 11, מִיִּשְׁעִי Dan. 12: 2, but commonly it is dropped and the Jodh quiesces מִגִּלְגָּל, מִידַי, מִידֵי, מִי. מִן is sometimes poetically lengthened to מִנִּי, and once has the form of a construct plural, מִנֵּי Isa. 30: 11.

§ 234. These prepositions are combined with the pronominal suffixes in the following manner:

		SINGULAR.			
1 *c.*	בִּי	לִי	כָּמוֹנִי	מִמֶּנִּי, מִנִּי, מֶנִּי	
2 *m.*	בְּךָ, בָּךְ	לְךָ, לָךְ	כָּמוֹךָ	מִמְּךָ, מִמֶּךָ	
2 *f.*	בָּךְ	לָךְ	—	מִמֵּךְ	
3 *m.*	בּוֹ	לוֹ	כָּמוֹהוּ	מִמֶּנּוּ, מִנֶּהוּ, מֶנֶּהוּ	
3 *f.*	בָּהּ	לָהּ	כָּמוֹהָ	מִמֶּנָּהּ	
		PLURAL.			
1 *c.*	בָּנוּ	לָנוּ	כָּמוֹנוּ	מִמֶּנּוּ	
2 *m.*	בָּכֶם	לָכֶם	כְּכוֹתֵכֶם, כָּכֶם	מִכֶּם	
2 *f.*	בָּכֶן	לָכֶן	—	מִכֶּן	
3 *m.*	בָּהֶם, בָּם	לָמוֹ בָּהֶם, לָהֶם	כְּכוֹתָם, כָּהֶם	מֵהֶם, מִנֵּהֶם	
3 *f.*	בָּהֶן, בָּהֵן	לָהֶן	—	מֵהֶן	

a. The syllable כוֹ inserted between כ and the suffixes, and which is in

poetry sometimes added to ב, כ and ל without suffixes to convert them into independent words, בְּמוֹ, כְּמוֹ, לְמוֹ, is commonly thought to be related in its origin to the pronoun מָה *what*, so that כָּמוֹנִי would in strictness denote *like what I am*, i. e. *like me*. The preposition מִן, with the exception of some poetical forms, reduplicates itself before the light suffixes, מִמֶּנִּי = מִנֶּנִּי. Comp. a similar reduplication of a short word, מֵימַי or מֵי construct of מַיִם *water*.

VAV CONJUNCTIVE.

§ 235. The conjunction *and* is expressed by וְ prefixed with Sh'va, וְחֹשֶׁךְ, וְהָאָרֶץ. Before one of the labials ב, מ, פ, § 57. 2 (1), or before a vowelless letter Vav quiesces in Shurek, וּבֵין, וּמֶלֶךְ, וּבָנִים, וּלְהַבְדִּיל. Before a vowelless Yodh it receives Hhirik, in which the Yodh quiesces, וְיַנַּקְתֶּם, וְיָדַי. Before a guttural with compound Sh'va it receives the corresponding short vowel, וַאֲנִי, וְעֶזְהוּז, וְחֶלְיִ. Before a monosyllable or a dissyllable accented on the penult it frequently receives a pretonic Kamets, particularly if it be the second of two closely connected words, תֹּהוּ וָבֹהוּ Gen. 1: 2, טוֹב וָרָע 2: 9, וְקֹר וָחֹם וְקַיִץ וָחֹרֶף וְיוֹם וָלָיְלָה 8: 22. See also 12: 19, 41: 11, Num. 16: 16, Deut. 32: 7, Job 4: 16, Ps. 55: 18, 63: 6, Eccles. 4: 8; and Prov. 24: 21, 25: 3, Isa. 65: 17, where a word is interposed.

a. After Vav with Shurek, compound Sh'va is sometimes substituted for simple Sh'va in order to indicate more distinctly its vocal character, וּזְהַב Gen. 2: 12, וְהַבְקִשֹׁר Ezek. 26: 21, וְסַעֲדָה 1 Kin. 13: 7, וְצָעֲקָר Jer. 22: 20.

b. Vav receives Hhirik before He or Hheth followed by Yodh in the forms וְחִיִּיתֶם, וְחִיּוּ, וְחִיִּיכֶם, וְחִיּוּ 2 plur. preterite and imperative of the verbs חָיָה *to be* and חָיָה *to live*; before the 2 masc. sing. imperative of the same verbs it has Seghol, וְחֵיֵה, וְחֵיֵה for וְחַיֵּה, וְחַיֵּה.

c. The short vowel appropriate to the guttural is taken in a very few instances, even when the latter has simple Sh'va, וַיַּעֲרֹם Gen. 32: 16, וַיַּעֲצֹר Job 4: 2. א quiesces after Vav conjunctive as after the inseparable prepositions, § 232. 3. *a*, in אָדוֹן *master* when connected with singular suffixes, אֲדֹנָי *Lord* and אֱלֹהִים *God*, וַאדֹנָי, וַאלֹהֵי, וֵאלֹהֵינוּ the Seghol being lengthened to Tsere in the simple syllable. Hence also וַיהוָה when יהוה has the vowels of אֲדֹנָי. A very few instances occur in which א with Pattahh and ר with Hhirik give up their vowel to Vav conjunctive and become quiescent, וַאֲשֻׁר Zech. 11: 5 for וְאַשֻּׁר, וְיִלְמַד Jer. 25: 36 for וְרַלְמַד.

d. The rule for pretonic Kamets is sometimes extended to the last of three connected words, שִׁיר יְכַשֵּׁב וְגֹו׳ Lev. 7: 23, גָּדוֹל וְרַב וְגָם Deut. 2: 10. 21, and even the last two דְּבַשׁ וְשֶׁמֶן יָצָרִי Ezek. 27: 17; and to Vav conversive of the Preterite at or near the end of a clause וַיָּמֹת Gen. 44: 9. 22. 31, וַתְּחַיֶּה Ex. 1: 16, Lev. 18: 5, 2 Kin. 7: 4, Prov. 24: 16, Isa. 6: 10. Other cases are rare and exceptional e. g. וַאֲרַיִן Isa. 26: 19, the first vowel of אֲרַיִן being as usual assimilated to a preceding Kamets, § 63. 2. *b.*

Separate Particles.

adverbs.

§ 236. 1. A few adverbs of negation, place and time, are commonly classed as primitive, although they are probably related to pronominal roots, as אַל and לֹא *not*, שָׁם *there*, אָז *then*.

a. It is natural to suspect that the pronominal root ל, which gave rise to the near demonstrative אֵל, אֵלֶּה *these* and to the prepositions indicative of nearness or approach, ל *to*, אֶל *unto*, and which has a remote demonstrative force in הָלְאָה *yonder*, *beyond*, may also be the basis of לֹא and אַל the idea of remoteness taken absolutely forming a negation. The same idea, in a less absolute sense, may be traced in the conditional conjunction לוּ *if*. The pronoun זֶה, of which probably שֶׁ is originally only a modification (comp. the relative use of זוּ, § 73. 1), is plainly connected with אָז *at that time* and שָׁם *in that place*.

2. Derivative adverbs are formed

(1.) By affixing the terminations ָם or ׄם, § 201. *e*, אָמְנָם and אָכֵן֫ם *truly* from אֶמֶת *truth*, חִנָּם *gratuitously* from חֵן *grace*, יוֹמָם *by day* from יוֹם *day*, רֵיקָם *in vain* from רִיק *empty*, פִּתְאֹם *suddenly* from פֶּ֫תַע *moment*, שִׁלְשֹׁם *the day before yesterday* from שָׁלֹשׁ *three*.

(2.) By abbreviation, as אָכֵן *surely*, *only* from אָ֫כֵן.

(3.) By composition, as מַדּוּעַ *why?* from מָה יָּדוּעַ *quid edoctus*, מִלְמַעְלָה *from above* from מִן, לְ and מַעְלָה.

3. Besides those adverbs, which are such originally and properly, other parts of speech are sometimes used as adverbs. Thus

(1.) Nouns, בִּיאֹר *mightily*, *exceedingly* prop. *might*, סָבִיב *around* prop. *circuit*, עוֹד *again* prop. *repetition*, אֶפֶס *no*

more prop. *cessation*; with a preposition, בִּמְאֹד *exceedingly*, לְבַד *apart* prop. *to separation*, or a suffix יַחְדָּו *together* prop. *in its union*. Compare the adverbial accusative and adverbial phrases of Greek and other languages.

(2.) Absolute infinitives, which are really verbal nouns, הֵיטֵב *well* prop. *recte faciendo*, הַרְבֵּה *much*, בְּחַר *quickly*.

(3.) Adjectives, particularly in the feminine, which is used as a neuter, טוֹב *well*, כָּלֶא *fully*, רִאשֹׁנָה *at first*, שֵׁנִית *the second time*, רַבָּה and רַבַּת *much*, יְהוּדִית *in Jewish* i. e. *Hebrew*, אֲרָמִית *in Aramæic*, נִפְלָאוֹת *wonderfully*.

(4.) Pronouns, זֶה *here, now* prop. *this place, this time*, הֵנָּה *hither* prop. *to these places*, with a preposition כֹּה *thus* prop. *according to it*, כֵּן *so* perhaps for כְּהֵן *according to these things*, though others explain it as an adverbial of the participle כֵּן *right, true*, פֹּה *here* probably for בּוֹ *in this* (place).

§ 237. A few adverbs are capable of receiving pronominal suffixes, as הֵן or הִנֵּה *behold*, עוֹד *yet*, אַי *where*, to which may be added אַיִן *there is not* prop. *non existence* and יֵשׁ *there is* prop. *existence*. As the idea of action or of existence is suggested by them, they take the verbal suffixes, frequently with נ epenthetic. Thus

1. הִנֵּה. *First person* הִנְנִי, הִנֵּנִי and הִנֵּנִי; הִנְנוּ, הִנֵּנוּ and הִנֵּנוּ. *Second person* masc. הִנְּךָ once הִנְּכָה; הִנְּכֶם, fem. הִנָּךְ. *Third person* הִנּוֹ and הִנֵּהוּ; הִנָּם.

2. עוֹד. *First person* עוֹדֶנִּי and עוֹדִי; once with *plur.* עוֹדֵינוּ Lam. 4: 17 K'ri. *Second person* masc. עוֹדְךָ fem. עוֹדָךְ. *Third person* masc. עוֹדֶנּוּ, עוֹדָם fem. עוֹדֶנָּה.

3. אַי, *Second person* אַיֻּכָה. *Third person* אַיּוֹ, אַיָּם.

4. אַיִן. *First person* אֵינֶנִּי. *Second person* masc. אֵינְךָ, אֵינֶכָה, fem. אֵינֵךְ. *Third person* masc. אֵינֶנּוּ, אֵינָם and אֵינָמוֹ fem. אֵינֶנָּה.

5. יֵשׁ. *Second person* יֶשְׁךָ, יֶשְׁכֶם and יִשְׁכֶם. *Third person* יֶשְׁנּוֹ.

Prepositions.

§ 238. 1. The simple prepositions in most common use, besides the inseparable prefixes, § 232, are chiefly אַחַר *behind, after* אֶל *to, unto,* אֵצֶל *beside,* אֵת *with,* בֵּין *between,* בִּלְתִּי *without,* בְּעַד *through,* זוּלַת *except,* יַעַן *on account of,* בּוֹל or בִּיוֹל *over against,* נֶגֶד *in presence of,* נֹכַח *in front of, before,* עַד *unto,* עַל *upon,* עִם *with,* תַּחַת *under.* Most of these appear to have been originally nouns; and some of them are still used both as nouns and as prepositions.

2. Other prepositions are compound, and consist of

(1.) Two prepositions, as מֵאַחֲרֵי *from after,* מֵאֵת and מֵעִם *from with,* מֵעַל *from upon,* מִתַּחַת *from under,* לְמִן *from,* לְנֶגֶד and לְנֹכַח *before,* אֶל־מוּל *toward.*

(2.) A preposition and a noun לְבַד and מִלְּבַד *besides* from בַּד *separation,* לִפְנֵי *before* and מִפְּנֵי, מִלִּפְנֵי *from before* from פָּנִים *face,* בְּגַלַּל and בַּעֲבוּר *for the sake of,* בְּיַד *by* prop. *by the hand of,* אֶל־עֵבֶר *beyond,* מֵעֵבֶר, מֵעֵבֶר לְ *from beyond,* לְעֻמַּת *in conjunction with,* לְמַעַן and עַל־עִקַּב *on account of,* לְפִי, כְּפִי and עַל־פִּי *according to* prop. *at the mouth of.*

(3.) A preposition and an infinitive, לִקְרַאת *toward* prop. *to meet.*

(4.) A preposition and an adverb, בִּלְעֲדֵי and מִבַּלְעֲדֵי *without* from בַּל *not* עַד *unto,* מֵעֵבֶר לְ *beyond,* בִּבְלִי *without.*

§ 239. The prepositions take suffixes in the same manner as singular nouns, e. g. אֶצְלִי *beside me,* זוּלָתִי, נֶגְדִּי, עִמִּי, except אַחַר *after,* אֶל *to,* עַד *unto,* עַל *upon* and תַּחַת *under,* which before suffixes assume the form of nouns in the masculine plural, e. g. אַחֲרַי, אֲלֵיהֶם, אֲלֵיהֶן, אֲלֵיכֶם: בֵּין *between* adopts sometimes a singular, sometimes a masculine plural, and sometimes a feminine plural form, e. g. בֵּינִי, בֵּינֵי and בֵּינָיו, בֵּינֵינוּ and בֵּינוֹתֵינוּ.

a. The plural form אַחֲרֵי occurs without suffixes more frequently than אַחַר; אֲלֵי, אֵלַי, עֲלֵי, עָלַי also occur in poetry; עִמָּדִי from the absolute עִמָּד, which appears only in this single form, is used as an alternate of עִמִּי from עִם *with* and the 1 pers. sing. suffix.

b. תַּחַת in a very few instances takes a verbal suffix, תַּחְתֶּנִּי 2 Sam. 22: 37, 40, 48, and once has Nun Epenthetic before the suffix תַּחְתֶּנָּה Gen. 2: 21; with the 3 masc. plur. suffix it is תַּחְתָּם oftener than תַּחְתֵּיהֶם.

§ 240. The preposition אֵת *with* is to be distinguished from אֵת the sign of the definite object, which is prefixed to a pronoun or definite noun, to indicate that it is the object of an active verb. With pronominal suffixes the ת of the preposition is doubled and its vowel shortened to Hhirik, thus אִתִּי, אִתְּךָ, אִתָּהּ (once אִתֵּךְ Isa. 54: 10), אִתָּכֶם; the sign of the accusative becomes אוֹת before suffixes or before grave suffixes commonly אֶת, thus אֹתִי, אֹתְךָ, אֶתְכֶם rarely אוֹתְכֶם, אֹתָם (rarely אוֹתָהֶם) and אֶתְהֶם.

a. Sometimes, particularly in the books of Kings, Jeremiah, and Ezekiel, the preposition takes the form אוֹתִי, אוֹתְךָ.

Conjunctions.

§ 241. 1. In addition to the prefixed copulative וְ, § 235, the following are the simple conjunctions in most common use, אוֹ *or*, גַּם *also*, אִם and לוּ *if*, אֲשֶׁר and כִּי *that, because*, פֶּן *lest*.

2. Compound conjunctions are formed by combining

(1.) Two conjunctions כִּי אִם *but*, אַף כִּי *how much more* prop. *also that*.

(2.) The conjunction כִּי or אֲשֶׁר with a preposition, as כַּאֲשֶׁר *as*, לְמַעַן אֲשֶׁר *in order that*, יַעַן אֲשֶׁר and עֵקֶב אֲשֶׁר *because*, עַד כִּי *until*, תַּחַת כִּי *because*.

(3.) An adverb with a preposition or conjunction, בְּטֶרֶם *before*, לָכֵן or עַל־כֵּן *therefore*, לוּלֵי *unless* from לוּ *if* לֹא *not*.

Interjections.

§ 242. The Hebrew interjections, like those of other languages, are of two sorts, viz.:

1. Natural sounds expressive of various emotions, as אָח, הָהּ, אֲהָהּ *ah! oh!* הֶאָח *aha!* הוֹי *ho! woe!* אוֹי, אוֹיָהּ, אֲבוֹי, אִי *woe!* אַלַי *alas!* הַס *hush!*

2. Words originally belonging to other parts of speech, which by frequent use were converted into interjections, הָבָה *come!* prop. *give*, לְכָה *come!* prop. *go*, הִנֵּה *behold!* prop. a demonstrative adverb, חָלִילָה *far be it!* בִּי *pray:* from בְּעִי *entreaty*, נָא *now! I pray thee!*

I. Paradigm. Personal Pronouns, § 71.

	SINGULAR.		PLURAL.	
1.	I	אֲנִי, אָנֹכִי	We	אֲנַחְנוּ, נַחְנוּ, אָנוּ
2.	Thou *m.*	אַתָּה, אַתָּ	Ye *m.*	אַתֶּם
	Thou *f.*	אַתְּ, אָתְּ	Ye *f.*	אַתֶּן, אַתֵּנָה
3.	He	הוּא	They *m.*	הֵם, הֵמָּה
	She	הִוא, הִיא	They *f.*	הֵן, הֵנָּה

תָּשַׁף, תָּשַׁר, תָּתַח, תָּתַל, תָּתַם, תָּתַף, תָּתַק, תָּתַר.

Concrete Nouns: עָוְלָה (עָוֶל), נְגֶר, שֶׁכֶר, נְגֶר, בָּנִים, בָּבוֹר.

Names of seasons: אָבִיב, אָסִיף, בָּצִיר, זָמִיר, חֹרֶשׁ, קָצִיר.

3. Long immutable penult, ָ֫ or ֵ֫ in ultimate.

Agents: הוֹלֵךְ, שׁוֹלֵל, כּוֹלֵם, קוֹטֵל.

Occupations: בּוֹנֶה, חוֹבֵל, חוֹרֵשׁ, יוֹצֵר, כּוֹבֵס, כּוֹהֵן.

CLASS II. Reduplicated.

Intensive: חַנּוּן, פַּקֵּחַ, גִּבּוֹר, צַדִּיק, רַחוּם.
Daghesh resolved: קִיטֹּר, נִיצֹּוץ.
עִ: חַתַּלְתַּל, קַדְקֹד, טַלְטֵלָה, גֻּלְגֹּלֶת.
do. vowel inserted קָלוֹקֵל, עֲרוֹגֵר, צְלָצַל.
do. consonant softened כּוֹכָב, קִרְקַעַן, כְּפָר, שַׂרְשָׁה.
פִּי: הַבָּהָבִים (י), בֻּאֲצִים (י). לֹהּ: נָאוָה.
Occupations: חָרָשׁ, דַּיָּג, גַּנָּב, אִכָּר, טַבָּח.
Defects: אִלֵּם, גִּבֵּן, חֵרֵשׁ, עִוֵּר, עִקֵּשׁ, פִּסֵּחַ, קֻרַּח.
Abstracts: שִׁלּוּחִים, כִּפֻּרִים, שִׁלּוּם. עִ: חַרְחֻר, שֻׁעֲשֻׁעִים.
Reduplicate 3d. Radical: with *ā* פִּרְחָח, רַעֲנָן, אֲבֻלָּל.
ī כְּמִירִר, סִבְּרִיר. *ō* נִיהֹלָה, נֶהֱלֹל. *ū* פָּאֲרוּר, נָעֲצוּץ.
Red. two Radicals: חֲצַצְרָה, פְּקַחְקוֹחַ, עֲזָאזֵל.
repetition חֲסַכְסַךְ, חֲלַקְלַק, פְּתַלְתֹּל, חֲסַכְסַךְ.
diminutives of colour אַדַּמְדָּם, יְרַקְרַק, שְׁחַרְחֹר.

CLASS III. With Prefixes.

אַ: superlative אַכְזָר, אַבְגָּד, אִיתָן.
מִ: agent מַשְׂכִּיל, מַיָּם, participles with מִ.
instrument מַשּׁוֹר, מַלְבֵּד, מַפְתֵּחַ, מִשְׁוֹר.
place or time מַלְבֵּן, מַרְבֵּץ, מְזוּזָה, מוֹשָׁב.
action or condition מַיְשָׁר, מַדָּוֶה, מִסְפֵּד, מַטְבֵּחַ.
object or subject מַיָּאל, מִזְמוֹר, מְרָחָק, מְצָלָה.
יִ: names יִצְחָק, יִפְתָּח; appellatives יִצְהָר, יַלְקוּט.
תִּ: abstracts תַּעֲנוּג, תַּרְדֵּמָה; concrete תִּדְהָר, תַּלְמִיד.

CLASS IV. With Affixes. Denominatives.

וֹן or ָן: adjectives עֶלְיוֹן, נֶחְשְׁתָּן, אֶחָיוֹן.
abstracts עִוָּרוֹן, יֶרֶקוֹן, אֲבַדּוֹן, אֲבָדָן.
augmentative שַׂבְתּוֹן; diminutive אִישׁוֹן.
ן, ם or ל: חַרְטֹם, סָגָן, גַּרְעֵן, בַּרְזֶל.
ִי: relation עִבְרִי, יְבוּסִי, צְפוֹנִי, נָכְרִי.
ַי: הוֹנַי, דּוּדַי, לוּנַי, כִּילַי.

PART THIRD.

SYNTAX.

§ 243. 1. Syntax treats of sentences or of the manner in which words are employed in the utterance of thought. Its office, therefore, is to exhibit the several functions of the different parts of speech in the mechanism of the sentence, the relations which they sustain to each other, and how those relations are outwardly expressed.

2. Sentences may be simple or compound. A simple sentence is the expression of an individual mental judgment. Two or more such judgments united in one connected utterance form a compound sentence, the several clauses of which accordingly consist of or may be resolved into as many separate simple sentences.

3. Every simple sentence must embrace first a subject or the thing spoken of, and secondly, a predicate or that which is said about it. Upon these two elements is built the entire structure of human speech.

The Subject.

§ 244. The subject of every sentence must be either a noun, as בָּרָא אֱלֹהִים *God created* Gen. 1: 1, or a pronoun, as קָדוֹשׁ אֲנִי *I* (am) *holy* Lev. 11: 44. This includes infinitives, which are verbal nouns, עֲנוֹשׁ לַצַּדִּיק לֹא טוֹב *to punish the just is not good* Prov. 17: 26, and adjectives and participles when used substantively, לֹאֲרֻבוֹא טָמֵא *an unclean*

(person) *shall not enter* 2 Chron. 23: 19, לֹא הַמֵּתִים יְהַלְלוּ־יָהּ *the dead shall not praise the Lord* Ps. 115: 17.

a. The subject of a sentence may be a noun preceded by a preposition e. g. בְּ in a partitive sense, וַיֵּצְאוּ מִן־הָעָם *there went out* (some) *of the people* Ex. 16: 27, 2 Kin. 10: 10, Ezr. 2: 68, Neh. 5: 5, Dan. 11: 5; or in a local sense וּבָנוּ מִמְּךָ *those proceeding from thee shall build* Isa. 58: 12; or the particle of comparison כְּמַגֵּפָה נִרְאָה (something) *like a plague has appeared* Lev. 14: 35, Ps. 74: 5. אֲשֶׁר לֹא־הָיָה כָּמֹהוּ *the like of which has not been* Ex. 9: 18, 11: 6, 2 Kin. 7: 19, Dan. 10: 16, 18; or יָצָא ... בְּ in the sense of *both ... and* יָצְאוּ הַצְּפֹרִים וְהַבְּהֵמָה נָדְדוּ *both the fowl of heaven and the beasts have fled* Jer. 9: 9.

b. When the subject is an infinitive, it is sometimes as in English, preceded by the preposition לְ *to*, טוֹב לְהוֹדוֹת (it is) *good to give thanks* Ps. 92: 2, 2 Chron. 26: 18, Eccles. 7: 5, Mic. 3: 1 or it may be without a preposition טוֹב זַמְּרָה (it is) *good to make melody* Ps. 147: 1, Prov. 25: 7, 28: 21, Ezek. 11: 3, 18: 3; the latter is necessarily the case when the infinitive is in the construct before a following noun לְאַ־טוֹב הֱיוֹת הָאָדָם לְבַדּוֹ *man's being alone* (is) *not good* Gen. 2: 18, Ps. 133: 1. Both constructions occur in successive clauses 1 Sam. 15: 22, Prov. 17: 26, 18: 5, and even in the same phrase Prov. 21: 9, 19.

c. The subject is very rarely an adverb, הַרְבֵּה נָפַל מִן־הָעָם *many* (prop. much) *of the people have fallen* 2 Sam. 1: 4.

§ 245. The subject may be omitted in the following cases, viz.:

1. When it is sufficiently plain from the connection, הַעוֹד יְשֶׁנְךָ *is there yet with thee* (a corpse)? Am. 6: 10, or is obvious in itself, אֹתוֹ יָלְדָה (his mother) *bare him* 1 Kin. 1: 6, Num. 26: 59, 1 Chron. 7: 14.

a. When the subject of a sentence or clause is continued from the preceding it is ordinarily not repeated Joel 2: 1 unless in passages of more than usual solemnity and emphasis e. g. אֱלֹהִים in Gen. 1: 3 ff. Sometimes the subject is suggested by a preceding object either direct Gen. 15: 13, 16: 6, 19: 11, 37: 15, 39: 4, 44: 22, Deut. 4: 9, 1 Sam. 17: 25, Ps. 16: 8, 34: 1 or indirect 2 Chron. 19: 6, Job 21: 19, Ps. 22: 29, Isa. 40: 14, Am. 6: 2, or by a noun in a genitive relation Gen. 9: 6, 14: 2, 2 Sam. 20: 10. Sometimes it can only be generally inferred from the preceding context *he put forth* i. e. one of the children Gen. 38: 28; *they brought him hastily* i. e. those sent by Pharaoh 41: 14; *it is turned unto me* i. e. what formerly passed through the gate of the nations Ezek. 26: 2, Judg. 13: 19; or is evident from the nature of the case as in the frequent ellipsis of God as the subject in poetic passages Isa. 38: 12, 13 and particularly in the book of Job 17: 6, 20: 23, 21: 17, 23: 3 and occasionally even in prose; or is first expressed in a subsequent clause or sentence Isa. 23: 1. A change of subject,

where the sense plainly requires it is often left to be inferred by the intelligence of the reader or hearer Gen. 24: 32, 29: 3, Ex. 10: 5, 34: 28, Deut. 33: 12, 2 Sam. 11: 13, 1 Kin. 9: 8, 9, Mic. 2: 6; or it may be intimated by the insertion of a personal pronoun Num. 35: 23, Job 21: 22. In 1 Sam. 24: 11 the subject is dropped from a familiar phrase, וַתֹּאמֶר scil. עֵינִי. Comp. Deut. 7: 16, 13: 9, Ezek. 20: 17.

2. When it is indefinite; thus, if an action is spoken of and it is not known or is not stated by whom it is performed. The third person plural may be so employed, וַיַּגִּדוּ לְשָׁאוּל *and they told Saul* 1 Sam. 18: 20, or third person singular, comp. the French *on* and German *man*, קָרָא שְׁמָהּ בָּבֶל *one called its name Babel*, i. e. *its name was called Babel* Gen. 11: 9, or the second person singular, particularly in laws or in proverbs, the language of direct address being employed while every one who hears is intended, לֹא־תַעֲשֶׂה־לְךָ פָּסֶל *thou shalt not make unto thee a graven image* Ex. 20: 4, 23: 1, Deut. 16: 1 ff., 28: 1 ff., הָבִיאָה לַמּוּסָר לִבֶּךָ *apply thine heart unto instruction* Prov. 23: 12, 2: 1 ff., Eccles. 11: 1.

a. Sometimes אִישׁ *man* is used as an indefinite subject, אִם־יִמְנֶה אִישׁ לִבְלֹתִי *if a man* (i. e. any one) *can count* Gen. 13: 16, 23: 6, 41: 44, Ex. 21: 7, 34: 24, Deut. 11: 25, 1 Sam. 24: 20, 2 Sam. 16: 23 K'ri (but not in K'thibh), Ps. 49: 8, 17, Prov. 6: 27, 28, Eccles. 1: 8, Cant. 8: 7, Isa. 36: 6, or the pronoun of the third person, Job 28: 3, Eccles. 7: 1, 10: 10, or the participle of the accompanying verb וְשֹׁמֵעַ חָשָׁבַע *and the hearer shall hear* 2 Sam. 17: 9, חֹרְשֵׁי חָרְשׁוּ *ploughers ploughed* Ps. 129: 3, Gen. 7: 16, Deut. 22: 8, Isa. 28: 4, Jer. 9: 23, 31: 5, Ezek. 33: 4, 39: 15, or a cognate noun וּמָלָךְ יִמְלֹךְ *and a king shall reign* Jer. 23: 5, Am. 9: 1, comp. מוֹת יָמוּת *the death of him that dieth* Ezek. 18: 32. By a like idiom the indefinite object may be expressed in terms of the governing verb אֲדַבֵּר אֵת אֲשֶׁר אֲדַבֵּר דָּבָר *I shall speak whatever word I shall speak* Ezek. 12: 25, Ex. 16: 23, 1 Sam. 23: 15, 2 Sam. 15: 20, 2 Kin. 8: 1, or with the accessory idea of the sovereignty of the actor Ex. 4: 13, 33: 19, or of his self consistency Ex. 3: 14, comp. Deut. 9: 25.

b. The plural is used where the action is one in which several are engaged Gen. 41: 14, 43: 32, Lev. 14: 40, 20: 27, Num. 10: 3, 4, 17: 3, Deut. 25: 1, Josh. 10: 27, 24: 30, Judg. 16: 7, 11, 2 Sam. 5: 17, 11: 20, or which may be predicated of people generally, where we would say *men* or use a passive construction Lev. 27: 9, 11, 2 Sam. 23: 6, Isa. 1: 29, 64: 3, Jer. 51: 26, Ezek. 12: 23, Hos. 12: 9, Mal. 2: 7. The 3d sing. is used of an action which is regarded as the work of a single agent Lev. 16: 32, 27: 8, Num. 6: 13,

19: 3, **5**, 35: 25, 30, 2 Kin. 9: 21, 21: 26, Prov. 22: 27; and likewise of actions, in which many are really engaged, but attention is directed to some representative actor or to each individual agent, as we might use the indefinite *one* or *any one* Ex. 10: 5, 21, 34: 15, Lev. 7: 11, Num. 35: 23, 2 Sam. 15: 32, Job 27: 23, 28: 3, Isa. 7: 24, Jer. 51: 33, Am. 6: 12, Mic. 7: 12; so as the subject of an infinitive Eccles. 7: 1. In recording the name given to a place or person it is usual to employ the singular קָרָא, יִקָּרֵא *one called*, respect being had to its original imposition or to subsequent individual utterances of it Gen. 19: 22, 21: 31, 33: 17, Ex. 17: 7, Num. 11: 3, 34, although the plural קָרְאוּ, יִקָּרְאוּ *they called* also occurs Judg. 18: 12, 1 Sam. 23: 28, 1 Chron. 11: 7, 14: 11 (the parallel 2 Sam. 5: 20 has the sing.). The singular is often used in comparisons, whose vividness is increased by individualizing כַּאֲשֶׁר יְרַדֵּף *as one hunts the partridge* 1 Sam. 26: 20, 2 Sam. 16: 23 K'thibh, 1 Kin. 14: 10, 2 Kin. 21: 13, Jer. 19: 11; but the plural in such passages as Isa. 9: 2 where joint action is involved. The indefinite singular and plural are sometimes interchanged as equivalents Gen. 25: 25, 26, Lev. 4: 24 comp. 7: 2, 1 Kin. 18: 23, 26, Job 28: 4, Jer. 8: 4, 9: 7, Ezek. 48: 14, and sometimes suggest distinct agents Gen. 18: 10, 19: 17, Lev. 7: 2, 3, 16: 27. Successive plurals may be used in the sense of *some.....others* Job 24: 2 ff.

c. The indefinite construction is often employed in Hebrew from a preference for the active form, where the passive would be used in English; and in some cases, as it would seem, without any thought of the real agency concerned. So 3 plur. Prov. 9: 11, and with special frequency in the book of Job, לַיְלוֹת עָמָל נְחַל־לִי *wearisome nights are appointed to me* lit. *they have appointed* 7: 3, 4: 19, 18: 18, 19: 26, 20: 8, 34: 20; 3 sing. 1 Sam. 2: 20, Isa. 6: 10, 8: 4, 53: 9. Sometimes the indefinite form alternates with the passive Job 6: 2, Isa. 29: 11, 12, Jer. 16: 6, 7, Ezek. 15: 3, Neh. 7: 3.

d. The 2 pers. sing. indefinite is most frequent in precepts and aphorisms, but is also found in topographical descriptions in the current phrase בְּאֲתָךְ *as thou comest to* Gen. 10: 19, 30, 13: 10, 25: 18, 1 Sam. 15: 7, 27: 8, or עַד בֹּאֲךָ Judg. 6: 4, 11: 33, 1 Sam. 17: 52, 1 Kin. 18: 46, and in the technical expression of the Levitical law עֶרְכֶּךָ *thy valuation* i. e. that of the officiating priest Lev. 5: 15, 27: 2 ff. It is comparatively rare in other connections תָּבוֹא Isa. 7: 25. It is sometimes used collectively, the whole people being addressed as a unit Deut. 19: 1—3, 22: 21; or the 2 plur. may be used instead Ex. 22: 21, 30, Lev. 19: 2 ff., 20: 7, 8, or the 2 sing. and plural may be interchanged in the same context Ex. 13: 4, 5, 22: 20, 23: 9, 25, Lev. 19: 15, 19, Deut. 6: 1, 2, 9: 7, 18: 15, 27: 4. The 2 sing. indefinite interchanges with the 3d sing. Prov. 19: 25; the 2d plur. with 3d plural Num. 10: 3—6; 2d plur. with 3d sing. Mal. 2: 15.

3. When the construction is impersonal; in this case the third person singular masculine is the form commonly adopted, אַל־יֵרַע בְּעֵינֶיךָ *let it not be grievous in thy sight* Gen. 21: 12, אָז הוּחַל *then it was begun* i. e. *men began*, Gen. 4: 26, though the feminine is also employed on ac-

count of its special affinity with the neuter, וַתֵּצַר לְיִשְׂרָאֵל *and Israel was distressed* lit. *it was strait to Israel* Judg 10: 9.

a. The masculine as the more indefinite and primary form is commonly employed when the subject is altogether indeterminate, as when a state or condition is affirmed to exist with no thought of any particular subject in which it inheres וְהָיָה *and it shall be* or *come to pass* Gen. 4: 14, וַיְהִי Gen. 12: 11, רַב *it is enough* Deut. 3: 26, הִקְשָׁה *it is hard* Deut. 15: 18, וַיֵּאָר *and it was light* 2 Sam. 2: 32, חָרָה לָךְ *it burned to thee*, i. e. thou wert angry Gen. 4: 6, the person affected being preceded by לְ *to*, so, יִרְצַב לָךְ Gen. 40: 14, בֵּר לִי Ruth 1: 13, רָעָה לְשָׁאוּל וְטֹבִ֫ים לוֹ 1 Sam. 16: 23, חַם לִי 1 Kin. 1: 1, 2, נָעַם לִי Job 3: 13, וְנָעַם לְ Prov. 24: 25. So in passive verbs דְּבַר Cant. 8: 8, נֶחְתָּה *it is done*, all is over Mic. 2: 4, רֻעַשׁ *it is sifted*, one sifts Am. 9: 9, נִרְפָּא לָנוּ *it is healed to us*, we are healed Isa. 53: 5, נִבְלַע כַּבְּלֻעָה *the king shall be swallowed up* 2 Sam. 17: 16; when the object of the action is expressed, it is regarded as not the subject but the object of the impersonal passive § 283. 4. *a*, hence מֻקְטָר מִנְחָה Mal. 1: 11 (though followed by מִנְחָה), and so when the object is a clause נֶאֱמַר Gen. 22: 14, נוֹדַע 41: 21, חַמָּה Nah. 2: 8, Esth. 1: 19. Once the impersonal *it* is represented by a suffix בְּחַמּוֹ *when it is hot* Job 6: 17.

b. When the subject, though not distinctly expressed, is something vaguely suggested in the context or by the circumstances of the case, the impersonal verb takes the feminine form in the sense of the neuter. Thus וַתֵּצַר לוֹ *there was distress to him* Gen. 32: 8 simply declares the existence of the distress, while וַתֵּצַר *it was distressing* Judg. 10: 9 contains an implied reference to its cause previously stated; תִּהְיֶה *it shall be* viz. the act just mentioned Gen. 21: 30; וַתְּהִי־חֹק *and it became a custom* viz. what is immediately added Judg. 11: 39; וַתִּכְלֶא 2 Sam. 13: 39, whether לְ be supplied *it ceased to David* viz. his hostility to Absalom, or כָּלָה be taken in the sense of כָּלָא *it withheld David* from his hostility that he was comforted etc.; so תִּרְעַב Ps. 69: 32, עָלָתָה Jer. 7: 31, יְאָתָה 10: 7, תְּמָשְׁךָ Ezek. 12: 25, which in ver. 28 takes as its object דְּבָרַי; Job 4: 5, 18: 14, Ps. 69: 11. In the following verbs relating to natural phenomena the feminine form occurs יִשְׁתָּעֲרָה *it is tempestuous* Ps. 50: 3, תַּשְׁלֵג *it snows* 68: 15, תַּמְטִיר *it rains* Am. 4: 7.

The Personal Pronoun as Subject.

§ 246. 1. The personal pronouns are rarely used before verbal forms, which of themselves indicate the person, אָמַרְתִּי *I said*, אָמַרְתָּ *thou saidst*, unless with the view of expressing emphasis or opposition, הֻמְּתָה פָּרְצוּ וְנָפֹלוּ וַאֲנַחְנוּ קַמְנוּ *they are brought down and fallen, but we are risen* Ps. 20: 9.

a. Except in circumstantial clauses as 1 Kin. 1: 41, the personal pronoun as an emphatic subject always implies a tacit contrast even when this is not directly expressed, as it mostly is, in the context אַתָּה יָדַעְתָּ *thou knowest* (whether others do or not) Ps. 69: 6, 20, אֲנִי אֶמְלֹךְ *I will be king* (and not some other aspirant to the throne) 1 Kin. 1: 5, אָנֹכִי נָתַתִּי *I myself gave* (it was my own act not that of others) Gen. 16: 5. It may be made still more emphatic by a periphrasis comp. אָנֹכִי חָטָאתִי *I have sinned* 2 Sam. 24: 17 with אָנֹכִי־הוּא אֲשֶׁר־חָטָאתִי *it is I that have sinned* 1 Chron. 21: 17, or by inserting the particle גַּם *also* Gen. 20: 6, 21: 26, 44: 9, 48: 19, Num. 18: 28, Hos. 4: 6, אַף *too* Lev. 26: 24, or רַק *only* Job 1: 15 ff. The emphatic pronoun regularly precedes the verb Gen. 15: 15, 19: 19, 21: 26, 24: 45, 28: 16, 33: 14, Ex. 18: 21, Num. 22: 32, Judg. 11: 35, Ruth 4: 4, 1 Sam. 1: 28, 10: 18, 19, 2 Sam. 2: 6, 17: 8, 1 Kin. 1: 17, 8: 32, 18: 12, 21: 7, 2 Chron. 13: 11, Neh. 1: 8, Ps. 2: 6, 7, Isa. 37: 16, 49: 15, 53: 4, Ezek. 16: 33, Hos. 8: 4, 12: 11, Am. 7: 17, Mic. 6: 13-15. If special emphasis is to be thrown upon the verb or its adjuncts, it may precede the pronoun Judg. 15: 12, so particularly, when it is accompanied by an absolute infinitive Ex. 4: 14, or is in an energetic modal form, such as the imperative Ex. 18: 19, Deut. 5: 24, 1 Sam. 28: 22, jussive or future with אַל Jer. 17: 18, Obad. ver. 13, (but see 2 Chron. 20: 15), intentional (paragogic future) 2 Sam. 18: 22 or has Vav Consecutive, to which the verb must be immediately attached Ezek. 17: 22 (comp. ver. 3), or stress is laid upon its suffix Judg. 9: 28. No emphasis is involved in the use of a pronoun, when perspicuity requires it, as when it is joined with a participle Gen. 15: 14, 2 Chron. 13: 11 or with any other predicate than a verb 2 Sam. 17: 8, Jer. 1: 6, 7. 17: 17. The unemphatic use of the pronoun with the persons of the verb is rare except in Ecclesiastes, where it occurs with remarkable frequency and generally follows the verb e. g. 1: 16, 2: 1, 11 ff.; see also Cant. 5: 5, Ps. 41: 5, 116: 10, 11, Isa. 38: 10.

2. The pronoun of the third person may be added to the subject to render it emphatic, יְהוָה הוּא הָאֱלֹהִים *Jehovah, he is the God* 1 Kin. 18: 39, אֲדֹנָי הוּא *the Lord himself will give* Isa. 7: 14, 1 Sam. 17: 14, Gen. 25: 16, 34: 21, Mal. 1: 7, 12, and this even when it is a pronoun of the first or second person, אָנֹכִי הוּא מֹחֶה *I, this* person and no other, equivalent to *I myself am blotting out* Isa. 43: 25, 51: 12; אַתָּה הוּא נָקֹה תִּנָּקֶה *shalt thou, such* an one as thou art, *be altogether unpunished?* Jer. 49: 12, 14: 22, 2 Sam. 7: 28, Neh. 9: 6, Ps. 44: 5, Isa. 37: 16, Zeph. 2: 12. Comp. in Chald. Ezr. 5: 11.

a. This seems to be a better explanation than to regard הוּא as a copula, § 261. 2, or such constructions as abbreviated relative clauses e. g.

I am *he* who *blotteth out* etc. after the analogy of 1 Chron. 21: 17. The pronoun so used may stand before the predicate as in most of the instances adduced above, or after it Gen. 41: 25, 26, Job 3: 19, Ps. 50: 6, Ezek. 18: 4, and even before the subject when the predicate is emphatically prefixed Ex. 12: 42, or after the subject Num. 18: 23. In any case it commonly agrees in gender and number with the subject, הַדָּם הוּא בַּנֶּפֶשׁ *the blood, it is the life* Deut. 12: 23, Ex. 3: 5; though sometimes it agrees in preference with the predicate, בָּתֵּי עָרֵי הַלְוִיִּם הִיא אֲחֻזָּתָם *the houses of the cities of the Levites, this is their possession* Lev. 25: 33, Jer. 10: 3.

b. Various pronominal ideas for which no distinct pronoun exists in Hebrew, are expressed by substantives or other appropriate words; thus the indefinite pronoun *one* or *any one* by נֶפֶשׁ *a soul* or *person*, אִישׁ *a man*, אָדָם or הָאָדָם *a man*; the reflexive *self* by נֶפֶשׁ with the proper suffix נַפְשִׁי *myself* etc. or by an emphatic use of the personal pronoun Hos. 4: 14 or suffix Lev. 19: 18, Ps. 49: 19, Isa. 45: 23, Jer. 7: 19; the reciprocal *one another* by אִישׁ אֶת־אָחִיו *a man his brother* or אִישׁ רֵעֵהוּ *a man his friend*; correlatives, *one...the other* by זֶה...זֶה Ex. 17: 12, 1 Kin. 3: 23, Eccles. 6: 5, or אֶחָד...אֶחָד Ex. 18: 3, 4, 1 Kin. 3: 25, comp. 2 Kin. 4: 35; *the same* by לְעֶצֶם *bone* or *substance* עֶצֶם הַיּוֹם הַזֶּה *the very same day* Lev. 23: 14, and in a very few passages as some suppose by an emphatic הוּא Deut. 32: 39, Ps. 102: 28, though even here as in Isa. 41: 4, 43: 10, the pronoun may retain its ordinary sense *he*, i. e. the being or person referred to; *others*, as introducing a new class in an enumeration, is in Job 24: 16 expressed by לָמָּה lit. *they* or *those* distinguished from such as had been previously mentioned.

§ 247. 1. The subject may be extended by connecting two or more nouns or pronouns and thus forming what is called a compound subject וַיְכֻלּוּ הַשָּׁמַיִם וְהָאָרֶץ וְכָל־צְבָאָם *and the heavens and the earth and all their host were finished* Gen. 2: 1, וַאֲנִי וְהַנַּעַר נֵלְכָה *and I and the lad will go* Gen. 22: 5.

2. Or it may be extended by adding to the noun an article, adjective, demonstrative pronoun, pronominal suffix, or another noun with which it may be either in apposition or in construction. When thus united with other qualifying words the noun alone is called the grammatical subject, the noun, together with its adjuncts, is called the logical subject.

The Article.

§ 248. The definite article is used in Hebrew as in other languages to particularize the object spoken of, and distinguish it from all others. It may either specify individual objects in distinction from others of like character, or designate a particular class in distinction from other classes of objects. In the latter case it is called the generic article. Thus אַרְיֵה *a lion*, one of the species, Gen. 49: 9; הָאַרְיֵה *the* particular *lion*, singled out from the rest of his kind, Judg. 14: 8, or *the lion* in general, distinguished from other species of animals Isa. 31: 4. It is accordingly prefixed in the following cases, viz.:

1. When the thing referred to is one which has been mentioned before, *and God said, Let there be* רָקִיעַ *a firmament, etc., and God made* הָרָקִיעַ *the firmament* Gen. 1: 6, 7, 11: 4, 5, הַמִּזְבֵּחַ *the altar* Gen. 13: 4 with allusion to מִזְבֵּחַ *an altar* 12: 8; אֵשׁ....בָּעָנָן Ex. 13: 21, but הָאֵשׁ....הֶעָנָן ver. 22, first אֹהֶל then הָאֹהֶל Num. 19: 14; אִישׁ Judg. 1: 24, but הָאִישׁ ver. 25.

2. When it is defined by accompanying words, as a relative clause, אַשְׁרֵי הָאִישׁ אֲשֶׁר לֹא הָלַךְ וגו׳ *blessed is the man who has not walked*, etc., Ps. 1: 1, an adjective הַמָּאוֹר הַגָּדֹל *the greater light*, הַמָּאוֹר הַקָּטֹן *the lesser light* Gen. 1: 16, a demonstrative pronoun, הַר *a mountain*, הָהָר הַזֶּה *this mountain*, הָהָר הַהוּא *that mountain*, or any descriptive phrase הָאַיִל בַּעַל הַקְּרָנַיִם *the two-horned ram* Dan. 8: 6, הָאוּלָם עַל־פְּנֵי הֵיכַל הַבַּיִת *the porch before the temple* 1 Kin. 6: 3.

a. In this case the article is sometimes generic, as is shown in the first of the examples above given; "*the man who has not walked in the counsel of wicked* persons" does not denote an individual but represents a class and the affirmation is made of every one included in that class. The article in 1 Sam. 9: 9 is best explained by supposing that the noun is limited by the following words בְּלֶכְתּוֹ וגו׳ and is hence conceived definitely as *the man*,

whoever he might be, who went to consult God, comp. Deut. 18: 19, 1 Sam. 17: 25. Ewald is of the opinion that the second word defines the first in the phrase כָּעֵת מָחָר Ex. 9: 18 and elsewhere, and that it means *about the time to-morrow* i. e. when it is to-morrow; the true sense, however, appears to be *about this time to-morrow*, see 3. *c* below.

3. When it is obviously suggested by the circumstances, or may be presumed to be well known: *she emptied her pitcher into* הַשֹּׁקֶת *the trough* Gen. 24: 20, viz., the one which must have been by a well used for watering cattle; *Abimelech looked through* הַחַלּוֹן *the window* Gen. 26: 8, i. e. of the house in which it is taken for granted that he was; *let us go to* הָרֹאֶה *the* (well known) *seer* 1 Sam. 9: 9.

a. The article thus used adds to the vividness of a description and often affords incidental evidence of the writer's familiarity with the features of the locality or the circumstances of his narrative. Thus בָּהָר...בַּמִּדְבָּרָה *in the* (not *a*) *mountain ... in the* (not *a*) *cave* Gen. 19: 30, הַמֵּלִיץ *the interpreter* necessary for Hebrews in Egypt Gen. 42: 23, הַבְּאֵר *the well*, known to have been there, or characteristic of every inhabited place Ex. 2: 15, הַסְּנֶה *the thorn-bush* such as grew in the desert Ex. 3: 2, הָאֹהֶל *the tent*, viz. the one used for the purpose Ex. 33: 7, הַנָּעַר *the young man* present to the writer's mind as the one who brought the message Num. 11: 27, though some judge the article to be generic and take the noun in a collective sense as equivalent to *young men*; הַכֻּשִׁית *the Cushite woman*, whom Moses had married, as is explained in the next clause Num. 12: 1; הַשִּׁפְחָה *the maid* of the high priest 2 Sam. 17: 17, and ver. 19 הָאִשָּׁה *the woman* who belonged in the house, הַמִּכְסֶה *the cover* which she had or which was commonly used for the purpose; הָאִישׁ הַמִּצְרִי *the* well known *Egyptian* 1 Chron. 11: 23. Certain names of diseases may receive the article, being well known physical conditions, as we say *the cholera* or *the plague*; thus *the leprosy* צָרַעַת Lev. 13: 2 or הַצָּרַעַת ver. 12, *with blindness* בַּסַּנְוֵרִים Gen. 19: 11, בָּעִוָּרוֹן Zech. 12: 4, and various other ailments Lev. 14: 54-56, Deut. 28: 27; so mental states שִׁגָּעוֹן and הַשִּׁגָּעוֹן *madness*, תְּמָהוֹן and הַתְּמֵהוֹן *astonishment*.

b. The article is accordingly used as in Greek and in some modern languages in place of an unemphatic possessive pronoun: *she took* הַצָּעִיף *the veil* Gen. 24: 65, i. e. the one which she had, or, according to the English idiom, *her veil*; David took הַכִּנּוֹר *the harp* i. e. *his harp* 1 Sam. 16: 23, so the LXX. ἔλαβαν Δαυὶδ τὴν κινύραν. See also Num. 22: 32, 1 Kin. 1: 47.

c. With words denoting time it expresses the present as that which would most readily occur to the mind, הַיּוֹם *the day* i. e. that which is now passing, *to-day* Gen. 4: 14, הַלַּיְלָה *the night* i. e. *to-night* Gen. 30: 15, הַשָּׁנָה *the year* i. e. *this year* Jer. 28: 16, הַפַּעַם *the time* i. e. *this time* Gen. 29: 35, so in the fuller phrase עַתָּה הַפַּעַם Gen. 29: 34; unless another idea is more

naturally suggested by the context, e. g. הַפַּעַם *at this time, now* Judg. 13: 23, but *at the time* of the action here supposed i. e. *then*, in that case Judg. 21: 22, *at the* proper *time* Num. 23: 23, the article having its distributive sense, see No. 4.

4. When it is referred to as a specimen of its class, so that the article has a distributive sense and is equivalent to *each, he offered a bullock and a ram* בַּמִּזְבֵּחַ *on the altar* i. e. on each of the seven altars Num. 23: 2, *I hid a hundred men fifty by fifty* בַּמְּעָרָה *in the cave* i. e. in each cave 1 Kin. 18: 13, לָאִישׁ *to the man* i. e. each man Gen. 45: 22, לַבַּיִת *for the house* i. e. each house Ex. 12: 3, לַיּוֹם *for the day* i. e. every day Ezek. 46: 13; see also 45: 15, 24, Num. 28: 14, 20, 2 Chron. 8: 13.

a. Occasionally indefinite nouns are used distributively, לְאִישׁ *to a man* i. e. each man 2 Sam. 6: 19.

5. When it is distinguished above all others of like kind or is the only one of its class, הַבַּיִת *the house* viz. of God, the temple Mic. 3: 12, or of the king, the palace 2 Kin. 10: 5, הָאֲדוֹן *the Lord* Isa. 1: 24, הָאֱלֹהִים *the* (true) *God*, הַשָּׁמַיִם *the heavens*, הָאָרֶץ *the earth* Gen. 1: 1, הַשֶּׁמֶשׁ *the sun* Gen. 15: 12.

6. When it is an appellative noun used in a generic or universal sense, הַחֶרֶב *the sword devoureth one as well as another* 2 Sam. 11: 25; *they shall mount up with wings* כַּנְּשָׁרִים *as the eagles* Isa. 40: 31, Ex. 22: 1, Ps. 147: 10, and sometimes when it is a material or abstract noun, in which case the English idiom does not admit the article, *where there is* הַזָּהָב *gold* Gen. 2: 11 LXX. τὸ χρυσίον; *the king made* אֶת־הַכֶּסֶף *silver like stones* 1 Kin. 10: 27; *swallowed up* מִן־הַיַּיִן *of wine, led astray* מִן־הַשֵּׁכָר *by strong drink* Isa. 28: 7; *where shall* הַחָכְמָה *wisdom be found?* Job 28: 12 LXX. ἡ δὲ σοφία; *there is a superiority* לַחָכְמָה לָאוֹר מִן־הַסִּכְלוּת *to wisdom above folly like the superiority of light above darkness* מִן־הַחֹשֶׁךְ Eccles. 2: 13.

a. The article is used with abstracts as with other nouns both in a particular and generic sense. Thus חָכְמָה denotes *wisdom* in any relation, *multitude of years shall teach* חָכְמָה *wisdom* Job 32: 7, 38: 36, הַחָכְמָה is either wisdom in some particular relation e. g. 2 Chron. 1: 12 *the wisdom* which Solomon had asked for vs. 10: 11; 1 Kin. 7: 14 *the wisdom* to do all work; or wisdom in general, as an attribute distinguished from other attributes e. g. הַחָכְמָה *wisdom giveth life to its possessor* Eccles. 7: 12, 19. More frequently, however, the article is dropped with this class of words as unnecessary, e. g. חָכְמָה *wisdom* to do all work Ex. 36: 1, חָכְמָה *wisdom*, the attribute in general, *shall die with you* Job 12: 2, 15: 8, 28: 18.

b. The article is used with adjectives and participles to denote the class, which they describe, either in the plural הַחַיִּים *the living*, הַמֵּתִים *the dead* Isa. 8: 19, Eccles. 9: 5, or in the singular in a collective sense, *God shall judge* אֶת־הַצַּדִּיק וְאֶת־הָרָשָׁע *the righteous and the wicked* Eccl. 3: 17; *the proverb of* הַקַּדְמֹנִי *the ancients* 1 Sam. 24: 14, הַפָּלֵט *the escaped* Gen. 14: 13, הָאוֹרֵב *the liers in wait* Josh. 8: 19; so with Gentile nouns, which are properly adjectives, § 196. 1, הָאֱמֹרִי *the Amorite*, הַכְּנַעֲנִי *the Canaanite*, Gen. 15: 21. Sometimes a singular noun with the generic article is equivalent to an indefinite plural, stress being laid upon the species, though some only of those included under it are intended, הָעַיִט *the bird of prey* i. e. birds of prey *came down* Gen. 15: 11; *as one pursues* הַקֹּרֵא *the partridge* i. e. partridges *in the mountains* 1 Sam. 26: 20; הַמַּשְׁחִית *the* one *destroying* i. e. destroyers 1 Sam. 13: 17; כָּעֹמֶר *like the sheaf* i. e. sheaves Mic. 4: 12; וְהַחֹמֵר ... וְאֶת־הַלְּבֵנִים ... הַסִּיס 2 Kin. 7: 10; הַצַּדִּיק is contrasted with רְשָׁעִים Ps. 37: 16. So some explain הַנַּעַר Num. 11: 27 as equivalent to נְעָרִים but it may more naturally be *the young man* present to the writer's mind as the one who brought the message.

c. The Hebrew infinitive does not receive the article; הַדַּעַת Gen. 2: 9 and elsewhere, הַמַּכֶּרֶת 1 Kin. 10: 19, 2 Chron. 9: 18 and בָּהֶקְדֵּשׁ Ezek. 7: 14 may be regarded as nouns. In a very few instances the article is prefixed to finite tenses of the verb with the force of a relative pronoun, הַהֹלֵכוּא *who went* Josh. 10: 24, הַיִּוָּלֵד *that shall be born* Judg. 13: 8, הַמְקַדֵּשׁ *which he sanctified* 1 Chron. 26: 28, הַנִּמְצָאִים *who are present* 1 Chron. 29: 17, בָּהֵכִין *into* (the place) *which he prepared* 2 Chron. 1: 4, הַגִּיד־לוֹ Gen. 21: 3, הַמָּקוֹם Gen. 18: 21, 46: 27, Job 2: 11, הַשָּׁבָה Ruth 1: 22, 2: 6, 4: 3, הַנְּעָרָה 1 Kin. 11: 9, הַחֲגָבָה Ezek. 26: 17; so also 2 Chron. 29: 36, Ezr. 8: 25, 10: 14, 17, Isa. 56: 3, Jer. 5: 13, Dan. 8: 1. It is once prefixed to a preposition, הֲעָלֶיהָ *what* (was) *upon it* 1 Sam. 9: 24.

d. Nouns in the vocative are governed by the same rules in the reception of the article, as when not the object of address; thus with the article, הַשָּׁמַיִם *O heavens*, הָאָרֶץ *O earth* Deut. 32: 1, הַמְּהֻלָּל *O priests* Mal. 1: 6, הַמַּלְכָּה *O queen* Esth. 5: 3, הַחֵרְשִׁים *ye deaf*, הָעִוְרִים *ye blind* Isa. 42: 18, הַיּוֹשֶׁבֶת *thou that dwellest* Cant. 8: 13; so Ps. 123: 1, Ezek. 34: 9, 37: 4, 9; or without the article, when indefinite, גֶּבֶר *O man* Isa. 22: 12, (or it may stand absolutely and qualify the preceding word *a manly cast*) בָּנוֹת שַׁאֲנַנּוֹת *O careless women* Isa. 32: 9, אִכָּרִים *O ye husbandmen* Joel 1: 11, בָּנִים

ye children Prov. 4: 1, אֶרֶץ *O land* Eccles. 10: 16, 17, עֲקָרָה *O barren* Isa. 54: 1.

e. Like the Greek πᾶς, when followed by a definite noun כֹּל means *the whole* or *all* כָּל־הָאָרֶץ *the whole earth*, כָּל־הָעָם *all the people*, כָּל־הַגּוֹיִם *all the nations*, so with singular nouns in a collective sense כָּל־הָאִישׁ *all the men* Deut. 4: 3, כָּל־הֶעָרִים *all the cities* Jer. 4: 29, Ex. 1: 22, 1 Sam. 3: 17, Ps. 150: 6, Prov. 19: 6 or participles used collectively Isa. 4: 3, 43: 7; followed by an indefinite noun it means *every* or *any* כָּל־בַּיִת *every house* Isa. 24: 10, כָּל־דָּם *any blood* Lev. 17: 10, or *every sort of*, כָּל־עֵץ *every sort of a tree* Gen. 2: 9, 7: 14; though here as elsewhere the poets may omit the article § 250 כָּל־רֹאשׁ *the whole head* Isa. 1: 5 and it is occasionally dropped even in prose Jer. 52: 30. Connected with a negative adverb it forms a universal negation *no*, or if the words be rendered separately our idiom requires us to translate כֹּל by *any*, כָּל־מְלָאכָה לֹא תֵעָשֶׂה *no work shall be done* Ex. 12: 16, אֵין כָּל־חָדָשׁ *there is no new thing* Eccles. 1: 9, לֹא יוּכַל כָּל־אֱלֹהַּ *neither can any god* 2 Chron. 32: 15. Comp. οὐ δικαιωθήσεται πᾶσα σάρξ Rom. 3: 20.

f. The Hebrew article is sometimes found where the English requires the indefinite article or none at all; but it must not on that account be supposed that it ever loses its proper force or becomes equivalent to an indefinite article. The difference of idiom is due to a difference in the mode of conception. Thus in comparisons the Hebrew commonly conceived of the whole class of objects of which he spoke, while we mostly think of one or more individuals belonging to the class, כַּקֵּן *as* (the) *a nest*, Isa. 10: 14, כַּסֵּפֶר *as* (the) *a scroll* Isa. 34: 4, *like rending* הַגְּדִי (the) *a kid* Judg. 14: 6, *as* הַדְּבוֹרִים (the) *bees do* Deut. 1: 44, כַּשָּׁנִים *as* (the) *scarlet*, כַּשֶּׁלֶג *as* (the) *snow*, כַּתּוֹלָע *as* (the) *crimson*, כַּצֶּמֶר *as* (the) *wool* Isa. 1: 18; so Gen. 19: 28, 2 Sam. 17: 10, Isa. 24: 2 but this is not invariably the case כַּשֻּׁעָלִים *like foxes* Ezek. 13: 4, כַּצְּבָאִים *as roes* 1 Chron. 12: 8. Cases also not infrequently occur in which the article may either be inserted or omitted with equal propriety and without any material change of sense, according as the noun is to the mind of the speaker definite or indefinite. In speaking of the invasion of his father's flocks, David says, הָאַרְיֵה *the lion and* הַדֹּב *the bear came* 1 Sam. 17: 34, because he thinks of these as *the* enemies to be expected under the circumstances, comp. Am. 5: 19; had he thought of them indefinitely as beasts of prey he would have said, without the article. *a lion and a bear*. It is said, Gen. 13: 2, that Abram was very rich בַּמִּקְנֶה בַּכֶּסֶף וּבַזָּהָב *in* (the) *cattle, in* (the) *silver, and in* (the) *gold*, since these are viewed as definite and wellknown species of property; but in Gen. 24: 35 *he hath given him* צֹאן וּבָקָר וְכֶסֶף וְזָהָב *flocks and herds and silver and gold*, these are viewed indefinitely in Hebrew as in English. In the phrase וַיְהִי הַיּוֹם *and it came to pass on a day* 1 Sam. 1: 4, 14: 1, 2 Kin. 4: 8, 11: 18 the article is used to distinguish it as *the* day in which the event occurred, comp. הַהִוא Jer. 49: 36.

§ 249. Nouns are definite without the article in the following cases, viz.:

1. Proper nouns, which are definite by signification, אַבְרָהָם *Abraham*, כְּנַעַן *Canaan*, יְרוּשָׁלַם *Jerusalem*.

a. Proper names, originally applied in an appellative sense, sometimes retain the definite article, הַבַּעַל *the lord, Baal*, הַשָּׂטָן *the adversary, Satan*, הַנָּהָר *the river, the Euphrates*, הַיַּרְדֵּן *the descending* (stream), *the Jordan*, once poetically יַרְדֵּן Ps. 42: 7, § 250, and once indefinitely *a Jordan*, a stream like the Jordan Job 40: 23, הַשָּׁרוֹן *the plain, Sharon*, הַלְּבָנוֹן *the white* (mountain), *Lebanon*, so always in prose, but in poetry with or without the article, הַבָּשָׁן always in prose, and sometimes in poetry, *Bashan*, הַגִּלְעָד and גִּלְעָד *Gilead*, הַכַּרְמֶל *the garden, Carmel*, הַכִּכָּר *the circuit* of the Jordan, הַמִּצְפָּה *the watch-tower, Mizpah*, הָאָדָם and אָדָם *the* (first) *man, Adam*, הָאֱלֹהִים and אֱלֹהִים *the* (true) *God*. In חֲצִי שֵׁבֶט הַמְנַשֶּׁה *the half tribe of Manassch* Deut. 3: 13 and often elsewhere, the article makes more prominent the definiteness of the entire expression: it also occurs without the article, e. g. Num. 32: 33. Proper names of nations rarely admit the article כַּשְׂדִּים *the Chaldeans*, but הַכַּשְׂדִּים Jer. 37: 8, 9, פְּלִשְׁתִּים *the Philistines*, but הַפְּלִשְׁתִּים 1 Sam. 17: 52; אֲרַמִּים is used as a proper name 2 Kin. 8: 28, but in 2 Chron. 22: 5 has the article as a Gentile noun הָאֲרַמִּים, § 53. 2. *a*. Symbolical like real names do not receive the article, בָּגוֹדָה *Treacherous* Jer. 3: 7, שָׁבָה *Apostate* ver. 6, שׁוֹבָב Hos. 5: 13.

2. Nouns with suffixes, which are rendered definite by the appended pronoun, אָבִינוּ *our father*, שְׁמוֹ *his name*, but in Greek ὁ πατὴρ ἡμῶν, τὸ ὄνομα αὐτοῦ.

a. There are a few instances in which the article is prefixed to nouns having suffixes. It is emphatic in הַחֲצִי *the* (other) *half of them* Josh. 8: 33, opposed to a preceding חֶצְיוֹ *one half of them*; see also בַּחֲצִיהֶם Isa. 24: 2, הֲחֶצְיָהּ Lev. 27: 23, בֶּעֱלִיתוֹ (in some editions) Ezra 10: 14; בְּתוֹךְ הָאָהֳלִי *in the midst of my tent* Josh. 7: 21, בְּתוֹךְ הַדִּבְרוֹ *in the midst of its fold* Mic. 2: 12, כָּל־הֲרִיוֹתֶיהָ *the whole of its women with child* 2 Kin. 15: 16; in לַעֲטָיָה Prov. 16: 4 it distinguishes the noun עֲטָיָה from the preposition לְעַט. In וְנִבְּאָם Num. 12: 6 the suffix is to be taken objectively and the expression is indefinite *a prophet to you*.

b. A suffix which is the direct object of a participle does not supersede the necessity of the article, הַמַּכֶּכְתּוּ *the* (one) *smiting him* Isa. 9: 12, הַמַּעֲלֶכָה *the* (one) *bringing thee up* Ps. 81: 11, הַמַּעֲטָרֵכִי *the* (one) *crowning thee* Ps. 103: 4, Deut. 13: 6, Dan. 11: 6.

3. Nouns in the construct state before a definite noun, whether this has the article כּוֹכְבֵי הַשָּׁמָיִם *the stars of heaven* Gen. 26: 4, רַגְלֵי הַכֹּהֲנִים *the feet of the priests* Josh. 3: 13; is a proper name, שִׁבְטֵי יִשְׂרָאֵל *the tribes of Israel* Ex. 24: 4, דְּבַר יְהוָה *the word of Jehovah* Gen. 15: 1; has a pronominal suffix, בִּכּוּרֵי מַעֲשֶׂיךָ *the first-fruits of thy la-*

bours, נְשֵׁי־בָנָיו *the wives of his sons* Gen. 7: 13; or is itself definite by construction, מְעָרַת שְׂדֵה הַמַּכְפֵּלָה *the cave of the field of Machpelah* Gen. 23: 19, אֲרוֹן בְּרִית־יְהוָה *the ark of the covenant of Jehovah* Josh. 3: 3, עֹשֵׂה מְלֶאכֶת עֲבוֹדַת בֵּית־יְהוָה *the doer of the work of the service of the house of Jehovah* 2 Chron. 24: 12.

a. When the governed noun is indefinite, the whole expression will be indefinite, כַּף־אִישׁ *a man's hand* 1 Kin. 18: 44, כַּף הָאִישׁ *the hand of the man* 2 Sam. 14: 16; מִזְבַּח נְחֹשֶׁת *an altar of brass* 2 Chron. 4: 1, מִזְבַּח הַנְּחֹשֶׁת *the altar of brass* 2 Chron. 7: 7. So אִישׁ אֱלֹהִים *a man of God* 1 Kin. 13: 1, אִישׁ הָאֱלֹהִים *the man of God* ver. 4; מַלְאַךְ אֱלֹהִים *an angel of God* 1 Sam. 29: 9, מַלְאַךְ הָאֱלֹהִים Judg. 6: 20, מַלְאַךְ יְהוָה ver. 21 *the angel of God* or *of Jehovah.* In a very few instances the expression is commonly reckoned indefinite notwithstanding the definiteness of the governed noun, but most, if not all of these can be otherwise explained; thus in Gen. 9: 20 the article is generic, as we might say *began* to play *the husbandman,* comp. also Lev. 14: 34, Deut. 22: 19, 1 Sam. 4: 12, Jer. 13: 4.

b. Nouns in the construct are occasionally found with the article. There is but one example of this in which the construct differs in its letters from the absolute, and in this instance the governed noun is preceded by a preposition so that the expression could be made definite in no other way, לְדֶרֶךְ הַשֹּׁכְנֵי בָאֳהָלִים *the way of the dwellers in tents* Judg. 8: 11. In the remaining instances the sense is sometimes complete without the governed word, which is added as if by an afterthought, לְאָהֳלָה עֵלָה *to the tent* viz. *Sarah's* Gen. 24: 67, הַיָּתֵד הָאֹרֶג *the pin* viz. *of the web* Judg. 16: 14, 2 Kin. 16: 17, 2 Chron. 15: 8 (if the text is correct), Ps. 123: 4, or may have been coordinated by a loose sort of apposition, § 256. 2, חֲלִצַת שֵׁשׁ *the coat of linen* Ex. 28: 39, 39: 27, הַמִּזְבַּח הַנְּחֹשֶׁת *the altar of brass* 2 Kin. 16: 14, Zech. 4: 7, or subordinated in a general way, § 256. 3, הַמִּזְבֵּחַ בֵּית־אֵל *the altar of* (or *at*) *Bethel* 2 Kin. 23: 17, Gen. 31: 13, 1 Chron. 15: 27, Isa. 36: 8, Jer. 48: 32, Ezek. 47: 15. Sometimes the definiteness of the entire expression is thus more clearly marked, as when several nouns in the construct occur together הַקִּבְרֵי אִישׁ הָאֱלֹהִים *the grave of the man of God* 2 Kin. 23: 17, 2 Chron. 8: 16, Ezr. 8: 29, Ezek. 46: 19, particularly when one compound phrase precedes another אֲרוֹן בְּרִית אֲדוֹן כָּל־הָאָרֶץ Josh. 3: 11, Esth. 6: 1; so after בֵּן Josh. 8: 11, 1 Kin. 14: 24, Jer. 25: 26, Ezek. 45: 16, Zeph. 3: 19, and before an infinitive which is equivalent to a relative clause 2 Sam. 19: 25, Ex. 9: 18. See also 1 Sam. 26: 22 K'thibh, 2 Kin. 7: 13 K'thibh, where the K'ri omits the article. It is once found with a participle in the construct state before its object, Ezek. 17: 15; the article in סִפְרֵי הַמִּקְנָה *the bill of the purchase* Jer. 32: 12 identifies it with the one spoken of in the preceding verse.

c. Gentile nouns, derived from a compound proper name, receive the article before the second member of the compound, בֶּן־הַיְמִינִי *the Benjamite*

Judg. 3: 15, בֵּית הַשִּׁטָּתִי *the Bethshemite* 1 Sam. 6: 14, בֵּית הַבַּעְלִי *the Bethlehemite* 1 Sam. 16: 18, אֲבִי הָעֶזְרִי *the Abiezrite* Judg. 6: 11, though this word also appears in the abbreviated form הָאֶזְרִי Num. 26: 30; בֵּית הָאֵלִי *the Bethelite* 1 Kin. 16: 34, חֲצַר הַשֵּׁנְחִי 1 Chron. 2: 54.

§ 250. The article is frequently omitted in the brief and emphatic language of poetry, where it would be required in prose, מַלְכֵי־אֶרֶץ *kings of* (the) *earth* Ps. 2: 2, לִפְנֵי שָׁמֶשׁ *in the presence of* (the) *sun* Ps. 72: 17, אָמַר שֹׁמֵר (the) *watchman says,* (the) *morning comes* Isa. 21: 12; *to give* וְקֹדֶשׁ וְצָבָא *both sanctuary and host to be trampled* Dan. 8: 13.

a. Thus the article is almost entirely wanting in Ps. 72. It is also omitted from certain poetical or archaic phrases אֶרֶץ וְשָׁמַיִם Gen. 2: 4, Ps. 148: 13, קֹנֵה שָׁמַיִם וָאָרֶץ Gen. 14: 19, 22, but חַיַּת הָאָרֶץ, except Ps. 59: 14; or words עֵדֵי but חֲסִידָה; several of these seem to have assumed almost the character of proper names אֹהֶל מוֹעֵד *the Tent of meeting,* מָעוֹן *the Dwelling-place* 1 Sam. 2: 29, 32, אֱלֹהִים *God,* עֶלְיוֹן *the most High,* קָדוֹשׁ *the Holy One* Job 6: 10, Isa. 40: 25, Hab. 3: 3, שַׁדַּי *the Almighty,* יְהוָה צְבָאוֹת, only four times אֱלֹהֵי הַצְּבָאוֹת *the God of hosts,* שְׁאוֹל *the region of the dead,* תֵּבֵל *the world,* תְּהוֹם *the abyss,* צָפוֹן and הַצָּפוֹן *the north,* תֵּימָן only once הַתֵּרָנִים Zech. 6: 6 *the south.* In the parallels of poetry the article is sometimes omitted in one clause and retained in the other Nah. 1: 5, Zeph. 1: 3, Ps. 148: 9, 10.

b. The article is often dropped from familiar and frequently repeated expressions in prose, לְעֵת עֶרֶב *at evening-time* Gen. 24: 11, מִזְרַח שֶׁמֶשׁ *sunrise* Deut. 4: 47, עַד אַחֲרִית שָׁנָה *to* (the) *year's end* Deut. 11: 12, שַׂר צָבָא (the) *captain of* (the) *host* 1 Kin. 16: 16, and such phrases as *shake* רֹאשׁ (the) *head* Isa. 37: 22, *put forth* יָד the *hand* Gen. 37: 22, *lay* יָד עַל־פֶּה the *hand upon* the *mouth* Mic. 7: 16, בְּיָד *with* the *hand* 1 Sam. 19: 9, *pounce* בְּכֶתֶף *upon* the *shoulder* i. e. assail *the Philistines* Isa. 11: 14, *turn* עֹרֶף the *back and not* פָּנִים the *face* Jer. 2: 27, *lift up* לְקֶרֶן the *horn* 1 Chron. 25: 5, מִכַּף־רֶגֶל וְעַד־רֹאשׁ *from* the *sole of* the *foot to* the *head* Isa. 1: 6, Gen. 3: 15, Lev. 11: 3, Ps. 119: 2, Ezek. 25: 6, בְּרֵאשִׁית *in* the *beginning* Gen. 1: 1, LXX ἐν ἀρχῇ, so that it is not necessary to assume that this is in the construct before the following clause, מֵרֵאשִׁית *from* the *beginning* Isa. 46: 10; also in geographical and architectural details, from such technical terms as וּגְבוּל *and* the *border* Josh. 13: 23, רֹחַב the *breadth,* קוֹמָה the *height* Ex. 27: 18, 2 Chron. 3: 3; likewise in adverbial phrases אַפַּיִם אַרְצָה *with* the *face to* the *ground* Gen. 19: 1. Comp. in English *from head to foot, arm-in-arm,* etc. So פָּנִים אֶל־פָּנִים Gen. 32: 31, פֶּה אֶל־פֶּה Num. 12: 8 etc.

c. In enumerations, where attention is exclusively directed to the proper meaning of the words irrespective of their particular relations, the thought may be generalized by omitting the article and putting each noun in the singular, thus giving both conciseness and vigour to the expression,

אִישׁ וְאִשָּׁה טָלֶה וְשֶׂה־אֶחָד שׁוֹר וָשֶׂה חֲמוֹר *man and woman, young and old, and ox and sheep and ass* Josh. 6: 21, Isa. 9: 13, Jer. 44: 7, Ezek. 39: 9. In this and other cases the indefinite singular in a collective sense is used instead of the plural אֲנָשִׁים רָצִים *footmen* Judg. 20: 2, אִישׁ־חַיִל *men of strength* 1 Chron. 26: 8, Ex. 35: 22, Deut. 3: 5, 1 Sam. 21: 5, 2 Chron. 14: 7, Ezek. 6: 7, 11: 6, Prov. 11: 14, and interchanging with it Ps. 12: 2, Prov. 16: 12-15. In Gen. 19: 12 חָתָן *Son-in-law* is indef. sing. because the speaker was uncertain whether there was one or more or none at all.

d. When two definite nouns are connected by *and* the article is commonly repeated Deut. 7: 19; it may however, particularly in poetry, stand only before the first and be understood with the second הַקֹּרְאִים לָרָע וְלַטּוֹב *woe unto the* (persons) *decreeing unrighteous decrees* וְהַכֹּתְבִים *and writing, etc.* Isa. 10: 1, הַנֵּבֶל וְכִנּוֹר *O psaltery and harp* Ps. 57: 9, הַכִּסֵּא וְיָלֹתַּי Neh. 1: 5 comp. Deut. 7: 9, 12, הַשֹּׁמֵר וְיָלֹתַּי (though in different clauses) Josh. 10: 13, Ps. 19: 11, 34: 13; in Jer. 40: 4 it is omitted from the former of two words אֱלֹהִים יְאֵלֹהַיָּשָׁר.

§ 251. There is no indefinite article in Hebrew; indefinite nouns are sufficiently characterized as such by the absence of the article. Thus, נָהָר *a river* Gen. 2: 10, גַּם־רֶכֶב גַּם־פָּרָשִׁים *both chariots and horsemen* Gen. 50: 9, חָלָב וּדְבַשׁ *milk and honey* Ex. 3: 8, עוֹל יָמִים *an infant of days* Isa. 65: 20.

a. The numeral אֶחָד *one* is occasionally employed in the sense of an indefinite article, סַל אֶחָד *a basket* Ex. 29: 3, אִישׁ אֶחָד *a man* Judg. 13: 2, 1 Sam. 1: 1, 1 Kin. 22: 9, Dan. 8: 13, or in the construct before a plural noun, אַחַת הַנְּבָלוֹת *one of the foolish women* i. e. *a foolish woman* Job 2: 10, Gen. 21: 15, 22: 2, 37: 20, Judg. 19: 13. In some passages, however, which are commonly explained in this manner, אֶחָד may retain its proper numeral force, as נָבִיא אֶחָד *one prophet* 1 Kin. 13: 11, alone remaining in Bethel, לִפְתֵּם אֶחָד 1 Kin. 19: 4, 5, not a cluster but a solitary shrub, פַּרְעֹשׁ אֶחָד *a single flea* 1 Sam. 24: 15, 26: 20.

Adjectives and Demonstratives.

§ 252. 1. Attributive adjectives and participles are commonly placed after the noun to which they belong and agree with it not only in gender and number but in definiteness, that is to say, if the noun is indefinite they remain without the article, but if the noun is made definite, whether by the article or in any of the ways specified in § 249, they receive the article, בֵּן חָכָם *a wise son*

Prov. 10: 11, חָתָן יֹצֵא *a bridegroom going out* Ps. 19: 6, הָאָרֶץ הַטּוֹבָה *the good land* Deut. 1: 35, רַחֲמֶיךָ הָרַבִּים *thy manifold mercies* Neh. 9: 19, יְהוֹדָה הַטּוֹב 2 Chron. 30: 18. If more than one adjective accompany a definite noun, the article is repeated before each of them, הַשֵּׁם הַנִּכְבָּד וְהַנּוֹרָא *the glorious and fearful name* Deut. 28: 58, 10: 17.

a. The adjective רַבִּים *many* is in a few instances, for the sake of greater emphasis, prefixed to the noun which it qualifies, רַבִּים בָּנִים *many sons* 1 Chron. 28: 5, רַבּוֹת פְּעָמִים *many times* Neh. 9: 28, so Ps. 32: 10, 89: 51, Jer. 16: 16. Other instances are rare, זָר מַעֲשֵׂהוּ *his strange work*, נָכְרִיָּה עֲבֹדָתוֹ *his strange task* Isa. 28: 21, צַדִּיק עַבְדִּי *my righteous servant* Isa. 53: 11, and are mostly susceptible of a different explanation; thus each of the examples above given may be regarded as forming a brief clause *his work is strange, my servant* as a *righteous* person.

b. Some exceptional cases occur, in which an adjective qualifying a definite noun does not receive the article, the whole expression being made definite by the article which precedes the noun, הֶעָגָלָה חֲדָשָׁה *the new cart* 2 Sam. 6: 3, הַגֶּפֶן נָכְרִיָּה *the strange vine* Jer. 2: 21, Ezek. 39: 27, Dan. 8: 13, 11: 31, or when the noun is made definite by a suffix, אֲחִיכֶם אַחֵר *your other brother* Gen. 43: 14, Ezek. 34: 12, Hag. 1: 4, or is a proper name בְּנָיָהוּ צְבָאִי Ps. 68: 28. In הֶבְאָם רָעָה *an evil report respecting them* Gen. 37: 2, the suffix denotes the object and the noun is really indefinite. Comp. § 249. 2. *a.* In הַיָּם גָּדוֹל Ps. 104: 25 the adjective does not directly qualify the noun, but is in apposition with it, or it may even be viewed as a predicate, not *the great sea* but *the sea, great and wide*, equivalent to which is *great* etc. So הַמְּלָאכָה נִמְאָסָה וְנִמָּס *the property* that was *despicable and refuse* 1 Sam. 15: 9, הָאָרֶץ אַחֶרֶת *the land, another* than this, *where* etc. Jer. 22: 26.

c. On the other hand the article is sometimes dropped from the noun, but retained before the adjective, חֲצַר הַגְּדוֹלָה *the great court* 1 Kin. 7: 12, אִישׁ הֶעָשִׁיר *the rich man* 2 Sam. 12: 4, בּוֹר הַגָּדוֹל *the great well* 1 Sam. 19: 22, Gen. 1: 21, 41: 26, Num. 11: 25, 2 Kin. 20: 4 K'ri, Neh. 9: 35, Ps. 104: 18, Isa. 46: 12, Jer. 6: 20, 32: 14, Ezek. 9: 2, 21: 19, 40: 31, 47: 16, Zech. 4: 7.

d. A participle with the article thus joined to a definite noun is equivalent to a relative clause הָאִישׁ הָעֹמֵד *the man who stood* Zech. 1: 10, Ex. 36: 4, Num. 5: 8; so with proper nouns יְהוָה הַנִּרְאָה *Jehovah, who appeared* Gen. 12: 7, 13: 5, 16: 13, Ex. 11: 5, Esth. 7: 6, Ps. 103: 3-5, Isa. 45: 3, Jer. 37: 10; so sometimes even with indefinite nouns בְּכָל־חַיַּת הָרֹמֶשֶׂת *every beast that moves* Gen. 1: 28, 1 Sam. 25: 10, Ps. 62: 4, Jer. 27: 3, Dan. 9: 26, while on the other hand the participle without the article may be used in the same sense with definite nouns הָאִישׁ עֹשֵׂה *the man who made the earth tremble* Isa. 14: 16, 1 Kin. 11: 8, 2 Kin. 10: 6. In חֵלֶךְ תָּמִים *he who walketh uprightly* Mic. 2: 7 the article properly belonging to the participle is

attached to a closely related word which forms with it one compound expression.

e. In a few instances a participle belongs to a preceding suffix רַגְלֶיהָ בָּאָה *pedes ejus introeuntis, her feet as she came in* 1 Kin. 14: 6, 2 Kin. 11: 5, Ps. 69: 4; so an adjective Eccles. 4: 10.

f. Adverbs are sometimes used as attributive adjectives מִנְחָה תָּמִיד *a continual meat-offering* Lev. 6: 13 (but in the construct Num. 4: 16, § 257. 6. *c.*), עֹלֹת חִנָּם *burnt-offerings that cost nothing* 2 Sam. 24: 24, Ps. 69: 5, Lam. 3: 52, שִׂמְלֹת הַרְבֵּה מְאֹד *very many garments* Josh. 22: 8, Deut. 3: 5, 2 Sam. 8: 8, 12: 2; so מְעַט Isa. 10: 7, Eccles. 9: 14, which twice assumes a plural form, Ps. 109: 8, Eccles. 5: 1; they also occur as predicate adjectives Gen. 15: 1, 47: 9, Jer. 42: 2. A phrase may also be joined to nouns as an attributive אֹיְבֵי בְנֶפֶשׁ *my enemies in soul* i. e. cordial haters Ps. 17: 9, אֱנוֹשׁ מִן־הָאָרֶץ *man of the earth* Ps. 10: 18, נִסְכֵּיהֶם מִדָּם *their drink offerings of blood* Ps. 16: 4, 7: 9, Prov. 26: 1.

2. Demonstrative pronouns follow the same rule of position and agreement, only the nouns which they qualify are invariably definite, § 248. 2, הַיּוֹם הַזֶּה *this day* Gen. 7: 13, הַדְּבָרִים הָאֵלֶּה *these things* Gen. 15: 1, הָאֲנָשִׁים הָהֵמָּה *those men* Num. 9: 7. If both an adjective and a demonstrative qualify the same noun, the demonstrative is placed last, הָאָרֶץ הַטּוֹבָה הַזֹּאת Deut. 9: 6, שָׁנִים הַטּוֹבוֹת הַבָּאוֹת הָאֵלֶּה *these good years that* (are) *coming* Gen. 41: 35, 1 Sam. 17: 25, 2 Chron. 20: 15.

a. The demonstrative זֶה occasionally stands emphatically before its noun, זֶה מֹשֶׁה *this Moses* Ex. 32: 1, where it is probably contemptuous like the latin *iste*, זֶה לַחְמֵנוּ *this our bread* Josh. 9: 12, Judg. 5: 5, 1 Sam. 17: 55, 56, Ps. 34: 7, 48: 15, 104: 25, זֶה הָעָם *this people* Isa. 23: 13, Hab. 1: 11; so הוּא e. g. הוּא הַמֶּלֶךְ *that king Ahaz* 2 Chron. 28: 22, הוּא הַלַּיְלָה הַזֶּה *this same night* Ex. 12: 42. The demonstrative both follows the noun and is repeated after the adjective in הַגּוֹיִם הָאֵלֶּה הַנִּשְׁאָרִים הָאֵלֶּה *these nations these that remain* Josh. 23: 7, 12; it precedes attributives linked with following words in הָעָם הַזֶּה הָרָע *this people that is evil, that refuse* etc. Jer. 13: 10.

b. The article is sometimes omitted from the demonstrative, הַדּוֹר זֶה *this generation* Ps. 12: 8, בַּלַּיְלָה הוּא *in that night* Gen. 19: 33, 30: 16, 32: 23, 1 Sam. 19: 10, particularly if the noun is made definite by means of a suffix שְׁבֻעָתִי זֹאת *this my oath* Gen. 24: 8, אֹתֹתַי אֵלֶּה *these my signs* Ex. 10: 1, 14: 2, Deut. 11: 18, Josh. 2: 14, 20, Judg. 6: 14, 1 Kin. 22: 23, 2 Chron. 18: 22, 24: 18, Jer. 31: 21.

c. The article is still more rarely dropped from the noun, מָלֵא דָבָשׁ

חַמָּה *this small quantity of honey* 1 Sam. 14: 29, אִישׁ אֶפְרָתִי הַזֶּה *that Ephrathite* 17: 12, 17, Jer. 40: 3 K'thibh, חֳלִי זֶה *this sickness* 2 Kin. 1: 2, 8: 8, Ps. 80: 15, יוֹם הַזֶּה Mic. 7: 12, see ver. 11.

NUMERALS.

Cardinal Numbers.

§ 253. **1.** The numeral אֶחָד *one* is treated like other adjectives, and follows the rules of position and agreement already given, בְּמָקוֹם אֶחָד *one place* Gen. 1: 9, הַיְרִיעָה הָאַחַת *the one curtain* Ex. 26: 2.

a. In a very few instances the noun is in the construct before the numeral *one*, כִּכַּר־אֶחָד *one law* Lev. 24: 22, אֲרוֹן אֶחָד *a chest* 2 Kin. 12: 10, פַּחַת אַחַד עַבְדֵי אֲדֹנִי *one prefect of the servants of my master* Isa. 36: 9, comp. § 257. 6. *c*; הַרְרֵי־אֶלֶף Ps. 50: 10 in like manner may mean *a thousand mountains* or it may mean *mountains of a thousand* i. e. where cattle rove by thousands. Jer. 52: 20 K'ri, 2 Chron. 4: 15 omit the article from אֶחָד though joined to a definite noun, after the analogy of other numerals. In other cases the article is omitted because the numeral is really indefinite, אֲחִיכֶם אֶחָד *one brother of yours* Gen. 42: 19, the particular person not being determined; but when the fact is reported to Jacob ver. 33, the selection had been made, and the article is accordingly employed; so הַכֶּבֶשׂ אֶחָד Num. 28: 4, הָאִשׁ אֶחָד 1 Sam. 13: 17, 18, Jer. 24: 2, Ezek. 10: 9. In הָאִישׁ אֶחָד Num. 16: 22, the numeral is a predicate, not *the one man* but *the man* Korah *alone* (lit. being *one*); or He may be interrogative § 231. 3. *a*.

b. The article may be attached to אֶחָד in various senses; thus הָאֶחָד means *the one* Gen. 19: 9 i. e. this one man in implied contrast with the entire community; *the first* in a series Gen. 2: 11, 42: 27; *the* remaining *one* Gen. 42: 13, *the* other *one* Lev. 14: 22, 15: 15; *the* well known *one* Gen. 42: 32, 44: 28; *the one*, who performed the action referred to, definitely conceived, 2 Kin. 6: 3, 5; with the generic article *one* considered in relation to other numbers Eccles. 4: 9, or it may be *the one* spoken of in ver. 8.

c. אֶחָד is sometimes strengthened by the partitive מִן, which appears to be redundant אֶבְיוֹן מֵאַחַד אַחֶיךָ *a poor man of one of thy brethren* Deut. 15: 7, Lev. 4: 2 (see vs. 13, 22, 27), 5: 13, Ezek. 18: 10.

2. The other cardinal numbers are joined to nouns as follows, viz.:

(1.) They commonly stand before the noun to which they belong and in the absolute state, אַרְבָּעָה מְלָכִים *four kings* Gen. 14: 9, שִׁשִּׁים עִיר *sixty cities* Deut. 3: 4, מֵאָה

צִמֻּקִים *a hundred cakes of raisins* 2 Sam. 16: 1, שֵׁשֶׁת אֲלָפִים פָּרָשִׁים *six thousand horsemen* 1 Sam. 13: 5.

(2.) Such as have a distinct form for the construct (viz. 2-10, מֵאָה *hundred*, אַלְפֵי *thousands*) may also stand before the noun in the construct state, שְׁנֵי בָנִים *two sons*, prop. *two of sons* Gen. 10: 25, אַרְבַּעַת יָמִים *four days* Judg. 11: 40, מֵאָה אֲדָנִים *a hundred sockets* Ex. 38: 27, שְׁלֹשֶׁת אַלְפֵי גְמַלִּים *three thousand camels* Job 1: 3.

a. It should be observed that the partitive relation is expressed not by the construct form of the numeral שְׁנֵי הַמְּאֹרֹת not *two of the lights* but *the two lights* Gen. 1: 16, שֵׁשֶׁת הַקָּנִים *the six branches* Ex. 25: 33, but by the preposition מִן, e. g. אֶחָד מִן־הַנְּעָרִים *one of the young men* 2 Kin. 4: 22, שִׁשָּׁה מִשְּׁמוֹתָם *six of their names* Ex. 28: 10.

b. The numbers *two, three, four,* and *seven,* occur with the suffixes of pronouns which are in apposition with them, שְׁנֵינוּ אֲנַחְנוּ *we, both of us* 1 Sam. 20: 42, also שְׁנֵינוּ־אֲנַחְנוּ *we two* 1 Kin. 3: 18, שְׁנֵיהֶן *they two* or *both of them* 1 Sam. 25: 43, שְׁלַשְׁתֶּם *ye three*, שְׁלָשָׁתָם *they three* Num. 12: 4, אַרְבַּעְתָּם *they four* Dan. 1: 17, שִׁבְעָתָם *they seven* 2 Sam. 21: 9 K'ri. The following numerals occur with pronominal suffixes having a possessive sense, חֲמִשָּׁתְךָ *thy fifty*, חֲמִשָּׁיו *his fifty* 2 Kin. 1: 10, חֲמִשֵּׁיהֶם *their fifties* ver. 14, אַלְפִּי *my thousand* Judg. 6: 15, אַלְפֵיכֶם *your thousands* 1 Sam. 10: 19, רִבְבֹתָיו *his ten thousands* 1 Sam. 18: 7.

(3.) Less frequently the numerals stand after the noun in the absolute state, יֶעֱלוֹת שֶׁבַע *seven steps* Ezek. 10: 22, אֲתֹנֹת עֶשְׂרִים *twenty she-asses* Gen. 32: 16, כִּכָּר מֵאָה־אֶלֶף *a hundred thousand talents* 1 Chron. 22: 14.

§ 254. **1.** The units (including *ten*), whether they stand singly or are compounded with other numbers, agree with their nouns in gender, שְׁלֹשׁ דְּלָתוֹת *three leaves* Jer. 36: 23, שְׁלֹשָׁה סַלֵּי חֹרִי *three baskets of bread* Gen. 40: 16, אַרְבָּעָה עָשָׂר כְּבָשִׂים *fourteen lambs* Num. 29: 15; the other numerals observe no distinction of gender.

a. When the units qualify מֵאוֹת *hundreds* or אֲלָפִים *thousands*, their gender is determined by that of these words respectively. In שְׁלֹשֶׁת נְשֵׁי־בָנָיו *the three wives of his sons* Gen. 7: 13, the masculine adjective is probably to be explained by the fact that the noun, though in reality feminine has a masculine termination.

2. Nouns accompanied by the units (2-10) are almost

invariably plural, while those which are preceded by the tens (20-90) or numbers compounded with them (21, etc.), are commonly put in the singular, אַרְבָּעִים יוֹם וְאַרְבָּעִים לָיְלָה *forty days and forty nights* Gen. 7: 4, אַרְבַּע וּשְׁלֹשִׁים שָׁנָה *four and thirty years* Gen. 11: 16, עֶשְׂרִים שָׁנָה וְשֶׁבַע שָׁנִים *twenty years and seven years* Gen. 23: 1; 1 Kin. 14: 20, 16: 29.

a. This phenomenon is probably to be accounted for upon a principle analogous to that by which the anomalous terminations for gender in the numerals has been explained, § 224. 2. When the numeral has itself a plural form, as it has in the tens, the plurality of the entire expression is sufficiently indicated without giving a plural ending to the noun likewise. But with the units which have a singular termination, the noun must take a plural form. It may be observed, however, that this peculiarity chiefly affects a certain class of nouns, viz. those which are most frequently numbered, and in which, consequently, the tendency to abbreviate the expression by retrenching the plural ending is most strongly manifested, and in which, moreover, each unit is like every other, so that plurality is but the repetition of the same thing. These are such as אִישׁ *man*, נֶפֶשׁ *soul*, רַגְלִי *footman* and various measures of time, space, weight, etc., e. g. שָׁנָה *year*, יוֹם *day*, אַמָּה *cubit*, שֶׁקֶל *shekel*. These nouns are also found, though less constantly, in the singular with *hundreds* and *thousands*, תְּשַׁע מְאוֹת שָׁנָה *nine hundred years* Gen. 5: 5, אֶלֶף אַמָּה *a thousand cubits* Num. 35: 4, and with the numbers from 11 to 19, חֲמִשָּׁה עָשָׂר שֶׁקֶל *fifteen shekels* Lev. 27: 7. Comp. in German *hundert Fuss lang, funfzig Pfund schwer*, and in English *twenty head of cattle, a ten foot pole*. Other nouns are similarly affected, but with less regularity עֶשְׂרִים קֶרֶשׁ *twenty planks* Ex. 26: 18, 19 but עֶבְרִים Ex. 36: 23-25, שְׁלֹשׁ־עֶשְׂרֵה עִיר *thirteen cities* Josh. 21: 33, אֶלֶף חֲמָנֶיךָ Cant. 4: 4, מָאתַיִם מָנֶה 2 Chron. 9: 15.

b. The numbers from 2 to 10 are very rarely found with singular nouns, שְׁמֹנֶה שָׁנָה *eight years* 2 Kin. 22: 1, שָׁלֹשׁ אמה *three cubits* 25: 17 K'thibh where the K'ri has אַמּוֹת, שְׁנֵי חֹמֶר Ex. 16: 22, שְׁלֹשָׁה אֶלֶף Ezek. 45: 1. The tens are occasionally followed by the plural שְׁלֹשִׁים חֲבֵרִים *thirty companions* Judg. 14: 11, שְׁבִּעִים בְּנֵי־חַיִל *eighty sons of valour* 2 Chron. 26: 17, אַרְבָּעִים וּשְׁנֵי יְלָדִים *forty-two children* 2 Kin. 2: 24, אַרְבָּעִים אַדְנֵי־כֶסֶף Ex. 26: 19; see also Gen. 18:. 24, 26, 28, Ex. 15: 27, Josh. 7: 21, Judg. 1: 7, 12: 14, 2 Sam. 9: 10, 1 Kin. 4: 13, 2 Kin. 10: 1, 13: 7, 15: 20; in Ezra 8: 6-14 חֲמִשִּׁים is in explanatory apposition with the numerals. When the noun precedes the numeral it is always put in the plural, נֶפֶשׁ excepted Gen. 46: 26, 27, Num. 31: 40, 46, Jer. 52: 29, 30.

c. In enumerations of familiar objects the noun is sometimes omitted, when the meaning is sufficiently plain from the connection, עֲשָׂרָה זָהָב *ten* (shekels) *of gold* Gen. 24: 22, שְׁלֹשׁ מֵאוֹת כֶּסֶף *three hundred* (shekels) *of silver* Gen. 45: 22, שְׁנֵי־עֶשְׂרֹנִים *two* (loaves) *of bread* 1 Sam. 10: 4, שֵׁשׁ־עֶשְׂרֵי *six* (ephahs) *of barley* Ruth 3: 15. In measurements, the word אַמָּה *cubit*

is occasionally preceded by the preposition בְּ, thus אַרְבַּע בָּאַמָּה *four by the cubit* i. e. four cubits.

d. The attributive with a noun in the singular after the tens or higher numerals may be in the singular Judg. 18: 17, 20: 2, 1 Sam. 22: 18, 1 Kin. 20: 16, Cant. 4: 4, or in the plural Judg. 18: 16, 1 Kin. 1: 5, 20: 30.

3. Compound numbers may either proceed from the higher to the lower denomination, אֶלֶף מָאתַיִם חֲמִשִּׁים וְאַרְבָּעָה *a thousand two hundred fifty and four* Neh. 7: 34, or the reverse, שֶׁבַע וּשְׁלֹשִׁים וּמְאַת שָׁנָה *seven and thirty and a hundred years* Ex. 6: 16. The noun sometimes stands at the beginning or end of the entire series as in preceding examples, and sometimes it is repeated after each numeral, מֵאָה שָׁנָה וְשִׁשִּׁים שָׁנָה וְשֶׁבַע שָׁנִים *a hundred years and twenty years and seven years* Gen. 23: 1.

4. Numeral adjectives may receive the article when they represent an absolute number, or the noun is not expressed; but when they are joined to a definite noun the latter alone receives the article, הַשְּׁנַיִם (*the*) *two are better than* הָאֶחָד (*the*) *one* Eccles. 4: 9, הָאַרְבָּעִים *the forty* Gen. 18: 29, הַחֲמִשִּׁים הַצַּדִּיקִם *the fifty righteous* ver. 28, שְׁתֵּי בְנֹתָיו *his two daughters* 19: 30, אַרְבָּעִים הַיּוֹם *the forty days* Deut. 9: 25; Judg. 7: 7, 22, 18: 17, 1 Sam. 17: 14, 2 Sam. 23: 22, 23, 1 Kin. 7: 41-44, 2 Chron. 25: 9.

a. The rule is the same when the noun is made definite by a suffix חֲמֻשָׁתֶיהָ *her five damsels* 1 Sam. 25: 42, Job 42: 7 or by being in the construct state, Gen. 49: 28, 1 Sam. 17: 18, Job 2: 11. The article may be attached to a noun in apposition הַשְּׁלֹשִׁים הַכֶּסֶף *the thirty* shekels of *silver* Zech. 11: 13, שֵׁשׁ הַשְּׂעֹרִים הָאֵלֶּה *these six* ephahs of *barley* Ruth 3: 17. It is joined both to the numeral and to an accompanying participle in הַצֹּאָה הַיְרֵכִים Ex. 28: 10. In a few instances it is given to the numeral and not to the noun הַחֲמִשִּׁים וּמָאתַיִם אִישׁ *the two hundred and fifty men* Num. 16: 35, שְׁנַת הַחֲמִשִּׁים שָׁנָה *the year of fifty years* i. e. the fiftieth year Lev. 25: 10, 11, where the article is used to give definiteness to the preceding noun in the construct. In הַיְלָדִים הָאֵלֶּה אַרְבַּעְתָּם *these four children* Dan. 1: 17, the numeral following a definite noun receives a pronominal suffix referring to it. When numerals are joined to demonstrative pronouns both may receive the article הַשָּׁלֹשׁ הָאֵלֶּה Deut. 19: 9, but more commonly it is given to neither שְׁלֹשׁ־אֵלֶּה Ex. 21: 11, Gen. 22: 23, Zech. 4: 10. In Ex. 38: 28 the article is

attached to the thousands and hundreds of a compound number, but not to the tens and units חֲמֵאָה וּשְׁבַע הַמֵּאוֹת וַחֲמִשָּׁה וְעֲשָׂרִים.

b. When compound numbers 11, 12, etc., receive the article, it may be given to the first member of the compound, הַשְּׁנֵים עָשָׂר *the twelve* 1 Chron. 25: 19, 27: 15, 1 Kin. 6: 38, הָאַחַד וְעֶשְׂרִים Ex. 12: 18; or to the second, שְׁנֵים הֶעָשָׂר־אִישׁ *the twelve men* Josh. 4: 4, 1 Kin. 19: 19. In the example just cited the article is given to the numeral instead of to the noun, but in הַצֶּמֶד שְׁנֵים־עָשָׂר *the twelve oxen* 1 Kin. 7: 44, 2 Chron. 4: 15 the general rule is observed.

Ordinal Numbers, etc.

§ 255. 1. The ordinal numbers follow the general law of adjectives in position and agreement with the substantive, to which they belong, בֵּן שֵׁנִי *a second son* Gen. 30: 7, בַּשָּׁנָה הַשְּׁלִשִׁית *in the third year* 1 Kin. 18: 1.

a. Instances occur of expressions rendered definite by the article before the adjective only הַשְּׁלִישִׁי מִבֹּוא *the third entry* Jer. 38: 14, Judg. 6: 25, Zech. 14: 10, or before the noun only בַּיִת הַשֵּׁנִים Esth. 2: 14. The denominations of time often stand in the construct before the ordinal; thus שָׁנָה *year*, שְׁנַת הָרְבִיעִית *the fourth year* Jer. 46: 2, 51: 59, 28: 1 K'thibh, 32: 1 K'thibh, 2 Kin. 17: 6, 25: 1, Ezr. 7: 8; חֹדֶשׁ *month*, Ezr. 10: 9; יוֹם *day*, Gen. 1: 31, 2: 3, Ex. 12: 15, 20: 10, Lev. 19: 6, 22: 27, Deut. 5: 14. Ordinals are in a few instances used in the plural with plural nouns expressed 1 Sam. 19: 21, or understood Gen. 6: 16, Num. 2: 16, 24, or preceding them in the construct state 2 Kin. 10: 30, 15: 12, or with cardinal numbers 2 Kin. 1: 13.

b. In enumerations the cardinal אֶחָד is sometimes used for *first*, Gen. 1: 5, 2: 11, Ex. 28: 17, 39: 10. If only two persons or things are spoken of the next may be called הַשֵּׁנִי *the second*, Ex. 25: 12, 32, 2 Sam. 4: 2, 1 Kin. 6: 26, 27, 34; אֶחָד or הָאֶחָד *the* remaining *one* Ex. 17: 12, Lev. 14: 22, 15: 15, 2 Sam. 12: 1, 14: 6; or הָאַחֵר *the other* 1 Kin. 3: 17, 22, 2 Chron. 3: 11, 12, Ezek. 41: 24.

2. The lack of ordinals above *ten* is supplied by using the cardinals instead, which are then commonly preceded by the noun in the construct state, שְׁנַת עֶשְׂרִים וָשֶׁבַע *the twenty-seventh year* 1 Kin. 16: 10, שְׁנַת הָאַרְבָּעִים *the fortieth year* Num. 33: 38, although this order is not always observed, שְׁלֹשׁ־עֶשְׂרֵה שָׁנָה *thirteenth year* Gen. 14: 4, עַשְׁתֵּי עָשָׂר חֹדֶשׁ *the eleventh month* 1 Chron. 27: 14, 15.

a. A fuller form of expression is sometimes employed, e. g. פְּעָלַת עֲשָׂרִים

שְׁלֹשִׁים וּשְׁלֹשׁ שָׁנָה *in the thirty-eighth year* prop. *in the year of thirty-eight years* 1 Kin. 16: 29, 2 Kin. 9: 29, 15: 1.

b. In dates the cardinals are used for the day of the month and sometimes for the year, even though the number is below ten; the words day and month are also frequently omitted; שְׁנַת שֶׁבַע *the seventh year* 2 Kin. 12: 1, Esth. 2: 16, שְׁנַת אַחַת Ezr. 1: 1, Dan. 9: 1, 2, שְׁנַת שְׁתַּיִם Hag. 1: 1, 15, שְׁנַת שָׁלוֹשׁ Dan. 8: 1, but with the article שְׁנַת הַשֵּׁבַע *the* regularly recurring *seventh year* Deut. 15: 9; אַרְבָּעָה לַחֹדֶשׁ הַתְּשִׁעִי *the fourth* (day) *of the ninth month* Zech. 7: 1, בַּשְּׁבִיעִי *in the seventh* (month) ver. 5.

3. Fractional parts, whether expressed by the feminine ordinals or by special terms, § 228. 3, may either stand alone or in the construct before the noun to which they are joined, which then receives the article unless otherwise made definite חֲצִי הָעָם...וַחֲצִי *the half of the people...and the* other *half* 1 Kin. 16: 21; *they read* רְבִיעִת הַיּוֹם *the fourth part of the day,* וּרְבִיעִית *and a fourth part they were confessing* Neh. 9: 3; the hundredth part is denoted by the use of the cardinal number מְאַת הַכֶּסֶף *the hundredth part of the silver* Neh. 5: 11.

a. Measures of distance, capacity and weight regularly take the article when preceded by fractional parts, though not requiring it otherwise אַמָּה וַחֲצִי אַמָּה *a cubit and the half of a cubit* Ex. 26: 16, 1 Kin. 7: 31, 32, Num. 28: 14, 2 Kin. 6: 25, Neh. 10: 33, Ezek. 45: 13, 46: 14; exceptions are rare 1 Kin. 9: 8, comp. 1 Sam. 14: 14. The only examples of the plural form of fractional parts are שְׁנֵי עֶשְׂרֹנִים *two tenths,* שְׁלֹשָׁה עֶשְׂרֹנִים *three tenths* and חֲמִשָּׁלְיו *the fifth parts thereof* Lev. 5: 24.

4. Distributive numbers are formed by repeating the cardinals, שְׁנַיִם שְׁנַיִם *two by two* Gen. 7: 9, שִׁבְעָה שִׁבְעָה *by sevens* ver. 2. The numeral adverbs *once, twice,* etc., are expressed by the feminine of the cardinals, אַחַת *once,* שְׁתַּיִם *twice* 2 Kin. 6: 10, Job 40: 5, שֶׁבַע *seven times* Lev. 26: 18, 21 or by means of the noun פַּעַם *stroke* or *beat,* פַּעֲמַיִם *twice* Gen. 27: 36, עֲשֶׂר פְּעָמִים *ten times* Job 19: 3 or רַגְלַיִם *steps,* שָׁלֹשׁ רְגָלִים *three times* Ex. 23: 14, a form of speech which has arisen from the method of counting by beats or taps with the hand or foot.

a. The article may be attached to numerals in a distributive sense, § 248. 4, שְׁנֵי הַנְּשִׂאִים *the two princes* i. e. every two princes Num. 7: 3

לַכֶּבֶשׂ הָאֶחָד *for the one lamb* i. e. each lamb Num. 15: 5; or the same idea may be expressed without the article when the connection requires it, לְשָׁלֹשֶׁת יָמִים *every three days* Am. 4: 4, לְאִישׁ אֶחָד *for each man* 2 Kin. 15: 20. In 1 Kin. 4: 7 K'thibh אֶחָד means *each*, where the K'ri inserts the article. Fractional numbers may also be used distributively עֲשָׂרוֹן עֲשָׂרוֹן *a tenth part severally for each lamb* Num. 29: 10. Alternative numbers are put together without a connective שְׁנַיִם שְׁלֹשָׁה *two or three* אַרְבָּעָה חֲמִשָּׁה *four or five* Isa. 17: 6, Am. 4: 8.

b. The feminine ordinals are also used adverbially רִאשׁוֹנָה *first* or *in the first place* Lev. 5: 8, שֵׁנִית *in the second place* 2 Sam. 16: 19, or *a second time* Gen. 41: 5, Num. 10: 6, שְׁלִשִׁית *a third time* 1 Sam. 3: 8, Ezek. 21: 19.

Apposition or Subordination.

§ 256. Nouns may be joined to the subject either in the coordinate relation of apposition, or in a subordinate relation whether absolutely or in the close connection of the construct state. When one noun serves to define or to describe another it may be put in apposition with it. This construction, of which a more extended use is made in Hebrew than in occidental languages, may be employed in the following cases, viz.:

1. When both nouns denote the same person or thing; מַלְכִּי־צֶדֶק מֶלֶךְ שָׁלֵם *Melchizedek the king of Salem* Gen. 14: 18, מֹשֶׁה אִישׁ הָאֱלֹהִים *Moses the man of God* Deut. 33: 1, אִשָּׁה אַלְמָנָה *a woman* (who was) *a widow* 1 Kin. 7: 14, הַשָּׁמַיִם מְכוֹן שִׁבְתֶּךָ *heaven thy dwelling-place* 1 Kin. 8: 49, עֲבָדַי הַנְּבִיאִים *my servants the prophets* 2 Kin. 9: 7, לֵב אֱוִיל Job 11: 12.

a. Where proper are in apposition with common nouns, either may precede according as prominence is given to the individual or to the class חַמַּלְכָּה דָּוִד 2 Sam. 3: 31, 1 Sam. 3: 1, more rarely דָּוִד חַמֶּלֶךְ 13: 39 *king David*, and only exceptionally מֶלֶךְ יָרֹב Hos. 5: 13, 10: 6, and לְמוֹאָל מֶלֶךְ Prov. 31: 1; such combinations as הֹר הָהָר *mount Hor* Num. 20: 22, הַנָּהָר אַהָוָא *the river Ahava* Ezr. 8: 21, חָעָם יִשְׂרָאֵל *the people Israel* Ezr. 9: 1 are mostly replaced by the construct relation § 257. 3. A noun may also be in apposition with a pronoun אֲנִי יְהוָה *I Jehovah* Isa. 45: 19, אֲנַחְנוּ עַמְּךָ *we thy people* Ps. 79: 13, הוּא חַמֶּלֶךְ *he the king* 2 Chron. 28: 22, Ezr. 7: 6, or a pronominal suffix בְּבוֹאוֹ הָאִישׁ *when he, the man went in* Ezek. 10: 3, Lev. 27: 12, Jer. 27: 8, or a pronoun with a noun *Jehovah thy God*, הוּא עֹבֵר *he is going over before thee* Deut. 31: 3.

2. When the second specifies the first by stating the material of which it consists, its quantity, character or the like, הַבָּקָר הַנְּחֹשֶׁת *the oxen the brass* i. e. *the brazen oxen* 2 Kin. 16: 17, 1 Chron. 15: 19, Deut. 16: 21, שָׁלֹשׁ סְאִים קֶמַח *three measures* (consisting of) *meal* Gen. 18: 6, Ruth 2: 17, 2 Kin. 4: 2, 7: 1, שֶׁבַע שָׁנִים רָעָב *seven years* (of) *famine* 2 Sam. 24: 13, 1 Chron. 21: 12, טוּרִים אֶבֶן *rows* (of) *stones* Ex. 28: 17, 1 Kin. 7: 42, 2 Chron. 4: 3, 13, יָמִים מִסְפָּר *days* (which are) *a number*, i. e. such as can be readily numbered, a few Num. 9: 20, אֲמָרִים אֱמֶת *words* (which are) *truth* Prov. 22: 21, Zech. 1: 13, Lam. 4: 17, Esth. 9: 30.

a. Kimchi thinks that there is a partial assimilation to the construct in כִּכַּר כֶּסֶף (instead of כִּכָּרִים) *two talents* (of) *silver* 1 Kin. 16: 24, 2 Kin. 5: 23; other examples of apposition are such as שְׁנָתַיִם יָמִים *two years days* i. e. two full years, embracing all the days which constitute that period Gen. 41: 1, so שָׁבוּעַ שְׁלֵמוֹת שָׁבֻעִים יָמִים *three full weeks* Dan. 10: 3; מִקְנֵה בָקָר *possession* consisting in *cattle* Eccles. 2: 7; צֶמֶד פְּרָדִים אֲדָמָה *a pair of mules' burden* (of) *earth* 2 Kin. 5: 17; מְלֹא חָפְנַיִם עָמָל *double handful* (of) *toil* Eccles. 4: 6, מַעֲנָה צֶמֶד שָׂדֶה *a plowing strip* (of) *an acre of land* 1 Sam. 14: 14. So probably the much disputed passage דַּמֶּשֶׂק אֱלִיעֶזֶר *the destined possessor of my house is Damascus* (in the person of its citizen) *Eliezer* Gen. 15: 2. A noun may be separated from that with which it is in apposition by intervening words הַנִּמְצָא אִתּוֹ אֲבָנִים *that which was found with each* (of) *stones* i. e. whatever precious stones each had 1 Chron. 29: 8, חִבְּטוּגֹל ... מַיִם Gen. 7: 6, 14: 12, Ex. 22: 30, דָּבָר ... דְּבֵי רִיבֹת Deut. 17: 8, 28: 64, Jer. 41: 8. Sometimes the added noun agrees in definiteness, with that which it specifies חֲבָלוֹת הַזָּהָב *the golden cords* Ex. 39: 17 (the parallel passage Ex. 28: 24 has the construct עֲבֹתֹת זָהָב), חִנָּן חֲמָתָה Jer. 25: 15, הָאֹבֶן הַבְּדִיל Zech. 4: 10, but this is not always the case מְדוֹ בַד *his linen garment* Lev. 6: 3 (where as in Prov. 22: 21 the construct relation and that of apposition both occur in the same verse). הַקְּעָרָה הָאַחַת כֶּסֶף *the one silver dish* Num. 7: 85, נֵרֹתֵיהֶם זָהָב *their golden lamps*, 1 Chron. 28: 15. Prepositions may be repeated before nouns and pronouns in apposition Gen. 40: 1, 43: 28, Lev. 7: 8, Josh. 1: 2, 1 Sam. 2: 34, 15: 1, 2 Sam. 6: 21, 18: 32, 1 Kin. 2: 5, 8: 30, 1 Chron. 4: 42, 2 Chron. 26: 14, Ps. 18: 51, 74: 14, or not Gen. 2: 19, 9: 4, 10: 21, 44: 24.

b. כֹּל is sometimes made more emphatic by being placed after a noun and in apposition with it instead of before it in the construct גִּלּוּלֵיהֶם כֻּלָּם *your idols, all of them* Ezek. 14: 5, Mic. 1: 2, but probably not Eccles. 12: 13, which may be read "*the end of the matter, after the whole has been heard, is* etc., nor Ezra 10: 17 *they finished in all* i. e. entirely, in toto, *the men who* etc.

3. A noun, which stands in some general relation to another, may by a loose kind of subordination be added to it to modify its meaning, the first noun remaining in the absolute state, מַיִם בְּרָכַיִם *water* reaching the *knees* Ezek. 47: 4, חֲזוֹן הַתָּמִיד *the vision* concerning *the continual* service Dan. 8: 13, סִיגִים כֶּסֶף *dross* (of) *silver* Ezek. 22: 18, אֶבֶן שְׁלֵמָה מַסָּע *whole stone* (from the) *quarry* 1 Kin. 6: 7, הַמַּזְלֵג שְׁלֹשׁ הַשִּׁנַּיִם *the fork* (with) *three times* 1 Sam. 2: 13.

a. This subordination is a free sort of substitute for the closer connection of the construct state לְשׁוֹן רְמִיָּה *tongue* (of) *fraud* Ps. 120: 2 (where the parallel clause has the construct), בְּקַר רְעִי *pastured cattle* 1 Kin. 5: 3, *bread of affliction and* מַיִם לַחַץ *water* (of) *affliction* i. e. prison fare 1 Kin. 22: 27, אֵילֵם צֶמֶר *rams* (of) *wool* i. e. wool-bearing rams or, as others suppose, the first word may denote the quantity and the second the material, as much wool as rams have, fleeces 2 Kin. 3: 4, נֵזֶר תַּרְגֵּלָה Ps. 60: 5, אֱלֹהִים אֵמֶת Jer. 10: 10; especially where the first noun has the article for the sake of emphasizing the definiteness of the expression הַנְּחָלִים אַרְנֹן *the streams* (of) *the Arnon* Num. 21: 14, 2 Sam. 24: 5, הָאָרוֹן הַבְּרִית *the ark* (of) *the covenant* Josh. 3: 14, הַמֶּרְכָּבָה הַכְּרוּבִים *the chariot* (of) *the cherubim* 1 Chron. 28: 18, הַנְּבִיאָה עֹבֵד *the prophecy* (of) *Oded* 2 Chron. 15: 8, Neh. 3: 19, Jer. 38: 6, Ezek. 45: 16; or has a suffix, שֹׂנְאַי שָׁקֶר *my false enemies* Ps. 38: 20, בְּרִיתִי חַיִּים *my covenant* concerning *the day* Jer. 33: 20, Lev. 26: 42, Num. 25: 12, 2 Sam. 22: 33, Ps. 71: 7, Ezek. 16: 27, 18: 7, Hab. 3: 8, but not Ps. 45: 7; or is a proper noun צֹעַן מִצְרָיִם *Zoan* (in) *Egypt* Num. 13: 22, Gen. 35: 27, Deut. 23: 5, Judg. 17: 7, 1 Sam. 17: 12, 2 Chron. 32: 5, Mic. 1: 14, compare in English Princeton, New Jersey, יְהוָה צְבָאוֹת *Jehovah* (of) *hosts* 1 Sam. 1: 3. אֱלֹהִים צְבָאוֹת Ps. 59: 6, 80: 5, 8, 15, 20, 84: 9. In some instances like those above given, the first noun is repeated in the construct הַמִּשְׁכָּן מִשְׁכַּן הָעֵדֻת *the tabernacle, the tabernacle of the testimony* Ex. 38: 21, Gen. 15: 18, Deut. 11: 24, 2 Kin. 18: 19, 28, or a common is inserted after the proper noun יְהוָה אֱלֹהֵי צְבָאוֹת *Jehovah the God of hosts* 2 Sam. 5: 10, Ps. 72: 18; and this may be mentally done in other cases. In הָרַצִּין הָעָם 2 Kin. 11: 13 a conjunction should be supplied, *the guards* and *the people*; this may also be done in אֲדִירֵי עַם Judg. 5: 13, though more probably it means *nobles* (of) *the people*; in כְּתָבָם הַמִּתְיַחְשִׂים Ezr. 2: 62, Neh. 7: 64 the relation may be that of subordination *their book* (of) *the registered* or of apposition *their book* entitled "*the registered*".

b. This subordination likewise occurs when a familiar phrase is abbreviated פַּר הַשֵּׁנִי שִׁבְעַת יָמִים *the second bullock seven years* (old) for בֶּן־שִׁבַּע שָׁנִים Judg. 6: 25, or where a series of nouns in the construct is interrupted by the insertion of one in the absolute, expressing some quality of the preceding גִּבּוֹרֵי חַיִל מְלֶאכֶת *men of strength* (for) *the work of the service of*

the house of God 1 Chron. 9: 13, 2 Chron. 8: 5, שְׂעָר מְרַחֲשָׁה *the hairy crown* (of) *him that goeth* etc., or the verb may have a double object *smite on his hairy crown him* etc. Ps. 68: 22, Isa. 28: 1, 32: 13; or by the introduction of some other word שָׂרֵי־גְדוּדִים חָיוּ בְּיָדְךָ *two men captains of bands there were* (of) *the son of Saul* 2 Sam. 4: 2, דָּבָר עִבְרִי בְּלִבֶּךָ *a base thought in thy heart* though it might be *a thought in thy base heart* Deut. 15: 9, עָרִים גְּדֹלוֹת וּבְצוּרוֹת *great cities* (with) *walls and bars* 1 Kin. 4: 13, Deut. 3: 5, עַם חַטָּאת יְרוּשָׁלִָם *this people* (of) *Jerusalem* Jer. 8: 5.

c. The word מִשְׁנֶה, as Ewald suggests, affords a good illustration of the various constructions possible in Hebrew in the relation of nouns to nouns; thus it may stand after a noun in the construct כֹּהֲנֵי הַמִּשְׁנֶה *the priests of the second rank* 2 Kin. 23: 4, or itself in the construct before a noun מִשְׁנֵה הַמֶּלֶךְ *the second in rank to the king* i. e. next to him 2 Chron. 28: 7, or in apposition with a preceding noun עַל־הָעִיר בַּמִּשְׁנֶה *over the second division of the city* Neh. 11: 9 (or it may mean *second over the city*), or assuming almost the character of an attributive, agreeing in number and definiteness אֲחֵיהֶם הַמִּשְׁנִים *their brethren of the second rank* 1 Chron. 15: 18.

The Construct State and Suffixes.

§ 257. When one noun is limited or restricted in its meaning by another, the first is put in the construct state; if the limiting word be a personal pronoun it is suffixed to the noun. The relation thus expressed corresponds, for the most part, to the occidental genitive or to that denoted in English by the preposition *of*. The primary notion of the grammatical form is simply the juxtaposition of two nouns, or the union of a noun and a pronoun, to represent the subordination of one to the other in the expression of a single idea, § 214. The particular relation, which it suggests, is consequently dependent on the meanings of the words themselves, and is in each case that which is most naturally suggested by their combination. Thus, the second noun or the pronominal suffix may denote

1. The *possessor* of that which is represented by the preceding noun, הֵיכַל יְהוָה *the temple of Jehovah* 1 Sam. 1: 9, רְכוּשָׁם *their substance* Gen. 12: 5. This embraces the

various degrees of relationship, בֶּן־אַבְרָהָם *the son of Abraham* Gen. 25: 12, אִשְׁתְּךָ *thy wife* Gen. 12: 5.

a. So a few proper names, as *Gibeah of Saul* 1 Sam. 11: 4, *Gath of the Philistines* Am. 6: 2, *Zion of the Holy One of Israel* Isa. 60: 14.

2. The *whole*, of which the preceding word denotes a part, אֶבְיֹנֵי עַמֶּךָ *the poor of thy people* Ex. 23: 11, 1 Sam. 17: 40, נִכְבַּדֵּי־אָרֶץ *the honourable of the earth* Isa. 23: 9, חַלַּת מַצּוֹת *a cake of unleavened bread* Lev. 8: 26, Isa. 11: 12.

a. So עֵיט צִפּוֹר *birds of prey* lit. preying of birds Ezek. 39: 4, כְּסִיל אָדָם *fool of man* i. e. foolish man Prov. 15: 20, פֶּרֶא אָדָם *wild ass of man* Gen. 16: 12, זֹבְחֵי אָדָם *sacrificers of men* i. e. the men that sacrifice, not as others explain according to 9*b* they that sacrifice men Hos. 13: 2. A few instances occur of adjectives used substantively in the construct before the nouns to which they belong גְּדֹל זְרוֹעֲךָ *the greatness of thy arm* or *thy great arm* Ex. 15: 16, Ps. 46: 5, 65: 5, 145: 7; so the adverb מְעַט for the most part with inanimate or irrational objects מְעַט מַיִם *a little water* Gen. 18: 4, 43: 2, 11, 1 Kin. 17: 12, Prov. 6: 10, מְעַט הַצֹּאן *the few sheep* 1 Sam. 17: 28, while with men except Dan. 11: 23 it follows 6. *c* or § 252. 1. *f*. Abstract nouns may be thus used לֶקַח עֵשֶׂב *greenness of herb* i. e. green herb, Gen. 1: 30, 3: 24, Job 15: 26, רֹב חַסְדֶּךָ *abundance of thy mercy* i. e. thy abundant mercy Ps. 5: 8, 37: 2, Jer. 22: 7, 23: 22, Obad. vs. 3. 20, Zech. 11: 13, and sometimes in an emphatic sense indicating that the part singled out from the whole possesses the quality referred to in an eminent degree קוֹמַת אַרְזוֹ *the height of his cedars* i. e. his highest cedars 2 Kin. 19: 23. Here too belong the superlative expressions, קֹדֶשׁ הַקָּדָשִׁים *holy of holies*, שִׁיר הַשִּׁירִים *the song of songs*, עֶבֶד עֲבָדִים *servant of servants*, one that is a servant by way of eminence when compared with all others; see besides Deut. 10: 17, 1 Kin. 8: 27, Eccles. 1: 2, Ezek. 16: 7, 26: 7, Dan. 8: 25; or cognate instead of identical words may be thus combined סָרֵי סוֹרְרִים *most rebellious* Jer. 6: 28.

3. An individual of the class denoted by the preceding noun, thus serving the purpose of a more exact *designation*, אֶרֶץ מִצְרַיִם *the land of Egypt* Gen. 41: 19, נְהַר־פְּרָת *the river* (of) *Euphrates* Gen. 15: 18, Ex. 19: 11, 2 Sam. 19: 41, עֲצֵי אֲרָזִים *cedar trees*, 2 Chron. 2: 7, תּוֹלַעַת יַעֲקֹב *worm* (of) *Jacob* Isa. 41: 14, אַנְשֵׁי הַמִּלְחָמָה *men* (who are) *merchants* 1 Kin. 10: 15.

a. So בְּתוּלַת בַּת־צִיּוֹן *virgin daughter Zion* Isa. 37: 22, 47: 1, Jer. 14: 17, בְּנֵי שִׁלֵּשִׁים *children of the third generation* (not according to 1 those descended from them) Gen. 50: 23, Judg. 19: 22, 1 Sam. 28: 7, 2 Kin. 10: 6, Jer. 24: 2. It is unusual to find such constructions as הָאָרֶץ כְּנַעַן Num.

34: 2, הַפֶּת יְרוּשָׁלִַם Lam. 2: 13; הֹר הָהָר is the standing phrase for *mount Hor*, but this is exceptional, § 256. 1. *a*.

4. The *material* of which the preceding noun is composed. טַבַּעַת זָהָב *a ring of gold* Gen. 24: 22, כְּלִי־עֵץ *vessel of wood* Lev. 11: 32, עֶדֶר עִזִּים *the flock of goats* Cant. 4: 1, טוּרֵי אֶבֶן *rows of stones* Ex. 39: 10, 1 Kin. 6: 36.

5. The *measure* of its extent, value, duration, etc., מַהֲלַךְ שְׁלֹשֶׁת יָמִים *a journey of three days* Jon. 3: 3, מִשְׁקַל כִּכַּר *the weight of a talent* 1 Chron. 20: 2, אֲנְשֵׁי מִסְפָּר *men of number* i. e. readily numbered, few, Gen. 34: 30, אֲחֻזַּת עוֹלָם *a possession of perpetuity* Gen. 17: 8.

6. An *attribute*, by which it is characterized, גִּבּוֹר חַיִל *mighty man of valour* Judg. 11: 1, עֵץ פְּרִי *tree of fruit* Gen. 1: 11, גֵּיא חִזָּיוֹן *valley of vision* i. e. distinguished as the one where visions are received Isa. 22: 1, צֹאן הַהֲרֵגָה *the flock of slaughter* i. e. which is to be slaughtered Zech. 11: 4.

a. So אֱלֹהֵי צוּרִי *God* (who is) *my rock* 2 Sam. 22: 3, הַר בֵּית יְשָׂרָאֵל *the high mountain of Israel* Ezek. 17: 23, Ps. 59: 6, Cant. 7: 3, Isa. 5: 7, 6: 13, 17: 10. A period of time may be characterized by what occurs in it שְׁנַת מוֹת הַמֶּלֶךְ *the year of the death of the king* Isa. 6: 1, עֵת רָצוֹן *a time of favour* Ps. 69: 14, Isa. 49: 8, 61: 2.

b. It will be observed that the Hebrew uses nouns to express many of the ideas for which adjectives are employed in other languages; thus, in the examples under Nos. 4, 5, and 6, *vessel of wood* for *wooden vessel, possession of perpetuity* for *perpetual possession, mighty man of valour* for *valiant mighty man, flock of slaughter* for *grex mactanda*; see also 2. *a*, § 256. 2 and 2. *a*. This both arises from and explains the comparative paucity of adjectives in Hebrew: though even where corresponding adjectives exist the other construction is frequently preferred, בִּגְדֵי קֹדֶשׁ *garments of holiness* Ex. 28: 2, זִבְחֵי־צֶדֶק *sacrifices of righteousness* Ps. 4: 6, קָדוֹשׁ *holy* and צַדִּיק *righteous* being used with less latitude and with a stricter regard to the ethical idea which they involve. Abstract nouns may even be linked with attributives by the conjunction *and* שֵׁם כְּבוֹדְךָ וּרוֹמְמֻתֶךָ *thy name glorious* (lit. of glory) *and exalted* Neh. 9: 5, Isa. 57: 15. Attributives are frequently formed by prefixing such words as אִישׁ *man*, בַּעַל *lord*, בֵּן *son*, בַּת *daughter*, to abstract nouns or other substantives, thus, אִישׁ תֹּאַר *a man of form* i. e. *comely* 1 Sam. 16: 18, אִישׁ דְּבָרִים *man of words* i. e. *eloquent* Ex. 4: 10, בַּעַל חֲלֹמוֹת *the possessor of dreams* i. e. *dreamer* Gen. 37: 19, בֶּן־שְׁמֹנַת יָמִים *son of eight days* i. e. *eight days old* Gen. 17: 12,

בֶּן־מָוֶת *son of death* i. e. *deserving to die* 1 Sam. 20: 31, בְּנֵי־בְלִיָּעַל *sons of worthlessness* i. e. *wicked* Deut. 13: 14, בַּת־תִּשְׁעִים שָׁנָה *daughter of ninety years* i. e. *ninety years old* Gen. 17: 17; and in application to an inanimate object: גֵּי בֶּן־שָׁמֶן *a fertile hill* lit. a peak a son of fatness Isa. 5: 1.

c. In the following examples the noun is in the construct before its adjective מֵי הַמָּרִים *the bitter waters* Num. 5: 18, 19, 23, 24, מַלְאֲכֵי רָעִים *evil* i. e. destructive *angels* Ps. 78: 49, חֵיל גָּבֶר *a strong force* Isa. 36: 2, מְזוּזַת רִבְעָה *a square doorpost* Ezek. 41: 21, but not, as Kimchi adds, חַלּוֹנֵי שְׁקוּפִים אֲטוּמִים 1 Kin. 6: 4. Occasionally and for the most part in poetry the adjective instead of agreeing with its substantive is treated as though it were an abstract noun, כְּלֵי הַקָּטָן *vessels of small* (capacity) Isa. 22: 24, מֵי מְלֹא *waters of fulness* Ps. 73: 10, כָּל־בַּיִת הַגָּדוֹל perhaps *every house of great* (size), though others render *every great* (man's) *house* Jer. 52: 13, Deut. 19: 13 (but see 21: 8, 9), Ps. 74: 15, Prov. 6: 24, Cant. 7: 10, Eccles. 1: 13 (in the common text), Ezek. 23: 14. So sometimes an adverb, מְתֵי מְעָט *few men* Deut. 26: 5, עֹלַת תָּמִיד *continual burnt-offering* Num. 28: 6, דְּמֵי חִנָּם *blood* (shed) *causelessly* 1 Kin. 2: 31, צָרֵי יוֹמָם *enemies in the day time* Ezek. 30: 16, אֶבֶן הַדֻּמָּם *dumb stone* Hab. 2: 19, Jer. 1: 15, or adverbial phrase, אֱלֹהֵי מִקְרֹב *a God nigh at hand*, אֱלֹהֵי מֵרָחֹק *a God afar off* Jer. 23: 23, Isa. 14: 6, Neh. 13: 4.

7. The *source* from which the preceding noun is derived, תּוֹרַת יְהוָה *the law of Jehovah* Ex. 13: 9, סֵפֶר מֹשֶׁה *the book of Moses* 2 Chron. 25: 4, חוֹלַת אַהֲבָה *sick from love* Cant. 2: 5, Isa. 22: 2.

8. The *subject* by which an action is performed, or in which an attribute inheres, אַהֲבַת יְהוָה *the love of Jehovah* i. e. exercised by him 1 Kin. 10: 9, חָכְמַת שְׁלֹמֹה *the wisdom of Solomon* 1 Kin. 5: 10.

9. The *object*, upon which an action is directed, יִרְאַת אֱלֹהִים *the fear of God* Gen. 20: 11, מֶמְשֶׁלֶת הַיּוֹם *the rule of the day* Gen. 1: 16, אֵבֶל אָבִי *the mourning for my father* Gen. 27: 41; or the purpose for which any thing is intended כֶּסֶף הַשָּׂדֶה *the silver for the field* Gen. 23: 13, שֶׁבֶר רָעָבוֹן בָּתֵּיכֶם *grain for the famine of your houses* Gen. 42: 19, גֶּשֶׁם זַרְעֶךָ *the rain for thy seed* Isa. 30: 23.

a. After nouns, which express or imply action, the following noun or suffix denotes the subject or the object as the sense or the connection may demand, קִנְאַת יְהוָה *the zeal of Jehovah*, which he feels Isa. 37: 32, קִנְאַת עַמּוֹ *zeal of the people*, which is felt for them Isa. 26: 11; זַעֲקַת סְדֹם *the cry against Sodom* Gen. 18: 20, זַעֲקַת דָּל *the cry of the poor* Prov. 21: 13; תְּהִלָּתָם

the way of the sea i. e. leading to it 1 Kin. 18: 43, דֶּרֶךְ יָרְבְעָם *the way of Jeroboam* i. e. in which he walked 1 Kin. 16: 26; חֲטָאתִי *his wrong* i. e. done by him Ps. 7: 17, חֲטָאתִי *my wrong* i. e. done to me Gen. 16: 5; מַלְכִּי *my king* established by me Ps. 2: 6, ruling over me Ps. 5: 3; so מִשְׁפָּחָה with the suffix of the subject Jer. 2: 19, of the object Hos. 11: 7; נַפְשִׁי subj. Ps. 39: 11, obj. Ps. 38: 12; דַּרְכִּי subj. Ps. 116: 14, obj. Ps. 56: 13; תּוֹרָתִי subj. Prov. 3: 11, obj. Ps. 73: 14; יָדִי (in the figurative sense of a divine infliction) subj. Ps. 32: 4, obj. Job 23: 2. In בֵּית תְּפִלָּתִי Isa. 56: 7 the suffix denotes not the object *the house of prayer to me*, but the possessor *my house of prayer*, § 259.

b. Active participles are frequently put in the construct state before their object, מְשִׁיבַת נָפֶשׁ *restoring the soul* Ps. 19: 8, אֹהֲבֵי שְׁמֶךָ *loving thy name* Ps. 5: 12, בָּאֵי שַׁעַר *entering the gate* Gen. 23: 10, Ex. 3: 8, 1 Chron. 12: 1, Isa. 1: 28, Ezek. 13: 11, 19, Am. 5: 12, Hab. 2: 15, Mal. 1: 6; so even before a pronoun מְשָׁרְתִי אֹתִי *serving me* Jer. 33: 22, or an infinitive which they govern, מַשְׁכִּימֵי קוּם *being early to rise* Ps. 127: 2. They very rarely in the construct indicate possession אֹכְלֵי שֻׁלְחָנֶךָ *the eaters at* (belonging to) *thy table* 1 Kin. 2: 7, or apposition זֹבְחֵי אָדָם Hos. 13: 2 (2 *a*); but צֹרְרֵי יְהוּדָה Isa. 11: 13 means *the adversaries of Judah*, not those of Judah who are adversaries to Ephraim. Participles of intransitive verbs may be put in the construct or receive a suffix in the vivid language of poetry, which conceives of the indirect as though it were the direct object זֹחֲלֵי עָפָר Deut. 32: 24, Mic. 7: 17, Ps. 40: 5, 88: 5, 6, שֹׁכְנֵי מְלָחָמָה Mic. 2: 8, חֹסֵי Ps. 18: 40, מִתְחוֹסְסַי Ps. 59: 2. Passive participles may be in the construct before the subject of the action, מֻכֵּה אֱלֹהִים *smitten of God* Isa. 53: 4, יְלִיד אִשָּׁה *born of a woman* Job 14: 1, לְחֻכֵי לֶחֶשׁ *devoured by pestilence* Deut. 32: 24, or before the secondary object, if the verb is capable in the active of having a double object, חֲגֻרֵי שָׂק *girded with sackcloth* Joel 1: 8, לְבוּשׁ הַבַּדִּים *the man clothed with linen* Ezek. 9: 11, עֲרוּךְ מִלְחָמָה *arrayed for battle* Joel 2: 5. When a noun follows the infinitive it may be in construction with it as its subject, בְּקָרְאַ מֶלֶךְ *on the king's reading* 2 Kin. 5: 7, הוֹרִישׁוֹ *his driving out* Num. 32: 21, Ezra 10: 1, or be governed by it as its object, קָרְאַשְׁמוּאֵל *to call Samuel* 1 Sam. 3: 8, הוֹרִישָׁם *to drive them out* Deut. 7: 17; or both subject and object may be expressed בַּלֹּתִי אֹתָךְ *his destroying thee* 2 Sam. 24: 17.

10. The respect in which a preceding attribute holds, so that it answers the purpose of *specification*, טְמֵא־שְׂפָתַיִם *unclean as to lips* Isa. 6: 5, קְשֵׁה־לֵב *hard hearted* Ezek. 3: 7, קְרֻעֵי בְגָדִים *rent as to garments* 2 Sam. 13: 31, נְבֹהַּ רַגְלַיִם 2 Sam. 9: 3, Ps. 7: 11, 32: 1, Isa. 1: 30, 3: 3. 33: 24.

a. This answers to what is known as the Greek accusative, ποδας ὠκύς; the English has in certain cases adopted the Hebrew idiom, so that we can say *swift of foot, blind of an eye*, etc.

b. When an idea is expressed by two words in the construct state, its

plural is commonly denoted by giving a plural form to the first noun; this is sometimes the case even with compound proper nouns בְּנֵי יְמִינִי *Benjamites* 1 Sam. 22: 7. In a few instances both nouns are put in the plural צְרוֹרוֹת בַּסְפֵיהֶם ..... צְרוֹר־כַּסְפּוֹ Gen. 42: 35, בָּתֵּי כְלָאִים Isa. 42: 22, גְּבוּרֵי וְחַיָלִים 1 Chron. 7: 5, Josh. 6: 6; or the second noun only בֵּית אֲבוֹתָם *their clans* or *fathers' houses* 1 Chron. 7: 4, בֵּית הַבָּמוֹת *the highplace-houses* 2 Kin. 17: 29, 1 Sam. 31: 9, 10, Ex. 29: 20; so nouns, particularly such as denote members of the body may be in the singular with plural suffixes, יָדְכֶם *your hand* Gen. 43: 12, רַגְלָם *their foot* Ps. 9: 16, לְשׁוֹנֵנוּ *our tongue* Ps. 12: 5, Josh. 2: 19, Judg. 7: 6, Ps. 5: 10.

§ 258. 1. When the relation between two nouns is expressed by an intervening preposition, the first commonly remains in the absolute state: it may, however, particularly in poetry, be put in the construct, הָרֵי בַגִּלְבֹּעַ *mountains in Gilboa* 2 Sam. 1: 21, נְבִיאֵי מִלִּבָּם *prophets out of their own heart* Ezek. 13: 2, כְּדֵי בָנוּ *according to the ability in us* Neh. 5: 8.

a. The most frequent examples in prose are אֶחָד *one*, which is often found before the partitive בֵּן, Gen. 3: 22, 2 Sam. 1: 15, and words denoting direction such as יָמִין *right*, צָפוֹן *north*, קָצֶה *end* before לְ Josh. 8: 11, 15: 21, Judg. 2: 9, 2 Kin. 23: 13, Ezek. 10: 3. The combination of the construct with לְ in other instances also is facilitated by their close relationship, § 260, 1 Chron. 6: 55, 23: 28, Job 18: 2, Ps. 58: 5, Prov. 24: 9, Lam. 2: 18, Hos. 9: 6, Mic. 4: 8. With other prepositions the construct occurs more rarely Isa. 9: 2, Hos. 7: 5, except in the case of participles Judg. 5: 10, 8: 11, 2 Sam. 10: 9 K'thibh, Neh. 9: 5, Job 24: 5, Ps. 2: 12, 84: 7, Isa. 5: 11, 9: 1, 14: 19, 28: 9, 56: 10, Jer. 8: 16, Nah. 1: 5.

2. A noun is sometimes put in the construct before a succeeding clause with which it is closely connected: thus, before a relative clause, מְקוֹם אֲשֶׁר *the place where*, etc., Gen. 39: 20, עַל־דְּבַר אֲשֶׁר *for the reason that* Deut. 22: 24, particularly when the relative is itself omitted, בְּיַד־תִּשְׁלַח *by the hand of* (him whom) *thou wilt send* Ex. 4: 13, תְּחִלַּת דִּבֶּר־יְהוָה *the beginning of* (what) *Jehovah spake* Hos. 1: 2, or before the conjunction וְ *and*, חָכְמַת וְדַעַת *wisdom and knowledge* Isa. 33: 6, 35: 2, Ezek. 26: 10, שְׁכָרַת וְלֹא מִיָּיִן *drunken and not with wine* Isa. 51: 21.

a. So before זֶה used as a relative, הַר־זֶה *the mountain that his right hand has acquired* Ps. 78: 54, מְקוֹם זֶה Ps. 104: 8. Words denoting time and

place often stand in the construct before a clause with the relative understood; thus יוֹם Deut. 4: 15, Job 29: 2, Ps. 56: 4, 10, 88: 2, 102: 3; עֵת 2 Chron. 29: 27; בְּקוֹם Job 18: 21. Some would so explain בְּרֵאשִׁית Gen. 1: 1, *in the beginning when God created* etc. ver. 2 parenthetic, ver. 3 *then God said* etc. But this assumes a complexity foreign to Hebrew construction, § 250. *b*. Other examples are infrequent and exceptional Ps. 16: 3, 65: 5, 81: 6, Isa. 29: 1, Jer. 23: 26, 48: 16. The construct is once used where a noun is repeated שַׁבַּת שַׁבָּת *every sabbath* 1 Chron. 9: 32.

3. Three, four, or even five nouns are sometimes joined together in the relation of the construct state, רָאשֵׁי בֵּית אֲבֹתָם *the heads of the houses of their fathers* Ex. 6: 14, מִסְפַּר שִׁבְטֵי בְנֵי־יִשְׂרָאֵל *the number of the tribes of the children of Israel* Josh. 4: 5, Gen. 41: 10, 47: 9, Lev. 10: 14, Num. 6: 13, 2 Kin. 10: 6, Job 12: 24, Eccles. 6: 12, פְּרִי־גַדֶל לֵבָב מֶלֶךְ־אַשּׁוּר *the fruit of the greatness of heart of the king of Assyria* Isa. 10: 12, 2 Chron. 24: 12, Jer. 34: 1.

a. When one noun of the series is an attribute of that which precedes it the two together stand in joint relation to the noun that follows הָרֵי מְרוֹם יִשְׂרָאֵל *the high mountains of Israel* Ezek. 34: 14, Gen. 14: 13, Deut. 31: 16, 2 Sam. 8: 10, 23: 1, 2 Chron. 36: 16, Ezek. 28: 14.

b. A noun limited by two or more nouns may be repeated in the construct before each of them, when these are regarded separately or are distinctly emphasized אֲבִי־מִלְכָּה וַאֲבִי יִסְכָּה *Haran the father of Milcah and the father of Iscah* Gen. 11: 29, 14: 13, 24: 3, אֱלֹהֵי אֲבֹתֵיכֶם אֱלֹהֵי אַבְרָהָם אֱלֹהֵי יִצְחָק וֵאלֹהֵי יַעֲקֹב *the God of your fathers, the God of Abraham, the God of Isaac and the God of Jacob* Ex. 3: 6, 15, Jer. 8: 1, 19: 13, 1 Chron. 28: 1. If, however, they together constitute one idea or are viewed in combination the first noun will not be repeated אֱלֹהֵי אַבְרָהָם יִצְחָק וְיַעֲקֹב *the God of Abraham, Isaac and Jacob* Ex. 3: 16, Gen. 14: 11, 19, 18: 20, 19: 28, Ex. 3: 8, 32: 2, Lev. 6: 13, Num. 26: 64, Judg. 1: 6, 7, 1 Sam. 17: 52, 1 Chron. 28: 21, 29: 2, 18, 2 Chron. 30: 6, Neh. 5: 11, Job 28: 3, Ps. 72: 10, 107: 10, Isa. 11: 2, 36: 19, 37: 13, Ezek. 38: 2, 39: 1: so a construct infinitive Jer. 29: 2, 2 Chron. 7: 3. This is sometimes the case even where the construct must be repeated mentally before the second noun רֹאשׁ עֹרֵב וְזְאֵב *the head of Oreb and* the head of *Zeeb* Judg. 7: 25, comp. Gen. 40: 20, מֶלֶךְ סְדֹם וַעֲמֹרָה *the king of Sodom and* the king of *Gomorrah* Gen. 14: 10, comp. ver. 8. When one of the limiting terms is a pronominal suffix the noun is necessarily repeated בָּנָיו וּבְנֵי בָנָיו Gen. 46: 7, 19: 16, Ex. 10: 6.

c. If two or more nouns are limited by the same noun, the latter is usually expressed with the first and an appropriate suffix attached to the rest לֶכֶב פַּרְעֹה וְחֵילוֹ וְצִבְאוֹ *the chariots of Pharaoh and his horsemen and his army* Ex. 14: 9, 39: 40, 1 Kin. 16: 26, 27, 2 Kin. 2: 12, though the suffix is occasionally omitted Gen. 40: 1. If the limiting word be a pronoun, the

suffix must be repeated with each of the nouns Gen. 7: 7, 31: 28, 36: 6, Ex. 32: 2, Deut. 12: 6 with only rare exceptions Ex. 15: 2, Isa. 12: 2, Ps. 118: 14, 2 Sam. 23: 5. In a very few instances two words are in construct relation to the same noun שְׁלֻמֵי אֱמוּנֵי יִשְׂרָאֵל *the peaceable, the faithful of Israel* 2 Sam. 20: 19, Ezek. 31: 16, Dan. 1: 4, נַחֲלֵי נְחָלֵי דְבָשׁ *rivers, brooks of honey* Job 20: 17, נוֹשְׁקֵי רוֹכְרֵי קָשֶׁת Ps. 78: 9, if rendered as it is by some *armed with, shooting the bow*, though נוֹשְׁקֵי may be in construction not with קֶשֶׁת but with רוֹכְרֵי *armed ones of those who shoot the bow, armed bowmen*. This assumption is unnecessary in Isa. 53: 3, 4, 55: 4, where the first noun is agreeably to the vowels in the absolute state.

§ 259. When two or more words are in the construct relation they must stand in immediate conjunction, and no other word can be suffered to come between them as it would obscure the sense. Hence an adjective, participle or demonstrative, qualifying a noun in the construct state, cannot stand immediately after it, but must be placed after the governed noun, מַעֲשֵׂה יְהוָה הַגָּדוֹל *the great work of Jehovah* Judg. 2: 7, עֲטֶרֶת זָהָב גְּדוֹלָה *a great crown of gold* Esth. 8: 15. So an article or suffix, belonging to a noun in the construct, must be attached not to it but to the governed noun, גִּבּוֹרֵי הַחַיִל *the mighty men of valour* Josh. 1: 14, אֱלִילֵי זְהָבוֹ *his idols of gold* Isa. 2: 20, שֵׁם קָדְשִׁי *my name of holiness* i. e. *my holy name* Lev. 20: 3.

a. When an attributive thus follows a series of nouns in the construct relation its particular reference will be indicated by its gender and number; בְּנַף הַכְּרוּב הָאַחֵר 2 Chron. 3: 11, since כָּנָף is fem., means *the wing of the other cherub*, not *the other wing of the cherub*, קַרְשֵׁי צֶלַע הַמִּשְׁכָּן הַשֵּׁנִית *the boards of the second side of the tabernacle* Ex. 26: 27, Deut. 28: 58, Josh. 1: 8, 1 Sam. 17: 18, 2 Chron. 32: 30, 31, Jer. 25: 26. When the governing and the governed noun are of the same gender and number it may be doubtful to which of them the following adjective is to be referred, thus אֲחִי יֶפֶת הַגָּדוֹל Gen. 10: 21 may either mean *the elder brother of Japheth* or *the brother of Japheth the elder*. In Jer. 25: 15 an attributive stands after a noun in apposition with the governed noun. In a very few instances an adjective is inserted in a series of constructs to prevent it from being too widely separated from its noun Ezek. 6: 11, Jer. 4: 11. In the following passages a brief word intervenes between כֹּל, which, though properly a noun signifying *totality*, is in usage equivalent to a pronominal adjective *all, every*, and the noun which it governs, כָּל תִּשָּׂא עָוֹן *take away all iniquity* Hos. 14: 3, so 2 Sam. 1: 9, Job 27: 3, and perhaps Isa. 38: 16; but see Alexander *in loc.* Other exceptions are extremely rare as when the

direct object of a participle is preceded by the indirect מְשַׁלְּחֵי בְּיָאוֹר חַמָּה Isa. 19: 8, or the construct infinitive is separated from its subject by its object Jer. 34: 9, mostly a pronominal suffix Gen. 4: 15, Isa. 5: 24 or by an adverb Job 34: 22.

b. There are two principal cases, in which an article or a suffix attached to a noun properly belongs not to it but to the preceding construct. 1. When the governed noun simply qualifies that which stands before it, denoting an attribute, its material or after fractional numbers a measure of quantity, § 255. 3. *a*, כְּלֵי מִלְחַמְתּוֹ *his weapons of war* Deut. 1: 41, Judg. 18: 16, Ezek. 9: 2, גַּאֲוָתֹי גַּאֲוָתִי *my proud exulters* Isa. 13: 3, Ps. 2: 6, Obad. ver. 16, Eccles. 12: 5, בְּנֵי־הַיִּצְהָר *the sons of oil* i. e. the anointed ones Zech. 4: 14, Gen. 37: 19, בַּעֲלֹת הַזָּהָב *the golden altar* Ex. 40: 26, עֲשִׂירִת הָאֵיפָה *the tenth-part of an ephah* Num. 5: 15; אֱלֹהֵי צִדְקִי Ps. 4: 2 may mean either *the God of my right*, who defends my righteous cause, or *my righteous God*; comp. Ps. 59: 18. 2. When an attributive in the construct belongs to a definite noun expressed or understood and consequently requires the article, thus פָּרוֹת רְאוֹת הַמַּרְאֶה but הַפָּרוֹת רְאוֹת הַמַּרְאֶה Gen. 41: 2-4, Lev. 11: 4, Num. 35: 19, Deut. 20: 8, Neh. 1: 5, Jer. 23: 26, Ezek. 9: 11, Dan. 9: 4, 12: 6, 7; if it is in the construct before a proper noun the article is of course unnecessary, § 249. 3, Ps. 25: 12. For exceptional examples of construct nouns with the article, see § 249. 3. *b*, and of subordination to nouns with suffixes as a substitute for the construct relation § 256. 3. *a*.

c. He paragogic may be attached to a noun in the construct state, מִזְרָחָה שֶׁמֶשׁ *toward the rising of the sun* Deut. 4: 41, Gen. 24: 67, 47: 14, 1 Kin. 19: 15; even in compound proper names בְּאֵרָה שֶׁבַע *to Beersheba* Gen. 46: 1.

§ 260. The preposition לְ *to, belonging to,* with or without a preceding relative pronoun, may be substituted for the construct relation in its possessive sense, הַצֹּאן אֲשֶׁר לְאָבִיהָ *her father's sheep* prop. *the sheep which belonged to her father* Gen. 29: 9, 40: 5, 1 Sam. 17: 40, 21: 8, 1 Kin. 15: 20, comp. צֹאן אֲבִיהֶם Gen. 37: 12, הַבַּיִת לֶאֱלִישָׁע *the house of Elisha* 2 Kin. 5: 9, 1 Sam. 14: 16, 2 Chron. 19: 11, comp. Latin *pater mihi.* This is particularly the case

1. When the first noun is omitted לְדָוִד (a psalm) *of David* Ps. 11: 1, אַמְנוֹן לַאֲחִינֹעַם *Amnon* (son) *of Ahinoam* 2 Sam. 3: 2, Gen. 8: 5, Ex. 12: 2, *their letters* וְאֲשֶׁר לְטוֹבִיָּה *and those of Tobiah* Neh. 6: 17, or is remote Lev. 7: 26, Am. 5: 3.

a. In 1 Sam. 2: 29 a noun in apposition with one preceded by a construct receives לְ to suggest more distinctly its relation to the governing

noun, *the offerings of Israel* לְעַמִּי viz. *of my people* so 1 Kin. 6: 5; and after a suffix Esra 9: 1.

2. When the first noun is indefinite and the second definite, בֶּן לִישַׁי *a son of Jesse* 1 Sam. 16: 18 (בֶּן־יִשַׁי 2 Sam. 20: 1 is *the son of Jesse*, § 249. 3), עֶבֶד לְשַׂר הַטַּבָּחִים *a servant of the captain of the guard* Gen. 41: 12.

a. Hence the frequent use of לְ (*Lamedh auctoris*) in the titles of the Psalms and other compositions מִזְמוֹר לְדָוִד *a psalm of David* i. e. belonging to him as its author, תְּפִלָּה לְחַבַּקּוּק *a prayer of Habakkuk.*

3. When the first noun is accompanied by a numeral adjective, especially in dates, חֲמִשָּׁה־עָשָׂר יוֹם לַחֹדֶשׁ *the fifteenth day of the month* 1 Kin. 12: 32, בַּשָּׁנָה הַחֲמִישִׁית לַמֶּלֶךְ *in the fifth year of the king* 1 Kin. 14: 25, בִּשְׁנַת שָׁלֹשׁ לְאָסָא *in the third year of Asa* 1 Kin. 15: 33.

4. When several genitives are connected together, סֵפֶר דִּבְרֵי הַיָּמִים לְמַלְכֵי יְהוּדָה *the book of the Chronicles of the kings of Judah* 1 Kin. 15: 23, Num. 16: 22, 32: 28, 36: 1, Josh. 19: 51, 21: 1, 1 Chron. 26: 26, Ezra 1: 5.

5. When for any reason the construct could not be employed, as with a negative אֶרֶץ לֹא לָהֶם *a land not theirs* Gen. 15: 13, or a suffix שָׂרֵינוּ לְכָל־הַקָּהָל *our princes of the whole congregation* Ezra 10: 14, 1 Chron. 7: 5.

The Predicate.

§ 261. 1. The predicate of a sentence, if a substantive, adjective, or pronoun, may be connected with its subject without an intervening copula, their mutual relation being sufficiently suggested by simply placing them together, כָּל־נְתִיבוֹתֶיהָ שָׁלוֹם *all her paths* (are) *peace* Prov. 3: 17, טוֹב הָעֵץ *the tree* (was) *good* Gen. 3: 6, זֶה הַדֶּרֶךְ *this* (is) *the way* Isa. 30: 21.

2. Or the pronoun הוּא of the third person may be used as a copula, הַנָּהָר הָרְבִיעִי הוּא פְּרָת *the fourth river is Euphrates* prop. *it* (is) *Euphrates* Gen. 2: 14, Jer. 50: 25.

אַתָּה־זֶה מַלְכִּי *what are these?* Zech. 4: 5, אַתָּה הוּא מַלְכִּי *thou art my king* Ps. 44: 5, הָאֲנָשִׁים הָאֵלֶּה שְׁלֵמִים הֵם *these men are peaceable* Gen. 34: 21.

a. In all the instances, in which it is commonly explained as a copula, the pronoun may with greater propriety be regarded as an emphatic repetition of the subject, § 246. 2.

3. Or the verb הָיָה *to be* may be employed for a like purpose, particularly if the idea of past or future time is involved, הָאָרֶץ הָיְתָה תֹהוּ *the earth was desolate* Gen. 1: 2, הַבָּקָר הָיוּ חֹרְשׁוֹת *the oxen were ploughing* Job 1: 14, Ex. 9: 3; though rarely in a circumstantial clause, as Judg. 8: 11, since the time is sufficiently indicated by the connection.

a. Verbs which denote some modification of being are sometimes employed in the same way; thus, *his eyes* הֵחֵלּוּ כֵהוֹת *began* (to be) *dim* 1 Sam. 3: 2; וַיָּחֶל נֹחַ אִישׁ הָאֲדָמָה *and Noah began* (to be) *a husbandman* Gen. 9: 20; כְּהַחֲדִיכְךָ שׁוֹדֵד *when thou ceasest spoiling* Isa. 33: 1, *the hair* חָפַּף לָבָן *has turned white* Lev. 13: 3, Gen. 38: 11, Isa. 47: 8; so *to be called, to be esteemed*, etc.

b. Simple existence is predicated by means of the particle יֵשׁ גֹּאֵל *there is a kinsman* Ruth 3: 12, Gen. 18: 24, and non-existence by אַיִן, which retains its absolute form at the end of a clause רֹדֵף אַיִן *there is no one pursuing* Lev. 26: 37, 1 Sam. 9: 4, 10: 14, 1 Kin. 18: 10, Prov. 17: 16, or section of a clause אָדָם אַיִן *there was not a man to till the ground* Gen. 2: 5, Num. 20: 5, Isa. 37: 3; otherwise it takes the construct form אֵין, whether it precedes the subject אֵין לֵדָה Gen. 11: 30, אֵין רֹדֵף Lev. 26: 36, Judg. 21: 25, 1 Sam. 9: 2, Ps. 38: 8, Ezek. 13: 10, 15, 16, or follows it פֹּתֵר אֵין אֹתוֹ *there was no one interpreting it* Gen. 40: 8, 19: 31, Judg. 13: 9, 1 Sam. 9: 7, Ezek. 37: 8. These particles may also be used as copulas Gen. 31: 29, Ex. 5: 16, Judg. 6: 13, especially with the personal pronouns, when the predicate is a participle, אֵינְךָ יְשַׁלְּחֵם *thou art not letting go* Ex. 8: 17, יְשֵׁךְ מוֹשִׁיעַ *thou art saving* Judg. 6: 36. In a few instances in the later books אַיִן degenerates into a mere auxiliary verb Dan. 8: 5. Once יֵשׁ is doubled for a strong affirmation 2 Kin. 10: 15, and אֵין יֵשׁ occurs twice as a strong negation Ps. 135: 17, 1 Sam. 21: 9. אַיִן *is not* is never equivalent to the simple negative לֹא *not*; in the few instances in which it stands before a verb, a conjunctive or relative must be supplied אַיִן פָּקַד *it is not* so, that *his wrath has visited* Job 35: 15, אֵין מַלְכָּהּ יִתְהַלָּךְ *the king is not* he that *can* etc. Jer. 38: 5; in Ex. 3: 2 אֹכְלָה is a participle with בְּ omitted § 93. *e.*

Predicate Noun.

§ 262. 1. The prominence due to the predicate as the affirmation to be made, and to which therefore attention is to be strongly directed is in English indicated for the most part simply by the stress of the voice; but in Hebrew it is further suggested by the position of the words. Accordingly as a rule the predicate, if a verb or adjective, precedes its subject. If, however, the predicate be a noun or personal pronoun, in which case there might be a doubt which is the subject and which the predicate, the logical order is observed and the subject precedes, יְהוָה הוּא הָאֱלֹהִים *Jehovah is the God* 1 Kin. 18: 39, אֲבִיךָ אִישׁ מִלְחָמָה *thy father is a man of war* 2 Sam. 17: 8, Deut. 10: 17, 1 Sam. 1: 26, Isa. 1: 7, 23, 7: 8, 9, 8: 13, 48: 12.

a. Sometimes for the sake of special emphasis the predicate noun precedes the subject noun, Deut. 26: 5, Isa. 6: 3, 13, or pronoun Gen. 43: 12, Isa. 6: 5, Jer. 1: 6, 7. Or while the subject is prefixed, the predicate noun may emphatically precede a pronoun which repeats the subject, קְטֹרֶת הִיא תּוֹעֵבָה הִוא *incense, it is an abomination* Isa. 1: 13, or the order may be reversed in successive clauses Isa. 5: 7. Participles in general follow the order of nouns Gen. 7: 4, 37: 19, Num. 22: 34, 1 Sam. 14: 8, Prov. 22: 15, Isa. 3: 1, 5: 28, Ezek. 37: 28, though liable to the changes due to emphasis Gen. 3: 5, 14, 17, 41: 32, 42: 9, 23, Num. 35: 16, Judg. 15: 11, Isa. 2: 22, 3: 13, 48: 13, Jo. 4: 4, Am. 6: 8, 7: 4. In Gen. 41: 2, 18 the order of the words graphically depicts the successive impressions made upon the eye of the beholder, *from the river coming up seven kine fair* etc.: the place and movement first attract attention, then the number of moving objects, then the objects themselves are recognized and their qualities perceived. Predicate participles belonging to definite nouns are distinguished from attributives, by not receiving the article Deut. 2: 4, Jer. 44: 15.

2. Material and abstract nouns are used in the predicate to denote qualities, which in other languages would be expressed by adjectives קִירֹתָיו עֵץ *its walls were wood* i. e. made of wood Ezek. 41: 22; *the vale of Siddim* בְּאֵרֹת *was pits,* full of pits, as it were, composed of them, Gen. 14: 10; *thy shoes shall be* בַּרְזֶל וּנְחֹשֶׁת *iron and brass* Deut.

33: 25; Ps. 155: 15; *the camp was* בֶּטַח *security* i. e. secure Judg. 8: 11.

a. A like use of nouns for adjectives occurs in apposition § 256. 2, and in the construct state § 257. 2. *a* and 6. *b*. Other examples of material nouns so employed: Gen. 11: 1, Ex. 9: 31, Ezra 10: 13, Cant. 2: 15, Isa. 5: 12, 7: 24, Jer. 2: 28, 24: 2. Abstracts often convey the idea more strongly, than would be done by an adjective, *thy judgments are* צֶדֶק *righteousness* Ps. 119: 75, more expressive than "righteous"; they not merely possess the quality but are so to speak identical with it; Gen. 12: 2, Job 19: 29, 23: 1, 26: 13, Ps. 109: 4, 110: 3, Eccles. 10: 12, Isa. 11: 10, Jer. 44: 2, Ezek. 27: 36, Dan. 9: 23. An adverb is similarly used as a predicate Job 8: 9 תְּמוֹל אֲנַחְנוּ *we are yesterday* i. e. of yesterday. Sometimes these brief and emphatic expressions alternate with other forms of speech, *I am* שָׁלוֹם *peace, they are* לַמִּלְחָמָה *for war* Ps. 120: 7; *is your father health?* i. e. well Gen. 43: 27, 2 Sam. 20: 9 but *is health* לוֹ *to him?* Gen. 29: 6, 2 Sam. 18: 32; thou art חֲמוּדוֹת *delights* i. e. much delighted in Dan. 9: 23, equivalent to אִישׁ חֲמוּדוֹת Dan. 10: 11, 19.

3. A noun in the predicate may receive the same adjuncts as in the subject, § 247.

Predicate Adjectives and Demonstratives.

§ 263. Adjectives and demonstrative pronouns in the predicate agree with the nouns to which they relate in gender and number, but differ from attributive adjectives and demonstratives, § 252, in standing before the noun and in not receiving the article, though the noun be definite, טוֹב הַדָּבָר *the word is good* Deut. 1: 14, רַבִּים רַחֲמֶיךָ *his mercies are great* 1 Chron. 21: 13, אֵלֶּה תּוֹלְדוֹת הַשָּׁמַיִם *these are the generations of the heavens* Gen. 2: 4.

a. In circumstantial clauses, the predicate adjective stands regularly after the noun; it may also take this position in other cases when the emphasis requires it כָּל-לֵבָב דַּוָי *the whole heart is faint* Isa. 1: 5.

b. If the sense require the predicate to be made definite, it will receive the article, פִּי הַמְדַבֵּר *my mouth is the* (one) *speaking* Gen. 45: 12, יְהוָה הַצַּדִּיק *Jehovah is the righteous* one i. e. is in the right, *and I and my people are* הָרְשָׁעִים *in the wrong* Ex. 9: 27, Gen. 2: 11, 1 Kin. 18: 25, Ps. 19: 11, Isa. 14: 27, Zech. 7: 6; but in 1 Kin. 3: 22, 23 הַחַי and הַמֵּת are subjects.

Comparison of Adjectives.

§ 264. 1. Adjectives have no distinct form for the comparative or superlative. Comparison is expressed by means of the preposition מִן *from* placed after the adjective, טוֹבָה חָכְמָה מִפְּנִינִים *wisdom is better than rubies* prop. is good from rubies, differs from them and by implication is superior to them in point of goodness, Prov. 8: 11; צַדִּיק אַתָּה מִמֶּנִּי *thou art more righteous than I*, 1 Sam. 24: 17, Lev. 13: 4, 2 Sam. 13: 16, 2 Chron. 29: 34, Eccles. 4: 9.

2. The superlative degree may be expressed

(1.) By adding כֹּל *all* to the comparative particle מִן, גָּדוֹל מִכָּל־בְּנֵי־קֶדֶם *great from all the sons of the east* i. e. *the greatest of all*, etc., Job 1: 3, 2 Sam. 19: 8.

(2.) By an emphatic use of the positive, so as to imply the possession of the attribute in an eminent degree, קָטֹן בָּנָיו *the least of his sons* prop. *the little* (one) 2 Chron. 21: 17, הַיָּפָה בַּנָּשִׁים *O fairest among women* Cant. 1: 8, הַקָּטָן *the least*, הַגָּדוֹל *the greatest* 1 Chron. 12: 14, טוֹבָם *the best of them* Mic. 7: 4.

a. When the predicate is a verb instead of an adjective, comparison may be expressed in the same manner, אֶגְדַּל מִמֶּךָּ *I will be greater than thou* prop. *great from thee* Gen. 41: 40, 19: 9, 32: 11, Ex. 36: 5, Judg. 2: 19, 2 Sam. 6: 21, 22, 20: 6, 1 Kin. 5: 10, Job 3: 21, 6: 3, Ps. 69: 32, וַיִּחְכַּם מִכָּל־ הָאָדָם *and he was the wisest of all men* 1 Kin. 5: 11, Gen. 37: 3, 1 Sam. 18: 30, 1 Kin. 14: 9. So after adverbs 2 Chron. 25: 9, Deut. 7: 7. In a few passages, chiefly occurring in the book of Ecclesiastes, comparison is made by means of the adverb יוֹתֵר *more*, חָכַמְתִּי אֲנִי אָז יוֹתֵר *I was then more wise* Eccl. 2: 15.

b. The construction with מִן may also be used to denote excess, גָּדוֹל עֲוֹנִי מִנְּשׂוֹא *my iniquity is too great to be forgiven* prop. *greater than* (it is possible) *to forgive* Gen. 4: 13, מְעַט מִמְּךָ *too little for thee* Job 15: 11, Gen. 18: 14, Num. 16: 9, Ruth 1: 12, Isa. 7: 13; and this usage once established was extended to cases, which seem incapable of being logically resolved Isa. 49: 6, Ezek. 8: 17.

c. A comparative sense is commonly ascribed to מִן in the following passages, in which an adjective, suggested by the context, must be supplied,

יָשָׁר מִמְּסוּכָה *the upright* (is sharper) *than a thorn-hedge* Mic. 7: 4, מִבְּאֶפֶס *less than nothing* Isa. 40: 17, 41: 24, Ps. 62: 10, Isa. 10: 10, Job 11: 17; in some of these cases, however, מִן may have the sense of *from* or *of*, and denote that from which any thing is derived or of which it forms a part.

d. The name of God has been supposed to be used in certain passages simply to enhance the magnitude of that with which it is connected and thus to form a sort of superlative. But in all such cases there is a direct reference to the divine Being, גִּבֹּר צַיִד לִפְנֵי יְהוָה Gen. 10: 9 is not merely *a very valiant hunter*, one so to speak upon a superhuman scale or in the divine estimation, but with the superadded thought of attracting the notice and displeasure of Jehovah; חֶרְדַּת אֱלֹהִים 1 Sam. 14: 15 is not merely *a very great trembling* but *a trembling* sent *of God*; עִיר־גְּדוֹלָה לֵאלֹהִים Jon. 3: 3 is not simply *an exceedingly great city*, but one which in its greatness is an object of the divine regard, comp. 4: 11.

e. Comparisons are sometimes made with objects in a general way, without stating the particular aspect compared, when this is sufficiently obvious, *joy in my heart* בְּעִתָּם *more than* their joy at *the time* when etc. Ps. 4: 8, *making my feet* כַּאֲיָלוֹת *like* the feet of *the hinds* Ps. 18: 34, Job 35: 2, Isa. 5: 29, 10: 10. Cant. 1: 15, Ps. 45: 7 are not, as some have alleged, to be explained after this analogy. The comparison is fully stated in Prov. 3: 14 טוֹב סַחְרָהּ מִסְּחַר־כָּסֶף *the gain of it is better than the gain of silver.*

Verbs.

§ 265. 1. The doctrine of the Hebrew tenses rests upon a conception of time radically different from that which prevails in our own and in other Indo-European languages. Time is conceived of, not as distributed into three portions, viz.: past, present, and future, but as consisting of the past and future only. The present is, in this view, an inappreciable moment, without extension or cognizable existence, the mere point of contact between two boundless periods of duration, or the ever shifting instant of transition from one to the other, and, as such, not entitled to be represented by a distinct verbal form. Every action or state of being is accordingly viewed as belonging to the past or to the future; and such as do not belong exclusively to one, may be referred indifferently to either.

2. Within these two grand divisions of time no ac-

count is made of those minuter distinctions, in the expression of which we are accustomed to employ such a variety of tenses, nor of those modal differences which are with us indicated by the indicative, subjunctive, and potential, except to that limited extent to which these may be regarded as covered by the paragogic and apocopated futures, § 270. Whatever is, or is conceived of as past, must be put in the preterite; the future is used for all that is, or is conceived of as future, while all subordinate modifications or shades of meaning are either suggested by accompanying particles, or, without being precisely indicated, are left to be inferred from the connection.

3. Another peculiarity still more foreign to our usages and modes of thought is that the time denoted by the Hebrew tenses is frequently to be estimated not from the actual position of the speaker but from some ideal position in the past or in the future to which he mentally transports himself. This subjective use of the tenses may be quite at variance with their objective employment. Thus the preterite tense may be used of that which is in reality future to the moment of speaking, because the speaker has in thought taken his station at a point yet more remotely future, from which he looks back upon that which he describes as though it had already taken place. In like manner the future tense may be used of events in the past, because the speaker transports himself in thought to a period prior to their occurrence and surveys them from that point.

a. No part of Hebrew Grammar has occasioned more perplexity than the seemingly arbitrary and promiscuous use of the tenses, and the difficulty of establishing for them any fixed and clearly defined temporal meaning. The denominations Preterite and Future appear to be incongruous, when so far from being limited respectively to the division indicated by the name, either tense may upon occasion be employed of the past, pre-

sent or future and both may occur in application to the same period of time and even be intermingled in the same description. Hence other names have been proposed as Present (Lee) or Aorist (De Sacy) instead of Future. And it has been seriously questioned whether the so called tenses are really such, and should not rather be considered modes. Ewald at one time called them the First and Second Mode. And the most eminent grammarians at present incline to call them the Perfect and Imperfect on the assumption that primarily and properly they have no relation to succession in time at all, but only to the quality of an action or state of being; the Perfect being assigned to that which is regarded as complete, and the Imperfect to that which is regarded as incomplete, irrespective of the period of time to which they may severally belong. These names properly defined and understood correspond in a striking manner with certain marked uses of these tenses, and their employment has much to recommend it. But with all deference to the weight of authority arrayed in their favour, they seem on the whole less simple and less appropriate than the old designations Preterite and Future, and appear to indicate derived and secondary qualities rather than such as are original and fundamental. For

(1) It is very improbable *a priori* that a language should have no method of denoting time except the indirect one which this new theory supposes, and no forms which in their original and native import are intended for its expression. The time of an action is and must always have been regarded as so important a part of what is to be stated about it, that the strong antecedent presumption is that some direct provision must have been made for its notation. If any equally satisfactory explanation can be made of the facts on the assumption that the Hebrew tenses are properly such and that they denote the time and not merely the mode of an action, this is clearly entitled to the preference.

(2) That such a satisfactory explanation exists will be shown hereafter in detail. The whole mystery of the matter disappears, as soon as it is perceived, that the tenses have a subjective as well as an objective use; that is to say, the time which they denote is not invariably measured from the moment of speaking, but quite frequently from some ideal position taken in thought by the speaker and suggested by the context. This subjective employment of the tenses, which must necessarily be assumed to an equal extent in the modal hypothesis, really renders that hypothesis altogether unnecessary. The notion that the elemental ideas of past and future are only expressed in Hebrew indirectly through the medium of the ideas of the complete and the incomplete, is not only a philosophical abstraction, which it is not easy to verify, but it imposes upon the student a most serious difficulty at the outset by requiring of him an exceedingly abstruse process of thought to attain a very simple result, which can be made perfectly perspicuous in a far readier and more natural manner. For purposes of instruction the time-theory of the tenses has the great advantage of clearness and simplicity over the modal theory, even were the latter to be considered the more profound and philosophical.

(3) In the most common use of the tenses and especially when they

are contrasted in the same sentence, the distinction is not one of mode but of time. *The like* הָיָה *were not before them and* יִהְיֶה *shall not be after them* Ex. 10: 14; *the covenant which* כָּרַתִּי *I made with your fathers* Jer. 31: 32, *which* אֶכְרֹת *I will make after those days* ver. 33; *what* הָיָה *has been is that which* יִהְיֶה *shall be, and what* נַעֲשָׂה *has been done is that which* יֵעָשֶׂה *shall be done*, Eccles. 1: 9, Cant. 5: 3, 1 Kin. 21: 19. In the absence of decisive reasons to the contrary, this may fairly be regarded as an index to the real nature of the radical and primal distinction between them.

(4) When a series of verbs occurs, whose tenses are apparently used promiscuously e. g. Ps. 18: 5 ff., Hab. 3: 3 ff., the first verb is ordinarily regulative of the rest, being used in its proper tense signification, and the time of the others is determined by it; which shows that the apparent fluctuation of meaning in the tense is due to the connection in which it stands and not to the inherent signification of the form; in other words it grows out of its subjective use as indicated by its surroundings and not out of modal distinctions attaching to the form itself. And in general whenever there is a departure from the strict objective meaning of the tense as measured from the time of speaking, the explanation is found in some suggestion of the context fixing a new point from which the measurement is to be made. All which tends to show not that these tenses have a meaning independent of time, but that the time which they denote is often reckoned from a subjective standpoint.

(5) This is further confirmed by the fact that the seeming fluctuation in the use of the tenses is much more marked in poetry than in prose, the fancy of the poet leading him to transport himself to ideal positions other than that which he actually occupies and thus making the use of the tenses more than ordinarily subjective. We are thus again led to look for the cause of the phenomenon in the mind of the speaker himself, rather than in some modal distinction inherent in the form.

(6) The names Perfect and Imperfect do not adequately describe the functions of the tenses to which they are applied. Imperfect is inapplicable to a tense which is predominantly used to denote future action, not as of this or that quality but simply and solely as future; it is an abuse of language to call that incomplete which has as yet no existence but is to come to pass hereafter. The unsuitableness of the name "Imperfect" is confessed and urged by Böttcher, who proposes instead "Fieus" (becoming); in which he is followed by Driver, who suggests "Inchoate" or "Incipient". Böttcher fancifully enough claims that the one tense denotes the termination of an action, and the other the beginning of it, while the participle represents it as in progress. All that is correct in this is that the preterite looks back upon an action as belonging to the past and the future looks forward to it, from the assumed point of observation, whether the actual present or some ideal position in which the speaker in thought places himself; the participle, as a verbal noun, simply sets forth the active performance or passive endurance of the action denoted by the verb or the possession of the quality which it expresses, out of all relation to time except as this is inferred from the connection. In 1 Kin. 1: 11, 13, 18, 22: 41, 52, 2 Kin. 9: 13 and

many similar passages the preterite מָלַךְ indicates the beginning of a reign, and in 1 Kin. 22: 42 the term of its continuance. In Gen. 14: 4 the term during which the king of Sodom continued to serve Chedorlaomer as well as the initial point of the rebellion are expressed by preterites עָבְדוּ, מָרְדוּ. In 1 Kin. 1: 46 יָשַׁב represents an action not at its termination but its commencement; so שָׁבְתָה Ruth 1: 15, בָּא Dan. 1: 1. In Gen. 11: 5 בָּנוּ does not imply that the children of men had completed their work of building when Jehovah went down to see their city and tower. It is plain from numberless examples, that the tense form has nothing to do with suggesting whether the beginning, middle or end of an action but simply the action as a whole; and it is not limited to one quality of the action whether as complete or incomplete. These modifications may be suggested by the nature of the case or by attendant circumstances but not by the tense form as such.

(7) Add to this the remarkable manner in which the Preterite under any of its aspects may be continued by the Future with Vav consecutive, and the Future by the Preterite with Vav consecutive, shewing the substantial equivalence between the two tenses in all varieties of their employment, when subjected to the modifying influence of Vav consecutive. The effect of this particle is simply to mark the close connection between two acts so that the second is not conceived independently but as the sequence of the first. The standpoint of measurement is mentally shifted so that events actually past become future from this new post of observation and *vice versâ*. There is no change in the modality of the act, but only in the point of time from which it is subjectively regarded.

The Primary Tenses.

The Preterite (Perfect).

§ 266. **1.** The preterite or perfect is accordingly used of the past, whether our idiom would require the absolute past, i. e. the historical tense, *in the beginning God* בָּרָא *created*, etc., Gen. 1: 1, *God* נִסָּה *tempted Abraham* Gen. 22: 1; or one of the relative tenses, viz. the past viewed in relation to the present, i. e. the perfect, *what is this that* עָשִׂיתָ *thou hast done* Gen. 3: 13, *thee* רָאִיתִי *have I seen righteous* Gen. 7: 1; the past in relation to another past, i. e. the pluperfect, *God ended his work which* עָשָׂה *he had made* Gen. 2· 2; *and they did so as Jehovah* צִוָּה *had commanded* Ex. 7: 10; or the past in relation to a future, i. e. the future perfect, *when Jehovah* רָחַץ *shall have washed away*, etc., Isa. 4: 4, *until the time that she*

which travaileth יָלָדָה *shall have brought forth* Mic. 5: 2; or a conditional mood, *except Jehovah of hosts had left unto us a very small remnant* הוֹתִיר *we should have been as Sodom* Isa. 1: 9, *I would there were a sword in mine hand, for now* הֲרַגְתִּיךְ *I would have killed thee* Num. 22: 29; or an optative, denoting something which was to have been desired but which nevertheless did not occur, לוּ־מַתְנוּ *O that we had died* Num. 14: 2, לוּ חָכְמוּ *O that they had been wise* Deut. 32: 29, or a subjunctive (the Jordan was dried up), *that* יְרֵאתֶם *ye might fear the Lord*, at that time and thenceforward *forever* Josh. 4: 24.

a. In all these cases the verbal form merely expresses in the general that the action belongs to the past, but whether this is to be taken absolutely, relatively, or conditionally, must be learned from the circumstances of the case or from accompanying words. The Hebrew preterite may correspond to the historical tense whether this is used of an act performed or a condition existing at some specified time in the past, *in that day all the fountains* etc. נִבְקְעוּ *were burst open* Gen. 7: 11, so 8: 5, 14, 14: 5, 15: 18, 17: 26, 19: 5, 34, 35, 44: 3, Ps. 27: 2; or at some particular time not specified, *Esau* לָקַח *took his wives* Gen. 36: 2, so Gen. 3: 19, 14: 18, 15: 7, 19: 11, 21: 1, 26: 28, Judg. 10: 12, Job 1: 21, Ps. 8: 4, 57: 7, Cant. 5: 4-7; or at any time indefinitely, *blessed is the man, who* לֹא הָלַךְ *has not walked* etc. Ps. 1: 1, so 14: 1, 26: 4, 27: 9, Prov. 23: 35, 30: 4, Job 12: 9, 38: 12, 41: 3, 5, Isa. 1: 12, 40: 12-14, Num. 12: 2, 23: 10; or repeated acts at various times שָׂטְמוּ *went about* (day after day) Num. 11: 8; שָׁמְרוּ *they kept* (habitually) Num. 9: 23, a summation of numerous particulars previously recited; so עָבַד Deut. 12: 31 (illustrated by the following frequentative וַיִּשְׁרְפוּ), Judg. 2: 15, 17, 18, Ruth 4: 7, 1 Kin. 11: 8, 2 Kin. 13: 25, 17: 7 (חָטְאוּ embraces the whole series of acts in the verses that follow), ver. 13 שָׁלַחְתִּי, ver. 23 הֵסִיר, 2 Chron. 12: 11, בָּנָה 24: 11, Job 7: 13, Ps. 88: 10, 129: 1-3, Isa 1: 1, Jer. 5: 31, 32: 29, 44: 17, Mic. 6: 12; or a continued action or state, *Noah* הָיָה *was perfect in his generations*; *Noah* הִתְהַלֵּךְ *walked with God* Gen. 6: 9; *Solomon* בָּנָה *was building his house thirteen years* 1 Kin. 7: 1, so Ex. 12: 40, Deut. 2: 10, Josh. 11: 18, 2 Sam. 5: 4, Ps. 22: 5, 90: 1.

b. The preterite may correspond to the English perfect, whether this is used to describe an action just performed and belonging to the immediate past *lo, now* לָקַח *he hath taken my blessing* Gen. 27: 36; *mine eyes* רָאוּ *have seen the king* Isa. 6: 5, so Gen. 14: 20, 16: 11, 46: 31, Judg. 11: 7, 1 Sam. 14: 29; or an action performed in the past but whose effects still continue, *Jacob* לָקַח *hath taken all that was our father's* Gen. 31: 1, so 14: 23, 24, 15: 3, 16: 2, 19: 19, Judg. 10: 10, Ps. 2: 6, 22: 2, 44: 10, Isa. 1: 2, 4, 2: 6, 3: 14, 5: 4, 24; or an action performed at any time in the in-

definite past, considered as extending up to the present (see examples under *a*). It is often difficult to decide particularly in the Psalms and in other poetical passages, where the precise situation is uncertain, whether the preterite may be more properly rendered by the absolute past (English imperfect) or by the perfect tense. Ps. 3: 8 הִכִּיתָ *thou smotest all my enemies* (on some well remembered occasion), or *thou hast smitten* them (with a more general and vague allusion to the indefinite past); so 4: 2, 9: 5, 6; עָנִיתָנִי Ps. 22: 22, not *thou answeredst me*, as though an argument were drawn from former deliverances, but *thou hast answered me* expressing a confident assurance that his prayer is now granted.

c. When the connection suggests priority to another event in the past, the preterite has the sense of the pluperfect, thus very frequently in relative clauses, *he placed there the man* אֲשֶׁר יָצָר *whom he had formed*, Gen. 2: 8, so 3: 17, 23, 7: 5, 8: 6, 12: 5, 13: 4, 16: 15, 18: 8, 26: 15, Ex. 5: 14, 1 Kin. 11: 10; after כַּאֲשֶׁר Gen. 12: 4, 17: 23, 18: 33; after כִּי Gen. 2: 5, 6: 6, 8: 11, 14: 14, 1 Sam. 6: 19, 1 Kin. 5: 15, 11: 9, 12: 1; after יַחַשׂ Deut. 9: 16, Judg. 6: 28, Jer. 13: 7; in circumstantial or explanatory clauses Gen. 24: 1, 31: 34, 1 Sam. 3: 2, 2 Sam. 18: 18, 1 Kin. 1: 41, 2 Kin. 9: 16, Job 32: 4, Jon. 1: 5; and in other combinations 1 Sam. 1: 5, 4: 18, 1 Kin. 1: 6. Sometimes the preterite as a pluperfect stands before the verb to which it is related, *the sun* הַשֶּׁמֶשׁ יָצָא *had risen and Lot* בָּא *had entered Zoar, when Jehovah rained* etc. Gen. 19: 23, so 27: 30, 1 Sam. 9: 15. The connection may be such as to imply that one past action was contemporaneous with another, *he looked and lo, the smoke of the land* וְהִנֵּה עָלָה *went up* i. e. was then going up Gen. 19: 28; בָּנָה Gen. 11: 5 not *had built* but *were building*, comp. ver. 8. The preterite may be used in this case, where no stress is laid upon the conjunction in time or it is sufficiently obvious in itself. But the proper form to express contemporaneous action is the participle, which then answers to the English progressive imperfect, *Jehovah appeared to him*, וַיֵּרָא יֹשֵׁב *while he* was *sitting* Gen. 18: 1, 2 Kin. 8: 29, Job 1: 16.

d. When the connection is such as to suggest the relation of priority to some future action, the preterite answers to our future perfect; thus after עַד *until*, *I will draw until* כִּלּוּ *they shall have finished drinking* Gen. 24: 19, so ver. 33, Num. 32: 17, Ruth 2: 21, 2 Sam. 17: 13, Isa. 6: 11; אַחֲרֵי *after* Lev. 25: 48; אִם *if*, *if* זְכַרְתָּנִי *thou rememberest me* (lit. shalt have remembered), as I trust thou wilt Gen. 40: 14, Ruth 3: 18, Job 11: 13; in a relative clause Gen. 48: 6, חָלַף Num. 19: 18, Deut. 31: 18, 2 Sam. 17: 12; after כַּאֲשֶׁר *when* Gen. 43: 14, Esth. 4: 16; and in other constructions 2 Sam. 5: 24, 1 Chron. 17: 11, Isa. 16: 12. In most of these passages the English perfect could be similarly used. The Hebrew may substitute the future for the preterite in such connections, when it is not important to express the relation of priority, comp. אֶחֱרַשׁ Gen. 43: 9 with אַחֲרִישׁ 44: 32; also אֵיזֶה and רָאָה in successive clauses of Job 19: 27, כָּלָה and רָתַח Isa. 4: 4, אָצָא and תֵּצֵאנָה 6: 11, חָדַל and בָּלָה Ruth 3: 18.

e. After a conditional clause the preterite is used in a conditional sense, *except we had lingered, surely now* שָׁבְנוּ *we would have returned* Gen. 43: 10, Num. 22: 33, Judg. 13: 23, 14: 18, 1 Sam. 13: 13, 14: 30, 2 Kin. 13: 19; or

the condition may be suggested by the context, thus (assuming the promise to be fulfilled) חָיְתָה *there would have been pleasure to me* Gen. 18: 12, בִּי בְעֵדֶן not merely *who* ever *said* but *who would have said* (in any supposable case) Gen. 21: 7, כִּמְעַט שָׁכַב *almost lay* i. e. *might easily have lain* Gen. 26: 10.

f. Ewald, Böttcher and others have maintained that the preterite in Hebrew as in Arabic is occasionally used as a precative i. e. in the sense of a prayer or entreaty. This assumption, however, finds no support from the Arabic analogy in the passages alleged, and is moreover needless since the proper meaning of the preterite invariably yields a good sense. Thus לוּא חִשַּׁכְתָּ Isa. 48: 18 has been rendered *Oh, hearken* and לוּא־קָרַעְתָּ 63: 19 *Oh, rend the heavens*, whereas they should be read *Oh that thou hadst hearkened, Oh that thou hadst rent* etc.; זְכַרְתָּנִי Gen. 40: 14 has not the sense of an imperative but fut. perf. see *d*; *the counsel of wicked men* רָחֲקָה Job 21: 16, 22: 18 not *be far*, but *has been* and is *far from me*, חָרַפְתָּ Ps. 4: 2, פָּתַחְתָּ 116: 16 and the preterites in Lam. 3: 56-61 are not petitions but reminiscences of former benefits, while עָנִיתָנִי Ps. 22: 22 expresses a confident assurance of present favour, see under *b*.

g. It is not necessary to substitute the conjectural reading יְרָאֹתָם (inf. and suf.) for יְרֵאתֶם Josh. 4: 24; for, though this is the only instance in which a preterite follows לְמַעַן, the language is retrospective to be used subsequently by fathers to their sons, and the combination of לְעוֹלָם with a preterite has analogies in Ps 10: 11, 37: 28. The preterite also occurs as a subjunctive after other particles such as פֶּן e. g. פֶּן־מָצָא *lest he may have found* 2 Sam. 20: 6, פֶּן־נִבְאֲאוּ 2 Kin. 2: 16.

2. The preterite (perfect) is further used of the present, regarded as the continuation or natural sequence of a pre-existing action or condition. Anything begun in the past and continued in the present may be considered to belong to the past and accordingly spoken of in the preterite, *give me a little water for* צָמֵאתִי *I am thirsty* Judg. 4: 19 prop. I have been thirsty and (it is implied) I am so still; *the earth* מָלְאָה חָמָס *is full of violence* prop. *has been* and still is *full* Gen. 6: 13; *now* יָדַעְתִּי *I know that Jehovah is the greatest of all the gods* Ex. 18: 11, prop. *I have known*, the knowledge being in fact contemporaneous with the information upon which it was based. Comp. in Latin *novi, memini, odi.*

a. The preterite is accordingly used in a present sense of acts begun in the past and continued in the present, קָרָא *they call* (have called and still call) Gen. 19: 22, *Jerusalem* כָּשְׁלָה *totters and Judah* נָפַל *falls* Isa. 3: 8, הִגִּידוּ *they* have declared and still *declare* ver. 9, מָשְׁלוּ *they* have ruled and

still *rule* ver. 12, נִתְּנֻנִי *they* have been and *are reckoned* 5: 28, Ps. 38: 9, 102: 8-10. This is particularly the case with acts begun in the immediate past, thus *Jehovah* דִּבֶּר *speaks*, Isa. 1: 2 with reference to the utterance just begun and still proceeding; כֹּה אָמַר *thus saith Jehovah* Isa. 7: 7 and repeatedly, but in Gen. 3: 1 *God hath said* at some former time. *Jehovah saith* may also be expressed by the future יֹאמַר Isa. 1: 11, 40: 1 when in the action now going forward respect is had to its continuance in the future rather than to its beginning in the past. So with נָגַע, *lo this* זֶה *toucheth* (lit. hath touched) *thy lips* Isa. 6: 7; and רָאָה *now mine eye* עֵינִי *seeth* (lit. hath seen) *thee* Job 42: 5, 2 Chron. 2: 12; הֲרִמֹתִי *I lift my hand to Jehovah* Gen. 14: 22 in the act of swearing what then follows; בֵּרַכְנוּ *we bless you* Ps. 129: 8, יָעַצְתִּי *I counsel* 2 Sam. 17: 11 (Ex. 18: 19 has the fut. in a like connection), הִגַּדְתִּי *I* hereby *announce* Deut. 26: 3, 30: 18, הֵעַדְתִּי *I call to witness* Deut. 4: 26; נִשְׁבַּעְתִּי *I swear* Gen. 22: 16; מָלַךְ *reigneth* 1 Kin. 1: 13; Job 33: 2, 3.

b. This use of the preterite is especially frequent with neuter verbs, which describe a state or condition and which Böttcher for this reason proposes to call stative verbs, when the connection implies that the condition still continues. These are such as (1) express some quality of being, thus הָיָה *is* (prop. has become) Gen. 3: 22, Judg. 11: 35, הָיוּ *have been* and *are* Gen. 46: 32, Ezek. 13: 4, but Gen. 1: 2, 6: 4 *was, were*, and the fut. אֶהְיֶה *am* Ruth 2: 13; דָּמָה *is like* Ps. 102: 7, Ezek. 31: 2, 18 but ver. 8 *was like*; חָדַל *ceases* Job 3: 17; יָכֹל *is able, can* Ps. 36: 13, 40: 13, more commonly in the future as contemplating an action yet to be performed Gen. 31: 35, Deut. 1: 9, 31: 2; נָקַל *it is a light thing* 2 Kin. 20: 10, Isa. 49: 6; רַבּוּ *are many* Ps. 3: 2. (2) Denote a physical condition, אָמְלַל *languishes* Isa. 19: 8, גָּבַהּ *is high* Isa. 55: 9, גָּדַל *is great* Gen. 19: 13, זָקֵן *is old* (has become old) Gen. 18: 13, Josh. 13: 1, חָשַׁךְ *is dark* (has become dark) Isa. 5: 30, טֹבִי *are goodly* Num. 24: 5, טָהֵר *is clean* Prov. 20: 9, יָבֵשׁ *is* (has become) *dry* Joel 1: 12, 20, יָפָה *is fair* Cant. 7: 2, כָּבֵד has been and *is grievous* Gen. 18: 20, מָלֵא *is full* Gen. 6: 13 (but past 1 Sam. 18: 26, fut. perf. 1 Chron. 17: 11), עָמֹק *is deep* Ps. 92: 6, עָשַׁר *is rich* Hos. 12: 9, קָדַר *has soiled clothing* as a mourner Jer. 8: 21, קָטֹן *is small* Gen. 32: 11, רוּם Deut. 32: 27. (3) Mental states or affections, including even those of an active nature אָבַל *mourns* Joel 1: 9, אָהֵב *loves* Gen. 22: 2 (but past Deut. 4: 37, fut. as present Prov. 3: 12), בּוֹשׁ *is ashamed* Ezr. 9: 6 (but past Ezr. 8: 22, fut. as present Job 19: 3), בָּטַח *trusts* 2 Kin. 18: 19 (but past ver. 5, fut. as present Jer. 17: 5, 7), זָכַר *remembers* Num. 11: 5 (but past Judg. 8: 34, fut. as present Jer. 31: 20), חִכָּה *waits* Ps. 33: 20, חָמַד *desires* Prov. 1: 22, חָרָה (anger) *burns* Gen. 4: 6, חָתַת *confides* Ps. 7: 2, חָפֵץ *delights in* Isa. 1: 11, יָחַל Hi. *hopes* Ps. 38: 16, יָדַע *knows* Gen. 4: 9, 12: 11 (but past Gen. 28: 16, Hos. 8: 4, fut. as present but always with a suggestion more or less distinct of futurity or possibility Ex. 10: 26, 2 Sam. 3: 38, 1 Kin. 8: 39, Job 8: 9, 15: 9, 42: 3, Isa. 40: 21), יָגַע *is weary* Isa. 1: 14, יָאַס *loathes* Job 7: 16, יָגֵל *exults* 1 Sam. 2: 1, צָדַק *is righteous* Job 34: 5, שָׂבַע *has enough* Isa. 1: 11, שָׂמַח *rejoices* 1 Sam. 2: 1, שָׂנֵא *hates* Isa. 1: 14, שָׁאַנַן *is at rest* Job 3: 18.

c. In speaking of what is already resolved upon, though not yet per-

formed, the preterite is sometimes employed, because regard is had to the mental act or purpose rather than its outward execution; so frequently in promises, contracts etc. *unto thy seed* נְתַתִּי *I do now give* (lit. have given) *this land* Gen. 15: 18, the grant was made, though they had not yet been put in possession; accordingly when the latter idea is prominent, the future is used of the same transaction, *unto thy seed* אֶתֵּן *I will give this land* Gen. 12: 7, 26: 3. Comp. Gen. 23: 11, 13, 1 Kin. 3: 12, 13, 1 Chron. 21: 23, 2 Chron. 2: 9, Jer. 31: 33; גֵּרַשְׁתָּ *thou drivest me out* (lit. hast driven) Gen. 4: 14, הֵקִמֹתִי *I establish* 9: 17, נָשָׂאתִי *I accept* 19: 21, שָׂלַחְתִּי *I put forth* Ex. 9: 15, מְכָרָהּ *selleth*, is resolved to sell Ruth 4: 3, לְקַחְתִּי *I* am determined to *take it* 1 Sam. 2: 16.

d. It is comparatively a matter of indifference whether the preterite or the future be used to designate the present. That which now exists may either be regarded as continued from the past or as perpetuated in the future; and as it is contemplated under one or the other of these aspects, will the tense be determined accordingly. Thus, the question *whence come ye* is in Gen. 42: 7 מֵאַיִן בָּאתֶם *whence have ye come*, but in Josh. 9: 8 מֵאַיִן תָּבֹאוּ *whence are ye coming* or *will ye come*; because, in the former instance, the past action of coming is uppermost in the mind of the speaker, and in the latter this action is regarded as having not yet ceased. Comp. Isa. 39: 3. The questions *whither goest thou?* Gen. 16: 8, *what seekest thou?* Gen. 37: 15 are expressed in the future תֵּלֵכִי, תְּבַקֵּשׁ, for to the questioner the action of which he has just become aware extends indefinitely onward, comp. Gen. 32: 18, Judg. 19: 17, Isa. 40: 27. To the person addressed, however, the action is a continuous one, both preceding and following the question; accordingly it is the participle, which is used in the reply, *I am fleeing* בֹּרַחַת, *I am seeking* מְבַקֵּשׁ, comp. Judg. 19: 18. *Why doest thou so?* is Ex. 5: 15 expressed in the future תַּעֲשֶׂה, because it was feared that this new course of treatment would continue, so 1 Sam. 2: 23; but 2 Sam. 16: 10 in the preterite עָשְׂתָה because regard is had to what was already done. Hazael asks, *why weepest thou?* using the part. בֹּכֶה 2 Kin. 8: 12, since he is curious as to the cause of the spectacle; Elkanah who is concerned about its continuance uses the fut. תִּבְכֶּה 1 Sam. 1: 8, comp. 11: 5. Dr. Driver (Use of the Tenses in Hebrew, 2nd Edit. p. 52) thinks that the future as more indefinite was often preferred in questions on the score of courtesy to the categorical preterite *Whence may you be coming?* rather than *Whence have you come?*

3. The preterite (perfect) is likewise used in the statement of permanent facts or general truths: these, though true for all time, are gathered from experience and observation, and hence may be appropriately referred to the past, *an ox* יָדַע *knoweth his owner* Isa. 1: 3, oxen always have done so and it is implied that they always will; *Jehovah* רִחַם *pitieth them that fear him* Ps. 103: 13.

a. The future is used in this case with the same frequency and propriety as the preterite. *An ox will know his owner* expresses the same general truth as *an ox has known his owner*; only in the former case attention is chiefly drawn to its future, and in the latter to its past realizations, § 267. 3. As illustrations of the gnomic preterite, as it has been appropriately called when so used, see 1 Sam. 2: 3-5, Ps. 10: 11, 14: 1, 3, 33: 13, 14, 34: 11, 69: 34, 103: 11, 13, Prov. 6: 8 (fut. in parallel clause), 13: 1, 8, 14: 6, 19, 21: 22, 22: 12, 26: 13, 15, 27: 12, 28: 1 (fut. in parallel clause), 29: 9, 13.

4. The preterite (perfect) may also be used of the future, when viewed as past; that which is imminent and certain is sometimes spoken of as though it had already taken place, being the sure result of existing causes and as irreversible as that which has actually occurred נִדְמֵיתִי *I am destroyed* meaning my ruin is accomplished, I shall certainly perish Isa. 6: 5; and particularly the prophets, in their inspired descriptions of events which had not yet come to pass, often transport themselves to the time when they shall have been accomplished: and, surveying the future from this ideal point of view, they give to their predictions the form of a recital of what has already taken place, *Babylon* נָפְלָה *has fallen* Isa. 21: 9, *he* נָשָׂא *hath borne our griefs* Isa. 53: 4, *for I* הֶעֱרֵיתִי *have made Esau bare* Jer. 49: 10.

a. The counterpart of this preterite of certainty or prophetic preterite is the use of the future in vivid descriptions of the past, in which the writer appears, in imagination, to live over again what has already taken place, § 267. 5. The preterite is thus used of the certain and inevitable future in Gen. 30: 13, Judg. 4: 14, פָּרַח Job 5: 20 (which is preceded and followed by futures), 11: 20, 18: 6, Ps. 10: 16, 20: 7, 110: 5, 6. So by the prophets Isa. 2: 11, 5: 13, 9: 1-5, 19: 7, 28: 2, 32: 14, 53: 4-10, Ezek. 31: 15-18, Hos. 10: 15, Joel 4: 15, Mic. 1: 16, 2: 13.

The Future (Imperfect).

§ 267. 1. The future or imperfect is used in speaking of the future, whether absolutely, אֶעֶשְׂךָ *I will make of thee a great nation* Gen. 12: 2, or relatively to something in the past, *he took his eldest son who* יִמְלֹךְ *was to have reigned* 2 Kin. 3: 27, *Elisha was fallen sick of his sickness*

whereof יָמוּת *he was to die* 2 Kin. 13: 14; or conditionally, (would that I had died) *for* אֶשְׁקֹט *I would be at rest* Job 3: 13; *but* (if it were my case) אֲדַרֹּשׁ *I would seek unto God* Job 5: 8; or optatively in the various grades of desire, determination, permission, or command, *so* יֹאבְדוּ *may all thine enemies perish* Judg. 5: 31; *O that my grief* יִשָּׁקֵל *might be weighed* Job 6: 2; *all that thou commandest us* נַעֲשֶׂה *we will do* Josh. 1: 16; *deeds that* יֵעָשׂוּ *ought not to be done* Gen. 20: 9; *of the fruit of the trees of the garden* נֹאכֵל *we may eat* Gen. 3: 2, לֹא תֹאכְלוּ *ye shall not eat* ver. 3, *mine ordinances* תִּשְׁמְרוּ *ye shall keep* Lev. 18: 4; or as expressing what is possible or necessary and consequently limits or determines what shall actually take place, יְדַבֵּר *he can speak* (prop. he will do so, if he wishes, there is nothing to hinder him) Ex. 4: 14, נָמוּת *we must die* (prop. we shall, it is inevitable) 2 Sam. 14: 14; or subjunctively, especially after conjunctions signifying *that, in order that, lest,* etc., (bring the venison) לְמַעַן תְּבָרֶכְךָ *in order that my soul may bless thee* Gen. 27: 25, *against thee I sinned that* תִּצְדַּק *thou mightest be justified* Ps. 51: 6.

a. The future may be used of an action or state belonging to some specified time in the future Gen. 18: 14, Ex. 9: 5, Josh. 3: 5, Ps. 2: 5, Isa. 1: 15, 2: 20, 3: 18, 7: 8, 18, 20, 22: 13; or at some particular time not specified Gen. 2: 18, 6: 17, Ex. 6: 1, Isa. 2: 3, 6: 8, 7: 17; or to any time indefinitely Gen. 4: 7, 9: 5, Ex. 13: 14, 22: 1, Lev. 1: 2, Deut. 18: 18, 31: 29, Ps. 23: 1, 4; or repeated acts at various times Gen. 3: 14, 16, 18, Ps. 1: 2, 3, 4: 9, 5: 4, 23: 2-6, Isa. 7: 15; or a continuous action or state Gen. 1: 29, 5: 29, 8: 22, 1 Kin. 1: 13, Isa. 1: 29, 30, 3: 4. These various applications are not different senses denoted by the tense, but grow out of the signification of the verb, or accompanying words or the circumstances of the case.

b. Or it may express that which was future not to the time of speaking but to something in the past, יֻקַּם *was to be avenged* Gen. 4: 24, as had been promised ver. 15, תִּסַּבֵּנָּה *subsequently stood around* Gen. 37: 7, יֹאמַר *was going to say* Gen. 43: 7, יֹאכְלוּ *were to eat* ver. 25, יָשַׂר *was about to place* 48: 17, יַגִּיד *would tell* 1 Sam. 22: 22, יָבוֹא *was then coming* or *subsequently came* 2 Sam. 15: 37, 1 Kin. 7: 7, 8, Neh. 3: 14, 15 (comp. ver. 13), Esth. 4: 3, Ps. 73: 17, Prov. 24: 32 (the reflection was subsequent to the sight), Eccles. 4: 15. Or it may denote an act which was in the course of accomplishment contemporaneously with something in the past, לֹא יְעַצֵּר

was not heard 1 Sam. 1: 13, *where* יִשְׁתַּחֲוֶה *he was worshipping* or *was on the point of worshipping* or indefinitely and in a habitual sense, § 267. 4, *where men used to worship* 2 Sam. 15: 32, יְנַחֲשׁוּ *they were watching for an omen* 1 Kin. 20: 33, יְחַתְּרוּ *was repairing* 1 Chron. 11: 8, Job 32: 11, 12 (אָזְנַיִם and אֶתְבּוֹנָן denote his attitude of body and mind while waiting), Isa. 42: 14, *he fell into the pit which* יִפְעָל *he was making* Ps. 7: 16, אֶרְאֶה *when I saw* 73: 3, יְכַסֶּה *he was covering* (as seen in vision) Isa. 6: 2, *the house* יִמָּלֵא *was filling with smoke* ver. 4, וְסֹעֲרָה whilst *they were rushing on as a tempest* Hab. 3: 14. The participle might have been used in these and similar passages with equal propriety and with only this slight shade of difference in conception that the participle is suggestive of continuity, a present existence with the implication of both past and future, whereas in the future tense all priority to the time specifically referred to is lost from sight and the attention is directed solely to that point of time and an indefinite extension onward. Hence the futures above cited from Isa. 6: 2, 4, where the prophet is describing a vision just as it had burst upon his sight, and which consequently had no past.

c. It has been already remarked § 266. 1. *d*, that the future tense is sometimes used of an event prior to another event in the future, where the preterite might have been employed instead in the sense of the future perfect; so יִוָּלֵד Gen. 11: 6, יִמָּצֵא 15: 4, יֵאָסֵף 29: 8, יִרָּצֶה Deut. 4: 42, יִשָּׁמַע 1 Kin. 8: 33, 35, יִתְחַתְּנוּ Isa. 7: 23, יֻשָּׂרוּ 42: 4, יֻשָּׂרוּ 53: 10. In such cases the preterite explicitly expresses the priority of the one event to the other, though a doubt might sometimes arise whether it was used absolutely of what was past at the time of speaking or relatively of what preceded the other verb. The future simply refers both events alike to the time to come, leaving the question of the relative priority of either out of the account.

d. The future may have a conditional sense where doubt or contingency is expressed or implied, לוּ יִשְׂטְמֵנוּ *if Joseph should hate us!* Gen. 50: 15, *if* אֶסַּק *I should ascend* Ps. 139: 8; so after מָה, לָמָּה וַיְקַלֵּל *why should he curse* 2 Sam. 16: 9, *what is man that* תִּזְכְּרֶנּוּ *thou shouldest remember him* Ps. 8: 5, Job 21: 15, or אַיֵּהוּ, *why* יִסָּתֵר *should my father hide* 1 Sam. 20: 2, Judg. 9: 28; in the apodosis after conditional particles אִילֵךְ Num. 22: 18, 24: 13, Ruth 1: 13, Job 9: 16, 20, 16: 4, 5, Ps. 44: 22, 50: 12, 66: 18, Jer. 22: 24, Am. 9: 2-4, or where the condition is suppressed Job 3: 16, 6: 27, 14: 14, 15, 32: 22.

e. Simple futurity, as denoted by the future tense, is liable to various subjective modifications from the feelings of the speaker or actor. These are more distinctly expressed by the modal forms viz. the paragogic and apocopated futures and imperative, but they are likewise to a certain extent represented by the ordinary form of the future. When the action referred to is dependent on the will of the speaker, this naturally affects the sense of the words, and the future, while not so emphatic a declaration of purpose as its paragogic form would be, would nevertheless be rendered in English by *will*, rather than *shall*, אַגִּידָה *I will inform thee* Ruth 4: 4, אֵדַע *I will not know* Job 9: 21, Ps. 101: 4, אָקוּמָה *I will arise* Isa. 33: 10. Or the

future may express the wishes and hopes of the speaker rather than the objective certainty of the event, אֶמְצָא *I shall find* (I hope) i. e. *may I find* Gen. 34: 11, וַתִּקָּחֵהוּ *let them burn* 1 Sam. 2: 16, תֵּעָשֶׂה 20: 13, Jer. 28: 6, וְשַׁב (joined with imperatives) 1 Kin. 21: 7, תָּשִׁיב *shall it return*, equivalent to *do you wish it to return* 2 Kin. 20: 9, תִּקְוֶה 1 Chron. 22: 12, Isa. 5: 19 (joined with paragog. fut.), so after לוּ *O if* יִחְיֶה *he might live* Gen. 17: 18, Deut. 32: 29, Job 6: 2. When the action denoted by the verb is to be performed by the party addressed, a declaration of what he shall do or shall not do readily becomes a command Gen. 6: 14-16, 7: 2, 17: 9, 24: 4, Ex. 21: 15, Prov. 22: 17 (joined with imperatives), Isa. 8: 13, 38: 21 or a prohibition Gen. 2: 17, 3: 1, 3, 17, 9: 4, 17: 15, Ex. 20: 4, 5, 7, Deut. 22: 4, 5, Isa. 1: 13, 8: 12. Or if it be less urgently expressed and regard be had to the pleasure of the actor, it will be permissive, תֹּאכֵל *thou mayest eat* Gen. 2: 16, 14: 24, 42: 37, יֵחָלֵב Ex. 12: 48, Lev. 21: 22, 22: 23, Deut. 12: 20, 22, יַעֲלֶה 20: 5, or with reference to a past transaction לֹא יָכֹלְתִּי *might not go up* i. e. were not allowed to do so 2 Kin. 23: 9, Ps. 24: 3. Or regard may be had to duty or propriety, when *shall* becomes equivalent to *should* or *ought*, *therefore a man* יַעֲזֹב־ *shall leave* Gen. 2: 24, 9: 6, לֹא יֵעָשֶׂה *it ought not to be done* 34: 7, Lev. 4: 2, Num. 23: 8, אָמוּת Judg. 14: 16, 1 Sam. 20: 5, יָמוּת *should Abner die* 2 Sam. 3: 33, 13: 12, 1 Kin. 22: 6, יֵחָלֵשׁ Isa. 8: 19, יֵחָתֶה Ezek. 16: 16, Mic. 6: 6. Or to possibility, when *shall* or *shall not* means *can* or *cannot*, יִמָּנֶה *shall be numbered*, will be capable of being numbered Gen. 13: 16, נֵדַע *could we know* 43: 7, Num. 23: 13, תֵּאָסֵר *thou canst be bound* Judg. 16: 6, 13, 1 Sam. 13: 19, יֵאָבֵדוּ 2 Sam. 14: 14, 1 Kin. 7: 15, 26, 8: 5, 27, 18: 10, Ps. 91: 7, 119: 9, 137: 4, Prov. 20: 9, Eccles. 11: 2, Isa. 49: 15, Jer. 24: 2, 8, 29: 17, Lam. 3: 7, Ezek. 47: 5. Or to inevitable necessity, when *shall* means *must*, תָּשִׁיב *thou shalt return* Gen. 3: 19, תֵּלֵן *thou must give* 1 Sam. 2: 16, אָשִׁיב *I had to restore* Ps. 69: 5, יָבִיא *had to bring* Cant. 8: 11.

f. The future may be used in the sense of the subjunctive present or imperfect (according as it is referred by its connection to the future or the past) after such conjunctions as לְמַעַן, subj. pres. *in order that* יִיטַב *it may be well* Gen. 12: 13, 18: 19, Ex. 4: 5, Num. 17: 5, Deut. 4: 1, Josh. 3: 4, 1 Kin. 2: 3, 4, Isa. 5: 19, Ezek. 14: 11, 36: 30, Zech. 12: 7; imperf. *in order that* תֵּדְעוּ *ye might know* Deut. 29: 5, Neh. 6: 13, Ps. 78: 6, Ezek. 20: 26. After בַּעֲבוּר, pres. *in order that* תִּחְיֶה *it may be* Gen. 21: 30, 27: 4, Ex. 9: 14; imperf. Ps. 105: 45. After פֶּן, pres. Gen. 3: 22, Ex. 5: 3, 34: 15, Lev. 10: 7, Ps. 2: 12, 38: 17; imperf. Gen. 31: 31. After עַד imperf. Josh. 10: 13, Jon. 4: 5. After בְּ pres. Gen. 38: 16, imperf. 1 Sam. 22: 22, Job 36: 10. After אֲשֶׁר as a conjunction pres. Gen. 11: 7, Deut. 4: 40, imperf. Esth. 2: 10; or as a relative used in an indefinite sense Judg. 17: 8; or after כַּאֲשֶׁר *as* if *it* יִהְיֶה *were* Ezek. 1: 16. So in clauses preceded by the simple copulative Vav, where the connection of thought suggests the idea of the design or result, pres. *what shall we do to thee* וְיִשְׁתֹּק *that the sea may be quiet* (lit. and the sea will be quiet) Jon. 1: 11, Ex. 28: 35, 43, Deut. 17: 17, Neh. 6: 9, Jer. 10: 4; imperf. *I took a bribe* וְאַעְלִם *that I might hide my eyes* (lit. and I shall hide) 1 Sam. 12: 3, 2 Chron. 23: 19, *I called him* וְאַבְרְכֵהוּ *that*

I might bless him (or *and I* subsequently *blessed him*, see note *b* above) Isa. 51: 2, 53: 2, Lam. 1: 19, Dan. 1: 5; also where the imperf. subjunctive would be used in English to indicate not past time but contingency, *God is not man* וְיִכְזָב *that he should lie* (lit. *and he will* perhaps *lie*) Num. 23: 19, 1 Kin. 12: 9. Also in a like connection with no preceding conjunction, pres. *it shall have a margin* etc. וְלֹא יִקָּרַע *that it be not rent* Ex. 28: 32, Ps. 10: 18, Isa. 41: 7; imperf. Neh. 13: 19, Job 9: 32.

g. When employed in requests, the future is frequently accompanied by the particle נָא, thus, וְיַדַּבֶּר־נָא *let thy servant speak, I pray thee* Gen. 44: 18, וְתֵגַר־נָא *let the wickedness of the wicked cease, I pray* Ps. 7: 10.

h. The future is idiomatically used with בְּטֶרֶם and מִבְּטֶרֶם *not yet, before*, whether the period referred to is past, present or future the time denoted by the particle being antecedent to the action of the verb. Thus, referring to the past, *I ate of all* מִבְּטֶרֶם תָּבוֹא *before thou camest* Gen. 27: 33, *the lamp of God* בְּטֶרֶם תִּכְבֶּה *had not yet gone out* 1 Sam. 3: 3; to the present מִבְּטֶרֶם *dost thou not yet know* Ex. 10: 7; to the future, *that my soul may bless thee* בְּטֶרֶם אָמוּת *before I die* Gen. 27: 4, בְּטֶרֶם יִקְרָאוּ *before they call, I will answer* Isa. 65: 24. There are four examples of the use of the preterite with these particles, the reference being to past time, Gen. 24: 15, 1 Sam. 3: 7, Ps. 90: 2, Prov. 8: 25; in the last two passages the verb is removed from the influence of the particle by the interposition of the subject. In every other instance the verb follows this particle immediately, except Isa. 28: 4 where there is an ellipsis of the verb, and Zeph. 2: 2 where טֶרֶם is added to strengthen the particle. The infinitive is once used with בְּטֶרֶם Zeph. 2: 2 and once with מִבְּטֶרֶם Hag. 2: 15.

2. The future (imperfect) may be used of the present, when it is conceived of as extending into the future, *comfort my people* יְנַחֵם *saith your God* Isa. 40: 1, the divine utterance though begun is not yet finished; הֲלֹא תֵדָעוּ *do ye not know?* ver. 21, are you ignorant, and is this ignorance to continue? *why* תִּבְכֶּה *weepest thou?* 1 Sam. 1: 8.

a. The future is chiefly used to represent the present when the action referred to has just begun, or has just come to the notice of the speaker and consequently has no past; or when for any reason his attention is particularly directed to it as then going forward and likely to continue, rather than to any previous occurrence of it, Gen. 44: 7, Num. 11, 13, 1 Sam. 17: 8, תֵּרְאוּ *you see* (now, if never before) ... *why* תַּרְאִי *do you persist in bringing* 1 Sam. 21: 15, 2 Sam. 3: 8, 1 Chron. 21: 3, Job 3: 20, 32: 19, Ps. 3: 5, 7, 7: 14, 15, 59: 5, 8, 88: 15, Isa. 3: 15.

3. The future (imperfect) is used in the statement of general truths or permanent facts, when the attention is directed to their validity for all time to come, *righteous-*

ness תְּרוֹמֵם *exalteth a nation* Prov. 14: 34, it does so now and always will; *a son* יְכַבֵּד *honoureth his father* Mal. 1: 6.

a. See Deut. 32: 11, 1 Sam. 2: 8, 16: 7, Job 4: 17-20, 6: 5, 32: 9, Ps. 1: 4, 42: 2, 104: 15, Prov. 10: 1 ff., 26: 14, 20, Eccles. 7: 7, 8: 1, 10: 8, Ezek. 18: 2 (comp. Jer. 31: 29), Hos. 4: 11, Mal. 1: 6.

4. The future (imperfect) is likewise used of that which is customary or often repeated. That which will occur may be regarded as liable to occur and hence as occurring frequently. A single event in the past is naturally described in the preterite; but if the speaker contemplates a series of events, stretching indefinitely forward from an initial point at which in imagination he places himself, he employs the future; *a mist* יַעֲלֶה *used to go up from the earth* Gen. 2: 6, i. e. not only at the moment of time previously referred to but from that onward; *thus Job* יַעֲשֶׂה *did continually* Job 1: 5; *the daughters of Israel* תֵּלַכְנָה *were in the habit of going from time to to time* Judg. 11: 40; so Gen. 29: 2, Ex. 13: 22, Num. 11: 5, 9, 1 Sam. 2: 19.

a. In this remarkable use of the future as a frequentative past it corresponds to one of the senses of the Greek and Latin imperfect, a circumstance which first suggested the name "imperfect" for this tense, though the term is now used by grammarians in a much wider application. For additional examples, see Gen. 6: 4, Ex. 40: 36 ff., Num. 9: 15-23, 10: 36, Deut. 11: 10, Judg. 14: 10, 17: 6, 1 Sam. 1: 5, 7, 2: 22, 9: 9, 14: 47, 21: 12, 2 Sam. 4: 2, 12: 3, 31, 13: 18, 1 Kin. 3: 4, 4: 7, 5: 25, 28, 6: 8, 10: 5, 28, 29, 21: 6, 2 Kin. 3: 25, 4: 8, 12: 14, 13: 20, 1 Chron. 12: 22, 2 Chron. 24: 11, 25: 14, Esth. 2: 12, 13, Job 5: 14, 22: 6, 7, 29: 2, 3, Ps. 78: 40, 95: 10, Isa. 1: 21, Jer. 36: 8, Am. 4: 7.

b. The future is similarly used of customary action in the present, Gen. 6: 21, 10: 9, 29: 26, 44: 5, Ex. 33: 11, Num. 11: 12, Deut. 1: 31, 44, 3: 9, 28: 29, 32: 11, 1 Sam. 5: 5, 2 Kin. 21: 13, Job 33: 29, Ps. 3: 6, 6: 7, 104: 26, Eccles. 10: 16, Isa. 1: 23, 2: 6, 8, 3: 16, 5: 8, 7: 25, 31: 4, 55: 10, Jer. 9: 3, 13: 11, 12, Hos. 4: 12, 13. That it may be used of that which will be often repeated in the future was stated under 1. *a*.

5. The future (imperfect) may be used of the past, when the speaker or writer assumes an ideal point of vision prior to its occurrence, and so regards it as future.

Thus, a historian in animated description, as we might use the present, אָז יָשִׁיר מֹשֶׁה *then sings Moses* Ex. 15: 1: or a poet, who lives in the midst of that of which he sings. *Balak* מַנְחַנִי *brings me from Aram* Num. 23: 7, יֹאבַד יוֹם אִוָּלֶד בּוֹ *let the day perish on which I am to be born* Job 3: 3, where the speaker, by a bold figure, places himself before his birth, and prays that the day which was to give him existence might be annihilated, so that he might be saved from the misery of living; לָמָּה לֹּא מֵרֶחֶם אָמוּת *why may I not die from the womb?* ver. 11, where his position is shifted to the time immediately after his birth; יוֹדִיעַ דְּרָכָיו לְמֹשֶׁה *he makes known his ways unto Moses* Ps. 103: 7.

a. This use of the future to represent the past vividly conceived as though it were passing now or were just on the point of occurring belongs chiefly to poetry and to the elevated style Deut. 32: 10, 12, Judg. 5: 8, Job 4: 12, 15, 16, 10: 10, 11, תִּוָּלֵד 15: 7, 38: 21, Ps. 18: 7, 78: 15, 29, 45, 80: 9, 106: 18, 19, 126: 2, Isa. 51: 2, 63: 3, Hos. 8: 12, 13; when occurring in continuous passages it is very commonly joined with or passes into preterites in the proper sense Ps. 44: 3, 10-16.

b. In ordinary prose it occurs repeatedly after אָז *then*, Num. 21: 17, Deut. 4: 41, Josh. 8: 30, 10: 12, 22: 1, 1 Kin. 3: 16, 9: 11, 11: 7, 16: 21, 2 Kin. 12: 18, 15: 16, 16: 5, 2 Chron. 5: 2; other instances are rare Ex. 33: 7, Judg. 2: 1.

The Preterite and Future in Combination.

§ 268. There is considerable variety in the employment of the tenses, when both are combined in the same passages according as they are used in a simple objective manner and their time estimated from the moment of speaking, or are used subjectively and estimated from some other point of time to which the speaker is in thought transported, and which is either suggested by the context or readily inferred from the nature of the case.

a. Judged by an occidental standard the employment of the Hebrew tenses seems bewildering and capricious in the extreme; but it is in fact governed by fixed and easily intelligible principles. There is less definiteness

and precision in the notation of time than in Indo-European tongues, which possess a much greater number of tenses, each having its own specific value. More is left to be supplied by the imagination or knowledge of the hearer or reader. But there is for the most part no indistinctness in the impression left on the native mind, and no failure to convey the shade of thought intended. A certain amount of ambiguity in some instances, mostly occurring in poetry, arises from our imperfect knowledge of the situation of the writer: but this can be reduced by the general usage of the language within clearly defined limits. The principal difficulty arises when the attempt is made to transfer the statement to another language, which proceeds upon a different conception and introduces into the relations of time distinctions which the Hebrew does not recognize. The Hebrew tenses are never employed at random nor treated as equivalents. Their proper sense is never capriciously disregarded. There is always a reason why one tense is used rather than the other, which the original hearers must have felt, and which in the vast majority of cases there is little difficulty in ascertaining now. The interpreter is not at liberty to confuse the distinction between the tenses or arbitrarily to substitute one for the other or to impose upon them whatever rendering may suit his fancy in place of their own genuine signification, thus attributing to the writer what the interpreter thinks that he should have said instead of what he actually did say. Thus כִּי־הֲרֶסְנָה Ps. 11: 3 means not *what can the righteous do*, but *what has he done*, he has thus far accomplished nothing, implying indeed but not directly saying that there is no prospect of his doing any better in the future. כִּי קִוִּיתִי 39: 8 not *what can I hope for*, but *what have I hoped* and do I hope *for*. כִּי נָחָנִי 60: 11 not *who shall lead me* but *who has led me* as an already accomplished fact or one which is so certain that it is spoken of as though it were accomplished. הֶחְדַּלְתִּי Judg. 9: 9, 11, 13 not *should I cease* but *have I been made* by this choice of me as king *to cease*. *All the days that* חָיָה 1 Sam. 1: 28 not *he shall live* but *he has been* i. e. from his birth he has been in the intention of his parents surrendered to Jehovah. חָפַן הַצֵּל 2 Kin. 20: 9 not *shall the shadow go* but *the shadow has gone ten degrees*; *shall it return ten degrees?* (comp. Isa. 38: 8). The king's answer ver. 10 does not justify an impossible rendering of the question; it is directed to the alternative involved though not expressed "or shall it go forward?"

§ 269. **1.** When the preterite and the future stand in contiguous or related clauses, both may be used absolutely to denote respectively past and future time, תַּעֲבֹרוּ *ye shall pass* ... עֲבַרְתֶּם *ye have passed* Gen. 18: 5, יְכַסֶּנְהוּ *shall cover them* in all time to come ... יָרְדוּ *they went down* Ex. 15: 5, חָדְלוּ *have ceased* (past) ... יָנוּחוּ *shall rest* (continuous future) Job 3: 17, Ps. 9: 8, יְסָדָהּ *he founded it* (original creation) ... יְכוֹנְנָהּ *he shall make it firm* (per-

manent preservation) Ps. 24: 2, 26: 4, 88: 14 (have prayed and will continue to do so), Isa. 6: 7, 26: 9, Eccles. 5: 14, 15, 6: 4.

a. Thus in the parallelisms of poetry greater emphasis and compass are often given to the statement made by asserting it successively of both the grand divisions of time, *the work of Jehovah* לֹא יַבִּיטוּ *they will not consider* and *the deed of his hands* לֹא רָאוּ *they have not regarded*, Isa. 5: 12, 26: 9, Ps. 1: 1, 2, 17: 9, 44: 9, 59: 4, Prov. 1: 22, 14: 18 (inheriting without effort as past, the result of prudent conduct as future), 28: 1, Ezek. 18: 6, 9, Joel 2: 3. Much of the force and beauty of such passages is lost if the distinction of tenses is disregarded or both are merged in the vague and colorless present. In this combination of tenses each may of course have the various shades of meaning properly belonging to it §§ 266, 267. Thus the preterite in the sense of the present with the future לֹא יָדְעוּ וְלֹא יָבִינוּ *they do not know and will not understand* Isa. 44: 18, Am. 5: 21; or the future as a frequentative or as a vivid past with the preterite Job 24: 2, 28: 24, 25. The participle in the sense of a continuous present is sometimes joined with the preterite and future Ps. 119: 2, 3, Jer. 5: 6.

2. Or one of these tenses may be used relatively to the time denoted by the other, at which the speaker mentally takes his stand, and looks forward or backward from this ideal position.

a. Following a future the preterite may denote (1) an act prior not to the time of speaking but to the event before spoken of, *if a thief shall be found .... if the sun* זָרְחָה *has risen* (before he is found) Ex. 22: 1, 2, Lev. 5: 1, Ps. 54: 9, Prov. 21: 7, Isa. 11: 9, Lam. 3: 8 (his ear is closed against my prayer before it is offered); so with a noun indicating time, *in the harvest* אָגְרָה *she has gathered her food* Prov. 6: 8. (2) Or one involved in the preceding statement *his spirit shall go forth ... his thoughts* אָבְדוּ *have consequently perished* Ps. 146: 4, so after a participle בֹּצֵעַ בָּצַע *making unjust gain he has* thereby *taken leave of Jehovah* Ps. 10: 3, Prov. 14: 31, 17: 5. (3) Or an act that is either identical or contemporaneous with that expressed by the future, the narrator now looking back upon that as accomplished which he before regarded as future *expectation* תֹּאבַד *shall perish*, yes, *hope* אָבָדָה *has perished* Prov. 11: 7; *is it good that* תָּעֹשֵׁק *thou shouldest oppress* etc. *and that* חִיַּבְתָּ *thou hast* meanwhile *shined upon the counsel of the wicked* Job 10: 3, Ps. 37: 20, Isa. 43: 17 ... יָעָמְדוּ יַחְדָּו 44: 15, הָפַךְ ... יַעֲשֹׂב Ezek. 33: 15, Joel 2: 6, אָצַר ... יָשָׂא Mic. 2: 4, Hab. 3: 3, 4, 12, 13. (4) Or a later stage in the same transaction, an interval being assumed, דָּרְכוּ ... *they are bending the bow*, and now דָּרְכוּ *they have fitted the arrow* Ps. 11: 2, 22: 22, Job 20: 25, Isa. 18: 5; so after a noun clause חָפְרָה Isa. 5: 30. (5) Or a sequence from it חָבְאוּ *they have hidden themselves* (in consequence of the deeds of violence before described) Job 24: 4; רָצָה *favour*

may be shown to the wicked, בַּל־יָלַמֵּד *he has not learned righteousness* thereby Isa. 26: 10.

b. Following a preterite or any reference to past time the future may denote (1) an act which though past at the time of speaking was subsequent to or a consequence of the event before spoken of, *the Horites formerly* יָשְׁבוּ *dwelt in Seir, and the children of Esau* וְיִרָשׁוּם subsequently *dispossessed them* Deut. 2: 12; *they were both naked* וַיִּהְיוּ שְׁנֵיהֶם עֲרוּמִּים וְלֹא יִתְבּוֹשָׁשׁוּ *and were not ashamed* in consequence Gen. 2: 25; so Ex. 8: 20, 13: 22, וְלֹא יָסוּר 1 Sam. 2: 25, 3: 2 (*so that he could not see*), 13: 17, 18, 20: 2 K'thibh, 27: 4 K'thibh, 2 Sam. 2: 28, 23: 10, 1 Kin. 1: 1, 5: 7, 8: 8, 2 Kin. 12: 13-16, Ezr. 9: 4, Jer. 13: 7 (*so as to be good for nothing*), 52: 7 (*consequently fled*). This is very frequent in poetry Ex. 15: 12, Job 28: 11, Ps. 66: 6, 69: 33, 73: 22, 77: 17, 78: 44, 90: 5, 103: 16, 104: 5-9, 105: 44, 107: 6, 13, 14, Isa. 44: 13, 48: 3, Hab. 3: 10. So after participles and nouns Gen. 2: 10, Ex. 39: 23, Judg. 17: 6, 1 Sam. 1: 13, Esth. 4: 3, Ps. 107: 5. Or (2) an act contemporaneous with that expressed by the preceding preterite, the future being used in the sense of a progressive present. See examples under § 267. 1. *b.*

c. The tenses are often intermingled in the vivid descriptions of poetry. The poet places himself in the midst of that which he describes, shifting his position as successive scenes pass before his mind, part being conceived as having already taken place, and part as yet to come; thus in Ex. 15: 14, 15, *the nations* שָׁמְעוּ *have heard,* יִרְגָּזוּן *they will be afraid; pangs* אָחַז *have seized upon the inhabitants of Philistia; then the dukes of Edom* נִבְהֲלוּ *were troubled, the mighty men of Moab trembling* יֹאחֲזֵמוֹ *shall seize them, all the inhabitants of Canaan* נָמֹגוּ *have melted.* So Ezek. 13: 11, 12 (the fall is first viewed as impending; the storm which is to effect it has already come, with its promise of hail and of wind; then the wall is regarded as having fallen whereupon the reproaches of the spectators will follow), Job 19: 6-16, 30: 12 ff., Ps. 7: 13, 14, Isa. 10: 28-32, 44: 14, 16, 17, Hab. 3: 3, 7 ff.

d. The subjective use of the tenses is not infrequently associated with their objective use in the same passage. After viewing an event from an ideal standpoint a writer may indicate his actual position by employing the tenses either occasionally or continuously with strict reference to the moment of speaking. Thus the preterite may be used in its proper sense in connection with futures relating to the past, whether they are so employed in the way of vivid description Job 31: 7, 16-18, Ps. 18: 9, 12, 13, 32: 5, 80: 9-14, 106: 12, 13, or of customary action 2 Kin. 23: 9, Job 24: 9-16. In like manner the future may be used in its proper sense in connection with preterites referring to the future Job 5: 19, 20, 11: 20, 18: 5, 6, 27: 19, 20, Ps. 49: 15, 110: 5-7, Isa. 13: 10 Sometimes it is doubtful which tense is to be understood objectively, and consequently whether the passage relates to the past or the future e. g. Ps. 18: 37-46

The Modal Forms.

§ 270. 1. Of the two divisions of time recognized by Hebrew conception the past is unalterably determined; no volition can change what has already taken place. But the future is contingent and is the only domain within which the will of free agents can operate or over which it can exert any influence. Hence while the preterite has but one invariable form, there are certain modified forms of the future viz. the paragogic or intentional, § 97. 1, the apocopated or jussive, § 97. 2, and the imperative, § 84. 4, which are employed to express not simple futurity but the desire or will of the speaker. There is no special form for the expression of other relations than those which arise out of the feeling of the speaker, the simple future being used, as has been already stated, to denote contingency, possibility, obligation, dependence etc. as well as futurity; and in such cases the precise modification of the thought is either suggested by accompanying particles or left to be inferred by the hearer or reader from the circumstances and the nature of the case.

a. Accordingly the law, which is not the utterance of personal feeling but the declaration of what is required as a matter of general and abiding obligation, for the most part uses the future rather than the imperative or jussive, תִּשְׁמֹר *thou shalt keep the feast of unleavened bread* Ex. 23: 15; לֹא תְעַנֶּה *ye shall not afflict any widow* 22: 21; יָבִיא *he shall bring his offering* Lev. 7: 29. The commandment with promise is the only one in the decalogue, which departs from the strictly objective form and adopts the imperative, כַּבֵּד Ex. 20: 12, Deut. 5: 16. Compare the mandate of the law with the creative fiat תִּהְיֶה *there shall be a holy convocation* Lev. 23: 7, but יְהִי *let there be light* Gen. 1: 3; or with the exhortation of the prophet תִּהְיֶה Lev. 19: 36 but יְהִי Ezek. 45: 10; or with the counsel of the sage תַּשִּׂיג לֹא Deut. 19: 14, but אַל־תַּשֵּׂג Prov. 22: 28; or with the injunction addressed particularly to an individual לֹא יְשַׁתֶּה Num. 6: 3 but אַל־תִּשְׁתֶּה Lev. 10: 9. The imperatives of the book of Deuteronomy are chiefly due to its hortatory character, see Deut. 4: 1, 9, 23, 5: 1. The jussive is almost un-

exampled in strictly legal sections with the exception of יוּמָת in one standing phrase Lev. 5: 16, 24, 27: 31, Num. 5: 7; but see Ex. 23: 1.

2. While the fundamental meaning expressed alike by all these modal forms is desire on the part of the speaker, this is susceptible of indefinite variation in particular cases, arising out of the relation of the speaker to the party addressed or to the person or thing spoken of, out of the substance of the action denoted by the verb or out of attendant circumstances. Furthermore in the intentional, which is with few exceptions, § 97. 1. *a*, limited to the first person, this desire is directed to something in which the speaker is the actor. In the imperative, which is limited to the second person and an affirmative sense, the desire is directed to something to be done by the person or persons addressed. The use of the jussive is confined almost entirely to the third person, or to the second person in a negative sense; in the few instances in which it is employed affirmatively in the second person, it differs little from the imperative, except that the latter is briefer and was uttered in a more exclamatory tone.

§ 271. The intentional or paragogic future may express a determination, אֲזַמְּרָה *I will celebrate*, I am resolved to do so, Ps. 7: 18, נֵלְכָה *we will go with you* Zech. 8: 23; or (in the plural only) an exhortation to carry into effect a common purpose, נָתְנָה *let us appoint a head, and* נָשׁוּבָה *let us return to Egypt* Num. 14: 4; or a request or entreaty more or less earnest אֶקְחָה *let me fetch a morsel of bread* Gen. 18: 5, אֶעְבְּרָה *let me pass through thy land* Num. 21: 22; or an inward desire אֹכְלָה *I would like to eat* Deut. 12: 20; or simply consent *now* אָמוּתָה *let me die*, I am willing to die, *since I have seen thy face* Gen. 46: 30, Isa. 36: 8, and even in a few instances that reluctant consent, which is born of necessity, אֵלֵכָה *I must*

go into the gates of Sheol Isa. 38: 10, נְבֹאֲשָׁה *we have to grope like the blind* Isa. 59: 10.

a. Thus Isa. 1: 24 proceeds from a declaration of futurity אִנָּחֵם *I shall be eased of my adversaries* to one of purpose אֵינָקְמָה *I will be avenged of my enemies*; אֲנִי אֲדַבֵּר *I shall speak to my father myself* 1 Sam. 19: 3 as something that will certainly take place, but אֲדַבְּרָה־נָּא *come now, I will speak to the king* 2 Sam. 14: 15 as something resolved upon if, as the particle of entreaty politely suggests, she were permitted to do so; נִכְרְתָה־בְּרִית *we shall make a covenant* Ezr. 10: 3 simply declarative, but נִכְרְתָה בְרִית with urgency *come! let us make a covenant* Gen. 31: 44; עַד־אֶשְׁכְּחָה *until I can wink* as a voluntary act Prov. 12: 19. Examples of the paragogic future to express a determination Gen. 13: 9, 22: 5, 27: 4, 41, Ex. 14: 4, 20: 19, Deut. 17: 14, Job 7: 11, Isa. 18: 4, 55: 3 occasionally with נָא as a particle of self incitement Gen. 18: 21, Ex. 3: 3; exhortation to combined action, commonly with particles of incitement as לָכָה, לְכָה etc. Gen. 11: 3, 37: 17, Ex. 1: 10, Judg. 19: 11, 13, 1 Sam. 9: 9, 10, Ps. 2: 3, 95: 1, 2, 6; request, very frequently with נָא *I pray thee* Gen. 19: 20, Ex. 3: 18, 4: 18, Judg. 11: 19, Num. 21: 22, 1 Sam. 28: 22, 2 Sam. 16: 9; desire, *perhaps* אֲכַפְּרָה *I may atone* as I would like to do Ex. 32: 30; yielding to constraint Ps. 42: 5, 57: 5, 88: 16, Jer. 3: 25, 4: 19, 21, Mic. 1: 8.

b. Negatives rarely occur with the paragogic future; אַל is once found in an exhortation Jer. 18: 18, and a few times in petitions 2 Sam. 24: 14, Ps. 25: 2, 31: 2, 18, 69: 15, 71: 1, Jer. 17: 18, Jon. 1: 14; the use of לֹא necessitates a return to the simple form of the future Gen. 43: 4, 5, 8, Job 7: 11, Ps. 101: 2, 3, 119: 46.

c. The paragogic future does not occur in the books of Leviticus, Joshua, Esther or Ezra and but once in Ezekiel, Ezek. 25: 2.

§ 272. The jussive or apocopated future may according to circumstances express a command, *let the earth* תַּדְשֵׁא *bring forth grass* Gen. 1: 11, תּוֹחֵל *do thou wait* or *thou shalt wait* 1 Sam. 10: 8; or advice *let Pharaoh* יַרְאֶה *look out a man,* וְיַפְקֵד *and let him appoint* Gen. 41: 33, 34; or entreaty, *let thy loving-kindness* יְהִי *be upon us* Ps. 33: 22, תֵּרֶב *do thou increase* Ps. 71: 21; or a wish *may Jehovah* יָקֵם *establish his word* 1 Sam. 1: 23; or permission יַעַל *let him go up* or *he may go up,* וְיִבֶן *and build* Ezra 1: 3.

a. Examples of the jussive in the sense of a command, Gen. 1: 3, 6 etc., Deut. 15: 3, 2 Sam. 5: 24, 1 Chron. 14: 15, Isa. 55: 7, 61: 10, 2nd pers. Ezek. 3: 3; such jussives occurring in the course of a prediction, where God is the speaker, indicate the divine will that such results should follow, Lev. 26: 43, Ps. 81: 16, Isa. 27: 6, 50: 2, Jer. 13: 10, Hos. 14: 6. Advice or exhortation Judg. 15: 2, 1 Kin. 1: 2, 22: 13, 2 Chron. 18: 12, 19: 7.

Request or entreaty Gen. 26: 28, 44: 33, Judg. 6: 39, 2 Sam. 19: 38, 1 Kin 17: 21, 20: 32, 2 Kin. 2: 9, Neh. 1: 6, 11, Ps. 80: 18, 90: 17, 119: 76, Dan. 9: 16. Wish, Gen. 30: 24, 31: 49, Ex. 5: 21, Num. 23: 10, 1 Sam. 24: 16, 26: 19, 1 Kin. 8: 57, 1 Chron. 12: 17, 16: 31, 2 Chron. 24: 22, Job 6: 9, 9: 34, Ps. 13: 6, 14: 7, 27: 14, 31: 25, 96: 11, 97: 1, 104: 31, 119: 80. 172, Jer. 43: 5, 2nd pers. Dan. 9: 25; jussives introduced in predictions whether of good or evil indicate the concurrence of the speaker and his approval of the event foretold Gen. 9: 26, 27, 49: 17, Deut. 28: 8, 21, 36, 1 Sam. 2: 10, Job 15: 33, 18: 9, 12, 36: 14, 15, Ps. 9: 10, 11: 6, 25: 9, 69: 33, 72: 8, 15, 17, Prov. 1: 5, 15: 25, Isa. 35: 1, Mic. 3: 4, 5: 8, 7: 10, Zeph. 2: 13, Zech. 9: 5, 10: 7. Permission, Gen. 30: 34, 33: 9, Deut. 20: 5, 8, 32: 38, Judg. 6: 31, 7: 3, 16: 30, 2 Sam. 18: 22, 24: 17, 2 Kin. 2: 10, 1 Chron. 21: 17, 23, 2 Chron. 36: 23.

b. The poet blends his personal feeling with what he utters and also prefers briefer forms; for both these reasons the jussive is often employed in poetry, where prose would require the unabbreviated future. Thus *there is no umpire between us,* יָשֶׁת *who may lay his hand* as I wish he might Job 9: 33, *my eye* תָּכֵן *shall rest* or *must rest,* a volition determined by constraint 17: 2, *who is wise* וְיָבֵן *and can* consequently *understand* as I would have him do Hos. 14: 10, Jer. 9: 11, Lam. 3: 50; in some instances in which the desire of the speaker does not seem to enter, the jussive becomes a mere substitute for the simple future Job 13: 27, 24: 14, 25, 27: 8, 22, 33: 11, 34: 37, 39: 26. This use of the jussive is exceedingly rare in prose 1 Sam. 10: 5; though repeated instances of it are found in the book of Daniel 8: 12, 11: 4, 10, 16-19, 25, 28.

c. The negative אַל is prefixed to the jussive in deprecation or dissuasion; thus with the second person Gen. 45: 5, Ex. 10: 28, 23: 1, Deut. 2: 9, Josh. 7: 3, Judg. 19: 20, Ps. 22: 12, 27: 9, Prov. 7: 25, 24: 17, Isa. 41: 10, Jer. 40: 16 K'thibh; with the third person Gen. 31: 35, 37: 27, 45: 20, Ex. 8: 25, 16: 19, 32: 22, 1 Sam. 18: 17, 2 Sam. 13: 33, Job 15: 31, Isa. 36: 15, Hos. 4: 4. לֹא is rarely found with the jussive Gen. 24: 8, 1 Kin. 2: 6; and אַל but rarely with the simple future Gen. 19: 17, Josh. 1: 7, Job 3: 9, Ps. 141: 5, Jer. 46: 6, except in those species and forms in which the jussive is not distinguished from the simple future and accordingly may be considered as embraced in it or identical with it, § 97. 2. *b,* אַל־תִּשְׁלַח Gen. 22: 12, אַל־יֵאָל Ex 16: 29. The future with לֹא and the jussive with אַל are sometimes used in successive clauses, friendly dissuasion or remonstrance being added to legal prohibition, Ex. 23: 1, 34: 3, Lev. 10: 6, 11: 43, Judg. 13: 14; comp. Prov. 27: 2. In the vivid language of poetry prediction may assume the form of exhortation, and אַל with the jussive may stand, where the thought might have been prosaically expressed by לֹא with the simple future, אַל־יֵחְפְּרוּ *let not* their faces blush (i. e. they shall have no occasion to do so) Ps. 34: 6; אַל־תִּירָא *fear not* (thou needst not fear) Prov. 3: 25; אַל־תִּשָּׂא *forgive them not* (thou wilt not forgive them) Isa. 2: 9; Job 20: 17, 40: 32, Ps. 41: 3, 50: 3.

§ 273. The imperative may denote a command, דַּבֵּר

speak unto the children of Israel Lev. 1: 2, בֹּאָה *fill the men's sacks* Gen. 44: 1; exhortation or advice שְׁכָחִי *forget thy people* Ps. 45: 10, שְׁבִי *dwell in the land*, וְעִבְדוּ *and serve the king of Babylon* 2 Kin. 25: 24; a wish or entreaty תְּנִי *give me a possession of a burying-place* Gen. 23: 4, הַטֵּה *incline thine ear to me* הַצִּילֵנִי *deliver me* Ps. 31: 3; permission, *where it is good in thine eyes* שֵׁב *dwell* Gen. 20: 15, שְׁתֵה *drink, my lord* Gen. 24: 18; or assurance, where a person is directed to do what it is thereby intimated that he will certainly do, הַשְׁמֵן *make fat the heart of this people* i. e. this would be the inevitable result of the prophet's ministry among them Isa. 6: 10, רְדִי וְשְׁבִי *come down and sit in the dust, O virgin daughter of Babylon* i. e. she shall assuredly do so Isa. 47: 1, Mic. 1: 11-16. Increased urgency of desire is expressed by the paragogic form of the imperative, § 98. 1, in which the vowel ָה is appended to the 2 masc. sing. שְׁבָה וְאֶכְלָה *pray, sit,* or *do sit and eat* Gen. 27: 19, שָׁמְרָה *O keep my soul* Ps. 25: 20, *O Lord* שְׁמָעָה *do hear, O Lord* סְלָחָה *do forgive, O Lord* הַקְשִׁיבָה *do hearken* Dan. 9: 19. The imperative is never used with negatives, as a command implies some positive action to be performed. A substitute for the negative imperative is found in the jussive with the negative particle אַל prefixed, אַל־תַּחְתֵּר *hide*....אַל־תִּמְחֹת *blot out*...בְּרָא....אַל־תַּשְׁלִיכֵנִי *create*....חַדֵּשׁ *renew*....אַל־תִּקַּח *cast me not away*...אַל־תִּקַּח *take not* Ps. 51: 11-13.

a. The imperative expressing a wish is once preceded by לְ Gen. 23: 13 and once by אִם Job 34: 16, unless בִּינָה notwithstanding the accent is to be considered a noun. Examples of the permissive imperative 2 Sam. 18: 23, Jer. 26: 14, 49: 11; with an ironical sense 1 Kin. 2: 22, Judg. 9: 19, Job 40: 10, Isa. 47: 12, Joel 4: 11. The imperative conveying assurance 2 Kin. 18: 32, Ps. 110: 2, Isa. 10: 30, 13: 6, 23: 1, 4, 37: 30, 60: 1, 65: 18.

b. A few verbs, whose meaning naturally leads to urgent expression invariably adopt the paragogic form in the masc. sing. of the imperative e. g. חִישָׁה *make haste*, עִילָה, חָלְרָה *awake*, רוּמָה *lift thyself*, הִשָּׁבְעָה *swear*, הַגִּישָׁה *bring near*, הַקְשִׁיבָה *attend*, only once הַקְשֵׁב Job 33: 31 in a quieter

tone, asking not so much for instant as patient attention; some other verbs, which occur less frequently, adopt when they do occur the paragogic form הַאֲזִינָה *hearken*, חוּסָה *spare*, חַבָּלָה, חַבָּלָה, כַּבָּלָה *deliver*, עוּרָה *rouse*; הָבָה, לְכָה when used as particles of incitement *come!* invariably have the paragogic ה; הַב, לֵךְ always have their proper verbal force, which may however be expressed by the prolonged form likewise.

c. The difference of tone and feeling between the paragogic and the simple imperative may be illustrated by the following examples: Isaac requesting his son Esau says הָבִיאָה Gen. 27: 7, but Joseph giving direction to his steward הָבֵא Gen.: 43: 16; God said to Moses under the provocation of Israel's great offence הַנִּיחָה *let me alone, that my anger may burn against them* Ex. 32: 10, but Moses to Aaron, הַנַּח *lay up the pot of manna before Jehovah* Ex. 16: 33; the trees said to the olive מָלְכָה *do thou reign over us* Judg. 9: 8, but with less urgency to the bramble מְלֹךְ *reign thou* ver. 14; Joel persuasively to Sisera הַטֵּהּ *do turn aside* Judg. 4: 18, Abner to Asahel סוּר *turn thee aside from following me* 2 Sam. 2: 22; the people earnestly to Samuel שִׂימָה *set a king over us* 1 Sam. 8: 5, Samuel courteously to the cook תֵּנָּה *give, I lease, the portion which I bid you* שִׂים *set aside* (authoritative direction) 1 Sam. 9: 23; Samuel courteously to Jesse שְׁלָחָה *send, please, and fetch David* 1 Sam. 16: 11, Saul authoritatively to Jonathan שְׁלַח 1 Sam. 20: 31; a messenger to Saul reporting an invasion מַהֲרָה וְלֵכָה *make haste and go* 1 Sam. 23: 27, direction to a stranger inquiring his way בֹּאוּ 1 Sam. 9: 12; the captain of fifty to Elijah peremptorily רְדָה *come down!* 2 Kin. 1: 9, 11, the angel calmly רֵד *go down* ver. 15; Abner to David כָּרְתָה *make a covenant*, which he desired 2 Sam. 3: 12, but the men of Jabesh to Nahash כְּרָת *make a covenant* distasteful to them 1 Sam. 11: 1; the people in distress appeal to God קוּמָה *arise* and save us Ps. 44: 26, Jehovah directs Jeremiah קוּם *arise* and take thy girdle to the Euphrates Jer. 13: 4; Elihu summons Job to immediate action הִתְיַצְּבָה *stand up, if thou canst answer me* Job 33: 5, Balaam directs Balak הִתְיַצַּב *stand* patiently and quietly *by thy burnt-offering* Num. 23: 3, 15; Nehemiah in urgent petition הַצְלִיחָה *prosper thy servant* Neh. 1: 11, Micaiah ironically to Ahab, *go up* וְהַצְלַח *and prosper* 1 Kin. 22: 15.

d. As the simple future may express a command, לֹא with the future is used in like cases to denote prohibition; so generally in the law Ex 20: 3 ff., and elsewhere לֹא תְקַלֵּל *thou shalt not curse him* Num. 23: 25, לֹא תַעֲלֶה *thou shalt not go up* 2 Sam. 5: 23; but the proper negative imperative is formed as above stated by אַל with the jussive שְׁמַע 2 Kin. 18: 28 but אַל־תִּשְׁמַע *do not hear* ver. 31, Gen. 47: 29, Ps. 4: 5, Prov. 1: 15, 4: 5, 13, 27, Job 10: 2.

§ 274. To express a still greater urgency of desire the precative particle נָא is employed in connection with the various modal forms or with the simple future especially though not exclusively in those species or inflections which have no separate forms for the intentional

or the jussive § 97. 2. *b*; נָא follows the verb, except in negative clauses when it is prefixed with אַל, אָשִׁירָה נָּא *I would like to sing, please* Isa. 5: 1, so ver. 5; *let this child's soul* תָּשֻׁב־נָא *return, I pray thee* 1 Kin. 17: 21, אַל־נָא יִחַר *pray let not my lord be angry* Gen. 18: 30, הַבֶּט־נָא *look, I pray thee* Isa. 64: 8. Or a still higher intensity of feeling may be denoted by the additional particle אָנָּא or אָנָּה prefixed to the verb or to the person addressed אָנָּא חַטָּאתִי נָּא *ah! forgive, I pray thee* Gen. 50: 17, אָנָּה יְהוָה זְכָר־נָא *ah! Jehovah, remember, I pray thee* 2 Kin. 20: 3.

a. נָא is used both with the paragogic Gen. 27: 26, 1 Sam. 25: 8, 2 Kin. 8: 4 and with the simple imperative Josh. 7: 19, 1 Kin. 22: 5, Job 1: 11. In Num. 12: 13 נָא both precedes and follows the imperative. נָא with the simple future, וַאֲזוּרֵי נָא Gen. 18: 4. אַל־נָא נִגַּף 2 Sam. 13: 25, תְּהִי־נָא 2 Sam. 14: 17, הִגִּיד נָא Jer. 38: 4, וְתֶחֱזֶינָּה Cant. 7: 9, Gen. 44: 18, Judg. 6: 39, 2 Kin. 5: 17, Ps. 7: 10.

b. Examples of the use of אָנָּא or אָנָּה Isa. 38: 3, Jon. 1: 14, 4: 2, Ps. 118: 25, Neh. 1: 5. In Ps. 116: 4 it occurs without נָא, but with the paragogic form of the imperative. In Ps. 116: 16, Dan. 9: 4 it stands before a vocative with no verb following; in Ex. 32: 31 there is an ellipsis both of the petition and of the person addressed.

The Primary Tenses with Vav Conjunctive.

§ 275. 1. When the same relation of time is expressed in successive clauses, this may be either in the way of coordination by repeating the same primary tense, whether preterite or future, and connecting the clauses somewhat loosely by Vav Conjunctive, the simple copulative *and*; or in the way of subordination by means of the secondary tenses, § 99. 1, which are attached to the preceding by the closer connection of Vav Consecutive, which is equivalent to *and so* or *and then*, and indicates a dependence upon or a sequence from the statement previously made. As Vav Consecutive must always be joined immediately to the following verb, the subordination resulting from the use of the secondary

tenses can only occur when the verb is the first word in its clause. When for any reason this is not the case, Vav Conjunctive only can be employed, and a coordination rendered necessary by the collocation of words may have no special significance. When, however, the verb immediately follows the conjunction, either construction is possible; and then the employment of Vav Conjunctive and the primary tense in preference to the other and closer combination allows each statement to stand as it were by itself, as a distinct and separate item, whereas the use of Vav Consecutive and the secondary tense indicates a more intimate relationship and links all that are thus joined together into one gradually developing series. Accordingly preterites may be coordinated, הֵסִיר *he removed*... וְשִׁבַּר *and he brake*...וְכָרַת *and he cut down*... וְכָתַת *and he crushed* 2 Kin. 18: 4; so futures and voluntatives, אֶנָּחֲמָה *I shall comfort myself*.... וְאֶתְנַקְּמָה *and will avenge myself*....וְאָשִׁיבָה *and will bring back*....וְאֶבְרֹם *and shall purge*....וְאָסִירָה *and will take away*....וְאָשִׁיבָה *and will restore*, Isa. 1: 24-26; (the individualizing effect of this construction is represented in the translation by repeating the pronoun before each preterite and the auxiliary before each future). So too imperatives, פְּרוּ *be fruitful*, וּרְבוּ *and multiply*, וּמִלְאוּ *and fill*....וְכִבְשֻׁהָ *and subdue it*, וּרְדוּ *and rule*, Gen. 1: 28.

a. This use of the preterite with Vav Conjunctive is comparatively rare, particularly in the earlier books of the Bible. It is employed to give distinctness to (1) separate particulars in the same transaction, Gen. 21: 25, 28: 6, Ex. 36: 38, 38: 28, Deut. 33: 2, 1 Sam. 17: 34, 35, 1 Kin. 6: 32, 35, 2 Kin. 14: 7, 2 Chron. 29: 19, Jer. 37: 15, Ezek. 9: 7; (2) an emphatic accumulation of identical or equivalent expressions, Judg. 6: 3, 1 Sam. 12: 2, Isa. 1: 2, 9: 7, 41: 4, 44: 8, Jer. 10: 25, Ezek. 37: 11, Dan. 9: 5, Esth. 9: 27, Eccles. 1: 16 or an enumeration of various acts of like character 2 Sam. 7: 9—11, 2 Kin. 21: 6, Ps. 37: 14, Isa. 43: 12, Jer. 19: 4, 5; (3) a clause or paragraph introduced by the formula וַיְהִי *and it came to pass*, 1 Sam. 25: 20, 2 Sam. 6: 16, Jer. 3: 9, 37: 11. (4) This loose coordination is especially found, where reference is had not to a definite and specific act but

more indefinitely to that which may take place at any time, וַיְהִי *and it came to pass, if* (i. e. whenever) *the serpents bit a man,* וְהִבִּיט *and he looked* ... וָחָי *then he lived,* Num. 21: 9, Gen. 30: 41, Ex. 17: 11, Judg. 12: 5, 19: 30, Ruth 4: 7, 1 Sam. 13: 22, 26: 9, Ps. 27: 2, 34: 11, 78: 34, Isa. 40: 12, Mic. 5: 7; or which has occurred repeatedly at various times, *they gathered it morning by morning* וַיִּזְרַח *and the sun grew hot* וְנָמַס *and it melted,* Ex. 16: 21, וַתִּזְרַח Ex. 40: 31 (see the frequentative future וַתַּזְרַחְנָה ver. 32), Num. 11: 8, וַתִּקְבֹּץ *continued to blow* Josh. 6: 8, Judg. 2: 18, וַיַּעֲלֶה *used to go up* ... וְנָתַן *used to give* 1 Sam. 1: 3, 4, 7: 16, 16: 23, 2 Sam. 12: 16, 15: 2, 1 Kin. 4: 7, 18: 10, 2 Kin. 6: 10, 12: 10, 12, Job 1: 4, 5, Isa. 5: 14, וַיִּקְרָא *kept calling* ... וַיֹּאמֶר 6: 3, 8: 11, Ezek. 37: 2, 7, 8, 10. Dr. Driver (Hebrew Tenses, 2d Ed. p. 172) explains in like manner the numerous preterites with Vav Conjunctive employed in tracing the limits of the tribes Josh. 15: 3-11 and elsewhere, as "descriptive of the course which the boundary *used to take*". In a few instances occurring especially in the later books of the Bible the loose construction appears to be used indiscriminately along with the more usual and stricter construction with Vav Consecutive, 2 Kin. 23: 4, 5, 8, 10, 12, 14, 15, Jer. 18: 4.

b. Futures united by Vav Conjunctive may give distinctness to the recital of separate particulars, וְאֶשְׁלְחֵם *and I will send them* וְיִלְּבְשׁוּ *and they shall arise* וְיִתְהַלְּכוּ *and shall go* ... וְיִכְתֹּב *and shall describe* ... וְיָבֹא *and shall come to me,* the issue which is the proper sequel to all these preliminaries being then expressed by Vav Consecutive with the preterite וְחִלַּקְתָּ *and divide it* Josh. 18: 4; יֶחֱתֹם וְיַסְגֵּר וְיַחֲלֹד *he shall intervene and shall imprison and shall bring to trial* Job 11: 10, 13: 26, 27, 38: 14, 15, Ps. 5: 12, 22: 28, 69: 36 (the issue added by Vav Consec. pret.), 107: 20-22, Eccles. 12: 6, Isa. 41: 20, 42: 6, 21, 44: 7, 17, 2 Chron. 7: 14; or to the emphatic combination of substantially equivalent expressions, *why wilt thou say* וְתֹאמַר *and wilt thou speak* Isa. 40: 27, 41: 11, Ps. 37: 29. A like effect may be produced by a series of futures without Vav Ps. 72: 2-7, Isa. 14: 13, 14, 16, 42: 14, 44: 11. The modified forms of the future may be similarly united by Vav Conjunctive; thus the intentional 2 Sam. 3: 21, 17: 1-3 (issue added by Vav Consec. pret.), 2 Kin. 7: 13, Job 16: 4, Ps. 2: 3, 50: 21, 77: 4, 145: 2; Cant. 1: 4; the jussive, 1 Sam. 2: 10, Ps. 81: 16, Prov. 15: 25.

c. Imperatives may be continued by imperatives with Vav Conjunctive in order to give greater distinctness to each separate particular, שׂוּרִי וְרִאִי .. וּדְעִי וּבַקְשִׁי *run .. and see .. and know and seek* Jer. 5: 1, Gen. 24: 51, 27: 13, 19, 26, Deut. 32: 49, 50, Josh. 18: 8, 1 Sam. 20: 31, 23: 22, 23, 2 Sam. 13: 7, 17: 16, Ps. 25: 5, 16, 18, 28: 9, 34: 15, Prov. 9: 5, Jer. 15: 15, Ezek. 9: 5, 7; or to add emphasis to equivalent expressions, Dent. 4: 9, 31: 6, Josh. 1: 7, 24: 14, 2 Kin. 5: 7, Ps. 37: 3, 8, 45: 11, Isa. 1: 2, Ezek. 17: 2, Am. 5: 15. For greater brevity and force Vav is sometimes omitted, Judg. 9: 15, 2 Sam. 13: 15, 2 Kin. 9: 25, Neh. 9: 5, Isa. 21: 12, Jer. 49: 8, 51: 27, 28.

2. When successive clauses are thus coordinated, a relation of subordination or dependence may neverthe-

less be established by the connection of the thought. Thus a second clause frequently states the result of the first, *Israel loved Joseph* וְיַעֲשֶׂה *and* consequently *he made for him a coat* Gen. 37: 3; or if its verb be a voluntative (either a paragogic or apocopated future), it will indicate the design, *let the counsel of the Holy one of Israel come* וְנֵדְעָה, *that we may know it* Isa. 5: 19, (lit. *and let us know*), וְ is here parallel to לְמַעַן *in order that* in the previous clause.

a. The preterite with Vav Conjunctive denotes the result of a preceding action in 1 Sam. 27: 12, 1 Kin. 9: 25, 2 Kin. 18: 7, 2 Chron. 7: 12, 25: 19, Ps. 22: 6, 28: 7, 34: 5, 6, 80: 13, Prov. 22: 3, Isa. 6: 7, 49: 6, Jer. 40: 3; and sometimes a result different from that which might have been expected, *thou didst these things* וַתֶּחֱרַשְׁתִּי *and* yet *I was silent* Ps. 50: 21. The same relation may be suggested by simple juxtaposition without a conjunction, Ps. 57: 7, Hab. 3: 2; or כֵּן *so* may be inserted to intimate that the effect is instantaneous רָאוּ כֵן תָּמָהוּ *as soon as they saw, they wondered* Ps. 48: 6, or invariably repeated קָרְאוּ לָהֶם כֵּן הָלְכוּ *as often as they called them, they went from them* Hos. 11: 2.

b. The future with Vav Conjunctive may likewise indicate the result of a preceding action, *they shall hear* וְיִרְאוּ *and shall fear* in consequence Deut. 17: 13, 19: 20, 2 Kin. 7: 12, Neh. 6: 13 (the further consequences involved being expressed by preterites with Vav Consecutive), Ps. 2: 12, 58: 12, 104: 32, Isa. 41: 15, 58: 9, Jer. 6: 10, 20: 10, Zech. 9: 5. So after an imperative, *delight thyself in Jehovah* וְיִתֶּן־לְךָ *and he will give thee* etc. Ps. 37: 4, Prov. 3: 9, 10, 4: 6, 8, 10, 16: 3, Isa. 8: 10. The result may be suspended on a condition not fulfilled, *God is not man* וְיְכַזֵּב *that he should lie* Num. 23: 19; *Thou desirest not sacrifice* וְאֶתְּנָה *else I would give it* Ps. 51: 18; *It is not an enemy that reproached me* וְאֶשָּׂא *else I would bear it* Ps. 55: 13.

c. The voluntative forms of the future with Vav Conjunctive commonly express the design; thus the intentional, *I shall go up* וַאֲגִידָה *to tell* or *that I may tell Pharaoh* (lit. *and I will tell*) Gen. 46: 31, 18: 30, Judg. 6: 39; and the jussive *let me escape thither* וּתְחִי *that my soul may live* (lit. *and let my soul live*) Gen. 19: 20, 24: 51, Ex. 7: 9 (without Vav), 9: 22, 1 Sam. 18: 21, 2 Chron. 18: 19, Ps. 85: 14, Isa. 63: 3, Ezek. 14: 7. So very frequently after an imperative: the intentional, *give me* etc. וְאֶקְבְּרָה *that I may bury* Gen. 23: 4, 27: 4, Judg. 11: 37, 1 Sam. 28: 7, 2 Kin. 4: 22, Ps. 41: 11, 90: 14, Isa. 41: 22; the jussive, *entreat Jehovah* וְיָסֵר *to remove* or *that he may remove* Ex. 8: 4, Num. 17: 2, 25, 21: 7, 25: 4, Judg. 14: 15, 1 Sam. 5: 11, 29: 4, 1 Kin. 13: 6, 21: 2, 10, 2 Chron. 30: 6, 8, Isa. 30: 8. Those forms of the future which are not liable to be apocopated, may yet be used in a jussive sense, § 97. 2. *b*, and hence may also upon occasion be employed

with Vav Conjunctive to indicate the design, *hearken to the voice of Jehovah* וְיִיטַב *that it may be well with thee* (that this is intended as a jussive in fact though not in form, appears from the jussive in the next clause) וּתְחִי *and that thy soul may live*, Jer. 38: 20, Ex. 5: 1, 8: 16, 14: 2, Num. 19: 2, 2 Kin. 2: 16, 5: 8, Job 32: 20. So even unabbreviated forms of the future, which might have been apocopated, inasmuch as the simple future may have an optative signification, § 267. 1, *shall I call thee a nurse* וְתֵנִק *that she may nurse* Ex. 2: 7; particularly in a negative clause, as לֹא is the only negative that can be used in this construction and it requires the simple future, § 272. *e*, *send away the ark* וְיָשֹׁב *that it may return*, וְלֹא־ יָמֻת *and that it may not slay* 1 Sam. 5: 11; so forms with suffixes, which are precluded from taking the paragogic termination *put thy hand* etc. וְאַשְׁבִּיעֶךָּ *that I may make thee swear* Gen. 24: 3, 1 Kin. 18: 44. If there be a reference to past time or contingency be implied, the English idiom requires the imperfect instead of the present subjunctive, *he used to consecrate whoever would* וַיְהִי *that they might be priests* 1 Kin. 13: 33, *O that my head were waters* וְאֶבְכֶּה *that I might weep* Jer. 8: 23, 9: 1, Job 6: 9, Ps. 49: 10. This subjunctive use of the future with Vav Conjunctive to indicate design may further occur after an infinitive 1 Sam. 7: 8, 2 Chron. 29: 10, or after a preterite, 2 Kin. 19: 25, Isa. 37: 26, Jer. 23: 18, Job 16: 21. When the event is certain or the obligation imperative the thought cannot be fully expressed in English by a dependent construction, and we are oblized to surrender the statement of the design which still lies in the Hebrew for the sake of making a positive and unconditioned affirmation. Thus, *bathe in the Jordan* וְיָשֹׁב not merely *that thy flesh may return*, which would leave the issue in doubt, but *and thy flesh shall return* 2 Kin. 5: 10; the full sense of the Hebrew is that the bathing is to be performed with this design and the design shall be accomplished. *Plead with your mother* רִיבוּ not merely *that she should put away*, as though the pleading might prove ineffectual, but *and let her put away* Hos. 2: 4. So Lev. 9: 6, Deut. 32: 1, 7, 1 Sam. 7: 3, 1 Kin. 18: 1, 2 Kin. 6: 19, Job 12: 7, Ps. 26: 6, 50: 7, 66: 16, 119: 146, Prov. 9: 9, Isa. 55: 3, Hos. 14: 3, Mal. 3: 7.

d. An imperative joined to a preceding imperative by Vav Conjunctive may denote the assured result of that action, *do this* וְחִי *and live* i. e. then you shall live Gen. 42: 18, Ex. 14: 13, 2 Kin. 5: 13, 2 Chron. 20: 20, Job 22: 21, Ps. 34: 9, Prov. 4: 4, 9: 6, 20: 13 (without Vav), Isa. 8: 9, 37: 30, 45: 22, Am. 5: 6. Less frequently after a future, *Jehovah grant you* וּמְצֶאנָה *that ye may find* (lit. *and find ye*) Ruth 1: 9, Gen. 12: 2, 20: 7, 2 Sam. 21: 3, 2 Kin. 5: 10.

The Secondary Tenses.

§ 276. When successive acts are not viewed separately but as closely linked each to its immediate predecessor from first to last, this relation is indicated by means of

Vav Consecutive and the secondary tenses. The entire series is regarded as unfolding from its initial act, which is accordingly expressed in its appropriate primary tense; the succeeding members of the series are then viewed not from the point of time occupied by the speaker but from that of this initial act, from which all the others proceed step by step in regular order. Thus in narrating that which has already taken place, the first verb is put in the preterite or perfect, thereby assigning the whole to the domain of the past. Then as viewed from this starting point all that follows lies in the future. The second verb, representing the direct sequence of the first is accordingly expressed in the future or imperfect with Vav Consecutive, § 99. 1, which thus forms a secondary or continuative preterite; this establishes a new standpoint, from which the next act is surveyed and so on to the end. It is essential to this construction that each verb should stand at the beginning of its clause and in immediate connexion with Vav Consecutive; if any word or particle is interposed between Vav and the verb, the latter must revert to the primary tense. Thus, Gen. 39: 1, *Joseph* הוּרַד *was brought down* ... וַיִּקְנֵהוּ *and Potiphar bought him* (lit. according to the original sense of this tense form *and then he buys* or *will buy him*) ... וַיְהִי *and Jehovah was* .. וַיְהִי *and he was* .... וַיַּרְא *and his master saw* ... וַיִּמְצָא *and Joseph found* ... וַיְשָׁרֵת *and served* .... וַיַּפְקִדֵהוּ *and he made him overseer* .... וְכָל־יֶשׁ־לוֹ נָתַן *and all that he had he gave* (pret.) *into his hand.*

a. The Vav Consecutive future or imperfect is the ordinary historical tense, and is used in narratives almost to the exclusion of the preterite or perfect, which is only occasionally introduced, when the collocation of words requires it. Being thus a substitute for the preterite it has the same range of signification that is inherent in the primary tense. Thus following a preterite, it will ordinarily conform to the sense of that preterite, whether as a definite act in the absolute past, *David returned* .. וַיֵּשֶׁב *and dwelt* 2 Sam. 1: 1; or repeated acts at various times, *whithersoever they went*

out .. וַיִּצְעֲקוּ *they were distressed* .. וַיָּקֶם *and Jehovah raised up judges* Judg. 2: 15, 16; a perfect, *I have hearkened* שָׁמַעְתִּי *and heard* Jer. 8: 6; pluperfect, *had gone down* וַיִּשְׁכַּב וַיִּרְדָּמוּ *and lain and slept soundly*, Jon. 1: 5; 1 Sam. 25: 34, Job 9: 16; future perfect, *he shall not have taken warning* ... וְלֹא־יִקָּח *and the sword shall have come and taken him away* Ezek. 33: 4; optative, *O that we had been content* וַיֵּשֶׁב *and dwelt* Josh. 7: 7; subjunctive, *lest the spirit may have taken him up* וְתִשָּׂאֵהוּ *and cast him* 2 Kin. 2: 16; a general statement that may be verified at any time, *thou chastisest man* וַתָּמֵס *and dissolvest* Ps. 39: 12, Prov. 21: 22, 22: 12; prophetic preterite, Isa. 5: 14-16 (alternating with the fut. in ver. 15 and changing to the fut. ver. 17), 9: 5 (see fut. ver. 6), Joel 2: 23, Mic. 2: 13, Ps. 22: 30 (fut. in second clause). It may even have this prophetic sense when attached to a preterite referring to the past; thus the prediction in Isa. 2: 9 is linked to the historical statements in vs. 6-8 as though it were already accomplished; in 9: 7-13 the series passes imperceptibly from the historical to the prophetic, the latter in its assured certainty being classed with the former. Or a Vav consec. fut. thus connected may reach from the past into the present, *Thou didst establish the earth* וַתִּכֹנֵן *and it* stood then and still *stands* Ps. 119: 90, or into the future, *Jehovah sat enthroned at the flood* וַיֵּשֶׁב *and he* has sat and *sits king for ever* Ps. 29: 10.

b. In like manner the Vav Consecutive future or imperfect may carry forward a narrative of the past, whatever be the verbal form with which it began, or in whatever way the initial reference to the past may have been made. Thus it may be attached to a future or imperfect, when it is used in the vivid description of what has already taken place אָז יָשִׁיר *then sang* (lit. *sings*) *Moses* .... וַיֹּאמְרוּ *and they said* Ex. 15: 1, Gen. 37: 7, 1 Kin. 20: 33 (§ 267. 1. *b*), 2 Kin. 16: 5, Job 31: 27, Ps. 18: 19, 24, 52: 9, 78: 15, 26, 45, 95: 10, 106: 17, 19, or as a frequentative past תַּכְעִסֶנָּה וַתִּבְכֶּה *she used to provoke her so that she wept* 1 Sam. 1: 7, Judg. 12: 5, אֲדַבֵּר *I have repeatedly spoken* .. וַיֹּאמֶר לוֹ *and said to him* 1 Kin. 21: 6, Ps. 78: 40, 41, which may continue into the present 1 Sam. 2: 29, Ps. 3: 5. Or it may be attached to an infinitive referring to the past, בְּשָׁלְחָם *when Jehovah sent* ... וַתַּמְרוּ *ye rebelled* Deut. 9: 23; or to a participle *the Philistines* נִלְחָמִים *were fighting* ... וַיָּנֻסוּ *and Israel fled* 1 Sam. 31: 1; or to a noun clause *Shem* (was) *one hundred years old* וַיּוֹלֶד *and he begat* Gen. 11: 10; or a statement of time *on the third day* וַיִּשָּׂא *then Abraham lifted* Gen. 22: 4.

c. As the Vav Consecutive future indicates a sequence, its time is regulated by that which precedes and upon which it is dependent. Accordingly if it be attached to what is present, it must itself be rendered as a present. Thus when linked to a future or imperfect with a present signification, *now* תָּבוֹא *it comes to thee* וַתִּלְאֶה *and thou faintest* Job 4: 5, Ps. 50: 6 (connecting with ver. 4), 64: 8, 77: 7, or denoting what is true at all times, for which we likewise use the present, יִתְפַּלֵּל *he prayeth to God* וַיֵּרָצֵהוּ *and he accepteth him* Job 33: 26, 34: 24, 39: 15, Ps. 49: 15, 107: 28-30; or to a participle בֹּכֶה וַיִּתְאַבֵּל *the king is weeping and mourning* 2 Sam. 19: 2, מוֹרִיד *He brings down* ... וַיָּגֶל *and brings up* 1 Sam. 2: 6, Job 12: 22-24, 14: 20, Ps. 18: 33, 34: 8, 104: 32, Prov. 20: 26; or to an infinitive בְּשׁוּב

when a wicked man returns ... וַיַּעַשׂ *and does* Ezek. 18: 27; or any phrase or expression that is suggestive of present time, *who* (art) *thou* אַתָּה־יָרֵאתָ *that thou art afraid* Isa. 51: 12, Gen. 49: 14, 15, *a land of gloom* ... וְהַטֶּבֶל *and when it shines it is like darkness* Job 10: 22, 7: 18, Ps. 8: 5, 6, 144: 3. This departure from the ordinary historical use of this tense is chiefly to be found in poetry. So is also a still rarer construction in which it is linked to a future having a future signification, וְעָתַק *he shall deride every stronghold* וְצִבַּר *and shall heap up earth* וְלָכָדָהּ *and take it* Hab. 1: 10, Job 24: 20, Ps. 55: 18; Deut. 17: 2, 3 occurring in simple prose must be differently explained; *if* וְנִמְצָא *there shall be found a man who* וְעָשָׂה *shall do that which is evil*, the doing is not future to the finding but antedates it and might with equal propriety have been expressed by the pret. עָשָׂה in the sense of the future perfect, *shall have done*, § 267. 1. *c*. The act being thus conceived of as already performed at the time supposed is further described by the secondary preterites וַיֵּלֶךְ וַיַּעֲבֹד *and has gone and served other gods*; while to the sequel to the finding is expressed in ver. 4 by the secondary future וְהֻגַּד *and it shall be told thee*. In Hab. 2: 1, 2 a pause intervenes, in which a preterite is to be supplied, *I will watch to see what he will speak* .... וָאָשִׁיבָ *and* (after I had thus watched) *Jehovah answered me*.

d. The sequence indicated by Vav Consecutive is not always that of time, but may simply represent the order of thought in the mind of the writer or speaker; thus the second verb may be explanatory of the preceding *God tempted Abraham* וַיֹּאמֶר *and said* i. e. tempted him by saying etc. Gen. 22: 1, *they did so* וַיַּשְׁלִכוּ that is to say *they cast* (lit. and they cast) Ex. 7: 11, 12, Josh. 7: 20, 21; or synonymous with it *they were fruitful* וַיִּשְׁרְצוּ וַיִּרְבּוּ וַיַּעַצְמוּ *and increased and multiplied and grew strong* Ex. 1: 7, 1 Sam. 15: 17, 2 Sam. 14: 5, Job 14: 10, Ps. 16: 9. 18: 8; or an identical repetition whether for emphasis וַיָּבֹא Gen. 2: 2, וַיָּשֶׁב Ezek. 18: 28, by way of resumption וַיֵּלֶךְ Josh. 18: 8, 9, וַיָּשָׁב Judg. 17: 3, 4. וַיָּבֹא 1 Sam. 4: 12, 13, וַיָּבֹא 6: 19, וַאֲשַׁחֲלָה Ezr. 8: 25, 26, וַיֵּלֶךְ 10: 6, or for the sake of adding further particulars וַיַּלְבִּשׁוּם 2 Chron. 28: 15; or a contrasted thought *there is a snare for the wicked* וַיֵּצֵא *but the righteous comes out* Prov. 12: 13, Job 3: 26; or the positive alternative answering to a preceding negative *they walked not in his ways* וַיָּסֻרוּ *but turned aside* 1 Sam. 8: 3, 13: 22, Ex. 33: 4, 6, Judg. 19: 10; or the summing up of an antecedent paragraph וַתֵּכֶל *thus were finished* Gen. 2: 1, וַיְהִי *so it was* 19: 29, וַיָּקֶם *so was confirmed* 23: 17, 20; or a particular in a preceding more general statement *these are the kings who reigned* ... וַיִּמְלֹךְ viz. *there reigned* Gen. 36: 31, 32, 2 Kin. 1: 12, 13 (*answered and spake, besought him and spake*), 18: 28, Job 10: 8, Jer. 39: 4; or the order of time may be disregarded, the succession of ideas being determined by some other principle of association Gen. 2: 7-9, 15, 6: 10, 11, 8: 1-3, 11: 32-12: 1, Ex. 32: 29 (prior to ver. 28), Josh. 2: 3, 4, 2: 22, 18: 8, 1 Sam. 17: 16, 17, 23: 1 (prior to 22: 20 ff., see 23: 6), Jon. 2: 4, Zech. 7: 2; or the proper sequence may lie in a remoter term, that which is first stated being preliminary and subordinate *the people believed* ... וַיִּשְׁתַּחֲווּ וַיִּקְּדוּ *and heard* ... *and bowed themselves* Ex. 4: 31, where of

course the hearing preceded the believing, and the meaning is inasmuch as they had heard they lowed; so Gen. 2: 19 *he formed ... and brought* is equivalent to *he brought ... which he had formed*; Deut. 31: 9.

e. Vav Consecutive future may indicate the result of a preceding action *Joshua commanded* וַיּוֹרִדוּם *and they took them down* Josh. 10: 27, וַתַּשְׁמֵּז 1 Sam. 19: 5, וַיְקַטֵּר *and each one burned incense* not expressive of design as though it were וִיקַטֵּר, § 275. 2. *c*, *that he might burn incense* 2 Kin. 23: 5, 2 Chron. 24: 8, Neh. 13: 19 (where design is expressed by following futures), Job 11: 3, Ps. 33: 9, 69: 11, 12, 78: 20, 97: 4, 109: 17, Prov. 11: 2, Isa. 2: 9, 40: 14, 51: 15, וַיָּמֹת *and he is dead* i. e. is as good as dead, certain to die Jer. 38: 9, Am. 9: 5, Nah. 1: 4, Hab. 3: 16: so also a result different from that which might have been expected וַתְּסִתֶּנִי *and yet thou incitedst me* Job 2: 3, 10: 8, 32: 3, Deut. 4: 33, Ps. 73: 14, or suspended upon a condition that was not fulfilled *thou didst not tell me* וְאֲשַׁלַּחֲךָ *or I would have sent thee away* Gen. 31: 27.

f. As the fundamental idea of the secondary tenses is that of sequence, and as the combination of Vav with the verbal form is an essential element of their formation, a return to the primary tense may be rendered necessary by either of two reasons, viz.: if the thought to be stated is not regarded by the writer or speaker as the sequel of that which precedes, or if the verb is not immediately attached to Vav. Thus at the beginning of a narrative Gen. 1: 1, Job 1: 1, or when a new subject is introduced Gen. 15: 1, 21: 1, 37: 2, 1 Sam. 2: 22, or a subject is resumed after a longer or shorter interruption Gen. 13: 14, 39: 1, 1 Sam. 5: 1, or an explanatory statement is made 1 Sam. 5: 7 (comp. without Vav Judg. 20: 5, 43, Ps. 78: 19), or a parenthesis inserted 1 Sam. 13: 21, 22, 2 Chron. 12: 10, or after a parenthesis 1 Sam. 1: 3, 4: 13, or when the action does not continue the preceding but belongs before it 1 Sam. 4: 18, 6: 15. So also when there is no Vav in the clause Hab. 3: 6, or when any word or particle comes between Vav and the verb Gen. 1: 2, 5, 10, 27, 26: 22, 27: 23. Vav Consecutive future occurs in a preterite sense at the beginning of certain books, because they were regarded by their authors as supplements or continuations of preceding histories, וַיְהִי *And it came to pass* Josh. 1: 1, Judg. 1: 1, 1 Sam. 1: 1 etc. etc.

g. In a very few instances only occurring in elevated poetry the apocopated future is used in the recital of what is past. These are sometimes explained on the assumption that Vav Consecutive has been omitted by poetic license, thus יַצֵּב Deut. 32: 8, תִּשֵּׁי ver. 18, יַרְטֵם 2 Sam. 22: 14 (where Ps. 18: 14 has וַיְרַטֵּם), לְבַל Job 33: 21, יָשֵׁת Ps. 18: 12 (where 2 Sam. 22: 12 has וַיָּשֶׁת), Ps. 68: 15, 78: 26, 90: 3, 107: 29, 33, Hos. 6: 1, or that the Vav is still operative though separated by an intervening word Job 23: 11, 12. But it may quite as readily be supposed that the apocopated is poetically used for the simple future, § 272. *b*, which is here employed in the vivid description of the past, § 267. 5, particularly when this is conceived of as contemporaneous with or continuous from that which had previously been spoken of, comp. a like use of the simple future Ps. 69: 13, 22, 78: 15, 29, 72, 81: 7, 8, 13, and of the paragogic future Ps. 73: 16, 17, Prov. 7: 7. In

Ezek. 16: 15 יְהִי may have its proper jussive force, as the language of the person referred to, *let it be his.*

h. It is difficult to explain satisfactorily the singular fact that the first person of the future with Vav Consecutive in many instances adopts the paragogic form, § 99. 2. It has with some plausibility been suggested that it may express the voluntary nature of the act, וָאֲשַׁלְּחָה *and I sent* of my own accord Gen. 32: 6, וָאֶשְׁתַּמְּרָה *and I kept myself* carefully and of set purpose 2 Sam. 22: 24, Judg. 6: 9, 10, וָאֶרְאֶינָּה *and I* carefully *inspected* Ezr. 8: 15, וָאֶמְרְטָה *and I plucked out* violently, with hearty good will 9: 3, Neh. 1: 4, 5: 7, 8, 13, 13: 7-13, 21, Ps. 7: 5, 119: 55, and even a quasi sort of unconscious spontaneity and self abandon may be suspected in such cases as וָאֵרְדָּמָה Ps. 3: 6, נַתַּחֲלֹמָה Gen. 41: 11, which Dr. Driver not inaptly proposes to render *I slept away, we dreamed away,* וָאֶאְנְשָׁה *I was heartily sick* Ps. 69: 21.

§ 277. In like manner when a succession of acts, either announced or enjoined in the future, is conceived of as closely related throughout, the first verb is put in the future (imperfect) or in the imperative, as the case may be, to fix the starting point as well as the modal aspect of the series; the verbs that follow, provided they stand each at the beginning of its own clause, are put in the preterite (perfect) with Vav Consecutive, the writer or speaker passing successively forward in thought to the time when they shall have been performed and viewing each as accomplished in its turn. But if any word or particle comes between Vav and the verb, the secondary tense must give place to the appropriate primary. Thus Lev. 4: 13-21 *If Israel* יִשְׁגּוּ *shall err,* וְנֶעְלַם *and it be hid* (strictly 'shall have been hid' at the time)... וְעָשׂוּ *and they do* .... וְאָשֵׁמוּ *and shall be guilty* ... וְנוֹדְעָה *and it shall become known* .... וְהִקְרִיבוּ *then they shall offer* .... וְהֵבִיאוּ *and shall bring* .... וְסָמְכוּ *and shall lay* .... וְשָׁחַט *and one shall slay* .... וְהֵבִיא *and the priest shall bring* .... וְטָבַל *and shall dip* .... וְהִזָּה *and shall sprinkle* .... וּמִן־הַדָּם יִתֵּן fut. *and shall put of the blood*; 1 Sam. 15: 3 לֵךְ *go thou* וְהִכִּיתָה *and smite* (strictly 'thou shalt have smitten' i. e. I require and expect this to be done) ...

וְהַחֲרַמְתֶּם *and devote ye* .... וְלֹא תַחְמֹל fut. *and thou shalt not spare* ... וְהִכִּיתָה pret. *but shalt slay* etc.

a. The secondary tenses have precisely the same variety of usage as their respective primaries and are substitutes for them in any sense in which they can be employed. Thus the preterite with Vav Consecutive may be conformed in its meaning to a preceding future used in a future sense *God* יִהְיֶה *will be with me* וְשָׁמַרְנִי *and keep me* etc. etc. Gen. 28: 20, 21, Lev. 7: 20, 21, 1 Sam. 1: 22, 9: 16, 2 Kin. 5: 11, Ps. 37: 5, 6, Isa. 2: 4, Jer. 18: 7-10, Ezek. 11: 8-10, 14: 13-15, 33: 2, 3, 36: 27-31 (with occasional futures in the series), Zech. 13: 1-6, Dan. 11: 29, 30; in a conditional sense, *every man* יָבֹא *should come to me* ... וְהִשְׁתַּחֲוֵיתִי *and I would do him justice* 2 Sam. 15: 4, Jer. 37: 10, Am. 9: 3; in a subjunctive sense after פֶּן *lest* Gen. 3: 22, 32: 12, Ex. 1: 10, or לְמַעַן *in order that* Gen. 12: 13, 18: 19, Deut. 4: 1, Neh. 6: 13; or in the sense of a command אַל־תִּרְחָקוּ *go not far away* ... וְהִתְיַצְּבוּ *and be ye all ready* Josh. 8: 4, Ex. 12: 5-8, Num. 19: 2-7, 16-19, Deut. 5: 13, 15, so when the future has the jussive form Gen. 1: 14, Deut. 28: 8, 1 Kin. 1: 2, the following preterite if in the 2d person becoming equivalent to an imperative 1 Chron. 22: 11, 2 Chron. 18: 12, or when the future has the cohortative form Judg. 19: 13, comp. ver. 11; or expressing desire יְהִי נָא *may thy word be* verified ... וּפָנִיתָ *and do thou turn* ... וְשָׁמַעְתָּ *and hearken* 1 Kin. 8: 26, 28, 30, permission תֹּאכְלֶנָּה וְאָכָלָה *thou mayest give it and he may eat it* Deut. 14: 20, or necessity יֵלְכוּ וְהָבְאוּ לָהֶם *they must go and get straw* Ex. 5: 7; or denoting a general fact irrespective of time יִשְׂבְּעוּ *they have enough* ... וְהִנִּיחוּ *and leave their abundance* Ps. 17: 14, Eccles. 3: 13, Jer. 3: 1, 18: 7-10, Am. 5: 19, Nah. 3: 12; or customary action in the past וַיַּעַל *vapour* יַעֲלֶה *used to ascend* ... וַיַּשְׁקְ *and watered* Gen. 2: 6, 6: 4, 29: 2, 3, Ex. 33: 8-11, Num. 9: 21, Deut. 11: 10, Judg. 2: 19, 1 Sam. 1: 6, 2: 15, 19, 20, 2 Sam. 17: 17, 2 Kin. 3: 25, or in the present Jer. 20: 9. In 1 Kin. 18: 23 the future is continued in one clause by futures and in the other by Vav Consec. pret. in precisely the same sense, except that in the former case greater stress is laid upon each separate item, § 275. 1.

b. Vav Consecutive Preterite may also be used after the preterite when this suggests what is future; thus when it has the sense of the future perfect אִם־זְכַרְתַּנִי *if thou remember me* (lit. shalt have remembered) ... וְעָשִׂיתָ נָּא *then pray shew kindness* Gen. 40: 14, 43: 9, Lev. 13: 56, 2 Sam. 15: 33, 20: 6, 2 Kin. 5: 20, 1 Chron. 17: 11, Job 11: 13, Isa. 16: 12, Ezek. 14: 9; or denotes the certainty of that which has not yet taken place, the so called prophetic preterite, נָפְלוּ *their judges have been thrown down* (i. e. shall surely be thrown down) ... וְשָׁמְעוּ *and they shall hear* Ps. 141: 6, Isa. 2: 11, 5: 17, Joel 2: 23-27; or expresses a purpose already formed to be carried into effect hereafter, so frequently נָתַתִּי, *I have set my bow in the cloud* (i. e. I intend to do so) וְהָיְתָה *and it shall be* Gen. 9: 13, 17: 5, 6, 16, Ex. 31: 6, Josh. 8: 1, 2, Ezek. 15: 6, 7, and other verbs which are similarly prospective Gen. 17: 20, Deut. 15: 6, 7, Isa. 43: 14, Zech. 8: 3; or belongs to the present, and its sequences in the future are added by Vav

Consecutive with the preterite עַתָּה הִרְחִיב *Jehovah has now made room for us* וּפָרִינוּ *and we shall be fruitful* Gen. 26: 22, Deut. 4: 5, 6, 39, 30: 19, Judg. 11: 8, *who is David* ... וְנִלְחַמְתִּי *that I should take*, or interrogatively *and shall I take* 1 Sam. 25: 11, 1 Kin. 2: 6 (וְעָשִׂיתָ connects with וְנִלְחַמְתִּי ver. 5), שָׁלַחְתִּי *I herewith send* ... וְאַסַּפְתּוֹ *and thou wilt recover him* or *that thou mayest recover him* 2 Kin. 5: 6, Ezek. 3: 17, Amos 6: 8, 9; or involves the idea of contingency which is closely allied to that of futurity כְּבָלַע שָׁלַב *might easily have lain* (lit. almost lay) ... וְהֵבֵאתָ *and thus thou mightest have brought* Gen. 26: 10. Sometimes futurity is only suggested by the circumstances or by the general context וְנִשְׁמַרְתֶּם *and ye shall take heed* (as determined by the hortatory aim of the whole passage, comp. הִשָּׁמֶר ver. 9) Deut. 4: 15, 29: 8, וְאֲמַרְתָּ Jer. 13: 12, 13, Ezek. 13: 13-15, 17: 19, 20, Zech. 1: 3, Mal. 2: 15, 16; so וְהָיָה Isa. 2: 2 links itself in a general way with antecedent prophecies; and it must often be determined by the drift of the connection rather than by the immediate consecution whether וְהָיָה means *and it will come to pass* Gen. 12: 12, Deut. 26: 1, or *and it came to pass* § 275. 1. *a.* (3).

c. Vav Consecutive of the preterite has the same pointing with Vav Conjunctive, but a distinction is made in certain forms, chiefly in the first and second persons singular by the shifting of the accent from the penult to the ultimate, § 100. When this is not the case it is only the connection that can decide. If it is linked to a future or to any expression referring to the future, it is Vav Consecutive; otherwise it is almost invariably Vav Conjunctive.

Participles.

§ 278. The participles being properly verbal nouns, do not in strictness involve any definite notion of time, and the connection must decide whether they are to be referred to the past, present, or future, thus נֹפֵל means *falling* Num. 24: 4, *fallen* Judg. 4: 22, or *about to fall* Jer. 37: 14. Their principal uses are the following, viz.:

1. They may express what is permanent or habitual, as general truths valid for all time, (Jehovah) אֹהֵב *loveth righteousness* Ps. 33: 5; *a generation* הֹלֵךְ *goeth*, and a generation בָּא *cometh* and the earth עֹמֶדֶת *abideth for ever* Eccles. 1: 4, 1 Sam. 2: 6-8, Job 5: 9-13, 20: 27, Ps. 22: 29, Prov. 8: 9, 21: 23; also a condition which is continuous or a course of action which is customary for a longer or shorter period, *he* מְזַבֵּחַ וּמַקְטִיר *sacrificed and*

burned incense habitually 1 Kin. 3: 3, 4: 20, Gen. 39: 23, Ex. 18: 14. 2 Chron. 17: 11, Ps. 19: 2, Jer. 37: 4. Passive participles so used suggest not only a constant experience of what is denoted by the verb, but in addition a permanent quality as the ground of it, like the Latin fut. pass. part. in *dus*. נוֹרָא not only *feared* but *worthy to be feared*, מְהֻלָּל *worthy to be praised*, חֲמוּדוֹת *desirable*, אָכֹל *fit to be eaten* Lev. 11: 47, Prov. 16: 16, Isa. 2: 22.

2. Where a particular time is intended the active participles most commonly relate to the present מָה־אַתָּה רֹאֶה *what seest thou* Jer. 1: 11, Gen. 4: 10, 27: 42, Ex. 18: 14, Judg. 9: 37 (with הִנֵּה), 2 Sam. 3: 13, 1 Kin. 6: 12, or to the proximate future, in which sense it is frequently preceded by הִנֵּה, הִנְנִי מֵבִיא *behold, I am about to bring the flood* Gen. 6: 17, 7: 4, 19: 13, 48: 21, Ex. 10: 8, Isa. 3: 1, 5: 5, Jer. 28: 16; and passive participles to the past, נָתוּן *given*, מוּשָׁב *restored*, מוּכָּת *slain*, שָׁמוּר *kept*, עָשׂוּי *done*.

a. The active participles of neuter verbs, which have no passive forms, are used in a past as well as in a present or future sense, מֵת *dead* more frequently than *dying* or *about to die*, הַיֹּצְאִים *th t went forth* Gen. 9: 18, הַבָּאִים *that came* Josh. 2: 3. This is occasionally the case with active verbs, when it is demanded by the connection *who then is he* הָעֹרֵד *that hath hunted venison* Gen. 27: 33; *these are the gods* הַמַּכִּים *that smote Egypt* 1 Sam. 4: 8, Gen. 48: 16, 2 Kin. 22: 18. Interpreters are not agreed whether לֹקְחֵי Gen. 19: 14 means *who were to marry* or *who had married* Lot's daughters. Participles of passive form but active sense may be used of the present or proximate future, בָּטֻחַ *trusting*, § 90, נִלָּחִים *fighting* or *about to fight*, but rarely those which are strictly passives, Gen. 19: 15, Ex. 5: 16, 1 Chron. 22: 19.

3. In narrations and predictions the time of the participle is reckoned not from the moment of speaking but from the period spoken of. They very commonly denote that which is contemporaneous with the event described, particularly in circumstantial clauses, *the two angels came* ... וְלוֹט יֹשֵׁב *and Lot* (was) *sitting in the gate of Sodom* Gen. 19: 1; *he came to Shiloh* ... וּבְגָדָיו קְרֻעִים *with his clothes rent* 1 Sam. 4: 12; *thou shalt meet a company of*

prophets יֹרְדִים *coming down* 1 Sam. 10: 5; *they shall declare his righteousness unto a people* נוֹלָד (who shall then be) *born* Ps. 22: 32, Gen. 29: 9, 41: 17, 42: 23, Deut. 4: 11, Josh. 6: 1, Judg. 13: 9, Ps. 102: 19; though they may upon occasion denote the relatively past, *David said to the young man* הַמַּגִּיד *who had told him* 2 Sam. 1: 13 or the relatively future *he did not tell him that he* בֹּרַחַ *was about to flee* Gen. 31: 20.

4. The verb הָיָה *to be* is connected with active participles to form progressive tenses, which are more frequently employed in the later than in the earlier books of the Old Testament, *Moses* הָיָה רֹעֶה *was keeping the flock* Ex. 3: 1; it is also occasionally connected with passive participles to indicate the time to which they are to be referred or the aspect under which they are to be conceived, *his throne* יִהְיֶה נָכוֹן *shall be established for ever*, 1 Chron. 17: 4, תִּהְיֶה *let their habitation be* נְשַׁמָּה *desolated* Ps. 69: 26.

a. Other examples with active participles, Gen. 37: 2, 42: 11, Ex. 37: 9, Judg. 1: 7, 1 Sam. 2: 11, 2 Sam. 3: 6, 1 Kin. 5: 15, 20: 40, 2 Kin. 17: 28, 2 Chron. 24: 12, Esth. 9: 21, Job 1: 14, Ps. 122: 2, Isa. 3: 7. The passive participle with הָיָה indicates a condition as existing rather than an act as performed at the time referred to, differing thus from the meaning of the primary tenses in the passive species, *all the people that came out* כָּל־הָעָם הַיּוֹצֵא *were* already *circumcised* Josh. 5: 5; this distinction which cannot be represented in English on account of the peculiar formation of the passive voice, is familiar in German, *sie waren beschnitten*, not *sie wurden beschnitten*, comp. Ex. 19: 11, 15, Deut. 28: 29, Josh. 8: 4, Ps. 73: 14, Isa. 2: 2. In Esth. 6: 1 this combination has lost its proper force and has become simply a compound tense וַיִּהְיוּ נִקְרָאִים *and they were read before the king.* The jussive יְהִי, which is sometimes connected with participles Deut. 33: 24, Job 1: 21, is to be understood with בָּרוּךְ, אָרוּר and in a few other cases. Jer. 2: 17 בְּעֵת מוֹלִכֵךְ seems best explained by the ellipsis of the relative *in the time that he was leading thee*, so Ezek. 27: 34, Gen. 38: 29, 40: 10.

b. The negative אֵין, which includes in its signification the substantive verb, is constantly used with participles, אֵין פּוֹתֵר *there was no one interpreting* Gen. 41: 8, אֵינֶנִּי נוֹתֵן *I am not giving* Ex. 5: 10, תֶּבֶן אֵין נִתָּן *straw is not given* ver. 16. The simple negative לֹא *not* is very rarely found with them לֹא־כֹלֶה Job 29: 12; where it would be required, the preterite or fu-

ture tense, as the case may be, must ordinarily be employed, *all going down to the dust and* לֹא חָיָה *not saving alive* Ps. 22: 30.

Infinitive.

§ 279. The infinitive is an abstract verbal noun, and, like the participles, partakes of the character both of a noun and a verb. As a noun it may be the subject or the predicate of a proposition, or it may be governed by a verb, and in its construct form by a noun, or preposition; it may also be put in the construct state before a noun denoting either its subject or its object.

a. The absolute infinitive is in a very few instances used as a subject, מה־יוֹכִיחַ הוֹכֵחַ נִכְּחִי *what doth your reproof reprove?* Job 6: 25, אָכֹל *to eat much honey is not good* Prov. 25: 27, Eccles. 4: 17, or a predicate *the effect of righteousness* shall be חַשְׁקֵט וָבֶטַח *quietness and confidence* Isa. 32: 17; the construct more frequently, either without לְ, עֲשׂוֹת מִשְׁפָּט *to do justice* is *a joy to the righteous* Prov. 21: 15, 13: 19, Gen. 2: 18, or with it, Esth. 5: 8, Ps. 92: 2, Prov. 21: 9 comp. 25: 24; Esth. 1: 7, *the words of the wicked* are אֶרְבֹּדָם *to lie in wait for blood* Prov. 12: 6. In apposition with the subject 2 Sam. 13: 16. Pronouns and predicates referring to an infinitive may be in the masc. as the more primary form, § 198, Jer. 2: 19, or in the fem. as a substitute for the neuter, § 198. *a*, 1 Sam. 18: 23, 25: 31, 2 Sam. 3: 37, Isa. 1: 12, Jer. 2: 17, 9: 23, 23: 14.

b. The infinitive retains its absolute form, when separate and unconnected, but the construct form is assumed, when it is in close relation with other words. The latter is accordingly used not only as in nouns, which may be in the construct relation with following nouns, but commonly also when governed by a verb, noun or preposition. The absolute infinitive is rarely governed by a verb, לָמַדְתִּי הֵיטֵב *learn to do well*, אַשְׁרוּ חָלוֹץ *redress wrong* Isa. 1: 17, *until he knows* מָאוֹס *to refuse the evil*, וּבָחוֹר *and to choose the good*, 7: 15, וְלֹא־אָבוּ בְדַרְכָיו חָלֹךְ *and they would not walk in his ways*, 42: 24, *thou wilt make us offscouring* וּמָאוֹס *and refuse* Lam. 3: 45, Job 13: 3, Isa. 57: 20, Jer. 9: 4; still more rarely by a noun דֶּרֶךְ הַשְׂכֵּל *the way of understanding* Prov. 21: 16, 1: 3, and almost never by a preposition 1 Sam. 1: 9. The construct infinitive when governed by a verb or noun is usually though not invariably preceded as in English by the preposition לְ *to*, אוּכַל לְהִלָּחֵם בּוֹ *I shall be able to fight with him* Num. 22: 11, but see Gen. 37: 4, Ex. 2: 3, etc.; עֵת לָלֶדֶת וְעֵת לָמוּת *a time to be born and a time to die* Eccl. 3: 2 ff.; לְ is less frequently omitted in prose than in poetry, *I know not* (how) צֵאת וָבוֹא *to go out and to come in* 1 Kin. 3: 7, בּוֹשְׁתָּ חֲבָלִם *thou hast refused to be ashamed* Jer. 3: 3, Mal. 2: 16, Job 33: 32, עֲתִידִים עֹרֵר *ready to rouse leviathan* Job 3: 8. לְ is not prefixed to an infinitive, which is preceded by a noun in the construct state בְּשָׁנַת בֹּא *in the year of Tartan's*

coming Isa. 20: 1, עֵת סְפוֹד וְעֵת רְקוֹד *a time of mourning and a time of dancing* Eccl. 3: 4. Such verbs as כָּלָה *to finish*, יָרֵא *to fear*, עָצַר *to hinder*, and צִוָּה used negatively *to command* not to do anything, may be followed by מִן *from* with the infinitive. Thus *Moses finished* כְּדַבֵּר *speaking* lit. *from speaking* Ex. 34: 33, so Lev. 16: 20, Josh. 19: 51 (but לְ ver. 49), 1 Sam. 10: 13, 2 Sam. 6: 18, 1 Chron. 16: 2, Ezek. 43: 23, but כִּלָּה לְדַבֵּר *he finished speaking* lit. *to speak* Gen. 18: 33, which is the more usual construction. יָרֵא לָשֶׁבֶת *he feared to dwell*, Gen. 19: 30, but אַל־תִּירְאָה מֵרְדָה *fear not to go down* Gen. 46: 3, Ex. 3: 6, 34: 30; *he hath restrained me* כִּי־מָנַע מִמֶּנִּי *from bearing* Gen. 16: 2; *I shall command* וְהַמְטַרְתִּי *not to rain* lit. *from raining* Isa. 5: 6, though the more usual construction would be לְבִלְתִּי הַמְטִיר *not to rain* Gen. 3: 11, Ruth 2: 9, 1 Kin. 11: 10, 2 Kin. 17: 15, Jer. 35: 14. מִן is also used with the infinitive in other connections in a negative sense *his eyes were dim* מֵרְאֹת so as *not to see* lit. *from seeing* Gen. 27: 1, מֵעֲשׂוֹת *not doing thy ways* מִבְצֹא *not finding thy pleasure* Isa. 58: 13, 56: 6, Job 34: 30, 2 Kin. 23: 33 K'ri (once even before a future מִן־דְּרוֹשׁוֹ Deut. 33: 11); or to indicate comparison, § 264, *to trust in Jehovah is better* מִבְטֹחַ *than to confide in man* Ps. 118: 8, 9, Eccles. 4: 17, though לְ may likewise be retained before the infinitive and comparison be suggested by the connection rather than expressed, צָעִיר לִהְיוֹת *too little to be* Mic. 5: 1.

c. The preposition לְ is used with the infinitive to express (1) design or purpose, *he went up* לְהִשְׁתַּחֲוֹת וְלִזְבֹּחַ *to worship and to sacrifice* 1 Sam. 1: 3, Ex. 21: 14, 32: 29, Lev. 10: 10, 11, Deut. 4: 38, Job 5: 11, 33: 30, Ezek. 17: 14. (2) the result, *thou shalt keep the charge of Jehovah* לָלֶכֶת so as *to walk in his ways* לִשְׁמֹר *to keep his statutes* 1 Kin. 2: 3, 4, 14: 8, 1 Sam. 19: 5, Ezek. 17: 15, 18; this may be practically equivalent to a limit of time *he shall eat butter and honey* לְדַעְתּוֹ *until he knows* Isa. 7: 15; or to the Latin gerund in *do* דִּבֶּר אֵלֵיהֶם *spoke saying* lit. so as *to say*, Lev. 10: 3 (but Num. 6: 23 אֱמֹר by § 280. 2), בָּרָא לַעֲשׂוֹת *created* so as *to make*, made by a creative act Gen. 2: 3, 34: 7, Lev. 21: 9, Deut. 11: 19, 1 Chron. 10: 13, Ps. 103: 20, Jer. 11: 17, 44: 17, Ezek. 14: 13. (3) the time of an action לְשָׁלְחַ *at Joab's sending* i. e. *when Joab sent* 2 Sam. 18: 29, Gen. 24: 63, Ex. 14: 27, Deut. 23: 12. (4) a periphrastic future, אֲשֶׁר לִהְיוֹת *that which is to be* Eccles. 3: 15, מַה־לַּעֲשׂוֹת *what is there to do* i. e. *what shall I do* Isa. 5: 4, 5, 37: 26, 38: 20, 2 Chron. 12: 12, 36: 19, Prov. 18: 24, וַיְהִי הַשֶּׁמֶשׁ לָבוֹא *the sun was* about *to set* Gen. 15: 12, Josh. 2: 5, הָיָה לִהְיוֹת *they* came *to be* 1 Sam. 14: 21. This form of expression may be suggestive of an intended action, לְבָרְתִּי *one is to cut*, intends to cut Isa. 44: 14, 2 Sam. 14: 16, 2 Chron. 11: 22, Esth. 7: 8, Prov. 20: 25, Hos. 12: 3; or of possibility, אֵין לְהוֹסִיף *it is not* possible *to add to it and* אֵין כְּגֹדֶשׁ *there cannot be taken from it* Eccles. 3: 14, 2 Chron. 20: 6; necessity, *Ephraim* לְהוֹצִיא *is to bring out* i. e. must bring out Hos. 9: 13, לֹא כְהַזְכִּיר *one must not make mention* Am. 6: 10, Job 30: 6; propriety or duty לֹא לְהִתְיַחֵשׂ *is not to be registered* 1 Chron. 5: 1, 9: 25, לְעֶזֹר *should one help the wicked* 2 Chron. 19: 2, לְהַכּוֹת *you ought to smite* 2 Kin. 13: 19. In some instances it is doubtful whether לְ with the inf. is a periphrastic future or is to be otherwise explained Eccles. 9: 1, Jer. 17: 10, Hab. 1: 17, Job 36: 20. Various other prepositions

may precede the infinitive, as בְּ *in*, כְּ *like, at*, עַד *until*, עַל *upon*, לְמַעַן *in order to*, יַעַן *because of*, לִפְנֵי *before*, etc. Their occurrence before finite forms of the verb in lieu of conjunctions is rare and exceptional, Gen. 31: 20. There is an occasional ellipsis of the infin. הָיוֹת *to be* after a preposition, *he removed her* מֵעַבְרָהּ *from* being *queen* 1 Kin. 15: 13, Isa. 7: 8, 17: 1, 25: 2, Jer. 48: 2, Job 34: 30.

d. The infinitive in the construct before its subject. בְּהִבָּרְאָם *in their being created* i. e. *when they were created*; *in the day* עֲשׂוֹת יְהוָה אֱלֹהִים *of Jehovah God's making earth and heaven* Gen. 2: 4; *there was no water* לִשְׁתּוֹת הָעָם *for the drinking of the people* Ex. 17: 1, 2 Kin. 14: 22; compound subject Jer. 29: 2; pronominal suffix as subject, Lev. 16: 1, Num. 30: 16, Deut. 12: 30, 2 Sam. 5: 13; the infin. and suffix instead of a finite tense, וְשִׁבְתִּי *and my dwelling* (shall be) i. e. *I shall dwell* Ps. 23: 6, so Job 9: 27, Zeph. 3: 20, Dan. 11: 1. Before its object, שְׂאֵת פְּנֵי רָשָׁע *the accepting of the person of the wicked* Prov. 18: 5, תֵּת כֹּחָהּ *to yield its strength* Gen. 4: 12, 1 Kin. 16: 21. Construct before its subject and governing an object, Gen. 5: 4, 13: 10, 41: 39, 46: 30, 50: 14, Ex. 7: 25, Deut. 1: 4, 4: 14, 2 Sam. 14: 13, 1 Kin. 13: 31, 2 Kin. 5: 7, 2 Chron. 34: 19, Isa. 29: 13, Jer. 24: 1, 28: 12, 32: 16, 34: 8, 36: 27, 40: 1. The object interposed before the subject, 2 Sam. 18: 29; a particle so interposed Job 34: 22. The infinitive preceded by a noun in the construct state receives the article properly belonging to the noun in Gen. 2: 9, Num. 4: 12, §§ 248. 6. *c*, 259.

e. The negative adverb ordinarily used with the infinitive is בִּלְתִּי, *I commanded thee* לְבִלְתִּי אֲכָל *not to eat* Gen. 3: 11, Deut. 4: 21, 12: 23, 17: 20, 1 Kin. 11: 10, Jer. 35: 8, 38: 26, Ezek. 13: 22, 17: 14, Dan. 9: 11; once לְבַלְתִּי 2 Kin. 23: 10; with the prep. מִבְּלְתִּי, מִן Num. 14: 16, Ezek. 16: 28, לְבִלְתִּי occurs before the pret. or fut. Ex. 20: 20, 2 Sam. 14: 14, Jer. 23: 14, 27: 18, Ezek. 13: 3; עַד־בִּלְתִּי four times before a pret. in the same phrase, Num. 21: 35, Deut. 3: 3, Josh. 8: 22, 11: 8.

§ 280. 1. The absolute infinitive, expressing simply the essential idea of the verb apart from all modifications of tense, number and person, may be introduced without logical connection as an exclamation, הָרוֹג הָרֹג וְשָׁחֹט צֹאן אָכֹל בָּשָׂר וְשָׁתֹת יָיִן *lo! slaying oxen! and killing sheep! eating flesh! and drinking wine!* Isa. 22: 13, 21: 5, 59: 4, 13, Jer. 7: 9, Hos. 4: 2, 2 Chron. 31: 10, Job 15: 35, or in apposition to some preceding word by which attention is directed to it, *I will tell you what I will do* הָסֵר *take away the hedge*, פָּרֹץ *break down the fence* Isa. 5: 5, 58: 6, 7, Jer. 9: 23, 23: 14.

a. In a very few instances the construct infinitive is similarly used, Ezek. 21: 31, Mal. 2: 13.

2. Or it may be used in an explanatory clause, defining the mode of a preceding action or the circumstances attending it, as the Latin gerund in *do* or the English participle, *they tare me* חָרֹק *gnashing their teeth at me* Ps. 35: 15, 16, *I will perform all* הָחֵל וְכַלֵּה *beginning and ending* 1 Sam. 3: 12, Gen. 30: 32, Ex. 30: 36, Deut. 9: 21, 13: 16, 27: 8, 2 Sam. 8: 2, Job 15: 3, Isa. 30: 14, 57: 17, Hab. 3: 13, Zech. 7: 3. The principal verb may be thus repeated for the sake of a fuller statement, *we devoted them ...* הַחֲרֵם *devoting every city, men, women and children* Deut. 3: 6, which is commonly made by adding another verb in the absolute infinitive, *Jehovah will smite Egypt* נָגֹף וְרָפֹא *smiting and healing* Isa. 19: 22, 1 Kin. 20: 37, 2 Kin. 4: 43, 2 Chron. 36: 15, Jer. 11: 7, 12: 17, Joel 2: 26.

a. Infinitives are thus used as explanatory of a preceding absolute infinitive, Jer. 32: 33, or imperative Isa. 7: 11. A finite verb is added to each infinitive, Isa. 31: 5. The subject of the infinitive differs from that of the principal verb, Jer. 22: 19, 31: 2. Some absolute infinitives are so frequently employed in this subsidiary manner, that they are practically reduced to adverbs, e. g. הַרְחֵק Josh. 3: 16, הַרְבֵּה, הַרְבִּים, § 236. 3 (2).

3. Continuing a principal clause it may be used instead of the finite form represented in the preceding verb, and borrow its complexion as to tense and other relations from it, וַיִּתְקְעוּ *and they blew with trumpets* וַיְנַפֵּצוּן *and brake the pitchers* prop. there was *breaking pitchers* Judg. 7: 19; *all this* רָאֹיתִי וְנָתוֹן אֶת־לִבִּי *I have seen and applied my heart* Eccl. 8: 9; יִקְנוּ *they shall buy fields for money* וְכָתוֹב וְהָתוֹם *and write the papers and seal* (them) וְהָעֵד *and take witnesses* Jer. 32: 44.

a. It may thus continue a past tense, Gen. 41: 43, Ex. 8: 11, 1 Sam. 2: 28, 1 Kin. 9: 25, 1 Chron. 5: 20 (change of subject), 2 Chron. 28: 19, Neh. 8: 8, 9: 8, 13, Esth. 3: 13, 9: 6, 12, 16-18, Eccl. 9: 11 (but see 4: 1, 7), Jer. 14: 5, 19: 13, 37: 21, Zech. 3: 4, 7: 5, Dan. 9: 5, 11; or a future, Lev. 25: 14, Num. 30: 3, Deut. 14: 21, Josh. 9: 20, Zech. 12: 10; a jussive future, Esth. 2: 3, 6: 9; imperative Am. 4: 5; present Ezek. 11: 7; participle, Hab. 2: 15; construct infinitive Ex. 32: 6, 1 Sam. 22: 13, 25: 26, 33. A

verbal noun is similarly used, Isa. 8: 6; and occasionally a construct infinitive e. g. for the pret. 2 Chron. 7: 3, fut. 1 Chron. 21: 24, 2 Chron. 7: 17, Obad. ver. 4, part. Jer. 44: 19.

b. The absolute infinitive is sometimes used for a finite form, when no verb precedes in the same sentence, הֲכֵב עִם־שַׁדַּי יִסּוֹר (shall) *the fault-finder contend with the Almighty* Job 40: 2. The subject of the infinitive is expressed in this instance, as in others when perspicuity requires it, so הַחַיּוֹת רָצוֹא וָשׁוֹב *the living creatures ran and returned* Ezek. 1: 14. שִׁבַּחְתִּי אֲנִי *I praised* Eccl. 4: 2, Gen. 17: 10, Lev. 6: 7, Num. 15: 35, Esth. 9: 1, Ps. 17: 5, Prov. 17: 12.

4. At the beginning of a clause it may be a substitute for the imperative, זָכוֹר *remember the sabbath-day* Ex. 20: 8, הָלוֹךְ *go and say* 2 Sam. 24: 12, Ex. 13: 3, Deut. 1: 16, 5: 12, 16: 1, 31: 26, 2 Kin. 3: 16, 5: 10, Neh. 7: 3, Isa. 37: 30, Jer. 2: 2, 19: 1.

§ 281. 1. The absolute infinitive is often joined with the finite forms to add emphasis or intensity to the idea, which may be variously expressed in English, מוֹת תָּמוּת *thou shalt surely die*, Gen. 2: 17, רָאֹה רָאִינוּ *we plainly saw* Gen. 26: 28, *the man* שָׁאוֹל שָׁאַל *asked very strictly* Gen. 43: 7, הָרֵעֹתִי הֵרַעְתָּ *I have done very wickedly* 1 Chron. 21: 17, לֹא הַשְׁמֵד אַשְׁמִיד *I will not utterly destroy* Am. 9: 8.

a. Ewald distinguishes the following cases; when there is (1) a contrast with what precedes, *thou shalt not conceal him but* הָרֹג תַּהַרְגֶנּוּ *shalt surely kill him* Deut. 13: 10, Judg. 1: 28, 2 Sam. 24: 24, Lam. 5: 22, Ezek. 16: 4, or follows Gen. 2: 16, Deut. 30: 18, Ps. 118: 13, 18, or both the contrasted acts are emphasized, Num. 30: 15, 16, Ps. 126: 6. (2) Implied contrast, as when something is not what might have been expected, Am. 3: 5, or a conditional suggestion is tacitly opposed to its opposite, Ex. 19: 5, Num. 12: 14, Judg. 14: 12, 1 Sam. 12: 25, or a particle of limitation as רַק or אַךְ *only* sets an act over against every thing beside, Gen. 27: 30, 44: 28, Judg. 7: 19. (3) A question, which involves its own answer, and is rhetorically stronger than a direct statement Gen. 37: 8, Judg. 11: 25, 1 Sam. 2: 27, Isa. 50: 2, Ezek. 14: 3, Zech. 7: 5. (4) An act regarded as absolutely certain or as possessing a high degree of intensity or completeness, Deut. 31: 29, Judg. 15: 2, 1 Sam. 14: 28, 22: 22, 24: 21, 25: 28, 2 Kin. 5: 11, 18: 30, Job 27: 22, Jer. 20: 15, 37: 9, Hos. 4: 17, Joel 1: 7, Am. 5: 5. (5) An earnest asseveration, remonstrance, command or threatening. Gen. 15: 13, Ex. 19: 12, 13, Ruth 2: 16, Job 13: 5, Am. 7: 17, Zech. 11: 17.

b. The infinitive is mostly of the same species with the finite verb to which it is added, Num. 16: 13, 22: 17, Josh. 24: 10, 2 Sam. 17: 10, 11,

2 Kin. 18: 33, although this is not always the case. Thus, the Kal, on account of its greater simplicity of form, may be joined with a derivative species, e. g. Niphal הִסָּקֵל וְסָקוֹל Ex. 19: 13, 21: 22, 22: 11, 12, 2 Sam. 23: 7, Job 6: 2, Piel Josh. 24: 10(?), Pual נֻלַּח טָלֹחַ Gen. 37: 33, Hiphil הַעֲלֵם נַעֲלֹם 1 Sam. 23: 22, Hophal הוּסַת יוּסַת Ex. 19: 12, Hithpael הִתְבּוֹנֵנְתָּה בוֹנֹה Isa. 24: 19; or one derivative species with another of like signification, הָפְּדָה נִפְדָּתָה Lev. 19: 20, הָהְתֵּל לֹא תִתְהַלָּה Ezek. 16: 4, 1 Sam. 2: 16, 2 Kin. 3: 23. Occasionally the infinitive is borrowed from a cognate verb, אָסֹף אֹסֵף Zeph. 1: 2, Jer. 8: 13 (אָסֹף and כוּס), אָרוֹשׁ וְרוּשָׁנוּ Isa. 28: 28 (אָרֹשׁ and הוּשׁ), Jer. 48: 9. For the sake of greater emphasis the prolonged form of the plural ending in the future וּן is sometimes adopted in verbs joined with the abs. inf. שָׁמוֹר תִּשְׁמְרוּן Deut. 6: 17, 11: 22, 1 Sam. 2: 16. The negative adverb commonly stands before the finite form of the verb בָּלָק לֹא תְבָרֲכֵנוּ Num. 23: 25, Jer. 13: 12, rarely before the infinitive and only when special emphasis is laid upon the negative, לְאַרְמוֹת תְּכַלּוֹן Gen. 3: 4, 2 Kin. 8: 10 K'thibh, Ps. 49: 8, Jer. 3: 1, Am. 9: 8.

c. The construct infinitive is very rarely used in such combinations instead of the absolute, חֲבֹל חֲבָלוּנִי Neh. 1: 7, חֲרוֹת־אַחֲתָה Ps. 50: 21; once it is added in a varied form to a preceding construct infin tive, הַהָלֵךְ נָהֹלְכוּ 2 Sam. 6: 20. The finite verb is repeated, שָׁבוֹ וְשָׁבוּ 2 Sam. 15: 8 K'thibh, Gen. 48: 19, Judg. 5: 7, 1 Sam. 17: 13, to which another verb is added Jer. 10: 25, Obad. ver. 16. Imperatives of the same species Judg. 4: 18, 1 Sam. 24: 12, 2 Sam. 20: 16 or of different species are combined, Isa. 29: 9, Hab. 1: 5, Zeph. 2: 1. A verbal noun takes the place of the infinitive, עֵרָה הֵעוֹר Hab. 3: 9, or is added to it Isa. 22: 18.

2. When the absolute infinitive follows the verb it sometimes expresses continuance or repetition particularly with verbs of motion and when two infinitives are connected together, וַיֵּצֵא יָצוֹא וָשׁוֹב *and it went out going and returning* i. e. it kept going to and fro Gen. 8: 7, so ver. 3, 12: 9, הָלְכוּ הָלוֹךְ וְגָעוֹ *they went on lowing as they went* 1 Sam. 6: 12, וָאֲדַבֵּר אֲלֵיכֶם הַשְׁכֵּם וְדַבֵּר *and I spake to you acting early and speaking* i. e. continuously and earnestly Jer. 7: 13.

a. Thus, וַיִּשְׁפֹּט שָׁפוֹט *he judges, judges* i. e. *is always judging* Gen. 19: 9, וַיֹּאכַל גַּם־אָכוֹל *he is also forever devouring* Gen. 31: 15, צָלַח צָלוֹחַ *he has gone on refining* Jer. 6: 29, וּבָא בוֹא *and he shall come repeatedly* Dan. 11: 10, Num. 11: 32, 16: 13, Judg. 14: 9, 2 Kin. 2: 11, Jer. 23: 17, 29: 19. This order of the words, however, quite frequently has the same signification as when the infinitive precedes the verb, and simply expresses certainty or intensity. Thus *I will go down with thee to Egypt and I* אֲנֹכִי אֵרֵד עִמְּךָ מִצְרַיְמָה *will also surely bring thee up* Gen. 46: 4, so Josh. 7: 7, 2 Kin. 5: 11. In Num. 24: 10, Josh. 24: 10 וַיְבָרֵךְ בָּרוֹךְ might mean *kept on blessing* these three

times, but not Num. 23: 11 when it had been done but once. When used with the imperative, the abs. infin. always follows: שָׁמוֹעַ שִׁמְעוּ may mean *hear attentively* Job 13: 17, 37: 2, or *hear on*, continue to hear, Isa. 6: 9, Num. 11: 15, Judg. 5: 23, Jer. 22: 10. The absolute infinitives denoting continuous action in a few instances precede the finite verb הָלוֹךְ וְטָפוֹף הָלְכוּ וְטָפוֹחַ *they walk, mincing as they walk* Isa. 3: 16, Jer. 50: 4.

b. When two verbs are connected together to express continuous action, a participle, § 278. 1, is sometimes substituted for the absolute infinitive in the case of one or both, הָיוֹ עֹלֶה וּבוֹכֶה ... דָּוִד עֹלֶה 2 Sam. 15: 30, הָלוֹךְ וּבָכֹה הָלֹךְ וּבָכֹה Jer. 41: 6, 2 Sam. 16: 5; an adjective may even take the place of the second, הָלוֹךְ הָלִיךְ וְגָדֵל הָלֹךְ הָלַךְ וְגָדַל Gen. 26: 13, 2 Sam. 5: 10, 1 Chron. 11: 9, הָלוֹךְ וְחָסֵר ... הָלַךְ וְחָסֵר Judg. 4: 24; the finite verb is omitted in וְגָדוֹל וְגָדַל Esth. 9: 4, 1 Sam. 2: 26, Jon. 1: 11; the substantive verb takes its place, הָיוּ הָלוֹךְ וְחִסְּרוּ הָלֹךְ וְגָדֵל הָיָה הָלוֹךְ וְחָכֵה Gen. 8: 5, 2 Chron. 17: 12. The second verb may also be put in one of the finite tenses, הָלוֹךְ וְחִסַּר הָלְכוּ וְחָסֵר Josh. 6: 13, הָלוֹךְ וְנָסוֹג הָלַךְ ... הָלוֹךְ וְנָסוֹג 2 Sam. 16: 13, 13: 19, or even both verbs 2 Kin. 21: 13.

§ 282. Constructions begun with a participle or infinitive are not infrequently continued in the preterite or future, since these tenses are the fundamental forms of the verb and include within their scope all the relations of time and mode, לְהָדוֹת *in order to widows' being their prey and* וְיָבֹזּוּ *that they may plunder orphans* Isa. 10: 2, מוֹבִיל יוֹעֲצִים בּוֹזִים *leading counsellors away spoiled and* וְיוֹלֵל *he maketh judges fools* Job 12: 17.

a. The absolute infinitive may thus be continued by the preterite, Josh. 6: 13, Jer. 23: 14, or the future Job 15: 35, Isa. 58: 5-7. The construct infinitive by the preterite 1 Sam. 4: 19, 2 Chron. 16: 7, Ezek. 13: 8, 16: 31; Vav consec. pret. Gen. 9: 14, Josh. 23: 16, 1 Kin. 2: 37, 2 Kin. 18: 32; future, 1 Kin. 8: 35, Job 11: 5, 33: 17, Isa. 1: 15; Vav consec. fut. Ps. 50: 16, 92: 8, Isa. 30: 12, Ezek. 25: 15. Participles by the preterite, 2 Sam. 3: 34, Ps. 15: 2, 3, 22: 30, Am. 5: 7, 8; future Ps. 49: 7, 104: 32, Isa. 5: 8, 31: 1; Vav consec. fut. Gen. 27: 33, 1 Sam. 2: 6, Job 3: 21, Jer. 13: 10.

§ 283. The dependence of one verb upon another is most distinctly expressed by putting the second verb in the infinitive. The second verb may, however, be in form coordinated with the first by being put in the same or an equivalent tense with or without a copulative, the true relation between the verbs being left to be inferred

from their obvious signification, הוֹאִיל הָלַךְ *he was willing, walked* i. e. *he was willing to walk* or *walked willingly* Hos. 5: 11, לֹא אוֹסִיף עוֹד אֲרַחֵם *I will no more add to pity* i. e. *will not again pity* Hos. 1: 6, מַשְׁכִּים הָלֹךְ *being early to go* or *going early* Hos. 6: 4, *how* אוּכַל וְרָאִיתִי *shall I endure and see* i. e. *endure to see* Esth. 8: 6, *if ye have dealt truly* וַתַּמְלִיכוּ *and made Abimelech king* i. e. in making him king Judg. 9: 16, Deut. 1: 5, 31: 12, Job 6: 9, 19: 3, Prov. 23: 35, Cant. 2: 3, Isa. 42: 21, 52: 1, Lam. 4: 14, Zeph. 3: 7, Zech. 4: 10.

a. This coordination most frequently occurs, when the second verb expresses the principal idea and the first simply qualifies it, and might consequently be rendered by an adverb, אַל תַּרְבּוּ תְדַבְּרוּ *do not multiply speak* i. e. speak much 1 Sam. 2: 3, Ps. 51: 4, הֶעְמִיקוּ שִׁחֲתוּ *they have deepened corrupted* i. e. deeply corrupted Hos. 9: 9, וַיְמַהֵר נָגַשׂ *and he hastened and ran*, ran hastily 1 Sam. 17: 48, 16: 16, Ps. 37: 7, Isa. 3: 26. In other instances of this sort the second verb is put in the infinitive וַיֹּסֶף שְׁלֹחַ Gen. 8: 10 *and he added to send* or וַיֹּסֶף וַיִּשְׁלַח 1 Sam. 19: 21 *and he added and sent*, for *he sent once more*; תָּשׁוּב לִרְאוֹת Job 7: 7 *return to see* or שָׁבָה וְאֶרְאֶה Eccl. 4: 7 *return and see* for *see again*; תִּקְרֹב לָבוֹא *brought near to come*, came near Gen. 12: 11, נֶחְבֵּאתָ לִבְרֹחַ *didst hide thyself to flee*, flee secretly 31: 27, חָמַדְתָּ לְשָׁאוֹל *thou hast been hard in asking*, asked what is hard 2 Kin. 2: 10, 1 Kin. 14: 9, Ps. 33: 3, 126: 2, 127: 2, Joel 2: 20, Am. 4: 4, Jon. 4: 2, Mic. 6: 8, 13. This order is sometimes reversed and the qualifying verb put in the infinitive, thus we find both חֻפְלָא לְהֵעָזֵר *he was wonderfully helped* 2 Chron. 26: 15 and עָשָׂה לְהַפְלִיא *he did wonderfully* Joel 2: 26.

b. In the following instances the verbs thus co-ordinated have different objects, אוּכַל נַכֶּה־בּוֹ *I shall be able, we shall smite him* i. e. I shall with our aid be able to smite him, Num. 22: 6, לֹא תוֹסִיפִי רָאוּ־לָךְ *thou shalt not add they shall call thee* i. e. thou shalt no more be called by them, Isa. 47: 1, 5; or are in different tenses, לֹא יָדַעְתִּי אֲנַצֵּחַ *I know not* (how) *I shall flatter* i. e. how to flatter, Job 32: 22; *O that* יָדַעְתִּי וְאֶמְצָאֵהוּ *I knew and might find him* i. e. how to find him, Job 23: 3.

Object of Verbs.

§ 284. When the predicate is a verb it may be extended by the addition of a direct or indirect object, an adverb or some other qualifying expression. The object of a transitive verb ordinarily stands after both the verb

and its subject, and if it is an indefinite noun is distinguished simply by its position or by its relation to the verb as determined by its meaning; if a definite noun, or a demonstrative, relative, or interrogative pronoun, it may, at the pleasure of the writer, be further distinguished by prefixing to it אֵת the sign of the definite object; if a personal pronoun, it is suffixed either to אֵת or to the governing verb.

a. The usual order of words in Hebrew is verb, subject, object, Gen. 1: 1, 21; but in a circumstantial clause, § 309, the subject, to which attention is specially drawn, precedes the verb 1: 2, 2: 5, 6. Of two objects the near will precede the remote 3: 20, 5: 2, and the direct the indirect 2: 20, 21; and subsidiary expressions follow 1: 24, 26, 2: 8, 3: 8. If the object, whether direct or indirect, be a pronoun, it will immediately follow the verb 1: 17, 22, 29, 2: 19, 4: 15, 25. The order is, however, liable to such modifications as emphasis may require. Thus, if stress be laid upon the subject, it may precede the verb 3: 13, 4: 15, Ps. 3: 6, from emphasis of contrast Ps. 1: 6 or of parallelism Ps. 2: 1, 2, 10. So the object may precede the verb, whether direct, Gen. 3: 10, 15, 18, (emphasis of parallelism) Ps. 3: 8, or indirect (emphasis of contrast) Gen. 1: 5, 3: 16, 17 comp. ver. 14 4: 5 comp. ver. 4; the remote object may precede the near (emphasis of parallelism) Ps. 2: 8, or the indirect may precede the direct Gen. 1: 5, 8, 10, 3: 21. The time, place and manner of an action belong properly at the end of a clause Gen. 1: 9, 20, 3: 8, 14; though they may be placed at the beginning 1: 1, 3: 19, or wherever perspicuity or emphasis may seem to demand 3: 24, 4: 24. The removal of a word from its natural position to the end of a clause is also sometimes emphatic, thus the subject Ps. 34: 22, the indirect pronominal object Ps. 4: 4, and the vocative יהוה ver. 7.

b. A noun, which is the direct object of a verb, may receive אֵת, whether it is definite, § 249, by signification, as a proper noun, *God tempted* אֶת־אַבְרָהָם *Abraham* Gen. 22: 1, or is made so by the article, *God saw* אֶת־הָאוֹר *the light* Gen. 1: 4, a pronominal suffix, *take, now,* אֶת־בִּרְכָתִי *my blessing* Gen. 33: 11, or construction with a definite noun, *Jacob called* אֶת־שֵׁם הַמָּקוֹם *the name of the place* Gen. 35: 15. The particle אֵת is not essential in any of these cases and is often omitted, particularly in poetry. If several definite nouns are connected together as the object of a verb or if a verb has more than one definite object, אֵת may be repeated before each of them, *I have given* אֶת־הָאָרֶץ הַזֹּאת *this land* ... אֶת־הַקֵּינִי *the Kenite* וְאֶת־הַקְּנִזִּי *and the Kenizzite,* etc., etc., Gen. 15: 18-21; *they stripped* אֶת־יוֹסֵף *Joseph* אֶת־כָּתָּנְתּוֹ *of his coat* אֶת־כְּתֹנֶת הַפַּסִּים *the full-length coat* Gen. 37: 23, Ex. 35: 11-19, Lev. 7: 3, 4, 2 Chron. 29: 18, 19; or it may stand before a part of them only, Ex. 33: 2, Deut. 12: 6, 1 Kin. 1: 44, or it may be omitted altogether, Deut. 11: 14. In a very few instances the article is

dropped after אֵת, which of itself indicates the definiteness of the noun, *he reared up for himself* אֶת־מַצֵּבָה *the pillar* 2 Sam. 18: 18; *and carver strengthened* אֶת־צֹרֵף *gilder* Isa. 41: 7, where the omission of the article is poetic, § 250; אֶת־פַּרְעֹשׁ אֶחָד 1 Sam. 26: 20 is definite in thought, if not in form, as David meant himself; Lev. 20: 14, Judg. 7: 8, 2 Sam. 4: 11, Job 13: 25, Eccl. 7: 7, Ezek. 16: 32.

c. Pronouns with אֵת: אֶת־זֹה *this ye shall eat* Lev. 11: 9; *put* אֶת־זֹה *this* (fellow) *in the prison* 1 Kin. 22: 27, Gen. 44: 29, Ps. 92: 7; אֶת אֲשֶׁר *whom they have cast into the prison* Jer. 38: 9; *he knew* אֶת אֲשֶׁר־עָשָׂה *what his youngest son had done to him* Gen. 9: 24; אֶת־מִי חָרַפְתָּ *whom hast thou reproached?* Isa. 37: 23. It does not occur before the neuter מָה; Jer. 23: 33 is only an apparent exception, since it stands before the entire expression quoted from the words of the people. It is also extended sometimes to the following words, which partake to a certain degree of the pronominal character, כֹּל *all, every*, Gen. 1: 29, 8: 21, 9: 3, 41: 48, 56, אִישׁ *any one, each* Ex. 21: 28, Num. 21: 9, אֶחָד *one* 1 Sam. 9: 3. With personal pronouns, וַיְבָרְכֵהוּ אֹתָם Gen. 32: 1, or וַיְבָרְכֵם Gen. 48: 20 *and he blessed them.*

d. A noun, about which a statement is to be made, sometimes stands absolutely and is preceded by the sign of the object, אֶת־הַבַּרְזֶל נָפַל *as for the iron, it fell* 2 Kin. 6: 5; אֶת־כָּל־אֵלֶּה צְוָיָה חָיִל *as for all these* (they were) *men of valour* Judg. 20: 44; אֶת־חֻקּוֹתַי *as for my statutes they did not walk in them* Ezek. 20: 16, 17: 21, 35: 10, 43: 7, 44: 3, Dan. 9: 13, Hag. 2: 5, Zech. 8: 17; so also in a sort of loose apposition to preceding statements Ex. 1: 14, 1 Kin. 6: 5, Ezek. 14: 22. לְ occasionally stands in a similar manner before a noun placed absolutely, לְעֵרֹם Isa. 32: 1, Ex. 27: 3, 19, 2 Chron. 7: 21, Eccl. 9: 4. Some regard אֵת as the sign of the object in such passages as בָּא הָאַרְיֵה וְאֶת־הַדֹּב 1 Sam. 17: 34, and refer to the fact that the Arabic conjunction is followed by the accusative when it is used in the sense of *together with*; more probably, however, אֵת is the preposition *with*, § 240, and the passage is to be rendered *the lion came and* (that too) *with the bear*, so Gen. 49: 25, Num. 3: 26, Josh. 17: 11, 1 Sam. 26: 16, 1 Kin. 11: 25, etc.

e. By an impersonal construction of passive verbs their subject is sometimes converted into the object, which in fact it logically is, נִתַּן אֶת־הָאָרֶץ *dandum est terram, let the land be given* Num. 32: 5, וַיֻּגַּד לְרִבְקָה אֶת־הַדְּבָרִים *and there was told to Rebekah* (i. e. some one told her) *the words of Esau* עֵשָׂו Gen. 27: 42, so Gen. 4: 18, 17: 5, Ex. 10: 8, 21: 28, 25: 28, 27: 7, Lev. 10: 18, 13: 56, 14: 48, 16: 27, Num. 14: 21, 26: 55 (but see ver. 53), Deut. 12: 22, 20: 8, Josh. 7: 15, 2 Sam. 21: 11, 22, 1 Kin. 2: 21, Esth. 2: 13, Ps. 72: 19, Prov. 16: 33, Jer. 35: 14 (but active construction ver. 16), 38: 4, 50: 20, Ezek. 16: 4, Hos. 10: 6, Am. 4: 2. This construction is sometimes extended to neuter verbs in familiar phrases, which have become associated with an active idea, אַל יֵרַע בְּעֵינֶיךָ אֶת־הַדָּבָר *let not be evil in thine eyes* (i. e. do not regard as evil) *the thing* 2 Sam. 11: 25, וַיְהִי לְ *and there was to him* (he had) אֶת־שֶׁבַע Josh. 17: 11, 1 Sam. 20, 13, Josh. 22: 17, Neh. 9: 32, so with אֵין Hag. 2: 17. In 2 Kin. 18: 30 תִּנָּתֵן אֶת־הָעִיר *the city shall be given*, the verb agrees with עִיר notwithstanding its reception of the sign of the object (אֵת

is omitted in the parallel passage, Isa. 36: 15), so Num. 5: 10. This impersonal construction is often indicated without אֵת by the lack of agreement between the verb and the noun, which shows that the latter is regarded not as the subject but as the object. So with passives Gen. 2: 23, 10: 25, 35: 26, Ex. 12: 16, 13: 7, 31: 15, Lev. 2: 8, Num. 26: 62, 28: 17, Job 22: 9, Ps. 87: 3, Isa. 21: 2, Dan. 9: 24. With הָיָה *there was*, וַיְהִי כָלִיבֶל Gen. 5: 23, 31 (but וַיִּהְיוּ vs. 14, 17, 27), 15: 17, Ex. 12: 49, 28: 32, Num. 9: 6, Deut. 21: 3, Josh. 18: 12 K'thibh, 19: 33 (but see ver. 29), Eccl. 2: 7, Isa. 8: 8.

f. The object of a verb is often omitted when it can be easily supplied from the context, וַיָּבֵא *and he brought* (them) Gen. 2: 19. Sometimes the object is a pronoun referring to something not yet mentioned, אֶרְאֶנּוּ *I shall see him*, viz. the star spoken of afterwards Num. 24: 17, or which is emphatically suppressed altogether לֹא אֲשִׁיבֶנּוּ *I will not turn it back* Am. 1: 4, leaving the imagination to supply what it is. In the language of the Hebrew grammarians an intransitive verb is פֹּעַל עוֹמֵד *a verb that stands still*; a transitive is פֹּעַל יוֹצֵא *a verb that goes out*; if it has one object, it is יוֹצֵא לְשֵׁנִי *going out to a second*, another than its subject; if it has two objects, it is יוֹצֵא לְשָׁלִישִׁי *going out to a third.*

g. Derivatives from verbs that govern a direct object, may do the same. כְּמַהְפֵּכַת אֱלֹהִים אֶת סְדֹם *like God's overthrow of Sodom* Isa. 13: 19, לִישׁוּעַת אֶת מְשִׁיחֶךָ *for the salvation of thine anointed* Hab. 3: 13, Gen. 2: 9, Ex. 9: 20, 1 Kin. 1: 40, Isa. 22: 2, Ezek. 34: 12.

§ 285. Many verbs, which are not properly transitive, are nevertheless capable of a transitive construction; thus

1. Verbs signifying plenty or want: הַבַּיִת מָלֵא הָאֲנָשִׁים *the house was full* (of) *men* Judg. 16: 27, שָׂבַעְתִּי עֹלוֹת אֵילִים *I am sated* (with) *burnt-offerings of rams* Isa. 1: 11, חָסַרְנוּ כֹּל *we lacked every thing* Jer. 44: 18, Gen. 27: 45, Prov. 3: 10. Here belongs that peculiar Hebrew idiom, which expresses abundance by such phrases as the following: תֵּלַכְנָה חָלָב *the hills shall run* (with) *milk* Joel 4: 18, Ezek. 7: 17, Ex. 3: 8, *mine eye* יֵרַד מַיִם *runneth down* (with) *water* Lam. 1: 16; עָלָה כֻּלּוֹ קִמְשׁוֹנִים *it had all come up* (with) *thorns* i. e. was overgrown with them, Prov. 24: 31, Gen. 40: 10, Isa. 5: 6.

a. In these and similar phrases the result of an action is regarded as its object; so, *a forest* צִיחַ עֲצֵי *growing up* with *trees* i. e. producing trees Eccles. 2: 6; *a righteous man's mouth* יָגִיג חָכְמָה *buddeth forth wis-*

dom Prov. 10: 31; עָבְרוּ דִבְרֵי רָע *they overflow* with *deeds of wickedness* Jer. 5: 28; וְשָׁרַץ צְפַרְדְּעִים *and it shall creep* i. e. swarm with *frogs* Ex. 7: 28.

2. Verbs signifying motion may have for their object the place which it immediately concerns, whether it be directed upon it, to it, or from it, וַנֵּלֶךְ אֵת כָּל־הַמִּדְבָּר *and we went* (through) *all the wilderness* Deut. 1: 19, and figuratively, הֹלֵךְ צְדָקוֹת *walking* (in) *righteousness* Isa. 33: 15, וַיָּבֹאוּ הָעִיר *and they came into the city* Josh. 8: 19, יָצְאוּ אֶת־הָעִיר *they went out* (of) *the city* Gen. 44: 4, עָלוּ רֹאשׁ *they went up* (to) *the top of the mountain* Ex. 17: 10, יֵרְדוּ שְׁאוֹל *they shall go down* (to) *Sheol*, Ps. 55: 16, יְמַהֲרוּ הוֹמָתָהּ *they hasten* (to) *her wall* Nah. 2: 6, Gen. 13: 10, Deut. 2: 27, Judg. 19: 18, Job 29: 3, Isa. 57: 2, Jer. 16: 8, 18: 2, 3, 44: 14, Ezek. 17: 12.

3. Intransitive verbs may, as in other languages, govern their cognate noun, חָלַמְתִּי חֲלוֹם *I have dreamed a dream* Gen. 37: 9; וַיִּסְפְּדוּ שָׁם מִסְפֵּד *and they lamented there a lamentation* Gen. 50: 10; הֶבֶל תֶּהְבָּלוּ *ye will be vain a vanity* i. e. *utterly vain* Job 27: 12; or even one from a different root if it be related or analogous in signification, חָמָה גְדוֹלָה קָצַפְתִּי *I have been zealous a great fury* Zech. 8: 2, אִישַׁן הַמָּוֶת *I shall sleep death* i. e. the sleep of death, Ps. 13: 4, Isa. 6: 11.

a. For additional examples see Gen. 1: 11, 27: 34, 43: 16, Lev. 26: 36, Josh. 22: 20, Judg. 8: 24, 2 Sam. 12: 16, 1 Kin. 1: 12, 40, Ps. 14: 5, 144: 6, Prov. 1: 19, 17: 27, Isa. 1: 13, 5: 1, 6, 8: 10, 42: 17, Jer. 17: 18, 23: 20, Ezek. 18: 3, 21: 5, 22: 29, 27: 35, Hos. 10: 4, Jon. 1: 10, 16, 4: 1, 6, Zech. 1: 2. Sometimes the expression is made more emphatic by placing the noun before the verb, 1 Kin. 2: 16, 20, Ps. 139: 22, Jer. 30: 14. In several instances the verb governs a relative which has a cognate noun as its antecedent, Gen. 27: 41, Deut. 28: 53, 1 Kin. 3: 28, Ps. 89: 51, 52, Zech. 13: 6.

4. Any verb may take as its object a noun which defines the extent of its application, חָלָה אֶת־רַגְלָיו *he was diseased in his feet* 1 Kin. 15: 23; *only* הַכִּסֵּא אֶגְדַּל *in the throne will I be greater than thou* Gen. 41: 40; *let us look one another* פָּנִים *in the face* 2 Kin. 14: 8, 11.

a. This like the Greek accusative of specification applies to any part or possession of the subject, which is particularly concerned in the action of the verb, קוֹלִי אֶקְרָא *I cry as to my voice*, with my voice Ps. 3: 5. *Thou* יָדְךָ *as to thy hand*, by thy hand, *didst cast out nations* Ps. 44: 3, which is better than to regard these as cases of explanatory apposition, *I* viz. *my voice*, *thou* viz. *thy hand*; *thou didst tread in the sea* סוּסֶיךָ *as to thy horses*, with thy horses, Hab. 3: 15, Ex. 6: 3, 1 Sam. 25: 26, 33, Ps. 17: 10, 13, עָלַי 32: 8, 60: 7, Isa. 10: 30, 26: 9; or to any circumstance which stands in general relation to it, *ye perish* דֶּרֶךְ *as to the way* Ps. 2: 12, *impoverished* תְּרוּמָה *in respect to oblation* Isa. 40: 20. Comp. after adjectives Job 11: 9, 15: 10. Sometimes this limitation or specification is made by the preposition לְ 1 Kin. 10: 23, Jer. 30: 12, or בְּ 2 Chron. 16: 12.

§ 286. 1. When a noun or pronoun is regarded as the indirect object of a verb, the relation is indicated by means of the appropriate preposition.

a. The various prepositions with which different verbs may be construed and the consequent effect upon the meaning of the latter can be learned in detail from the lexicon. A few peculiar usages may here be noted: e. g. the use of בְּ *in* (1) after such verbs as אָחַז (also direct object) *to seize* or *hold*, חֶחֱזִיק (also direct object) *to lay hold of* or *hold fast*, דָּבַק (also with לְ or אֵת) *to cleave to*, בָּחַר (also direct object) *to choose*, הֶאֱמִין (with לְ *to believe*) *to believe in*, בָּטַח (with אֶל *to trust to*) *to trust in*; the preposition in all these cases suggesting penetration of the object and adhering to it. (2) After certain verbs of sense נָגַע (also with direct object, אֶל, עַל or עַד) *to touch*, שָׁמַע (also with direct object, לְ, אֶל or עַל) *to hear*, *hearken to*; with הֵרִיחַ *to smell*, רָאָה or חָזָה *to see* it suggests that the sense is delightedly fixed upon its object, *to smell with pleasure*, *to gaze upon with delight*. (3) After verbs of motion it may have the sense of association *with*, בּוֹא בְ *to come with* i. e. *to bring*, Ps. 66: 13, הָלַךְ בְּ *to go with* i. e. *to take*, Ex. 10: 9, so עָבַד בְּ *to perform service with* or by means of any one i. e. *to impose service upon him* Ex. 1: 14. (4) In a partitive sense (the part being contained *in* the whole) after אָכַל *to eat*, Ex. 12: 43-45, Lev. 22: 11, Judg. 13: 16, לָחַם *to eat* Ps. 141: 4, שָׁתָה *to drink* Prov. 9: 5, הִשְׁקָה *to give to drink* Ps. 80: 6 and the like; מִן may be similarly used (the part taken *from* the whole) Lev. 7: 21, Deut. 26: 14, Ezr. 2: 63. (5) After verbs denoting hostility (violent collision and penetration), בָּגַד בְּ *to deal treacherously with*, נִלְחַם בְּ *to fight with*, מָעַל בְּ *to trespass against*, מָרָה בְּ (also with direct object) *to rebel against*, חָרָה בְּ (also with אֶל or עַל) anger *burned against*.

b. Verbs denoting fear or shame are followed by מִן *from*, since one instinctively turns away from that which excites these emotions, so יָרֵא, יָגֹר, חָפֵז, דָּאַג, נָבָא, עָלַץ, which also take a direct object, and בּוֹשׁ, חָפֵר, נִכְלַם etc.

c. Any verb may be followed by לְ to indicate the indirect object *to* which something is done, *he said* לָהֶם *to them* Gen. 1: 28, *I have given* נָתַתִּי

to you, ver. 29, or *for* which something is done (dative of advantage) e. g. גּוֹר *to fear for* or *on behalf of* Hos. 10: 5, קָנָא *to be zealous for*, נִלְחַם *to fight for*, הִתְפַּלֵּל *to pray for*, רִיב *plead for* etc. It is thus used pleonastically with suffixes referring to the subject of the verb לְךָ לְךָ *go for thee* i. e. *go thou*, בְּרַח לְךָ *flee thou*, נִגְזַרְנוּ לָנוּ *we are cut off for us* i. e. so far as we are concerned Ezek. 37: 11. The verb הָיָה *to be* with לְ may mean (1) *to be* or *belong to* any person יִהְיֶה לְךָ *it shall be* or *belong to thee* i. e. thou shalt have it Josh. 17: 18. (2) *to be for* or serve as any thing וְהָיָה לְאוֹת *and it shall be for a sign* Ex. 13: 16, or with לְ both of the person and the thing, *it shall be* לְךָ לְאוֹת *to thee for a sign* ver. 9, Gen. 1: 29, 47: 24, Ex. 4: 16, 10: 7. (3) *to be unto* or *to become* יִהְיֶה לְגוֹי *he shall become a nation*, Gen. 18: 18, 2: 7, 10, 24, Ex. 4: 3, 4, Isa. 21.

d. Pronominal suffixes attached to verbs ordinary represent the direct object, but are occasionally used when the objective relation is indirect, נָתַתָּה לִּי *thou hast given me the land of the south* Judg. 1: 15 for נָתַתָּה *thou hast given to me*, which occurs in the same verse; חָנֵנוּ אוֹתָם *grant them to us* Judg. 21: 22; אַגִּידָה *I would declare to him* Job 31: 37. So in a few instances after intransitive verbs, גָּדַלְנִי *he grew up to me as to a father* Job 31: 18, יִשְׁכְּנָה *shall dwell* with *thee* Ps. 5: 5, 13: 5, חֹנֶה *encamping* against *thee* 53: 6, perhaps Isa. 35: 1, see § 55. 1, Isa. 65: 5, Jer. 20: 7, comp. § 102. 2.

2. Many verbs vary their construction without any material difference of meaning according to the form of the conception in the mind of the speaker or writer, being followed by one preposition or by another or by none at all, as he views the relation as direct or indirect, and if the latter, under one aspect or another: thus, *they went out from the city* may be expressed by the direct relation, יָצְאוּ אֶת־הָעִיר Gen. 44: 4, or by the indirect, יָצְאוּ מִן־הָעִיר Josh. 8: 22; נִלְחַם *to fight* is followed by עִם *with* Josh. 10: 29, by בְּ *in* (בָּהּ *in eam*) ver. 31, by עַל *against* ver. 38, by אֶת Judg. 12: 4.

a. A number of verbs may be construed either with a direct object or with לְ *to, in reference to*, thus, אָהַב *to love* any one and *to have love* to any one, רָפָא *to cure* and *to perform a cure* for any one, הוֹשִׁיעַ *to save* and *to grant salvation* to any one, שִׁחֵת *to destroy* and *to bring destruction* to any one, הֶאֱזִין *to hear* and *to give ear to*; הִגִּיד *to tell* with or without לְ; הִצְדִּיק *to justify* takes a direct object except Isa. 53: 11 where it has לְ; הִצִּיל *to deliver* has לְ once Jon. 4: 6; so כִּבֵּד *to honour* Ps. 86: 9, Dan. 11: 38. Both constructions occur with the same verb in the same sentence 1 Kin. 1: 9, Ps. 21: 9, 47: 7; see also 2 Chron. 16: 12. By a usage which belongs for the most part to the later books לְ is sometimes prefixed to nouns explanatory of a direct object 1 Chron. 5: 26, 29: 20, 2 Chron. 25: 10, Ezr. 8: 24,

Neh. 9: 32, and sometimes to the direct object itself, Ps. 69: 6, 116: 16, Isa. 11: 9, Jer. 40: 2, Lam. 4: 5, Ezek. 26: 3, 1 Chron. 16: 37, 29: 12, 22.

b. As the object of an action may, in certain cases, be regarded as the instrument with which it is performed, some transitive verbs also admit a construction with בְּ *with*, thus תָּקְעוּ בַשּׁוֹפָר *blow the trumpet* Hos. 5: 8, וַיִּתְקַע בַּשּׁוֹפָר *and he blew with the trumpet* Judg. 3: 27; פָּרַשׂ יָדָיו *to spread forth the hands* Ps. 143: 6, but followed by בְּ *to spread forth with the hands* Lam. 1: 17; see also 2 Chron. 26: 15, Prov. 25: 20.

3. By a condensed style of expression (*constructio praegnans*) prepositions are sometimes connected with verbs, to whose meaning they are not strictly conformed; thus, motion may be suggested by the preposition though the verb of itself implies no such idea, חִלַּלְתָּ לָאָרֶץ *thou hast profaned to the ground* i. e. profaned by casting to the ground, Ps. 89: 40, 74: 7, Ezr. 2: 62, פָּחֲדוּ אִישׁ אֶל־ רֵעֵהוּ *they trembled one unto another* i. e. one turned tremblingly to another, Jer. 36: 16 נִיקְרַנֵי רֵמִים עָנִיתָנִי *thou hast answered* (by saving) *me from the horns of the wild-oxen* Ps. 22: 22. Different objects may also be attached to a verb, whose meaning is in strictness adapted only to one (*zeugma*) *thou hast shown me* (*life and*) *favour* Job 10: 12.

a. Zeugma may also occur in the case of subjects of a verb, *the roaring of the lion, the voice of the fierce lion and the teeth of the young lions are broken* Job 4: 10.

§ 287. Some verbs have more than one object, viz.:

1. The causatives of transitive verbs: וְהַאֲכַלְתִּי אֶת־ מוֹנַיִךְ אֶת־בְּשָׂרָם *and I will make thy oppressors eat their own flesh* Isa. 49: 26; לֹא הֶרְאָנוּ אֶת־כָּל־אֵלֶּה *he would not have caused us to see all these things* Judg. 13: 23; יַנְחִלֶנָּה אֶת־יִשְׂרָאֵל *he shall cause Israel to inherit it* Deut. 1: 38, 3: 24, Num. 20: 26, Judg. 1: 24, Ps. 25: 4, 45: 5, Jer. 23: 22.

a. This applies to the causatives of verbs of plenty or want, Gen. 42: 25, Ps. 8: 6, Jer. 13: 13, Ezek. 9: 7, or of motion, § 285, Deut. 1: 22, 2 Sam. 15: 25, Job 28: 11, Cant. 1: 4.

2. Verbs whose action may be regarded under different aspects as terminating upon different objects, or which, under the rules already given, may take a direct object of more than one kind, *all* אֲשֶׁר צִוָּה אֹתוֹ *which God commanded him* Gen. 6: 22; לְהוֹרֹת אֶת־בְּנֵי יִשְׂרָאֵל אֵת כָּל *to teach the children of Israel all the statutes* Lev. 10: 11; הִכִּיתָ אֶת־כָּל־אֹיְבַי לֶחִי *thou hast smitten all my enemies on the cheek* Ps. 3: 8; שְׂאוּ־יְדֵכֶם קֹדֶשׁ *lift up your hands to the sanctuary* Ps. 134: 2; וְהָמָם מְהוּמָה *and he shall discomfit them a discomfiture* Deut. 7: 23.

a. Some verbs take a direct object of both person and thing as שָׁאַל *to ask* Deut. 14: 26, Isa. 45: 11, Hag. 2: 11, יָסַר *to instruct* Prov. 31: 1, צִוָּה *to command* Ex. 4: 28, Deut. 1: 18, עָנָה *to answer* 1 Sam. 20: 10, Job 9: 3, גָּמַל *to treat* well or ill, Gen. 50: 15, 1 Sam. 24: 18 (comp. גָּמַל Ps. 21: 4, שִׁלַּם Prov. 13: 24), and the like. Or the second object may be that of place after verbs implying motion 2 Chron. 6: 38, Nah. 1: 8; or of a noun cognate to the verb, Gen. 49: 25, Ex. 3: 9, 1 Sam. 1: 6, 1 Kin. 12: 8, Isa. 14: 6, 22: 17; or of specification, Gen. 3: 15, 37: 21, Deut. 22: 26, 33: 11, 1 Kin. 19: 21, Ps. 17: 11, perhaps 68: 22, § 256. 3. *b*, Jer. 2: 16, 40: 14. A verb may even have three objects of different kinds Judg. 15: 8.

3. The instrument of an action, the material used in its performance, its product, or its result, is often regarded as its secondary or remote object, וַיִּרְגְּמוּ אֹתוֹ אֶבֶן *and they overwhelmed him with stones* Lev. 24: 23; וְחָגַרְתָּ אֹתָם אַבְנֵט *and thou shalt gird them with a belt* Ex. 29: 9; *thy seed* אֲשֶׁר־תִּזְרַע אֶת־אַדְמָתֶךָ *with which thou shalt sow the ground* Isa. 30: 23; וַיִּיצֶר אֶת־הָאָדָם עָפָר *and he formed the man of dust* Gen. 2: 7; אֲשֶׁר שְׁלַחְתִּיו *for which I have sent it* Isa. 55: 11; וַיִּבֶן אֶת־הָאֲבָנִים מִזְבֵּחַ *and he built the stones into an altar* 1 Kin. 18: 32.

a. The instrument of an action regarded as its remote object: Num. 24: 8, 2 Chron. 14: 6, Ps. 5: 13, 18: 33, 32: 7, 104: 6, Isa. 37: 6, 41: 2, Ezek. 13: 22, 18: 7, Mal. 2: 13. The material: Ex. 24: 5, 25: 39, 26: 31, 37: 10, 38: 3, 39: 30, 1 Kin. 6: 21, 22, 7: 48-50, Ezek. 13: 10. The product: Gen. 27: 37, מְחָשָׁה Num. 10: 2, רִקָּע 17: 3, אָשֵׁר Deut. 15: 14, אָבַק 28: 24, רָאשִׁים Judg. 7: 16, בְּרָכוֹת Ps. 21: 7, שֶׂבַע 74: 2, Isa. 37: 26, קִיר Ezek. 4: 3. The result: *I will make all thine enemies* עֹרֶף *back*, oblige them to turn their backs in flight Ex. 23: 27, Ps. 18: 41, 21: 13; *I will not make you* כָּלָה

destruction, destroy you Jer. 5: 18, 46: 28, Ezek. 11: 13, 20: 17. The instrument may likewise be indicated by the preposition בְּ *by* or *with* Lev. 8: 32, Josh. 10: 11; the material by מִן *from* or *out of* Gen. 2: 19, Ex. 39: 1; the product by לְ *to, into* Isa. 41: 15, Jer. 1: 18.

4. Some verbs may govern the subject and predicate of a subordinate clause, לָדַעַת כֶּסֶל *to know wickedness* (to be) *folly* Eccl. 7: 25, the latter, if it be an adjective or participle, will remain without the article, § 263, שָׁמַעְתִּי אֶפְרַיִם מִתְנוֹדֵד *I have heard Ephraim bemoaning himself* Jer. 31: 18, אֹתְךָ רָאִיתִי צַדִּיק *thee have I seen righteous* Gen. 7: 1. Or they may govern two nouns in apposition, the second of which suggests a comparison or is explanatory of the aspect under which the first is viewed, *they bend* אֶת־לְשׁוֹנָם קַשְׁתָּם *their tongue* as *their bow* Jer. 9: 2, 1 Kin. 11: 19, Isa. 42: 25, Hos. 14: 3, Am. 5: 1.

a. The predicate object frequently indicates a state or condition, *eat it* נִבְשָׁל *unlearned* Lev. 10: 12, *take the king* חַי *alive* Josh. 8: 23, 9: 12, 1 Sam. 8: 1, 2 Kin. 8: 13, Prov. 1: 12. The presence of the article in such cases would show that the word was not a predicate, *when he saw* אֶת־ הַמַּלְאָךְ הַמַּכֶּה *the angel that smote* 2 Sam. 24: 17; מַכֶּה would mean that *he saw the angel smiting*, in the act of so doing, Gen. 21: 9, 27: 6, 37: 17, Ex. 14: 30, Num. 7: 89, 11: 10, 22: 6, 23, 31, 2 Kin. 2: 10, 8: 12, 19: 8, 1 Chron. 15: 29, Esth. 5: 13. In 2 Kin. 9: 25 זְכֹר אֵלַי וְאַתָּה אֵת רְכֻבִים *remember me and thee riding* the pronouns are in their separate form and אֵת is attached to the predicate participle. Such a clause may be subordinated to קוֹל uttered as an exclamation or to שָׁמַע as well as to שָׁמַע itself, קוֹל דּוֹדִי דוֹפֵק *the sound of my beloved knocking!* equivalent to *hark!* or *I hear my beloved knocking* Cant. 5: 2, Gen. 4: 10, 1 Kin. 1: 41; וַיִּשְׁמְעוּ אֶת־קוֹל יְהוָה אֱלֹהִים מִתְהַלֵּךְ *and they heard the sound of Jehovah God walking* Gen. 3: 8, Deut. 4: 33, 5: 23, Isa. 6: 8. רָאָה *to see*, when the predicate is an adjective, admits a twofold construction, either *he saw* אֶת־ הָאוֹר כִּי־טוֹב *the light that* it was *good* Gen. 1: 4, 12: 14, 13: 10, or *saw* כִּי טוֹב הָעֵץ *that the tree* was *good* 3: 6.

5. If an active verb is capable of governing a double object, its passive may govern the more remote of them, וּנְמַלְתֶּם אֵת בְּשַׂר עָרְלַתְכֶם *and ye shall be circumcised in the flesh of your foreskin* Gen. 17: 11, וַתִּמָּלֵא הָאָרֶץ אֹתָם *and the land was filled with them* Ex. 1: 7, שָׁלוּחַ קָשָׁה *sent* (or charged) *with a painful* message 1 Kin. 14: 6.

a. Thus the passive of a causative, Job 7: 3; of a verb implying motion, Gen. 12: 15; of a verb of plenty or want, Isa. 2: 7, 8; a passive having as its object a thing, Ex. 34: 34; a cognate noun, Jer. 14: 17; object of specification, 2 Sam. 15: 32, Dan. 9: 25; instrument, 1 Sam. 17: 5, 1 Kin. 22: 10, Isa. 1: 20; material, 1 Kin. 6: 7, Hab. 2: 19; product, Ex. 25: 31, חָקָה Lev. 10: 14, Isa. 24: 12, Mic. 3: 12; a predicate, *it shall be eaten* תֵּאָכֵל *unleavened* Lev. 6: 9. Sometimes the more remote object is made the subject of the passive verb which then governs the nearer object, וְהָרְאָה אֶת־ הַכֹּהֵן *and it shall be shown the priest* Lev. 13: 49, but on the other hand אֲשֶׁר הָרְאֵיתָ *which thou wast shown* Ex. 26: 30.

b. The agent of a passive verb may be indicated by לְ as the one *to* whom the action belongs, נֶחְשַׁבְנוּ לוֹ *we are accounted by him strangers* Gen. 31: 15, 14: 19, Ex. 12: 16, 1 Sam. 2: 3 K'ri, 15: 13, 23: 21, Neh. 13: 26, יֵחָבֵל לוֹ probably *shall be held under pledge by it* as its debtor Prov. 13: 13, 14: 20, שָׁמוּר לִבְעָלָיו *kept by its owner*, Eccl. 5: 12 (but שָׁמוּר־לְךָ *kept for thee* 1 Sam. 9: 24), Jer. 8: 3; or less frequently by מִן as the one *from* whom the action proceeds, *why are times* נִשְׂתְּרוּ לְאֵ־נִצְפְּנוּ *not reserved by the Almighty?* Job 24: 1, 28: 4, Ps. 37: 23, Eccles. 12: 11, Dan. 8: 11 K'ri. It is only in the later books of the Bible that the passive construction is adopted to any extent as a substitute for the active, Neh. 6: 1, 7, Esth. 4: 3.

Adverbial Expressions.

§ 288. The predicate of a proposition may be further qualified

1. By adverbs, which commonly stand after the words to which they refer, וְהִנֵּה־טוֹב מְאֹד *and behold* (it was) *very good* Gen. 1: 31; וַיִּכְעַס חָרְבֵּה *and he was greatly provoked* Neh. 3: 33; *I am* שְׂכָרְךָ הַרְבֵּה מְאֹד *thy exceeding great reward* prop. *thy reward very much* Gen. 15: 1.

a. Adverbs may for emphasis precede the words, to which they belong, Ps. 47: 10. Adjectives belonging to the subject may of course be qualified in the same manner as though they were found in the predicate.

2. By nouns used absolutely to express the relations of time, place, measure, number, or manner.

a. Thus time when: עֶרֶב וְבֹקֶר וְצָהֳרַיִם *evening and morning and noon will I pray* Ps. 55: 18; *tarry here* הַלַּיְלָה *to-night* Num. 22: 8; *Gideon came* רֹאשׁ הָאַשְׁמֹרֶת *at the beginning of the watch* Judg. 7: 19, Ex. 34: 22, Deut. 4: 10, 1 Kin. 19: 8, Ps. 74: 2, Jer. 18: 7, 9, 28: 16, Hos. 7: 5, Zech. 1: 8; once in the phrase *from generation* דֹּר *to generation* Ex. 17: 16. Time how long: *and he shall shut up the house* שִׁבְעַת יָמִים *seven days* Lev. 14: 38: *the land rested* שְׁמוֹנִים שָׁנָה *eighty years* Judg. 3: 30, Gen. 5: 3, 14: 4, Lev

26: 34, 35, Deut. 4: 9, 2 Sam. 20: 4, Ps. 45: 7, sometimes with אֵת when definite Ex. 13: 7 comp. ver. 6, Deut. 9: 25.

b. The place where: the absolute use of nouns in this sense is most frequent in the familiar words, פֶּתַח *at the door of* Gen. 18: 1, Judg. 9: 35, בַּיִת *at the house of* Gen. 38: 11, Num. 30: 11, 1 Kin. 16: 32, and a few proper names compounded with the latter, בֵּית־לֶחֶם *at Bethlehem* 2 Sam. 2: 32, בֵּית־אֵל *at Bethel* Hos. 12: 4; other examples are more sporadic Josh. 1: 4. 1 Sam. 2: 29, 1 Kin. 8: 43, Job 22: 12, מִצְרַיִם Lam. 5: 6, *appear* אֶת־פְּנֵי *at the face of the Lord* Ex. 34: 23 (comp. 23: 17 אֶל־פְּנֵי). The place whither: Gen. 31: 21, mostly after verbs of motion, § 285. 2, Gen. 43: 18, 1 Sam. 5: 12, Ps. 139: 8.

c. Measures of space: שְׁלֹשׁ אַמּוֹת גָּבֹהַּ *three cubits high* Ezek. 41: 22; חֲמֵשׁ אַמּוֹת אֹרֶךְ *five cubits as to* (in) *length* Ex. 27: 1; *he went* דֶּרֶךְ יוֹם *a day's journey* 1 Kin. 19: 4. Weight: 2 Sam. 14: 26.

d. Number: שֶׁבַע שָׁנִים פְּעָמַיִם *return seven times* 1 Kin. 18: 43; *he offered sacrifices* מִסְפַּר כֻּלָּם *according to the number of them all* Job 1: 5.

e. Manner, answering to the Greek adverbial accusative: *ye shall dwell* לָבֶטַח *in security* Deut. 12: 10; *ye shall not go* רוֹמָה *loftily* Mic. 2: 3; *the tribes went up* עֵדוֹת לְיִשְׂרָאֵל *according to a law of Israel*, or this may be in apposition with what precedes, it is *a law of Israel* Ps. 122: 4; *thou shalt not go there* יִרְאַת שָׁמִּיר *for fear of briers* Isa. 7: 25; *to serve him* שְׁכֶם אֶחָד *with one consent* prop. *shoulder* Zeph. 3: 9, 2 Sam. 23: 3, 2 Kin. 5: 2, Ps. 144: 12, Prov. 10: 4, Jer. 31: 7, 32: 11, Lam. 1: 9, Hos. 12: 15, 14: 5, Zech. 2: 8.

3. By nouns preceded by a preposition forming a qualifying phrase.

a. When successive nouns are governed by the same preposition, the preposition will be repeated before each, if the particulars are regarded separately, Ex. 7: 28, 29, 9: 3, 33: 1 (hence the sing. suff.), Num. 19: 16, 18, 19, 1 Sam. 14: 15, 2 Sam. 6: 5, 2 Kin. 23: 4, 5, 2 Chron. 8: 13, Jer. 9: 24, 25, 29: 18, but not if they are viewed together in the mass, 1 Sam. 27: 8, 2 Chron. 8: 7, Ezr. 3: 12, Job 19: 24, Dan. 9: 6. The preposition may be repeated before nouns in apposition כַּעֲבָדֶי כַּאֲשֶׁלִּים 2 Sam. 18: 5, or not הֹרַי . . בָּם Hab. 3: 15; and in poetry is sometimes to be supplied from a parallel clause, Job 34: 10, Isa. 15: 8, 61: 7, Mic. 7: 12.

Neglect of Agreement.

§ 289. The general rule that verbs, adjectives, and pronouns agree in gender and number with the noun to which they respectively relate, is subject to some remarkable exceptions. These are for the most part due to two principal reasons. First, regard is had to the

sense rather than to the form. And secondly, when the predicate precedes its noun or is separated from it by intervening words, the accidents of gender and number in the subject may not have engaged the thoughts before it is uttered, or attention may have been diverted from them by words spoken since; in this case there is a natural tendency to adopt a primary in preference to a secondary form, that is to say, the singular may be used where strict conformity to the subject would require the plural, and the masculine may in like manner take the place of the feminine.

1. When a plural subject is viewed in its totality, rather than in its several parts, related words may be put in the singular.

a. Thus, בָּאָ דְבָרֶיךָ *let thy words come to pass* Judg. 13: 12, יָשָׁר מִשְׁפָּטֶיךָ *upright are thy judgments* Ps. 119: 137, אֱנוּשָׁה מַכּוֹתֶיהָ *her wounds are incurable* Mic. 1: 9, 1 Kin. 10: 12, Isa. 32: 11, 59: 12, Jer. 4: 14, 12: 4, 51: 48, Zech. 6: 14. When a predicate consists of several verbs or adjectives, one of which precedes and the rest follow the noun, the latter commonly agree with it in number, while the first may be put in the singular, וַיִּקְרָא הַשֹּׁעֲרִים וַיַּגִּדוּ *and the porters called and told* 2 Kin. 7: 11, Esth. 9: 23, Ezek. 14: 1.

2. Or if a plural subject is viewed distributively and regard is had to each particular included in it, related words may be put in the singular.

a. Thus, מְבָרֶכֶיךָ בָרוּךְ *they that bless thee shall each be blessed* Num. 24: 9, מְחַלְלֶיהָ מוֹת יוּמָת *they who profane it shall* every one *be put to death* Ex. 31: 14, צְדָקַת צַדִּיקִים יָסִירוּ מֶנּוּ *they take away the righteousness of the righteous from each of them* Isa. 5: 23. Examples in verbs, יָבֹן Deut. 18: 3, Job 6: 20, Prov. 14: 1, Isa. 34: 13, Jer. 48: 41, Ezek. 39: 15, Nah. 3: 7, Hab. 2: 6, Zech. 11: 5. Pronouns, Josh. 2: 4, 1 Chron. 29: 8, Ps. 62: 5, Jer. 44: 9, Zech. 14: 12.

3. Nouns, which are plural in form but singular in signification, commonly have verbs, adjectives and pronouns agreeing with them in the singular.

a. Thus, בָּרָא אֱלֹהִים *God created* Gen. 1: 1, בְּעָלָיו יוּמָת *its owner shall be put to death* Ex. 21: 29, אֲדֹנִים קָשֶׁה *a hard master* Isa. 19: 4, תִּתְחַדֵּשׁ נְעוּרֶיךָ *thy youth is renewed* Ps. 103: 5. When the word אֱלֹהִים refers to

false deities, the sense is plural and it is construed accordingly, כֹּה־יַעֲשׂוּן אֱלֹהִים *so may the gods do* 1 Kin. 19: 2. This polytheistic plural is used even where a single idol is referred to Ex. 32: 4, 8; but see Neh. 9: 18. But where it refers to the true God, it is with few exceptions construed in the singular. Yet see Gen. 20: 13, 35: 7, Ex. 22: 8, Deut. 5: 23, Josh. 24: 19, 1 Sam. 17: 26, 36, 2 Sam. 7: 23, Jer. 10: 10, 23: 36; here and in some similar passages there is a formal agreement in the plural, perhaps because attention is directed to the supreme Being in general and to the fulness and variety of the divine perfections without specific reference to the divine unity. Comp. Gen. 1: 26, 11: 7, Ps. 11: 7, 58: 12, Isa. 6: 8.

4. Plural names of irrational objects of either gender may be joined with the feminine singular.

a. Thus, בְּהֵמַת שָׂדָי תַּעֲלֹג *the beasts of the field pant* Joel 1: 20, תְּנַבְּלֵם סְבִיבוֹתֶיהָ *its floods wash away* Job 14: 19, חֲבָלִים אֲחָזָתַם *pangs have seized her* Jer. 49: 24, תַּנִּים רִבְצָה *jackals, their lair* Isa. 35: 7, Gen. 49: 22, 1 Sam. 4: 15, Job 12: 7, 27: 20, Ps. 18: 35, 37: 31, 44: 19, 73: 2 K'thibh. In objects devoid of personality the individual is of small account and may be easily sunk in the mass. A *pluralis inhumanus* may consequently be regarded as equivalent to a collective and construed with the singular, the feminine being adopted as a substitute for the neuter, § 198. *a.* The same principle prevails in the construction of neuter plurals in Greek, *τὰ ζῶα τρέχει.*

5. Collective nouns may have verbs, adjectives and pronouns agreeing with them in the plural.

a. Thus, וַיְמַהֲרוּ הָעָם וַיַּעַבְרוּ *and the people hasted and passed over* Josh. 4: 10, צֹאן אֲבֵדוֹת *lost sheep* Jer. 50: 6, כָּל־הָעֵדָה כֻּלָּם קְדֹשִׁים *all the congregation, all of them are holy* Num. 16: 3, 27: 3, 35: 25, 1 Sam. 17: 28, 2 Sam. 24: 17, Jer. 8: 3, 13: 10, 48: 36. Where a collective is regarded as one body, it is construed as a singular; when it is contemplated with reference to the individuals embraced within it, all related words are put in the plural, נִגַּשׂ הָעָם וַיִּתְחַבְּאוּ הָעָם *the people was oppressed and the people hid themselves* 1 Sam. 13: 6, Ezek. 14: 22. Nouns not properly collectives, used in a collective sense, are similarly construed, Ex. 1: 10, Judg. 7: 7, 1 Sam. 12: 21, 1 Kin. 5: 17, 2 Kin. 7: 10, Job 39: 19, 21, Ps. 119: 103, Prov. 28: 1, Isa. 14: 11, 28: 3, Ezek. 17: 23.

b. When a predicate consists of more than one verb or adjective, the first sometimes agrees with it formally in the singular and the rest logically in the plural, וַתִּשָּׂא כָּל־הָעֵדָה וַתִּתְּנוּ אֶת־קוֹלָם *and all the congregation lifted up and uttered their voice* Num. 14: 1; וַיַּאֲמֵן הָעָם וַיִּשְׁמְעוּ *and the people believed and they heard* Ex. 4: 31, Gen. 46: 26, Judg. 1: 4, 1 Kin. 16: 16.

c. The noun אֶרֶץ *land, earth,* which is properly a feminine singular, may, when it is put for its inhabitants, be construed with the masculine plural, Gen. 41: 57, 1 Sam. 14: 25, 2 Sam. 15: 23, Ps. 66: 4. Names of na-

tions borrowed from those of their progenitors, as Israel, Edom, Amalek, may be strictly construed in the masculine singular, Ex. 17: 11, Am. 1: 11, or as a collective in the masculine plural, Hos. 8: 2, Ob. ver. 6, 2 Sam. 10: 17, or again in the feminine singular, whether this arises from a prominent reference to the land or from the frequent personification of a people as a maiden, 2 Sam. 10: 11, Jer. 13: 19, 49: 17, Nah. 2: 1, comp. 1 Sam. 27: 8; so עַם *people* in the following examples, חָטָאת עַמְּךָ *thy people has done wrong* Ex. 5: 16, יוֹשֶׁבֶת הָעָם *the people dwelling* Judg. 18: 7, Jer. 8: 5. Different constructions may be united in the same passage, Jer. 48: 15, Hos. 14: 1. In 1 Sam. 17: 21 the verb agrees not with יִשְׂרָאֵל but with מַעֲרָכָה, which is in apposition with it.

6. Masculine verbs, adjectives and pronouns are sometimes used when females are spoken of, or when the nouns to which they refer are feminine, from a neglect to note the gender where no stress is laid upon it.

a. Thus, וַתְּהַלְלוּהָ *and they* (queens and concubines) *praised her* Cant. 6: 9; *Jehovah deal kindly* יַעַשׂ עִמָּכֶם *with you* (Ruth and Orpah) *as* עֲשִׂיתֶם *ye have dealt* Ruth 1: 8; מֵתִי *my dead* (Sarah) Gen. 23: 4. This neglect of gender is most frequent in pronouns both as referring to females, Ex. 1: 21, 2: 17, Num. 36: 6, Judg. 11: 34, 19: 24, 21: 12, 22, 1 Sam. 6: 7, 2 Sam. 6: 22, and to feminine nouns, Ex. 11: 6, 22: 25, Lev. 6: 8, 27: 9, Num. 3: 27, 33, Deut. 27: 2, 5, 1 Sam. 10: 18, Isa. 34: 17. It is comparatively rare in verbs, (many apparent instances are impersonal constructions, § 284. *c*), נָשָׂא 1 Sam. 2: 20, 25: 27, 1 Chron. 2: 48, תַּחְבְּרֵהוּ Isa. 57: 8, תְּהוֹמֵל Jer. 3: 5, תַּחְבֹּאנָה Ezek. 22: 4, Job 3: 24, 16: 22, unless they precede the subject, לֹא־יָכְלָה אֹתָם הָאָרֶץ *the land could not bear them* Gen. 13: 6, חָרְדוּ שַׁאֲנַנּוֹת *tremble ye careless women* Isa. 32: 11, 1 Kin. 8: 31, 22: 36, 2 Kin. 3: 26, 13: 20, Eccl. 7: 7, Isa. 14: 11, 47: 11, Jer. 51: 46. In Isa. 14: 9, 33: 9 the nearer verb agrees with its noun, while the more remote does not; so in adjectives 1 Kin. 19: 11, but the reverse Dan. 1: 15. Both gender and number neglected, 2 Kin. 12: 14, Job 42: 15, Ps. 57: 2, Mic. 2: 6. Lack of agreement in adjectives and participles, 1 Kin. 22: 13, Ps. 119: 137, 2 Chron. 3: 11. A feminine predicate attached to a masculine noun Eccl. 8: 11, 10: 15 is anomalous.

§ 290. **1.** When a compound subject, § 247. 1, is regarded as forming one whole the predicate is put in the singular; otherwise it may be put in the plural referring to them all, or it may agree with the nearest noun or with the principal word to which the rest are subordinate.

a. Singular predicate: כֶּסֶף וְזָהָב יִרְבֶּה *silver and gold is multiplied* Deut. 8: 13, Gen. 9: 2, 1 Sam. 20: 31, יָחֵיל 1 Kin. 5: 8, 6: 7, Neh. 6: 12, Esth. 4: 3, Jer. 14: 15, 49: 24, Hos. 4: 11, so attributive Josh. 11: 4 and

pronoun Gen. 10: 12. Plural predicate: Ex. 5: 1, 7: 20, 17: 10, Judg. 8: 12, עָלִיתָ 1 Sam. 31: 7, even after nouns connected by אוֹ *or* Deut. 22: 1, 4, so pronouns Lev. 13: 38. Agreement with nearest noun: *ye and your wives* תְּכַבֵּרְנָה *have spoken* Jer. 44: 25, Num. 12: 1, Deut. 13: 7, Job 19: 15, 28: 18. With principal word: אֲנִי וְנַעֲרֹתַי אָצוּם *I and my maidens will fast* Esth. 4: 16, עַבְדֵי דָוִד וְיוֹאָב בָּא *the servants of David and Joab came* 2 Sam. 3: 22, 16: 18, 20: 10, Gen. 3: 8, 7: 7, 14: 15, Ex. 1: 6, 21: 4, 1 Sam. 25: 42, 1 Kin. 1: 41, 2 Kin. 4: 7, 2 Chron. 11: 14, Jer. 41: 16. Singular predicate before a compound subject and plural after: Gen. 9: 23, 14: 8, 33: 7, Ex. 4: 29, 7: 10, 10: 3, 1 Sam. 27: 8, Jer. 39: 1, 4, 43: 2, comp. Gen. 11: 29, Num. 3: 4.

2. If a predicate refers equally to two words of different genders, it will be put in the masculine in preference to the feminine, אַבְרָהָם וְשָׂרָה זְקֵנִים *Abraham and Sarah were old* Gen. 18: 11, 24: 55, Ex. 9: 19, Lev. 3: 1, Esth. 4: 14, Ps. 55: 6, Prov. 27: 9, Jer. 22: 26, 30: 19, Joel 1: 9, 13; if they are of different persons, the predicate will be put in the second in preference to the third, and in the first in preference to either of the others, אֲנִי וְיוֹנָתָן בְּנִי נִהְיֶה *I and Jonathan my son will be* 1 Sam. 14: 40, 20: 23, אַתָּה וְאַהֲרֹן אָחִיךָ וְדִבַּרְתֶּם *thou and Aaron thy brother and ye shall speak* Num. 20: 8.

§ 291. The plural is sometimes used indefinitely, where only one is intended.

a. Thus, *they hated him for* חֲלֹמֹתָיו *his dreams*, though he had told them but one Gen. 37: 8, בַּמַּקֵּלוֹת *with staves*, a staff 1 Sam. 17: 43, Gen. 8: 4, 13: 12, 19: 29, 21: 7, בְּנֹלֵדָתִי 46: 15, יָלְדָה Ex. 21: 22, Num. 26: 8, Judg. 12: 7, אֲרָלוֹת 14: 5, 2 Chron. 16: 14, Job 19: 1, 21: 32, Zech. 9: 9. The singular may also be used distributively, where the plural is intended, *they two dreamed* חֲלֹם *a dream*, Gen. 40: 5.

§ 292. Nouns in the dual have verbs, adjectives, and pronouns, agreeing with them in the plural, עֵינֵי לֵאָה רַכּוֹת *the eyes of Leah were tender* Gen. 29: 17.

§ 293. If two or more nouns are united in the construct state the predicate ordinarily agrees with the first as the leading word in such combinations: it may, however, agree with the second, if that is the more important, or the predicate might with propriety be referred

directly to it, שְׂדֹ֣ת חֶשְׁבּ֔וֹן אֻמְלָ֑ל *the fields of Heshbon languish* Isa. 16: 8, נִמְצְאוּ֙ דַּ֣ם נַפְשׁ֔וֹת אֶבְיוֹנִ֖ם *is found the blood of the souls of the poor* Jer. 2: 34, 1 Kin. 17: 16, Job 21: 21, 29: 10, 38: 21.

a. The predicate agrees generally though not invariably with the second noun when the first is כֹּל, or an abstract expressing a quality of that which follows, וַיִּֽהְי֣וּ כָל־יְמֵי־שֵׁ֔ת *and all the days of Seth were* Gen. 5: 8, וַתֵּצֶ֥אנָה כָל־הַנָּשִׁ֖ים *and all the women went out* Ex. 15: 20, מִבְחַ֣ר שָׁלִשָׁ֔יו טֻבְּע֖וּ *the choice of his captains were drowned* ver. 4, Job 32: 7, 33: 21 K'thibh, Isa. 22: 7, Hab. 2: 8.

§ 294. The abrupt changes of the person from the third to the first or second, and *vice versâ*, which are especially frequent with the prophets and psalmists, Isa. 1: 29, Ps. 81: 15-17, are due to the boldness and vividness of their conceptions, in virtue of which they often pass in the course of the same sentence from speaking of God to speaking in his name, and from describing men to directly addressing them.

a. Examples of change of person referring to God, Ps. 18: 48, 49, Isa. 44: 24, 25; to men, Ruth 4: 4, 1 Sam. 6: 4, Ps. 49: 19, 20, 91: 13, 14, Isa. 5: 8, 31: 7, 33: 2, Jer. 12: 13, Ezek. 13: 4-7, Hab. 2: 15; the same person used successively of God and man, Ex. 7: 17, Zech. 2: 13-15. The language of address may be continued in the third person, when a noun or participle is introduced as a vocative, קְחוּ֩ מַחְתֹּתָ֨ם וְכָל־עֲדָתֹ֜ו *take you censers, Korah and all his company* Num. 16: 6, 1 Kin. 22: 28, Job 17: 10, 18: 4, Ps. 18: 51, 65: 7, Isa. 10: 5, 22: 16, 48: 1, 54: 1, Dan. 9: 4, Obad. ver. 3, Mic. 1: 2; a superior may be respectfully addressed in the third person 2 Sam. 14: 17. So a person may speak of himself in the third person Job 12: 4, 13: 28, especially in polite phrase as 'thy servant', 'thy handmaid' 2 Sam. 17: 38, 1 Kin. 1: 17, 27. Change of person may also be occasioned by introducing the language of others with no formula of citation Job 21: 19, or by passing from direct to indirect quotation Job 19: 28, 22: 17, 35: 3. The occasional combination of the pronoun of the first person with a verb in the third is to be explained by an ellipsis, הִנֵּ֥ה יָסַ֖דְתִּי *behold I* (am he who) *has laid* Isa. 28: 16, הִנֵּ֥ה יֹסַ֖פְתִּי *behold I* (am he who) *will add* 29: 14, 38: 5, Ps. 6: 3.

b. A different turn is sometimes given to a sentence from that which was apparently intended at first, so that there is a lack of formal correspondence between one part and another (anacoluthon), Gen. 3: 22, 23, 23: 13, Num. 15: 29, 35: 23, Job 11: 13.

§ 295. In Hebrew as in other languages there is the

occasional ellipsis of a word which can be readily supplied from the context, לַמּוֹעֵד אֲשֶׁר שִׁבְּחַאֵל *for the appointed time which Samuel* appointed 1 Sam. 13: 8, Deut. 11: 2, 1 Kin. 11: 25, 2 Kin. 25: 10 comp. Jer. 52: 14, 2 Chron. 34: 22, Zech. 7: 7.

a. In poetry one parallel clause is frequently to be supplied from another, Job 20: 2, 22: 23, 27: 14, 39: 27, 42: 3, Ps. 18: 42, 20: 8, 113: 5. 6, 127: 3, Prov. 23: 17, Isa. 48: 11 (or supply שֵׁם from ver. 9), 63: 18 (or הָאָרֶץ), Dan. 12: 3, Zech. 9: 17.

Repetition of Words.

§ 296. The repetition of nouns may denote

1. Distribution, שָׁנָה שָׁנָה *year by year* Deut. 14: 22, בַּבֹּקֶר בַּבֹּקֶר *in the morning, in the morning* i. e. *every morning* 2 Sam. 13: 4, 2 Chron. 13: 11, Isa. 28: 19, אִישׁ־אֶחָד *one man for each tribe* Josh. 3: 12, 4: 2; so with numeral adjectives, § 255. 4, שִׁבְעָה שִׁבְעָה *by sevens* Gen. 7: 2, Num. 3: 47, Zech. 4: 2, and adverbs, מְעַט מְעַט *little by little* Ex. 23: 30.

a. So also שָׁנָה בְּשָׁנָה *year by year* 1 Sam. 1: 7, שָׁנָה אַחֲרֵי שָׁנָה *year after year* 2 Sam. 21: 1; יוֹם יוֹם Gen. 39: 10, יוֹם בְּיוֹם 1 Chron. 12: 22, יוֹם יְיוֹם Esth. 2: 11, and once without repetition יוֹם Jer. 7: 25 *daily, day by day; the breadth* (of the court) חֲמִשִּׁים בַּחֲמִשִּׁים *fifty* (cubits) at each end and so on throughout Ex. 27: 18; אִישׁ אִישׁ *any one* or *every one* Ex. 36: 4, Lev. 18: 6, 20: 2, 22: 4, 18, 24: 15, Num. 1: 4, 4: 19, 49, Ezek. 14: 4. Additional examples, Num. 13: 2, 17: 17, Josh. 21: 40, 22: 14, 1 Chron. 9: 27.

2. Plurality, דּוֹר־דּוֹר *generation and generation* i. e. *many generations* Deut. 32: 7, צַו לָצָו צַו לָצָו קַו לָקָו קַו לָקָו *precept upon precept, precept upon precept, line upon line, line upon line* Isa. 28: 10, 13, בְּאֵרֹת בְּאֵרֹת *pits on pits* Gen. 14: 10; or with the implication of diversity, אֶבֶן וָאָבֶן *a weight and a weight* i. e. *weights of two sorts* Deut. 25: 13, לֵב וָלֵב *a double heart* Ps. 12: 3.

a. So also דּוֹר דּוֹר *generation, generation* Ex. 3: 15, Prov. 27: 24 K'thibh, דּוֹר דּוֹרִים *generation, generations* i. e. *many generations* Ps. 72: 5, 102: 25, Isa. 51: 8. Additional examples, Gen. 25: 23, Judg. 5: 22, 1 Kin. 6: 27, 2 Kin. 3: 16, 21: 16, 1 Chron. 28: 14-17, 2 Chron. 11: 12, Ezr. 10: 14, Esth.

1: 7, 3: 12, 4: 13, 8: 17, Eccl. 1: 4, Ezek. 40: 41, Joel 4: 14; מִי וָמִי *who and who* i. e. what different persons Ex. 10: 8. Phrase repeated to indicate repetition, Ex. 26: 21, 25, 28: 34, Num. 7: 11, 17: 21, Jer. 51: 46.

3. Emphasis or intensity, צֶדֶק צֶדֶק *justice, justice* i. e. *nothing but justice* Deut. 16: 20, עָמֹק עָמֹק *exceeding deep* Eccl. 7: 24; so with adverbs, בִּיאֹד בִּיאֹד *mightily, mightily* Gen. 7: 19, and even a conjunction, לָכֵן וְכִי־כֵן *because even because* Lev. 26: 43.

a. The name repeated in urgent calling, Gen. 22: 11, 46: 2, Ex. 3: 4. Emphatic repetitions, Deut. 2: 27, 28: 43, Judg. 11: 25, 2 Sam. 13: 25 (אַל), 20: 20, 2 Chron. 4: 3, Jer. 44: 9, Lam. 1: 16, Ezek. 40: 5, with the suggestion of inevitable certainty, Gen. 43: 14, Esth. 4: 16, Isa. 8: 9. Phrase repeated, 2 Sam. 16: 16, 1 Kin. 18: 39, Ps. 92: 10, 93: 3, 130: 6, Eccl. 4: 1, Isa. 27: 1, 5, 28: 1, 3, 4, 53: 7, Ezek. 14: 22, 16: 6, Zech. 12: 12-14, by way of resumption after a parenthesis or interruption, Judg. 9: 16, 19, Ps. 56: 5, 11, 12. Refrain in poetry, Ps. 42: 6, 12, 43: 5; Cant. 2: 7, 3: 5 etc.; Isa. 2: 11, 17; 9: 11, 16, 20, 10: 4; 48: 22, 57: 21. Sometimes a word is repeated without special emphasis for the sake of adding a further description חַבַּיִת בֵּית יְהוָה *the house* viz. *the house of Jehovah* 2 Chron. 5: 13, Gen. 35: 14, 2 Sam. 6: 2, Ezek. 44: 19.

b. Sometimes the second word is put in a different gender from the first, מַשָּׂאן וּמַשָּׂאָה *all kinds of support* Isa. 3: 1, comp. Jer. 48: 19, or a different number, חֲמִישִׁר חֲמָרָתַיִם *a heap, two heaps* Judg. 15: 16, שְׁנָה וְשִׁנּוֹת Eccl. 2: 8, Judg. 5: 30, Ps. 19: 7. Or a cognate word may be employed, שְׁמָמָה וְשַׁמָּה *waste and desolate* Ezek. 6: 14, 33: 29, שַׁבַּת שַׁבָּתוֹן Lev. 23: 3, Job 30: 3, Nah. 3: 17. Words of like sound may be thus emphatically joined together (paronomasia) תֹּהוּ וָבֹהוּ Gen. 1: 2, 18: 27, Isa. 24: 1, 3, 4, 29: 2, 6, Zeph. 1: 15; three words Nah. 2: 11; in successive clauses and opposed in sense Isa. 5: 7.

c. Instances occur of triple repetition, קָדוֹשׁ קָדוֹשׁ קָדוֹשׁ *holy, holy, holy,* Isa. 6: 3, אֶרֶץ אֶרֶץ אֶרֶץ *O earth, earth, earth,* Jer. 22: 29, Jer. 7: 4, Ezek. 21: 32, Ex. 25: 35.

§ 297. A separate pronoun may be added to a pronominal suffix for the sake of emphasis, בִּזְתִּי אָנִי *my dying, mine* 2 Sam. 19: 1, אַתָּה יְהוּדָךְ *thee, thee shall they praise* Gen. 49: 8, or to a noun to which it refers, לְשֵׁת גַּם־הוּא *to Seth, to him also* Gen. 4: 26, 10: 21; and in various other ways beside, which are more or less significant, pronouns may be repeated, or may stand in the same clause with the nouns which they represent.

a. Pronoun added to a suffix, Num. 14: 32, Deut. 5: 3, 1 Sam. 25: 24,

1 Kin. 1: 26, 2 Chron. 35: 21, Ps. 9: 7, Dan. 8: 1, Hag. 1: 4, Zech. 7: 5; with גַּם before the pronoun, Gen. 27: 34, 1 Sam. 19: 23, 2 Sam. 17: 5, 1 Kin. 21: 19, Prov. 23: 15, Eccl. 2: 15, Jer. 25: 14, 27: 7, with אַף Prov. 22: 19. Separate pronoun as a subject repeated, Gen. 20: 5, Ps. 76: 8, Isa. 43: 11, or followed by הִנֵּה with a suffix, Gen. 9: 9, Ex. 14: 17. Pronoun emphatically prefixed and resumed by a suffix, Gen. 17: 4, Deut. 4: 4, 1 Chron. 9: 22, 22: 7, 28: 2, 2 Chron. 28: 10, Ps. 35: 13, 41: 13, 69: 14, Zech. 9: 11. Pronoun as an object emphatically prefixed to the verb and repeated after it, 1 Sam. 9: 13, 2 Kin. 9: 27.

b. Noun as a subject emphatically prefixed resumed by a pronoun, Gen. 3: 12, 42: 11, Num. 15: 30, Prov. 10: 22, 24, 28: 10, Jer. 12: 6, Mic. 7: 3. Noun as an object emphatically prefixed resumed by a suffix, 1 Sam. 25: 29, Isa. 8: 13, or by the noun repeated, Lev. 7: 8, 19, 27, or by a noun in apposition Lev. 7: 25, Num. 35: 30. Noun governed by a preposition resumed by a suffix, Gen. 2: 17, 2 Sam. 6: 22, Neh. 9: 29, Eccl. 1: 11. Noun emphatically prefixed standing absolutely and resumed by a suffix, Num. 14: 24, Deut. 4: 3, 28: 54, 1 Sam. 2: 10, 2 Sam. 4: 10, 2 Kin. 10: 24, 29, 2 Chron. 16: 9, Ps. 11: 4, 46: 5, Eccl. 2: 14, Jer. 10: 3, Nah. 1: 3. Or a pronoun may be followed by a noun in apposition with it by way of explanation, Ex. 7: 11, 1 Sam. 20: 29, 2 Sam. 17: 10, 2 Chron. 32, 30, § 256. 1. *a.*

c. The pleonastic use of the suffix followed by the noun to which it refers is very common in Syriac and in Palestinian Aramaeic, but occurs with less frequency in Hebrew, וַתִּרְאֵהוּ אֶת־הַיֶּלֶד *and she saw it, the child* Ex. 2: 6, 35: 5, Lev. 13: 57, Josh. 1: 2, 18: 19 K'thibh, 1 Sam. 21: 14, 2 Sam. 14: 6, 1 Chron. 16: 42 (?), 2 Chron. 26: 14, Ezr. 3: 12 (?), 9: 1, Esth. 3: 8, Job 29: 3, Ps. 83: 12, Prov. 5: 22, 13: 4, 14: 13, Cant. 1: 6, 3: 7, Isa. 17: 6, Jer. 9: 14, 31: 2, 41: 3, 48: 44, 52: 20, Ezek. 3: 21.

d. A pronoun may be added in apposition to a personal subject or object in order to attach other associated persons; thus to a subject, *the handmaids came near* הֵנָּה יַלְדֵיהֶן *they and their children,* Gen. 33: 6, 43: 8, 50: 14, Ex. 12: 4, 24: 1, Deut. 2: 32, 3: 1, 5: 14, 6: 2, 12: 7, 12, 18, Judg. 19: 9, Jer. 19: 4, 35: 8; to a direct object, Gen. 41: 10; to an indirect object, 1 Kin. 2: 22, Ps. 115: 14; though the addition of a pronoun is not necessary in such cases Ex. 18: 5, 6, Num. 16: 18, 27, Judg. 7: 19, Jer. 19: 1.

Interrogative and Negative Sentences.

§ 298. 1. A direct question is indicated by the interrogative particle הַ, הֲתֵלְכִי *wilt thou go?* Gen. 24: 58, הֲתַחַת אֱלֹהִים אָנִי *am I in the place of God?* Gen. 50: 19; an indirect question by הַ or אִם *if, to know* הֲיִשְׁכֶם אֹהֲבִים *whether you love* Deut. 13: 4, *inquire* אִם־אֶחְיֶה *whether I shall recover* prop. *if I shall* 2 Kin. 1: 2.

a. The interrogative particle properly stands at the beginning of its clause, and may precede a hypothetical clause on which the question de-

pends Gen. 4: 7, Job 4: 2; in Ps. 94: 9, 10 it is for greater effect repeated before the principal word. It is added to strengthen another interrogative Jer. 23: 26. It is disputed, whether הַאִם in Num. 17: 28, Job 6: 13 is equivalent to an emphatic הַ or to הֲלֹא (אִם as in oaths § 305. *a*). The force of the particle הַ may extend to subsequent clauses Ezek. 17: 15; so other words of interrogation 1 Sam. 15: 19, Ps. 73: 11, 74: 1, Hos. 11: 8. הַ asks a question, whose answer is uncertain, הֲשָׁלוֹם אֲבִיכֶם *is your father well?* Gen. 43: 27; also when a negative answer is obviously expected: הֲשֹׁמֵר אָחִי אָנֹכִי *am I my brother's keeper?* Gen. 4: 9, 2 Sam. 7: 5, as on the other hand הֲלֹא expects an affirmative answer, הֲלֹא הוּא אָמַר־לִי *did he not himself say to me* Gen. 20: 5, 2 Kin. 20: 19; sometimes הַ demands an affirmative answer, where any other is obviously inadmissible הֲרָצַחְתָּ *hast thou murdered?* as thou certainly hast 1 Kin. 21: 19, הֲנָבָל *was it a light thing* i. e. since it was in his estimation a light thing 1 Kin. 16: 31, 1 Sam. 2: 27, Job 20: 4. In a few instances הַ introduces an indirect question, Gen. 8: 8, Ex. 4: 18, Esth. 3: 4.

2. In a disjunctive question whether direct or indirect the first member is commonly introduced by הַ and the second by אִם or וְאִם; thus direct הַאֵלֵךְ *shall I go* אִם אֶחְדַּל *or shall I forbear?* 1 Kin. 22: 6, הַחֶפְצִי *is it any pleasure* וְאִם־בֹּצַע *or is it gain?* Job 22: 3, Num. 11: 12, Judg. 20: 28, Job 7: 12, 40: 8, 9, Isa. 10: 9, Jer. 18: 14, Am. 3: 5, 6, 6: 2, Hab. 3: 8; indirect, *to know* הֲהִצְלִיחַ *whether Jehovah had prospered his way* אִם־לֹא *or not* Gen. 24: 21, 27: 21, 37: 32, Num. 11: 23, Judg. 2: 22.

a. The second member is more rarely introduced by אִי *or, who knoweth* הֲחָכָם יִהְיֶה אִי סָכָל *whether he shall be a wise man or a fool* Eccl. 2: 19, or by הַ repeated הֲחָזָק הוּא הֲרָפֶה *whether they be strong or weak* Num. 13: 18, הֲלְדַלְּתֵנוּ קְרָאתֶם לָנוּ הֲלֹא *have ye called us to impoverish us or not?* Judg. 14: 15 or by הַ, אוֹ הֲנִהְיָתָה *hath there been the like* אוֹ הֲנִשְׁמַע *or hath the like been heard?* Deut. 4: 32. The construction of the second clause is interrupted and resumed again in Gen. 17: 17.

b. If a question stand in a disjunctive relation to something previously expressed or implied, it may begin with אִם, הֲכַפְּכֶם אִם־כְּחֹמֶר הַיֹּצֵר *your perversity! or is the potter to be reckoned as the clay?* Isa. 29: 16, אִם בְּאֵת אֲדֹנָי *or is this thing from my lord?* 1 Kin. 1: 27, 2 Kin. 20: 9, Prov. 27: 24, Jer. 48: 27. Occasionally in poetry אִם is used in questions which are neither disjunctive nor indirect Hos. 12: 12.

3. A question may also be asked by means of the interrogative pronouns or interrogative adverbs. Or it may, without any particle of interrogation, be indicated

simply by the tone of voice in which it is uttered, שָׁלֹם *thy coming is peaceful?* 1 Sam. 16: 4, שָׁלוֹם לַנַּעַר בּוֹאֶךָ *the young man is safe?* 2 Sam. 18: 29, comp. ver. 32.

a. מִי *who* is sometimes strengthened by the addition of a demonstrative, thus מִי זֶה *who then?* Job 38: 2, Ps. 24: 8, 25: 12, Jer. 46: 7; מִי הוּא Job 13: 19; מִי הוּא זֶה Esth. 7: 5, Ps. 24: 10, Jer. 30: 21. מִי is so invariably used substantively that it is probably to be so construed even in such combinations as מִי גֶבֶר יֶחְיֶה *who* is a *man* that *shall live* Ps. 89: 49, so Deut. 3: 24, Judg. 21: 8, 2 Sam. 7: 23; מָה *what* on the other hand is often used attributively, מַה־בֶּצַע *what gain?* Gen. 37: 26, Job 26: 14, Ps. 89: 48, Prov. 16: 16, Mal. 1: 13. מִי always stands at the beginning of its clause unless preceded by a noun in the construct state, בֶּן מִי *whose son?* 1 Sam. 17: 56, 58 or by a preposition אַחֲרֵי מִי *after whom?* 1 Sam. 24: 15; the subject may emphatically precede לָמָּה *for what? why?* 2 Sam. 24: 3. הַ is in a few instances dropped before a guttural letter, 1 Sam. 22: 15, 2 Sam. 15: 20, 19: 23, 1 Kin. 1: 24; or omitted from a question when another precedes introduced by הַ Job 37: 18, 38: 18, 39: 2, 40: 30. Question with no sign of interrogation. Ex. 8: 22, Judg. 14: 16, 1 Sam. 22: 7, 27: 10, Job 40: 25, Jer. 25: 29, Zech. 8: 6, Mal. 2: 15.

§ 299. A negative prefixed to a clause negatives likewise those that follow, if they are regarded as continuous לֹא הֲבִיאֹתָנוּ וַתִּתֶּן־לָנוּ *thou hast not brought us nor given us* Num. 16: 14, אַל־תּוֹכִיחֵנִי וְאַל־תְּיַסְּרֵנִי *rebuke me not nor in thy wrath chastise me* Ps. 38: 2, 1 Sam. 2: 3, Job 4: 6, 23: 17, 30: 25, 32: 9, Ps. 44: 19, 75: 6, Prov. 30: 3, Isa. 14: 21: but if the latter are considered as separate and distinct, they are unaffected by an antecedent negative, לֹא תִשְׁמְעוּ וּמְרִיתֶם *if ye will not hearken but rebel* 1 Sam. 12: 15, אַל־תָּסוּרוּ וַעֲבַדְתֶּם *turn not aside but serve Jehovah* ver. 20, 15: 9, 18: 17, 2 Sam. 14: 14. which must be repeated, if its force is to be extended, לֹא־בָזָה *he hath not despised* וְלֹא שִׁקַּץ *and hath not abhorred* וְלֹא־הִסְתִּיר *and hath not hidden* וּבְשַׁוְּעוֹ שָׁמֵעַ *and hath heard him when he cried* Ps. 22: 25, Josh. 1: 5, 9, 1 Sam. 12: 21, Isa. 23: 4, 38: 18, 40: 24.

a. When a condition is negatived, whatever was suspended upon it is negatived as to actual performance, though its conditional relation remains, לֹא־תַחְפֹּץ זֶבַח וְאֶתֵּנָה *thou desirest not sacrifice, but* if thou didst desire it, *I would give it* Ps. 51: 18, 55: 13, 140: 9, Jer. 5: 28, Ezek. 11: 11, § 275. 2. *b.*

In a few instances interpreters are not agreed whether the force of the negative extends to the second clause or not, e. g. Deut. 33: 6, Job 32: 3.

b. Negative adverbs precede the verbs and adjectives which they qualify Gen. 2: 5, 18 and commonly stand at the beginning of their clause. לֹא is in poetry sometimes prefixed to nouns forming a sort of negative compound, לֹא־אֵל *a not-God*, incapable of being regarded as God, of a nature opposite to his, לֹא־עָם *a not-people* Deut. 32: 21, Job 10: 22, 26: 2, Isa. 10: 15, 31: 8, 55: 2, Jer. 5: 7; לֹא and אַל are exceptionally used as nouns in Job 6: 21, 24: 25.

c. There is an ambiguity in certain cases in the use of negatives, according as they qualify the verb or some other word in the sentence. Thus לֹא־תֹאכְלוּ מִכֹּל עֵץ הַגָּן Gen. 3: 1 may negative the act of eating with respect to all the trees of the garden, as though they were to eat of none, comp. Gen. 11: 6, 1 Sam. 14: 24, Isa. 54: 17, Ezek. 18: 22, § 248. 6. *e*; or the negative may terminate upon "all" and indicate that the eating may be of some but not of all the trees, comp. Lev. 16: 2, Num. 23: 13, Josh. 7: 3, 1 Kin. 11: 13. So in לֹא יִמּוֹט לְעוֹלָם Ps. 15: 5 the verb is negatived, *he shall not be moved for ever*, he shall never be moved, comp. Ps. 10: 11, 30: 7, 49: 20, 55: 23, Jer. 50: 39, Joel 2: 26; but in לֹא אָבִיא לְעוֹלָם Jer. 3: 12 the negative qualifies לְעוֹלָם it is not for ever but only for a season that God retains his anger. Comp. Job 7: 16, Ps. 9: 19, 44: 24, 103: 9, Prov. 27: 24, Isa. 28: 28, Lam. 3: 31. For the use of אַל and לֹא with the different forms of the future, see §§ 271. *b*, 272. *c*, 273, 273. *d*, 275. 2. *c*, for אֵין with the participle see § 278. 4. *b*, for בִּלְתִּי with the infinitive see § 279. *e*, for לֹא with the emphatic infinitive absolute, see § 281. 1. *b*.

Relative Clauses.

§ 300. From simple sentences, or those which contain a single proposition, we now pass to compound sentences in which two or more propositions are linked together. These several propositions constitute as many distinct clauses, which are for the most part united by the relative pronoun or by conjunctions. As the relative regularly occupies the first place in its own clause, and as the Hebrew admits of no inflections to represent case, some special device was necessary to indicate its relation to the following words. Accordingly, when the relative אֲשֶׁר is governed by a verb, noun, or preposition, this is shown by appending an appropriate pronominal suffix to the governing word, § 74; *houses of clay* אֲשֶׁר בְּעָפָר

יְסוֹדָם *whose foundation is in the dust* Job 4: 19; *the place* אֲשֶׁר ... עָלָיו *upon which* Ex. 3: 5; *thou* אֲשֶׁר בְּחַרְתִּיךָ *whom I have chosen* Isa. 41: 8; *thou* שֶׁמַּלְכֵּךְ *whose king* Eccl. 10: 17. The personal pronoun is also sometimes added, when the relative is the subject of its clause, § 246. 2, אֲשֶׁר־הוּא מוֹשִׁיעַ *who is saving you* 1 Sam. 10: 19, אֲשֶׁר לֹא יִוָּרַעְךָ הוּא *who is not of thy seed* Gen. 17: 12, 7: 2, 9: 3, Num. 17: 5, 35: 31, Deut. 20: 15, 2 Chron. 8: 7, Ps. 16: 3, but never if the clause contain a verb, since its inflections sufficiently indicate the antecedent.

a. The relative naturally refers to the nearest noun, whose sense will admit of such a reference, or to one in the nearest group of nouns. In Isa. 29: 22 the remoter noun is manifestly the antecedent, but such instances are rare. In a few cases the antecedent is a pronominal suffix אֲשֶׁר *by it* (the altar) *which was* 1 Kin. 9: 25; Ps. 31: 8 (where some regard אֲשֶׁר as a conjunction), Eccles. 10: 15, Zech. 12: 10. The antecedent is transferred to the relative clause in Jer. 14: 1 אֲשֶׁר הָיָה דְבַר יְהוָה lit. *that which was the word* etc. for *the word of Jehovah which was* etc.; so 46: 1, 47: 1, 49: 34, Ezek. 12: 25; but not Lev. 4: 22, Num. 5: 29 where אֲשֶׁר is a conjunction, comp. 1 Kin. 8: 31. In Ps. 69: 27 the relative yields the first place in its clause to a word emphatically prefixed; so in all probability 2 Chron. 8: 9, where בְּנֵי בָלִי יִשְׂרָאֵל אֲשֶׁר must mean *those who were of the children of Israel* (in the parallel passage 1 Kin. 9: 22 אֲשֶׁר does not occur). In Eccles. 7: 24 רָחוֹק does not belong to the relative but to the principal clause.

b. The suffix employed to indicate the government of the relative may be in the first or second person corresponding with the subject of the principal clause, even though the relative refers more directly to an antecedent in the third person, *I am Joseph* אֲנִי ... אֲשֶׁר *whom ye sold* Gen. 45: 4, Num. 22: 30, Isa. 49: 3, 23, Jer. 32: 19, Ezek. 11: 12. The verb attached to the relative follows the person of its antecedent 2 Sam. 3: 8, or it may in like manner be attracted to the first or second person occurring in the principal clause *I am Jehovah who* הוֹצֵאתִיךָ *have brought thee out* Ex. 20: 2, 1 Chron. 21: 17. In Deut. 30: 16 אֲשֶׁר אֲנֹכִי is not the relative with the first person pronoun added after the analogy of הוּא in other places, § 300, *I who*, but is a conjunctive *for, inasmuch as*, but not Ex. 3: 14. The article, when used for the relative § 248. 6. *c* is in like manner followed by a suffix to represent the oblique cases 1 Chron. 29: 8. Occasionally for greater perspicuity or emphasis the noun itself may be repeated after the relative instead of a suffix Gen. 13: 16 (or אֲשֶׁר a conjunction *so that*) 49: 30, 50: 13, Jer. 31: 32. In Ps. 8: 2 a noun explanatory of the antecedent is in apposition with the relative, if תְּנָה is imper. *which put* viz. *thy glory*, but not if it is infin. *thou, the putting of whose glory* i. e. who hast put thy glory, § 132. 1. אִישׁ when used as an indefinite pronoun, § 246. 2. *b*, and

standing in a possessive relation to nouns often follows the analogy of the relative, in being prefixed absolutely and then represented in the course of the sentence by a pronominal suffix, comp. § 297. *b*, אִישׁ כְּחַלֹּמֹתָו *according to the dream of each*, Gen. 41: 12, מִיַּד אִישׁ אָחִיו *from the hand of each one's brother* Gen. 9: 5, 15: 10, 42: 25, 35, Ex. 12: 4, 28: 21, Num. 5: 10, 12, 17: 17, 26: 54, Judg. 21: 22, 2 Chron. 23: 10, Cant. 3: 8; though it may also follow the usual construction of nouns, *the silver of each* may be כֶּסֶף אִישׁ Gen. 43: 21, 44: 1 as well as אִישׁ כַּסְפּוֹ 42: 35, Prov. 12: 14, 13: 2, comp. Zech. 7: 10 with 8: 17.

c. The suffix is never omitted when the relative is governed by a preposition, and only once when governed by a noun Nah. 3: 8: but though often added after transitive verbs Isa. 29: 11, Jer. 19: 4, it is quite as frequently omitted when not required by perspicuity or emphasis Gen. 6: 7; so also when it is a secondary object § 287. 3 *ashes* אֲשֶׁר *to which the fire shall consume the burnt-offering* Lev. 6: 3; and sometimes after verbs which usually take an indirect object, thus after בָּנָה, § 286. 1. *a*, Num. 16: 7 (but see ver. 5), Gen. 6: 2, Deut. 12: 5, after עָבַר Deut. 29: 15. It may also stand absolutely § 288. 2 to denote general relation, where precision would have required a preposition Gen. 22: 14 (*in respect to which it is said*, or אֲשֶׁר may be a conjunction *so that*), Ex. 4: 28, 2 Sam. 11: 22, Isa. 8: 12, 31: 6, Jer. 42: 5; or the relations of time (*in which, when*) Gen. 6: 4, Lev. 4: 22, 2 Sam. 19: 25, 1 Kin. 8: 9, Ps. 139: 15; place (*where* which might be more fully expressed by שָׁם ... אֲשֶׁר, § 74) Gen. 35: 13, 14, 39: 20, Deut. 1: 31, or (*to which, whither* after verbs of motion, equivalent to אֲשֶׁר .... שָׁמָּה) Gen. 28: 15, Num. 13: 27, Josh. 1: 7, 1 Kin. 12: 2, Jer. 22: 12; manner (*in which, according to which, as, how*) Gen. 30: 29, Ex. 14: 13, 1 Kin. 14: 19, 1 Chron. 13: 6 *as he is called by name*; or cause (*for which, why*) 1 Kin. 11: 27 or means (*by which, with which*) Deut. 7: 19, 2 Kin. 19: 6.

§ 301. When the antecedent is expressed, the relative clause has the force of an attributive, *the man whom the Lord loveth* being equivalent to *the man beloved of the Lord.* When the antecedent is not expressed, it is included in אֲשֶׁר, which then resembles the English compound relative *what*, and must be rendered *he who* or *that which* וַיְצַו אֶת־אֲשֶׁר עַל־בֵּיתוֹ *and he commanded him who was over his house* Gen. 44: 1, Jer. 15: 2, *to make thee understand* אֵת אֲשֶׁר *that which shall befall thy people* Dan. 10: 14, לָאֲשֶׁר *to those who* Gen. 47: 24, Ruth 2: 2, בְּיַד אֲשֶׁר שָׂנֵאתָ *into the hand of them whom thou hatest* Ezek. 23: 28.

a. Relative clauses may accordingly interchange with attributive parti-

ciples, Isa. 48: 1, or with participles used substantively Ps. 15: 3-5. So the indefinite pronoun מִי Eccles. 5: 9.

b. For the compound relative as a subject, the personal pronoun may be expressed, and the relative omitted, (instead of the reverse) וְהִיא נִזְנָה Ezek. 33: 5 (better explained § 309. 2. *a*), or both may be expressed הִוא אֲשֶׁר 1 Chron. 21: 17. The personal pronoun may be introduced before the verb to give emphasis to a relative clause, which is its subject אֲשֶׁר *he that shall come forth* etc. הִוא *he shall be thine heir* Gen. 15: 4, Deut. 18: 22, Eccl. 3: 14, Job 6: 7 where אֲשֶׁר is understood in the first clause. The sign of the definite object אֵת or a preposition preceding a relative clause, belongs not to the relative but to the antecedent understood or to the entire clause עַל אֲשֶׁר not *unto whom*, but *unto him who* etc. Isa. 29: 12, *I make thee to know* אֵת אֲשֶׁר *that which shall be* Dan. 8: 19, *we have heard* אֵת אֲשֶׁר *how* etc. Josh. 2: 10. Exceptions are extremely rare עִם אֲשֶׁר *with whom* Gen. 31: 32, אֵת אֲשֶׁר *whom* Jer. 38: 9, Zech. 12: 10; Gesenius finds another in בַּאֲשֶׁר Isa. 47: 12, but this can be otherwise explained.

§ 302. The relative is frequently omitted, not only as in English, when it is the object of an attributive clause, בְּשַׁחַת עָשׂוּ *into the pit* (which) *they have made* Ps. 9: 16; but also when it is the subject, *he forsook* אֱלוֹהַּ עָשָׂהוּ *God* (who) *made him* Deut. 32: 15; and even where it would stand for the compound relative and include its antecedent בְּיַד־תִּשְׁלַח *by the hand of* (him whom) *thou wilt send* Ex. 4: 13; (so doth) שְׁאוֹל חָטָאוּ *Sheol* (those who) *have sinned* Job 24: 19.

a. Additional examples of the ellipsis of the relative in an attributive clause, when it is the direct object Ex. 13: 8, 1 Chron. 29: 3, Ps. 7: 16, 25: 12, 51: 10, 80: 18, Isa. 10: 1, 42: 16, rarely when the antecedent has the article Job 28: 1; occasionally the pronominal suffix is added to the governing word Deut. 32: 17, Job 4: 19, 13: 28, 28: 7, Ps. 109: 19. When the relative is an indirect object Ex. 18: 20, Deut. 32: 37, Isa. 48: 21. When it is the subject, with no verb expressed Gen. 15: 13, Deut. 7: 25, Prov. 26: 17, Hab. 1: 6, with יֵשׁ Gen. 39: 4 (but see ver. 5); with a verb Job 13: 19, 20: 26, Ps. 17: 12, 78: 6, 91: 5, 6, Isa. 30: 6, in a very few instances when the antecedent is definite Ps. 49: 13, 21. When the relative is governed by a noun Ezr. 1: 5, Isa. 43: 14. When the relative would stand absolutely, as expressing the manner or means Job 21: 27, place Job 38: 19, 24, or time Ps. 49: 6. In designations of time the antecedent is usually in the construct, § 258. 2, 1 Sam. 25: 15, 2 Chron. 24: 11, Job 6: 17, 29: 2, Ps. 4: 8, 56: 4, 88: 2, 90: 15, Lam. 3: 57, less frequently when it denotes place Isa. 29: 1. Still more rarely other antecedents may by poetic license be put in the construct before an attributive clause with the relative omitted, Ps. 16: 3, 58: 5, 81: 6, Jer. 48: 36 יִתְרַת עָשָׂה (but in the

parallel Isa. 15: 7 יִתְרַת עָשָׂה), Hos. 1: 2 תְּחִלַּת דִּבֶּר־ *at first when Jehovah spake*; a like construction has been needlessly assumed Gen. 1: 1, § 250. *b*. Some have fancied an anomalous ellipsis of the relative before the infinitive Jer. 10: 13 לְקוֹל תִּתּוֹ *at the voice of his uttering* i. e. which he utters; it may, however, be read *at the sound of his giving abundance of water*. The nouns מָקוֹם *place* and יוֹם *day* are in ordinary prose repeatedly put in the construct before the relative clause even when אֲשֶׁר is expressed Gen. 39: 20, 40: 3, Num. 9: 17, 1 Kin. 21: 19, Eccles. 1: 7, Ps. 104: 8 (where זֶה is used as a relative); Deut. 4: 10, Jer. 20: 14, 38: 28; so in the phrase עַל־דְּבַר אֲשֶׁר *for the reason that, because* Deut. 22: 24, 23: 5, 2 Sam. 13: 22. There are occasional examples of the ellipsis of the relative after the adverbs of place and time, מִשָּׁם *from the place* where Gen. 49: 24, מֵאָז *from the time* when Ex. 4: 10, 5: 23, Ruth 2: 7, Ps. 76: 8, Jer. 44: 18.

b. When the antecedent is not expressed, there may be an ellipsis of the relative in a clause which is governed by a noun in the construct state, Job 18: 21, Ps. 65: 5, Lam. 1: 14 where there is great brevity of expression, Prov. 8: 32 where the verb is at the end of the clause, Ezek. 11: 21 where the relative clause is prefixed absolutely and a suffix attached to the governing noun, Isa. 57: 3 where it is connected with a preceding participle by Vav Consec. וְזֶרַע מְנָאָף וְתִזְנֶה *seed of an adulterer and of one who played the harlot*; or governed by a preposition Job 34: 32, Isa. 65: 1, Jer. 2: 8, 11, 51: 3, Ezek. 13: 3, Obad. ver. 16, Prov. 14: 14 where מֵעָלָיו means *from* that which is incumbent *on him* i. e. the result of his faithful discharge of duty; this construction is in prose almost entirely confined to Chronicles 1 Chron. 15: 12, 2 Chron. 1: 4, 16: 9, 30: 18, 19, Neh. 8: 10. Or when the relative clause is the object of a verb, *I give to them* וַעֲבָרִים those who *shall pass through them* Jer. 8: 13, Hab. 2: 6, possibly Job 24: 9 where some render עָלָיו that which is *upon the poor* i. e. his clothing; or the subject Judg. 5: 14, Job 18: 15, Ps. 22: 30, Isa. 41: 24, and perhaps 48: 14 and 63: 19; in Hab. 3: 16 it is the subject of a preceding construct infinitive.

c. Where there is a conscious ellipsis of the relative, it must of course be supplied in thought. But there is a strong disposition in the Hebrew to coordinate simple sentences, rather than to build up compound sentences by means of dependent clauses. Relative clauses are accordingly in many instances resolved into or exchanged for separate sentences whose connection with the preceding is merely suggested by juxtaposition 1 Kin. 11: 14, Isa. 42: 1, Jer. 5: 15, 49: 31, or by the loose connection of the copulative *and*, וּשְׁמָהּ *and her name* for *whose name was* Gen. 16: 1, 2 Sam. 12: 30, Job 42: 3, Isa. 41: 9, Jer. 17: 5, Ezek. 13: 22. It mars this venerable simplicity of the language to assume relative constructions or complicated sentences, where this is unnecessary: Ps. 45: 6, for example, is not to be relieved of its apparently disjointed character by giving a relative force to the parenthesis *O thou, under whom nations fall.*

§ 303. The demonstrative זֶה or זוּ is frequently used in poetry with the force of a relative, and it then, like the English *that*, suffers no change for gender or number,

מָקוֹם זֶה יָסַדְתָּ *the place that thou hast founded* Ps. 104: 8, מְזִמּוֹת זוּ חָשָׁבוּ *devices, that they have contrived* Ps. 10: 2.

a. זֶה as a relative Ps. 78: 54, 104: 26, Prov. 23: 22; plur. Job 19: 19; governed by prep. as shown by a following suf. Ps. 74: 2; זוּ Ex. 15: 13, 16, Ps. 32: 8, 68: 29, 142: 4, 143: 8; fem. Ps. 9: 16, 31: 5; plur. Ps. 17: 9; gov. by prep. Isa. 42: 24; זוֹ fem. plur. Ps. 132: 12.

§ 304. The indefinite pronoun *whoever, whatever* may be expressed by אֲשֶׁר with no antecedent אֲשֶׁר תְּאֹר *he whom* i. e. *whomsoever thou cursest* Num. 22: 6 or preceded by כֹּל Gen. 6: 2, 7: 22, 19: 12, Isa. 19: 17 (when used of place *wherever* 2 Sam. 7: 7, or absolutely to denote manner *however*, Zeph. 3: 7) or by some other indefinite antecedent as נֶפֶשׁ Lev. 5: 2 or אִישׁ Ex. 35: 21, 23, 24; מִי Gen. 19: 12, Ex. 24: 14 and מָה 2 Sam. 18: 22, Job 13: 13 are used both as indefinite and interrogative pronouns § 75. 1. יֵשׁ אֲשֶׁר lit. *there were* those *who* is repeated Neh. 5: 2-4 in the sense of *some .... others*, and Num. 9: 20, 21 in application to various times and circumstances *sometimes .... at other times.*

a. As the indefinite pronoun often introduces what is equivalent to a conditional clause; it may in like manner be followed by an apodosis with וְ, § 306; thus אֲשֶׁר *with whomsoever of thy servants it shall be found* (i. e. if it be found with any one) וָמֵת *he shall die* Gen. 44: 9, Ex. 30: 33, 38, Lev. 22: 6, Num. 5: 30, 31 (where in a series of Vav consec. preterites the beginning of the apodosis is determined by the sense alone), Josh. 15: 16, Ex. 9: 21 (with Vav consec. future); מִי Hos. 14: 10, מָה 1 Sam. 20: 4, and the combination מַה דִּבֶּר מָה which only occurs in this one instance, Num. 23: 3.

b. How the interrogative comes to be used as an indefinite pronoun may be seen in such passages as Ex. 32: 26, Prov. 9: 4, Isa. 50: 8 where either rendering is admissible, and from a comparison of Judg. 7: 3 (indef.) with Deut. 20: 8 (interrog.). The indefinite pronoun is rendered somewhat more emphatic by the addition of the relative, מִי אֲשֶׁר *whoever there is that* Ex. 32: 33, 2 Sam. 20: 11, Eccles. 9: 4; the corresponding מָה שֶׁ is only found in Ecclesiastes, see 1: 9, 3: 15 etc. מִי is once found in apposition to a vocative שִׁמְרוּ־לִי *whoever ye be, care for the young man Absalom* 2 Sam. 18: 12.

§ 305. When the relative does not refer to a preceding noun or pronoun expressed or understood, but simply marks the relation between clauses, it ceases to

be a pronoun and becomes a relative conjunction as the Lat. *quod* and Gr. ὅτι. This is the case to a limited extent with אֲשֶׁר, while כִּי has entirely lost its original pronominal character and is only used as a conjunction.

a. After כִּי or אֲשֶׁר *that* with verbs of speaking the language of direct quotation is sometimes used instead of the indirect, *she said* בְּרֵרָאֲתִי *that Jehovah hath seen my affliction* Gen. 29: 32, 20: 11, 26: 22, Ex. 4: 25, Josh. 2: 24, Ruth 1: 10, 1 Sam. 10: 19, 15: 20. After the formula of an oath its language may be introduced by כִּי, *as Jehovah liveth* כִּי (I swear) *that* 1 Sam. 20: 3, 25: 34 (repeated after a parenthetical clause), 26: 16, 29: 6. 2 Sam. 4: 9, 10; so after חַי אָנִי *as I live*, Isa. 49: 18, comp. Gen. 42: 16, and after *God do so to me and more also* Ruth 1: 17, 1 Sam. 14: 44, 1 Kin. 2: 23. In other connexions also כִּי may have the sense of a strong affirmation equivalent to 'it is so *that*', 'I affirm *that*', *surely, verily* Job 12: 2. In oaths and protestations אִם *if* has the force of a negative, and אִם לֹא *if not* that of an affirmative, *God do so to me if I do* is the same as saying 'I swear that I will not do' 2 Sam. 3: 35. So when the penalty invoked is not expressed, אִם 1 Sam. 14: 45, 24: 7, 2 Sam. 11: 11, 20: 20, 2 Kin. 3: 14, Ps. 95: 11, Cant. 2: 7, Isa. 22: 14; אִם לֹא Num. 14: 28, Job 1: 11, 17: 2, 22: 20, 31: 36, Isa. 5: 9, 14: 24, Ezek. 17: 16; probably it is to be similarly explained Gen. 24: 38, Ps. 131: 2, Ezek. 3: 6, where the affirmation following a negative can best be expressed by *but*. לֹא is substituted for אִם in an oath Ezek. 14: 18, comp. vs. 16, 20.

b. After a negative clause כִּי *for* has the sense of *but*, whether the contrast suggested affects a particular word, a noun or adjective, *ye did not send me hi'her* כִּי הָאֱלֹהִים *but God* lit. for God did Gen 45: 8, 17: 15, 19: 2, Ex. 16: 8, Deut. 8: 3, 1 Kin. 21: 15, 2 Chron. 20: 15, 26: 18, Ezek. 14: 18; or an entire clause *his heart doth not think so but* (lit. *for*) *to destroy is in his heart* Isa. 10: 7, Gen. 42: 12, Jer. 2: 20. The Hebrew regards the affirmative proposition as confirming the previous denial of one that is inconsistent with it. Occidental usage sets the two propositions in adversative relation. Frequently אִם is added, when the relation becomes restrictive instead of adversative, *he hath not withheld any thing from me* כִּי אִם־אוֹתָךְ *except* (lit. but when he withheld) *thee* Gen. 39: 9, *thy name shall no more be called Jacob* כִּי אִם *but Israel* 32: 29 (*if* it is called, or *when* it is called, this shall be the appellation), 28: 17, Lev. 21: 14, Deut. 12: 14, Esth. 2: 15, Ps. 1: 2, 4, Jer. 7: 23. The signification is the same after a question requiring a negative answer, *Can a man benefit God?* כִּי יִסְכֹּן no! *but a wise man benefits himself* Job 22: 2; *who is blind* כִּי אִם־עַבְדִּי *but my servant?* i. e. no one is but he Isa. 42: 19. Or the negative may be suggested by other constructions, *I have sent to thee saying Thou shalt give me thy silver* etc. and not this only, כִּי אִם *but to morrow I will send* etc. 1 Kin. 20: 5, 6; *Job shall pray for you* in contrast with the offerings which they were to present כִּי אִם־פָּנָיו not you *but him will I accept* Job 42: 8. Sometimes a missing thought must be supplied to

make the antithesis obvious, *we will not hide from my lord* כִּי אִם־נֶגֶד *but the silver is spent* Gen. 47: 18 i. e. not conceal but confess the fact that their money was all gone; I will not return כִּי אִם *but* 2 Sam. 15: 21 K'thibh; all are not dead כִּי אִם *but* 2 Sam. 13: 33 K'thibh. In the last two examples אִם is omitted from the K'ri to obtain what at first sight seems an easier reading, since it requires nothing to be supplied. In a few instances a strong contrast is expressed by כִּי אִם without a negative Num. 24: 22, Lam. 5: 22. When the particles כִּי אִם belong to distinct clauses, each retains its own proper signification. Thus *for, if* Ex. 8: 17, Josh. 23: 12, Prov. 19: 19, Isa. 10: 22; *but, if* Gen. 40: 14, 1 Sam. 20: 9, 2 Kin. 5: 20, Lam. 3: 32; *that, if* Judg. 15: 7, Jer. 26: 15, 51: 14; *that, not* (in an oath) 2 Sam. 3: 35; *surely, if* (it is so *that, if*) Ex. 22: 22, Prov. 2: 3.

c. The meaning and usage of other conjunctions can best be learned from the lexicon. Several prepositions are converted into conjunctions by the addition of אֲשֶׁר or כִּי, thus בַּאֲשֶׁר, מִבְּלִי אֲשֶׁר, עַל כִּי, עַל אֲשֶׁר, תַּחַת כִּי.

Hypothetical Sentences.

§ 306. As the condition is from the nature of the case prior to that which is suspended upon it, the preterite tense is frequently employed in conditional clauses, not only where they refer to the past Ps. 7: 4, 5, 44: 21, 73: 15, but to the future or to what is valid at all times or may happen at any time. The apodosis may or may not be introduced by Vav; in the latter case its verb, if referring to the future and standing first in its clause will be put in the preterite with Vav Consecutive, § 277. *b*, אִם־לֹא הֲבִיאֹתִיו *if I shall not bring him* (lit. 'shall not have brought him' prior to the time contemplated in the apodosis) וְחָטָאתִי־ *I shall be a sinner* Gen. 43: 9, comp. 44: 32; אִם־טָרַף *if* a lion *pass through* a flock וְרָמַס וְטָרַף *he will trample and rend* Mic. 5: 7.

a. The future may be used in a conditional clause instead of the preterite, when the thought is turned to its actual futurity rather than to its priority to what follows Ex. 22: 1, Lev. 13: 35, Judg. 6: 37, 13: 16, Neh. 2: 5, Job 16: 6, Ps. 132: 12, Nah. 3: 12, and even as a frequentative past, § 267. 4, Gen. 31: 8 (but see pret. for acts often repeated, Ps. 63: 8, Isa. 28: 25, Jer. 14: 18). Participles are also used of the present or proximate future Judg. 9: 15, 11: 9, 1 Sam. 7: 3, with יֵשׁ Gen. 24: 42, 49, Judg. 6: 36,

with אֵלַי Ex. 8: 17, 1 Sam. 19: 11. An Infinitive with a suffix, Job 9: 27. If there is more than one verb in the conditional clause, those that follow a preterite may be in the Vav consec. fut. אִם־קָרָאתִי וַיַּעֲנֵנִי *even if I called and he answered me*, equivalent to 'if I were to call and he to answer me' at any time hereafter Job 9: 16, Num. 35: 16-23 (one future ver. 20), Job 33: 23, 24, Ps. 7: 5 (past time), or with a more distinct expression of futurity in the Vav consec. pret. אִם־הֵכַנְתָּ *if thou direct* (lit. shalt have directed) *thine heart* וּפָרַשְׂתָּ *and spread forth thine hands to him* Job 11: 13, or in the future tense Deut. 32: 41, Isa. 4: 4.

b. The apodosis is commonly introduced by Vav, Gen. 28: 20-22, Ex. 4: 8, 9, 18: 23, Lev. 4: 13, 14 (the sense only determines where the apodosis begins), 5: 1, Num. 30: 16, Judg. 14: 12, 13, Job 10: 14, 21: 6; though often it is not Gen. 30: 31, 1 Kin. 21: 6, Job 9: 20, 23, 14: 8, 9, Ps. 66: 18, Isa. 1: 20, 53: 10. It may also be introduced by כִּי *surely*, § 305. *a*, Gen. 31: 42, 43: 10, Num. 22: 29, 2 Sam. 2: 27, Job 8: 6, Isa. 7: 9. Occasionally it precedes the conditional clause, Gen. 42: 37, 1 Sam. 14: 30 (אַף כִּי), Isa. 4: 3, 4, and possibly Ps. 63: 6, 7. When the apodosis relates to the past, its verb may be in the preterite without Vav, Prov. 9: 12, or with Vav Conjunctive Num. 21: 9, וְאַבָּרְתִּי (observe the position of the accent) Job 7: 4, Ps. 78: 34, or in Vav consec. future Job 8: 4, Ps. 50: 18; though the preterite may also occur of an act already resolved upon though not yet performed 1 Sam. 2: 16, § 266. 2. *c*, and in the sense of a future perfect, Ps. 127: 1. The apodosis relating to the future and the verb in Vav consec. preterite Ex. 1: 16, 12: 4, Lev. 13: 36, Num. 35: 24, Judg. 21: 21, 2 Sam. 14: 32, 15: 25, 17: 13, 1 Kin. 3: 14, Hos. 9: 12, Am. 6: 9, but very rarely in the future with Vav conjunctive Jer. 5: 1, 23: 22; of course if the verb does not stand first in its clause, it must be put in the future tense, § 277, Ex. 22: 2, Judg. 4: 8. The apodosis an imperative Job 11: 14, Isa. 21: 12, Jer. 14: 7; in the form of a question, 1 Sam. 2: 25, Job 9: 19, 11: 10, 14: 14, 31: 13, 14, 35: 6, 7, Ps. 44: 21, 22, Eccl. 6: 6, Jer. 3: 1. In the brief language of poetry the apodosis is sometimes elliptical, *if his children be multiplied*, (it is) *for the sword* Job 27: 14, Ps. 92: 8.

c. Successive conditions are expressed by אִם .... אִם, or וְאִם .... אִם Judg. 13: 16, Ps. 7: 4, 5, Am. 9: 2-4; and likewise alternative conditions, אִם־זָכָר אִם־נְקֵבָה *whether male or female* Lev. 3: 1, Ex. 19: 13, Deut. 18: 3, Josh. 24: 15, 2 Sam. 15: 21, Ezek. 2: 5. In alternative conditions the apodosis of the first is sometimes omitted as sufficiently obvious from the tenor of the whole, Ex. 32: 32, 1 Sam. 12: 14.

§ 307. In ordinary usage כִּי *when* regards a case as actual, אִם *if* as contingent and uncertain, לוּ *if* as unlikely or untrue, where in English the imperfect or pluperfect subjunctive would be required; כִּי תָבוֹא *when thou comest* (as thou surely wilt) וְאִם־לֹא יִתֵּנוּ *and if they will not give* (as they may not) Gen. 24: 41, Num. 5: 19, 20;

לוּ הַחֲיִתֶם *if you had saved them alive* (which you did not do) Judg. 8: 19.

a. Hence in Ex. 21 classes of cases are introduced by כִּי vs. 2, 7, 18 etc. and the subordinate possibilities occurring under each of them by אִם vs. 3, 4, 5 etc. So Lev. 1: 2, 3, 10, 2: 1, 4, 5, 7. Very unlikely and even impossible conditions are sometimes joined with אִם and are thus represented as supposable, אִם־אֶרְעַב *if I were hungry*, which I never can be indeed, but suppose me to be so Ps. 50: 12, 139: 8, Job 20: 6, 34: 14, Cant. 8: 7, Jer. 15: 1, 22: 24, Am. 9: 2, 3 (linked with ver. 4 and thus put on a par with what is quite possible and probable), Obad. ver. 4. In all these cases the verb is future; to have employed the preterite (in the sense of a future perfect) would have been to suppose the impossible actually accomplished at the time referred to, which is more violent than to assign it to the indefinite future. אִם may also be used with the preterite of something supposed in the past, which did not take place, אִם־עָמְדוּ *if they had stood*, as they did not Jer. 23: 22, 37: 10; so אִלְמָה (אִם לֹא) Esth. 7: 4, Eccl. 6: 6; לוּ Num. 22: 29, Judg. 13: 23, 2 Sam. 18: 12, Ps. 81: 14, Mic. 2: 11. These particles retain their proper force, when combined with לֹא; אִם לֹא leaves the matter in doubt Gen. 43: 9, לוּלֵא implies the reverse of the negative supposition that is made, לוּלֵא הִתְמַהְמָהְנוּ *if we had not lingered*, as we actually did ver. 10, 31: 42, Deut. 32: 27, Judg. 14: 18, 1 Sam. 25: 34, 2 Sam. 2: 27, 2 Kin. 3: 14, Isa. 1: 9.

b. When the apodosis is different from what might have been expected, אִם is equivalent to *even if, although*; אִם־יִהְיוּ *though your sins be as scarlet, they shall become white as snow* Isa. 1: 18, 10: 22, Jer. 14: 7, 51: 14, Hos. 9: 12, Job 9: 20. When the apodosis is suppressed, it may become an expression of desire *O if!* Ps. 139: 19, Prov. 24: 11 and in the judgment of the majority of interpreters Ps. 81: 9, 95: 7, though the necessity is not so obvious. So לוּ Gen. 17: 18, 23: 13, Num. 14: 2, 20: 3, Job 6: 2, Isa. 63: 19; in Gen. 50: 15 it expresses apprehension *what if!*

§ 308. Conditional clauses occur, in which the conditional particle is not expressed, but it is plain from the meaning and the connection that the statement was meant to be understood hypothetically, וְדָפְקוּם *and if they overdrive them* וָמֵת *all the flock will die* Gen. 33: 13; וְעָזַב *and if he leave his father* וָמֵת *he will die* 44: 22; שָׁלַחְתִּיךָ *had I sent thee to them, they would hearken* Ezek. 3: 6.

a. Additional examples: Ex. 33: 5, Ruth 1: 12, 2 Sam. 19: 8, 2 Kin. 5: 13, 7: 2, Neh. 1: 8, Job 7: 20, 10: 16, 19: 4, 20: 24, perhaps 23: 10, Ps. 69: 23, 139: 18, Prov. 18: 22, 22: 29, 24: 10, 25: 16, Isa. 26: 10, Ezek. 14: 17 (comp. ver. 15). The modal forms of the verb, § 270. 1, may sometimes

suggest a condition; thus the intentional, אֲצַרְתָּה *let me make my bed in Sheol* (i. e. if I make etc.) *lo! thou art there* Ps. 139: 8, 73: 16, Job 11: 17, 16: 6 *b*, 19: 18, 30: 26; the jussive, יַסְתֵּר *let him hide his face and who can behold him?* Job 34: 29, 2 Kin. 6: 27; the imperative, Ps. 22: 9.

b. A hypothetical sense should not be gratuitously given to a passage, which is not hypothetical in form. Interpreters have frequently gone to unwarrantable lengths in this respect. A clause is not necessarily conditional in the intention of the writer, because a conditional clause might be substituted for it without a material change of sense. Num. 23: 20 is not a general truth 'when he has blessed, I cannot reverse it' but a particular affirmation 'he has blessed in this instance etc.' Such passages as 1 Sam. 25: 29, 31, Ps. 104: 20, 22, 28, 146: 4, Hos. 8: 12 are declarative, not hypothetical.

Circumstantial Clauses.

§ 309. 1. Circumstantial clauses describe the situation attendant upon the action of the principal clause. In such clauses, contrary to the ordinary rule, § 284. *a*, the subject usually stands first, inasmuch as attention is particularly directed to it, and even though it has been mentioned before it must be repeated, or a pronoun must take its place, *and he smote the camp* וַיַּכֵּם הָעָם בֶּטַח *while* (lit. and) *the camp was secure* Judg. 8: 11, Gen. 1: 2, 1 Sam. 18: 17, וְאַתָּה שֹׂנֵאתָ *whereas thou hatest* Ps. 50: 17, Gen. 18: 13, וּבִגְדֵיהוּ לֹא תִשָּׂרַפְנָה *without his clothes being burned* (lit. and his clothes shall not be burned) Prov. 6: 27, 28, Jer. 14: 15.

a. The contents of this section are adopted with some unessential modifications from the very thorough treatment of this subject in Ewald's Lehrbuch. The participle as suggestive of a contemporaneous action or state is particularly suited to circumstantial clauses and is very commonly employed in them, *Jehovah appeared to him* וַיֵּרָא יֹשֵׁב *while he was sitting at the door* Gen. 18: 1, 13: 7, 15: 2, 24: 21, Num. 10: 33, Josh. 6: 1, Judg. 13: 9, 1 Sam. 4: 12, 2 Sam. 1: 2, 2 Kin. 2: 12, Ps. 35: 5, 6. Clauses without a verb, וּפְנֵיהֶם אֲחֹרַנִּית *with their faces backward* Gen. 9: 23, 12: 6, Prov. 15: 16, 17: 1; with יֵשׁ Isa. 43: 8; with אַיִן Prov. 17: 16. Other words may occasionally precede the subject, וְלֹו וְקִהַת Gen. 49: 10, עוֹדֶנּוּ חַי 2 Sam. 18: 14, 2 Kin. 10, 2, Isa. 6: 6, Am. 7: 7, Zech. 2: 5; or the subject itself may not be expressed, *I have uttered* וְלֹא אָבִין *without understanding* Job 42: 3, וְיָשֹׁב 2 Sam. 13: 20, וְיִשַּׁב Ps. 55: 20, וְחוֹשֵׁא Hab. 2: 10, even when it differs from that of the principal clause Judg. 13: 19.

b. Circumstantial clauses may be attached without Vav, *Jehovah spake with you* אֲלֵיכֶם *while I stood* Deut. 5: 5, Ex. 26: 5; *he pitched his tent* בֵּית־אֵל *having Bethel on the west* Gen. 12: 8, Ex. 12: 11, 1 Sam. 26: 13, Ps. 45: 14, Jer. 30: 6, *virgins* אֵין מִסְפָּר *without number* Cant. 6: 8, Jer. 2: 32; *why will ye be stricken further* תּוֹסִיפוּ *continuing to revolt* Isa. 1: 5, יַיִן יְדַלְּקֵם *wine inflaming them* 5: 11, Ps. 4: 3, 62: 5.

2. A participle agreeing with the principal subject, to which it stands in a sort of predicate relation, may serve the purpose of a circumstantial clause, *they came out* וַיִּתְיַצְּבוּ *stationing themselves at the door* Num. 16: 27, Judg. 8: 4, Ezr. 10: 1, Ps. 7: 3, Jer. 41: 5, 6, Hab. 2: 15, Mal. 1: 7; for which with a negative a finite tense must be substituted, § 278. 4. *b*, either the preterite, *he went there* וַיָּבֹא לֹא־אָכַל *not eating bread* Ezr. 10: 6, Deut. 21: 1, Job 9: 25, or the future, *they planned a device* בַּל־יוּכָלוּ *without being able* to perform it Ps. 21: 12, 35: 8, 56: 5, 12, 140: 11.

a. Such a circumstantial participle or adjective in a very few instances precedes the verb הַר־נֹפֵל יִבּוֹל *a mountain falling wastes away* Job 14: 18, Prov. 20: 14; or is included in a larger circumstantial clause, וְהוּא נִזְהָר *while he, if he had taken warning, would have saved his life* Ezek. 33: 5. It may agree with the object of the principal clause, *I used to deliver* עָנִי *the poor when he cried* Job 29: 12, or with a noun governed by a preposition, בְּעַד־הַיֶּלֶד חַי *for the child while living* 2 Sam. 12: 21, 1 Chron. 12: 1, Jer. 14: 4, or with a suffixed pronoun Ps. 69: 4.

3. The circumstantial may precede the principal clause הֲבֹאֲכֶם אֲחֻזּוּ בָאָרֶץ *lo, when we come into the land, thou shalt bind* Josh. 2: 18, Num. 12: 14, particularly when something unexpected supervenes upon the condition previously described, which is introduced commonly by a preterite with the subject prefixed, עוֹד זֶה מְדַבֵּר *while one was still speaking,* וְזֶה בָּא *another came* Job 1: 16: הִוא מוּצֵאת *while she was being led forth,* הִיא שָׁלְחָה *she sent* Gen. 38: 25, 1 Sam. 9: 11, 1 Kin. 14: 17, 2 Kin. 2: 23, 6: 5, 26, 9: 25, Isa. 37: 38.

a. The circumstantial clause in such a combination may not only have a participle as in the examples already given, but a preterite אַךְ יָצָא יָצָא

Jacob had only just gone out, וְעֵשָׂו בָּא *when Esau came* Gen. 27: 30, Judg. 3: 24, or a future with יָבֹא, § 267. 1. *h*, Gen. 19: 4, Josh. 2: 8, or a Vav consec. future 2 Sam. 24: 11, or an infinitive 2 Kin. 4: 40, 2 Chron. 13: 15, 26: 19, or it may be without a verb, Gen. 7: 6, 22: 1, 2 Kin. 10: 12, 13, Ps. 78: 30, 31, Jon. 3: 4. The unexpected event may also be expressed by the use of a participle, 2 Kin. 8: 5, Dan. 9: 21, or if its time require it by the future tense, 1 Kin. 1: 14. Or if there is no suggestion of a sudden occurrence, the principal clause may be simply linked with the preceding by Vav consec. future Gen. 24: 1, 2, Deut. 26: 5, Judg. 4: 5, 2 Sam. 11: 4, 1 Kin. 13: 11, or, if it belong to the future, by Vav consec. preterite Ex. 3: 13; or Vav may be omitted altogether Gen. 49: 29.

The Conjunction Vav.

§ 310. The connective in most common use is Vav Conjunctive, § 235, which links together words and clauses in a coordinate relation, and of which Vav Consecutive, § 99, is a modification, which while attached to a verb to form a secondary tense likewise links it or its clause to a preceding verb or clause in a relation of dependence or subordination. The particular relations indicated by Vav Conjunctive in different connections are exceedingly various. This is not due strictly speaking to any diversity of meaning in the particle itself. Instead of employing a variety of conjunctions to express the several relations, which one clause may sustain to another, it better accords with the venerable simplicity of Hebrew style, merely to place successive clauses side by side, allowing the relation intended in any given case to be inferred from that of the thoughts themselves. Vav is a sign of connection; but the precise nature of the connection which it marks, must be learned not from the uniting particle, but from the mutual bearings of the conceptions which it binds together.

§ 311. 1. The simplest relation whether of words or clauses denoted by Vav is when one thing is simply added to another, as in English by the Conjunction *and*,

הַשָּׁמַיִם וְהָאָרֶץ *the heavens and the earth* Gen. 2: 1, *let there be a firmament* וְיִהִי *and let it be dividing* 1: 6.

a. In enumerations Vav may be repeated before each successive item, Ex. 35: 5-9 (so Vav consecutive Num. 33: 5-49); or before the greater number with occasional omissions Josh. 15: 21-62; or the several particulars may be divided into pairs or groups by its insertion or omission Ex. 35: 11, 12, 16-19, Prov. 1: 2-6, Isa. 5: 12. Vav is commonly inserted before the last term of a series, Gen. 1: 12, 14: 1, Neh. 10: 29, Joel 1: 14, though not invariably, Deut. 29: 22, 1 Kin. 6: 7, Ps. 45: 9. Sometimes it is omitted altogether Neh. 10: 3-28, 2 Kin. 11: 13, Ps. 150: 1, 2, 5, 6, Isa. 1: 1, לִרְאֵם בֶּן־אֵם Dan. 8: 14, especially in certain familiar phrases, הַכֹּל שִׁלְשֹׁם *yesterday* and *the day before* i. e. heretofore Gen. 31: 5, מָחָר מִשִּׁלְשֹׁם *to-morrow* or *the day after* 1 Sam. 20: 12, שִׁלְשֹׁם שִׁלְשֹׁם *two* or *three* Isa. 17: 6, Job. 33: 29.

2. When the second term is identical with the first, or restrictive of it and is added for the sake of explanation, Vav is equivalent to *namely* or *to wit*; *in the shepherds' equipment which he had* וּבִכְלֵיהֶם *and* to speak more precisely *in the pouch* 1 Sam. 17: 40; *in Ramah* וּבְעִירוֹ *that is to say, in his city* 1 Sam. 28: 3; *thy hand* יְמִינֶךָ *namely thy right hand* Ps. 74: 11, Josh. 10: 7, Judg. 10: 10, Isa. 57: 11, Dan. 8: 10. When it limits an action, Vav may be rendered *and that*; *Jehovah set the sword of each against his fellow* וּבְכָל־הַמַּחֲנֶה *and that in all the camp* Judg. 7: 22, וְלִבְקֵר 1 Chron. 9: 27, וּבְרִבְרֵי־יוֹם 2 Chron. 8: 13, Eccl. 8: 2; so often before an infinitive, *he will fulfil all my pleasure* וְלֵאמֹר *and that so as to say* Isa. 44: 28, 2 Chron. 7: 17 (comp. 1 Kin. 9: 4), Neh. 8: 13, Jer. 17: 10, 44: 14.

a. This differs from Isa. 1: 1 *Judah and* especially *Jerusalem*, where the second term renders prominent something included in the first, but does not cover all that is intended by it; so Dan. 1: 3, Num. 31: 6 *sacred vessels and* particularly *the trumpets*; Josh. 9: 27 *for the congregation and* especially *for the altar of Jehovah.*

3. Vav may be used in an emphatic sense for *even*, *also*; *from Israel was* וְזֶה *even this*, other things and this too astonishing it is Hos. 8: 6, וּבִנּוֹתָם *even in their death* 2 Sam. 1: 23, וְשַׁאֲלִי *ask also* 1 Kin. 2: 22, Isa. 32: 7, 49: 6.

When one noun is the principal and the others subordinate or less adapted to the verb employed, Vav is equivalent to *with*; *they used to come up* וּמִקְנֵיהֶם *with their cattle* Judg. 6: 5, 2 Kin. 11: 8, וְצוֹם *with fasting* Esth. 4: 3, וְלִבִּי *with my heart* Eccl. 7: 25, וְעֶבְרָה *with wrath* Isa. 13: 9, *the earth with its issues* 42: 5.

a. 1 Sam. 14: 18 וּבְנֵי *with the children of Israel*, unless as seems probable there is an error in the text; on the other hand עִם *with* is used for וְ 1 Sam. 16: 12, 17: 42.

4. When the relation suggested is that of contrast, limiting or qualifying what precedes, Vav is equivalent to the adversative *but*; *of every tree thou mayest eat* וּמֵעֵץ *but of the tree* etc. Gen. 2: 16, 17, וְדַע *but know* Eccl. 11: 9, Job 14: 10, Ps. 22: 7, 28: 3, Eccl. 7: 4. If, however, the contrasted thought does not limit but completes the sense, Vav should be rendered by *and*; *he hath torn* וְיִרְפָּאֵנוּ *and he will heal us* Hos. 6: 1, Gen. 1: 5, Deut. 32: 21, 39. Vav may also introduce a reason, *give us help* וְשָׁוְא *for vain is the deliverance of man* Ps. 60: 13; or an opposing consideration, from which a different conclusion might have been anticipated, וְאָנֹכִי *although I was their husband* Jer. 31: 32; or an inference וְהָשִׁיבוּ *wherefore turn and live* Ezek. 18: 32; or a consequence, *he withholdeth the waters* וַיֵּבָשׁוּ *and so they dry up* Job 12: 15, Ps. 42: 5, 91: 15, 103: 16; or after a negative clause that which would have resulted on the contrary hypothesis, § 299. *a, thou desirest not sacrifice* וְאֶתֵּנָה *else I would give it* Ps. 51: 18, perhaps with a negative understood Job 6: 14; if the consequence is different from what might naturally have been expected, וַיִּצְלְחוּ *and yet they prosper* (or it may be read *that they* the orphans *may prosper*) Jer. 5: 29, וְיֹאחֵז *and yet the righteous shall hold on his way* Job 17: 9; or the design or purpose, *they fasten it* וְלֹא יָמֹט *that it move not* Jer. 10: 4, 11: 21;

or a comparison, *man is born unto trouble* וּבְנֵי רֶשֶׁף *as sparks fly upward* Job 5: 7, 11: 12, 12: 11, Prov. ch. 25-29, or if the comparison precede, *waters fail* וְאִישׁ *so a man* Job 14: 12, 19, Prov. 25: 3, 20, 25, 26: 14; or a coexisting act or condition, *Noah was six hundred years old* וְהַמַּבּוּל *when the flood* Gen. 7: 6: Vav repeated may be equivalent to *both ... and*, וְקֹדֶשׁ וְצָבָא *both sanctuary and host* Dan. 8: 13, Num. 9: 4, Ps. 76: 7, Nah. 1: 5.

a. Vav is never precisely equivalent to the disjunctive *or*, which is expressed by אוֹ. The passages, in which it apparently has this sense, are elliptical or are to be otherwise explained; *there was not found sword* וְחֶרֶב *or spear* (prop. *and* there was not found *spear*) 1 Sam. 13: 22, 25: 31, Gen. 41: 44, Ex. 21: 17, 2 Kin. 7: 10; *ye shall take it from the sheep* וּמִן־ הַכְּשָׂבִים *and from the goats* Ex. 12: 15, these together form the mass out of which it is to be taken; וְרָגַז וְשָׂחַק not *whether he rage or laugh*, but more exactly *both when he rages and when he laughs* Prov. 29: 9, Ex. 21: 16.

b. When a speaker begins with וְ there is a tacit allusion to something that has preceded, or to a thought to be supplied, you rage וַאֲנִי *but I have established my king* Ps. 2: 6, Num. 12: 14, 20: 3, 2 Sam. 13: 26, 18: 22, 24: 3, 2 Kin. 2: 9, 4: 41, 5: 6, 17, 7: 13, 10: 2, 1 Chron. 17: 10, Job 19: 25, Isa. 3: 14, Jer. 40: 5, Ezek. 13: 11, 13, 17: 22.

c. The omission of the conjunction sometimes adds to the force or vivacity of a sentence, Ex. 15: 9, 10, Deut. 32: 10, 11, Judg. 5: 27, Ps. 19: 8-10, Isa. 10: 28-32, 21: 2-5, Jer. 31: 21.

§ 312. **1.** Vav serves to introduce the apodosis or second member of a hypothetical sentence, § 306. *if God will be with me and keep me,* וְהָיָה יְהוָה *then shall Jehovah be my God* Gen. 28: 20, 21.

2. It may also connect a statement of time or a noun placed absolutely, with the clause to which it relates, בַּיּוֹם הַשְּׁלִשִׁי וַיִּשָּׂא אַבְרָהָם אֶת־עֵינָיו *on the third day Abraham lifted up his eyes* Gen. 22: 4; תִּקְוָתְךָ יְתֹם דְּרָכֶיךָ *thy hope,* (is it not) *the integrity of thy ways?* Job 4: 6. Both these uses, which are wholly foreign from our idiom, are combined in 2 Sam. 15: 34, *thy father's servant* וַאֲנִי *I have been so hitherto, but now* וְאֲנִי *I will be thy servant.*

a. Examples of Vav Conjunctive after a noun at the beginning of its clause whether placed absolutely or governed by a preposition, 1 Kin. 6: 32,

Job 19: 23, 23: 12, 25: 5, 36: 26, Ps. 69: 33, 115: 7, Prov. 9: 16 (comp. ver. 4), Jer. 10: 23, 13: 10, Ezek. 40: 42, Dan. 11: 15, (such a clause governed by רָאָה 2 Sam. 10: 12). Vav consec. future similarly used, Gen. 22: 24, 1 Sam. 14: 19, 2 Sam. 22: 41, 1 Kin. 15: 13, Job 36: 7, Jer. 6: 19, Dan. 1: 20. Vav consec. preterite, Ex. 12: 15, 19, 30: 38, Lev. 7: 20, 17: 10, Num. 14: 24, 1 Sam. 25: 27, 2 Sam. 6: 21, 2 Kin. 11: 7, Ps. 25: 11, Jer. 23: 33, Ezek. 17: 19.

b. Vav Conjunctive after a statement of time, Ex. 12: 3, Lev. 7: 16, Num. 16: 5, Ps. 141: 5 (after עוֹד), Jer. 8: 1 K'thibh, Dan. 10: 4 (comp. ver. 1). Vav consec. future, Judg. 19: 5, 1 Sam. 11: 11, Jer. 7: 25, Dan. 1: 18. Vav consec. preterite, Gen. 3: 5, Ex. 16: 6, 7, 17: 4, Prov. 24: 27 (after אַחַר), Ezek. 33: 33, Joel 4·

INDEX I.

SUBJECTS TREATED FULLY OR INCIDENTALLY.

The numbers in this and the following Indexes refer to the Sections of the Grammar.

Abbreviations 9. 1.

Absolute infinitive. *See* Infinitive absolute.

Abstract nouns, feminine 200, plural 203. 1. *a*, *c*.

Accents 28, use in cantillation 28. *b*, forms and classes 29, meaning of names 29. *b*, like forms distinguished 30, position of 32-35, aid in distinguishing words 34, change of position 35, effect of Vav consecutive 33. 4, 99. 2, 100. 2, in place of Methegh 39. 3. *a*, 45. 5, give stability to vowels 60. 1. *a*, vowel changes produced by 64.

Accents, consecution of in prose 36-39, poetic 31, consecution of 40-42.

Accents, pause 36. 2. *a*, position of 35. 2.

Accentuation double 39. 4. *a*.

Addition of letters 50. 3.

Adjectives in place of participles of neuter verbs 90, 187. *a*, formation of 187. 2, expressing permanent or variable qualities 187. *b*, intensity 189. 1, 191, defects 189. 1. *b*. diminutives of color 190, declension of 206, qualifying nouns 252. 1, qualifying nouns in the construct 259, predicate 265. 2, comparison 264, emphatic use with verbs 281. 2. *b*.

Adjectives numeral 224-228, 253-255.

Adverbial idea expressed by a verb 283. *a*.

Adverbial expressions 288.

Adverbs 236, with suffixes 237, as the subject 244. *c*, numeral 255. 4, position of 288.

Affixes 33.

Agreement neglected 289-293.

Aleph, sound of 3. 4, used as a vowel-letter 11. 1, in a few verbal forms 120. 2. 122. 2, 158. 3, once in 3 f. s. suffix 219. 1. *b*, otiant 16. 1, with Mappik 26, with Daghesh forte (?) 121. 1, substituted for He in Aramaean 51. 3, in Niphal infinitive 91. *b*, in Hiphil 94. *a*, *b*, in Hithpael 96. *a*, in feminine ending of verbs 86 *b*, and nouns 198. *d*, for Vav in fem. plur. of nouns 201, prosthesis of 53. 1. *a*, 185. *c*, omitted 53. 2, 3, 57. 2 (2) *a*, 111. 2. *b*, *c*, 153. 2, 166. 2, quiescent 57. 2, after prefixed prepositions 232. 3. *a*, *b*, after Vav Conjunctive 235. *c*, prefers diphthongal vowels 60. 1. *a*, 110. 3. 111. 2, previous vowel rarely short if Daghesh forte omitted 69. 4. *a*, 121. 1, 230. 3, added to 3 pl. preterite 86. *b*, prefixed in the formation of nouns 191.

Alphabet 2, order of 6, Lepsius' theory 6, *a*.

Anacoluthon 294. *b*.

Animals, names of 199. *c*

Apocopated future 97. 2, 272, not in passive species 97. 2. *b*, in Ayin Guttural verbs 119. 1, Lamedh Guttural 126. 1, Ayin Vav and Ayin Yodh 155. 5, 159. 3, 160. 2, 162. 3, Lamedh He 173. 1, 174. 4, 175. 3, 176. 4, 177. 3, 178. 3, uses of 272.

Apocopated imperative 98. 2, 173. 1.

Apposition of nouns 256.

Arabic letters 3. 1. *a*, currently read without vowels 10. *a*, syllables 18. 2. *c*, Teshdid 23. 3. *b*, accent 33. 4. *a*, Elif prosthetic 53. 1. *a*, conjugations 83. *c* (1), comparative or superlative 191. *a*, nouns of unity 200. *b*, case endings 201. *c*, dual 204, article 230. 1. *a*, conjunction with the accusative 284. *d*.

Aramaean syllables 18 2. *c*, words modified from Hebrew 51. 3, dual 204. *a*.

Article definite 230, use of 248, with verbs, etc. 248. 6. *c*, 300. *b*, with proper nouns 249. 1. *a*, before nouns with suffixes 249 2. *a*, before nouns in the construct 249. 3. *b*, when omitted 250, 252. 1. *b*. *c*, 252. 2. *b*, *c*.

Article indefinite 230. 1. *b*, 251. *a*.

Aspirates 3. **1, 7. 2, receive** Daghesh lene 21, their original sound 21. *b*, affected by concurrence of consonants or doubling 54. 1.
Athnahh divides verse 36. **1, 40.** 2, train of 38. 2, 41. *b* (1).
Augment, Greek and Sanskrit 99. **1.** *a*.

PREFATORY NOTE

This little volume is intended for the use of persons desirous of acquiring some degree of facility in the use of Hebrew as a **spoken language.** It is not intended as a text-book for beginners, but rather as a help to those who have already gained some knowledge of elementary Hebrew. The publishers have had specially in mind the needs of persons intending to settle in Palestine, or to go there as tourists.

This is, as far as we know, the first serious effort in this direction made by the protagonists of the Hebrew Revival, and, as such, this work is no doubt open to many criticisms. We are keenly aware of this fact, and hope that many suggestions will come from readers and critics, which may prove most helpful when a second, more complete and revised edition is published.

Due to many unforeseen difficulties, the publication of this volume has been repeatedly delayed, and the apologies of the authors and publishers are tendered to those who have been impatiently awaiting its appearance.

E. N.

New York, June 15, 1921.

ON MEETING	בִּפְגִישָׁה
Good morning, sir.	שָׁלוֹם לְךָ, אֲדוֹנִי!
Good morning, Mr. Ben-Zion.	שָׁלוֹם לְךָ, מַר בֶּן־צִיּוֹן!
How do you do? (Hello!)	שָׁלוֹם!
How are you?	מַה שְּׁלוֹמְךָ?
Quite well.	שָׁלוֹם לִי.
And how is your brother?	וּמַה שְּׁלוֹם אָחִיךָ?
He is quite well, too.	גַּם לוֹ שָׁלוֹם.
And how is your sister?	וּמַה שְּׁלוֹם אֲחוֹתְךָ?
She is not feeling well today.	אֵין שָׁלוֹם לָהּ הַיּוֹם.
I am sorry.	צַר לִי עָלֶיהָ!
Whither bound?	מֵאַיִן וּלְאָן?
Where are you coming from?	מֵאַיִן אַתָּה הוֹלֵךְ?

Where are you going to?	לְאָן אַתָּה הוֹלֵךְ ?
I am on my way from home to a meeting.	אֲנִי הוֹלֵךְ מִבֵּיתִי אֶל אֲסֵפָה.
I should like to become acquainted with Mr. Gil'adi.	אֲנִי רוֹצֶה לְהִתְוַדַּע אֶל מַר גִּלְעָדִי.
Very well, I will introduce you to him.	טוֹב, אַצִּיג אוֹתְךָ לָפָנָיו.
Allow me to introduce Mr. Penini. / Meet Mr. Penini.	אֲנִי מִתְכַּבֵּד לְהַצִּיג לְפָנֶיךָ אֶת מַר פְּנִינִי.
I am pleased to meet you.	נָעִים לִי מְאֹד לְהַכִּיר אוֹתְךָ.
What is your name?	מַה שִּׁמְךָ ?
My name is Gil'adi	שְׁמִי גִּלְעָדִי.
I'd like to see you. / There is something I would like to discuss with you.	דָּבָר לִי אֵלֶיךָ.

I haven't the time just now.	אֵין לִי פְּנַאי עַכְשָׁיו.
Let us make an appointment.	נְקַבֵּע מוֹעֵד לְהִתְרָאוֹת!
When shall we meet?	מָתַי נִתְרָאֶה?
At half past six this evening.	הַיּוֹם בָּעֶרֶב בַּשָּׁעָה הַשִּׁשִּׁית וָחֵצִי.
Please be on time.	בְּבַקָּשָׁה, בּוֹא בְּדִיּוּק!
Certainly, I am always prompt.	בְּוַדַּאי, אֲנִי בָּא תָּמִיד בְּדִיּוּק.
If you are late, I will nat wait for you.	אִם תְּאַחֵר, לֹא אֶחַכֶּה לְךָ.
Don't worry.	אַל תִּדְאַג!
I will come early.	אֲנִי אַקְדִּים.
Where shall we meet?	אֵיפֹה נִתְרָאֶה?
We will meet at the Beth-Am (People's House).	נִתְרָאֶה בְּבֵית־הָעָם.

Am I disturbing you?	אוּלַי אֲנִי מַפְרִיעַ אוֹתְךָ?
Not at all.	אֵין דָּבָר!
It doesn't matter.	אֵין בְּכָךְ כְּלוּם!
I am not in such a hurry.	אֵינֶנִּי מְמַהֵר כָּל־כָּךְ.
Don't forget.	אַל תִּשְׁכַּח!
Do you speak Hebrew?	הַמְדַבֵּר אַתָּה עִבְרִית?
Yes, I speak Hebrew.	כֵּן, אֲנִי מְדַבֵּר עִבְרִית.
Where do you live?	אֵיפֹה אַתָּה דָּר?
I live on Herzl Street.	אֲנִי דָּר בִּרְחוֹב הֶרְצֶל.
Come to see me at home.	בַּקֵּר אֶת בֵּיתִי!
I will come to see you often.	אֲנִי אֲבַקֵּר אֶת בֵּיתְךָ לִפְעָמִים.
I will drop in when I get a chance.	אֲנִי אָסוּר אֶל בֵּיתְךָ לְעֵת־מְצֹא.
Do me a favor.	עֲשֵׂה לִי חֶסֶד!
Remember me to Mr. Ben-Aviv.	דְּרֹשׁ בִּשְׁמִי לְשָׁלוֹם מַר בֶּן־אָבִיב!

I will do what you ask me.	אֲנִי אֶעֱשֶׂה אֶת בַּקָּשָׁתְךָ.
Am I taking up your time?	אוּלַי אֲנִי מְבַטֵּל אֶת זְמַנְךָ?
Just wait a while.	חַכֵּה־נָא מְעַט!
What are you saying?	מָה אַתָּה אוֹמֵר?
What are you talking about?	מָה אַתָּה מְדַבֵּר?
I beg your pardon (In the sense of: Will you please repeat?)	לֹא שָׁמַעְתִּי הֵיטֵב
A little louder, please.	הָרֵם־נָא אֶת קוֹלְךָ!
Are you in a hurry to go?	הַמְמַהֵר אַתָּה לָדְרָכְךָ?
Can I speak to you?	הַאֶפְשָׁר לְדַבֵּר אֵלֶיךָ?
I would like to speak to you.	אֲנִי רוֹצֶה לְדַבֵּר אֵלֶיךָ.

Can you stop for a moment? / Can you spare a moment?	הֲיָכֹל אַתָּה לַעֲמֹד לְרֶגַע?
Can you wait?	הֲיָכֹל אַתָּה לְחַכּוֹת?
Do you remember?	הֲזוֹכֵר אַתָּה?
Don't trouble yourself.	אַל תַּטְרִיחַ אֶת עַצְמְךָ!
I am glad to see you.	שָׂמֵחַ אֲנִי לְפָגֹשׁ אוֹתְךָ. / שָׂמֵחַ אֲנִי לִרְאוֹת אוֹתְךָ.
What do you wish?	מָה אַתָּה רוֹצֶה?
What do you mean?	מַה כַּוָּנָתְךָ?
Of what use is it?	מַה תּוֹעֶלֶת הַדָּבָר?
What must I do?	מֶה עָלַי לַעֲשׂוֹת?
Who are they?	מִי הֵם?
Why don't you answer?	מַדּוּעַ אֵינְךָ עוֹנֶה?
Why are you silent? / Why don't you speak?	לָמָּה אַתָּה מַחֲרִישׁ?
Excuse me.	סְלִיחָה!

Here is my (visiting) card.	הֵא לְךָ כַּרְטִיסִי הַפְּרָטִי!
What is your address?	מָה הַמַּעַן שֶׁלְּךָ?
When are you at home?	מָתַי אַתָּה בְּבֵיתְךָ?
Don't bother me.	אַל תַּטְרִיד אוֹתִי!
Listen, please. / Look here, please.	שְׁמַע־נָא, אֲדוֹנִי!
When will it be convenient for you?	מָתַי יִהְיֶה הַדָּבָר נוֹחַ לְךָ?
You look familiar.	פָּנֶיךָ יְדוּעִים לִי.
This is the first time I have seen you.	אֲנִי רוֹאֶה אוֹתְךָ בַּפַּעַם הָרִאשׁוֹנָה.
Where have I seen you before?	אַיֵּה רָאִיתִי אוֹתְךָ קֹדֶם?
I have not seen you for a long time.	לֹא רָאִיתִי אוֹתְךָ זֶה זְמַן רַב.
I cannot recall.	קָשֶׁה לִי לְהִזָּכֵר.

I am glad you reminded me.	טוֹב כִּי הִזְכַּרְתָּ אוֹתִי.
How are you getting on? / How is business?	מַה שְּׁלוֹם עֲסָקֶיךָ?
Business is good.	שָׁלוֹם לַעֲסָקַי.
Business is poor.	אֵין שָׁלוֹם לַעֲסָקַי.
I know you by sight.	אֲנִי יוֹדֵעַ אוֹתְךָ עַל־פִּי מַרְאֵה־פָּנֶיךָ.
I have known you for a long time.	אֲנִי יוֹדֵעַ אוֹתְךָ מִכְּבָר.
Do you know me?	הֲיוֹדֵעַ אַתָּה אוֹתִי?
Do you recognise me?	הַכֵּר־נָא מִי אֲנִי!
Who are you?	מִי אַתָּה?
I know you.	אֲנִי מַכִּיר אוֹתְךָ.
I knew (recognized) you at once.	אֲנִי הִכַּרְתִּי אוֹתְךָ מִיָּד.
Can you guess my name?	נַחֵשׁ אֶת שְׁמִי!

Your name is familiar.	שָׁמַעְתִּי אֶת שִׁמְךָ. / שִׁמְךָ יָדוּעַ לִי.
Mr. Yitzhaki sends his regards.	מַר יִצְחָקִי דּוֹרֵשׁ בִּשְׁלוֹמְךָ.
How do you say that in Hebrew?	אֵיךְ אַתָּה אוֹמֵר זֹאת בְּעִבְרִית?
What's new?	מֶה חָדָשׁ אִתְּךָ?
What's the news?	מֶה חָדָשׁ?
How are things?	מַה נִּשְׁמָע?
No news.	אֵין כָּל חָדָשׁ.
Nothing new.	הַכֹּל בְּשֶׁהָיָה.
Everything is all right.	הַכֹּל כְּשׁוּרָה.
What's new in the world?	מָה חֲדָשׁוֹת נִשְׁמָעוֹת בָּעוֹלָם?
Is what I heard about you true?	הַאֱמֶת הַדָּבָר אֲשֶׁר שָׁמַעְתִּי עָלֶיךָ?
What is it? / What's the matter?	מָה הַדָּבָר?

How do you know that?	מֵאַיִן אַתָּה יוֹדֵעַ זֹאת?
I have it from my friend.	שָׁמַעְתִּי זֹאת מִפִּי רֵעִי.
That's all right.	טוֹב הַדָּבָר.
That won't do.	לֹא טוֹב הַדָּבָר.
Au revoir! (See you again.)	לְהִתְרָאוֹת!
Good bye!	הֱיֵה שָׁלוֹם!
God speed you!	לֵךְ לְשָׁלוֹם!

AT HOME — בַּבַּיִת

Some one is knocking at the door.	אִישׁ דוֹפֵק עַל הַדֶּלֶת.
Come in!	לָבוֹא!
Open the door.	לֵךְ פְּתַח!
A visitor has come to see us.	אוֹרֵחַ בָּא לְבַקֵּר אוֹתָנוּ.

Receive the visitor.	קַבֵּל אֶת פְּנֵי הָאוֹרֵחַ!
Good morning.	בֹּקֶר טוֹב!
Won't you sit down?	שֵׁב־נָא, אֲדוֹנִי!
Thank you.	תּוֹדָה! / חַן־חַן!
Spread the cloth. / Set the table.	פְּרֹשׂ מַפָּה עַל הַשֻּׁלְחָן!
We must serve our visitors with refreshments.	צָרִיךְ לְהַגִּישׁ תִּקְרֶבֶת לָאוֹרֵחַ.
Sit down at the table, please.	שֵׁב־נָא אֶל הַשֻּׁלְחָן!
Please have something.	בְּבַקָּשָׁה, טְעַם מְעַט!
I am not hungry.	שָׂבֵעַ אָנֹכִי.
Don't refuse.	אַל־נָא תְּסָרֵב!
I won't be too obstinate.	לֹא אֶתְעַקֵּשׁ הַרְבֵּה.
Where is the host?	אַיֵּה הָאָדוֹן?
He is not at home.	אֵינֶנּוּ בַּבַּיִת.

He will back very soon.	הוּא יָשׁוּב מְיַד.
What must you see him about?	מִפְּנֵי מַה אַתָּה צָרִיךְ לוֹ?
About an important matter.	מִפְּנֵי עִנְיָן חָשׁוּב.
Does he know that you were to be here?	הֲיוֹדֵעַ הוּא, כִּי עָלֶיךָ לָבוֹא?
Certainly.	בְּוַדַּאי!
He promised to wait for me.	הוּא הִבְטִיחַ אוֹתִי לְחַכּוֹת לִי.
It's late.	הַשָּׁעָה מְאֻחֶרֶת.
I couldn't wait any longer. / I got tired of waiting.	חִכִּיתִי עַד בּוֹשׁ.
I am very busy.	אֲנִי טָרוּד מְאֹד.
I will accompany you.	אֲנִי אֲלַוֶּה אוֹתְךָ.
It's not necessary.	אֵין צֹרֶךְ.
When will you call again?	מָתַי תָּבוֹא עוֹד פַּעַם?

I don't know exactly.	אֵינֶנִי יוֹדֵעַ בְּדִיוּק.
I'll let you know by mail.	אֲנִי אוֹדִיעַ בְּמִכְתָּב.
I got up late this morning.	הַיוֹם אִחַרְתִּי לָקוּם מִשְּׁנָתִי.
The alarm clock didn't ring.	הַשָּׁעוֹן־הַמְעוֹרֵר לֹא צִלְצֵל.
Last night I forgot to wind the clock.	אֶמֶשׁ שָׁכַחְתִּי לְכוֹנֵן אֶת הַשָּׁעוֹן.
The clock (or watch) stopped.	הַשָּׁעוֹן נִפְסַק.
Is your watch (clock) going?	הֲרוֹפֵק שְׁעוֹנְךָ?
Do you know the correct time?	הֲיוֹדֵעַ אַתָּה אֶת הַשָּׁעָה הַנְּכוֹנָה?
What time is it?	מָה הַשָּׁעָה עַתָּה?
I must set my watch (clock).	עָלַי לְכַוֵּן אֶת הַשָּׁעוֹן.

It's snow twenty minutes to twelve.	עַכְשָׁיו עֶשְׂרִים דַּק לִפְנֵי הַשְּׁתֵּים־עֶשְׂרֵה.
Are you sure of that?	בָּטוּחַ אַתָּה בָּזֶה?
No doubt.	בְּלִי סָפֵק.
We have two clocks in the house.	יֵשׁ לָנוּ שְׁנֵי שְׁעוֹנִים בַּבַּיִת.
Neither of them keeps good time.	שְׁנֵיהֶם אֵינָם דַּיְקָנִים.
One is always slow.	אֶחָד מְאַחֵר תָּמִיד.
The other is always fast.	אֶחָד מַקְדִּים תָּמִיד.
There is no peace between them.	אֵין שָׁלוֹם בֵּינֵיהֶם.
They don't speak the truth.	אֵין אֱמֶת בְּפִיהֶם.
I don't tell time by these two clocks.	אֵינֶנִּי לוֹמֵד אֶת הַשָּׁעָה מִפִּי שְׁנֵי הַשְּׁעוֹנִים הָאֵלֶּה.
I tell time by my (pocket) watch.	אֲנִי לוֹמֵד אֶת הַשָּׁעָה מִפִּי שָׁעוֹן־הַכִּיס שֶׁלִּי.

This watch is small but correct.	זֶה שָׁעוֹן קָטָן, אֲבָל יָשָׁר.
It tells the truth.	הוּא מַגִּיד אֶת הָאֱמֶת.
It keeps correct time.	הוּא מַרְאֶה אֶת הַשָּׁעָה הַנְּכוֹנָה.
I got up early this morning.	אֲנִי הִשְׁכַּמְתִּי הַיּוֹם בַּבֹּקֶר.
I didn't sleep almost all night.	כִּמְעַט כָּל הַלַּיְלָה לֹא יָשַׁנְתִּי.
I couldn't sleep all night.	שָׁנְתִי נְדֻדָה כָּל הַלַּיְלָה.
A lot of noise came in from the street.	רַעַשׁ נִשְׁמַע מִן הָרְחוֹב.
I woke up my brother.	אֲנִי הֵעִירֹתִי אֶת אָחִי.
Wake up!	עוּרָה! עוּרָה!
Get up!	קוּם!
It's eight o'clock already.	הַשָּׁעָה הַשְּׁמִינִית כְּבָר בָּאָה!

You have to go to work.	עָלַיִךְ לָצֵאת לַעֲבוֹדָתֵךְ.
Hurry up.	מַהֵר !
Don't be lazy.	אַל תִּתעַצֵּל !
The clock has struck eight.	הַשָּׁעוֹן הִשְׁמִיעַ אֶת הַשָּׁעָה הַשְּׁמִינִית.
Hurry or you'll be late.	מַהֵר פֶּן תְּאַחֵר !
It's so good to sleep in the morning.	שְׁנַת־הַבֹּקֶר מְתוּקָה כָּל־כָּךְ !
You're a sleepy-head.	אַתָּה אוֹהֵב־שֵׁנָה !
Go to the wash-stand and wash.	גַּשׁ אֶל הַכִּיוֹר וּרְחַץ !
The water is too cold.	הַמַּיִם קָרִים יוֹתֵר מִדַּי. / הַמַּיִם צוֹנְנִים יוֹתֵר מִדַּי.
Open the other faucet.	פְּתַח אֶת הַבֶּרֶז הַשֵּׁנִי !
Warm water runs from this faucet.	מִפִּי הַבֶּרֶז הַזֶּה נוֹזְלִים מַיִם חַמִּים.
Do you want (boiling) hot water?	הֲרוֹצֶה אַתָּה בְּמַיִם רוֹתְחִים ?

I want lukewarm water.	אֲנִי רוֹצֶה בְּמַיִם פּוּשָׁרִים.
Mix warm and cold water and you'll have lukewarm water.	עָרְבֵב מַיִם חַמִּים בְּצוֹנְנִים וְיִהְיוּ לְךָ פּוּשָׁרִים.
That's a good idea.	זֹאת הִיא הַמְצָאָה יָפָה.
Upon my word!	חֵי נַפְשִׁי! / בְּחַיֵּי רֹאשִׁי!
Please, give me a towel.	בְּבַקָּשָׁה, תֵּן לִי מַגֶּבֶת!
I must dry my face and hands.	עָלַי לְנַגֵּב אֶת פָּנַי וְאֶת יָדַי.
Comb your hair.	סְרֹק אֶת שַׂעֲרוֹתֶיךָ!
Have you a comb?	הֵיֵשׁ לְךָ מַסְרֵק?
What kind of comb?	אֵיזֶה מַסְרֵק?
Give me a fine comb.	תֵּן לִי מַסְרֵק דָּמִיךָ!
Give me coarse comb.	תֵּן לִי מַסְרֵק קָלוּשׁ!
Take the brush and brush your hair.	קַח אֶת הַמִּבְרֶשֶׁת וְהַתְקֵן אֶת שַׂעֲרוֹתֶךָ!
Well said!	יָפָה אָמַרְתָּ!

It seems to me,	כִּמְדֻמֶּה לִי,
I shan't eat breakfast this morning.	לֹא אֹכַל הַיּוֹם אֲרוּחַת־הַבֹּקֶר.
I have something important to do.	עָלַי לַעֲשׂוֹת דָּבָר נָחוּץ.
Have something.	סְעַד אֶת לִבְּךָ!
I have no appetite just now.	אֵין לִי תֵּאָבוֹן עַתָּה.
I have to say my morning prayers.	אֲנִי צָרִיךְ לְהִתְפַּלֵּל שַׁחֲרִית.
I have to put on tephillin.	עָלַי לְהָנִיחַ תְּפִלִּין.
Where is the small mirror?	אַיֵּה הַמַּרְאָה הַקְּטַנָּה?
Who knows?	מִי יוֹדֵעַ!
Look for it yourself.	חַפֵּשׂ בְּעַצְמְךָ!
Have I nothing else to do?	וְכִי אֵין לִי עֲבוֹדָה אַחֶרֶת?

It's not my fault.	אֵין זֹאת אַשְׁמָתִי.
You know all the ins and outs of the household.	אַתָּה יוֹדֵעַ אֶת כָּל סוֹדוֹת הַבַּיִת.
I forget easily.	אֲנִי שׁוֹכֵחַ מְהֵרָה.
You are forgetful.	אַתָּה שַׁכְחָן.
Not always.	לֹא תָּמִיד.
I sometimes remember.	יֵשׁ אֲשֶׁר אֲנִי זוֹכֵר.
When the matter concerns me.	כַּאֲשֶׁר הַדָּבָר נוֹגֵעַ אֵלַי.
I am concerned in the matter. / I am interested in the matter.	אֲנִי נוֹגֵעַ בְּדָבָר.
That's not fair.	אֵין זֶה מִן הַיֹּשֶׁר.
What's to be done?	מַה לַּעֲשׂוֹת?
There is no other way.	אֵין בְּרֵרָה אַחֶרֶת.
That's the way of the world.	זֶה דֶּרֶךְ הָעוֹלָם.

That's the custom.	כַּךְ מִנְהַג הַבְּרִיות.
Well, what of it?	וּמַה בְּכַךְ ?
Every one does as he pleases.	אִישׁ הַיָּשָׁר בְּעֵינָיו יַעֲשֶׂה.
You can't sit here.	אִי־אֶפְשָׁר לָשֶׁבֶת פֹּה.
The rays of the sun come in through the window.	קְרָנֵי־הַשֶּׁמֶשׁ עוֹבְרוֹת בְּעַד הַחַלּוֹן.
We ought to lower the shades.	צָרִיךְ לְהוֹרִיד אֶת הַוִּילוֹנוֹת.
That's a good idea.	זֶה רַעְיוֹן יָפֶה.
I have news for you.	בְּשׂוֹרָה בְּפִי אֵלֶיךָ !
Tell me the news at once.	בַּשֵּׂר תֵּכֶף־וּמִיַּד !
I have no patience.	אֵין לִי סַבְלָנוּת.
It's time to have lunch.	הִגִּיעַ זְמַן אֲרוּחַת־הַצָּהֳרַיִם.
It seems,	כְּנִרְאֶה,

You only care about eating.	אַתָּה עָסוּק רַק בַּאֲכִילָה.
We'll postpone it for later.	נִדְחֶה לְאַחַר־כָּךְ.
Let's wait till supper time.	נְחַכֶּה עַד אַרוּחַת־הָעֶרֶב.
If my strength, holds out, I'll wait.	אִם יִהְיֶה בִּי כֹּחַ, אֲחַכֶּה.
First of all I'll say the afternoon prayers.	קֹדֶם־כֹּל אֶתְפַּלֵּל מִנְחָה.
It's getting dark in the house.	אַפְלוּלִית בַּבַּיִת. שְׁעַת בֵּין־הַשְּׁמָשׁוֹת.
It's dark in the house.	חֹשֶׁךְ בַּבַּיִת.
We ought to turn on the light.	צָרִיךְ לְהַעֲלוֹת אוֹר.
Have you a box of matches?	הֲיֵשׁ לְךָ קֻפְסַת־גַּפְרוּרִים?

Strike a match and light the lamp.	שַׂפְשֵׂף גַּפְרוּר וְהַדְלֵק אֶת הָעֲשָׁשִׁית!
I must pour some kerosene oil into the lamp.	עָלַי לִמְזוֹג נֶפְט בָּעֲשָׁשִׁית.
I must adjust the wick.	עָלַי לְהֵיטִיב אֶת הַפְּתִילָה.
The flame is too big.	הַשַּׁלְהֶבֶת גְּדוֹלָה יוֹתֵר מִדַּי.
The flame is too small.	הַשַּׁלְהֶבֶת קְטַנָּה יוֹתֵר מִדַּי.
The flame is just right.	הַשַּׁלְהֶבֶת בְּשׁוּרָה
Strike a match and light the gas.	הַבְעֵר גַּפְרוּר וְהַדְלֵק אֶת הַגַּז!
You have to open the gas jet.	צָרִיךְ לְסַבֵּב־לִפְתֹּחַ אֶת קְנֵה הַגַּז.
I want to turn on the electric light.	אֲנִי רוֹצֶה לְהָאִיר אֶת הַחַשְׁמַל.
Very good.	טוֹב מְאֹד!
Press the button.	דְּחַק אֶת הַכַּפְתּוֹר!

Pull the string.	מְשֹׁךְ אֶת הַחוּט!
Turn on the light in the bulb.	סֹב־פְּתַח אֶת גֻּלַּת הַחַשְׁמַל!
Then the electric light will burn.	אָז יָאִיר אוֹר הַחַשְׁמַל.
I will light the candle.	אֲנִי אַדְלִיק אֶת הַנֵּר.
I'll place the candle in a candlestick.	אָשִׂים אֶת הַנֵּר בִּמְנוֹרָה.
I like candle-light.	אֲנִי אוֹהֵב אֶת אוֹר הַנֵּר.
It's midnight already.	כְּבָר הִגִּיעָה חֲצוֹת־הַלַּיְלָה.
Let's go to sleep.	נֵלֵךְ לִישׁוֹן.
Is our bed ready?	מִשְׁכָּבֵנוּ כְּבָר נָכוֹן?
Please, get my bed ready.	בְּבַקָּשָׁה לְהַצִּיעַ אֶת מִטָּתִי.
The feather-bed, the quilt and the sheet are in their proper places.	הַכֻּסֶּת, הַשְּׂמִיכָה וְהַסָּדִין עַל מְקוֹמָם.

I prefer a mattress.	אֲנִי מְעַדֵּף מִזְרָן.
Have you another pillow?	הֵיֵשׁ לְךָ כַּר אַחֵר?
The bed is very comfortable.	הַמִּטָּה נוֹחָה מְאֹד.
Put out the light.	כַּבֵּה אֶת הָאוֹר!
Turn off the gas (jet).	סְגֹר־סְגֹר אֶת קְנֵה הַגָּז!
Turn off the electric light (globe).	סְגֹר־סְגֹר אֶת גְּלַת הַחַשְׁמַל!
I am going (lying down) to sleep.	אֲנִי שׁוֹכֵב לִישֹׁן.
I am sleepy.	אֲנִי נוֹטֶה לִישֹׁן.
I am very tired.	אֲנִי עָיֵף מְאֹד.
I did not forget to say my evening prayers.	לֹא שָׁכַחְתִּי לְהִתְפַּלֵּל עַרְבִית.
I have said the Shema already.	גַּם "שְׁמַע" כְּבָר קָרָאתִי.
Have you closed the shutters?	הֲסָגַרְתָּ אֶת הַתְּרִיסִים?

I've locked the door.	נָעַלְתִּי אֶת הַדֶּלֶת.
Please, shut the bedroom door.	בְּבַקָּשָׁה, סְגֹר אֶת דֶּלֶת חֲדַר־הַמִּשְׁכָּב!
How good it is to sleep!	מַה טּוֹב וּמַה נָּעִים לִישֹׁן!
Praised be the man who invented the bed.	בָּרוּךְ הָאִישׁ אֲשֶׁר הִמְצִיא אֶת הַמִּטָּה!
Praised be the Lord who created sleep.	בָּרוּךְ אֱלֹהִים אֲשֶׁר בָּרָא אֶת הַשֵּׁנָה!
Good night.	לַיְלָה טוֹב!
Sleep well.	תֵּעָרֵב עָלֶיךָ שְׁנָתְךָ!
He fell asleep so quickly.	הוּא נִרְדַּם מְהֵרָה כָּל־כָּךְ.
How he snores.	כַּמָּה הוּא נוֹחֵר!
I'm frightened.	פַּחַד נוֹפֵל עָלַי.
It's quiet in the house.	דְּמָמָה בַּבַּיִת.
There isn't a sound.	אֵין קוֹל וְאֵין קֶשֶׁב.
Hush!	הֵס!

We are not satisfied with our rooms (apartment, residence).	דִּירָתֵנוּ אֵינֶנָּה מוֹצֵאת חֵן בְּעֵינֵינוּ.
Why?	מִפְּנֵי מַה?
Because they're too far from the city.	מִפְּנֵי שֶׁדִּירָתֵנוּ רְחוֹקָה מִן הָעִיר.
That's one reason.	זֹאת הִיא רִאשִׁית.
And, in the second place, our quarters are a bit too small.	וְהַשֵּׁנִית, דִּירָתֵנוּ צָרָה קְצָת.
We haven't enough rooms.	אֵין לָנוּ דַּי חֲדָרִים.
We're too crowded.	צַר לָנוּ הַמָּקוֹם.
Why do you want to live in the city.	לָמָּה לְךָ הָעִיר?
I have to travel to the city every day.	אֲנִי צָרִיךְ לִנְסֹעַ אֶל הָעִיר בְּכָל יוֹם.

I have business in the city.	יֵשׁ לִי עֲסָקִים בָּעִיר.
What do you intend to do?	מָה אַתָּה חוֹשֵׁב לַעֲשׂוֹת? / מַה בְּדַעְתְּךָ לַעֲשׂוֹת?
We are going to move out of here.	נַעֲקֹר אֶת דִּירָתֵנוּ מִכַּאן.
We will move to other quarters.	נִכָּנֵס לְדִירָה אַחֶרֶת.
Spacious quarters.	דִּירָה מְרֻוַּחַת.
Comfortable quarters.	דִּירָה נוֹחָה.
I am looking for a nice home in the city.	אֲנִי מְבַקֵּשׁ בָּעִיר דִּירָה נָאָה.
I have found what I was looking for.	כְּבָר מָצָאתִי אֶת אֲשֶׁר בִּקַּשְׁתִּי.
When are you moving into your new quarters?	מָתַי אַתָּה עוֹבֵר לַדִּירָה הַחֲדָשָׁה?
Soon.	בְּקָרוֹב.
In a few days.	בְּעוֹד יָמִים מְעַטִּים.

How many rooms are there ln your new home?	כַּמָּה חֲדָרִים בְּדִירָה הַחֲדָשָׁה?
There are six rooms.	שָׁם יֵשׁ שִׁשָּׁה חֲדָרִים.
A dining-room and a bed-room.	חֲדַר־אֹכֶל וַחֲדַר־מִשְׁכָּב.
A parlor and a kitchen.	טְרַקְלִין וּמִטְבָּח.
A hall and a lavatory.	פְּרוֹזְדוֹר וּבֵית־כִּסֵּא.
The house has all the conveniences.	לַבַּיִת יֵשׁ כָּל הַהֲרָוָחוֹת.
Running water in the house.	מֵי־צְנוֹרוֹת בַּבַּיִת.
Hot water at all times.	מַיִם חַמִּים בְּכָל עֵת.
A bath and shower.	אַמְבַּטָּה וּמִקְלַחַת.
Steam heat.	חֹם שֶׁל קִיטוֹר.
The house is light and airy.	הַבַּיִת מָלֵא אוֹר וְאַוִיר.

The windows open on the street.	הַחַלּוֹנוֹת פּוֹנִים אֶל הָרְחוֹב.
The house has a large courtyard.	לַבַּיִת חָצֵר גְּדוֹלָה.
Also a wood-shed.	גַּם דִּיר לָעֵצִים.
Also a beautiful little garden.	וְגַם גִּנָּה קְטַנָּה וְיָפָה.
How many stories has the house?	כַּמָּה קוֹמוֹת לַבַּיִת?
Two stories with a cellar and an attic.	שְׁתֵּי קוֹמוֹת עִם מַרְתֵּף וַעֲלִיָּה.
There is also a broad veranda.	יֵשׁ גַּם מִרְפֶּסֶת רְחָבָה.
You've forgotten the main thing.	הָעִקָּר שָׁכַחְתָּ.
Is there a range (oven, stove) in your apartment?	הֵיֵשׁ בִּדִירָתְךָ תַּנּוּר?

That's a fine question to ask!	שְׁאֵלָה יָפָה שָׁאַלְתָּ!
Of course! / Most certainly!	בְּוַדַּאי וּבְוַדַּאי!
There is a range (oven, stove) for cooking and baking.	יֵשׁ תַּנּוּר לְבַשֵּׁל וְלֶאֱפוֹת.
Well then everything is just fine.	וּבְכֵן הַכֹּל טוֹב וְיָפֶה.
Go out to the market place.	צֵא אֶל הַשּׁוּק!
Call an expressman.	קְרָא לְעֶגְלוֹן!
Tell him to call.	הַזְמֵן אוֹתוֹ לָבוֹא!
He will move our things.	הוּא יַעֲבִיר אֶת הַמְּטַלְטְלִים שֶׁלָּנוּ.
How much do you want?	כַּמָּה אַתָּה רוֹצֶה?
We'll come to terms.	נָבוֹא לְעֵמֶק־הַשָּׁוֶה.
We won't quarrel.	לֹא נָבוֹא לִידֵי מַחֲלֹקֶת.

Everything will go smoothly.	הַכֹּל יֵעָלֶה יָפֶה.
First of all, hoist up the piano.	קֹדֶם־כֹּל תַּעֲלֶה אֶת הַפְּסַנְתֵּר.
Take care!	הִזָּהֵר!
Go easy!	לְאַט לְךָ!
Now we'll hear what the phonograph has to say.	עַתָּה נִשְׁמַע־נָא מַה בְּפִי הַפוֹנוֹגְרָף!
Wind up the talking machine.	כּוֹנֵן אֶת הַכְּלִי הַדּוֹבֵב!
Here is the record of "Hatikvah".	הִנֵּה הַגְּלִיל שֶׁל "הַתִּקְוָה"!
Tth door of the house is locked.	דֶּלֶת הַבַּיִת נְעוּלָה.
The door of the house is shut.	דֶּלֶת הַבַּיִת סְגוּרָה.

Have you the key with you?	הֲיֵשׁ אִתְּךָ הַמַּפְתֵּחַ?
I don't remember where I left it.	אֵינֶנִּי זוֹכֵר אֵיפֹה הִנַּחְתִּי אוֹתוֹ.
Can you get another key to fit the lock?	הַאֶפְשָׁר לְךָ לְכַוֵּן אֶל חוֹר־הַמַּנְעוּל מַפְתֵּחַ אַחֵר?
Well, let's try.	הָבָה נְנַסֶּה!
We ought to fix *mezzuzahs* on the doorposts.	צָרִיךְ לְהַדְבִּיק מְזוּזוֹת אֶל הַפְּתָחִים.
Just look, the doorstep is broken.	חֲבֵט, הַסַּף שָׁבוּר!
The repairs are not yet completed.	עוֹד לֹא נִגְמַר בֶּדֶק־הַבַּיִת.
The walls have to be papered.	צָרִיךְ לְצַפּוֹת אֶת הַכְּתָלִים בְּטַפְּיָטִים.
That will be done tomorrow.	הַדָּבָר הַזֶּה יֵעָשֶׂה מָחָר.

Do you intend to let one room?	הַחוֹשֵׁב אַתָּה לְהַשְׂכִּיר חֶדֶר?
What are you talking about?	מָה אַתָּה סָח?
I need all the rooms.	יֵשׁ לִי צֹרֶךְ בְּכָל הַחֲדָרִים.
How much do you pay for rent?	כַּמָּה אַתָּה מְשַׁלֵּם שְׂכַר־דִּירָה?
A considerable sum, but it's worth it.	מְחִיר הָגוּן, אֲבָל שׁוֶה.
It's worth while.	כְּדַאי הַדָּבָר.
I think I'll be satisfied with these rooms.	אֲנִי מְקַוֶּה לְשַׂבֵּעַ רָצוֹן מִן הַדִּירָה.
Will you please remove the sign.	הוֹאֶל־נָא לְהָסִיר אֶת הַמּוֹדָעָה מֵעַל הַבַּיִת!
"Rooms to let".	„בַּאן דִּירָה לְהַשְׂכִּיר".
One oughtn't to cause people unnecessary trouble.	אָסוּר לְהַטְרִיחַ אֲנָשִׁים לְבַטָּלָה.

I am coming to live in this house next week.	בְּעוֹד שָׁבוּעַ אָבוֹא לָדוּר בַּבַּיִת הַזֶּה.
God willing.	אִם יִרְצֶה הַשֵּׁם!
I'll have a house-warming.	אֶעֱשֶׂה חֲנֻכַּת־הַבַּיִת.
I'll give a party.	אֶעֱשֶׂה מִשְׁתֶּה.
Good luck!	בְּשָׂעָה צְלֵחָה! / בְּשָׂעָה מְצֻלַּחַת!
A year from now may you build a home in Palestine.	כָּעֵת חַיָּה תִּבְנֶה בַּיִת בְּאֶרֶץ־יִשְׂרָאֵל!
So be it!	כֵּן יְהִי רָצוֹן!
Amen!	אָמֵן!
I have to talk over matters with the landlord.	עָלַי לְהִתְדַּבֵּר אֶל בַּעַל־הַבַּיִת.
There is still need of some repairing.	צָרִיךְ עוֹד לְתַקֵּן בַּדִּירָה.

There are still some things to fix up in our quarters.	צָרִיךְ עוֹד לְהַתְקִין בַּדִּירָה.
The porch railing needs to be painted.	מַעֲקֵה־הַמִּרְפֶּסֶת אֵינֶנּוּ צָבוּעַ.
The stairs are rickety.	הַמַּדְרֵגוֹת רוֹפְפוֹת.
The kitchen hasn't had a new coat of white-wash.	הַמִּטְבָּח אֵינֶנּוּ מְסֻיָּד מֵחָדָשׁ
The ceiling of the vestibule needs to be plastered.	צָרִיךְ לָטוּחַ אֶת תִּקְרַת הַפְּרוֹדוֹר.
The floor isn't smooth.	הָרִצְפָּה אֵינֶנָּה חֲלָקָה.
I want to put up a partition in the shed.	אֲנִי רוֹצֶה לִבְנוֹת חַיִץ בַּדִּיר.
All the tenants are using one shed.	כָּל הַשְּׁכֵנִים מִשְׁתַּמְּשִׁים בְּדִיר אֶחָד.

The janitor will attend to that.	הַשּׁוֹעֵר יַעֲשֶׂה אֶת הַדָּבָר הַזֶּה.
Can I get a key for the front gate?	הַאֶפְשָׁר לְהַשִּׂיג מַפְתֵּחַ לְשַׁעַר הֶחָצֵר?
You are asking too much.	אַתָּה דּוֹרֵשׁ יוֹתֵר מִדַּי.
So we agreed in advance.	כָּךְ הִתְנִינוּ מֵרֹאשׁ.
Those were our terms.	אֵלֶּה הָיוּ הַתְּנָאִים שֶׁלָּנוּ.
Everything will be all right.	הַכֹּל עַל מְקוֹמוֹ יָבוֹא בְּשָׁלוֹם.
Don't let us quarrel.	אַל־נָא תְּהִי מְרִיבָה בֵּינֵינוּ!
All right. (So be it)	יְהִי כֵן!
I shall buy new furniture.	אֲנִי אֶקְנֶה רָהִיטִים חֲדָשִׁים.
My friend is an expert.	חֲבֵרִי הוּא מֻמְחֶה.
He knows how to furnish rooms.	הוּא יוֹדֵעַ בֵּיצַד לְרַהֵט חֲדָרִים.

He advised me to buy a bureau.	הוּא יָעַץ אִיתִי לִקְנוֹת שִׁדָּה.
The bureau has drawers.	לַשִּׁדָּה יֵשׁ מְגוֹרוֹת.
Also a closet and an ice-box.	גַּם אָרוֹן וּמְקֻרָּה.
Also a book-case.	גַּם כּוֹנִית לִסְפָרִים.
A wardrobe and a clothes-rack.	מֶלְתָּחָה וְקוֹלֵב לִבְגָדִים.
A sofa, stools and a foot-stool.	סַפָּה, סַפְסָלִים וַהֲדוֹם.
I'll also buy a rocker and an arm-chair.	כְּמוֹ־כֵן אֶקְנֶה כֶּס־נוֹעַ וְכִסֵּא־הַכֶּב.
I intend to put rugs on the floor.	אֲנִי חוֹשֵׁב לְפָרֵשׂ שְׁטִיחִים עַל הָרִצְפָּה.
Drive some nails into the wall.	קְבַע מַסְמְרוֹת בַּקִּיר!

Please hand me the hammer.	הַגֶּשׁ־נָא לִי אֶת הַפַּטִּישׁ!
Hang up the pictures.	תְּלֵה אֶת הַתְּמוּנוֹת!
Fasten the shelves to the wall.	סַמֵּר אֶת הָאֲצַטַּבוֹת אֶל הַקִּיר!
Place the flower-pots on the window-sills.	הַעֲמֵד אֶת הָעֲצִיצִים עַל אַדְנֵי הַחַלּוֹנוֹת!
There are beautiful flowers in the pots.	בָּעֲצִיצִים פְּרָחִים יָפִים.
I want to install a telephone in the house.	אֲנִי רוֹצֶה לְהַתְקִין טֶלֶפוֹן בַּבַּיִת.
I know how to telephone.	אֲנִי יוֹדֵעַ לְטַלְפֵּן.
It's easy to speak trough the telephone.	נָקֵל לְדַבֵּר בַּטֶּלֶפוֹן.
The telephone is ringing.	הַטֶּלֶפוֹן מְצַלְצֵל.

Put the receiver to your ear.	הַגַּע אֶת הַשְּׁפוֹפֶרֶת אֶל אָזְנְךָ!
Take the transmitter to your lips.	הַגַּע אֶת פִּי־הַטֶּלֶפוֹן אֶל פִּיךָ!
Talk slowly.	דַּבֵּר לְאַט!
I have to set the furniture in the proper places.	עָלַי לְהַעֲמִיד אֶת הָרְהִיטִים בַּמָּקוֹם הַנָּכוֹן.
Please, help me.	הוֹאֵל־נָא לַעֲזֹר לִי.
Move the table to one side.	דְּחֵה אֶת הַשֻּׁלְחָן הַצִּדָּה!
Put the drawers ihto the bureau.	הַכְנֵס אֶת הַמְּגֵרוֹת אֶל הַשִּׁדָּה!
The house needs an airing.	צָרִיךְ לְרַוֵּחַ אֶת הַבַּיִת.
Open the windows.	פְּתַח אֶת הַחַלּוֹנוֹת!
Hook the windows.	רְכֹּס אֶת דַּלְתוֹת הַחַלּוֹנוֹת בַּוָיוֹת!

It's hard to bolt the door.	קָשֶׁה לְהַבְרִיחַ אֶת הַדֶּלֶת.
The bolt is too thick.	הַבְּרִיחַ רָחָב יוֹתֵר מִדַּי.
The ring is too small.	הַטַּבַּעַת צָרָה יוֹתֵר מִדַּי.
The door turns on its hinges.	הַדֶּלֶת סוֹבֶבֶת עַל צִירֶיהָ.
The door knob is out of order.	כַּף־הַמַּנְעוּל נִתְקַלְקְלָה.
Sarah, take a broom.	שָׂרָה, קְחִי מַטְאֲטֵא!
Sweep the floor.	טַאְטְאִי אֶת הָרִצְפָּה!
The broom is standing in a corner.	הַמַּטְאֲטֵא עוֹמֵד בַּפִּנָּה.
The cuspidors need to be cleaned.	צָרִיךְ לְנַקּוֹת אֶת הָרְקָקִיוֹת.
Do not expectorate upon the floor.	אַל תִּירְקוּ עַל הָרִצְפָּה!
Keep the house clean.	שִׁמְרוּ עַל נְקִיּוֹן הַבַּיִת!
Do not soil the walls.	אַל תְּלַכְלְכוּ אֶת הַכְּתָלִים!

Sarah is washing the floor with soap and water.	שָׂרָה רוֹחֶצֶת אֶת הָרִצְפָּה בְּמֵי־בֹרִית.
Sarah lighted the stove with coal and wood.	שָׂרָה הִסִּיקָה אֶת הַתַּנּוּר בְּפֶחָמִים וּבְעֵצִים.
Sarah put the pots into the stove.	שָׂרָה שָׂמָה אֶת הַקְּדֵרוֹת בַּתַּנּוּר.
Sarah put the pots on the range.	שָׂרָה שָׂמָה אֶת הַקְּדֵרוֹת עַל הַכִּירָה.
She bakes and cooks.	הִיא אוֹפָה וּמְבַשֶּׁלֶת.
She cleans and washes (clothes).	הִיא מְנַקָּה וּמְכַבֶּסֶת.
She looks after the house.	הִיא צוֹפִיָּה הֲלִיכוֹת בֵּיתָהּ.
She is an excellent house-wife.	הִיא אֵשֶׁת־חַיִל.
Ring the bell.	צַלְצֵל בַּפַּעֲמוֹן!
Come into the house.	הִכָּנֵס אֶל הַבַּיִת!

שִׂים עַל הַשֻּׁלְחָן!

Have you a room to rent? — הֲיֵשׁ לְךָ חֶדֶר לְהַשְׂכִּיר?

What kind of room? — אֵיזֶה חֶדֶר?

A furnished room or an unfurnished room? — חֶדֶר מְרֻהָט אוֹ חֶדֶר לֹא־מְרֻהָט?

This house is located in a beautiful neighborhood. — הַבַּיִת הַזֶּה נִמְצָא בִּשְׁכוּנָה יָפָה.

The house is in the vicinity of the city-park. — הַבַּיִת נִמְצָא בְּקִרְבַת גַּן־הָעִיר.

The synagogue is not far from here. — בֵּית־הַכְּנֶסֶת אֵינֶנּוּ רָחוֹק מִכָּאן.

The house is fire-proof. — הַבַּיִת בָּטוּחַ מִפְּנֵי הַדְּלֵקָה.

The stairs are of stone. — הַמַּדְרֵגוֹת עֲשׂוּיוֹת אֶבֶן.

The house has fire-escapes. — יֵשׁ לַבַּיִת מַעֲקֵי־הַצָּלָה.

The house is insured. — הַבַּיִת מְבֻטָּח בַּאַחֲרָיוּת.

When will the room be vacant?	מָתַי יִתְפַּנֶּה הַחֶדֶר?
On the first of the month the tenant is going to move out.	בְּרֹאשׁ־חֹדֶשׁ יַעֲקֹר הַדַּיָּר אֶת דִּירָתוֹ.
Give me a deposit on the rent.	תֵּן לִי דְּמֵי־קִדִּימָה עַל שְׂכַר־הַדִּירָה!
Tenants come and go.	דַּיָּר הוֹלֵךְ וְדַיָּר בָּא.
Note the number of the house.	רְשֹׁם לְךָ אֶת מִסְפַּר הַבַּיִת!
I have a good memory.	יֵשׁ לִי טְבִיעוּת עַיִן.
I hope you will move into a house of your own soon. (Lit. "Dedicate your house soon")	חֲנֹךְ בֵּיתְךָ בְּקָרוֹב!

OUT OF DOORS	בַּחוּץ
It's raining.	גֶּשֶׁם יוֹרֵד.
It's windy.	הָרוּחַ מְנַשֶּׁבֶת.
It's stormy.	הַמֵּצַר סוֹעֵר.
It's lightning.	הַבְּרָקִים בּוֹרְקִים.
It's thundering.	הָרְעָמִים רוֹעֲמִים.
It's a rainy day.	הַיּוֹם יוֹם מָטִיר.
Open your umbrella.	פְּתַח אֶת הַמְּטְרִיָּה שֶׁלְּךָ!
Hold your umbrella over me too.	פְּרֹשׂ אֶת הַמְּטְרִיָּה גַּם עָלַי!
I have forgotten to put on my raincoat.	שָׁכַחְתִּי לִלְבֹּשׁ אֶת הַמְּעִיל.
How is the weather today?	מַה מֶּזֶג־הָאֲוִיר הַיּוֹם?
The weather is clear.	מֶזֶג־הָאֲוִיר צַח.
The weather is bad.	מֶזֶג־הָאֲוִיר עָכוּר.

It's raining continually today.	הַיּוֹם יוֹם גָּשׁוּם.
It's a hot day.	הַיּוֹם יוֹם שָׁחוּן.
It looks like rain.	גֶּשֶׁם מְמַשְׁמֵשׁ וּבָא.
The rainy season is here.	יְמוֹת הַגְּשָׁמִים הִגִּיעוּ.
It will be warm today.	הַיּוֹם יִהְיֶה חַם.
It will be cold today.	הַיּוֹם יִהְיֶה קַר.
Let's find shelter in the doorway.	נִסְתַּתֵּר בְּפֶתַח הַבַּיִת.
It's pouring.	הַמָּטָר סוֹחֵף.
It has stopped raining already.	הַמָּטָר כְּבָר חָדַל.
Let's go outside.	הָבָה נֵצֵא הַחוּצָה.
We will walk on the sidewalk.	נֵלֵךְ עַל הַמִּדְרָכָה.
The sky has become clear.	הַשָּׁמַיִם נַעֲשׂוּ בְּהִירִים.
The air is so pleasant.	הָאֲוִיר נָעִים כָּל־כָּךְ.

It's good to go walking now.	טוֹב לְטַיֵּל עַכְשָׁיו.
The sun is shining.	הַשֶּׁמֶשׁ זוֹרַחַת.
It's neither cold nor warm today.	הַיּוֹם לֹא קַר וְלֹא חַם.
The heat is unendurable.	אֵין לָשֵׂאת אֶת הַחֹם.
The cold is unendurable.	אֵין לָשֵׂאת אֶת הַקֹּר.
It's hard to stay out of doors.	קָשֶׁה לָלֶכֶת בַּחוּץ.
How high was the temperature yesterday?	כַּמָּה מַעֲלוֹת עָלָה הַחֹם אֶתְמוֹל ?
It will be cooler in a little while.	עוֹד מְעַט יִתְקָרֵר הָאֲוִיר.
I think it's getting warmer.	לְפִי דַעְתִּי, יִתְחַמֵּם הָאֲוִיר.
You can't be certain.	אֵין לָדַעַת בָּרוּר.

The weather is changing.	מֶזֶג־הָאֲוִיר מִתְחַלֵּף.
The sun is too strong here.	פֹּה הַשֶּׁמֶשׁ בּוֹעֶרֶת.
Let's cross to the other side.	נַעֲבֹר אֶל הַמִּדְרָכָה הַשֵּׁנִית.
The shade there is refreshing.	שָׁם צֵל מְשִׁיב־נֶפֶשׁ.
Let's walk in the shade.	נֵלֵךְ בַּצֵּל.
See that you don't get sunburnt.	הִזָּהֵר שֶׁלֹּא תִּשְׂתָּרֵב!
See that you don't get wet in the rain.	הִזָּהֵר שֶׁלֹּא תֵּרָטֵב בַּגֶּשֶׁם!
The hot spell in the city is very bad.	הַשָּׁרָב בָּעִיר קָשֶׁה מְאֹד.
I am very cold.	קַר לִי מְאֹד.
I am very warm.	חַם לִי מְאֹד.
The air is damp now.	הָאֲוִיר עַכְשָׁיו לַח.

The air was dry.	הָאֲוִיר הָיָה יָבֵשׁ.
I don't like a cloudy day.	אֵינֶנִי אוֹהֵב יוֹם מְעֻנָּן.
There are clouds in the sky.	עֲנָנִים מְרַחֲפִים בַּשָּׁמַיִם.
It's dark and foggy outside.	חֹשֶׁךְ וַעֲרָפֶל בַּחוּץ.
It's snowing.	שֶׁלֶג יוֹרֵד.
Everybody is covered with snow.	כָּל הָאֲנָשִׁים מְכֻסִּים שֶׁלֶג.
I have to shake off the snow.	עָלַי לְנַעֵר אֶת הַשֶּׁלֶג מֵעָלַי.
The boys are throwing snowballs.	הַנְּעָרִים זוֹרְקִים כַּדּוּרֵי שֶׁלֶג.
You rascals, don't throw at me.	הוֹי, שׁוֹבְבִים, אַל תִּזְרְקוּ עָלַי!
I'll get after you.	הִנְנִי עֲלֵיכֶם!
Stop!	חִדְלוּ!

Those children are making a snow man.	הַיְלָדִים הָהֵם עוֹשִׂים גֶּלֶם שֶׁל שֶׁלֶג.
Suddenly it began to hail.	פִּתְאֹם יָרַד בָּרָד.
I didn't expect that.	לַדָּבָר הַזֶּה לֹא פִּלַּלְתִּי.
Look, here's a sliding pond.	רְאֵה, הִנֵּה חֲלַקְלַקָּה!
Boys are sliding.	הַנְּעָרִים מַחֲלִיקִים.
Put on ice skates.	שִׂים מַחֲלִיקַיִם לְנַעֲלֶיךָ!
This boy is cutting all sorts of capers on the ice.	הַנַּעַר הַזֶּה עוֹשֶׂה כְּרָכוּרִים שׁוֹנִים עַל הַקֶּרַח.
Can you do what he is doing?	הֲיָכֹל גַּם אַתָּה לַעֲשׂוֹת כָּמוֹהוּ?
If I practice, I will (be able).	כַּאֲשֶׁר אֶתְאַמֵּן, אוּכַל.
I don't believe it.	אֵינֶנִּי מַאֲמִין.

The frost has made figures on the window pane.	הַכְּפוֹר עָשָׂה צִיּוּרִים עַל הַזְּגוּגִית.
The frost is a great artist.	הַכְּפוֹר הוּא אָמָן גָּדוֹל.
What's that?	מַה זֶּה?
Lights are hanging down from the roofs.	נֵרוֹת תְּלוּיִים מִקְצוֹת הַגַּגוֹת
No, those are icicles.	לֹא, אֵלֶּה הֵם צִיצֵי־קֶרַח.
How beautiful!	מַה יָּפֶה!
This old gentleman is always sitting in the sun.	הַזָּקֵן הַזֶּה יוֹשֵׁב תָּמִיד בַּחַמָּה.
The sun has set.	הַחַמָּה שָׁקְעָה.
The street lamps have been lit.	פַּנְסֵי־הָרְחוֹבוֹת הָדְלְקוּ.
Let's go out for a walk in the park.	נֵצֵא לְטַיֵּל בַּגַּן.

It's rather warm here.	כַּאן חַמִים.
It's cool (rather cold) there now.	שָׁם קָרִיר עַתָּה.
There is an acquaintance of mine walking on the other side of the street.	הִנֵּה מַכִּירִי הוֹלֵךְ מֵעֵבֶר לָרְחוֹב.
Efrosi, come here.	אֶפְרָתִי, קְרַב הֵנָּה!
Don't shout so on the street.	אַל תִּצְעַק כָּל־כַּךְ בָּרְחוֹב!
Why are you making such a racket?	מַה לְּךְ כִּי נִזְעַקְתָּ?
It's ill-mannered. It isn't nice.	לֹא נָאֶה.
He is not coming over to you.	הוּא אֵינֶנּוּ בָּא אֵלֶיךְ.
He is going his way.	הוּא הוֹלֵךְ לוֹ לְדַרְכּוֹ.

He doesn't hear you on account of the noise.	הוּא לֹא שָׁמַע אֶת קוֹלְךָ מִפְּנֵי הָרַעַשׁ.
Well, you will meet him some other time.	תִּוָּדְכֵן עִמּוֹ בְּשָׁעָה אַחֶרֶת.
I had something to tell him just now.	עָלַי הָיָה לְדַבֵּר אֵלָיו דַּוְקָא עַכְשָׁיו.
To bad.	חֲבָל!
What a commotion in the street.	כַּמָּה רַבָּה הַתְּנוּעָה בָּרְחוֹב!
A great many people, vehicles, and animals.	אֲנָשִׁים, עֲגָלוֹת וּבְהֵמוֹת לָרֹב.
Be careful when crossing the street.	הִזָּהֵר בְּעָבְרְךָ אֶת הָרְחוֹב!
It's dangerous.	סַכָּנָה בְּדָבָר.
Look sharp on all sides.	שִׂים אֶת עֵינֶיךָ אֶל כָּל צַד!
There goes an automobile.	הִנֵּה אַבְטוֹמוֹבִיל רָץ.

A negro is driving the automobile.	כּוּשִׁי נוֹהֵג בָּאַבְטוֹמוֹבִיל.
Say, chauffeur, don't drive the automobile so fast.	הַנּוֹהֵג, אַל תָּרִיץ אֶת הָאַבְטוֹמוֹבִיל בְּחִפָּזוֹן!
It's against the law.	זֹאת הִיא עֲבֵרָה עַל הַחֹק.
It's not allowed (it's prohibited).	אָסוּר לַעֲשׂוֹת כֵּן.
What's the excitement there about?	מָה הַמְּהוּמָה שָׁם?
There has been an accident.	אָסוֹן קָרָה.
A man has been hurt.	אִישׁ נִפְצַע.
He was run over the leg by a wagon.	עֲגָלָה עָבְרָה עַל רַגְלוֹ.
Call for help.	קִרְאוּ לְעֶזְרָה!
Help!	הוֹשִׁיעוּ!

Listen; there's a bell ringing.	שְׁמַע, הִנֵּה קוֹל מְצִלָּה!
An ambulance came quickly.	עֶגְלַת־הַצָּלָה בָּאָה מְהֵרָה.
The injured man was taken to the hospital.	הַפָּצוּעַ הוּבַל אֶל בֵּית־הַחוֹלִים.
The crowd dispersed.	הַקָּהָל הִתְפַּזֵּר.
Do you know, sir, where the Rabbi lives?	אֲדוֹנִי, הֲיוֹדֵעַ אַתָּה אֵיזֶה מָקוֹם הָרַב?
In that narrow street (side street) opposite.	בַּסִּמְטָה הַזֹּאת אֲשֶׁר מִנֶּגֶד.
You will read there the sign on the house.	שָׁם תִּקְרָא בַּשֶּׁלֶט אֲשֶׁר עַל הַקִּיר.
I must ride uptown.	עָלַי לִנְסֹעַ אֶל מַעֲלֵה־הָעִיר.
I must ride downtown.	עָלַי לִנְסֹעַ אֶל מוֹרַד־הָעִיר.
There's the car line.	הִנֵּה מְסִלַּת הָרֶחוֹב.
Get into the car.	עֲלֵה בַּקָּרוֹן!

Pay your fare.	שַׁלֵּם דְּמֵי הַכַּרְטִיס!
Tell the conductor to stop the car at the next corner.	הַגֵּד לַמְּנַהֵג, כִּי יַפְסִיק אֶת הַקָּרוֹן בְּרְחוֹב הַבָּמוּךְ!
Please stop here!	בְּבַקָּשָׁה, הַפְסֵק כַּאן!
Is there a subway and an elevated in this town?	הֲיֵשׁ בָּעִיר הַזֹּאת רַכֶּבֶת תַּחְתִּית וְרַכֶּבֶת עִלִּית?
No, this is not a big city.	לֹא, אֵין זֶה כְּרָךְ.
I like to ride on a bicycle.	אֲנִי אוֹהֵב לִרְכַּב עַל אוֹפַנַּיִם.
Can you tell me, sir, where the X suburb is?	אֲדוֹנִי, אַיֵּה פַּרְבָּר פְּלוֹנִי?
I don't know myself.	גַּם אֲנִי אֵינֶנִי יוֹדֵעַ.
I am not a resident here.	אֵינֶנִי בֶּן הַמָּקוֹם.

Ask the policeman standing on the corner.	שְׁאַל אֶת פִּי הַשּׁוֹטֵר הָעוֹמֵד בְּקֶרֶן הָרְחוֹב !
You have to take the bridge or the ferry across the river.	עָלֶיךָ לַעֲבֹר אֶת דֶּרֶךְ הַגָּהָר בַּגֶּשֶׁר או בַּמַּעְבָּרָה.
Look, there's the court house.	רְאֵה, הִנֵּה פֹּה בֵּית־הַמִּשְׁפָּט !
A tall, beautiful building.	בִּנְיָן רָם וְיָפֶה.
The street pavement is so clean.	מַרְצֶפֶת הָרְחוֹב כָּל־כָּךְ נְקִיָּה.
The pavement is sprinkled every day.	מְרַבְּצִים אֶת הַמַּרְצֶפֶת בְּכָל יוֹם.
They are always cleaning the streets.	תָּמִיד מְנַקִּים אֶת הָרְחוֹבוֹת.
I want to step into the bank.	אֲנִי רוֹצֶה לָסוּר אֶל הַשִּׁלְחָנִיָּה.

Tne bank is on Fourth Avenue.	הַשֶּׁלְחָנִיָה נִמְצֵאת בַּשְּׂדֶרָה הָרְבִיעִית.
I'll find the way myself.	אֲנִי אֶמְצָא בְּעַצְמִי אֶת הַדֶּרֶךְ.
The city is lit up by eiectric lights at night.	אוֹר הַחַשְׁמַל מֵאִיר אֶת הָעִיר בַּלַּיְלָה.
This is the most beautiful section of the city.	זֹאת הִיא הַשְּׁכוּנָה הַיּוֹתֵר יָפָה בָּעִיר.
The statue of Heine stands in the central square.	הַפֶּסֶל שֶׁל הַיְנֶה עוֹמֵד בַּמִּגְרָשׁ הַמֶּרְכָּזִי.
How do you get to the Zionist club house?	מָה הַדֶּרֶךְ אֶל בֵּית הָאֲגֻדָּה הַצִּיּוֹנִית?
It's a straight road.	הַדֶּרֶךְ יְשָׁרָה.
Don't turn to the right.	אַל תִּפְנֶה עַל יָמִין!
Don't turn to the left.	אַל תִּפְנֶה עַל שְׂמֹאל!

The walk won't take you long.	הַהֲלִיכָה לֹא תֶּאֱרַךְ לְךָ הַרְבֵּה.
What is the distance from here to your home?	מָה הַמֶּרְחָק מִפֹּה עַד מְעוֹנְךָ?
A half hour's walk.	מַהֲלַךְ חֲצִי שָׁעָה.
With a cab you will get there in ten minutes.	בְּמֹנִית תַּגִּיעַ שָׁמָּה בְּמֶשֶׁךְ עֲשָׂרָה דַּקּוֹת.
Say, cab, (coachman) what do you charge?	הָרַכָּב, מַה שְּׂכָרְךָ?
There's a child that has lost its way.	יֶלֶד תּוֹעֶה בַּחוּץ.
It should be taken to the police station.	צָרִיךְ לְהָבִיא אוֹתוֹ אֶל בֵּית הַמִּשְׁטָרָה.
Why did the policeman arrest that man?	מִפְּנֵי מָה אָסַר הַשּׁוֹטֵר אֶת הָאִישׁ הַהוּא?
Because the man has committed a theft.	מִפְּנֵי שֶׁהָאִישׁ שָׁלַח אֶת יָדוֹ בִּגְנֵבָה.

What a scamp!	אֵךְ זֶה נָבָל!
What a contemptible fellow!	אַךְ זֶה בְּלִיַּעַל!
He deserves no mercy.	אָסוּר לְרַחֵם!
He is not even a respectable thief.	אֵין זֶה גַּנָּב בַּעַל־צוּרָה.
He is only a common pick-pocket.	הוּא רַק גּוֹנֵב־כִּיס פָּשׁוּט.
There's a sign: "no trespassing".	הִנֵּה שֶׁלֶט: „כַּאן אָסוּר לַעֲבֹר".
It's a machine factory.	זֶה בֵּית־חֲרֹשֶׁת לַעֲשִׂיַּת מְכוֹנוֹת.
Clouds of smoke rise from the tall chimney.	תִּימְרוֹת־עָשָׁן עוֹלוֹת מִן הַמַּעֲשָׁנָה הַגְּבֹהָה.
How difficult it is to breathe here.	כַּמָּה קָשֶׁה כַּאן הַנְּשִׁימָה!
Let us go away from here.	נָסוּר וְנֵלֵךְ מִזֶּה.

The air is stifling.	הָאֲוִיר מַחֲנִיק.
I want to go in to see the exhibition.	אֲנִי רוֹצֶה לָסוּר וְלִרְאוֹת אֶת הַתַּעֲרוּכָה.
Well, who is going?	מִי וָמִי הַהוֹלְכִים?
Till when is the exhibition open every day?	עַד מָתַי פְּתוּחָה הַתַּעֲרוּכָה יום יום?
We ought to inquire about that.	צָרִיךְ לַחֲקֹר אֶת הַדָּבָר.
There are interesting things to see there.	יֵשׁ לִרְאוֹת שָׁם דְּבָרִים מְעַנְיְנִים.
How do you know that?	מִנַּיִן לְךָ?
I have read it in the newspapers.	קָרָאתִי בָּעִתּוֹנִים.
Just look up there.	שָׂא עֵינֶיךָ וּרְאֵה!
An aeroplane is flying in the sky.	אוירון עָף בַּשָּׁמַיִם.
It's a glorious sight.	מַרְאֶה נֶהְדָּר.

The aeroplane rises and descends.	הָאֲוִירוֹן עוֹלֶה וְיוֹרֵד.
It's a man with wings.	זֶה אָדָם בַּעַל כְּנָפַיִם.
How wondrous are Thy works, O Lord!	נִפְלָאִים מַעֲשֶׂיךָ, אֱלֹהִים!

IN THE COUNTRY — בַּשָּׂדֶה

I have been given a vacation.	נִתְּנָה לִי פַּגְרָה.
Where will you spend your vacation?	אֵיפֹה תְּבַלֶּה אֶת יְמֵי פַּגְרָתְךָ?
I'll spend it in a village or in a colony.	אֲנִי אֲבַלֶּה בִּכְפָר אוֹ בְּמוֹשָׁבָה.
I'll board with a farmer.	אֶתְאַכְסֵן בְּבֵית אִכָּר.
There I'll live quietly.	שָׁם אֵשֵׁב בְּשַׁלְוָה.

I'll forget the noise of the big city.	אֶשְׁכַּח אֶת רַעַשׁ הַכְּרָךְ.
I'll enjoy (the delights of) nature.	אֶתְעַנֵּג עַל הַטֶּבַע.
How good it is to be in the country!	מַה טּוֹב לִהְיוֹת בַּשָּׂדֶה!
The air is so healthful here.	פֹּה הָאֲוִיר מַבְרִיא כָּל־כָּךְ.
You are surrounded by space and silence.	מְסָבִיב מֶרְחָב וּדְמָמָה.
Light and brightness.	אוֹר וְזֹהַר.
Everywhere there are trees and flowers.	בְּכָל מָקוֹם עֵצִים וּפְרָחִים.
Grass and standing grain.	עֵשֶׂב וְקָמָה.
A few buildings are also visible here and there.	גַּם בְּנָיִנִים אֲחָדִים נִרְאִים פֹּה וְשָׁם.

Do you want to come out to the courtyard?	הֲרוֹצֶה אַתָּה לָצֵאת אֶל הֶחָצֵר ?
With pleasure.	בְּרָצוֹן !
Come, and I'll show you my property.	בּוֹא וְאַרְאֶה לְךָ אֶת רְכוּשִׁי!
That's a stable for horses.	זֹאת הִיא אֻרְוָה לַסּוּסִים.
Here's the manger out of which they eat.	הִנֵּה הָאֵבוּס, אֲשֶׁר מִמֶּנּוּ הֵם אוֹכְלִים.
Here's the trough out of which they drink.	הִנֵּה הַשֹּׁקֶת, אֲשֶׁר מִמֶּנָּה הֵם שׁוֹתִים.
Give them hay or oats to eat.	תֵּן לָהֶם לֶאֱכֹל חָצִיר אוֹ שִׁבֹּלֶת־שׁוּעָל !
There, on the nail, hangs the harness.	שָׁם עַל הַיָּתֵד תְּלוּיָה הָרְתְמָה.
This is the new wagon that I've bought.	זֹאת הִיא הָעֲגָלָה הַחֲדָשָׁה, אֲשֶׁר קָנִיתִי

When do you harness the horses?	מָתַי אַתָּה רוֹתֵם אֶת הַסּוּסִים?
When I travel to the city.	כַּאֲשֶׁר אֲנִי נוֹסֵעַ אֶל הָעִיר.
I have a stall for the cattle.	יֵשׁ לִי רֶפֶת לַבָּקָר.
A sheepfold for the sheep.	מִכְלָאָה לַצֹּאן.
Also a chicken-coop.	גַּם לוּל לַתַּרְנְגֹלִים.
Also a dove-cot.	גַּם שׁוֹבָךְ לַיּוֹנִים.
Drink some fresh (warm) milk.	שְׁתֵה־נָא חָלָב חַם!
My daughter milked the cow not long ago.	בִּתִּי חָלְבָה אֶת הַפָּרָה זֶה לֹא כְבָר.
Won't you try some of our dairy products?	אֲכָל־נָא מִעַט מִמַּעֲשֵׂי־הֶחָלָב שֶׁלָּנוּ!
The butter we churned today.	אֶת הַחֶמְאָה חִבַּצְנוּ הַיּוֹם.

The cheese and cream we also made ourselves.	גַּם אֶת הַגְּבִינָה וְהַזְּבָדָה עָשִׂינוּ בְּעַצְמֵנוּ.
Do you like sour milk?	הַאוֹהֵב אַתָּה קוּם?
I certainly do like it.	בְּוַדַּאי אֲנִי אוֹהֵב.
I am accustomed to drink sour milk.	אֲנִי רָגִיל לִשְׁתּוֹת קוּם.
Yig'al, get the bucket.	יִגְאָל, הָבֵא לִי אֶת הַדְּלִי!
I have to draw fresh water from the well.	אֲנִי צָרִיךְ לִדְלוֹת מִן הַבְּאֵר מַיִם חַיִּים.
I hear (a dog) barking.	קוֹל נְבִיחָה אֲנִי שׁוֹמֵעַ.
That's Yaktan, our faithful dog.	זֶה קוֹל יָקְטָן כַּלְבֵּנוּ הַנֶּאֱמָן.
He has a way of barking whenever a stranger approaches.	דַּרְכּוֹ לִנְבֹּחַ בְּבוֹא אִישׁ זָר.
Be quiet, Yaktan, stop barking.	דֹּם, יָקְטָן, אַל תִּבַּח!

Come with me to my garden.	בוֹא־נָא אִתִּי אֶל גִּנָּתִי!
It's a vegetable garden.	זֹאת הִיא גִּנַּת־יָרָק.
Be careful not to step on the beds.	הִזָּהֵר שֶׁלֹּא תִדְרֹךְ עַל הַתְּלָמִים!
Walk in the paths between the beds.	לֵךְ בַּשְּׁבִילִים אֲשֶׁר בֵּין הַתְּלָמִים!
What grows in the garden?	מַה צוֹמֵחַ בַּגִּנָּה?
Many kinds of vegetables.	כַּמָּה מִינִים שֶׁל יְרָקוֹת.
Carrots, radishes, and horse-radish.	גֶּזֶר, צְנוֹן וַחֲזֶרֶת.
Cucumbers, onions, and tomatoes.	קִשּׁוּאִים, בְּצָלִים וְעַגְבָנִיוֹת.
Cabbage, beets, and potatoes.	כְּרוּב, סְלֶק וְתַפּוּחֵי־אֲדָמָה
Beans and peas.	פּוֹלִים וַאֲפוּנִים.

Don't pluck the plants before they are ripe.	אַל תִּתְלֹשׁ אֶת הַצְּמָחִים קֹדֶם שֶׁבָּשְׁלוּ!
Do you sell the vegetables?	הֲמוֹכֵר אַתָּה אֶת הַיְרָקוֹת?
No, the vegetables suffice only for our own needs.	לֹא, הַיְרָקוֹת מַסְפִּיקִים לְצָרְכֵי עַצְמֵנוּ.
Who sowed your garden?	מִי זָרַע אֶת גִּנָּתְךָ?
I sowed it with my own hands.	אֲנִי בְּעֶצֶם יָדַי זָרַעְתִּי אֶת הַגִּנָּה.
I have put a lot of labor into the garden.	הַרְבֵּה טָרַחְתִּי בַּגִּנָּה.
First, I dug up the ground with a spade.	קֹדֶם־כֹּל עָדַרְתִּי בְּמַעְדֵּר.
Then I manured it.	אַחַר־כָּן זַבַּלְתִּי.
I plowed it with a plow.	חָרַשְׁתִּי בְּמַחֲרֵשָׁה.

When did you plow?	מָתַי חָרַשְׁתָּ?
In the plowing season — in the spring.	בְּחָרִישׁ — בִּימֵי הָאָבִיב.
Why don't you buy an electric plow?	מַדּוּעַ אֵינְךָ קוֹנֶה מַחֲרֵשָׁה חַשְׁמַלִּית?
I'll buy that, too, soon.	בְּקָרוֹב אֶקְנֶה לִי גַּם אֶת זֹאת.
Do you also level the ground in the garden?	הַמְשַׁדֵּד אַתָּה אֶת הַגִּנָּה גַּם כֵּן?
I sometimes level it with a hoe.	יֵשׁ אֲשֶׁר אֲנִי מְשַׁדֵּד בְּמַשְׁדֵּדָה.
I water my garden with a sprinkler.	אֲנִי מַשְׁקֶה אֶת גִּנָּתִי בְּמַשְׁפֵּךְ.
You are a good gardener.	אַתָּה גַּנָּן טוֹב.
With God's help!	בְּעֶזְרַת הַשֵּׁם!
Will the crop turn out well?	הֲיַעֲלֶה הַיְבוּל יָפֶה?

For the present, you can't be sure.	לְעֵת־עַתָּה אֵין לָדַעַת בָּרוּר.
I'm hoping for a prosperous year.	אֲנִי מְצַפֶּה לִשְׁנַת בְּרָכָה.
The rains came in season.	הַגְּשָׁמִים יָרְדוּ בְּעִתָּם.
What beautiful flowers!	כַּמָּה יָפִים הַפְּרָחִים!
They smell sweet.	הֵם נוֹתְנִים רֵיחַ נָעִים.
Don't touch them.	אַל תִּגַּע בָּהֶם!
Don't pluck them.	אַל תִּקְטֹף אוֹתָם!
In a few weeks, the vegetables will ripen.	בְּעוֹד שָׁבוּעוֹת אֲחָדִים יִבְשְׁלוּ הַיְרָקוֹת.
Then I'll have a lot of work.	אָז תִּהְיֶה לִי עֲבוֹדָה מְרֻבָּה.
I'll have to pick the vegetables.	עָלַי יִהְיֶה לִלְקֹט אֶת הַיְרָקוֹת.
Perhaps you'll give me a little help?	אוּלַי תַּעֲזֹר לִי מְעַט?

I will gladly help you.	בְּחֵפֶץ־לֵב אֶעֱזֹר לְךָ.
Happy man!	אַשְׁרֶיךָ!
You eat the fruit of your own toil.	אַתָּה אוֹכֵל אֶת יְגִיעַ־כַּפֶּיךָ.
What's that figure there, standing on one leg?	מִי שָׁם הַגֶּלֶם הָעוֹמֵד עַל רֶגֶל אַחַת?
It's a scarecrow.	זֶה דַּחְלִיל.
It frightens away the birds.	הוּא מַפְחִיד אֶת הַצִּפֳּרִים.
Have you a beehive?	הֲיֵשׁ לְךָ כַּוֶּרֶת?
Yes, I raise bees.	כֵּן, אֲנִי מְגַדֵּל דְּבוֹרִים.
I collect the honey.	אֲנִי רוֹדֶה דְּבַשׁ.
I sell the honey in town.	אֶת הַדְּבַשׁ אֲנִי מוֹכֵר בָּעִיר.
Do you see a herd in the distance?	אַתָּה רוֹאֶה עֵדֶר מֵרָחוֹק?
It's returning from pasture.	הוּא שָׁב מִן הַמִּרְעֶה.

There goes the shepherd.	הִנֵּה הוֹלֵךְ הָרוֹעֶה.
Where does the herd pasture?	אַיֵּה רוֹעֶה הָעֵדֶר?
In the meadow, outside of the colony.	בָּאָחוּ מִחוּץ לַמוֹשָׁבָה.
It's evening.	הָעֶרֶב בָּא.
Come, let's sit on the veranda of my house.	בּוֹא וְנֵשֵׁב בְּמִרְפֶּסֶת בֵּיתִי!
We'll drink tea.	נִשְׁתֶּה־נָּא תֵה!
What are those shots that I'm hearing?	מָה הַיְרִיוֹת אֲשֶׁר אֲנִי שׁוֹמֵעַ?
It's the *Shomerim* (guards).	אֵלֶּה הֵם הַשּׁוֹמְרִים.
They ride on horses.	הֵם רוֹכְבִים עַל סוּסִים.
They encircle the colony at night.	הֵם סוֹבְבִים אֶת הַמּוֹשָׁבָה בַּלֵּילוֹת.

They protect our property against thieves.	הֵם שׁוֹמְרִים אֶת רְכוּשֵׁנוּ מִפְּנֵי הַגַּנָּבִים.
Do you hear people singing softly?	הֲשׁוֹמֵעַ אַתָּה קוֹל זִמְרָה דַּקָּה?
The *Shomerim* are singing Hebrew songs.	הַשּׁוֹמְרִים שָׁרִים שִׁירִים עִבְרִים.
Who looks after your household?	מִי מַשְׁגִּיחַ עַל הַמִּשְׁק שֶׁלְּךָ?
I do, and my wife and sons help me.	אֲנִי וְגַם אִשְׁתִּי וּבָנַי עוֹזְרִים עַל יָדִי.
Do you want to go with me to the threshing-floor?	הֲרוֹצֶה אַתָּה לָלֶכֶת עִמִּי אֶל הַגֹּרֶן?
There you will see a fine sight.	שָׁם תִּרְאֶה דָּבָר יָפֶה.
The colonists gather there in the evening.	בְּנֵי הַמּוֹשָׁבָה מִתְאַסְּפִים שָׁם בָּעֲרָבִים.

They sing, play, and make merry.	הֵם מְזַמְּרִים, מְשַׂחֲקִים וּמִשְׁתּוֹבְבִים.
From the threshingfloor comes the sound of joyous, merry voices.	מִן הַגֹּרֶן נִשְׁמָעִים קוֹלוֹת שִׂמְחָה וְצָהֳלָה.
Such is Jewish life here.	כָּךְ הֵם הַחַיִּים הָעִבְרִים כָּאן.
Such is a Jewish colony in Palestine.	כָּךְ הִיא מוֹשָׁבָה עִבְרִית בְּאֶרֶץ־יִשְׂרָאֵל.
Where shall we sleep tonight?	אֵיפֹה נָלִין הַלַּיְלָה?
In the hut in my garden.	בְּמִלּוֹנַת גַּנִּי.
Ding! Dong! A bell is ringing.	צְלִיל, צְלִיל!—קוֹל פַּעֲמוֹן.
It's the colony's bell that's ringing.	פַּעֲמוֹן־הַמּוֹשָׁבָה מְצַלְצֵל.
It summons to work in the morning.	הוּא קוֹרֵא בַּבֹּקֶר לַעֲבוֹדָה.

Soon you will see the workmen.	עוֹד מְעַט תִּרְאֶה אֶת הַפּוֹעֲלִים.
There they go singing.	הִנֵּה הֵם הוֹלְכִים בְּרִנָּה.
The Lord be with you, Jewish workmen!	אֲדֹנָי עִמָּכֶם, פּוֹעֲלִים עִבְרִים!
Let's go out to the field.	נֵצֵא אֶל הַשָּׂדֶה!
The ears (of grain) are full.	הַשִּׁבֳּלִים מְלֵאוֹת.
They sway in the wind.	הֵן נָעוֹת בָּרוּחַ.
What crops grow in the field?	אֵיזוֹ תְּבוּאוֹת צוֹמְחוֹת בַּשָּׂדֶה?
Many kinds of grain.	כַּמָּה מִינֵי דָגָן.
Rye, wheat, barley, and oats.	שִׁפּוֹן, חִטָּה, שְׂעֹרָה וְשִׁבֹּלֶת שׁוּעָל.
Let's rest a while.	נָנוּחַ מְעַט.
We'll stretch out on the grass.	נִשְׁתַּטֵּחַ עַל הָעֵשֶׂב.
How beautiful is nature!	מַה יָּפֶה הַטֶּבַע!

What are the workmen doing here?	מָה עוֹשִׂים פֹּה הַפּוֹעֲלִים?
They are harvesting the (standing) grain.	הֵם קוֹצְרִים אֶת הַקָּמָה.
This is harvest time.	עֵת קְצִיר.
With what do they reap?	בַּמֶּה קוֹצְרִים?
With a harvester.	בְּמַקְצֵרָה.
In other fields they reap with a sickle.	בִּשְׂדוֹת אֲחֵרִים קוֹצְרִים בְּחֶרְמֵשׁ.
There they are binding sheaves.	הִנֵּה מְאַלְּמִים אֲלֻמִּים.
The grain is loaded on wagons.	טוֹעֲנִים אֶת הַתְּבוּאָה עַל עֲגָלוֹת.
The grain is taken to the threshing-floor.	מוֹבִילִים אֶת הַתְּבוּאָה אֶל הַגֹּרֶן.
Why are there several stacks on the threshing-floor?	מִפְּנֵי מַה יֵּשׁ בַּגֹּרֶן עֲרֵמוֹת אֲחָדוֹת?

Every stack belongs to another farmer.	כָּל עֲרֵמָה שֶׁל תְּבוּאָה שַׁיֶּכֶת לְאִכָּר אֶחָד.
Wait a while, and you will see the threshing.	חַכֵּה מְעַט וְתִרְאֶה אֶת הַדִּישׁ!
There they are threshing with threshing machines.	הִנֵּה הֵדִשִׁים בִּמְכוֹנַת־דִּישָׁה.
The grains drop from the ears.	הַגַּרְעִינִים נוֹשְׁרִים מִן הַשִּׁבֳּלִים.
On other threshing-floors they thresh with a flail.	בְּגָרָנוֹת אֲחֵרוֹת דָּשִׁים בְּמוֹרָג.
There they are winnowing the grain with a winnowing basket.	שָׁם זוֹרִים אֶת הַתְּבוּאָה בְּמִזְרֶה.
Is the work on the threshing-floor all done?	הַכִּכָּר נִגְמְרָה כָּל עֲבוֹדוֹת הַגֹּרֶן?

Not yet.	עֲדַיִן לֹא.
With a rake they gather it all into heaps.	בְּמַגּוֹב מְגַבְּבִים עֲרֵמוֹת עֲרֵמוֹת.
The chaff and the straw go into one heap.	עֲרֵמוֹת הַמּוֹץ וְהַתֶּבֶן לְחוּד.
The threshed grain goes into another (heap).	עֲרֵמוֹת הַמְּדוּשָׁה לְחוּד.
And what will they do afterwards?	וּמַה יַּעֲשׂוּ אַחַר־כָּךְ?
Afterwards the heaps are stuffed into sacks.	אַחַר־כָּךְ מְאַסְּפִים אֶת הָעֲרֵמוֹת לְתוֹךְ שַׂקִּים.
The sacks are brought to the granary.	מְבִיאִים אֶת הַשַּׂקִּים אֶל הָאָסָם.
And where do they grind the grain?	וְאַיֵּה טוֹחֲנִים אֶת הַתְּבוּאָה?
We have a mill (here) in our colony.	כָּאן בַּמּוֹשָׁבָה יֵשׁ לָנוּ טַחֲנָה.
This is a windmill.	זֹאת הִיא טַחֲנָה שֶׁל רוּחַ.

Soon we'll build a steam-mill.	בְּקָרוֹב נִבְנֶה כַּאן טַחֲנָה שֶׁל קִיטוֹר.
Millstones grind bran, flour, and fine flour.	הָרֵחַיִם טוֹחֲנִים סְבִיב, קֶמַח וְסֹלֶת.
The miller and the workers are covered with flour.	הַטּוֹחֵן וְהַפּוֹעֲלִים מְקֻמָּחִים.
I must work today in an orchard.	עָלַי לַעֲבֹד הַיּוֹם בְּגַן־פְּרִי.
Your orchard is really lovely.	גַּנְךָ נֶחְמָד בֶּאֱמֶת.
I have put a lot of labor into my orchard.	הִשְׁקַעְתִּי בְּגַנִּי הַרְבֵּה כֹּחַ.
How many kinds of fruit grow there?	כַּמָּה מִינִים שֶׁל פֵּרוֹת צוֹמְחִים שָׁם?
Apples, pears, and peaches.	תַּפּוּחִים, אֲגָסִים וְאַפַּרְסְקִים

Plums, cherries, and carobs.	שְׁזִפִּים, דְּבְדְּבָנִים וְחַרוּבִים.
I intend to plant new trees.	בְּדַעְתִּי לִנְטֹעַ עֵצִים חֲדָשִׁים.
Let me have the pruning-knife.	הַגִּישׁ־נָא לִי אֶת הַמַּזְמֵרָה!
I have to prune the tops of the branches.	אֲנִי צָרִיךְ לִזְמֹר אֶת רָאשֵׁי הָעֲנָפִים.
I also have to do some lopping off.	עוֹד עָלַי לְסָעֵף.
Tomorrow I'll cut off the withered twigs.	מָחָר אֶסְעֹף אֶת הָעֲנָפִים הַיְבֵשִׁים.
You have to watch carefully (Lit. "with seven eyes") over the trees in the grove.	צָרִיךְ לְהַשְׁגִּיחַ בְּשִׁבְעָה עֵינַיִם עַל עֲצֵי הַגָּן.
Don't climb the trees.	אַל תְּטַפֵּס עַל הָעֵצִים!

This is the oldest tree in the grove.	הָעֵץ הַזֶּה הוּא הַזָּקֵן בְּעֲצֵי הַגַּן.
	הָעֵץ הַזֶּה הוּא הַיּוֹתֵר זָקֵן בַּגַּן.
How beautiful is the treetop!	כַּמָּה נָאָה צַמֶּרֶת הָעֵץ!
Are these all fruit trees?	הַאִם כָּל הָעֵצִים עֲצֵי־פְּרִי הֵם?
Not all.	לֹא כֻלָּם.
There are also trees that are not fruit-bearing.	יֵשׁ גַּם אִילָנֵי־סָרָק.
I am going to remove (root up) the trees that are not fruit-bearing.	אֲנִי עוֹמֵד לַעֲקֹר אֶת אִילָנֵי־הַסָּרָק.
I haven't enough room in the grove.	אֵין לִי דַי מָקוֹם בַּגַּן.

I dig ditches around the trees.	אֲנִי חוֹפֵר תְּעָלוֹת מְסָבִיב לָעֵצִים.
By means of these ditches I water the trees.	בַּתְּעָלוֹת אֲנִי מַשְׁקֶה אֶת הָעֵצִים.
I have not yet finished weeding.	עוֹד לֹא גָמַרְתִּי לְנַכֵּשׁ.
In a corner of the grove there are some bushes.	בְּפִנַּת הַגַּן נִמְצָאִים שִׂיחִים אֲחָדִים.
The bushes yield various kinds of berries.	הַשִּׂיחִים מַצְמִיחִים גַּרְגְּרִים שׁוֹנִים.
You have not yet seen my vineyard.	עוֹד לֹא רָאִיתָ אֶת כַּרְמִי.
The vineyard is at the foot of the hill.	הַכֶּרֶם נִמְצָא לְרַגְלֵי הָהָר.
In the vineyard there grow vines.	בַּכֶּרֶם צוֹמְחִים עֲצֵי גֶּפֶן.
These are olives trees, fig trees, and almond trees.	אֵלֶּה הֵם עֲצֵי זַיִת, תְּאֵנָה וְשָׁקֵד.

Please bring the young trees from the nursery.	הָבֵא־נָא אֶת הַשְּׁתִילִים מִן הַמַּשְׁתֵּלָה!
I'll plant the young trees at the edge of my vineyard.	אֶת הַשְּׁתִילִים אֶשְׁתֹּל בְּקְצֵה כַּרְמִי.
The young trees have taken root.	הַשְּׁתִילִים הִכּוּ שֹׁרֶשׁ.
The bark has already hardened.	הַקְּלִפָּה כְּבָר קָשָׁה.
The trunk is firm.	הַגֶּזַע חָזָק.
The trees are blossoming	הָעֵצִים מְלַבְלְבִים.
What's there, in the center of the vineyard?	מַה שָּׁם בְּאֶמְצַע הַכֶּרֶם?
That's a hut for the watchman.	זֹאת הִיא סֻכָּה לַנּוֹטֵר.

The first of the ripened grapes are already appearing.	בְּכָר נִרְאוּ בְּכוּרֵי הָעֲנָבִים.
Pluck a cluster of grapes and eat it.	קְטֹף אֶשְׁכּוֹל עֲנָבִים וְאֶכֹל!
Don't eat unripe fruit.	אַל תֹּאכַל בֹּסֶר!
The vintage (season) is here.	הִגִּיעַ זְמַן הַבָּצִיר.
When will the owner of the vineyard begin the vintage?	מָתַי מַתְחִיל הַכּוֹרֵם לִבְצֹר?
I have to prepare the baskets.	עָלַי לְהָכִין אֶת הַסַּלִּים.
I'm going to town to hire workmen.	אֲנִי יוֹצֵא אֶל הָעִיר לִשְׂכֹּר פּוֹעֲלִים.
What a commotion in the vineyard!	כַּמָּה רַבָּה הַתְּנוּעָה בַּכֶּרֶם!

Everybody is working industriously.	הַכֹּל עוֹבְדִים בְּשַׁקִּידָה.
There are so many wagons and camels on the roads.	כָּל־כַּךְ עֲגָלוֹת וּגְמַלִּים בַּדְּרָכִים!
They are conveying the grapes to the wine cellar.	הֵם מוֹבִילִים אֶת הָעֲנָבִים אֶל הַיֶּקֶב.
Here they press the grapes.	פֹּה דוֹרְכִים אֶת הָעֲנָבִים.
Drink some wine to our health (Lit. "Say *l'chayim*".)	שְׁתֵה יַיִן וּבָרֵךְ: "לְחַיִים!"
Where is your grove?	אַיֵּה פַּרְדֵּסְךָ?
Not far from here.	לֹא רָחוֹק מִכַּאן.
On the level land, by the bank of the river.	בַּמִּישׁוֹר עַל שְׂפַת הַנַּחַל.

Thus far, I have planted only a few plants in the grove.	לְעֵת־עַתָּה נָטַעְתִּי בַּפַּרְדֵּס רַק נְטִיעוֹת אֲחָדוֹת.
Oranges, citrons, and pomegranates.	תַּפּוּחֵי־זָהָב, אֶתְרוֹגִים וְרִמּוֹנִים.
Next year, I will plant also lemons, nuts, dates, and bananas.	בַּשָּׁנָה הַבָּאָה אֶטַּע גַּם לִמּוֹנִים, אֱגוֹזִים, תְּמָרִים וּמוֹזִים.
I have almost finished digging the well.	כִּמְעַט שֶׁגָּמַרְתִּי לַחְפֹּר אֶת הַבְּאֵר.
And now I have to make a pool.	וְעַתָּה עָלַי לִבְנוֹת בְּרֵכָה.
The conduits running from the pool will water the roots.	צִנּוֹרוֹת הַבְּרֵכָה יַשְׁקוּ אֶת הַשָּׁרָשִׁים.
I have not yet done any grafting.	עוֹד לֹא עָשִׂיתִי אֶת הַהַרְכָּבָה.
I have to graft the trees.	עָלַי לְהַרְכִּיב אֶת הָעֵצִים.

There's a butterfly on the fence.	הִנֵּה פַּרְפַּר עוֹמֵד עַל הַגָּדֵר.
The butterfly is of all colors.	הַפַּרְפַּר מְגֻוָּן.
Let's take a little stroll between the rows of trees.	נְטַיֵּל־נָא מְעַט בֵּין שׁוּרוֹת הָעֵצִים!
Are there many planters in the colony?	הֲיֵשׁ הַרְבֵּה פַּרְדְּסָנִים בַּמּוֹשָׁבָה?
Not so many.	לֹא כָּל־כַּךְ הַרְבֵּה.

NATURE — בַּטֶּבַע

The cock has crowed.	הַתַּרְנְגֹל קָרָא.
I have awakened from my sleep.	הֵקִיצוֹתִי מִשְּׁנָתִי.
The day is dawning.	הַשַּׁחַר עָלָה.
The sun has risen.	הַשֶּׁמֶשׁ יָצְאָה.

There's dew on the ground.	טַל עַל הָאָרֶץ.
"Chirp! Chirp!" — the birds are chirping.	צִיף! צִיף! — הַצִּפֳּרִים מְצַפְצְפוֹת.
The nightingale is singing.	הַזָּמִיר מְזַמֵּר.
The sky is blue.	הַשָּׁמַיִם תְּכֵלִים.
The air is clear.	הָאֲוִיר צָלוּל.
Let's go and explore the place.	נֵלֵךְ לָתוּר אֶת הַמָּקוֹם.
The landscape is beautiful.	הַנּוֹף יָפֶה.
The ground is fertile.	הָאֲדָמָה פּוֹרִיָּה.
The plants here are vigorous.	הַצְּמָחִים פֹּה רַעֲנַנִּים.
I'm thirsty.	אֲנִי צָמֵא לְמַיִם.
There's a spring.	הִנֵּה שָׁם מַעְיָן.
You can drink your fill.	תִּשְׁתֶּה וְתִרְוֶה.

Do you know what has occurred to me?	הֲיוֹדֵעַ אַתָּה מֶה עָלָה עַל דַּעְתִּי?
I'm thinking of leaving the city.	בְּדַעְתִּי לַעֲזֹב אֶת הָעִיר.
I'm sick of being a town dweller.	מָאַסְתִּי מִהְיוֹת עִירוֹנִי.
I want to be a villager.	אֲנִי רוֹצֶה לִהְיוֹת כְּפָרִי.
I like agriculture (farming).	אֲנִי אוֹהֵב אֶת עֲבוֹדַת־הָאֲדָמָה.
I'll buy an estate somewhere.	אֶקְנֶה לִי אֲחֻזָּה בְּאַחַד הַמְּקוֹמוֹת.
Near a colony or a village.	סָמוּךְ לְמוֹשָׁבָה אוֹ לִכְפָר.
Or, I'll settle on a farm.	אוֹ אֶתְיַשֵּׁב בְּחַוָּה.
I'll engage in ordinary farm-work.	אֲנִי אֶעֱסֹק בַּאֲבֹדוֹת פְּשׁוּטָה
I have some knowledge of agriculture.	יֵשׁ לִי יְדִיעָה בְּחַקְלָאוּת.

In my youth, I studied in an agricultural school.	בְּנַעֲרוּתִי לָמַדְתִּי בְּבֵית־סֵפֶר חַקְלָאִי.
I'll also learn from experience.	וְגַם הַנִּסָּיוֹן יְלַמֵּד אוֹתִי.
You'll be doing a good thing, my friend.	יָפֶה תַּעֲשֶׂה, יְדִידִי.
Look, there's a summer home (hotel).	רְאֵה, שָׁם קַיְטָנָה!
Summer boarders from the city stop there.	קַיְטָנִים בָּאִים שָׁמָּה מִן הָעִיר.
Take care not to lose your way.	הִזָּהֵר שֶׁלֹּא תִּתְעֶה מִן הַדֶּרֶךְ!
You needn't fear.	אַל תַּחְשֹׁשׁ!
I know the neighborhood well.	אֲנִי יוֹדֵעַ הֵיטֵב אֶת הַסְּבִיבָה
I'm depending upon you.	אֲנִי סוֹמֵךְ עָלֶיךָ.

We had better follow the highway.	מוּטָב שֶׁנֵּלֵךְ בְּדֶרֶךְ־הַמְּלָךְ
All right, there's the road.	טוֹב, שָׁם הַכְּבִישׁ.
Look about you.	הִתְבּוֹנֵן מִסְּבִיבְךָ!
Here's a little swamp (mud-hole).	הִנֵּה בִּצָּה קְטַנָּה.
Let's jump across the mud-hole.	נְקַפֵּץ וְנַעֲבֹר אֶת הַבִּצָּה.
There are many thorns here.	כַּאן הַרְבֵּה קוֹצִים.
Take care not to be pricked by the thorns.	הִזָּהֵר שֶׁלֹּא תִּכָּוֶה בְּקוֹצִים!
Withered leaves are on the ground.	עָלִים נוֹבְלִים עַל הָאָרֶץ.
It is now the beginning of fall,	עַתָּה רֵאשִׁית הַשַּׁלֶּכֶת.
Who pitched these tents?	מִי נָטָה אֶת הָאֳהָלִים?

They have begun to afforest the whole place.	הִתְחִילוּ לְיַעֵר אֶת כָּל הַמָּקוֹם.
This is a large area.	זֶהוּ שֶׁטַח גָּדוֹל.
Let's enter the thicket.	נִכָּנֵס בַּעֲבִי הַיַּעַר.
Don't fear.	אַל תִּפְחַד!
There are no beasts of prey in the forest.	אֵין בַּיַּעַר חַיּוֹת טוֹרְפוֹת.
The hunters don't come there to hunt.	הַצַּיָּדִים אֵינָם בָּאִים שָׁמָּה לָצוּד.
This is a young forest.	זֹאת הִיא חֹרְשָׁה צְעִירָה.
Cry out: "Hurrah!"	קְרָא בְּקוֹל: „הֵידָד!"
You'll hear an echo.	תִּשְׁמַע הֵד.
Come up the mountain with me.	עֲלֵה אִתִּי אֶל הָהָר!
It's hard for me to climb up the mountain slope.	קָשֶׁה לִי לְטַפֵּס בְּשִׁפּוּעַ הָהָר.
Take firm steps.	צְעַד בְּכֹחַ!

From the summit you'll be able to see for a distance.	מֵעַל רֹאשׁ הָהָר תִּרְאֶה לְמֶרְחוֹק.
From here you will see some fine natural scenery.	מִפֹּה תִּרְאֶה אֶת מַרְאוֹת הַטֶּבַע.
The horizon is very wide.	הָאֹפֶק רָחָב מְאֹד.
Let's go down to the valley.	נֵרֵד אֶל הַבִּקְעָה.
Look! A river runs here.	הִנֵּה נָהָר שׁוֹטֵף.
A little boat is floating on the water.	סִירָה קְטַנָּה שָׂטָה עַל הַמַּיִם
That's a fishing boat.	זֹאת הִיא סִירַת־דּוּגָה.
A fisherman has gone out to fish.	דַּיָּג יָצָא לָדוּג.
He rows the boat with oars.	הוּא מֵשִׁיט אֶת הַסִּירָה בְּמִשּׁוֹטִים.

Look, no one is holding the rudder.	רְאֵה, אֵין אִישׁ אוֹחֵז בָּהֶגֶה!
The fisherman threw a line into the river.	הַדַּיָּג הִשְׁלִיךְ חַכָּה בַּנָּהָר.
There a fish is caught on the hook.	הִנֵּה נֶאֱחַז דָּג בַּחַח.
Here the fishermen do not cast nets.	כָּאן אֵין הַדַּיָּגִים פּוֹרְשִׂים מִכְמֹרֶת.
Do you want to bathe in the river?	הֲרוֹצֶה אַתָּה לְהִתְרַחֵץ בַּנָּהָר?
Can you swim?	הֲיוֹדֵעַ אַתָּה לִשְׂחוֹת?
Take care not to drown.	הִזָּהֵר שֶׁלֹּא תִּטְבַּע!
The water is not deep.	הַמַּיִם אֵינָם עֲמֻקִּים.
Don't dive to the bottom.	אַל תִּצְלֹל אֶל הַתְּהוֹם!
I'm shivering with cold.	אֲנִי רוֹעֵד מִקֹּר.

Go out on the land and dry yourself.	עֲלֵה לַיַּבָּשָׁה וְהִסְתַּפֵּג!
Croak, croak! — the frogs are croaking.	קְבַה, קְבַה! — צְפַרְדְּעִים מְקַרְקְרוֹת.
There's a pond back of the hill.	שָׁם אֲגַם מֵאָחוֹרֵי הַגִּבְעָה.
What road leads to my hotel?	אֵיזוּ דֶּרֶךְ מוֹלִיכָה אֶל הָאַכְסַנְיָה שֶׁלִּי?
The road to the east.	הַדֶּרֶךְ הַפּוֹנָה מִזְרָחָה.
Go straight ahead.	לֵךְ יָשָׁר!
Don't stumble against the stones.	אַל תִּכָּשֵׁל בָּאֲבָנִים!
My legs are tired from walking.	רַגְלַי עֲיֵפוֹת מִלֶּכֶת.
I'm not accustomed to walk in the sand.	לֹא הִתְרַגַּלְתִּי לָלֶכֶת בַּחוֹל
This place is full of pebbles.	הַמָּקוֹם מָלֵא חָצָץ.

I've strayed far from the settlement.	הִתְרַחַקְתִּי מִן הַיִּשׁוּב.
Some people are coming toward us.	אֲנָשִׁים בָּאִים לִקְרָאתֵנוּ.
Let's go in company.	נֵלֵךְ בַּחֲבוּרָה.
Stars appear in the west.	כּוֹכָבִים נִרְאוּ בַּמַּעֲרָב.
How beautiful the moon is tonight!	מַה יָּפָה הַלְּבָנָה הַלַּיְלָה!
What are those sparks there?	מָה הַנִּיצוֹצוֹת שָׁם?
Fireflies are glimmering.	גַּחְלִילִיּוֹת מְנַצְנְצוֹת.
The country has won my heart.	הַשָּׂדֶה לָקַח אֶת לִבִּי.
Such is the power of nature.	זֶה כֹּחַ הַטֶּבַע!

ON THE WAY

בַּדֶּרֶךְ

I've decided to go away.
Where are you travelling to?

הֶחְלַטְתִּי לִנְסֹעַ מִכָּאן,
לְאָן אַתָּה נוֹסֵעַ?

To visit Palestine.
Perhaps I'll settle there.
For the present, I am a tourist.

לְבַקֵּר אֶת אֶרֶץ־יִשְׂרָאֵל.
אֶפְשָׁר אֶשְׁתַּקַּע שָׁם.
לְפִי־שָׁעָה אֲנִי תַּיָּר.

How much time will you spend on the way?

כַּמָּה זְמַן תִּשְׁהֶה בַּדֶּרֶךְ?

I can't tell in advance.
On the way, I'll stop at a few places.
I'll see my acquaintances in the country towns.

אֵינִי יָכוֹל לָדַעַת מֵרֹאשׁ.
בְּדַרְכִּי אֶתְעַכֵּב בְּאֵיזוּ מְקוֹמוֹת.
אֶתְרָאֶה עִם מַכָּרַי בְּעָרֵי־הַשָּׂדֶה.

I'll take my leave of them.	אֶקַּח מֵהֶם אֶת בִּרְכַּת־הַפְּרִידָה.
I've already secured a passport.	כְּבָר הִשַּׂגְתִּי תְּעוּדַת־מַסָּע.
I must make the necessary preparations.	עָלַי לַעֲשׂוֹת אֶת הַהֲכָנוֹת הַנְּחוּצוֹת.
I must get my baggage ready.	עָלַי לְהָכִין אֶת הַמִּטְעָן שֶׁלִּי.
I'll pack the necessary things in the valise.	בְּמִזְוָדָה אֶחְבֹּשׁ אֶת הַחֲפָצִים הַדְּרוּשִׁים.
Clothes, linens, and odds and ends.	בְּגָדִים, לְבָנִים וּדְבָרִים קְטַנִּים.
With me I'll take a handbag (satchel).	אִתִּי אֶקַּח תַּרְמִיל.
In the handbag I'll put some provisions for the journey.	בַּתַּרְמִיל אָשִׂים צֵידָה לַדֶּרֶךְ.

Have you bought some foodstuffs for me?	הֲקָנִיתָ בִּשְׁבִילִי צְרָכֵי אֹכֶל?
The journey is long and one has to provide himself with food.	הַדֶּרֶךְ אָרֻכָּה וְצָרִיךְ לְהִצְטַיֵּד.
Who will accompany me to the railroad station?	מִי יְלַוֶּה אוֹתִי אֶל תַּחֲנַת מְסִלַּת־הַבַּרְזֶל?
Here's the depot.	הִנֵּה בֵּית־הַנְּתִיבוֹת.
Don't smoke!	אַל תְּעַשֵּׁן!
Look at the sign: "Smoking here prohibited!"	הַבֵּט אֶל הַשֶּׁלֶט: „כָּאן אָסוּר לְעַשֵּׁן"!
What class are you travelling?	בְּאֵיזוּ מַחְלָקָה אַתָּה נוֹסֵעַ?
Third class.	בַּמַּחְלָקָה הַשְּׁלִישִׁית.
Buy me a ticket.	קְנֵה בִּשְׁבִילִי כַּרְטִיס־נְסִיעָה!
There's the ticket office.	הִנֵּה שָׁם הַקֻּפָּה לְכַרְטִיסִים

Here's some money for you.	הֵא לְךָ כֶּסֶף!
Which do you prefer?	בַּמֶּה אַתָּה בּוֹחֵר?
An ordinary train, or an express train?	בְּרַכֶּבֶת רְגִילָה אוֹ בְּרַכֶּבֶת־חָפָזוֹן?
It doesn't pay to throw away money.	לֹא כְדַאי לְבַזְבֵּז כֶּסֶף.
What's the price of a ticket to the city of X?	מַה מְחִיר הַכַּרְטִיס לָעִיר פְּלוֹנִית?
What's the price of a return ticket?	מַה מְחִיר הַכַּרְטִיס הֲלִיכָה וַחֲזָרָה?
Take the valise to the baggage room.	מְסֹר אֶת הַמִּזְוָדָה לְמַחְלֶקֶת הַמִּטְעָן!
Get a receipt.	קַח קַבָּלָה!
We'll wait for you in the waiting room.	אֲנַחְנוּ נְחַכֶּה לְךָ בְּאוּלַם־הַנּוֹסְעִים.

Don't miss the train.	אַל תְּאַחֵר אֶת מוֹעֵד צֵאת הָרַכֶּבֶת!
Show me the time table.	הַרְאֵה לִי אֶת לוּחַ־הַמַּסָּעוֹת!
We have a few minutes before the train leaves.	יֵשׁ לָנוּ שְׁהוּת עַד צֵאת הָרַכֶּבֶת.
Go over to the lunch-counter.	סוּר אֶל הַמִּזְנוֹן!
Buy something or other (to eat or drink).	קְנֵה מַעַט לְגִימָה!
The guard is announcing: "The train is leaving".	הַפָּרוֹז מַכְרִיז: "הָרַכֶּבֶת יוֹצֵאת!"
Bon Voyage!	סַע לְשָׁלוֹם!
Don't forget to write frequently.	אַל תִּשְׁכַּח לִשְׁלֹחַ מִכְתָּבִים תְּכוּפִים!
Farewell!	הֱיוּ שָׁלוֹם וּבְרָכָה!

Let's hope we'll meet again soon.	נִזְכֶּה לְהִתְרָאוֹת בְּקָרוֹב!
Happy journey!	תְּהִי דַרְכְּךָ צְלֵחָה!
There's the bell ringing for the third time.	הִנֵּה נִשְׁמְעָה הַמְּצִלָּה הַשְּׁלִישִׁית.
Let's go out on the platform.	נֵצֵא אֶל הָרַחְבָּה.
Conductor, is this my train?	מַנְהִיג, הֲזֹאת הִיא הָרַכֶּבֶת לְדַרְכִּי?
Will I have to change trains?	הַאֶצְטָרֵךְ לְהַחֲלִיף אֶת הָרַכֶּבֶת?
Sir, is this seat taken?	אֲדוֹנִי, הֲתָפוּס הַמָּקוֹם הַזֶּה?
No; the seat is vacant.	לֹא, הַמָּקוֹם פָּנוּי.
You can sit comfortably.	יָכֹל אַתָּה לָשֶׁבֶת בְּהַרְוָחָה.
Please move up a bit.	זוֹז־נָא מְעַט!
Please close the window opposite.	סְגֹר־נָא אֶת הַחַלּוֹן מִנֶּגֶד!

There's a draught.	רוּחַ־פְּרָצִים מְנַשֶּׁבֶת.
The locomotive is whistling.	הַקִּטָּר שׁוֹרֵק.
All things rush swiftly by.	הַכֹּל רָץ, עָף.
Fields, forests sign-posts pass by.	עוֹבְרִים שָׂדוֹת, יְעָרִים, צִיּוּנֵי־דֶּרֶךְ.
I like to travel by rail.	אֲנִי אוֹהֵב לִנְסֹעַ בִּמְסִלַּת־הַבַּרְזֶל.
I find travelling very pleasant.	הַנְּסִיעָה נְעִימָה לִי מְאֹד.
How far is it to the next station?	כַּמָּה עוֹד עַד הַתַּחֲנָה הַקְּמוּכָה?
About another mile and a half.	עוֹד מִיל וָחֵצִי בְּעֶרֶךְ.
The train stopped here for five minutes.	הָרַכֶּבֶת עָמְדָה כַּאן לַחֲמִשָּׁה דַקִּים.
This is a small town.	זאת הִיא עִיָּרָה קְטַנָּה.

I have forgotten its name.	שָׁכַחְתִּי אֶת שְׁמָהּ.
I must look up my "Travellers' Guide".	עָלַי לְעַיֵּן בְּסֵפֶר "מוֹרֵה הַדֶּרֶךְ" שֶׁלִּי.
Where are you from?	מֵאַיִן יְהוּדִי?
From the city of X.	מֵעִיר פְּלוֹנִית.
In that case you are my fellow-townsman.	וּבְכֵן הִנְךָ בֶּן־עִירִי.
Don't stick your head out of the window.	אַל תּוֹצִיא אֶת רֹאשְׁךָ מִחוּץ לַחַלּוֹן!
Why has it grown dark suddenly?	לָמָּה חָשַׁךְ פִּתְאֹם?
The train is passing through a tunnel.	הָרַכֶּבֶת עוֹבֶרֶת דֶּרֶךְ נַקְבָּה.
I have engaged a berth in the car.	שָׁכַרְתִּי מָקוֹם־לִינָה בַּקָּרוֹן
The jolting of the car doesn't let me sleep.	טִלְטוּל הַקָּרוֹן אֵינֶנּוּ מַנִּיחַ לִי לִישֹׁן.

Don't converse in a loud voice.	אַל תְּשׂוֹחֲחוּ בְּקוֹל רָם!
Talk in whispers.	דַּבְּרוּ בְּלַחַשׁ!
When will the train reach its destination?	מָתַי תַּגִּיעַ הָרַכֶּבֶת לַמָּקוֹם הַמְיֻעָד?
How many stations more are there from here to there?	כַּמָּה תַּחֲנוֹת עוֹד מִכַּאן לְשָׁם?
How many more hours have we to travel?	כַּמָּה שָׁעוֹת עוֹד עָלֵינוּ לִנְסֹעַ?
Here's the last station.	הִנֵּה הַתַּחֲנָה הָאַחֲרוֹנָה.
The train is a little late.	הָרַכֶּבֶת אֲחֲרָה מְעַט.
Let's go down to the platform.	נֵרֵד אֶל הָרִחְבָּה.
Porter!	מִי כַּאן סַבָּל?
Get down my baggage.	פְּרֹק אֶת הַמִּטְעָן שֶׁלִּי!
Put my baggage up on a cab.	טְעַן אֶת הַמִּטְעָן שֶׁלִּי עַל מֶרְכָּבָה!

Coachman, is your cab vacant?	רַכָּב, הַפְּנוּיָה מֶרְכַּבְתְּךָ?
Where do you want to go, sir?	לְאָן רוֹצֶה הָאָדוֹן לִנְסֹעַ?
To the "Zion" Hotel.	אֶל הַמָּלוֹן „צִיּוֹן".

AT THE HOTEL — בַּמָּלוֹן

I want to speak to the proprietor of the hotel.	אֲנִי רוֹצֶה לְדַבֵּר אֶל בַּעַל הַמָּלוֹן.
Can I get board and lodging?	הַאֶפְשָׁר לְהַשִּׂיג מְקוֹם־לִינָה וַאֲרוּחָה?
Do you wish to have a separate room, sir?	הֲרוֹצֶה הָאָדוֹן בְּחֶדֶר מְיֻחָד?
Yes; a separate room, light and airy.	כֵּן, חֶדֶר מְיֻחָד מָלֵא אוֹר וְאַוִּיר.

Do the windows face the garden?	הֲפוּנִים הַחַלּוֹנוֹת אֶל הַגָּן?
Is the room nicely furnished?	הַמְּרֻהָט הַחֶדֶר יָפֶה?
Is there a bath?	הֲיֵשׁ אַמְבַּטָה לַחֶדֶר?
I want to have a quiet room.	אֲנִי רוֹצֶה בְּחֶדֶר שׁוֹקֵט.
On the first floor.	בַּקוֹמָה הָרִאשׁוֹנָה.
Everything will be as you wish.	הַכֹּל יִהְיֶה כִּרְצוֹנְךָ.
What is the rate for the room, per week?	בְּכַמָּה יַעֲלֶה הַחֶדֶר לְשָׁבוּעַ?
Not high.	לֹא בְּיוֹקֶר.
Here's the key to your room.	הֵא לְךָ הַמַּפְתֵּחַ לְחַדְרְךָ!
What's the number of my room?	מַה מִּסְפַּר חַדְרִי?

Has any mail come for me?	הַהִגִּיעוּ מִכְתָּבִים בִּשְׁבִילִי?
Has anybody inquired for me?	הֲשָׁאֲלוּ עָלַי?
I'm going out to see the town.	אֲנִי יוֹצֵא לְסַיֵּר אֶת הָעִיר.
I'll visit a few friends.	אֲבַקֵּר יְדִידִים אֲחָדִים.
If anybody asks for me, tell him I'll be back in the evening.	אִם יִשְׁאַל עָלַי אִישׁ, אֱמֹר לוֹ כִּי אָשׁוּב בָּעֶרֶב.
I want the servant.	אֲנִי צָרִיךְ לַמְשָׁרֶת.
Please fetch me a glass of warm water.	בְּבַקָּשָׁה, הָבֵא לִי כּוֹס מַיִם חַמִּים!
Bring up my things.	הַעֲלֵה אֵלַי אֶת חֲפָצַי!
I don't like the room.	הַחֶדֶר הַזֶּה אֵינֶנּוּ רָצוּי לִי.
It's too small.	הוּא צַר יוֹתֵר מִדַּי.
It's also somewhat dark.	הוּא גַּם קְצָת חָשׁוּךְ.

And it's not warm enough.	וְגַם אֵינֶנּוּ חַם לְמַדַּי.
Have you another room to let?	הַיֵּשׁ לְךָ חֶדֶר אַחֵר לְהַשְׂכִּיר?
A larger room.	חֶדֶר יוֹתֵר מֶרְוָח.
A more comfortable room.	חֶדֶר יוֹתֵר נוֹחַ.
A room with more light.	חֶדֶר מָלֵא יוֹתֵר אוֹר.
I am very sorry.	צַר לִי מְאֹד!
There are only a few rooms vacant.	רַק חֲדָרִים אֲחָדִים פְּנוּיִים.
The larger and more comfortable rooms are taken.	הַחֲדָרִים הַיּוֹתֵר מֶרְוָחִים וְנוֹחִים תְּפוּסִים.
New guests arrived today.	אוֹרְחִים חֲדָשִׁים בָּאוּ הַיּוֹם.
What are the hours for meals?	מָה הֵן שָׁעוֹת הָאֲרוּחוֹת?

As one wishes.	כִּרְצוֹן אִישׁ וְאִישׁ.
Tomorrow I'll leave the city.	מָחָר אֲנִי עוֹזֵב אֶת הָעִיר.
I must ride to the port.	עָלַי לִנְסֹעַ אֶל הַנָּמָל.
Let me have my bill.	תֵּן לִי אֶת הַחֶשְׁבּוֹן!
Put down each item separately.	רְשֹׁם כָּל דָּבָר בִּפְרָטֵרוֹט!
How much do I owe?	כַּמָּה מַגִּיעַ מִמֶּנִּי?
Here's what I owe you.	הֵא לָךְ הַמַּגִּיעַ!
If you receive any letters for me, mail them to my address.	אִם תְּקַבֵּל מִכְתָּבִים בִּשְׁבִילִי, שְׁלַח אוֹתָם עַל־פִּי מַעֲנִי.
The service was excellent.	הַשֵּׁרוּת הָיְתָה מְצֻיָּנָה.
I was satisfied.	שָׂבַעְתִּי רָצוֹן.

AT SEA

בַּיָּם

This is the port city.

זֹאת הִיא עִיר־הַנָּמָל.

When does the "Tarshish" sail from here?

מָתַי תַּפְלִיג מִכָּאן הָאֳנִיָּה „תַּרְשִׁישׁ"?

Early tomorrow morning.

מָחָר בַּבֹּקֶר הַשָּׁכֵם.

In the meantime, I will change my money.

בֵּינְתַיִם אַחֲלִיף אֶת כַּסְפִּי.

I got myself a steamship ticket in advance

כַּרְטִיס־סְפִינָה הֵבֵינוֹתִי מִבְּבָר.

What congestion in the harbor!

מָה רַב הַהֹמֶק בַּנָּמָל!

The longshoremen are loading the ship.

הַסַּבָּלִים טוֹעֲנִים אֶת הָאֳנִיָּה

The passengers are taking leave of their relatives.

הַנּוֹסְעִים נִפְרָדִים מֵעַל קְרוֹבֵיהֶם.

They are waving their handkerchiefs.	הֵם מְנַפְנְפִים בִּמְטְפָּחוֹת.
Let's go on board.	הָבָה נַעֲלֶה אֶל הָאֳנִיָּה!
At last, I'm standing on the ship's deck.	סוֹף־סוֹף עוֹמְדוֹת רַגְלַי עַל סִפּוּן הָאֳנִיָּה.
Thank Heaven!	תּוֹדָה לָאֵל!
Look there are some sailors!	רְאֵה, הִנֵּה מַלָּחִים!
They're running a flag up the mast.	הֵם מְרִימִים דֶּגֶל עַל הַתֹּרֶן.
The orchestra is playing.	הַתִּזְמֹרֶת מְנַגֶּנֶת.
The ship has begun to move.	הָאֳנִיָּה זָזָה מִמְּקוֹמָהּ.
The sea is calm now.	הַיָּם עַתָּה שׁוֹקֵט.
I hope the voyage will be pleasant.	אֲנִי מְקַוֶּה, כִּי הַנְּסִיעָה תִּהְיֶה נְעִימָה.

What are those white birds?	מָה הֵן הַצִּפֳּרִים הַלְּבָנוֹת?
Those are sea-gulls.	אֵלֶּה הֵן צִפֳּרֵי שַׂחַף.
My head is in a whirl (I feel dizzy).	רֹאשִׁי סְחַרְחַר.
You are sea sick.	אַתָּה חוֹלֶה מַחֲלַת־הַיָּם.
Go up on deck.	עֲלֵה אֶל הַסִּפּוּן!
You will breathe fresh air.	תִּשְׁאַף אֲוִיר רַעֲנָן.
Here I feel a little better.	פֹּה רָוַח לִי מְעַט. / פֹּה הוּקַל לִי מְעַט.
If I only had a hammock here on board!	מִי יִתֵּן לִי עַרְסָל בָּאֳנִיָּה!
You need not call the ship's doctor.	אֵינְךָ צָרִיךְ לִקְרֹא לִרְופֵא הָאֳנִיָּה.
It's nothing.	זֶה לֹא כְלוּם.
There goes a steamship.	שָׁם שָׂטָה אֳנִית־קִיטוֹר.

No; it's a sail-boat.	לֹא, זֹאת הִיא סְפִינַת־מִפְרָשִׂים.
The sea is getting stormier.	הַיָּם הוֹלֵךְ וְסוֹעֵר.
The waves are breaking into foam.	הַגַּלִּים מַעֲלִים קֶצֶף.
Our ship is tossed on all sides.	אֳנִיָּתֵנוּ מִטַּלְטֶלֶת לְכָל עֵבֶר.
There's no danger.	אֵין סַכָּנָה בְּדָבָר.
The ship has life-boats and life-belts.	יֵשׁ לָאֳנִיָּה סִירוֹת־הַצָּלָה וַחֲגוֹרוֹת־הַצָּלָה.
Let's go down to our cabins.	נֵרֵד אֶל הַתָּאִים.
Let's go down to the steerage.	נֵרֵד אֶל הַמָּרוֹר הָאֶמְצָעִי.
Here is the third class.	כָּאן הַמַּחְלָקָה הַשְּׁלִישִׁית.
How many immigrants there are on this ship!	כַּמָּה מְהַגְּרִים בָּאֳנִיָּה זוֹ!

This year there is a large immigration.	בַּשָּׁנָה הַזֹּאת הַגִּירָה גְּדוֹלָה.
The arrangements are not good.	הַסֵּדֶר אֵינֶנּוּ טוֹב.
I haven't tasted a thing today.	לֹא טָעַמְתִּי הַיּוֹם כְּלוּם.
I'm going to complain to the captain.	אֶתְאוֹנֵן לִפְנֵי רַב־הַחוֹבֵל.
Don't go down to the hold.	אַל תֵּרֵד אֶל תַּחְתִּית הָאֳנִיָּה!
The freight and baggage is down there.	שָׁם הַמַּשָּׂא וְהַמִּטְעָן.
The sea has grown calm.	הַיָּם שָׁקַט.
Do you see a light-house in the distance?	הֲרוֹאֶה אַתָּה מֵרָחוֹק מִגְדַּל־אוֹר?
This proves we are near shore.	סִמָּן, כִּי הַחוֹף קָרוֹב.

Look, there's a rock on the seashore.	הִבֵּט, סֶלַע עַל שְׂפַת הַיָּם!
We arrived at the port of Jaffa.	הִגַּעְנוּ אֶל חוֹף יָפוֹ.
The ship cast its anchor.	הָאֳנִיָּה הִשְׁלִיכָה עֹגֶן.
The ship was quarantined.	שָׂמוּ הַסְגֵּר עַל הָאֳנִיָּה.
The ship will anchor here.	הָאֳנִיָּה תַּעֲגֹן כָּאן.
We shall not be able to land for three days.	לֹא נוּכַל לָרֶדֶת בְּמֶשֶׁךְ שְׁלֹשָׁה יָמִים.
We'll get to the shore in row-boats.	בְּסִירוֹת נַעֲבֹר אֶל הַחוֹף.
Boatman, what's the charge to Jaffa?	סַפָּן, מַה מְּחִיר הַנְּסִיעָה עַד יָפוֹ?
I can see the bottom (of the sea) here.	אֲנִי רוֹאֶה פֹּה אֶת קַרְקַע הַיָּם

From here you can see the ebb ane flow of the tide.	מִפֹּה אֶפְשָׁר לִרְאוֹת אֶת הַגֵּאוּת וְהַשֶּׁפֶל.
The first group of passengers has landed.	הַשַּׁיָּרָה הָרִאשׁוֹנָה עָלְתָה אֶל הַחוֹף.
A crowd of people came out to receive us.	אֲנָשִׁים רַבִּים יָצְאוּ לְקַבֵּל אֶת פָּנֵינוּ.
Welcome!	בְּרוּכִים הַבָּאִים!
I am privileged to stand on Palestinian soil.	זָכִיתִי לַעֲמֹד עַל אַדְמַת אֶרֶץ־יִשְׂרָאֵל.
The climate here is warm.	כַּאן הָאַקְלִים חַם.
I'll acclimatize myself quickly.	אֶתְאַקְלֵם עַד־מְהֵרָה.
How glaring the light is here!	מָה רַב הָאוֹר פֹּה!
I've decided to remain permanently in the land.	הֶחְלַטְתִּי לְהִשְׁתַּקֵּעַ בָּאָרֶץ.

I'll settle in Tel-Aviv.	אֶתְיַשֵּׁב בְּתֵל־אָבִיב.
I'll always speak Hebrew.	אֲדַבֵּר תָּמִיד עִבְרִית.
I hope to get settled here.	אֲנִי מְקַוֶּה לְהִסְתַּדֵּר כַּאן.
I will not leave the Homeland.	לֹא אֶעֱזֹב אֶת הַמּוֹלֶדֶת.

AT WORK — בָּעֲבוֹדָה

I am going about idle.	אֲנִי הוֹלֵךְ בָּטֵל.
I am out of work.	אֵין לִי עֲבוֹדָה.
I'm not earning anything.	אֵינֶנִּי מִשְׁתַּכֵּר כְּלוּם.
I'm going to apply at an employment bureau.	אֶפָּנֶה אֶל לִשְׁכַּת־עֲבוֹדָה.

Can I secure employment?	הַאֶפְשָׁר לְהַשִּׂיג עֲבוֹדָה?
What's your occupation (trade)?	מַה מְּלַאכְתְּךָ?
My trade—a carpenter.	מְלַאכְתִּי—נַגָּר.
Where did you work before?	הֵיכָן עָבַדְתָּ קֹדֶם?
I've only recently come to this country.	אֲנִי בָּאתִי אֶל הָאָרֶץ זֶה לֹא כְּבָר.
There's no work to be had in your trade (line).	בַּמִּקְצוֹעַ שֶׁלְּךָ אֵין עֲבוֹדָה.
Would you consent to work in a shop?	הֲמַסְכִּים אַתָּה לַעֲבֹד בְּבֵית־מְלָאכָה?
Cigars are made there.	שָׁם עוֹשִׂים סִיגָרוֹת.
Why not?	מַדּוּעַ לֹא?
I'm satisfied.	אֲנִי מְרֻצֶּה.
Well, then, register.	וּבְכֵן רְשֹׁם אֶת שִׁמְךָ!

Who is the proprietor here?	מִי כַּאן בַּעַל בֵּית־הַמְּלָאכָה?
I've been sent here by the employment bureau.	נִשְׁלַחְתִּי לְכַאן מֵאֵת לִשְׁכַּת־הָעֲבוֹדָה.
Good; the work for the season has begun.	טוֹב, עֲבוֹדַת הָעוֹנָה הִתְחִילָה.
I belong to a trade-union.	אֲנִי חָבֵר לַאֲגֻדָּה מִקְצוֹעִית.
Is this a union shop?	הֲוֵה בֵּית־מְלָאכָה שֶׁל אֲגֻדָּה מִקְצוֹעִית?
Of course (lit. "without doubt").	אֵין סָפֵק!
Well, then, what are the terms?	וּבְכֵן מָה הֵם הַתְּנָאִים?
Your weekly wage will be such and such.	מַשְׂכֻּרְתְּךָ לְשָׁבוּעַ כָּךְ וְכָךְ.

We work here eight hours a day.	בַּאן עוֹבְדִים שְׁמֹנֶה שָׁעוֹת לְיוֹם.
Fridays, half a day.	בַּיּוֹם הַשִּׁשִּׁי חֲצִי יוֹם.
If you work overtime, you'll get double pay.	אִם תַּעֲבֹד תּוֹסֶפֶת־זְמַן, תְּקַבֵּל שָׂכָר כָּפוּל.
If you wish, you can do piece-work.	אִם תִּרְצֶה, תּוּכַל לַעֲבֹד לְפִי עֵרֶךְ הַמְּלָאכָה.
How are the sanitary conditions in your place?	מָה הֵם תְּנָאֵי הַבְּרִיאוּת אֶצְלְכֶם?
There's plenty of space, cleanliness, light, and air.	יֵשׁ דַּי שֶׁטַח, נְקִיּוֹן, אוֹר וְאַוִּיר.
Are the conditions satisfactory to you?	הַרְצוּיִים לְךָ הַתְּנָאִים?
I'll consider the matter.	אֶתְמֹלֵךְ בַּדָּבָר.
There's a great deal of work on hand.	הַמְּלָאכָה מְרֻבָּה.

The foreman is exacting (drives the men).	הַמַּשְׁגִּיחַ הוֹחֵק.
The attitude (relation) of the employer toward us has changed.	יַחַס הָאָדוֹן אֵלֵינוּ נִשְׁתַּנָּה.
We'll complain to the (trade) union.	נִתְאוֹנֵן לִפְנֵי הָאֲגֻדָּה הַמִּקְצוֹעִית.
The complaint has been accepted (as valid).	הַתְּלוּנָה נִתְקַבְּלָה.
We've decided to call a strike.	הֶחְלַטְנוּ לְהַכְרִיז שְׁבִיתָה.
There are no strike-breakers.	אֵין כָּל מְפִירֵי־שְׁבִיתָה.
What are your demands, strikers?	מָה אַתֶּם דּוֹרְשִׁים, שׁוֹבְתִים?
An increase of wages.	לְהַעֲלוֹת אֶת הַשָּׂכָר.
Shortening of work hours.	לְקַצֵּר אֶת שְׁעוֹת הָעֲבוֹדָה.

It's forbidden to discharge workmen without sufficient cause.	אָסוּר לְפַטֵּר פּוֹעֲלִים בְּלִי טַעַם מַסְפִּיק.
A minimum scale of wages.	שַׁעַר־הַמּוּעָט בְּמַשְׂכֹּרֶת.
Two weeks' vocation every year.	פַּגְרָה לִשְׁנֵי שָׁבוּעוֹת בְּשָׁנָה
These are our demands.	אֵלֶּה הֵן דְּרִישׁוֹתֵינוּ.
Under no circumstances will we surrender our demands.	לֹא נְוַתֵּר עַל דְּרִישׁוֹתֵינוּ בְּשׁוּם אֹפֶן.
What do you intend doing, boss?	מַה בְּדַעְתְּךָ לַעֲשׂוֹת, אָדוֹן?
I agree to refer the dispute to an arbitration committee.	אֲנִי מַסְכִּים לִמְסֹר אֶת הַסִּכְסוּךְ לְוַעַד־מְפַשְּׁרִים

The committee will hear our contentions.	הַוַּעַד יִשְׁמַע אֶת טַעֲנוֹתֵינוּ.
Our boss (employer) has granted our demands.	הָאָדוֹן מִלֵּא אֶת דְּרִישׁוֹתֵינוּ
The two parties have settled their differences.	הַצְּדָדִים נִתְפַּשְׁרוּ.
The strike is ended.	הַשְּׁבִיתָה נִגְמְרָה.
We've made a contract.	עָשִׂינוּ חוֹזֶה.
The employer recognizes the union.	הָאָדוֹן מַכִּיר אֶת הָאֲגֻדָּה הַמִּקְצוֹעִית.
Now he treats us properly.	עַכְשָׁיו הוּא מִתְנַהֵג עִמָּנוּ כְּשׁוּרָה.
Our relations are very good.	הַיַּחַס הוּא טוֹב מְאֹד.
We are very busy now.	הַטִּרְדָּה רַבָּה עַתָּה.
I must engage additional workmen.	עָלַי לִשְׂכֹּר עוֹד פּוֹעֲלִים.

I'll advertise in the papers.	אוֹדִיעַ בְּעִתּוֹנִים.
The season is over.	הָעוֹנָה עָבְרָה.
It's not so busy.	הַמְּרִדָּה אֵינֶנָּה רַבָּה כָּל־כָּךְ.
In my line, it's slack now.	עַכְשָׁיו זְמַן בַּטָּלָה בַּמִּקְצוֹעַ שֶׁלִּי.
I have no prospects of getting employment.	אֵין לִי סִכּוּי לְהַשִּׂיג עֲבוֹדָה
I wish to be an expert craftsman.	אֲנִי רוֹצֶה לִהְיוֹת בַּעַל־מְלָאכָה מֻמְחֶה. / אֲנִי רוֹצֶה לִהְיוֹת אָמָן מֻמְחֶה.
I'll enter a trade school.	אִכָּנֵס אֶל בֵּית־סֵפֶר לִמְלָאכָה.
There I'll become expert in my line.	שָׁם אֶתְמַחֶה בַּמִּקְצוֹעַ שֶׁלִּי.

I'm working in a factory now.	אֲנִי עוֹבֵד עַתָּה בְּבֵית־חֶרֶשֶׁת.
I've accustomed myself to the noise of the machines.	הִתְרַגַּלְתִּי לְרַעַשׁ הַמְּכוֹנוֹת
I ask that you increase my wage.	אֲנִי מְבַקֵּשׁ, כִּי תוֹסִיף עַל שְׂכָרִי.
I got my increase.	הַהוֹסָפָה נִתְּנָה לִי.
I'm making a living.	יֵשׁ לִי פַּרְנָסָה.
Thank Heaven!	בָּרוּךְ הַשֵּׁם!
What workmen are organized?	אֵיזוֹ פּוֹעֲלִים מְסֻדָּרִים?
The railroad workers and metal workers.	פּוֹעֲלֵי־הָרַכֶּבֶת וּפוֹעֲלֵי־הַמַּתֶּכֶת.
The blacksmiths and tinsmiths.	הַנַּפָּחִים וְהַפַּחָחִים.
The mechanics and construction workers.	הַמְכוֹנָנִים וְהַבַּנָּאִים.

The masons and plasterers.	הַגּוֹדְרִים וְהַסַּיָּדִים.
What workmen still need to be organized?	אֵיזוֹ פּוֹעֲלִים צָרִיךְ עוֹד לְסַדֵּר?
The glaziers and photographers.	הַזַּגָּגִים וְהַצַּלָּמִים.
The barbers and painters.	הַגַּלָּבִים וְהַצּוֹבְעִים.
The watchmakers and engineers.	הַשָּׁעָנִים וְהַמְהַנְדְּסִים.
The book-binders and bakers.	כּוֹרְכֵי־הַסְּפָרִים וְהָאוֹפִים.
The iron workers and hat makers.	חָרָשֵׁי־הַבַּרְזֶל וְהַכּוֹבְעָנִים.
The printing industry is completly organized.	הַתַּעֲשִׂיָּה שֶׁל הַדְּפוּס מְסֻדֶּרֶת כָּלָה.
The type-setters' union is very strong.	הָאֲגֻדָּה הַמַּקְצֹעִית שֶׁל מְסַדְּרֵי־הָאוֹתִיּוֹת חֲזָקָה מְאֹד.

The organizer is now organizing the agricultural laborers.	הַמַּדְרֵן מְסַדֵּר עַכְשָׁיו אֶת הַפּוֹעֲלִים הַחַקְלָאִיִּים.
Why aren't you organizing yourselves?	מַדּוּעַ אֵינְכֶם מִסְתַּדְּרִים?
In unity is our strength.	בְּאַחְדוּת כֹּחֵנוּ.
I have given up my work.	עָזַבְתִּי אֶת מְלַאכְתִּי.
What work are you going to engage in?	בְּאֵיזוֹ מְלָאכָה תַּעֲסֹק?
I've decided to become a farmer.	הֶחְלַטְתִּי לְהִתְאַכֵּר.
I'll work at planting.	אֶעֱסֹק בְּמַטָּעָה.
I'll lease some land.	אֶקַּבֵּל אֲדָמָה בַּחֲכִירָה.
I hope to succeed.	אֲנִי מְקַוֶּה, כִּי אַצְלִיחַ.
I hope you will.	הַלְוַאי!
I know how to manage (a farm.)	אֲנִי יוֹדֵעַ בֵּיצַד לְהַשְׂגִּיחַ עַל הַמֶּשֶׁק.

For the time being, I'll till the ground as a member of a (co-operative) group.	לְפִי־שָׁעָה אֶעֱבֹד אֶת הָאֲדָמָה בְּקִבּוּצָה.
We'll divide the income equally.	נְחַלֵּק אֶת הַהַכְנָסָה שָׁוֶה בְּשָׁוֶה.
Are you earning much?	הַמִשְׁתַּכֵּר אַתָּה הַרְבֵּה?
I earn little.	אֲנִי מִשְׁתַּכֵּר מְעַט.
My earnings are insufficient.	מַשְׂכֻּרְתִּי אֵינֶנָּה מַסְפִּיקָה לִי.
The needs of my house hold are many.	צָרְכֵי בֵיתִי רַבִּים.
The work is too difficult for me.	הָעֲבוֹדָה קָשָׁה עָלַי.
I haven't tne strength to work.	אֵין לִי כֹּחַ לַעֲבֹד.
I want to get rid of my (present) work.	אֲנִי רוֹצֶה לְהִפָּטֵר מִמְּלַאכְתִּי.

I'll choose some other work, something easy.	אֶבְחַר בִּמְלָאכָה אַחֶרֶת, קַלָּה.
Are you satisfied with your new work?	הַמְרֻצֶּה אַתָּה מִמְּלַאכְתְּךָ הַחֲדָשָׁה?
I can't tell yet.	אִי־אֶפְשָׁר עֲדַיִן לָדַעַת.
I've bought tools.	קָנִיתִי כְּלֵי־מְלָאכָה.
But I haven't enough material.	אַךְ אֵין לִי דֵּי חֹמֶר.
Don't be lazy.	אַל תִּהְיֶה עָצֵל!
Work diligently.	עֲבֹד בַּחֲרִיצוּת!
Love work.	אֱהַב אֶת הַמְּלָאכָה!
Do you know how to do this?	הֲיוֹדֵעַ אַתָּה אֵיךְ לַעֲשׂוֹת זֹאת?
It's very simple.	הַדָּבָר פָּשׁוּט מְאֹד.
Do thus and so.	עֲשֵׂה כַּךְ וְכַךְ!
That's a diligent workman	הִנֵּה עוֹבֵד חָרוּץ.

He supports himself by his own labor.	הוּא נֶהֱנֶה מִיגִיעַ־כַּפָּיו.
For that reason, he is not so poor.	עַל־כֵּן אֵינֶנּוּ עָנִי כָּל־כָּךְ.
Although he is not rich either.	אַף כִּי גַם עָשִׁיר אֵינֶנּוּ.
Why do you disturb me in my work?	לָמָּה אַתָּה מַפְרִיעַ אוֹתִי מֵעֲבוֹדָתִי?
You are wasting my time.	אַתָּה מְבַטֵּל אֶת זְמַנִי.
You bother me too much.	אַתָּה מַטְרִיד אוֹתִי יוֹתֵר מִדַּי.
You are a nuisance.	אַתָּה טַרְחָן.
Can't you see that I'm busy?	הֲלֹא רוֹאֶה אַתָּה כִּי אֲנִי עָסוּק.
Finish your work first.	גְּמֹר אֶת מְלַאכְתְּךָ תְּחִלָּה!
Afterwards we'll chat.	וְאַחַר־כָּךְ נְשׂוֹחֵחַ.
Now I'm not so busy.	עַכְשָׁיו אֵינֶנִי טָרוּד כָּל־כָּךְ.

Have you a little time?	הֲיֵשׁ לְךָ קְצָת פְּנַאי?
Give me a little help.	עֶזְרֶנָּא לִי מְעַט!
Do it yourself.	עֲשֵׂה זֹאת בְּעַצְמְךָ!
I have worked today more than enough.	עָבַדְתִּי הַיּוֹם דַּי וְהוֹתֵר.
I must rest now.	עָלַי לָנוּחַ עַתָּה.
What's that merry workman singing?	מַה מְּזַמֵּר שָׁם הַפּוֹעֵל הַשָּׂמֵחַ?
"Work is our very life."	"הָעֲבוֹדָה הִיא חַיֵּינוּ".

BUSINESS — בַּמִּסְחָר

Rebecca, go out to the store.	רִבְקָה, צְאִי אֶל הַחֲנוּת!
Buy us some foodstuffs.	קְנִי לָנוּ צָרְכֵי אֹכֶל!
Whereabouts is there a grocery store?	אַיֵּה כַּאן חֲנוּת־מַכֹּלֶת?

Here, in the middle of the block.	כַּאן בְּאֶמְצַע הָרְחוֹב.
Grocer, sell me some grits.	חֶנְוָנִי, מְכֹר לִי גְּרִיסִים!
Wait for your turn.	חַכֵּי לְתוֹרֵךְ!
Give me a full measure.	תֵּן לִי קַב מָלֵא!
I need some millet also.	אֲנִי צְרִיכָה גַּם דֹּחַן.
One pound.	לִטְרָה אַחַת.
Also rice.	וְגַם אֹרֶז.
Two pounds.	שְׁתֵּי לִטְרוֹת.
How much a pound?	מַה מְּחִיר הַלִּטְרָה? / בְּכַמָּה הַלִּטְרָה?
Fifteen *prutot*.	חֲמֵשׁ־עֶשְׂרֵה פְּרוּטָה.
Give me correct weight.	תֵּן לִי מִשְׁקָל נָכוֹן!
Why, you can see for yourself.	הֲלֹא רוֹאָה אַתְּ בְּעַצְמֵךְ.
The scales are balanced.	כַּפּוֹת הַמֹּאזְנַיִם שְׁקוּלוֹת.

It seems to me that the weights weigh down.	דְּמָדָּה לִי, שֶׁאַבְנֵי־הַמִּשְׁקָל מַכְרִיעוֹת.
I am an honest merchant (dealer).	אֲנִי סוֹחֵר יָשָׁר.
I am not a cheat.	אֵינֶנִי רַמַּאי.
I don't cheat the public (purchasers).	אֵינֶנִי מְרַמֶּה אֶת הַקּוֹנִים.
Especially my customers.	וּבְפָרָט הַלָּקוֹחוֹת שֶׁלִּי.
Let me have half a measure of winegar.	מְדֹד לִי חֲצִי לֹג חֹמֶץ!
Let me have ten *prutot* worth of kerosene.	מְדֹד לִי נַפְט בְּעֶשֶׂר פְּרוּטוֹת!
Give me a dozen eggs.	תֵּן לִי תְּרֵיסַר בֵּיצִים!
Also soap and coffee.	גַּם בָּרִית וְקָפֶה.
Please wrap up what I bought.	בְּבַקָּשָׁה, חֲבֹשׁ אֶת־הַדְּבָרִים אֲשֶׁר קָנִיתִי!

What's the bill for the whole purchase?	בְּכַמָּה עוֹלָה כָּל הַקְּנִיָּה?
How much must I pay you, all told?	כַּמָּה עָלַי לְשַׁלֵּם לְךָ בְּסַךְ־הַכֹּל?
Two *shekolim* and a bit over.	שְׁנֵי שְׁקָלִים וּפְרוּטָה.
I have money in large denominations.	יֵשׁ לִי מָעוֹת גְּדוֹלוֹת.
Give me the change.	תֵּן לִי אֶת הָעֹדֶף!
I have no small change.	אֵין לִי מָעוֹת קְטַנּוֹת.
I'll send the boy to change the money.	אֶשְׁלַח אֶת הַנַּעַר לְפָרֵט אֶת הַכֶּסֶף.
Take care not to take bad coins.	הִזָּהֵר שֶׁלֹּא תִּקַּח אֲסִימוֹנִים!
Take good coins.	קַח מַטְבֵּעוֹת יָפוֹת!
I must buy a new set of furniture.	עָלַי לִקְנוֹת סֵדֶר־רָהִיטִים חָדָשׁ.

My old furniture is worn out.	רָהִיטַי הַיְשָׁנִים נִתְקַלְקְלוּ.
You had better buy at auction.	מוּטָב שֶׁתִּתְקְנֶה בְּאַכְרָזָה.
There you will get everything cheap.	שָׁם תַּשִּׂיג הַכֹּל בְּזוֹל.
Don't spend a lot of money.	אַל תְּבַזְבֵּז הַרְבֵּה כֶּסֶף!
I don't like used articles.	אֵינֶנִּי אוֹהֵב חֲפָצִים מְשֻׁמָּשִׁים.
Are you prepared to spend the necessary amount?	הֲנָכוֹן אַתָּה לְהוֹצִיא אֶת הַסְּכוּם הַדָּרוּשׁ?
Let's go in here.	נִכָּנֵס כָּאן.
This is a reliable concern.	זֶהוּ בֵּית־מִסְחָר הָגוּן.
Do you sell retail?	הֲמוֹכֵר אַתָּה לַאֲחָדִים?
I sell only wholesale.	אֲנִי מוֹכֵר רַק בְּסִיטוֹנוּת.

Let's go somewhere else.	גֵּלֵךְ לְמָקוֹם אַחֵר.
Have you high grade goods?	הֲיֵשׁ לְךָ סְחוֹרָה מְשֻׁבַּחַת?
I am a good judge of wares.	אֲנִי יוֹדֵעַ בְּטִיב הַסְּחוֹרָה.
I have no inferior goods at all.	סְחוֹרָה גְּרוּעָה אֵין לִי כְּלָל.
Select what you please.	בְּחַר כִּרְצוֹנְךָ!
I'll give you satisfaction. / I'll satisfy you.	אַשְׂבִּיעַ אוֹתְךָ רָצוֹן.
In the very best way.	עַל הַצַּד הַיּוֹתֵר טוֹב.
Perhaps you will lower the price?	אוּלַי תּוֹאִיל מִן הַמְּחִיר?
The price is very high.	הַמְּחִיר יָקָר מְאֹד.
Please don't bargain.	אַל־נָא תַּעֲמֹד עַל הַמֶּקַח!
Here prices are fixed. / Here it is one price.	בְּכַאן הַמְּחִיר קָבוּעַ.

Take my word for it.	הַאֱמִן לִי עַל דִּבְרָתִי!
Everything is offered at a fair price.	הַכֹּל בַּמְּקֻחַ הַשָּׁוֶה.
You charge high prices.	אַתָּה יַקָּרָן.
On the contrary, I sell cheaply.	אַדְרַבָּה, אֲנִי זוֹלָן.
Give me a discount.	עֲשֵׂה לִי הֲנָחָה!
I'll allow you (deduct) five per cent off the price.	אֲנַכֶּה לְךָ חֲמִשָּׁה אֲחוּזִים מִן הַמְּחִיר.
That's a large discount.	זֶהוּ נִכָּיוֹן מְרֻבֶּה.
Will you pay cash?	הַתְשַׁלֵּם מִיַּד אֶת הַמְּגִיעַ?
No, I want credit.	לֹא, אֲנִי רוֹצֶה בְּהַקְפָּה.
I don't sell on credit.	אֵינֶנִּי מַקִּיף.
But you can pay in instalments.	אֲבָל תּוּכַל לְשַׁלֵּם לְשֵׁעוּרִים.
A payment every week.	תַּשְׁלוּם בְּכָל שָׁבוּעַ.
I undertake to do so.	אֲנִי מִתְחַיֵּב לַעֲשׂוֹת כֵּן.

You must give (me) a deposit.	עָלֶיךָ לָתֵת לִי דְּמֵי־קִדְמָה
On account.	עַד לְחֶשְׁבּוֹן.
Shall I make out a check?	הַאֶכְתּוֹב לְךָ הַמְחָאָה?
It's all the same to me.	אַחַת הִיא לִי.
A check or cash.	הַמְחָאָה אוֹ מְזֻמָּן.
Any way (anyhow), I trust you.	בֵּין כָּךְ וּבֵין כָּךְ, אֲנִי מַאֲמִין אוֹתְךָ.
The bookkeeper will enter your account in the ledger.	הַפִּנְקָסָן יִרְשֹׁם אֶת חֶשְׁבּוֹנְךָ בַּפִּנְקָס.
Please pay the cashier at the desk.	שַׁלֶּם־נָא לַגִּזְבָּר אֵצֶל הַקֻּפָּה!
There you will get a receipt for the amount.	שָׁם תְּקַבֵּל שׁוֹבֵר עַל הַסְּכוּם.
I have too much stock in my store.	יֵשׁ סְחוֹרָה יוֹתֵר מִדַּי בַּחֲנוּתִי.

A special sale should be arranged.	צָרִיךְ לַעֲרֹךְ מְכִירָה מְיֻחֶדֶת.
In that way the income will be increased.	בָּזֶה תִּתְרַבֶּה הַהַכְנָסָה.
Business is bad.	הָעֲסָקִים רָעִים.
The losses are too heavy.	הַהֶפְסֵד מְרֻבֶּה.
The expense is larger than the income.	הַהוֹצָאוֹת מְרֻבּוֹת עַל הַהַכְנָסוֹת.
I'm not making any profit now.	אֵינֶנִּי מַרְוִיחַ כְּלוּם עַכְשָׁיו.
You ought to raise the prices.	עָלֶיךָ לְהַעֲלוֹת אֶת הַמְּחִירִים.
They owe me a lot of money.	חַיָּבִים לִי הַרְבֵּה כֶּסֶף.
It's hard to collect the debts.	קָשֶׁה לִגְבּוֹת אֶת הַחוֹבוֹת.
I need a loan.	אֲנִי צָרִיךְ לְהַלְוָאָה.

Do you know a money-lender?	הֲיוֹדֵעַ אַתָּה מַלְוֶה בְּרִבִּית?
I wish to borrow some money from you for one year.	אֲנִי רוֹצֶה לִלְוות מִמְּךָ כֶּסֶף לְשָׁנָה אַחַת.
Sign the note.	חְתֹם עַל הַשְּׁטָר!
You should advertise extensively.	עָלֶיךָ לְפַרְסֵם הַרְבֵּה.
Advertising helps business.	הַפִּרְסוּם יָפֶה לְמִסְחָר.
I'll do as you say.	אֶעֱשֶׂה כִּדְבָרֶיךָ.
The crisis is passed.	הַמַּשְׁבֵּר עָבַר.
Conditions have improved.	הַמַּצָּב הוּטַב.
Profits have increased.	הָרֶוַח גָּדַל.
What are you engaged in now?	בַּמֶּה אַתָּה עוֹסֵק עַכְשָׁיו?
I've become a peddlar.	הָיִיתִי לְרוֹכֵל.

At times, I'm also a broker.	לִפְעָמִים הִנְנִי גַּם סַרְסוּר.
I am a trusted merchant.	אֲנִי סוֹחֵר בָּטוּחַ.
Do the wholesalers have confidence in you?	הַנּוֹתְנִים הַסִּיטוֹנִים אֱמוּן בְּךָ?
They give me credit.	הֵם נוֹתְנִים לִי אַשְׁרָה.
I sell silverware and gold objects.	אֲנִי מוֹכֵר כְּלֵי כֶסֶף וּכְלֵי זָהָב.
Copper objects and glassware.	כְּלֵי נְחֹשֶׁת וּכְלֵי זְכוּכִית.
Of all kinds.	מִכָּל הַמִּינִים.
I sell on instalment.	אֲנִי מוֹכֵר בְּתַשְׁלוּמִים לְשָׁעוּרִים.
Do you always make a profit?	הֲמַרְוִיחַ אַתָּה תָּמִיד?
Sometimes I lose.	יֵשׁ אֲשֶׁר אֲנִי מַפְסִיד.

How much do you still owe me?	כַּמָּה עוֹד אַתָּה חַיָּב לִי?
I still owe a little.	נִשְׁאַרְתִּי חַיָּב מְעַט.
I don't wish to be in debt.	אֵינֶנִּי רוֹצֶה לִהְיוֹת בַּעַל־חוֹב.
Let's settle the account.	נְגַמֵּר אֶת הַחֶשְׁבּוֹן.
Take some paper and figure up.	קַח נְיָר וְחַשֵּׁב!
I'll pay off my debt.	אֲסַלֵּק לְךָ אֶת חוֹבִי.
I need some rare books.	נֵשׁ לִי צֹרֶךְ בִּסְפָרִים יְקָרִים מְצִיאוּת.
Order them from out-of-town.	הַזְמֵן מִחוּץ לָעִיר!
The book-dealer has filled my order with precision.	מוֹכֵר־הַסְפָרִים מִלֵּא אֶת הַזְמָנָתִי בְּדִיוּק.
He sent me the books C. O. D.	הוּא שָׁלַח אֵלַי אֶת הַסְפָרִים בְּזִקִיפָה.

I received a bill (itemized statement) from him.	קִבַּלְתִּי מִמֶּנּוּ רְשִׁימָה.
Some books are out of stock.	סְפָרִים אֲחָדִים אָזְלוּ.
They are lacking entirely. / They are not to be had.	הֵם חֲסֵרִים לְגַמְרֵי.
The express age he charged to my account.	אֶת דְּמֵי הַמִּשְׁלוֹחַ זָקַף עַל חֶשְׁבּוֹנִי.
I intend to buy Bezalel rugs.	בְּדַעְתִּי לִקְנוֹת שְׁטִיחִים שֶׁל „בְּצַלְאֵל".
Is there much demand for these goods?	הֲיֵשׁ קוֹנְצִים עַל הַסְּחוֹרָה הַזֹּאת?
This is salable merchandize.	זֹאת הִיא סְחוֹרָה חֲרִיפָה.
You must pay in advance.	עָלֶיךָ לְשַׁלֵּם מֵרֹאשׁ.

I've retired from business.	מָשַׁכְתִּי אֶת יָדִי מִן הָעֵסֶק שֶׁלִּי.
Take advantage of the opportunity.	חִשְׁתַּמֵּשׁ בַּהִזְדַּמְנוּת!
Buy the stock for next to nothing.	קְנֵה אֶת הַמְּלָאי בְּחֶצִי חִנָּם!
I have given up the business entirely.	סָגַרְתִּי אֶת בֵּית־מִסְחָרִי לְגַמְרֵי.
I have not even drawn out my initial investment.	גַּם אֶת הַקֶּרֶן לֹא הִכְנַסְתִּי.
I'll invest my capital in another business.	אַשְׁקִיעַ אֶת הוֹנִי בְּעֵסֶק אַחֵר.
I've opened a store in the new market.	פָּתַחְתִּי חָנוּת בַּשּׁוּק הֶחָדָשׁ.
I sell earthenware and porcelain.	אֲנִי מוֹכֵר כְּלֵי חֶרֶס וּכְלֵי חַרְסִינָה.
Dolls and playthings.	בְּבוֹת וְצַעֲצוּעִים.

And writing materials.	וּמַכְשִׁירֵי כְּתִיבָה.
That is merchandise needed by all.	זֹאת הִיא סְחוֹרָה שֶׁהַכֹּל נֶפֶשׁ.
The prices are cheap.	הַמְּחִירִים זוֹלִים.
The receipts are big.	הַפִּדְיוֹן רַב.
Have you regular customers?	הֲיֵשׁ לְךָ לְקוּחוֹת קְבוּעִים?
No, but there are many transient buyers.	לֹא, אֲבָל רַבִּים הַקּוֹנִים מִן הָעוֹבְרִים וְשָׁבִים.
Do you need candies?	הֲיֵשׁ לְךָ צֹרֶךְ בְּסֻכָּרִיוֹת?
I am an agent of the *Methek* factory.	אֲנִי סוֹכֵן שֶׁל בֵּית־הַחֲרֹשֶׁת "מֶתֶק".
About how much will you take for the first time?	כַּמָּה בְּעֶרֶךְ תִּקַּח בַּפַּעַם הָרִאשׁוֹנָה?
Send me a little as a sample.	שְׁלַח אֵלַי מְעַט לְנִסָּיוֹן!

If it will pay me, I'll take more.	אִם אַצְלִיחַ, אֶקַּח יוֹתֵר.
You'll have to give a bigger discount.	עָלֶיךָ לְהוֹסִיף עַל הָאַחוּזִים
And to reduce the price.	וּלְהַפְחִית מִן הַמְּחִיר.
Let's settle our account.	נְשַׁוֶּה אֶת חֶשְׁבּוֹנֵנוּ.
The low prices are gone.	הַזּוֹל אֵינֶנּוּ עוֹד.
Prices are mounting.	הַיֹּקֶר מַאֲמִיר.
Who is at fault in that regard?	מִי אָשֵׁם בַּדָּבָר?
The profiteers, of course.	מַפְקִיעֵי־הַשְּׁעָרִים, כְּמוּבָן.
Everything is dear.	הַכֹּל עוֹלֶה בְּיֹקֶר.
Even raw materials.	גַּם הַחֹמֶר הַגּוֹלוֹם.
Some things have mounted to double the price.	יֵשׁ דְּבָרִים הָעוֹלִים פִּי־שְׁנַיִם.
Or even triple.	וְגַם פִּי־שְׁלֹשָׁה.
The value of money has fallen.	שַׁעַר הַכֶּסֶף יָרַד.

Speculators make everything dear.	הַסְּפֵקָרִים מוֹקִירִים אֶת הַכֹּל.

IN THE CLUB — בָּאֲגֻדָּה

Come, let's organize a society.	תָּבָה נְיַסֵּד אֲגֻדָּה.
What is the object of the society?	מַה מַּטָּרַת הָאֲגֻדָּה?
To work for Zionism.	לַעֲבֹד בְּעַד הַצִּיּוֹנִיּוּת.
To spread the Hebrew language.	לְהָפִיץ אֶת הַשָּׂפָה הָעִבְרִית
To help the poor.	לַעֲזֹר לָעֲנִיִּים.
To assist students in need (of support).	לִתְמֹךְ בְּתַלְמִידִים נִצְרָכִים.
When will the organization meeting take place?	מָתַי תִּהְיֶה הָאֲסֵפָה הַמְכוֹנֶנֶת?

We shall post notices.	נַדְבִּיק מוֹדָעוֹת.
We shall announce it in the synagogue.	נַכְרִיז בְּבֵית־הַכְּנֶסֶת.
We shall also send personal letters.	וְגַם נִשְׁלַח מִכְתָּבִים מְיֻחָדִים.
It's necessary to call a mass-meeting.	צָרִיךְ לִקְרֹא לַאֲסֵפָה פֻּמְבִּית.
In the name of the society, I call this meeting to order (open the meeting).	בְּשֵׁם הָאֲגֻדָּה אֲנִי פּוֹתֵחַ אֶת הָאֲסֵפָה.
Elect a chairman for the meeting.	בַּחֲרוּ בְּיוֹשֵׁב־רֹאשׁ לָאֲסֵפָה!
Nominations are in order.	הַעֲמָדָה עַל הַפֶּרֶק.
I nominate Mr. Yizreeli as chairman.	אֲנִי מַעֲמִיד אֶת הֶחָבֵר יִזְרְעֶאלִי לְיוֹשֵׁב־רֹאשׁ.

Mr. Yizreeli, do you accept the nomination?	מַר יִזְרְעֵאלִי, הַמְקַבֵּל אַתָּה אֶת הַהַעֲמָדָה?
Yes, sir.	כֵּן, אֲדוֹנִי!
We have only one candidate.	יֵשׁ לָנוּ רַק מוּעֲמָד אֶחָד.
All those who favor the nomination of Mr. Yizreeli raise hands.	הַמַּסְכִּימִים לִבְחִירַת מַר יִזְרְעֵאלִי יָרִימוּ אֶת יָדָם.
Those opposd to the nomination of Mr. Yizreeli raise hands.	הַמִּתְנַגְּדִים לִבְחִירַת מַר יִזְרְעֵאלִי יָרִימוּ אֶת יָדָם.
Mr. Yizreeli is elected unanimously as chairman.	מַר יִזְרְעֵאלִי נִבְחַר לְיוֹשֵׁב־רֹאשׁ פֶּה אֶחָד.
We must also elect a temporary secretary.	עוֹד עָלֵינוּ לִבְחֹר בְּמַזְכִּיר לְפִי־שָׁעָה.

Will the secretary please take notes of the proceedings at this meeting?	יוֹאֶל־נָא הַמַּזְכִּיר לִרְשֹׁם אֶת כָּל דִּבְרֵי הָאֲסֵפָה הַזֹּאת!
I appoint Mr. Ben David as sergeant-at-arms.	אֲנִי מְמַנֶּה אֶת הֶחָבֵר בֶּן־דָּוִד לִמְפַקֵּחַ עַל הַסֵּדֶר.
Mr. Shimoni will deliver an address.	מַר שִׁמְעוֹנִי יִשָּׂא נְאֻם.
He will speak on an interesting topic.	הוּא יְנַאֵם עַל תּוֹכֶן מְעַנְיֵן.
Let there be silence during the address!	שְׁתִיקָה יָפָה בִּשְׁעַת הַנְּאֻם!
Congratulations, Mr. Shimoni!	יִישַׁר כֹּחֲךָ, מַר שִׁמְעוֹנִי!
You made a fine speech.	יָפָה דָּרַשְׁתָּ.
You spoke briefly.	קִצַּרְתָּ בִּנְאֻמְךָ.
You spoke long.	הֶאֱרַכְתָּ בִּנְאֻמְךָ.

Mr. Shimoni is an excellent speaker.	מַר שִׁמְעוֹנִי הוּא נוֹאֵם מְצֻיָּן.
Don't raise a disturbance.	אַל תָּקִימוּ רַעַשׁ!
What is on the agenda? (What's the order of business)	מַה סֵּדֶר הָעִנְיָנִים?
Mr. Chairman, I desire the floor.	מַר יוֹשֵׁב־רֹאשׁ, אֲנִי מְבַקֵּשׁ אֶת רְשׁוּת הַדִּבּוּר
Mr. Levi has the floor.	לְחָבֵר לֵוִי נִתּוֹנָה רְשׁוּת הַדִּבּוּר.
I move we discuss the constitution of the club.	אֲנִי מַצִּיעַ לָדוּן בְּתַקָּנוֹת הָאֲגֻדָּה.
There is a motion on the floor (before the house).	הַצָּעָה עַל הַפֶּרֶק.
I second this motion.	אֲנִי תּוֹמֵךְ בְּהַצָּעָה זוֹ.

Those in favor of the motion say "aye".	הַמַּסְכִּימִים לַהַצָּעָה יַעֲנוּ הֵן
Opposed, "nay".	הַמִּתְנַגְּדִים לַהַצָּעָה יַעֲנוּ לֹא.
The majority being in favor, the motion is passed.	הַהַצָּעָה נִתְקַבְּלָה בְּרֹב דֵּעוֹת.
Please keep order!	בְּבַקָּשָׁה, הִתְנַהֲגוּ בְּסֵדֶר!
The count was irregular.	מִנְיַן הַדֵּעוֹת לֹא הָיָה כַּהֲלָכָה.
I demand a recount of the votes.	אֲנִי דוֹרֵשׁ לַחֲזוֹר וְלִמְנוֹת אֶת הַדֵּעוֹת.
Who desires the floor on this question?	מִי רוֹצֶה לְדַבֵּר בִּשְׁאֵלָה זוֹ?
The discussions are too lengthy.	הַוִּיכּוּחִים אֲרֻכִּים יוֹתֵר מִדַּי.
I move to limit the time of speeches to five minutes.	אֲנִי מַצִּיעַ לְהַגְבִּיל אֶת זְמַן הַדִּבּוּר לַחֲמִשָּׁה דַּקּוֹת.

The motion is seconded.	הַהַצָּעָה נִתְמְכָה.
I move the previous question (to proceed to a vote).	אֲנִי מַצִּיעַ לְהַעֲמִיד עַל הַמִּנְיָן.
I move to close the debate.	אֲנִי מַצִּיעַ לְהַפְסִיק אֶת הַוִּכּוּחִים.
I move an amendment to the motion.	אֲנִי מַצִּיעַ תִּלּוּאִים לַהַצָּעָה.
I move to table the motion.	אֲנִי מַצִּיעַ לְהָסִיר אֶת הַהַצָּעָה מֵעַל הַפֶּרֶק.
The motion is lost.	הַהַצָּעָה בָּטְלָה.
I appeal from the decision of the chair.	אֲנִי מְעָרְעֵר עַל הַהֶחְלָטַת הַיוֹשֵׁב־רֹאשׁ.
The chair does not conduct the meeting according to parliamentary law.	אֵין הַיוֹשֵׁב־רֹאשׁ מְנַהֵל אֶת הָאֲסֵפָה כְּמִנְהַג בֵּית־מְרָשִׁים.

I move to reconsider this question.	אֲנִי מַצִּיעַ לָדוּן מֵחָדָשׁ בִּשְׁאֵלָה זוֹ.
We should defer this question to the next meeting.	עָלֵינוּ לִדְחוֹת שְׁאֵלָה זוֹ לָאֲסֵפָה הַבָּאָה.
That is the rule.	כַּךְ הוּא הַדִּין.
I object to the decision of the chair.	אֲנִי מוֹחֶה נֶגֶד פְּסַק הַיוֹשֵׁב־רֹאשׁ.
The objection is overruled.	הַמְּחָאָה לֹא נִתְקַבְּלָה.
I am opposed.	אֲנִי מִתְנַגֵּד לָזֶה.
I object.	אֲנִי מְעַרְעֵר עַל זֶה.
This is out of order.	אֵין זֶה מִסִּדֶר הָעִנְיָן.
Point of order!	הֶעָרָה לְסֵדֶר הָעִנְיָנִים.
Point of information!	הֶעָרָה לְעֶצֶם הָעִנְיָן.
Question of information!	שְׁאֵלָה לְעֶצֶם הָעִנְיָן.

I move a substitute motion.	אֲנִי מַצִּיעַ הַצָּעָה אַחֶרֶת.
Have I a vote?	הֲיֵשׁ לִי רְשׁוּת לְהַצְבִּיעַ?
Only members may vote.	רַק הַחֲבֵרִים רַשָּׁאִים לְהַצְבִּיעַ.
Point of procedure as to he vote.	הֶעָרָה לְהַצְבָּעָה.
I move a secret ballot.	אֲנִי מַצִּיעַ הַצְבָּעָה חֲשָׁאִית.
An open ballot.	הַצְבָּעָה גְּלוּיָה.
A rising vote.	הַצְבָּעָה בַּעֲמִידָה.
I demand a roll-call.	אֲנִי דוֹרֵשׁ בַּקָּרָה.
Let me have the membership list.	הַגִּישׁוּ אֵלַי אֶת רְשִׁימַת הַחֲבֵרִים!
Mr. So and So.	פְּלוֹנִי בֶּן פְּלוֹנִי!
Present!	הִנֵּנִי!
We have no resolution on this point.	אֵין לָנוּ כָּל הַחְלָטָה בְּעִנְיָן זֶה.
Don't get excited.	אַל תִּתְרַגְּזוּ!

How enthusiastic he gets!	כַּמָּה הוּא מִתְלַהֵב!
Why don't you express your opinion?	מַדּוּעַ אֵינְךָ מְחַוֶּה אֶת דַּעְתְּךָ?
I don't care to mix in.	אֵינֶנִּי רוֹצֶה לְהִתְעָרֵב.
I don't care to exert my influence for or against.	אֵינֶנִּי רוֹצֶה לְהַשְׁפִּיעַ בְּעַד אוֹ נֶגֶד.
That befits a chairman.	כַּךְ יָאֶה לְיוֹשֵׁב־רֹאשׁ.
Sit still!	שְׁבוּ בְּמְנוּחָה!
Don't whisper!	אַל תִּתְלַחֲשׁוּ!
For this purpose we shall call a special meeting.	לְתַכְלִית זוּ נִקְרָא אֲסֵפָה מְיֻחֶדֶת.
I suggest that the meeting be secret.	אֲנִי יוֹעֵץ, כִּי הָאֲסֵפָה תִּהְיֶה חֲשָׁאִית.
That is a good suggestion.	זֹאת הִיא עֵצָה טוֹבָה.

It would be better that the meeting be an open one.	מוּטָב שֶׁהָאֲסֵפָה תִּהְיֶה גְּלוּיָה.
That's my personal opinion.	זוֹהִי דַּעְתִּי הַפְּרָטִית.
You are right.	לְךָ הַצֶּדֶק.
What remains on the order of business?	מָה עוֹד עוֹמֵד עַל הַפֶּרֶק?
Collection of dues.	גְּבִית מַס.
We have not yet decided what the dues shall be.	עוֹד לֹא הֶחְלַטְנוּ כַּמָּה יִהְיֶה סְכוּם הַמַּס.
What shall be the initiation fee of the society?	כַּמָּה יִהְיוּ דְּמֵי הַכְּנִיסָה לָאֲגֻדָּה?
These proposals have been referred to the Constitution Committee.	הַהַצָּעוֹת הָאֵלֶּה נִמְסְרוּ לְיַד וַעַד־הַתַּקָּנוֹת.

We must elect a temporary president.	צָרִיךְ לִבְחֹר בְּנָשִׂיא לְפִי־שָׁעָה.
How shall we proceed with the election?	כֵּיצַד נִבְחַר?
Fetch a ballot box.	הָבִיאוּ לְכַאן קֻלְפִּי!
Distribute ballots among the members.	חַלְקוּ לַחֲבֵרִים פִּתְקוֹת־בְּחִירָה!
Record the names of the candidates.	רִשְׁמוּ אֶת שְׁמוֹת הַמֻּעֲמָדִים!
Drop the ballots into the ballot box.	הַטִּילוּ אֶת הַפִּתְקוֹת לְתוֹךְ הַקֻּלְפִּי!
When will the regular meeting take place?	מָתַי תָּחוּל הָאֲסֵפָה הָרְגִילָה?
At the time set.	בַּזְּמַן הַקָּבוּעַ.
I move to adjourn the meeting.	אֲנִי מַצִּיעַ לִנְעֹל אֶת הָאֲסֵפָה.
This is a general meeting.	זֹאת הִיא אֲסֵפָה כְּלָלִית.

The secretary will please read the minutes.	יִקְרָא־נָא הַמַּזְכִּיר אֶת זִכְרוֹן־הַדְּבָרִים!
Who has any comments to make on the minutes?	לְמִי יֵשׁ לְהָעִיר עַל זִכְרוֹן־הַדְּבָרִים?
The minutes stand approved.	זִכְרוֹן־הַדְּבָרִים נִתְאַשֵּׁר.
We shall now proceed to the reading of correspondence.	יֵשׁ לִקְרֹא עַתָּה אֶת חֲלִיפַת־הַמִּכְתָּבִים.
The Constitution Committee will render a report of its work.	וְעַד־הַתַּקָּנוֹת יִתֵּן דִּין־וְחֶשְׁבּוֹן עַל עֲבוֹדָתוֹ.
I shall first read the preamble.	אֶקְרָא תְּחִלָּה אֶת הַפְּתִיחָה

The constitution contains three articles.	תֻּדְרַ־הַתַּקָּנוֹת כּוֹלֵל שְׁלֹשָׁה פְּרָקִים.
Each article is divided into several sections.	כָּל פֶּרֶק נֶחֱלָק לְסְעִפִים אֲחָדִים.
Please read each constitutional provision separately.	בְּבַקָּשָׁה לִקְרֹא כָּל תַּקָּנָה לְבַדָּהּ!
We must also discuss the by-laws.	עָלֵינוּ לָדוּן גַּם בַּתַּקָּנוֹת הַנוֹסָפוֹת.
The society elects four standing committees.	הָאֲגֻדָּה בּוֹחֶרֶת בְּאַרְבָּעָה וְעָדִים קְבוּעִים.
An Executive Committee.	וַעַד פּוֹעֵל.
A Propaganda Committee.	וַעַד לְתַעְמוּלָה.
A Literary Committee.	וַעַד לְסִפְרוּת
A House Committee.	וְעַד לַבַּיִת.

The Executive Committee directs all the business of the society.	הַוַּעַד הַפּוֹעֵל מְפַקֵּחַ עַל כָּל עִנְיְנֵי הָאֲגֻדָּה.
It carries out the resolutions adopted.	הוּא מוֹצִיא אֶל הַפֹּעַל אֶת הַהַחְלָטוֹת.
We must elect seven permanent officers.	עָלֵינוּ לִבְחֹר בְּשִׁבְעָה פְּקִידִים קְבוּעִים.
A president and a vice-president.	נָשִׂיא וְסַגַן־נָשִׂיא.
A secretary, treasurer and corresponding secretary.	מַזְכִּיר, גִּזְבָּר וְסוֹפֵר־הָאֲגֻדָּה.
A financial secretary and a sergeant-at-arms.	מַזְכִּיר־הַכְּסָפִים וּמְפַקֵּחַ עַל הַסֵּדֶר.
The president is a member ex officio of all committees.	הַנָּשִׂיא חָבֵר לְכָל הַוְּעָדִים בְּחֻזְקַת מִשְׂרָתוֹ.

Have we the right to add to the number?	הַיֵּשׁ לָנוּ רְשׁוּת לְהוֹסִיף?
As many as you desire.	כַּמָּה שֶׁלִּבְּכֶם חָפֵץ.
I move to add a Committee on Membership.	אֲנִי מַצִּיעַ לְהוֹסִיף וַעַד לְקַבָּלַת חֲבֵרִים.
It is always possible to elect a special committee.	בְּוַעַד מְיֻחָד אֶפְשָׁר תָּמִיד לִבְחֹר.
In my opinion, we ought to add two trustees.	לְפִי דַעְתִּי, רָאוּי לְהוֹסִיף שְׁנֵי נֶאֱמָנִים.
According to the constitution, the Executive Committee has the power to coopt.	עַל־פִּי הַתַּקָּנוֹת, נִתְּנָה לַוַּעַד הַפּוֹעֵל זְכוּת־הַצְּרוּף.
It has the power to add to its membership.	הַכֹּחַ בְּיָדוֹ לְצָרֵף אֵלָיו עוֹד חֲבֵרִים.

That's not fair.

אֵין זֶה כֵּן הַיּוֹשֵׁר.

So it was decided.

כָּךְ הֻחְלַט.

The chairman acts tyrannically.

הַיּוֹשֵׁב־רֹאשׁ מִתְנַהֵג בְּעָרִיצוּת.

You should apologize.

עָלֶיךָ לְבַקֵּשׁ סְלִיחָה.

I retract my statement.

אֲנִי חוֹזֵר מִדְּבָרַי.

We almost forgot to elect an editor.

כִּמְעַט שָׁכַחְנוּ לִבְחֹר בְּעוֹרֵךְ.

What is the duty of the editor?

מַה תַּפְקִיד הָעוֹרֵךְ?

He has to arrange the literary program.

עָלָיו לַעֲרֹךְ אֶת הַתָּכְנִית הַסִּפְרוּתִית.

We do not need a leader.

בְּמִנְהָל אֵין לָנוּ צֹרֶךְ.

We are not a club of youngsters.

אֵינֶנּוּ חֶבְרָה שֶׁל קְטַנִּים.

Pay attention to the rest of the constitution.

שִׂימוּ לֵב לִשְׁאָר הַתַּקָּנוֹת!

Whoever does not attend meetings for three times in succession shall be expelled from the society.	מִי שֶׁלֹּא יְבַקֵּר אֶת הָאֲסֵפוֹת שָׁלֹשׁ פְּעָמִים רְצוּפוֹת, יוּצָא מִן הָאֲגֻדָּה.
That is not the proper wording.	אֵין זֶה הַנֻּסָּח הָרָאוּי.
I would word this clause as follows:	אֲנִי מְנַסֵּחַ אֶת הַתַּקָּנָה כָּךְ.
Whoever shall not attend the meetings without a satisfactory reason.	מִי שֶׁלֹּא יְבַקֵּר אֶת הָאֲסֵפוֹת בְּלִי טַעַם מַסְפִּיק.
I declare a recess for ten minutes.	אֲנִי מַכְרִיז הַפְסָקָה לַעֲשָׂרָה דַּקּוֹת.
The recess is over.	הַהַפְסָקָה נִגְמְרָה.

I propose Shimoni for membership.	אֲנִי מַצִּיעַ אֶת מַר שִׁמְעוֹנִי לְחָבֵר.
I move to arrange a literary evening.	אֲנִי מַצִּיעַ לַעֲרֹךְ נָשֶׁף.
A reception in honor of the visiting author.	קַבָּלַת־פָּנִים לִכְבוֹד הָאוֹרֵחַ הַסּוֹפֵר.
I desire to give the reasons for my motion.	אֲנִי רוֹצֶה לְנַמֵּק אֶת הַצָּעָתִי.
All are agreed.	הַכֹּל מַסְכִּימִים.
There is no need for explanation.	אֵין צֹרֶךְ בְּנִמּוּקִים.
Of how many members shall the committee on arrangements consist?	בֶּן כַּמָּה חֲבֵרִים יִהְיֶה הַוַּעַד הַמְסַדֵּר?
It makes no difference.	אֵין הַבְדֵּל בַּדָּבָר.
We ought to invite the prominent men of the city.	צָרִיךְ לְהַזְמִין אֶת אַנְשֵׁי־הַשֵּׁם אֲשֶׁר בָּעִיר.

Send out the invitations as soon as possible.	שְׁלְחוּ אֶת הַזְּמָנוֹת בַּהַקְדֵּם הָאֶפְשָׁרִי!
Next week there will be a meeting for the installation of officers.	בְּעוֹד שָׁבוּעַ תִּהְיֶה אֲסֵפַת מְלוּאִים.
Also a ceremony of initiation for the new members.	וְגַם סֵדֶר הַכְנָסַת חֲבֵרִים.
Who will install the new officers?	מִי יְמַלֵּא אֶת יַד הַפְּקִידִים הַחֲדָשִׁים?
We shall give the honor to the president of our organization.	נְכַבֵּד אֶת נְשִׂיא הַהִסְתַּדְרוּת שֶׁלָּנוּ.
The treasury is empty.	הַקֻּפָּה רֵיקָה.
We shall have to impose a special tax on the members.	צָרִיךְ לְהַטִּיל עַל הַחֲבֵרִים מַס מְיֻחָד.

Let us hire a theater for a play.	נִשְׂכֹּר תֵּאַטְרוֹן לְחִזָּיוֹן.
The chirman shall appoint a committee to select the play.	הַיּוֹשֵׁב־רֹאשׁ יְמַנֶּה וַעֲדָה, שֶׁתִּבְחַר בַּחִזָּיוֹן.
Let's arrange a masquerade for the benefit of the society.	נַעֲרֹךְ נָשֶׁף־מַסֵּכוֹת לְטוֹבַת הָאֲגֻדָּה.
With a "flying post".	עִם „דֹּאַר פּוֹרֵחַ".
The person with the most effective mask shall receive a prizc.	בַּעַל הַמַּסֵּכָה הַיּוֹתֵר מְצֻלַּחַת יְקַבֵּל פְּרָס.
Or perhaps a concert and dance?	אוּלַי נָשֶׁף זִמְרָה וּמְחוֹלוֹת?
Whatshallbethecharge for a ticket of admission?	בְּכַמָּה יַעֲלֶה כַּרְטִיס־כְּנִיסָה?

The evening was a success.	הַנָּשֶׁף הִצְלִיחַ.
In the summer we shall arrange a picnic in one of the parks.	בַּקַּיִץ נַעֲרֹךְ טִיּוּל בְּאַחַד הַגַּנִּים.
Admission shall be free to members.	לַחֲבֵרִים הַכְּנִיסָה חִנָּם.
We ought to open up a center.	עָלֵינוּ לִפְתֹּחַ מֶרְכָּז.
And a gymnasium.	וְאוּלָם לְהִתְעַמְּלוּת.
I am very fond of gymnastics.	אֲנִי אוֹהֵב מְאֹד לְהִתְעַמֵּל.
Come to the dedication.	בּוֹאוּ לַחֲנֻכַּת הַבַּיִת!
That will be a fine celebration.	זֹאת תִּהְיֶה חֲגִיגָה יָפָה.
Our society has been in existence for a year.	מְלֹאָה שָׁנָה לְקִיּוּם אֲגֻדָּתֵנוּ.

I move to arrange a sociable.	אֲנִי מַצִּיעַ לַעֲרֹךְ מְסִבַּת־חֲבֵרִים.
Elect a committee to arrange the feast (banquet).	בַּחֲרוּ בְּוַעַד שֶׁיַּעֲשֶׂה אֶת הַמְּסִבָּה!
Is there a quorum present?	הֲיֵשׁ כָּאן הַמִּנְיָן הַדָּרוּשׁ שֶׁל חֲבֵרִים?
What is the program of the meeting?	מַה תָּכְנִית הָאֲסֵפָה?
A debate on the existence of our people in the diaspora.	וִכּוּחַ בְּדַבָּר קִיּוּם הָאֻמָּה בַּגָּלוּת.
I shall take the affirmative.	אֲנִי אֲדַבֵּר בְּחִיּוּב.
I shall take the negative.	אֲנִי אֲדַבֵּר בִּשְׁלִילָה.
Choose judges.	בַּחֲרוּ בְּשׁוֹפְטִים!
I move to close the list of speakers.	אֲנִי מַצִּיעַ לִנְעֹל אֶת רְשִׁימַת הַמִּתְוַכְּחִים.

In my opinion, the existence of our people in the diaspora is possible.	לְפִי דַעְתִּי, יֵשׁ קִיּוּם לָאֻמָּה בַּגָּלוּת.
And I hold the contrary.	וַאֲנִי סוֹבֵר לְהֶפֶךְ.
There is a difference of opinion among the debaters.	יֵשׁ חִלּוּקֵי־דֵעוֹת בֵּין הַמִּתְוַכְּחִים.
The majority say one thing and the minority, another.	הָרֹב אוֹמֵר כַּךְ וְהַמִּעָט אוֹמֵר כַּךְ.
Now there will be a discussion on another subject.	עַתָּה תִּהְיֶה שִׂיחָה בְּעִנְיָן אַחֵר.
I am of one accord with the first speaker.	אֲנִי תָּמִים־דֵּעִים עִם הַנּוֹאֵם הָרִאשׁוֹן.
And I differ with him.	וַאֲנִי חוֹלֵק עַל דְּבָרָיו.
What is the literary part of the program?	מַה חֵלֶק הַסִּפְרוּת שֶׁל הַתָּכְנִית?

Mr. Yardeni will recite some of Bialik's poems.	הֶחָבֵר יַרְדֵּנִי יַקְרִיא מִשִּׁירֵי בְּיָאלִיק.
The recitation was well rendered.	הַהַקְרָאָה עָלְתָה יָפֶה.
Mr. Zerubabel will read a paper.	הֶחָבֵר זְרֻבָּבֶל יַקְרִיא מַאֲמָר.
Who would like to criticize the composition?	מִי רוֹצֶה לְבַקֵּר אֶת הַחִבּוּר?
I'd like to make a slight correction.	אֲנִי רוֹצֶה לְתַקֵּן תִּקּוּן קָטָן.
Are there any other numbers on the program?	הֵיֵשׁ עוֹד עִנְיָנִים בְּסֵדֶר הַתָּכְנִית?
Old business.	עִנְיָנִים יְשָׁנִים.
New business.	עִנְיָנִים חֲדָשִׁים.
Who has anything to propose for the good and welfare of the society?	לְמִי יֵשׁ לְהַצִּיעַ לְתַקָּנַת הָאֲגֻדָּה?

I move that the meetings be held twice a month.	אֲנִי מַצִּיעַ, כִּי הָאֲסֵפוֹת תִּהְיֶינָה פְּעָמַיִם בַּחֹדֶשׁ.
Once for a business meeting and once for a literary meeting.	פַּעַם אֲסֵפָה מַעֲשִׂית וּפַעַם אֲסֵפָה סִפְרוּתִית.
Now comes the social (recreational) part of the program.	עַתָּה יָבוֹא חֵלֶק הַשַּׁעֲשׁוּעִים שֶׁל הַתָּכְנִית
Call the roll of the members.	קְרָא־נָא אֶת רְשִׁימַת הַחֲבֵרִים!
Whoever does not attend the meeting shall pay a fine.	מִי שֶׁלֹּא יָבוֹא אֶל הָאֲסֵפָה יְשַׁלֵּם קְנָס.
I move to impeach our president.	אֲנִי מַצִּיעַ לְפַטֵּר אֶת נְשִׂיאֵנוּ.
He's not fit for this office.	הוּא אֵינֶנּוּ רָאוּי לְמִשְׂרָה זוֹ.

He doesn't fulfil his duties.	הוּא אֵינֶנּוּ מְמַלֵּא אֶת חוֹבוֹתָיו.
I resign of my own accord.	אֲנִי מִתְפַּטֵּר מֵאֵלַי.
A motion to accept the resignation.	הַצָּעָה לְקַבֵּל אֶת הַפִּטּוּרִים
Will the secretary please read the circular we received.	יִקְרָא־נָא הַמַּזְכִּיר אֶת הַחוֹזֵר שֶׁקִּבַּלְנוּ!
The annual convention of our organization will take place soon.	הַוְעִידָה הַשְּׁנָתִית שֶׁל הִסְתַּדְרוּתֵנוּ תִּהְיֶה בְּקָרוֹב.
Let us call an election meeting.	נִקְרָא לַאֲסֵפַת בְּחִירוֹת.
Every branch is entitled to two delegates.	כָּל סְנִיף זַכַּאי לִבְחֹר בִּשְׁנֵי צִירִים.

We also have to elect alternates.	עָלֵינוּ לִבְחֹר גַּם בְּמַלְאֵי־מָקוֹם.
What shall be the instructions to our representatives?	מַה תִּהְיֶינָה הַהוֹרָאוֹת לְבָאֵי־כֹחֵנוּ?
I move that we give them full power.	אֲנִי מַצִּיעַ לָתֵת לָהֶם יִפּוּי־כֹּחַ גָּמוּר.
The delegates are requested to participate in the preliminary conference.	הַצִּירִים מִתְבַּקְּשִׁים לְהִשְׁתַּתֵּף בַּאֲסֵפָה הַמְקַדֶּמֶת.
When will the first session begin?	מָתַי תִּפָּתַח הַיְשִׁיבָה הָרִאשׁוֹנָה?
This is the opening session.	זֹאת הִיא יְשִׁיבַת הַפְּתִיחָה.
How many committees must we elect?	כַּמָּה וְעָדִים עָלֵינוּ לִבְחֹר?

Committee on Credentials, Committee on Resolutions.	וַעַד הַתַּרְשָׁאוּת, וַעַד הַהַחְלָטוֹת.
Press (Publicity) Committee, Budget Cmomittee, Committee on Nominations.	וַעַד הַפִּרְסוּם, וַעַד הַתַּקְצִיב, וַעַד הַהַעֲמָדָה.
The Budget Committee moves to appropriate money for schools.	וַעַד הַתַּקְצִיב מַצִּיעַ לְהַפְרִישׁ מָמוֹן לְטוֹבַת בָּתֵּי־סֵפֶר.
The appropriation is adopted.	הַהַפְרָשָׁה נִתְקַבְּלָה.
Mr. Chairman, I ask for the floor on a matter of personal privilege.	מַר יוֹשֵׁב־רֹאשׁ, אֲנִי מְבַקֵּשׁ זְכוּת דִּבּוּר לְדָבָר!
The president refuses to accept the nomina-	הַנָּשִׂיא מְסָרֵב לְקַבֵּל אֶת הַהַעֲמָדָה לְהַבָּא.

tion for the coming term (future).

זֹאת הְיא הוֹדָעָה רַשְׁמִית.

It is an official announcement (statement).

A vote of thanks to the president.

הַחְלָטָה לְהַבִּיעַ תּוֹדָה לַנָּשִׂיא.

He worked faithfully.

הוּא עָבַד בֶּאֱמוּנָה.

Mr. Gelili will deliver a lecture.

מַר גְּלִילִי יַרְצֶה הַרְצָאָה.

Please sign the petition.

חָתֹם־נָא עַל כְּתָב־הַבַּקָּשָׁה!

We demand that there be a conference every half year.

אֲנַחְנוּ דוֹרְשִׁים, כִּי בְּכָל חֲצִי־שָׁנָה תִּהְיֶה מוּעֶצָה.

All the workers of the party should participate in the conference.

בַּמּוּעֶצָה יִשְׁתַּתְּפוּ עַסְקָנֵי הַמִּפְלַגָּה.

Who is to convene the conference?	מִי יוֹעִיד אֶת הַמּוֹעֲצָה?
The Central Committee, of course.	הַוַּעַד הַמֶּרְכָּזִי, כְּמוּבָן.
It is doubtful whether this demand will be granted.	סָפֵק אִם תִּתְמַלֵּא הַדְּרִישָׁה הַזֹּאת.
At any rate, we must try.	עַל כָּל פָּנִים צָרִיךְ לְהִשְׁתַּדֵּל.
This is the closing session.	זֹאת. הִיא יְשִׁיבַת הַנְּעִילָה.
The convention adjourned with the singing of "Hatikvah".	הַוְּעִידָה נִנְעֲלָה בְּשִׁירַת "הַתִּקְוָה".

DRESS — בַּהַלְבָּשָׁה

I must have a suit made.	עָלַי לְתָפֵר לִי חֲלִיפָה.
My old clothes are torn.	בְּגָדַי הַיְשָׁנִים קְרוּעִים.
Do you like ready-made clothes?	הַאוֹהֵב אַתָּה בְּגָדִים מוּכָנִים?
I like clothes made to order.	אֲנִי אוֹהֵב בְּגָדִים עֲשׂוּיִים עַל־פִּי הַזְמָנָה.
They fit me well.	הֵם הוֹלְמִים אוֹתִי יָפֶה.
Come with me to a dress goods store.	בּוֹא־נָא אִתִּי אֶל חֲנוּת־אֶרֶג!
Measure off four yards (ells) of cloth for me.	מְדֹד לִי אַרְבַּע אַמּוֹת אָרִיג!
What color do you prefer?	בְּאֵיזֶה גָּוֶן אַתָּה בּוֹחֵר?
What's your opinion?	מַה דַּעְתְּךָ?
The color that is most becoming to you.	הַגָּוֶן הַיָּאֶה לְךָ בְּיוֹתֵר.

Does Gamliel, the tailor, live here?	הֲדָר כַּאן גַּמְלִיאֵל הַחַיָּט?
Make up a suit for me in the latest fashion.	תְּפֹר לִי חֲלִיפָה לְפִי הָאֲפָנָה הָאַחֲרוֹנָה!
Take my measure.	כַּוֵּן אֶת מִדָּתִי!
Take care not to have the sleeves too long.	תַּשְׂגִּיחַ, כִּי הַשַּׁרְווּלִים לֹא יִהְיוּ אֲרֻכִּים.
You can depend upon me.	אַתָּה יָכֹל לִסְמֹךְ עָלַי.
I guarantee that it will fit well.	אֲנִי אַחְרַאי עַל הַהַלִיכָה הַיָּפָה.
Come the day after tomorrow, and I will let you try on the suit.	בּוֹא מָחָרתַיִם וַאֲנַסֶּה עָלֶיךָ אֶת הַחֲלִיפָה!
Take off your clothes.	פְּשֹׁט אֶת בְּגָדֶיךָ!
Put on the new clothes.	לְבַשׁ אֶת הַבְּגָדִים הַחֲדָשִׁים!

Can one dress and undress here?	הַאֶפְשָׁר כַּאן לְהִתְפַּשֵּׁט וּלְהִתְלַבֵּשׁ?
The coat is too tight for me.	הַמְּעִיל צַר עָלַי.
It feels tight under the arms.	אֲנִי מַרְגִּישׁ מוּעָקָה תַּחַת בֵּית־שְׁחָיַי.
The pockets are too short.	הַכִּיסִים קְצָרִים יוֹתֵר מִדַּי.
The trousers are too wide.	הַמִּכְנָסַיִם רְחָבִים יוֹתֵר מִדַּי.
Button the west.	רְכֹס אֶת הֶחָזְיָה!
Unbutton the vest.	הַתֵּר אֶת הֶחָזְיָה!
The buttons are not in the proper places.	הַכַּפְתּוֹרִים אֵינָם בִּמְקוֹמָם.
The button-holes need to be mended.	צָרִיךְ לְתַקֵּן אֶת הַלּוּלָאוֹת.
It doesn't fit well here.	כַּאן אֵין הוֹלֵם יָפֶה.
I like pointed lapels.	אֲנִי אוֹהֵב דָּשִׁים חַדִּים.

And round coat-tails.	וְשׁוּלַיִם עֲגֻלִּים.
Everything will turn out well.	הַכֹּל יַעֲלֶה יָפֶה.
Wear it in good health.	תִּתְחַדֵּשׁ!
Do you wear suspenders?	הַחוֹבֵשׁ אַתָּה כְּתֵפוֹת?
I wear a belt.	אֲנִי חוֹגֵר חֲגוֹרָה.
Here is a tear in your overcoat.	הִנֵּה קֶרַע בְּאַדֶּרֶת שֶׁלְּךָ.
Let me have needle and thread.	תֵּן לִי חוּט וּמַחַט!
I must sew up the rent.	עָלַי לֶאֱחוֹת אֶת הַקֶּרַע.
I don't like patched clothes.	אֵינֶנִי אוֹהֵב בֶּגֶד מְטֻלָּא.
Where is the spool of thread?	אֵיפֹה הַסְּנִגְפָּה?
You had better sew it up by machine.	מוּטָב שֶׁתִּתְפֹּר בִּמְכוֹנַת־הַתְּפִירָה.

My brother's wedding will take place in a week from now.	כְּעֵת שָׁבוּעַ תִּהְיֶה חֲתֻנַּת אָחִי.
My suit needs to be pressed.	צָרִיךְ לְגַהֵץ אֶת חֲלִיפָתִי.
I have to buy a new shirt with cuffs.	עָלַי לִקְנוֹת חָלוּק חָדָשׁ עִם יָדוֹתַיִם.
A stiff collar and a cravat.	צַוָּארוֹן קָשֶׁה וַעֲנִיבָה.
A pair of woolen socks.	זוּג גַּרְבַּיִם שֶׁל צֶמֶר.
Gloves, handkerchiefs, and a cane.	כַּפָּתַיִם, מִטְפָּחוֹת וּמַקֵּל.
Linen shirts and drawers.	כֻּתָּנוֹת וְתַחְתּוֹנִים שֶׁל בַּד.
My cap is faded and worn out.	כּוֹבָעִי דָּהֶה וּמְמֻעָּךְ.
Put on a hat.	חֲבֹשׁ מִגְבַּעַת!
Take off the hat.	הָסֵר אֶת הַמִּגְבַּעַת!

Where can one borrow a silk hat (high hat)?	הֵיכָן יֵשׁ לִשְׁאֹל מִגְבָּעַת שֶׁל מֶשִׁי?
You can get it upon leaving a deposit.	תַּשִּׂיג בַּעֲרֵבָה.
I must put on (wear) glasses.	עָלַי לַחֲבֹשׁ מִשְׁקְפַיִם.
And buy a gold (watch) chain.	וְלִקְנוֹת שַׁרְשֶׁרֶת שֶׁל זָהָב.
You are giving too much attention to your clothes.	אַתָּה מְתַקֵּשֵׁט הַרְבֵּה.
You're a dandy.	אַתָּה טַרְזָן.
Where is the cobbler's?	אֵיֵה מְקוֹם הַסַּנְדְּלָר?
Take off your shoes.	שְׁלֹף אֶת נְעָלֶיךָ!
Put on the new shoes.	נְעַל אֶת הַנְּעָלִים הַחֲדָשׁוֹת!
The heel is not straight.	הָעָקֵב אֵינֶנּוּ יָשָׁר.
The sole is thin.	הַגִּלְדָּה דַּקָּה.

The leather is not strong (durable).	הָעוֹר אֵינֶנּוּ חָזָק.
The point is not wide enough.	הַחַרְטוֹם אֵינֶנּוּ רָחָב לְמַדַּי.
Tie the shoe laces.	הַדֵּק אֶת הַשְּׂרוֹכִים!
Don't forget to polish the shoes.	אַל תִּשְׁכַּח לְצַחְצֵחַ אֶת הַנְּעָלַיִם!
Can I also get slippers and overshoes (rubbers) here?	הַאֶפְשָׁר לְהַשִּׂיג אֶצְלְךָ גַּם סַנְדָּלִים וְעַרְדָּלִים?
Do you like boots?	הַאוֹהֵב אַתָּה מַגָּפַיִם?
Don't soil and don't crease your clothes.	אַל תְּלַכְלֵךְ וְאַל תְּקַמֵּט אֶת בְּגָדֶיךָ!
Buy overalls for work.	קְנֵה סַרְבָּלִים לִזְמַן הָעֲבוֹדָה!
Where is the brush?	אַיֵּה הַמִּבְרֶשֶׁת?
How many spots there are on your fur coat!	כַּמָּה כְּתָמִים בַּפַּרְוָה שֶׁלְּךָ!

The fur needs a cleaning.	צָרִיךְ לְנַקּוֹת אֶת עוֹר־הַשֻּׁעָר.
Where about is the barber shop?	אַיֵּה בַּאן מַסְפֶּרֶה?
I must have a haircut and a shave.	עָלַי לְהִסְתַּפֵּר וּלְהִתְגַּלַּח.
Leah, when will you buy a dress trimmed with lace?	לֵאָה, מָתַי תִּקְנִי שִׂמְלָה מְקֻשֶּׁטֶת בְּסַלְסָלָה?
I need a plain skirt.	יֵשׁ לִי צֹרֶךְ בְּשִׂמְלָנִית פְּשׁוּטָה.
Without a train and without pleats.	בְּלִי שֹׁבֶל וּבְלִי קְפָלִים.
I must also buy a muff and a scarf.	כְּמוֹ כֵן עָלַי לִקְנוֹת יְדוּנִית וַעֲנָק.
Stockings, garters, and an apron.	פְּוָמְקִים, בִּירְיוֹת, וְסִנּוֹר.

צָעִיף, מָחוּךְ וְחָרִיט.	A veil, a corset, and a purse.
אֶסְתֵּר, מַה בְּעֵינַיִךְ הַחֻלְצָה אֲשֶׁר תָּפַרְתִּי לִי?	Esther, how do you like the blouse that I have sewed for myself?
חֻלְצָה מְצֻאָה חֵן בְּעֵינַי. מִי רָקַם אֶת הָרִקְמָה?	I like the blouse. Who did the embroidering?
אֲנִי בְּעֶצֶם יָדַי.	I, myself (Lit. "with my own hands").
הֵיֵשׁ לָךְ פִּסַּת קְטִיפָה?	Have you a piece of velvet?
עָלַי לְהַטְלִיא טְלַאי.	I must make a patch.
תְּנִי לִי אֶת הַמַּכְבֶּנֶת!	Give me the hairpin.
עָלַי לַעֲשׂוֹת אֶת הַתִּסְרֹקֶת שֶׁלִּי.	I must arrange my hair (coiffure).

Give me the ribbons and the pins.	תְּנִי לִי אֶת הַקִּשׁוּרִים וְהַסִּכּוֹת!
Why haven't you any ear-rings, bracelets, and rings?	מַדּוּעַ אֵין לָךְ עֲגִילִים, אֶצְעָדוֹת וְטַבָּעוֹת?
I hate jewelry (ornaments).	אֲנִי שׂוֹנֵאת תַּכְשִׁיטִים.
Who is the old woman knitting a stocking?	מִי הִיא הַזְּקֵנָה הַסּוֹרֶגֶת פָּוָמָק?
She wears a peruke.	הִיא חוֹבֶשֶׁת לְרֹאשָׁהּ פֵּאָה נָכְרִית.
I have to buy a skull-cap — a gift for my grandfather.	עָלַי לִקְנוֹת כִּפָּה — מַתָּנָה לְסָבִי.
What are these parcels?	מָה הֵן הַחֲבִילוֹת הָאֵלֶּה?
Wash to be sent to the laundry.	לְבָנִים לִמְסֹר לַמִּכְבֶּסָה.

And rags to sell to the rag dealer.	וּסְמַרְטוּטִים לִמְכֹּר לַסְּמַרְטוּטָר.

FOOD — בָּאֲכִילָה

I am hungry.	אֲנִי רָעֵב.
Let's go into a restaurant.	נָסוּר אֶל בֵּית־אֹכֶל.
Wash your hands for the meal.	טוֹל יָדֶיךָ לַאֲכִילָה!
Waiter, set the table.	מֶלְצַר, עָרֹךְ אֶת הַשֻּׁלְחָן!
Let me have a spoon and a fork.	הַגֶּשׁ־נָא לִי כַּף וּמַזְלֵג!
And a knife to cut the bread.	וְסַכִּין לִבְצֹעַ אֶת הַלֶּחֶם.
Please give me a napkin.	בְּבַקָּשָׁה, תֵּן לִי מַפִּית!
What do you wish to eat?	מָה רְצוֹנְךָ לֶאֱכֹל?

Here's the menu (bill of fare).	הֵא לְךָ לוּחַ־הַמַּאֲכָלִים!
I want to eat a regular dinner (table d'hôte).	אֲנִי רוֹצֶה לֶאֱכֹל אֲרוּחָה שְׁלֵמָה.
What have you for entree (hors-d' œuvrés)?	מַה יֵּשׁ לְךָ לִלְגִימָה?
Marinaded herring.	מָלִיחַ אָדִים.
Chopped liver.	כָּבֵד מְקֻצָּץ.
Stuffed or fried fish.	דָּג מְמֻלָּא אוֹ מְטֻגָּן.
Calves' feet.	כַּרְעֵי עֵגֶל.
Smoked salmon or various vegetables.	אִלְתִּית אוֹ מִינֵי יְרָקוֹת.
Salad, or marinaded fish,	מְלוּחִית אוֹ כְּבִישִׁים.
Red-beet soup, or sorrel.	סִלְקָנִית אוֹ חֲמִיד.
The sorrel tastes good.	הֶחָמִיד טָעִים.
This is nutritious food.	זֶה מַאֲכָל מֵזִין.
Give me another portion.	תֵּן לִי עוֹד מָנָה אַחַת!

Eat heartily!	יֵעָרֵב לְךָ!
Where is the pepper and the salt?	אֵיפֹה הַפִּלְפְּלִים וְהַמֶּלַח?
The oil and the vinegar?	הַשֶּׁמֶן וְהַחֹמֶץ.
Take some white bread and butter.	קַח לְךָ חַלָּה וְחֶמְאָה!
I like rye bread.	אֲנִי אוֹהֵב לֶחֶם שְׁפוֹן.
I find fresh, soft bread tasteless.	אֵינֶנִי מַרְגִּישׁ טַעַם בְּלֶחֶם חָדָשׁ וְרַךְ.
I will give you some stale bread.	אֶתֵּן לְךָ לֶחֶם יָשָׁן.
What kind of soup have you?	אֵיזֶה מָרָק יֵשׁ לְךָ?
Noodles, or potatoes.	אִטְרִיוֹת אוֹ תַּפּוּחֵי־אֲדָמָה.
Porridge, millet, or rice.	דִּיסָה, דֹּחַן אוֹ אֹרֶז.
Egg barley (dough-crumbs), or peas.	פְּתִיתִים אוֹ אֲפוּנִים.
Mushrooms or tomatoes.	פִּטְרִיוֹת אוֹ עַגְבָנִיוֹת.

Egg-drops, croutons, or beans.	נְטִיפִים, שְׁקֻדֵי־בָצֵק אוֹ שְׁעוּעִיוֹת.
Pumpkins, parsnips, carrots, or grits.	דְלַעַת, לֶפֶת, גֶזֶר אוֹ גְרִיסִים.
Lentils or cabbage.	עֲדָשִׁים אוֹ כְרוּב.
Give me some marrow-balls.	תֵן לִי כְּפְתוֹת!
The soup is too salty.	הַמָרָק מָלוּחַ יוֹתֵר מִדַי.
This dish is tasteless.	זֶה תַבְשִׁיל תָפֵל.
The plate is not clean enough.	הַפִּנְכָּה אֵינֶנָה נְקִיָה לְמִדַי.
Have you fresh meat?	הֲיֵשׁ לְךָ בָשָׂר טָרִי?
Do you like roast, or cooked meat?	הַאוֹהֵב אַתָה בָשָׂר צָלוּי אוֹ מְבֻשָׁל?
Fat or lean?	שָׁמֵן אוֹ רָזֶה.
Beef, veal, or lamb?	בְשַׂר בָקָר, בְשַׂר עֵגֶל אוֹ בְשַׂר כֶּבֶשׂ.

Shall I give you a portion of chicken?	הַאֶתֵּן לְךָ נֵתַח תַּרְנְגֹלֶת?
Goose, or turkey?	אַוָּז אוֹ תַּרְנְגֹל־הוֹדּוּ.
Breast, tongue, or cutlet?	בְּשַׂר חָזֶה, לָשׁוֹן אוֹ קְצִיצָה.
I don't want any cutlet.	אֵינֶנִּי רוֹצֶה בִּקְצִיצָה.
It smells of garlic.	רֵיחַ שׁוּם נוֹדֵף מִמֶּנָּה.
I don't like roast either.	גַּם צָלִי אֵינֶנִּי אוֹהֵב.
Can I order a steak?	הַאֶפְשָׁר לְהַזְמִין אֶמְצָה?
Let me have a side-dish with the meat.	הַגֵּשׁ לִי לְפִתָּן לַבָּשָׂר!
There is some mustard and horse-radish.	יֵשׁ חַרְדָּל וַחֲזֶרֶת.
Pickles, olives, spinach, and radishes	קִשּׁוּאִים חֲמוּצִים, זֵיתִים, תֶּרֶד וְצָנוֹן.
Celery, green onions (scallions), cauliflower.	כַּרְפַּס, בְּצָלִים יְרוֹקִים, כְּרוּבִית.
I want some lettuce.	אֲנִי רוֹצֶה בְּחַסָּה.

Lettuce is wholesome.	הַחַסָּה יָפָה לַבְּרִיאוּת.
Give me another slice of bread.	תֵּן לִי עוֹד פַּת לֶחֶם!
What have you for dessert?	מַה יֵּשׁ לְךָ לְקִנּוּחַ־סְעוּדָה?
I am going to serve (you) some stewed fruit.	הִנְנִי לְהַגִּישׁ לְךָ לֶפֶד.
The coffee is not sweet.	הַקָּפֶה אֵינֶנּוּ מָתוֹק.
Put some sugar into the glass and stir.	תֵּן סֻכָּר לְתוֹךְ הַכּוֹס וּבְחַשׁ!
Have you some tart, pie, or pudding?	הֲיֵשׁ לָכֶם לַחְמָנִית, כִּיסָן אוֹ חֲבִיצָה?
We have "strudel" to-day.	יֵשׁ לָנוּ הַיּוֹם בְּרוֹבִית.
Are you sated?	הֲשָׂבַעַ אַתָּה?
Yes, but I'm thirsty.	כֵּן, אבל צָמֵא אָנֹכִי.

Shall I serve some brandy?	הַאַגִּישׁ לְךָ יַיִן־שָׂרוּף?
Wine, beer, or water.	יַיִן, שֵׁכָר אוֹ מַיִם.
I don't like strong or bitter beverages.	אֵינֶנִּי אוֹהֵב מַשְׁקֶה חָרִיף אוֹ מַר.
I want some mead.	אֲנִי חָפֵץ תֶּמֶד.
The bottle is corked.	הַבַּקְבּוּק פָּקוּק.
Have you a corkscrew?	הֲיֵשׁ לְךָ מַחְלֵץ?
I have drawn the cork (uncorked the bottle).	חִלַּצְתִּי אֶת הַפָּקָק.
What is there to eat along with it?	מַה יֵּשׁ לְקַנַּח אֶת הַשְּׁתִיָּה?
Cakes or cookies.	דְּבְשָׁנִים אוֹ רְקִיקִים.
We do our own baking.	אֲנַחְנוּ בְּעַצְמֵנוּ אוֹפִים אֶת הַמַּאֲפֶה שֶׁלָּנוּ.
I have eaten and drunk my fill.	אָכַלְתִּי לְשָׂבַע וְשָׁתִיתִי לִרְוָיָה.

We have to say grace after the meal.	צָרִיךְ לְבָרֵךְ בִּרְכַּת הַמָּזוֹן.
Don't forget to give the waiter a tip.	אַל תִּשְׁכַּח לָתֵת הַעֲנָקָה לַמֶּלְצַר!
Let me have a tooth-pick.	הַגֵּשׁ מַחְצָצָה!
Don't pick your teeth in public.	אַל תְּחַצֵּץ אֶת הַשִּׁנַּיִם בְּפָנֵי הַבְּרִיוֹת!
Can we have breakfast?	הַאֶפְשָׁר לֶאֱכֹל אֲרוּחַת־הַבֹּקֶר?
I haven't tasted a thing today.	עוֹד לֹא טָעַמְתִּי אֶת לִבִּי הַיּוֹם.
Do you want bread with cheese, or sardines?	הֲרוֹצֶה אַתָּה בְּלֶחֶם וּגְבִינָה אוֹ סַלְתָּנִית?
I prefer cakes, cookies, or *Haman-tascheⁿ*.	אֲנִי מְעֻדָּר עֻגוֹת, כְּעָבִים אוֹ אָזְנֵי־הָמָן.
Shall I get you a hard or soft-boiled egg?	הַאֲבַשֵּׁל לְךָ בֵּיצָה שְׁלוּקָה אוֹ בֵּיצָה מְגֻלְגֶּלֶת?

Make an omelet for me.	עֲשֵׂה לִי, חֲבִיתָה!
All right, I'm going into the kitchen.	טוֹב, אֲנִי הוֹלֶכֶת אֶל הַמִּטְבָּח.
Try some of the sour cream and the sweet cream.	טְעַם מְעַט מִן הַזֶּבֶדָה וְהַשַּׁמֶנֶת!
Perhaps you will eat some biscuits with milk.	אוּלַי תֹּאכַל תּוּפִינִים בְּחָלָב?
Give me raw milk.	תֵּן לִי חָלָב חַי!
Here is a slice of watermelon.	הֵא לְךָ פֶּלַח אֲבַטִּיחַ!
A slice of pineapple.	פֶּלַח קִשֵּׁט.
Will you eat *creplach* or cheese fritters (pancakes)?	הַתֹּאכַל לְבִיבוֹת אוֹ חֲמִיטוֹת?
I like pancakes (*latkes*) with sour milk.	אֲנִי אוֹהֵב סְפָּגָנִיוֹת בְּקוֹם.

Buttermilk is good for the digestion (Lit. "stomach").	הַמַּסְיוֹב יָפֶה לַקִּבָּה.
When will you have lunch and supper?	מָתַי תֹּאכַל אֲרוּחַת־הַצָּהֳרַיִם וַאֲרוּחַת־הָעֶרֶב?
I have no appetite today.	אֵין לִי תֵּאָבוֹן הַיּוֹם.
In honor of the guests, I'll prepare the samovar.	לְכָבוֹד הָאוֹרְחִים אֶשְׂפֹּת אֶת הַמֶּחָם.
I must prepare some refreshments for them.	עָלַי לְהָכִין לָהֶם תִּקְרֹבֶת.
Where's the tray?	אַיֵּה הַטַּס?
The samovar is boiling.	הַמֶּחָם רוֹתֵחַ.
Pour a glass of tea for yourself.	מְזֹג לְךָ כּוֹס תֵּה!
Here is the strainer.	הִנֵּה הַמְסַנֶּנֶת.

Strain the tea that is in the tea-pot.	סַנֵּן אֶת הַתֵּה אֲשֶׁר בַּקְּמְקוּם!
Take some preserves.	קַח מְעַט מִרְקַחַת!
Put some lemon in your glass.	שִׂים לִמּוֹן בַּכּוֹס!
The tea will get cold.	הַתֵּה יִצְטַנֵּן.
Shall I send some one out to buy wurst or smoked meat (corned-beef)?	הַאֶשְׁלַח לִקְנוֹת נַקְנִיקִים אוֹ בָּשָׂר מְעֻשָּׁן?
No, I'm a vegetarian.	לֹא, אֲנִי צִמְחוֹנִי.
Fetch some ice cream.	הָבֵא הֵנָּה גְּלִידָה!
Eat the fruit.	אֱכֹל אֶת הַפֵּרוֹת!
The nuts, the walnuts, the pistachio nuts, and the almonds.	הָאֱגוֹזִים, הַלּוּזִים, הַבָּטְנִים, הַפּוֹלִים וְהַשְּׁקֵדִים.
I have no nut-cracker to crack the nuts with.	אֵין לִי מַפְצֵחַ לְפַצֵּחַ אֶת הָאֱגוֹזִים.

We have to give the little-ones food and drink.	צָרִיךְ לְהַאֲכִיל וּלְהַשְׁקוֹת אֶת הַקְּטַנִּים.
Children, eat some white bread with honey.	אִכְלוּ, יְלָדִים, חַלָּה בִּדְבַשׁ!
Stir the tea in the cup.	בַּחֲשׁוּ אֶת הַתֵּה בַּסַּפָּל!
Don't drink from the saucer.	אַל תִּשְׁתּוּ מִן הַקַּעֲרִית!
Look! They are licking the candy.	רְאֵה, הֵם מְלַקְּקִים אֶת הַסֻּכָּרִיוֹת!
I shall serve you with Sabbath dishes.	אֲכַבֵּד אוֹתְךָ בְּמַטְעַמִּים שֶׁל שַׁבָּת.
Have you ever tasted such a *tzimmes*?	הָטָעַמְתָּ מִימֶיךָ לְפִיתָה כָּזוֹ?
The *cholent* (meatstew) turned out fine.	הַחַמִּין עָלוּ יָפֶה הַיּוֹם.

The pudding is dripping with fat.	הַפַּשְׁטִידָה מְטַפְטֶפֶת שֶׁמֶן.
You've cut off too large a slice for me. (You've given me too large a slice).	חָתַכְתְּ לִי חֲתִיכָה גְּדוֹלָה יוֹתֵר מִדַּי.
It's hard for me to digest heavy food.	קָשֶׁה לִי לְעַכֵּל מַאֲכָלִים קָשִׁים.
You must chew it well	עָלַיִךְ לִלְעֹס יָפֶה.
You have to eat wholesome food.	עָלַיִךְ לֶאֱכֹל מָזוֹן מַבְרִיא.
For example, apples and apricots.	לְמָשָׁל, תַּפּוּחִים וַאֲפַרְסְקִים.
Oranges, bananas, and carob fruit.	תַּפּוּזִים, מְוִוים וַחֲרוּבִים.
Pears, plums, and cherries	אֲגָסִים, שְׁוִיפִים וְדֻבְדְּבָנִים.

Figs, dates, and pomegranates.	תְּאֵנִים, תְּמָרִים וְרִמּוֹנִים.
The berries are also good to eat.	גַּם הַגַּרְגְּרִים טוֹבִים לְמַאֲכָל.
Huckleberries, grapes, and raisins.	אָבְמְנִיוֹת, עֲנָבִים וְצִמּוּקִים.
Goosberries and currants.	עֲנְבֵי־סְנֶה וְעִנְבֵי־שׁוּעָל.
Cranberries, strawberries, and raspberries.	דֻּמְדְּמָנִיוֹת, תּוּת כְּנַעֲנִי וְסְנֶה מַעֲרָבִי.
Remember your table manners.	אֱכֹל בְּנִמּוּס!
Don't soil yourself.	אַל תִּתְלַכְלֵךְ!
Don't swallow any fish bones.	אַל תִּבְלַע עֲצָמוֹת שֶׁל דָּגִים!
Don't be a glutton.	אַל תִּהְיֶה זוֹלֵל!

A. ORTHOGRAPHY.

LESSON I.

THE ALPHABET. FIRST: THE TABLE.

Name of Sign.	Sign.	English Equivalent.	Numerical value.
ʾÁleph	א	ʾ, h in hour	1
Bêth	ב, בּ	v, b	2
Gîmel	ג, גּ	gh, g	3
Dăleth	ד, דּ	th in that, d	4
Hê	ה	h	5
Wau	ו	w	6
Záyin	ז	z	7
Ḥêth	ח	ch in loch	8
Ṭêth	ט	ṭ	9
Yōdh	י	y	10
Kāph	כ, כּ, ךּ, ך	kh, k	20
Lămĕdh	ל	l	30
Mêm	מ, ם מ מּ ם	m	40
Nûn	נ. ן נ נּ ן	n	50
Samĕkh	ס	s	60
ʿÁyĭn	ע	ʿ	70
Pê	פ, פּ, ף פ	p, f, ph	80
Ṣādhē	צ, ץ צ	ss in hiss	90
Qōph	ק	q or ḳ	100
Rêsh	ר	r	200
Sîn	שׂ	ś	300
Shîn	שׁ	sh, or š	
Tau	ת, תּ ת	th in thin, t.	400.

SECONDLY: REMARKS.

1. In general, the letters are sounded as in English. But notice:

(1) That Aleph has no sound. At the beginning of a syllable, it may be compared to h in hour, e. g. אָב = *āv*; בָּא = *bā*.

(2) That Hê has the sound of the rough breathing at the beginning of a syllable, but cannot be heard at the end of a syllable, e. g. הֹ = *hô*; but, בָּה = *bā*.

(3) That most authorities treat Ayin, as if it had always lost its sound, though in transliteration it is denoted by the sign ʿ, e. g., עַיִן *ʿăyĭn*.

(4) That Hêth has a sound something like ch in loch, or in Rache.

(5) That Ṭêth has a hard t sound which it is impossible for us to give in distinction from Tau. It is commonly marked in transliteration by a dot placed under it, e. g., טִיט = *ṭîṭ*.

(6) It is impossible for us to always distinguish Ṣādhe, Samekh and Śin. In transliteration, we arbitrarily print Sadhe as ṣ, Samekh as s, and Sin as ś.

(7) The student will pronounce Qôph like Kăph. It may be denoted by q, or by a k with a dot under it.

2. A dot placed in anyone of the six letters Beth, Gimel, Daleth, Pe, Kaph, and Tau, takes away its aspiration, i. e., changes it from v to b, f to p, gh to g, kh to k, dh to d, and th to t. These letters are called the Begadh-kephath letters.

3. Five letters have special forms, when final. Hence, they are called final letters. To distinguish it from final Nun, a final Kaph has two dots in it, perpendicular to each other; or, it may have three dots, one to show that it is Kaph and not Nun, and the other to show that it is k and not kh. E. g., Gen. xxvii: 38.

4. Since in Hebrew Manuscripts and printed works,

words cannot be separated, certain letters may be extended to fill out the line. These are called *litterae dilatabiles*.

5. In accordance with the organs of speech with which the consonants are pronounced, they are divided into

(1) Gutturals א, ה, ח, ע.
(2) Palatals ג, כ, ק.
(3) Labials ב, ו, מ, פ.
(4) Sibilants ס, ז, צ, ש, שׂ.
(5) Dentals ד, ט, ת.
(6) Linguals ל, נ, ר.

LESSON II.

THE VOWELS.

The vowels have the following signs, names, and sounds.

ַ Păthăḥ, ă as in fat.
ָ Qāmeṣ, a as in father.
ֶ Seghôl, e as in met.
ֵ Ṣere, e as in they.
ִ Ḥiriq, i as in pit, or as in machine.
וּ Šureq, u, usually like oo in toot.
ֻ Kibbuṣ, u, as oo in toot, or in foot.
וֹ Ḥolem, o as o in note.
ָ Qameṣ-Ḥatuph, o as in not.

Rem. 1. the letters Aleph, Hê, Wau, and Yodh, when used in helping to write the vowels, are called vowel letters. In such cases, the vowels are always long, and are said to be written fully. Vowels written without the vowel letters are said to be written defectively.

Rem. 2. Aleph is only occasionally used as a vowel letter, especially to represent long *ā*.

Rem. 3. Hê is never used as a vowel letter, except at the end of a word, where it is used exclusively, (except an occasional Aleph) for final Qameṣ and Seghol; and in certain cases, for Ṣere and Ḥolem.

Rem. 4. Wau is used exclusively for final u, and generally for final o.

Rem. 5. Yodh only is used for final i. Final e has commonly the vowel letter Yodh, but sometimes Hê.

LESSON III.

CERTAIN COMMON SIGNS.

1. The sign ְ, called Shewa, is written under a consonant:

(1) To denote the absence of a vowel sound. This is called Shewa quiescens, or silent, e. g., מַלְכּוֹ.

(2) To denote the presence of a half, or obscure vowel sound after a letter. This is called Shewa mobile, or vocal, e. g., שְׁנֵי.

Rem. When the vowel preceding the letter followed by a vocal Shewa is short, the Shewa is called medium, e. g. מַלְכֵי.

2. A sign inserted after a vowel, which is followed by a letter with vocal Shewa, is called Methegh, e. g. קָטְלוּ.

3. A dot placed in a letter to show that it is to be doubled, is called Daghesh-Forte. The letter to be doubled, must be preceded by a full vowel, and must be followed by a full or half vowel, כֻּלּוֹ, קָטְלוּ.

4. When a final guttural is preceded by a heterogeneous vowel (i. e., any other vowel than ă, ā, or â), a Pathaḥ is placed under the final guttural, but pronounced before it. This Pathaḥ is called Pathaḥ furtive, It originated from the difficulty of pronouncing after the vowels e, i, o, u.

5. The sign of a short vowel is often added to the Shewa sign, the two together constituting what is called a compound Shewa. Because of the hurried manner in which the vowel is pronounced, the sign is called Ḥaṭeph (i. e., hurried). There are three such signs, to wit:

Ḥaṭeph-Pathaḥ, ֲ.

Ḥaṭeph-Seghol, ֱ.

Ḥaṭeph-Qameṣ, ֳ.

Rem. 1. The compound Shewa is commonly used with gutturals, the simple Shewa occasionally. The simple Shewa, on the other hand, is commonly used with letters

3. You cannot double a consonant unless it is immediately preceded by a full vowel.

almost always vocal.

other than gutturals, the compound Shewa but rarely, e. g., בְּנִי, וְזָהָב; נֶחְמָד, נֶאְדָּר; עֲנִי, אֶכֹל, אֲנִי.

Rem. 2. There are a few words, each of whose last two letters has a simple Shewa. It is probable, that the first of these was silent and the second vocal, e. g., יִבְךְ, נִשְׁקְ.

Rem. 3. Extraordinary is the occurrence of a silent Shewa with the first letter of שְׁתַּיִם.

LESSON IV.

1. The naturally long, and hence unchangeable vowels, ê, î, ô, û, are ordinarily written fully, i. e., along with the vowel letters. Sometimes, however, they are written defectively, i. e., without the vowel letters.

On the other hand, the tone long, or compensating, vowels, ā, ē, and ō, are almost invariably written defectively, except at the end of a word.

At the end of a word, no short vowel can occur, and the long vowels are almost always written fully.

2. All syllables begin with a consonant, the only exception being the conjunction û *and*.

Rem. A syllable may begin with two consonants; but in pronouncing them, we must always insert a half vowel between them. Notice that in Hebrew a consonant followed by a half vowel does not constitute a syllable.

3. When a syllable ends with a vowel, it is called open; when it ends with a consonant, it is called closed.

Rem. 1. A syllable with a short vowel, followed by a consonant with a vocal Shewa, is said to be half open. By some, such a syllable is said to be loosely closed, or wavering.

Rem. 2. A syllable ending with two consonants is said to be doubly closed.

Rem. 3. A syllable ending with a quiescent Aleph is commonly open. All final Alephs are quiescent, and also all medial Alephs, which do not have the sign of a Shewa or of a vowel under them.

4. An open syllable with the tone has commonly a

An open syllable takes a long vowel;
A closed " " " short vowel.
The presence of the tone of a word may reverse this rule.
The tone or main accent is on the

long vowel. This is always the case, when the open syllable is the ultimate. But, when the open accented syllable is the penult, the vowel of it is frequently short.

Rem. 1. In the syllable before the tone, the vowel ă is commonly heightened to ā. In like cases, an ĭ is sometimes heightened to ē. These heightened vowels are called pretonic ā or ē. Pretonic ō, heightened from ŭ occurs but seldom. When these heightened vowels have arisen by way of compensation, on account of the impossibility of doubling a succeeding guttural, or Resh, they become necessary to preserve the form denoted by the doubled letter, and are hence unchangeable. Such heightening occurs especially in the intensive stems, in Niphal forms where the Nun should be assimilated, and in certain contracted forms of roots whose second and third radicals are the same.

Rem. 2. In an open syllable, which has the secondary tone, a short vowel frequently occurs. The secondary tone is ordinarily marked by a perpendicular sign called Methegh.

Rem. 3. When used before an unvoweled consonant, the inseparable prepositions take a short unaccented vowel to aid in their pronunciation. This is called a helping vowel.

Rem. 4. A vowel in an open syllable, arising from a compound Shewa coming before another Shewa, is also short. A compound Shewa cannot be pronounced before another Shewa, but must be turned into the corresponding short vowel, to which the vowel preceding is then assimilated.

Rem. 5. A short vowel, which was originally in a closed syllable, is retained, when the syllable becomes open in consequence of a guttural's ending the syllable and taking a compound Shewa.

5. Closed syllables, when without the tone, have a short vowel. Closed syllables, with the tone, may have either a long or a short vowel.

6. Syllables are said to be *Sharpened*, when they end in a consonant which is doubled. The first of these consonants ends one syllable, and the second begins the next.

7. Syllables ending with two consonants are found only at the end of words; and then, but seldom.

LESSON V.

A.

(1) Dagesh *lene* is the name given to the point occurring in בּ, גּ, דּ, כּ, פּ, and תּ, when they are not immediately preceded by a vowel sound, i. e. either a full vowel, or a half-vowel (denoted by Shewa). These six letters are called the *Begadh-kefath* letters. This point indicates that the aspiration has been taken away from these letters i. e. that v has become b; gh, g; dh, d; kh, k; f. p, and th, t. This loss of aspiration is called *asperation*, or hardening. When doubled, the Begadh-kefath letters always are hardened and hence receive a dagesh, which is then, however, called dagesh *forte*.

Rem. 1. A vowel sound may pass over from a word ending in a vowel to a Begadh-kefath letter at the beginning of the following word.

Rem. 2. After a diphthong, the Begadh-kefath letters are hardened and receive Dagesh *lene*. This is because the Wau or Yodh at the end of the diphthong forms the ending of what is really a closed syllable.

Rem. 3. The Begadh-kefath letters in the middle of a word, when preceded by a closed syllable, take Dagesh *lene*. The last letter of the closed syllable takes under it a *silent* Shewa. When the Begadh-kefath letters in the middle of a word are preceded by *vocal* Shewa, they are aspirated.

Notice, that the presence, or absence, of a Dagesh *lene* shows whether the preceding Shewa is vocal, or silent. It also shows whether the preceding syllable is closed, or half-open.

Rem. 4. Exceptional uses of Dagesh *lene* are found in שְׁתַּיִם *two* and in forms like שָׁלַחְתְּ the 2nd. fem. sing. of the perfect of the Lamedh Guttural verb. Perhaps, in the latter case, the Dagesh is *forte*.

B.

1. Makkeph is a sign, resembling a hyphen, put between two, or more, words to show that they are all accented, as if one word.

2. Methegh is ordinarily the sign of the secondary accent, which is found on the accent or third syllable before that which receives the principal tone. Sometimes a second Methegh is found upon the fourth syllable before the principal tone.

Rem. 1. Methegh is not employed with וּ, resulting from the copula וְ being turned into a vowel.

Rem. 2. Before Makkeph, Methegh is always given to a word ending in a vowel, when this vowel precedes a toneless syllable, or one bearing the tone, but beginning with a half-vowel.

Rem. 3. Methegh occurs further:

(1) With a long vowel in an open syllable, before a consonant with vocal Shewa.

(2) To distinguish a long vowel from a short before a letter with Shewa.

(3) With a toneless Ṣere.

(4) With all vowels before a consonant with compound Shewa. (Except, of course, when the consonant under which the compound Shewa occurs is doubled).

(5) With the initial syllables of הָיָה *to be* and חָיָה *to live*, to show that they are closed.

(6) With Qames in the penult of the sharpened syllables of בָּתִּים *houses* and אָנָּה *pray!*.

(7) With the Pathaḥ of the article, or of the inseparable preposition with the article, in a half-open syllable.

Note. This use of Methegh is not employed before a Yodh with a half vowel, nor before the syllable with

the tone. The Pathaḥ of Wau conversive in a half-open syllable does not take Methegh, except in the case of וַיְהִי and וַיְחִי when accented with pashta and followed by Makkeph.

(8) With the interrogative particle Hê when pointed with pathah, except before an unvowelled Yodh, Dagesh *forte*, or the tone syllable.

(9) In a few other cases, apparently for the sake of clearness in pronunciation, or to distinguish forms which without it might be confused.

LESSON VI.

1. Raphê is a line placed over a letter to show that the point, which we might have expected to find in the letter, has been omitted, not by mistake, but intentionally.

2. A point put in a letter to show that the letter is to be doubled, is called Dagesh *forte*. No letter can be doubled, except when preceded by a full vowel and followed by a full or half vowel.

Rem. 1. When the same letter is to be read twice in the same word without any sound coming between, the letter is written once and the doubled letter denoted by means of Dagesh *forte*, e. g. kăllā = קַלָּה. But, if *any* sound, such as a half-vowel, comes between, the letter must be written twice, e. g. הַלַּלוּ. This rule applies, also, to the suffix ךָ: following another k.

Rem. 2. A Dagesh *forte*, called *conjunctive*, is sometimes found in the initial consonant of a monosyllable, or of a dissyllable accented on the penult, following a word ending in a vowel. These two words are usually connected by means of Makkeph. מִשֶּׁה לֵאמֹר is an exception to the rule, that the second word should be accented on the penult.

Rem. 3. After זֶה *this* and מַה *what?*, when followed by Makkeph, a Dagesh *forte* conjunctive is always found.

Rem. 4. After a word accented on the penult and ending in a vowel, a Dagesh *forte* conjunctive is found in

the first letter of a monosyllable, or of a word accented on the penult.

Rem. 5. Except in the case of לְךָ, monosyllables containing the inseparable prepositions, do not take a Dagesh forte conjunctive. The conjunction Wau never takes a Dagesh *forte*.

Rem. 6. a. When a liquid, or Ḳof, is preceded by a vowel and followed by a half-vowel, it sometimes sounds to the ear as if doubled. This apparent doubling is denoted by a point called Dagesh *forte dirimens*, or separative, e. g., עַנְבִי for *ʿinᵉvê*.

b. Similar to this doubling is the doubling of a liquid in certain pronouns and at the end of a sentence to bring out with distinctness the sound of the vowel preceding them, e. g., הֵמָּה, הֵנָּה.

Rem. 7. Since a final letter cannot be doubled, Dagesh *forte*, the sign of doubling, is never found in final letters. In cases like אַתְּ and נָתַתְּ (the only apparent exceptions), it is probable, that a half-vowel, like the French final *e muet*, was pronounced after the Tau.

Rem. 8. When a letter, which according to the form or general usage should be doubled, ceases to be thus doubled, when read, it ceases to take a Dagesh forte, when written. The student must keep in mind, that the Hebrew system of signs was an attempt to reproduce to the eye the sounds which were patent to the ear. A letter, like a guttural, which either had no apparent sound, or was very difficult to pronounce, could not be doubled. The liquids, palatals, sibilants and *w* and *y*, cannot, readily be doubled under any circumstances; and in Hebrew they were commonly not doubled when they were followed by a half-vowel merely. Resh is practically never doubled, e. g., וַיְהִי for וַיְהִי; מְלֹאוּ for מְלֹאוּ; יְשֹׁאוּ for יְשֹׁאוּ; הָרִים for הָרְרִים.

LESSON VII.

PECULIARITIES OF THE GUTTURALS.

The peculiarities of the gutturals arise from the physical difficulty, or impossibility, of pronouncing them. It is perfectly obvious, that if a sound cannot be uttered, it cannot be doubled. When the Hebrew Massoretes invented the system of signs which was meant to represent the language as it sounded to them, the gutturals א and ע had lost their sound entirely; ה could not be pronounced at the end of a syllable; and ח could not be doubled. To preserve the roots and forms, and hence the meanings, the Hebrews have resorted to several devices, which are called by grammarians the peculiarities of gutturals.

1. When according to the general usage, the guttural should have been doubled, the vowel preceding it may be heightened, that is, changed from ĭ to ē, from ă to ā or é, from ŭ to ō. This change is said to be by way of *compensation*. Its purpose and effect is to preserve the form. Hence, the compensative vowels are unchangeable. i. e., exist, whereever the forms require them, e. g., the first vowel in מֵאָז remains in מֵאָנָה, מֵאַנְתֶּם; so the Ṣere of the preformative in יֶחְבָּאוּ, the ā in מָאֲנוּ; the é in הֶעָנִי and הֶחֱרוּ; and the ō in גָּבֹהַּ and יָגֹאֲלוּ.

Rem. In many cases, especially with Ḥeth, the vowel is not heightened. Since, in such cases, the preceding vowel remains short in an unaccented open syllable, the consonant is said to be "implicitly doubled", e. g., נַחַם, כִּהַן, בִּעֵר. ∴ *Syllable is" " sharpened":*

2. The easiest vowels to pronounce along with guttural sounds are ă and ā, which are consequently called the guttural vowels. This physiological fact accounts for the so-called preference of the gutturals for the vowel Pathaḥ. This preference is obvious

(1) In the retention of original Pathaḥs, where in the absence of a guttural, the ă has been changed to ĭ or é, or ē, e. g., יַחְמֹד but יִקְטֹל, נַעַר but מֶלֶךְ, שִׁלַּח but קִטֵּל.

(2) In the adoption of ă as the helping vowel instead of the more usual ĕ, e. g. בָּחַ֫ר.

Rem. 1. Because of the difficulty of pronouncing a final guttural after a heterogeneous vowel (i. e. after ē, î, ō, ô, or û) a helping vowel Pathaḥ in inserted before the Guttural. This Pathaḥ is called Pathaḥ *furtive*. It does not constitute a syllable, is purely euphonic, and *must* be pronounced between the long vowel and the guttural. It is employed with all the gutturals except Aleph, whose sound has become entirely quiescent, e. g., גּוֹחַ, גְּבוֹהַ, רֵעַ, הַזְרִיעַ, נִשְׁלַחַ; but רְפָא, קְרָא.

Rem. 2. Before a final guttural (except Aleph), the helping vowel is uniformly Pathaḥ; after a medium guttural, it is always Pathaḥ except in the case of the four words: רֵחַם, לֶחֶם, and בֹּהַן. With final Aleph, we find דֶּשֶׁא and פֶּלֶא.

Rem. 3. In the first syllable of a word, a Seghol is frequently employed, before or after a guttural, instead of a Ḥirik whether original, or attenuated from an original Pathaḥ. In a sharpened syllable, however, the Ḥirik is found and, also, occasionally elsewhere, e. g., חֲרָפָה, חֲמָדָה, חֶלְקָה, אֲצַבַּע, עֲבָרָה, עֲזָרָה, עֲלִיוֹן, עֲגָלוֹ, נֶהְפַּךְ, נֶחְסַר. But אִמְרָה, עִתּוֹ, חִנָּם.

3. Instead of a half, or obscure, vowel denoted by Shewa, the gutturals are pronounced with a short vowel, either ă, ĭ, or ŏ, denoted by the compound Shewas, e. g., חֲנִיכִי, אֲכַל, חֲדָשִׁים. See Lesson III 5.

In many cases, also, a guttural takes a compound Shewa instead of a simple silent Shewa. חֲעֲמַד, יֶחֱזַק, הֶעֱמַד.

Rem. 1. A compound Shewa coming before a vocal Shewa is changed into the corresponding short vowel, that is, ֲ to ַ, ֱ to ֶ, and ֳ to ָ. The vowel preceding this new vowel takes Methegh, e. g., יַעֲמְדוּ, יֶחֱזְקוּ, יֶעֱמְדוּ. This change into a short vowel is necessary, because you cannot have a vocal Shewa at the end of a syllable, nor two of them at the beginning of one. E. g., יַעֲמְדוּ, יֶחֱזְקוּ, and הֶעֱמְדוּ are impossible, according to the rules for syllables.

Rem. 2. All the gutturals prefer Ḥaṭeph-Pathaḥ. But an Aleph when in the syllable with the tone, prefers Ḥaṭeph-Seghol. In the case of אֲרִי, אֲנִי and אֱנִי, the choice of the Ḥaṭeph is determined by the original vowels ă and ŭ. When not in the tone syllable, Aleph also prefers Ḥaṭeph-Pathaḥ.

4. The Hebrews being unable to double *r*, have heightened the vowel preceding it, whenever the form required its doubling, e. g., עָרָה, בָּרָא, בִּרְכָה.

Rem. On account of the difficulty of pronouncing *r*, the Hebrews frequently use ă before it, where the other letters except gutturals would have ĕ, or ĭ. Before a final r in an accented syllable, the original ă is heightened to é instead of ē in the case of דְּבֶר.

LESSON VIII.

A. FEEBLENESS OF ALEPH AND HÊ.

1. At the end of a syllable, Aleph is commonly written to show the root, but is otherwise ordinarily treated as if non existent, i. e., it does not take a Shewa, nor a Pathaḥ furtive, nor a Pathaḥ before it; and the Begadhkefath letter after it are aspirated, e. g., מָלַאתְ, דָּשָׁא, בָּרָא.

Rem. 1. Final Aleph preceded by a Shewa is said to be *otiant*, e. g., חֵטְא, יָרְא, גָּיְא.

Rem. 2. At the beginning of a syllable, Aleph retains its true consonantal force and is treated like any other guttural, e. g., אָמַר, גֹּאֵל, גְּאֻלִּי.

Rem. 3. In exceptional cases, Aleph at the end of syllables is treated like firm consonants and receives silent Shewa, e. g., נָאְדַר.

Rem. 4. In many cases, Aleph throws back its vowel to the preceding consonant, the Aleph then quiescing in its own vowel. Or, speaking perhaps more correctly, it is still written to show the root, but is ignored utterly as to sound, e. g., רָאשִׁים for רָאְשִׁים, מְלָאכָה for מַלְאָכָה.

Rem. 5. In like manner, also, Aleph sometimes throws back the half-vowel following it, so that it combines with a preceding short vowel to form â, ô, or ê. In the case of וַאדֹנָי (and וַיהוָה which is pronounced *Wa'dhōnāy*) the half-vowel is dropped and the Aleph quiesces in the preceding vowel, e. g., יֹאכַל for יְאָכַל; יָאצָל for יְאָצַל; לֵאמֹר for לְאָמֹר.

Rem. 6. In a few cases, Aleph is dropped, or its place even taken by another vowel letter, e. g, אֹמַר for אֹאמַר; רַיִם for רַאֲם; מוֹסָר for מֹאסָר.

Rem. 7. In a few cases, Aleph has been employed apparently as a vowel letter; or superfluously, at the end of a word, perhaps in imitation of the Arabic usage, e. g., קָאם (ordinarily קָם); הָלְכוּא ordinarily without Aleph.

2. Hê is always treated as a consonant, except at the end of a word. At the end of a word, it is usually nothing but a vowel letter; but, when it is used as a consonant, it takes a point in it called Mappik. Final Hê is a consonant only when a radical, or when it represents the suffix "her", e. g., מַלְכָּהּ, גֹּלָהּ, גֹּלַהּ, גָּלָהּ. But גְּבַהּ, מַלְכָּהּ.

Rem. 1. The Hê of the article after the inseparable prepositions, and the Hê of the Hiphil, Hophal, Niphal, and Hithpael, stems of the verb after preformatives, throw back their vowel and are dropped, or absorbed, e. g., בַּגַּן for בְּהַגַּן; יַקְטִיל for יְהַקְטִיל; יִקְטַל for יְהִקְטַל.

Rem. 2. The Hê of the 3rd. masc. sing. pronominal suffix is usually dropped, the preceding ă and the following û being contracted to ô. The Hê of the suffix of the 3rd. plural masc. and fem. is often absorbed, or dropped, e. g., מַלְכּוֹ for mălkăhû; מַלְכָּם for mălkăhem.

Rem. 3. In a few cases, the original Wau or Yodh remains at the end of the word. e. g., גָּלוֹ for the more common גָּלָה; הַבִּי for the more common הַבָּה.

Rem. 4. In a few other cases, apparently through Aramaic influence, the vowel letter Hê is supplanted by Aleph, e. g., שְׁנָא for the ordinary שְׁנָה from יָשַׁנָה.

B. FEEBLENESS OF WAU AND YODH.

1. At the beginning of a word, Wau nearly always is changed into Yodh, e. g., יָלַד, יָרַד.

Rem. This Yodh derived from an original Wau, often remains even when not at the beginning of the word, e. g., יִירַשׁ for יִוְרַשׁ; יֻלַּד for יֻוְּלַד.

2. After an inseparable preposition, or a Wau conjunctive, a vowelless Yodh contracts with a preceding Ḥiriḳ to form î.

3. When occurring as a radical at the end of a word, two cases occur (1), Wau and Yodh are usually rejected, their place being taken by the vowel letter Hê, but (2) occasionally, Wau and Yodh remain being changed into the corresponding vowels וֹ and ִי.

4. At the beginning or end of a syllable in the middle of a word, Wau and Yodh are commonly contracted with the vowel of the syllable to which they belong, so that the contractions of *w* and *y* may be tabulated as follows:

ăw = ô as in יוֹם from yăwm.
âw = ô as in גָּלוֹ from gălâw.
wă = ô as in נָקוֹם from năḳwăm.
ăwâ = ô as in קוֹם from ḳăwâm.
ăwă = ô as in הָקוֹם from hiḳḳăwăm.
ăy = ê as in סוּסֵי from sûsăy.
ăy = é as in תְּגַלְיָנָה from tāglăyna.
ăyâ = ô as in שׁוֹם from săyâm.
âyi = â as in שָׂם from sâyim.
yî = î as in יָשִׂים from yăsyîm.
yĭ = î as in יָשִׂים from yăsyĭm.
ĭy = î as in דִּין from dĭyn.
wî = î as in יָקִים from yăḳwîm.
ĭw = î as in יִירָא from yĭwră.
ŭw = û as in צוּר from ṣŭwr.
wŭ = û as in יָקוּם from yaḳwŭm.
ăwû = û as in גָּלוּ from galăwû.
ŭwû = û as in יִגְלוּ from yaglŭwû (?).

LESSON IX.

THE TONE.

1. Commonly, the tone is upon the ultimate.

Sometimes, however, it is upon the penult; but never upon the antepenult, e. g., קָטַל, דָּבָר, מֶלֶךְ, נַעַר.

Rem. 1. When a closed penult is accented, the ultimate must be open. When a closed ultimate is unaccented the penult must be open, e. g., מֶלֶךְ קָלוּ אַרְצָה יִגַּל.

Rem. 2. Waw conversive, followed by the Imperfect, occasionally draws the accent from the ultimate to the penult, e. g. וַיֹּאמֶר, וְיִלָּחֶם, וְנָקָם, וְנָשָׂם, וַיֵּלֶךְ.

Rem. 3. a. A word usually accented on the ultimate, when it happens to be in close connection with a following word accented on the penult, sometimes throws its own accent back to its penult. In such cases, the vowel of the final closed syllable is commonly shortened; except in case of Ṣere, which should, however, receive a Methegh. Wherever a Makkef is inserted between the two words, the accent is always thrown back. (Compare V. 2 and VI. 2 above). See e, f.

b. Whenever the second word is an accented monosyllable connected with the preceding word by Makkef, the accent of the first word is thrown back to the ultimate. See h.

2. In pause, that is, at the end of a sentence, the vowel of the tone syllable, if short, is heightened. See k.

Rem. 1 a. This heightening is usually based upon the original short vowel, i. e. ă becomes ā or é, ŭ becomes ō, and ĭ becomes ē, e. g., קָטֶל from קַטַל; יִקְטֹלוּ from יִקְטֻלוּ; מָלְאוּ from מַלְאוּ, אֶרֶץ from אֶרֶץ; פְּרִי from פִּרְיִ; יִתְהַלָּךְ from יִתְהַלַּךְ See m, s.

b. But sometimes the ē is heightened, from an ĭ attenuated from an original ă, e. g., דִּבֶּר from דַּבַּר.

c. Exceptionally, as in the case of אַרְבַּע the original short vowel remains unheightened. See l.

Rem. 2. In pause, בְּךָ becomes בָּךְ; לְךָ, לָךְ; and אִתְּךָ אִתָּךְ. See n.

Rem. 3. In pause, the accent is often changed from the ultimate to the penult, e. g., אַתָּה becomes אָתָּה; or conversely, from the penult to the ultimate, e. g., וַיֹּלֶךְ becomes וַיֹּלֶךְ. See o. p.

Rem. 4. Sometimes an original consonant, as well as vowel (the latter heightened), is retained or resumed in pause, e. g., בָּעְיוּ from original בַּעְיוּ for later בָּעוּ. See t.

Rem. 5. Singular is the reading שָׁכַבְתִּי in pause for שָׁכַבְתִּי from original שַׁכַבְתִּי. Perhaps, there was, also, an original form שָׁכֲבְתִּי, which would in pause properly become שָׁכַבְתִּי. See u.

Rem. 6. An ă preceding a Ḥeth with Ḳameṣ is heightened to Seghol. Thus אַחֵי becomes in pause אָחֵי; יִתְנַחֵם becomes יִתְנָחֵם. See v.

LESSON X.

THE CHARACTER OF THE VOWELS.

A. GENERAL REMARKS.

The original vowels in Hebrew seem to have been only six in number and all pure. They were ă, ĭ, ŭ, and â, î, û, pronounced as the vowels of at, it, but and băă, ēēn, and shŏŏ. These original pure vowels were liable to the following changes.

1. Obscuring. This is the term employed to denote the change of the original pure ă or ĭ to e, ŭ to ŏ; and ăă to â or ô.

2. Attenuation, which denote the change of original ă to ĭ, e. g., יִקְטֹל from יַקְטֹל.

3. Heightening which denote the change of original ă to ā or é; of original ŭ to ō; and of original ĭ to ē. e. g. אֶרֶץ, אָרֶץ, אָרֶץ; יִקְטֹל, יַקְטֹל; אֵם, אֵם. This heightening involves obscuring and lengthening.

4 Lowering is the opposite of heightening and involves obscuring and shortening of the original pure short vowels, until they become indistinguishable one from another. This obscure vowel is represented by Shewa. It may be compared to the obscure vowel of Webster's Dictionary, e. g., דְּבַר from דָּבָר, יִקְטְלוּ from יִקְטָלוּ; יִתְּנוּ from יִתְּנוּ.

5. Shortening, which denotes the change from ē to ĕ, and from ō to ŏ, e. g., קִטֶּלְךָ from קִטֵּל; בְּקָרוֹ from בָּקָר.

6. Contraction which denote the change resulting from the union of two vowels with one another, or of a vowel with Wau or Yodh, so as to produce one long pure or impure sound, e. g., יָוֹם becomes יוֹם; עָיִן, עַיִן; יֵאֱמַר, יֶאֱמַר etc.

7. Lengthening would denote the prolongation of a pure sound without the obscuring of it. No examples of this are found in Hebrew, unless we find one in the long î of the Hiphil coming from an ĭ attenuated from an original ă. Thus, הַקְטַל, הִקְטִיל, הִקְטַל.

8. Reversion denotes the return of an obscured, attenuated, heightened, lowered, shortened, or contracted vowel to the original vowel of the form, e. g., in דְּבַר we find the original ă under the second radical instead of the heightened ā of דָּבָר, in בְּלֹם we have the original ŭ instead of the heightened ō of בֹּל, or the obscured ŏ of כָּל.

B. SPECIAL TREATMENT.

1. Original ăă (pronounced like aa in *baa*), sometimes becomes obscured to â (pronounced like a in all) as in כָּתָב; but nearly always, it has been further obscured to ô (pronounced like o in note), e. g., the ô of קָטוֹל קְטֹל, נְקְטוֹל, מְזוֹמוֹר, etc.

2. Original û remains unchangeable, e. g., קְטוּל.

3. Original î remains unchanged, e. g., צְדִיק.

4. Original ă (1) remains, as in the ultimate of קָטַל and בִּרְךָ, and in the penult of נָחַל and צַדִיק; or,

(2) It is heightened to ā, as in the penult of קָטַל, and in the ultimate and penultimate of דָּבָר and קָטָלָם; or to é, as in the penult of מֶלֶךְ and יֶדֶם (?) and פֶּרִי.

(3) It is lowered to the half-vowel as with the first radical of דָּבַר (from דּוּבַר) and of קָטָלָם (from קַטַלָם) and with the second radical of יֵרָאוּ (from יִירַאוּ) and of דִּבְרֵי (from דִּבַרִי).

(4) It is attenuated to Ḥiriq, as in the penultimate of קִטַּל, יִפֶן, דִּבְרֵי and יִקְטֹל. It is attenuated and then heightened as in the ultimate of קִטֵּל.

(5) It is contracted to ô, as in יוֹם from יַוֹם; or to ê, as in עֵינַי from עִינַי. An ô from contraction occasionally is changed further into û as in נְקוּמוּתָ from נָקוֹם.

(6) It is attenuated to ĭ, then heightened to ē, and then shortened to ĕ, as in וַיֵּלֶךְ. This may be called a case of obscuration.

5. Original i (1) remains as in the penult of סִפְרוּ and of אִוְבְּךָ.

(2) Is heightened to ē, as in סֵפֶר and the ultimate of יִתֵּן.

(3) Is lowered to the half-vowel, as under the first radical of סְפָרִים, and under the second radical of יִתְּנוּ.

(4) Is obscured into Seghol in בֶּן־ תֶּן־ and חֶלְקִי. This obscuration of i takes place also, when the i has been attenuated from an original ă, as in the penult of קִטַּלְתֶּם.

(5) Is contracted with y to form î, as in דִּין from *dĭyn*, יָשִׁים from *yăsyĭm*; and with w to form î, as in יָקִים from *yăḳwîm*.

6. Original ŭ (1) remains, as in the penult of שֻׁלְחָן, קִטַּל, and סֻכָּה.

(2) Is heightened to ō, as in יִקְטֹל from יִקְטַל; קֹדֶשׁ from קֹדֶשׁ; בֹּרֶךְ from בְּרֶךְ; פֹּעֲלוֹ from פְּעָלוֹ.

(3) Is lowered to the half-vowel, as in יִקְטְלוּ from yăḳtŭlû.

(4) Is obscured to ŏ, as in יִקְטָלְךָ, יִכָלְתָּם, כָּל־.

(5) Is contracted with w to form û, as in סוּם from סָוּם; יָקוּם from יָקְוֹם etc.

C. GENERAL REMARKS.

1. The originally long vowels are always unchangeable in inflection. The change from ăă to â, or ô, which has always taken place does not affect any of the present inflections as found in the Bible. Nor do ô and â interchange nor vary in inflection.

2. Vowels which arise by contraction are almost always unchangeable. Sometimes, we find both the uncontracted and the contracted combinations in use, e. g., *măwt*, in the absolute state, is מָוֶת in the construct מוֹת; *ʿayn*, in the absolute state is עַיִן in the construct עֵין.

In certain cases, an ô passes over into וּ, e. g., in נְקוּמוֹתָה instead of נְקוֹמוֹתָה.

3. In the closed and sharpened syllables, immediately before the tone, the vowel usually remains unchanged in inflection, e. g., in the penult of יִקְטֹל, מְזִמּוֹר, שִׁלְחָן. But notice that in the Piel form of the verb, the perfect is קִטֵּל and the Infinitive construct and other forms have קַטֵּל.

4. The originally short vowels in all open syllables, are subject to heightening, lowering, obscuring, et cet. according to the presence, absence, or nearness of the tone, or stress of voice. In the originally closed syllables, ă may be attenuated or obscured, and ĭ and ŭ may be obscured.

5. In all cases of heightening, or lowering, there may be a reversion to the original vowel, (or its obscured form) or a change from one to the other. Thus one may have ◌ָ ◌, or ◌ַ ◌, or ◌ָ ◌, or ◌ְ (◌) ◌ : For example: קָטַל, קָטָלוּ, קְטָלָם, יִקְטָלוּ, יִקְטְלָם, אֲחִי, אַחַי, אָח, אַח; אֹיְבִי, אֹיְבָם, אוֹיֵב, אוֹיְבֵי.

6. (1) In the syllable before the tone an original ă is often heightened into ā, e. g., in קָטַל, דָּבָר, דְּבָרִים, קָטָלוּ, בָּרָךְ.

(2) Sometimes, an original ă is heightened in the syllable before the tone to é, e. g., in אֶחָד, הֶחָג, אֶחָי, הִטָּהֲרוּ, בֶּחָרֵב.

(3) Sometimes, an original ĭ is heightened before the tone into ē, e. g., in forms like לֵבָב, and כְּבֵדָה, and בֵּרַךְ.

(4) Very seldom, an original ŭ have been heightened before the tone into ō, as in בֹּרַךְ.

Rem. In cases such as בָּרַךְ, בֶּרַךְ, and בִּרַךְ, the vowel before the tone has been heightened to preserve the form, in asmuch as the r cannot be doubled. In all such cases the heightened vowel remains unchanged in the inflection of the particular form, which it helps to constitute. For example, בֶּרֶךְ, בָּרְכוּ, בֵּרֲכוּ, בֵּרַכְתֶּם; בָּרַךְ, בָּרְכוּ, בָּרְכְתֶּם; בֹּרַךְ, בֹּרְכוּ, בֹּרַכְתֶּם. So in nouns פָּרָשׁ (form קָטָל), חֶרְבָה (from קַטָּלָה), רָעָה (form קָלָה), and שְׁחֹרִים (for שְׁחֹרִים).

LESSON XI.

CHANGES OF CONSONANTS.

1. Nun at the end of the first syllable of a word is assimilated to the first letter of the following syllable, which is thus doubled. The doubling is, of course, denoted by Dagesh *forte*.

Rem. 1. The Nun of the preposition מִן is often assimilated to the first letter of the word following it, e. g., מִקּוֹל.

Rem. 2. When the first syllable ends in Nun, because of an inseparable preposition, the Nun is not assimilated, e g., לִנְגֹּף לִנְדֹּר.

Rem. 3. When the Nun is followed by a guttural, or r, which cannot be doubled, the Nun may either remain, or be dropped, and the vowel before it heightened. This vowel will then be unchangeable in the further inflection of the form, e. g., יַחַת, יָחֲתוּ; מִן־הַבּוֹר; מַחֲקִי.

Rem. 4. Occasionally, also, before other consonants, especially dentals, Nun is unassimilated, e. g., יִנְטֹר.

Rem. 5. In the verb נָתַן *to give*, the last Nun, when it ends the penultimate syllable is assimilated to the first letter of the ultimate, e. g., נָתַתָּ for נָתַנְתָּ.

Rem. 6. Where Nun at the end of a syllable precedes a Nun at the beginning of a syllable of the same word,

the Nun is written but once, its doubling being denoted by Dagesh *forte*, e. g., נָתַנּוּ.

Rem. 7. In the Imperfect Kal of the verb לָקַח *to take*, the Lamedh is assimilated, when at the end of a syllable, exactly as the Nun of Pê Nun verbs, e. g., יִקַּח, יִקְחוּ.

2. Tau, also, is sometimes assimilated to the following letter, especially when that letter is a dental. In אַחַת *one*, the ד of אַחַדְתִּ has been dropped before the following ת.

When two Taus come together in inflection, one only is written and receives Dagesh *forte*, e. g., בָּרַתִּי for בָּרַתְתִּי.

3. In a few cases, Hê is said to be assimilated backwards, i. e., to the letter preceding it, e. g., in קְטָלַּתּוּ for קְטָלַתְּהוּ; תִּקְטְלֶנָּהוּ for תִּקְטְלֶנְהוּ.

4. Such letters as Aleph, Yodh (Wau), Lamedh, and Nun, are sometimes dropped, when they would have but a half vowel after them, e. g., נַחְנוּ for אֲנַחְנוּ; דַּע for יָדַע; קַח for לְקַח; גַּשׁ for נְגַשׁ; עֲדָה for וְעֵדָה.

5. a. The vowel of the weak letter Aleph is frequently thrown back on the letter which precedes it, the Aleph quiescing, e. g., לִקְרַאת for לִקְרָאת.

b. In like manner Hê, when it represents the article, or a preformative of the verb, throws back its vowel and disappears altogether, e. g., לַמֶּלֶךְ for לְהַמֶּלֶךְ; and יַקְטִיל for יְהַקְטִיל. Radical Hê probably never thus disappears, not even in Is. 52:14.

c. When Aleph is written and neither preceded nor followed by a vowel, it is said to be otiant. It serves in such cases to show the root, e. g., גָּיָא, חָטָא, וַיֵּרָא.

d. Sometimes an Aleph is prefixed, especially before sibilants, to help us to pronounce the word, e. g., אָזְרוֹעַ instead of זְרוֹעַ. This Aleph is called prosthetic Aleph. Compare the prefixed Alpha of the Ionic dialect in Greek and the Aleph prosthetic of the Arabic.

6. When the Tau of the Hithpael stem comes before a sibilant, the two letters are transposed. When the sibilant is Ṣadhe, the Tau is not merely transposed but

is changed to Ṭeth. See n and Etymology, Lessons X and XII.

Rem. In the only case, where a verb beginning with Zain occurs in the Hithpael in Hebrew, the Tau is assimilated and the Zain doubled.

LESSON XII.

THE RISE OF NEW VOWELS AND SYLLABLES.

1. When a particle with Shewa is prefixed to a word whose first radical has a simple Shewa, the particle commonly takes a Ḥiriq, so as to enable us to pronounce the syllable; since three consonants cannot occur at the beginning of a syllable, e. g., לִבְנֵי.

Rem. 1. If the first letter of the word was an unvowelled Yodh, the Yodh loses its Shewa and quiesces in the preceding Ḥiriq, e. g., בִּימֵי, וַיְהִי.

Rem. 2. Sometimes, after the preposition Lamedh, the first consonant of the word loses its half-vowel, the syllable beginning with Lamedh thus becoming closed, e. g., לִשְׁפֹּךְ, לִתְפֹּשׂ.

2. When the first syllable of a word begins with a guttural with a compound Shewa, the inseparable particle takes the corresponding short vowel, e. g., וַאֲרִי, בֶּעָנִי, לֶאֱכֹל.

Rem. 1. Sometimes, in such cases, the particle seems to have taken (or retained) the vowel corresponding to the compound Shewa, and then the compound Shewa has been changed to a silent one, e. g., in לֶאְסֹר. So, often, with preformatives, e. g., נֶהְפַּךְ, יֶחְסַר, נַחְתּוֹם.

Rem. 2. To be noted are the verbs הָיָה *to be* and חָיָה *to live*, the first consonant of whose root is wont to close the first syllable after a prefix of any kind, e. g., לִהְיוֹת, וְחָיָה, וְחָיוּ, מֵהְיוֹת. This is true in the case of these two verbs after preformatives as well as after prefixes, e. g.,

נֶהֱיָה, יְהֱיֶה. The Methegh in these instances denotes that the syllable is closed. See V, 2, Rem. 3 (5) above.

3. When a compound Shewa would come before another Shewa, it is changed to the corresponding short vowel. See c. The reason for this is that a vocal Shewa cannot end a syllable, nor two Shewas begin one.

4. At the end of a word, we sometimes find two consonants ending apparently the syllable. The second of these consonants is nearly always ב, ד, כ, ק, ת, or ט. (פ is found once, to wit, in Prov. 30:6). It is open to discussion whether the latter of the Shewas is vocal, or silent. It seems impossible to pronounce the last consonant without a short vowel sound after it, somewhat like the final *e muet* in French. See d.

5. Generally, however, a so-called helping vowel is inserted between two final unvowelled consonants. This vowel is always short and is ordinarily Seghol. But note,

(1) When one of the two consonants is a guttural, the helping vowel is Pathaḥ, e. g., קָמַח, יִחַר.

(2) When one of the two consonants is Yodh, the helping vowel is Ḥiriq, e. g., עֵין. When the second of the two consonants is Yodh, the Ḥiriq contracts with it as in פָּרִי for פָּרִיְ.

(3) When the last consonant of the word is Wau, the helping vowel is ū, which combines with the Wau to form Shureq, e. g. בְּהוּ.

Rem. In the second feminine singular of the perfect of a verb, whose last radical is a guttural, a helping Pathah is inserted after the guttural before the sufformative תְּ. This Pathah does not aspirate the following תְּ. It is doubtful, whether the Dagesh of this Tau is Dagesh *lene* or Dagesh *forte*, e. g., שָׁמַעַתְּ.

B. ETYMOLOGY.

LESSON I.

1. THE INSEPARABLE PREPOSITIONS.

1. The last consonant of the preposition מִן is commonly assimilated to the first consonant of the following word, e. g., מִבַּיִת but מִן־שָׂרֵיו.

Rem. 1. If the following consonant is a Yodh with Shewa, the Yodh is not doubled but quiesces in the preceding Ḥiriq, e. g., מִימֵי.

Rem. 2. When the first letter of the word, which מִן precedes, is a guttural, the following cases arise: —

(a) Before א and ע and ר, the Ḥiriq of the preposition is usually heightened to Ṣere, the Nun disappearing, e. g., מֵאִישׁ, מֵרֹאשׁ, מֵעִיר; but מִן־עֲדֵךְ.

(b) Before ה and ח, (1) the Ḥiriq remains, the Nun disappears, and the guttural is said by grammarians to be implicitly doubled, e. g., מֵהֵיוֹת, מֵחוּץ.

(2) מִן remains in full and is followed by Makkef, e. g., מִן־הָאָרֶץ.

(3) The Nun is dropped and the vowel heightened to ē, e. g., מֵחֵלֶב, מֵחָקִי, מֵהַגּוֹלָה.

Rem. 3. Sometimes, letters followed by a half-vowel are not doubled, but the preceding vowel remains short, the syllable being half-open, e. g., מִשְׁמַנֵּי.

2. The prepositions בְּ, כְּ, and לְ had originally, doubtless, the short vowel ă. This vowel has been changed as follows.

a. Before a consonant with a vowel, it is lowered to the half-vowel, denoted by simple Shewa, e. g., בְּכָל־, לְבֵית, כְּצוּרָם.

b. Before a consonant with simple Shewa, it is attenuated to Ḥiriq, e. g., בִּשְׁמִי, לִפְנֵי.

c. Before a consonant with compound Shewa, it becomes the corresponding short vowel. כַּאֲרִי, לֶאֱכֹל, בֶּעֱנִי.

d. Before an unvowelled Yodh, the preposition receives a Ḥiriq in which the Yodh quiesces, and in consequence drops its Shewa, e. g., בִּימֵי.

e. When אֱלֹהִים is preceded by an inseparable preposition, the preposition takes Ṣere; in which the Aleph quiesces, e. g., בֵּאלֹהִים, לֵאלֹהִים, כֵּאלֹהִים, Lamedh, in like manner, takes Ṣere before אֱמֹר and we get לֵאמֹר.

f. Immediately before an accented syllable, the prepositions sometimes receive a pretonic Qameṣ, e. g., לָהֶם, לָלֶכֶת.

g. Before the interrogative מה *what*?, ב and כ receive Pathah and the מ is doubled; but ל takes Qameṣ and the מ is doubled, e. g., בַּמָּה, לָמָּה.

h. Before אֲדֹנָי *Lord*, the prepositions ב, כ, and ל take Pathah in which Aleph quiesces, e. g., לַאדֹנָי. The tetragrammaton יהוה takes the same pointing, but is read as if אֲדֹנָי. After מן, we have מֵאֲדֹנָיו and מֵיְהוָה, or מִיְּהוָה.

2. THE CONJUNCTION WAU.

(1) The conjunction Wau *and* is ordinarily pronounced with a half-vowel, which is denoted by Shewa, e. g., וְאַתָּה.

(2) But before a guttural with a compound Shewa, it takes the corresponding short vowel, e. g., וַאֲנִי, וֶחָלִי, וֶאֱכֹל.

Rem. 1. But before אֱלֹהִים, Wau takes Ṣere, in which the Aleph quiesces, thus resulting in וֵאלֹהִים. Before אֲדֹנַי, the Wau receives Pathah in which the Aleph quiesces, thus resulting in וַאדֹנַי (and וַיהוָה).

Rem. 2. When a guttural after Wau receives a silent Shewa, the Wau takes the vowel corresponding to the compound Shewa which the guttural would regularly have received, e. g., וֶהָיָה instead of וְהָיָה.

(3) Before a consonant with a half-vowel, and also before the labials, Wau becomes Shureq, i. e. w is changed to û, because the latter is more easy to pronounce, e. g., וּלְכֹל, וּבִין, וּמִן, וּפֶן.

(4) Before an unvowelled Yodh, the conjunction receives a Ḥiriq, in which the Yodh quiesces, or rather, with which it contracts to form î, e. g., וִיהִי for וְיִהִי.

The Wau receives Ḥiriq, also, before some forms of הָיָה *to be*, e. g., וְהִיוּ, see Lesson XLVI.

(5) Before the accented syllable, even when it begins with a labial, the Wau often receives a pretonic Qameṣ, e. g., וָחַי, וָשֵׁשׁ, וָשָׁבַע, וָבֹשֶׁת, וָמֹתִי.

3. THE ARTICLE.

(1) The definite article Hê, which perhaps is derived from an original *Hal*, takes ordinarily the vowel Pathaḥ, the following consonant being doubled, perhaps on account of the assimilated *l* of the original *Hal*., e. g., הַמֶּלֶךְ.

(2) When, however, the consonant following the article has a half-vowel after it (denoted, of course, by Shewa), it is frequently not doubled, especially if this consonant be Yodh, or one of the liquids *l*, *m*, or *n*, e. g., הַיְקוּם, הַלְאֻמִּים, הַמְלָאכָה, הַנְּבָלָה.

Rem. When followed by ה or ע, an unvowelled Yodh, or Mem, is doubled, e. g., הַיְהוּדִי, הַיְעָרִים, הַמְּעִיל, הַמְּהוּמָה. Mem is doubled, also, in many other cases, e. g., הַמְּאֹרוֹת, הַמְּלָכִים, הַמְּקֻמוֹת. Lamedh, also, is doubled in הַלְּשָׁכוֹת.

(3) Before the gutturals and Resh, which cannot be doubled, the article takes the following pointings.

a. Before Aleph and Resh, the Pathaḥ is always heightened to Qameṣ, e. g., הָאָדָם, הָאַבְרִים, הָרָגֶל, הָרְפָאִים.

b. Before Hê, there are three usages.

1. Pathaḥ commonly remains, e. g. הַהוּא, הַהֶבֶל, הַהָרוֹן.

2. Pathaḥ is heightened to Qameṣ, e. g., הָהָר, הָהֵם, הָהַנָּה.

3. Pathaḥ is heightened to Seghol, but only when the Hê following the article is followed by a pretonic Qameṣ, e. g., הֶהָרִים, הֶהָמוֹן, הֶהָדָר.

c. Before Ḥêth, there are, also, three usages.

1. Pathaḥ commonly remains, e. g., הַחֶבֶל, הַחֲטָא, הַחָרְבָה.

2. Pathaḥ is heightened to Qameṣ (very infrequent), e. g., הָחַי.

3. Pathaḥ is heightened to Seghol, but only when the Ḥêth has Qameṣ, or Ḥaṭef-Qameṣ, e. g., הֶחָדָשׁ,

הֶחָרְבוֹת, הֶחָלִי, הֶחָי (pausal form for הֲחַי), הֶחָרֵב (pausal form for הַחָרֵב).

d. Before Ayin, there are two usages.

1. Ordinarily Pathaḥ is heightened to Qameṣ, e. g., הָעָצָב.

2. But when the Ayin is followed by pretonic Qameṣ, the Pathaḥ in heightened to Seghol, e. g., הֶעָנָן, הֶעָפָר, הֶעָרִים.

(4) When preceded by the article, the vowel or half-vowel of the first radical of the following six words becomes Qameṣ, to wit: אֶרֶץ *earth* (from original אַרְץ), הַר *mountain*, עַם *people*, פַּר *young bull*, חַג *pilgrimage*, and אֲרוֹן *ark*, become respectively הָאָרֶץ, הָהָר, הָעָם, הַפָּר, הֶחָג, and הָאָרוֹן.

(5) When the inseparable prepositions precede a word with the article, they assume the pointing of the article, the *Hê* being dropped, e. g., כַּמֶּלֶךְ, בָּאָרֶץ, בָּעָפָר, כַּכְּפִיר.

Note 1. The interrogative מה takes the pointings of the article, to wit:

1. Before most letters, it is pointed מַהּ, being followed by Makkef and the next letter taking Dagesh *forte*, e. g., מַה־יִּקְרָא, מַה־לְּךָ.

2. Before Aleph, Hê, Ayin and Resh it takes Qameṣ, e. g., מָה רָאָה; מָה עָשָׂה; מָה־הָעֵרְבוֹן; מָה אֹמַר.

Note 2. The Wau conversive with the Imperfect takes the pointings of the article.

1. Usually Pathaḥ followed by Dagesh forte, e. g., וַיִּקְטֹל, וַתִּקְטֹל, וְנִקְטֹל.

2. But before the Aleph of the first person singular the Pathaḥ is heightened to Qameṣ, e. g., וָאֶקְטֹל.

3. But when Yodh, or Nun, loses its vowel and has nothing but a half-vowel, the Dagesh is dropped, e. g., וַיְהִי, וַיִּכֶל, וַיִּקְמְהוּ, וְנִקְטַל.

LESSON II.

THE PERSONAL PRONOUNS.

1. In pause, אָנֹכִי throws the accent back to the penult; אֲנִי changes the Ḥateph-Pathaḥ to an accented ā; אַתָּה throws the accent to the penult and heightens the ă to ā; אַתְּ heightens ă to ā; and נַחְנוּ and אֲנַחְנוּ heighten the ă of the penult to ā.

See tables at end of the book.

2. Shortened forms of the personal pronouns are commonly employed for the genitive and accusative, i. e. for what we call the possessive and objective pronouns. These forms are affixed to the end of the noun, or verb, and are called pronominal suffixes, or simply suffixes. In general, the suffixes for verb and noun are the same, except for the first person singular. The connection between suffixes and independent pronouns is obvious, except in the second person where t changes into k.

3. Note that some of the pronouns have two forms.

INFLECTION OF THE NOUN.

A. GENERAL REMARKS.

1. The *noun* in Hebrew has three numbers, singular, dual, and plural, e. g., יָד *hand,* יָדַיִם *two hands,* יָדוֹת *hands.*

Rem. The adjective has no dual. When the noun is dual the adjective is plural, e. g., הָרַגְלַיִם הַטּוֹבוֹת *the two good feet.*

2. Nouns and adjectives have two genders, — masculine and feminine, e. g. טוֹב *good,* fem. טוֹבָה; מֶלֶךְ *king,* fem. מַלְכָּה *queen*; masc. plur., טוֹבִים, fem. plur., טוֹבוֹת.

3. Nouns and adjectives have two forms, called the absolute state and the construct state. The absolute state, only, may stand alone, or take the article, e. g., מֶלֶךְ *a king,* הַמֶּלֶךְ *the king,* מְלָכִים *kings,* הַמְּלָכִים *the kings.*

The noun in the construct never takes the article and is always followed immediately by another noun in what

we would call the genitive case, e. g., מֶלֶךְ הָעִיר *the king of the city;* מַלְכֵי הָאָרֶץ *the kings of the land.*

From the very nature and use of the noun in the construct state, it is always as short as possible, i. e., as short as the possible changes of the Hebrew vowels by way of lowering, attenuating, contraction, and reversion, (See Orthography Lesson X above) will allow. In accordance with the laws of pronunciation, of derivation, of accent and of the syllable, e. g., דְּבַר, דִּבְרִי, גְּדוֹל, גְּדוֹלַת, גְּדֻלּוֹת, are all as short as they can be, and get accents, syllables, laws of vowel changes, and forms of noun are all preserved intact. Nouns accented on the penult like מֶלֶךְ are no exception to this rule, since the final vowel is inserted merely to assist in the pronunciation and the ă is heightened with the accent to é. קַטֶל is no exception, since you cannot have a short vowel, other than ă, in the ultimate.

4. Naturally long vowels, (that is, those which were originally long, or those which have been contracted) remain unchanged in inflection. But any vowel which was originally short is subject to changes caused by heightening, lowering, attenuation, obscuration, reversion, or contraction.

5. There are no endings for the masculine singular. In the masculine plural the endings are ים. for the absolute state and י_ for the construct.

For the feminine singular the endings are ה_ for the absolute state and ת_ for the construct. In the feminine plural the ending is וֹת for both states. e. g. טוֹב, טוֹב; טוֹבִים, טוֹבֵי; טוֹבָה, טוֹבַת; טוֹבוֹת, טוֹבוֹת.

6. In connecting the suffixes with the singular noun two different union vowels are employed, to wit: ĭ and ă. The former appears heightened into ē in סוּסֵךְ and סוּסֵנוּ, סוּסָתֵךְ and סוּסָתֵנוּ; and contracted into י_ in סוּסִי, סוּסָתִי. The latter in its heightened forms in סוּסָם, סוּסָן and in the pausal form סוּסָךְ; in its lowered form in סוּסְכֶם, סוּסְכֶן, and סוּסְכֶן; and in its contracted form in סוּסוֹ from סוּסַהוּ, and סוּסָהּ from סוּסַהּ. So, also, in סוּסָתָם etc., סוּסַתְכֶם etc.

Rem. The feminine singular simply places תַ between the masculine form and the suffixes, the ă remaining before כֶם and כֶן, the so called grave suffixes, and being heightened to ā elsewhere.

7. The original form of the construct plural masculine ending was יַ, contracted later into ֵי. This original יַ remains before ךָ, a helping vowel Ḥiriq being given to the Yodh, e. g., סוּסְיִךָ. But, before the other suffixes יַ is contracted into ֵי, as before נוּ, כֶם, כֶן, הֶם, and הֶן; or to י, as before הָ and ךָ; or יַ, as in סוּסַי for סוּסַיְ; or, into יו, as in סוּסָיו from סוּסָיְהוּ from סוּסַיְהוּ.

8. The feminine plural inserts the construct ending of the masculine between it and the suffixes with the same contractions and results, as if it were the masculine, e. g., סוּסֹתַי, סוּסֹתָיו, סוּסֹתָיִךָ, סוּסֹתֵיכֶם.

B. SPECIAL REMARKS.

1. To many forms of words ending in vowels, the suffixes are appended directly.

2. Sometimes, הוּ was joined with the noun by means of Ṣere, in which case no contraction takes place, e. g., מְנָהוּ, אוֹרֵהוּ.

3. The following unusual forms are to be noted: ה written instead of וֹ; נוּ for נוּ, as in בָּלְנוּ; מוֹ for הֶם; and יִךָ for יְךָ.

LESSON III.

THE INFLECTION OF UNCHANGEABLE NOUNS.

A B MASCULINE.

1. By an unchangeable masculine noun is meant one whose absolute singular form remains unchanged before all endings.

Rem. 1. In a few cases, where the singular of the noun is unchangeable, the plural in use has been formed from an earlier uncontracted form or possibly from another singular, e. g., שׁוֹר contracted from שַׁוְרָ, plural שְׁוָרִים; עִיר, עָרִים.

2. One may treat as unchangeable

(1) All monosyllables having in the absolute singular an î, or an û; and those in a, e and o which are derived from roots whose second radical is Wau, or Yodh, e. g., רִיב, חוֹץ, קָם, עַד, חַיִל and סוֹף. Also forms like כְּסִיל, כְּרוּב, בְּכוֹר, whose first radical was originally ĭ or ŭ. Also זְאֵב *wolf*.

Rem. The plural of some nouns with a masculine form has the feminine form, e. g., חוֹץ, חוּצוֹת; רוּחַ, רוּחוֹת. Whether the noun in such cases is really masculine, or feminine, can be determined only by observing whether the verbs and adjectives agreeing with it are masculine or feminine, e. g., הַמְּקוֹמוֹת הָרְחֹקִים; הַמְּאוֹרוֹת הַגְּדֹלִים; but הָרוּחוֹת הַטּוֹבוֹת.

(2) Dissyllables, having a naturally long vowel in the ultimate and the first syllable closed, e. g., צַדִּיק, גִּבּוֹר, חֲלוֹן, עָמוּד, פְּקוּד, טַבָּח, and אָבְיוֹן, רִאשׁוֹן, אַחֲרוֹן, מְזִמּוֹר, מַלְקוֹחַ, מִישׁוֹר.

Rem. When the second radical of such forms was a guttural, or Resh, the preceding vowel is heightened and remains unchangeable, e. g., פֶּרֶשׁ, סָרִים, plural פָּרָשִׁים and סָרִיסִים.

(3) Words ending in a guttural take compound Shewa prefore הָ, כֶם and כֶן, e. g. רוּחֲךָ, רֵעֲךָ, בְּרִיחֲכֶם, טַבָּחֲךָ. In pause, רוּחֶךָ etc.

Rem. 1. Ability to tell whether a final a or o is unchangeable will only come in two ways (1) by a knowledge of the original noun form and (2) by observation of the actual use. A thorough knowledge of the first of these ways comes only from a study of comparative Semitics; a knowledge of the second can be gained from a good Hebrew concordance, provided that the Bible happens to contain a form, like the construct plural, which commonly requires a change. With all the means at our disposal, there is still room at times for doubt.

Rem. 2. In the adjective רַע the vowel is heightened to ָ before all endings, e. g., רָעִים.

C D FEMININE.

1. By an unchangeable feminine noun is meant one which changes the sufformative of gender only in inflection, e. g., סוּס, ה,—סוּס, תַ—סוּס, וֹת—סוּס.

Rem. 1. In the case of the singular of the noun before the suffixes, the original feminine ending תַ is retained before כֶם and כֶן, the ă being heightened to ā before all other suffixes, e. g., סוּסַתְכֶם, but סוּסָתוֹ.

Rem. 2. The feminine plural of these nouns is unchangeable for all states and in all inflections, e. g., סוּסוֹת, סוּסוֹתַיִכֶם, סוּסוֹתָיו.

2. Among unchangeable feminine nouns may be reckoned the following:

(1) The feminine forms of all unchangeable masculine forms, e. g., קָמָה, מַתָּה, טוֹבָה, סוּסָה, שִׂרָה, צַדִּיקָה, הָרָבָה (hărrâvăh מַבָּחָה), חֲבוּרָה, אֵימָה (from אַיָּמָה).

(2) Those whose second radical is doubled before the feminine ending, e. g., כַּלָּה, זָמָּה, חֲקָקָה, מְסִלָּה, תְּהִלָּה.

Rem. When the second radical is a guttural, or Resh, the preceding consonant takes a heightened unchangeable vowel, e. g., מְעָרָה, צָרָה.

(3) Those whose third radical is doubled before endings in order to preserve the original form, e. g., עֲמֻקָּה, קְטַנָּה, כְּלִמָּה.

Rem. When the third radical is a guttural, the preceding vowel is heightened and unchangeable, e. g., גְּבֹהָה.

(4) All additional dissyllables whose penult is unchangeable, e. g., מְנוּחָה, פְּלִיטָה, גְּלִיָּה, גְּוִיָּה, יְשׁוּעָה, יְרִיעָה, גְּדוֹלָה, תְּשׁוּקָה, תּוֹרָה, מְצֻוָּה, מְנוֹרָה, מְדִינָה.

Rem. The ā of גָּלוּת remains unchanged both in the construct and before suffixes, e. g. גָּלוּת הַמֶּלֶךְ, גָּלוּתִי.

LESSON IV.

MASCULINE NOUNS WHICH HAD ORIGINALLY TWO SHORT VOWELS BOTH CHANGEABLE.

1. It may be observed first of all that the general rule for all nouns is, that they are as long as possible in the absolute state, and as short as possible in the construct. By *possible*, is here meant as long and as short as the rules of the *Hebrew* language for syllables and vowel changes will allow. Thus, for example, in the case of דָּבָר *word*, the original *dăvăr* becomes in the absolute state *dāvār*, each vowel having been made as long as it is possible in Hebrew to make it. In the construct state, it becomes *dᵉvăr*, a word of one syllable and the shortest possible form in which the combination of consonants can be pronounced; and yet at the same time, the original form is perfectly clear, the ă of the ultimate having been retained (or recovered by reversion), and the ă of the penult lowered.

In the case of the plural, also, the absolute דְּבָרִים is as long as possible in accordance with the Hebrew rule which permits of the heightening of but one vowel before the tone and of the other rule which forbids a short vowel in an open unaccented syllable.

Note. דְּבָרִים would have been equally in harmony with the rule above given. But the heightening of the second original vowel before the primary accent is a characteristic of the verb, as in קָטְלוּ from ḳăṭălû. This variation between the noun and the verb in regard to the vowel heightened is probably for the sake of *differentiation*.

The construct plural was originally *dăvărăy*. The final ăy contracts to ◌ֵי, the ultimate ă is lowered, and the original penultimate ă is either retained, or attenuated to ◌ִי*.

* No rule can be given as to when the original ă is to be retained and when attenuated. See Stade's Hebräische Grammatik, where a complete induction of examples is made without any reason for the difference in use being found.

The student will see for himself, that it is impossible to shorten דִּבְרֵי, and yet all of the original vowels have been retained, the last contracted, the next lowered and the first attenuated.

2. In the construct singular of nouns whose last radical is Aleph, the ultimate ă is heightened to ā, because a short vowel cannot stand at the end of a word; and the Aleph here having lost all consonantal form, the ă must in consequence be heightened, e. g., צָבָא.

3. When a radical is a guttural, it takes a compound Shewa wherever other consonants would take a simple Shewa. e. g., עֲשַׂן, נַהֲרֵי, רִשְׁעֲכֶם.

Note, that the plural of nouns which had originally one short vowel, is the same as the ordinary plural of nouns which had originally two short vowels, e. g., נְעָרִים, נַעֲרֵי from נַעַר (originally *năʿr*), just like נְהָרִים, נַהֲרֵי from נָהָר (originally *năhăr*).

4. A few nouns which had originally two short *a* vowels, double the final consonant before sufformatives and suffixes, instead of heightening and lowering the original vowels, e. g., *qătăn* becomes קְטַנִּים, קְטַנֵּי, קְטַנּוֹ, קְטַנּוֹת etc.

5. Nouns which had originally the form Ḳăṭŭl, heighten both vowels in the absolute state, e. g., נָקִי. The only construct singular of this form found in the Bible is קְטַן. Before sufformatives and suffixes of this form, the vowel of the ultimate is retained in its original state, and the last consonant is doubled, e. g. נְקִיָּה, נְקִיִּים, נְקִיּוֹ etc.

Rem. When the last consonant is a guttural, or Resh, the ŭ is heightened by way of compensation. This heightened ō remains in all forms before sufformatives and suffixes, e. g., שְׂחֹרָה, שְׂחֹרִים, שְׂחֹרוֹת.

6. Nouns whose vowels were original ă—ĭ, heighten both vowels in the absolute singular, e. g., זָקֵן. The construct singular is generally like זְקַן, but sometimes like זְקֵנֵי, and with final Aleph like מְלֵא. Before all light suffixes both for singular and plural, the form is זְקַנ; and also before all sufformatives for gender and number,

except the construct plural, — and here also sometimes, when the third radical is Aleph.

Rem. The adjective אַחֵר retains the ă of the penult unheightened in the absolute singular, both masculine and feminine, but in the plural, it becomes Ḥaṭef-Pathaḥ, e. g., אַחֶרֶת, אֲחֵרִים, אֲחֵרוֹת.

LESSON V.

SEGHOLATE NOUNS.

In its broadest sense, all nouns which take a helping vowel ĕ to aid in the pronunciation of the last two consonants should be called *segholates*, whether these nouns be masculine, or feminine, or had originally one or more vowels. Most grammarians use the word, however, for nouns which had originally one short vowel, and even without regard to the question as to whether the helping vowel is really a Seghol at all. In this and the following lessons, we shall treat of nouns which had originally one short vowel and of the changes which this vowel has undergone in process of time, through heightening, attenuation, contraction etc.

1. The first class of nouns which had originally one short vowel is composed of those nouns which had ă after the first radical. While the noun still had its case endings, this would be for the nominative *mălkŭ*, for the genitive *mălkĭ*, for the accusative *mălkă*. When these case endings were dropped, the ă was commonly heightened to é and a helping vowel was given to the second radical. This helping vowel is commonly ĕ, e. g., *mălk* becomes מֶלֶךְ.

2. But when the second radical is a guttural, the ă after the first radical is retained and the helping vowel, also, is ă, e. g., נַעַר. When the third radical is a guttural the original ă is heightened to é, but the helping vowel is ă, e. g., זֶרַע.

3. The construct singular is the same as the absolute.

4. Before all suffixes the singular has the form *mălk*, e. g., מַלְכּוֹ, מַלְכָּם. But when the second, or third, radical is a guttural, the following variations occur.

(1) Where the strong letters have vocal Shewa the gutturals take a compound Shewa, e. g., נַעֲרוֹ, זְרֻעֲכֶם, חֲסָרִים.

(2) Wherever the presence of a guttural would cause a compound Shewa to come before another Shewa, the compound Shewa is changed into the corresponding short vowel, e. g., נַעֲרָךְ, נַעֲרָכֶם.

(3) Where the first or second radical is a guttural, Pathaḥ occurs under the first radical in the construct plural, e. g., נַעֲרֵי, חַסְדֵי.

5. Notice especially that the plurals of nouns of this class are exactly the same as if the nouns had had originally two short vowels, i. e., they are exactly like those in Lesson IV, e. g.,

Original form of singular	dăvăr	mălk	ḥăḳăm	ḥasd	năhăr	năʿr
Absolute sing.	דָּבָר	מֶלֶךְ	חָכָם	חֶסֶד	נָהָר	נַעַר
„ plural	דְּבָרִים	מְלָכִים	חֲכָמִים	חֲסָדִים	נְהָרִים	נְעָרִים
Construct „	דִּבְרֵי	מַלְכֵי	חַכְמֵי	חַסְדֵי	נַהֲרֵי	נַעֲרֵי
With light suff.	דְּבָרָיו	מְלָכָיו	חֲכָמָיו	חֲסָדָיו	נְהָרָיו	נְעָרָיו
With grave suff.	דִּבְרֵיכֶם	מַלְכֵיכֶם	חַכְמֵיכֶם	חַסְדֵיכֶם	נַהֲרֵיכֶם	נַעֲרֵיכֶם

Rem. עֶשְׂרִים *twenty* is formed from עֶשֶׂר *ten* (ʿăsr) by appending the plural ending to the original form of the singular, ă being changed to ĕ on account of the guttural. רַחֲמִים *mercy*, is formed in like manner from רֶחֶם. So, רַחֲמָיו *his mercy*.

6. The dual, however, is formed regularly from the original form *mălk* by appending the ordinary dual ending *ăyim*, e. g., מַלְכַּיִם, מַלְכַּי, מַלְכָּיו, מַלְכֵיכֶם. Also רַגְלַיִם, נַעֲלַיִם, קַרְנַיִם.

Rem. 1. When the second radical is a guttural, it takes compound Shewa under it.

Rem. 2. Of unusual formation, is the dual דְּלָתַיִם *doors* from דֶּלֶת.

7. Before suffixes, and in the construct plural, the original ă is often attenuated to Ḥiriq, e. g., פִּשְׁעִי, פִּשְׁעֵי. When it is to be thus changed is a matter of observation, since no rule seems to cover the cases of change.

8. In pauses, the ă, (or é), of the penult of both singular and dual is heightened to ā, e. g., חָדֶר : חֲדָרִים : נַעֲרַיִם. When the first letter of the singular is Ḥeth with Qameṣ, the article takes Seghol, e. g., הַחֶדֶר but הֶחָדֶר.

9. The inseparable prepositions may take a pretonic Qameṣ before a segholate in the absolute state without the article, e. g., לְנַעַר.

10. When אֶרֶץ *earth* takes the article, it heightens the original ă to ā, e. g., הָאָרֶץ.

LESSON VI.

NOUNS WHICH HAD ORIGINALLY A SHORT I OR U.

1. The second class of nouns with one short vowel consists of those which had originally a short i. In the singular before suffixes, this i commonly remains; but elsewhere it is heightened to ē, e. g., סִפְרוֹ but סֵפֶר.

Rem. Where the first radical is a guttural the i, in forms with suffixes, is commonly obscured to ĕ, e. g., חֶלְקִי, עֶזְרֵנוּ.

2. The third class of nouns with one short vowel consists of those which had originally a vowel ŭ. This ŭ is commonly obscured to ŏ in closed syllables, and heightened to ō in open syllables, e. g., בָּקָר, בְּקָרוֹ; but exceptionally ŭ remains as in גְּדֻלּוֹ. When the second radical is a guttural it takes Ḥaṭef-Qameṣ, e. g., פֹּעֲלוֹ. Before grave suffixes this Ḥaṭef-Qameṣ becomes ŏ, e. g., פָּעֳלָכֶם.

3. In both of these classes, the helping vowel is ordinarily Seghol, e. g., קֹדֶשׁ; but when the second or third radical is a guttural, the helping vowel is ă, e. g., נַצַּח, פֹּעַל, אֹרַח.

4. When the third radical is a guttural, it takes compound Shewa, where other consonants take simple Shewa, e. g., נִצְּחָכֶם.

5. Singular is the noun חַטָּא whose final letter is otiant. Its plural construct is חַטָּאֵי.

6. The plural absolute of nouns in ĭ and ŭ is commonly exactly like the plurals of those in a. (See lesson V. above.) The construct plural, however, has ordinarily ĭ under the first radical for nouns whose original vowel was ĭ; and ŏ obscured from ŭ for those whose original vowel was ŭ.

Rem. 1. Where the first, or second, radical is a guttural, nouns whose original vowel was ĭ, obscured it to ĕ in the construct plural, e. g., עֶגְלֵי.

Rem. 2. In the plural of שֹׁרֶשׁ from šŭrš and קֹדֶשׁ from kŭḏš, the original ŭ obscured to ŏ is retained under the first radical; in the plural of אֹהֶל from 'ŭhl, it is heightened to ō. The resultant forms are שָׁרָשִׁים, קָדָשִׁים, אָהָלִים. In the plural of חֹדֶשׁ from ḥŭḏš, it is lowered to the compound Shewa and we get as a result חֳדָשִׁים.

Note: But with the article we find: הַקְּדָשִׁים and הָאֳהָלִים; and with suffixes קָדָשָׁיו and קָדָשֶׁיךָ, אָהָלֶיךָ, אָהָלָיו (but once מַאֳהָלָיִךְ).

LESSON VII.

NOUNS WITH MIDDLE, OR LAST, RADICAL WAU OR YODH.

1. In the absolute singular, some nouns with middle Yodh, preserve the original ă under the first radical and give the helping vowel ĭ to the second radical, e. g., אַיִל, צַיִד, קַיִן, עַיִן, לַיִל, נַיִן, חַיִל, נַיִת, בַּיִת, אַיִן.

Rem. 1. In the construct of all of these, the ăy contracts into ê, which is unchangeable in the singular before suffixes, e. g., וַיִת, וֵיתוֹ, וֵיתְכֶם.

Rem. 2. The plurals are of great variety, e. g., אֵילִים, וַיְתִים, בָּתִּים, לֵילוֹת, עֵינוֹת (dual עֵינַיִם), חֵילִים. Of some, no plurals are found, e. g., אַיִן, נַיִן, קַיִן, and צַיִד.

Rem. 3. In sporadic cases the contraction took place even in the absolute singular and the noun became unchangeable, e. g., חֵיל (See Lesson III above).

Rem. 4. גֵּיא in the absolute singular preserves the original ă and the Aleph becomes otiant. The construct is גֵּיא.

Rem. 5. לַיִל *night* usually takes an unaccented ה at the end of the absolute singular.

2. Nouns with middle Yodh whose original vowel was ĭ contracted the ĭ and Yodh into unchangeable î and come under lesson III, e. g., שִׁיר, אִישׁ, דִּין, הִין(?), חִיל, מִין(?), רִיב, עִיר, כִּיר.

3. Nouns with middle Wau of the first class (1) heighten in the absolute state the ă to ā and take the helping vowel Seghol, e. g., אָוֶן, מָוֶת, עָוֶל, תָּוֶךְ. In the construct, the ă and Wau contract into ô except in עָוֶל whose construct is עַוֶל.

Rem. שָׁוְא heightens the ă but has otiant Aleph and no helping vowel.

(2) Contract the ă and Wau into ô, which remains unchangeable in the singular, e. g., אוֹר, אוֹת, בּוֹר, גּוֹי, דּוֹד, הוֹן, יוֹם, כּוֹם(?), סוֹף, עוֹד, עוֹף, עוֹר, קוֹל, שׁוֹק, שׁוֹר, תּוֹר. See lesson III above).

(3) In the construct and plural the ă and *w* han contracted into unchangeable ô; except in a few nouns like שְׁוָקִים *streets* and שְׁוָרִים *oxen* and יָמִים *days*, the former two of which are regular in the plural.

4. When the second radical is Wau and the original short vowel was ŭ, the ŭ and the w contract into an unchangeable û and the noun comes under the class of unchangeable nouns mentioned in Lesson III, e. g., חוּץ, טוֹב, טוּר, לוּחַ(?), מוּל, סוּף(?), צוּר, רוּחַ, שׁוּר.

5. Nouns whose last radical is Yodh commonly lower the vowel of the first radical and retain only the helping vowel i of the second radical in which the Yodh quiesces, or better with which it contracts, e. g., בְּכִי, בְּלִי, גְּלִי, מְרִי, פְּרִי, פְּתִי, צְבִי, שְׁבִי, or with compound Shewa under the first radical אֲרִי, עֲנִי, חֲלִי, חֲצִי.

Rem. 1. The plurals of these nouns are mostly regular, e. g., חֲלָיִים; but בְּלִי has בֵּלִים, כְּלִי and פְּתִי has פְּתָאִים and

צְבָאִים, צְבִי. In these two last it is likely that Aleph was pronounced as y, as it often is in Syriac.

Rem. 2. אִי seems to be contracted from *'iwy* and in the plural becomes אִיִּים.

6. Nouns with final Wau are either regular or the Wau contracts with the helping vowel to form û, e. g., בֹּהוּ, קָצֶו, תֹּהוּ.

Rem. Sometimes, the final Wau or Yodh has been elided, e. g., אָב, בֵּן, בַּל, דָּם, יָד, מִן, עַד, עַל, שֵׁם, אָח. Most of these nouns are exceedingly singular and will be considered in Lesson XVI.

7. The student will learn the causative, or Hiphil and Hophal stems. See Lesson XXI.

LESSON VIII.

NOUNS WHICH HAD ORIGINALLY ONE SHORT VOWEL FROM ROOTS WHOSE SECOND AND THIRD RADICALS WERE THE SAME.

1. Before all sufformatives and suffixes the original form remains, the double letter being denoted by Dagesh *forte*, e. g., גַּלֵּה, גַּלִּים, גַּלְּכֶם, לִבִּו, רַבְּכֶם.

2. In the absolute and construct singular, the third radical is dropped, since but one consonant of the same kind can be pronounced at the end of a syllable, e. g., בַּד (for bădd), חַג (for ḥăgg), חַת, כַּף, לֵב, סַף, צַד, רַב, שֹׁד.

Rem. 1. That ĭ and ŭ are always heightened in the monosyllabic forms to ē and ō except when these are followed by Makkeph, when they are obscured to ĕ and ŏ, e. g., אֵם, חֵן, לֵב, צֵל, קֵן, קֵץ, שֵׁן, חֹם, חֹק, עֹז, עֹל, קֹר, רֹב, שֹׁד, תֹּם, כֹּל. But כָּל־; and with suffixes לִבִּו, רַבּו.

Rem. 2. Adjectives or nouns of the form קַטַל, i. e., which had originally two short a vowels have contracted into the same form as nouns which had one short a, and are to be treated in inflection in exactly the same way, e. g., דַּל, חַי, מַר, עַז, צַר, קַל and רַב.

Rem. 3. When the second radical is aguttural, or Resh, which cannot be doubled, the preceding vowel is heightened to an unchangeable ā, ē, or ō, whenever endings are appended, e. g., מָרִים, צָרָה, פָּרָה, שָׂרָה, רָעָה. But, before Hêth, the Pathah may remain, e. g., פַּחִים, though this may be of the form קַטְל.

Rem. 4. When the doubled radical was Yodh, the construct singular was יְ when the original vowel was ă, e. g., דֵּי from *dăyy,* חֵי from ḥăyy. But when the original vowel was ĭ, we get a form like אִי, אִיִּים, אִיֵּי.

Rem. 5. Certain nouns in ă heighten this ă to ā in the absolute singular with the article, e. g., הַר, הָהָר; חַג, הֶחָג; פֶּר, הַפָּר; עַם, הָעָם.

The word יָם *sea,* always has the ā in the absolute state, whether with or without the article; and also, in the construct state, except before סוּף, e. g., יַם־הַמֶּלַח, הַיָּם but יַם־סוּף.

LESSON IX.

NOUNS WHOSE PENULT IS UNCHANGEABLE AND THEIR ULTIMATE CHANGEABLE.

1. In nouns whose penultimate is unchangeable and whose ultimate had originally an ă, two cases arise:

(1) The ă is heightened to ā in the absolute singular and plural and before light suffixes; is lowered to the half-vowel in the construct plural; and reverts to the original ă in the construct singular, e. g., עוֹלָם, עוֹלָמִים, עוֹלְמֵי, עוֹלַם. Before the grave suffixes the forms of the construct are found; before the light suffixes the form of the absolute, e. g., עוֹלַמְכֶם, עוֹלָמֵיכֶם. עוֹלָמוֹ, עוֹלָמָיו.

Rem. When the third radical is Aleph, the Qameṣ of the absolute plural, is retained in the construct, e. g., מוֹצָאַי (R. יָצָא).

(2) The original ă is retained in the construct singular and before all sufformatives and suffixes, the last consonant being doubled, e. g., אוֹפַנּוֹ, אוֹפַנִּים.

In the absolute singular, the ă is heightened, e. g., אוֹפָן.

2. When the penultimate syllable is a closed one, and the ultimate syllable had originally an ă, the changes in inflection are the same as when the original vowel of the penult was long. That is, to nouns of this class belong not merely, nouns like עוֹלָם, אוֹפָן, and אוּלָם, but nouns like מִקְדָּשׁ, נִקְרָא, שֻׁלְחָן, קָרְבָּן, and יִצְהָר.

Rem. 1. Many nouns whose penultimate, originally closed, has become open through contraction, belong here, e. g., מוֹרָד from *măwrăḏ* (R. יָרַד), מוֹסָר from *muwsăr*, (R. יָסַר) מֵישָׁר from *măyšăr*, תֵּימָן from *täymăn*. Also, many nouns whose first syllable has become half-open, owing to the first radical's being a guttural, e. g., מַאֲכָל, מַעֲבָר, מַעֲלָל, מֵעֲרָב, מֶעָשָׂר. Also, מוֹבָא *entrance*.

Rem. 2. The final letter is occasionally doubled in forms whose penult ends in a consonant, e. g., מִשְׁמַנִּי.

Rem. 3. In nouns whose last radical is Aleph, the original ă is sometimes lowered in the absolute plural, e. g., נִמְצָאִים. Compare נִפְלָאוֹת.

Rem. 4. Notice, that most of these nouns are formed by prefixing מ, נ or ת to the root.

3. מָגֵן and מָעוֹז, the vowel of whose penult is an original â and hence unchangeable, double the final radical before all endings, e. g., מָגִנִּי, מָעֻזּוֹ.

4. For this lesson, the student will need to learn the Niphal Stem, see Lesson XXII.

LESSON X.

LAST SUBJECT CONTINUED.

1. When the penultimate syllable is unchangeable, either because it has an originally long vowel or one long by contraction, or because it constitutes a closed, or sharpened, syllable, the vowel of the ultimate syllable, (1) if it was originally ĭ, is heightened usually in the singular absolute and construct to ē, and takes the accent, e. g., קוֹטֵל.

(2) In the plural absolute and construct and before suffixes, it is lowered to the half-vowel, e. g., קָטְלֵי, קָטְלִים.

Rem. 1. Before ךָ, כֶם and כֶן, the vowel is commonly obscured to ְ, e. g., קָטַלְךָ, קָטַלְכֶם, but אֲכַלְכֶם.

Rem. 2. When the last radical is a guttural, it is preceded in the construct singular by Pathaḥ, e. g., יוֹדַע.

2. Nouns of this class which end in the absolute singular in ה have ה in the construct singular, ים in the absolute plural, and י, in the construct plural, e. g., גָּלָה, גָּלַה, גָּלִים, גָּלֵי.

In the singular, the endings are dropped, and the suffixes appended directly to the second radical, e. g., גָּלָהּ, גָּלְכֶם, but גָּלָהוּ; in the plural, they are appended directly to the construct ending, e. g., גָּלָיו, גָּלֵיכֶם.

Rem. These nouns ending in ה are from verbs whose original third consonant was Wau, or Yodh. This third radical has been dropped and Hê is inserted as vowel letter after the final vowel.

3. The student will learn here the participle active Kal. Imv. (See Lesson XIX. 3 and Paradigm XIX and Ges. § 50); and, also, the Hithpael stem (Lesson XXII B and Ges. § 54).

Rem. 1. As to meaning, note that the Hithpael is usually reflexive, or reciprocal in sense; but rarely passive.

Rem. 2. An ה at the end of the first person of the Imperfect denotes intention, or volition, e. g., נִתְחַכְּמָה "let us act wisely".

LESSON XI.

NOUNS WHOSE ULTIMATE IS UNCHANGEABLE AND THE PENULT CHANGEABLE.

1. These comprise all nouns which had originally a long vowel in the ultimate, i. e., î, û, or â (ô), and an ă

in the penult. This ă has been heightened to ā in the absolute singular, and everywhere else, has been lowered, e. g., קָטִיל, קָטוּל, קָטוֹל, but קְטֹלוֹ, קְטֹלִים etc.

Rem. An original penultimate ĭ or ŭ is dropped everywhere, and in consequence, nouns of these forms have come to be classed among the unchangeable nouns of Lesson III, 2. (1) above.

2. When the third radical is Yodh preceded by î, only one Yodh is written; but before all endings, it is doubled and receives Dagesh *forte*, e. g., נָקִי, נְקִיּוֹ, נְקִיִּי, נְקִיִּים, נְקִיָּיו.

3. Nouns with preformatives, which through contraction have come to have forms with an unchangeable ultimate and a penultimate ā, are inflected just as if the preformative were a radical, e. g., מָאוֹר, מָבוֹא, מָצוֹר, מָקוֹם, מָרוֹם, מָשׁוֹשׁ. The plural of these may be feminine in form, but they remain masculine in gender, e. g., מְאוֹרוֹת, מְקוֹמוֹת.

Rem. So also with forms ending in וֹן from ל״ה verbs, e. g., חָזוֹן, הָמוֹן, חָרוֹן, רָצוֹן.

4. Of course, a guttural will take a compound Shewa, where other consonants take simple Shewa, e. g., עֲנִיִּי, מְבוֹאָךְ. A guttural will, also, take a Pathaḥ furtive in all of these nouns, when it is not followed by a sufformative, or suffix, e. g., מָשְׁחַת, רָקִיעַ, שָׁבוּעַ. Except of course a final Aleph, e. g., נָבִיא.

5. Observe that מָרִים comes under the class of unchangeable nouns the form being sărrîs, and the ā heightened to compensate for the non-doubling of the r. Observe, also, that in the plurals גּוֹיִם and שָׁמַיִם, the vowel of the ultima is written defectively, contrary to analogy; and that in the case of the latter the accent is on the penult, just as in the case of מַיִם *water*.

LESSON XII.

FEMININE NOUNS (1) FROM MASCULINE NOUNS, WHICH HAD ORIGINALLY TWO SHORT-VOWELS; AND (2) OTHERS, WHICH HAVE THE SAME INFLECTION AND CHANGES.

1. The feminine of nouns, which had originally two short vowels was primarily of the form *ḳăṭălăth*, *ḳăṭŭlăth*, *ḳăṭŭlath*, etc. In the construct state, the Tau is still retained and also the Pathah which preceded it; but, the vowel of the original penult has been lowered to Shewa, and that of the original antepenult, when ă, has been attenuated ordinarily to ĭ, e. g., נִדַּבַת from *năḏăvăth*. In the construct plural the ending וֹת is unchangeable but the same changes in the original vowels of the penult and antepenult have taken place as in the construct singular e. g., נִדְבוֹת.

2. In the absolute singular, the original Tau has been sluffed off, or dropped, and the preceding ă heightened at the end of the word to ā, which is followed by the vowel letter Hê. When the vowel of the original penult was ĭ or ă, it has been heightened to ē or ā respectively, while the antepenultimate vowel is lowered to Shewa, e. g., נִבְלָה, נָדְבָה.

Rem. When the vowel of the original penult was ŭ, it has not been heightened to ō except by way of compensation before gutturals; but the last radical has been doubled to preserve the distinction between nouns of the form *ḳăṭălăth* and those of the form *ḳăṭûlăth*. The former becomes like קְבֻרָּה and comes under Lesson III. C D. The latter becomes like קְטוּלָה and comes, likewise, under Lesson III C D. So, also, with forms like קְטַנָּה from ḳăṭăn, and כְּלִמָּה from kălĭm (?).

3. In the absolute plural, the ending וֹת is appended to the same form as ה in the singular, i. e., the vowel preceding the sufformative is heightened from ă to ā, or

from ĭ to ē, and the vowel of the antepenult is lowered, e. g., גְּדֻלוֹת, גְּדֻבוֹת.

4. Before the grave suffixes כֶם and כֶן, the construct singular remains unchanged; but, before the light suffixes, the final ă is heightened to ā, e. g., גְּדָבְתָם, גְּדָבְתוֹ.

The construct plural remains unchanged before all suffixes, e. g., גְּדֻבֹתֵיכֶם, גְּדֻבֹתָיו.

5. Feminine nouns formed from masculines of the form ă-ĭ, *ḳăṭĭl*, frequently retain the ĭ heightened to ē, even in the construct, especially when the second or third radical is Aleph, e. g., שְׁאֵלַת, מְלֵאַת.

Rem. When the first radical was a Yodh or Wau, it is dropped in nouns of this form, e. g., עֵצָה for יְעֵצָה, שֵׁנָה for יְשֵׁנָה, עֵדָה for יְעֵדָה.

6. When the first radical is a guttural, the vowel of the first syllable often becomes Seghol, e. g., עֶגְלַת, עֶגְלוֹת. When the second radical is a guttural, this takes place also in the case of בֶּהֱמַת.

LESSON XIII.

FEMININE NOUNS FORMED FROM MASCULINES, WHICH HAD ORIGINALLY ONE SHORT VOWEL.

1. The feminine singular of this class of nouns simply adds the feminine endings to the original forms *ḳăṭl*, *ḳăṭl*, *ḳŭṭl*, except that it generally obscures ŭ to ŏ, e. g., מַלְכָּה, מִלְכָּה, מָלְכָּה, but טָמְאָה.

Rem. When the first radical is a guttural with ă or ĭ, the vowel is generally obscured to ĕ, e. g., חֶרְפָּה, חֶלְקָה, חָמְדָה, עֶבְרָה, עֶגְלָה, עֶזְרָה, עֶרְוָה. But אִמְרָה and עַלְמָה.

2. The plurals, however, are generally formed, as if the singulars were derived from masculine nouns with two short vowels, as the following table will show. (See Paradigms XII and XIII).

צְעָקוֹת	עֲגָלוֹת	עֲרֵבוֹת	גְּדֵבוֹת
צַעֲקוֹת	עֲגָלוֹת	עַרְבוֹת	גְּדֵבוֹת
גְּעָרוֹת	חֲרָפוֹת	מְלָכוֹת	דְּבָרוֹת
גַּעֲרוֹת	חֲרָפוֹת	מַלְכוֹת	דִּבְרוֹת

Rem. But the plural of nouns with a short ŭ are formed like חֲכָמוֹת, חָכְמוֹת, and טָמְאוֹת, טֻמְאוֹת.

LESSON XIV.

FEMININE NOUNS WITH SEGHOLATE FORMATIONS.

1. Under this class may be placed all feminine nouns which take a helping vowel in the ultimate of the singular and which are accented on the penult, e. g., יוֹנָקֶת, שִׁבֶּת, אַחֶרֶת, מִשְׁמֶרֶת, מֶמְשֶׁלֶת, פִּילֶגֶשׁ, תִּפְאֶרֶת, מוֹלֶדֶת, צְרֵעַת, דַּלַּת, טַבַּעַת, מַחֲלֹקֶת, בִּשֶּׁת, גְּוִישֶׁת, פָּרֹכֶת, כַּפֹּרֶת, כְּתֹנֶת, קְטֹרֶת, תְּכֵלֶת.

2. Certain nouns which have a different form in the absolute singular, but a segholate form in the construct, are inflected in the plural and before suffixes just as if they were segholates, e. g., גְּבִירָה, גְּבֶרֶת; גְּבִרְתּוֹ; מִשְׁפָּחָה, מִשְׁפַּחַת; מַחֲשָׁבָה, מַחֲשֶׁבֶת; מְרִכָּבָה, מֶרְכָּבָה; מְלֵאכָה, מְלֶאכֶת.

Rem. To be noted, is the peculiar inflection of כְּתֹנֶת, כָּתְנָתוֹ. Also, the unchangeable ā in צָרַעַת, inasmuch as a Resh cannot be doubled. The form is קַטָּלַת, טַבַּעַת.

LESSON XV.

NOUNS FROM ל״ה ROOTS.

1. In masculine nouns from roots whose third radical was originally Yodh the form *ḳᵉṭî* is often found in the absolute and construct singular, e. g., חֶלִי, בְּכִי, אֲרִי (See VII. 5 above). This form comes from an original *ḳăty* or *ḳity* קַטְיְ or קִטְיְ. For inflection, see VII. 5 above.

Rem. 1. Many nouns from these roots drop the final

Yodh entirely in many forms, e. g., אָח, אָב, but in the construct אֲחִי, אֲבִי; אֶל, אֲלֵי; עַד, עֲדֵי. See XVI below.

Rem. 2. For nouns with final Wau, see VII. 6. above.

Rem. 3. But feminines like עֶרְוָה, קֶרְיָה and גַּאֲוָה are regular. See XIII. 1.

2. Nouns of most other formations commonly reject altogether the third radical, and add directly to the second radical the endings ־ֶה, ־ָה, ־ִים, ־ֵי, for the masculine, and ־ָה, ־ַת, ־וֹת, for the feminine, e. g., גֹּלָה, גֹּלַת, גֹּלִים, גֹּלֵי, גֹּלָה, גֹּלַת, גֹּלוֹת; מַחֲנֶה, מַחֲנִים.

Rem 1. The suffixes are added to their apocopated forms, e. g., גֹּלָתוֹ, גֹּלָתָם, גֹּלָיו, גֹּלָיִם, גֹּלָתָם, גֹּלַתְכֶם, גֹּלָתִיכֶם. So, also, with all forms whose penult is unchangeable, e. g., מַעֲשֶׂה, מַחֲנֶה, תִּקְוָה, גַּאֲה, פְּנֶה, עֲלִיָּה, גְּוִיָּה, רֹעֶה, חֹוֶה, עֹלֶה, וֹנֶה, גֹּלֶה, מַרְאֶה, מַשְׂכֶּה, מִשְׁתֶּה, מִשְׁנֶה, מִקְנֶה, מִקְוֶה, מִצְוָה, מַכֶּה, מַטֶּה, מִטֶּה.

Rem. 2. Nouns ending in וֹת from ל״ה roots are unchangeable in inflection, e. g., שְׁבוֹת, דְּמוֹת, כְּסוֹת, פְּדוֹת, תַּזְנוֹת, and even גָּלוֹת.

3. But in nouns which had originally two short vowels, the vowel of the penult is changeable, e. g., in the following: פָּנִים (sing. פָּנֶה), קָצֶה, קָשֶׁה, רָפֶה, שָׂדֶה, and שָׂנֶה, חָמָה, עָנָו, שְׁנַיִם.

Rem. This is true, also, in all other nouns which have in the penult of the absolute singular a heightened vowel, e. g., נָקִי, עָנִי, חָזוֹן, הָמוֹן, הָרוֹן, רָצוֹן. See Lesson XI. 2, 3.

4. When a third radical Yodh is preceded by a fully written Ḥiriq, but one Yodh is written, e. g., נָקִי for נָקִיי; but when this form has a sufformative, or suffix, the Yodh is doubled, e. g., נְקִיָּה, נְקִיִּים, נְקִיּוֹ, נְקִיָּיו.

LESSON XVI.

NOUNS OF PECULIAR FORMATION.

1. Many of the peculiarities of the singular nouns arise from the dropping, or contraction of a letter, e. g., in אָב,

אָח, בֵּן, and שֵׁם the last letter has been dropped. In the constructs אֲבִי and אֲחִי, the original final letter has been retained, as in אֲרִי, גְּלִי.

2. Some of these nouns seem to have plurals from different roots, e. g., אִישׁ and אִשָּׁה; and others of different form, as כֶּלִים. To most of them we shall give a separate discussion.

(1) אָב, probably from a root אבי. Hence the construct singular אֲבִי; אָבִי *my father* from אֲבִיִי; אָבִיו from אֲבִיהוּ from אֲבִיְהוּ. The plural אָבוֹת is for אֲבָיוֹת *ăyâ* contracting into ô, אֲבוֹת, אֲבוֹתָם less seldom אֲבוֹתֵיהֶם.

(2) אָח, probably from a root אחי. Hence, the construct אֲחִי and אָחִי *my brother* (for אֲחִיִי) and אָחִיו (for אֲחִיהוּ). In the plural, the absolute is אַחִים (perhaps for more original אַחְיִים), אֲחֵי (for אַחַיִי), אֲחֵיכֶם (for אַחַיְכֶם). אַחַי (for אַחַיִי), in pause אָחָי (with ă changed to Seghol before Ṭêth with Ḳameṣ), אָחָיו (for אַחָיִו).

(3) אָחוֹת contracted in the last syllable and heightened in the penult probably from אַחַיָת, const. אֲחוֹת; plur. absolute אֲחָיוֹת regular and אָחוֹת contracted; const. אַחְיוֹת regular and אֲחוֹת contracted.

(4) אָמָה, אֲמַת etc. (just like the עָקֵה of צָעָקָה). Plural אַמָהוֹת, אַמְהוֹת (just like עַרְבוֹת) with Hê inserted as frequently in Syriac.

(5) אִישׁ in the singular unchangeable like דִּין of Lesson III. In the plural, there is a poetical form אִישִׁים; but the form in use in prose is אֲנָשִׁים (as if from אֶנֶשׁ or אֶנְשׁ; a form אֱנוֹשׁ is actually found in poetry, but its plural would be אֱנוֹשִׁים) construct אַנְשֵׁי, just like the nouns of Lesson IV, or Lesson V.

(6) אִשָּׁה from אִנְשָׁה, const. אֵשֶׁת, אִשְׁתּוֹ etc.; Plural, נָשִׁים (as if from a singular נָשָׁה) inflected like פָּנִים, Lesson XV.

(7) בַּיִת a singular in every respect like עַיִן, Lesson VII. Plural בָּתִּים, בָּתֵּי, with Qameṣ followed by Dagesh *forte* and accompanied by Methegh, a unique formation, to be remembered but not to be explained. The Methegh is doubtless used to call attention to the Qameṣ in the closed

and sharpened syllable; and the Tau may be doubled to distinguish the form from the participle בָּתִּים from בוּת.

(8) בֵּן, const. בֶּן־ or בִּן־, with 3rd radical elided. Plural בָּנִים, like פָּנִים, as if from singular בָּנָה.

(9) בַּת (from בַּנְתּ from בַּנְוֹת) with suffix בִּתּוֹ for בִּנְתּוֹ; plural, בָּנוֹת as if from singular בָּנָה, like פָּנָה, Lesson XV.

(10) הַר, from *härr;* hence, הָרִים = *harrim,* הָרֵי with unchangeable Qames because of the non doubling of the Resh. הַרְרֵי = regular uncontracted plural construct.

(11) יוֹם, contracted from *yawm,* inflected like טוֹב Lesson III in singular; in plural יָמִים (for יְוָמִים but with second radical dropped instead of contracted), like פָּנִים, Lesson XV.

(12) כְּלִי in singular like פְּרִי. In plural כֵּלִים as if from כֵּלָיִם, כְּלַי for כְּלָיִי.

(13) מַיִם and שָׁמַיִם are found only in the plural and are accented on the penult, the i of the ultimate being short. In the construct plural of מַיִם there are two forms in use מֵי and a reduplicated form מֵימֵי.

(14) עִיר in the singular like דִּין, Lesson III. In the plural like [illegible] Lesson [illegible]. Compare, also, (11) above.

(15) פֶּה root and original form uncertain. Construct פִּי "My mouth", also, פִּי.

(16) רֹאשׁ apparently contracted from רַאשׁ. Plural רָאשִׁים, with unchangeable Qames, apparently from רָאְשִׁים, the ְ thrown back and Aleph quiescent.

(17) שֵׁם, const. שֵׁם or שֶׁם־; plural שֵׁמוֹת, שְׁמוֹת.

(18) שָׁמַיִם from root שמי. See (13) above.

(19) עֵדוּת, עֵדָוֹת or עֵדוֹת.

(20) שָׂדֶה, as if the second radical were Yodh.

(21) עַד, (22) עַל, (23) אֶל, retain in the plural the inflection of nouns like פָּנִים, פְּנֵי.

(24) יָד and דָּם (25) are inflected alike, dropping the vowel of the second radical in the singular and in the plural being inflected like פָּנִים and פְּנוֹת. Notice the Seghol in יֶדְכֶם.

LESSON XVII.

THE VERB.

1. The verb is either transitive or intransitive. Transitive verbs are of the form קָטַל. Intransitive verbs are sometimes of the form קָטַל, but they have, also, the two special forms קָטָל and קָטֹל.

2. The original forms of the transitive verb were:

	3rd person		2nd person		1st person	
	sing.	plur.	sing.	plur.	sing.	plur.
Masc.	ḳăṭălă	ḳăṭălûna	ḳăṭălta	ḳăṭăltŭn	ḳăṭălti	ḳăṭalnû
Fem.	ḳăṭălătă	ḳăṭălânā	ḳăṭălti	ḳăṭăltĕn	com.	

3. Ḳăṭălă drops the ultimate vowel, except before suffixes; retains the penultimate vowel ă, which receives the accent; and heightens the original antepenultimate ă to ā,—the resultant form being קָטַל, but before suffixes קָטָל.

Rem. 1. No one can tell, why the verb form ḳăṭălă is of the form קָטַל, whereas the noun form ḳăṭălŭ-ĭ-ă, is קָטָל, קָטַל. A reason for the difference is found in the principle of the differentiation of forms, i. e., here, a distinction is thus made to the eye and ear between the verb and the noun.

Rem. 2. At the end of a sentence, i. e. in pause, the form קָטַל becomes קָטָל. Before the light suffixes it becomes קָטָל, e. g., קָטָל + הוּ = קָטָלוֹ. Before the grave it becomes קָטַל, e. g., קָטַל + כֶם = קָטַלְכֶם.

4. Ḳăṭălăth sluffs off the final consonant, the final ă being in consequence heightened to ā, to which is given the vowel letter Hê. The penultimate vowel is lowered and the vowel of the antepenult heightened, the resultant form being קָטְלָה.

Rem. 1. The verb probably took the form קָטְלָה to differentiate itself from the feminine noun form קִטְלָה. Both were from an original ḳăṭălăth.

Rem. 2. The original Tau is retained before suffixes, e. g., קְטָלַתְהוּ.

5. Kăṭălûnă drops the *na*, lowers the original antepenultimate ă and heightens the first ă to ā, the resultant form being קָטְלוּ; before suffixes קְטָלוּ.

Rem. 1. The form קָטְלֻן is still found at times, especially in pause.

Rem. 2. Once, perhaps because of a scribal error, Hê appears at the end of the third plural instead of Wau, e. g., שָׁפְכָה. Or, should this be pointed שָׁפְכָה and be taken as a third feminine plural, or singular; or even, as the dual subject would allow, as an example of an old dual form?

Rem. 3. Sometimes an Aleph was appended to the final û, e. g., הָלְכוּא. See Orthog. VIII, 1. This may have been in imitation of the Arabic.

6. In the perfect, the third feminine plural has ceased to be used, the masculine form taking its place; or, perhaps, at times, the feminine singular takes its place.

7. In the first and second persons, the endings are the last syllable of the respective personal pronouns, all easily recognizable, except the first singular, where a change between *k* and *t* seems to have taken place.

Rem. 1. In tabular form the pronouns of the first and second persons may be represented as follows:

	Singular			Plural		
	Ind.	Sufform.	Suffix	Ind.	Sufform.	Suffix
2nd masc.	אַתָּה	תָּה	כָּה	אַתֶּם	תֶּם	כֶם
2nd fem.	אַתְּ	תְּ	כִּ	אַתֶּן	תֶּן	כֶן
1st com.	(אֲנִי) אָנֹכִי	תִּי	נִי	נַחְנוּ	נוּ	נוּ

Rem. 2. For the change from כִּי to תִּי in the first person, compare the change from *t* to *k* in the second person, as between the sufformatives and suffixes. Also, it is to be noted, that in Ethiopic, the sufformatives of the perfect for the 1st and 2nd singular all begin with k.

8. Notice, that in the third person, the accent is on the ultimate, e. g., קָטַל, קָטְלָה, קָטְלוּ.—In the other forms,

it is on the syllable טַל, except in the second plural where it is on the syllable following טַל; the resultant forms being קְטַלְתָּה, קְטַלְתְּ, קְטַלְתִּי, קְטַלְנוּ (all with pretonic Qameṣ) and קְטַלְתֶּם, קְטַלְתֶּן (with the pretonic Qameṣ lowered, since it is no longer before the accent).

9. In intransitive verbs of the forms in ĭ (ē), and ŭ (ō) the following changes are to be noted.

(1) The ĭ of the verbs in ĭ (ē) remains only in the first form i. e. the 3rd sing. masc., e. g., כָּבֵד, where it is heightened to ē. Except in pause, where the original ĭ is sometimes found heightened to ē in the 3rd fem. sing. and in the 3rd masc. plural, e. g., קָרְבָה, קָרְבוּ. In other forms, the ĭ is changed to ă, e. g., קָרְבְתְּ.

Rem. In sporadic cases, an ă is changed to ĭ after the second radical, e. g., יִרְשְׁתֶּם.

(2) The ŭ of verbs in ŭ is heightened to ō, wherever the syllable containing it has the accent. Elsewhere, it is lowered to Shewa, as in the 3rd fem. sing. and 3rd masc. plur.; or obscured to ŏ, as in the 2nd plural, e. g., יָכֹל, יָכְלוּ, יָכְלָה, יָכְלְתֶּם, יָכְלְתֶּן.

10. When the third radical is Tau and the sufformative begins with Tau, but one Tau is written, but is receives Dagesh-*forte*, e. g., פָּרַתָּה, פָּרַתְּ, פָּרַתִּי, פָּרַתֶּם, שָׁבַתֶּן.

11. When the third radical is Nun and the sufformative begins with Nun, but one Nun is written and it receives Dagesh-*forte*, e. g., שָׁכַנּוּ, נָתַנּוּ, טָמַנּוּ, צָפַנּוּ, קָטֹנּוּ, שָׁמַנּוּ.

LESSON XVIII.

THE IMPERFECT KAL.

1. There are three forms of the Imperfect Kal, just as of the perfect, and distinguished in like manner by the vowel after the second radical into Imperfects in ă, ĭ, and ŭ, the latter two of which are always heightened by the accent into ē and ō.

Note. The form in ē is not found in Hebrew in the

regular verb, but appears in the Pê Nun verb יִתֵּן (from יִנְתֵּן), see Lesson XXXIV), and in Pê Wau verbs of the form יֵשֵׁב. (See Lesson XXXVI.)

In the regular verb the ă appears in the Imperfects of intransitive verbs only, e. g., יִכְבַּד from כָּבַד, יִרְגַז from רָגַז, יִקְטַן from קָטַן.

Note. But in irregular, or weak, verbs it appears in verbs transitive, or intransitive, whose second or third radical is a guttural, e. g., יִגְאַל, יִשְׁמַע. This ă is heightened before a final א into ā, e. g., יִמְצָא; also, in pause, for all verbs in ă, e. g., יִרְגָּז; and before most light suffixes, e. g., יִשְׁמָעֵהוּ.

The ŭ appears heightened to ō in the accented syllable of all regular transitive verbs, e. g., יִקְטֹל, תִּקְטֹלְנָה. In forms like יִקְטֹל, the original ŭ is obscured to ŏ before the suffixes כֶם and כֶן, e. g., יִקְטָלְכֶם.

In syllables not having the accent, the original vowels are always lowered, except before certain suffixes. (See Lessons XXVI and following), e. g., תִּקְטְלִי, יִקְטְלוּ, תִּקְטְלוּ; תִּכְבְּדִי, יִכְבְּדוּ, תִּכְבְּדוּ; תִּתְּנִי (for תִּנְתְּנִי), יִתְּנוּ (for יִנְתְּנוּ), תִּתְּנוּ (for תִּנְתְּנוּ).

So that the original vowels ŭ and ă appear as follows in the various forms: יִקְטֹל, יִקְטְלוּ, יִקְטָלְכֶם; יִכְבַּד, יִכְבְּדוּ, יִכְבָּדְהוּ.

The original forms of the Kal Imperfect in ŭ may be tabulated as follows:

	Singular		Plural	
	Masc.	Fem.	Masc.	Fem.
3rd person	Yăḳṭŭlŭ-ī-ă	Tăḳṭŭlŭ-ī-ă	Yăḳṭŭlûna	Tăḳṭŭlnă
2nd person	Tăḳṭŭlū-ī-ă	Tăḳṭŭlina	Tăḳṭŭlûna	Tăḳṭŭlnă
1st person	ʾăḳṭŭlŭ-ī-ă		Năḳṭŭlŭ-ī-ă	

In like manner, yăḳṭălŭ-ī-ă for the Imperfect in ă; and yăntĭnŭ-ī-ă for the Imperfect in ĭ.

Rem. 1. Of the preformatives of the Imperfect,

י is always 3rd person masculine
א „ „ 1st „ singular
נ „ „ „ „ plural
ת „ either 2nd „ , or 3rd fem.

As to sufformatives, וּ is always masc. plural
נָה „ „ fem. „
ִי „ „ 2nd fem. singular.

Note: These preformatives and sufformatives are used in all stems and in all kinds of verbs regular and irregular.

Rem. 2. The original ă of the preformative is attenuated to ĭ with י, ת, and נ, but with א it is obscured to ĕ; e. g., יִקְטֹל for יַקְטֹל, but אֶקְטֹל.

Rem. 3. Occasionally, especially at the end of a sentence (i. e. in pause), the older forms in *ûn* appear in the masculine plural, e. g., יִלְקְטוּן׃ יִרְגְּזוּן׃.

Rem. 4. Once, the Imperfect has וּ instead of Shewa after the second consonant of the third plural, e. g., יִשְׁפּוּטוּ.

Rem. 5. The original vowels of the penult are heightened in pause, e. g., יִשְׁבָּתוּ, תִּשְׁקְטִי, תִּקְרָבוּ. So also, the ă of the ultimate, e. g., תִּקְרַב. But, on the other hand, the original ŭ is obscured before Makkeph, e. g., יִכְתָּב־שָׁם.

LESSON XIX.

THE INFINITIVES, IMPERATIVE, AND PARTICIPLES KAL.

1. The Infinitive Absolute is unchangeable, and never takes article, preposition, nor suffixes. The original form was *ḳăṭâl* which becomes by heightening of ă in the pretonic syllable and by obscuring of â to ô, קָטוֹל.

2. The original form of the Infinitive Construct in most common use was *ḳăṭl* (Ges. § 93t), a form which is ordinarily retained before suffixes, the ŭ being commonly obscured to ŏ in the closed syllable, e. g., קָטְלוֹ. In the absolute and construct forms of the Infinitive Construct, the vowel is shifted to the second radical and heightened, so that the resulting form is קְטֹל.

Before כֶם and כֶן and sometimes before ךָ, as also before Makkeph, this ō becomes ŏ, e. g., קִטְלָכֶם, מְלָךְ־מָלָךְ; לִשְׁמָרֵךְ, but also, בִּשְׁכָבְךָ.

Rem. Other forms of the Infinitive Construct are קְטַל, קִטְלָה, קַטְלָה, קָטְלָה, (קָטְלָה), מִקְטָל, מַקְטָל.

3. The Active Participle קוֹטֵל from ḳâṭîl is inflected according to Lesson X above. The feminine singular is קֹטֶלֶת or קֹטָלָה.

Rem. Intransitive verbs in ē use the form קָטֵל as a participle, e. g., כָּבֵד.

4. The Passive Participle is of the form ḳăṭûl, with the û unchangeable and the ă lowered everywhere, except in the absolute singular, where it is heightened to ā, e. g., קָטוּל, but קְטוּל, קְטוּלָה, קְטוּלוֹ, קְטוּלִי, קְטוּלַי, קְטוּלֵי. See Lesson XI above.

Rem. In a few cases, the form of the passive seems to be active, or reflexive, in sense, e. g., זָכוּר *mindful*.

5. For practical purposes, the Imperative may be looked upon as formed from the second person of the Imperfect by simply dropping the preformative תּ. This requires the insertion of a helping vowel in the feminine singular and in the masculine plural, inasmuch as three consonants would otherwise come at the beginning of the syllable, e. g., תִּקְטְלִי, קִטְלִי, קִטְלִי. This helping vowel is Ḥiriq, but exceptionally Qameṣ Ḥaṭuf.

LESSON XX.

THE INTENSIVE STEMS, PIEL AND PUAL.

1. The intensive stem is formed from the simple stem by doubling the second radical. Thus ḳăṭălă became ḳăṭṭălă; passive ḳŭṭṭălă.

2. (1) The final vowel is dropped as in Kal; (2) the vowel of the original antepenult is retained except in the Perfect Piel, where it is attenuated to ĭ; (3) and the vowel of the original penult is either retained (as it is before the sufformatives of the first and second persons of the Perfect); or (4) attenuated and heightened, as it is in the Piel, where the following letter ends the word, and before

the sufformative נָה of the Imperfect and Imperative; or (5) lowered to Shewa, as it is before all vowel endings and before all sufformatives and suffixes of the participle, except כֶם and כֶן, e. g., (1)(2) קִטַּל (3) קִטַּלְתְּ, קִטַּל, (4) קִטַּל, קִטַּל, תְּקִטַּלְנָה, (5) קִטְּלוּ, מְקִטְּלִים, מְקִטְּלוֹ, מְקִטְּלֶכֶם.

3. Preformatives in these stems take uniformly Shewa; the Aleph of the first person, a Ḥaṭef-Pathaḥ, e. g., יְקִטַּל, יְקִטַּל, מְקִטַּל, אֲקִטַּל.

Rem. The preformatives and the sufformatives, except for the vowel of the preformative, are the same as in the Kal stem.

5. Sometimes, before a final Resh the vowel of the 3rd person singular masculine is heightened to Seghol, e. g., דִּבֶּר. Sometimes, with other consonants, the original ă is retained, e. g., גָּדַל.

6. In pause, vowels will be heightened as usual, e. g., מְלַמֵּד, יְכַבֵּד, לְמַד.

LESSON XXI.

THE CAUSATIVE STEMS, HIPHIL AND HOPHAL.

1. The original forms were hăf'ălă and hŭf'ălă. In both the final ă has been dropped. In the Hophal, the original form has been retained, except for the obscuring commonly of ŭ to ŏ. But in the Hiphil, the following changes of vowels occur.

(1) The ă of the preformative is attenuated in the Perfect to ĭ, e. g. הִקְטַלְתְּ.

(2) The ă of the original penult has in certain cases been changed to î, e. g. in the 3rd person of the Perfect, in the Inf. Construct, in the Participle; in all forms of the Imperfect, except the feminine plural, and in the forms of the Imperative which have vowel sufformatives, e. g., הַקְטִיל, הַקְטִילוּ; הַקְטִיל; מַקְטִיל; יַקְטִיל, יַקְטִילוּ; הַקְטִילוּ.

Rem. 1. The ă of the original penult is retained in the first and second persons of the Perfect, e. g. הִקְטַלְתָּה, הִקְטַלְנוּ.

Rem. 2. This î cannot be accounted for in accordance with the ordinary rules of vowel change. In Arabic the vowel is ă; in Syriac, ē, the original ă being attenuated and then heightened; but in Hebrew the heightened ē seems to have been further changed into î, a change not unprecedented in the Semitic languages in the case of a contracted ê, but not to be expected in the case of a mere heightened vowel.

Rem. 3. In the verb standing alone the syllable with î always takes the accent, e. g., הַקְטִילָה, וַיַּקְטִילוּ, הַקְטִילִי.

But not in the participle, nor before suffixes, e. g., מַקְטִילִים, הַקְטִילָם, וַיַּקְטִילֵהוּ.

Rem. 4. In the Imperfect before נָה, the second syllable has טַל. This טַל appears also in the Inf. Abs., in the first form of the Imperative and in the 2nd person feminine plural of the Imperative, e. g., תַּקְטֵלְנָה, הַקְטֵל, הַקְטֵלְנָה.

2. In the Imperfects and Participles, the Hê of the preformative is dropped, or absorbed, after the preformative, e. g., יַקְטִיל for יְהַקְטִיל, מַקְטִיל for מְהַקְטִיל, יָקְטַל for יְהָקְטַל, מָקְטָל for מְהָקְטָל.

3. There is a form of the Imperfect, called Jussive (see Lesson XXV), shortened, where possible, from the ordinary form of the Imperfect. In the Hiphil, it occurs in the 3rd person singular and in the 2nd masc. sing. under the forms יַקְטֵל, תַּקְטֵל, from יְהַקְטַל, תְּהַקְטַל. The Imperative is formed from this Jussive by dropping, as usual, the preformatives, e. g., תְּהַקְטַל becomes הַקְטֵל; תְּהַקְטִילִי, הַקְטִילִי etc.

4. The Infinitives Absolute are הַקְטֵל, הָקְטַל; the Constructs are הַקְטִיל, with suffixes הַקְטִילוֹ, הַקְטִילָם, and הָקְטַל, with suffixes הָקְטָלוֹ, הָקְטָלָם.

LESSON XXII.

THE REFLEXIVE, OR NIPHAL, AND THE RECIPROCAL, OR HITHPAEL.

A. THE NIPHAL.

1. The original form of the Perfect of the Niphal stem was năḳṭălă. In the regular verb the last ă is dropped, the penultimate ă is (1) unchanged in the 3rd masc. sing. and in the 1st and 2nd persons, (2) lowered before ה and ו to Shewa. The ă of the antepenult is attenuated to ĭ, e. g., נִקְטַל, נִקְטַלְתָּה, נִקְטְלוּ.

2. The Participle is of the same form as the Perfect, except that in the absolute state singular the ă is heightened to ā, e. g., נִקְטָל, נִקְטָל, נִקְטָלִים, נִקְטָלַי, נִקְטָלָה, נִקְטָלוֹת, נִקְטָלֹת.

3. After the preformatives of the Imperfect, Imperative and more common Infinitives, the Nun of the stem is assimilated to the first radical of the verb, e. g., יִנְקְטַל becomes יִקְּטַל; הִנְקְטַל becomes הִקָּטֵל etc. Notice that in these forms, the last vowel is usually attenuated and then heightened to ē, and the penultimate vowel is usually heightened to ā. This ā remains everywhere in the Impf., Imv., and Infinitives, but the ē is lowered to the half-vowel in all forms with a sufformative vowel, e. g., יִקָּטְלוּ, הִקָּטְלוּ, הִקָּטְלִי. Before the נָה of the Impf., and Imv., the original ă is retained, e. g., תִּקָּטַלְנָה, הִקָּטַלְנָה.

4. Note that there are two forms of the Infinitive absolute, הִקָּטֵל and נִקְטֹל. A form אִדָּרֹשׁ with Aleph for Hê occurs once.

5. Before Makkeph and before דְּ, כֶם and כֶן the final ē is changed to ĕ, e. g., הִקָּטְלָכֶם, הִשָּׁמֶר־לְךָ.

6. The vowel of the preformative א of the Imperfect first person singular is as often ĭ as ĕ, i. e. אִקָּטֵל, as well as אֶקָּטֵל.

7. Notice the pausal forms, יִקָּבְרוּ, תִּשָּׁמְדוּן, and the older ending in this latter word and in יֵלָכְדוּן, et al.

B. THE HITHPAEL.

1. The Hithpael is formed by prefixing הִת to the Piel stem, *ḳăṭṭăl*. The syllable קַט remains unchanged in all forms. טַל (1) remains before the endings of the first and second persons of the Perfect; (2) is changed to ē by attenuation and heightening before נָה of the Impf. and Imv., and in all forms without a sufformative; (3) is lowered before all endings consisting of a vowel or beginning with one, and (4) is obscured to Seghol before the suffixes הָ, כֶם and כֶן, e. g., (1) הִתְקַטַּלְתָּה; (2) תִּתְקַטַּלְנָה, הִתְקַטָּל; (3) הִתְקַטְּלוּ, הִתְקַטְּלוֹ, (4) הִתְקַטְּלֶם.

2. The Hê of the preformative is dropped, or absorbed, after the preformatives of the Imperfect and Participle.

3. In the Hithpael of verbs beginning with ס, שׂ and שׁ the ת and the sibilant are transposed, e. g., הִסְתַּתֵּר, מִשְׂתַּכֵּר, הִשְׁתַּמֵּר. In verbs beginning with צ, transposition takes place and the Tau is changed to ט, e. g., הִצְטַדֵּק. In the only case of a Hithpael of a verb beginning with ז, the ת is assimilated to the Zain, e. g., הִזְּכוּ Is. 1. 16.

4. In the Hithpael of verbs beginning with ת, one Tau is written, but it is to be doubled and receives Dagesh *forte*, e. g., הִתַּמֵּם.

When a root begins with Daleth or Ṭeth, the Tau is assimilated to it, e. g., הִדַּבֵּר, הִטַּמֵּא.

Rem. Occasionally, with other letters assimilation occurs.

5. In the Perfect, Imperfect, and Imperative, the original ă of the טַל syllable always heightens to ā in pause, e. g., תִּתַּמָּם, יִטַּמָּא, נִצְטַדָּק, יִטַּמָּאוּ.

6. The Hithpael had apparently originally a passive in use of the form Huthpaal. It is found in but four verbs and but eight times in all. In the case of הֻכְבַּם, the Tau has seemingly been assimilated.

LESSON XXIII.

THE PERFECT KAL WITH SUFFIXES.

1. It may be said in general, that the more original forms of the verb are found before suffixes, e. g., taking (1) ḳăṭălă the earlier form of קָטַל and adding the suffixes we get:

ḳăṭălă + hû = with contraction	קָטְלוֹ
ḳăṭălă + hî (or ha) = with contraction	קָטְלָה
ḳăṭălă + kā, with proper changes	קָטַלְךָ
ḳăṭălă + nî „ „ „	קָטָלַנִי
ḳăṭălă + hem „ „ „	קָטָלָם
ḳăṭălă + hen „ „ „	קָטָלָן
ḳăṭălă + kem „ „ „	קָטַלְכֶם
ḳăṭălă + ken „ „ „	קָטַלְכֶן
ḳăṭălă + nû „ „ „	קָטָלָנוּ; but

ḳăṭălă + ki becomes קָטַלְךְ.

(2) Taking ḳăṭălăth for a second example we get:

ḳăṭălăth + hû = קָטָלַתְהוּ or קָטָלַתּוּ by assimilation backwards.
„ + hî = קָטָלַתָּה
„ + hem = קָטָלַתָּם
„ + kem = קָטָלַתְכֶם etc.; but קָטָלַתְּךָ.

2. Forms ending in a vowel append the pronouns directly without further change than the proper heightening, lowering etc. of the vowels on account of changes of accent, and the casual contractions arising from *hu* preceded by ă or i, e. g., קָטְלוּ, but קָטָלוּהוּ; קָטַלְתָּה, but קָטַלְתּוּ; קָטַלְתִּי, but קָטַלְתִּיו.

3. The ending of the 2nd person plural is changed to תוּ for both genders, e. g., קָטַלְתּוּהוּ, קָטַלְתּוּם; the ending of the 2nd fem. sing. reverts to, or rather retains, the more original ending תִּי, e. g., קָטַלְתִּיהוּ, thus coming to coincide in form with the first person singular, which has, also, the form קָטַלְתִּי before suffixes.

4. Notice the exceptional forms קָטַלְךְ, קָטַלְתְּךָ, where the union vowel ŭ is employed heightened with the accent to

ē and obscured without the accent to ĕ. Notice, also, the forms קִטַּלַנִי but קִטָּלָנוּ; קִטַּלְתַּנִי but קִטַּלְתָּנוּ. For none of these variations is a satisfactory reason known.

LESSON XXIV.

PERFECTS OF DERIVED STEMS WITH SUFFIXES.

1. All forms of the first and second persons are unchangeable before suffixes, e. g., הִקְטַלְנוּהוּ, קִטַּלְתִּיהוּ. Except, of course, that the ā of תָּ becomes ă before נִי, e. g., הִסְגַּרְתַּנִי.

2. The 3rd fem. sing. becomes קִטְּלַת and הִקְטִילַת with the same changes as in Kal; the 3rd plur. remains unchanged, i. e., קִטְּלוּ and הִקְטִילוּ; the 3rd masc. sing. becomes קִטֵּל and הִקְטִיל, just as in Kal קָטַל. Examples: קִטַּלְתּוּ, הִקְטִילָתָה; קִטְּלָהוּ; הִקְטִילוּהוּ; קִטַּלְתֶּם, הִקְטַלְתֶּם.

Rem. קִטֵּל becomes קִטֶּל before דְּ, כֶּם and כֶּן, e. g., קִבֶּדְךָ, קִבֶּצְכֶם.

3. Notice, that the second radical of the Piel, where it is followed by a half-vowel only, often loses its characteristic doubling, e. g., בִּקְּשָׁהוּ.

LESSON XXV.

THE COHORTATIVE AND JUSSIVE.

1. The so-called Cohortative is formed by appending הָ to the first person singular or plural of the Imperfect. In all stems except Hiphil, this causes the lowering of the preceding vowel, e. g., אֶקְטְלָה, אֶקְטֳלָה, אַקְטָלָה; but אַקְטִילָה.

Rem. 1. In pause, however, the vowel preceding the ending הָ is heightened, e. g., אֶקְטְלָה, but אֶקְטֹלָה, אֶרְגְּוָה, אֶתְקַטָּלָה. Notice, that in the Niphal and Hithpael, as well as in the Kal Imperfect in ă, the vowel is heightened from the original ă to ā.

Rem. 2. This הָ is the fragment of a primitive ending *ăn*, the Nun of which is often retained before suffixes of

the 3rd pers. sing., and perhaps of the 2nd masc. sing., e. g., אֶקְטְלָה, אֶקְטְלָנָּה, אֶקְטְלָךְ.

2. The Cohortative denotes intention, determination, or, in the case of the plural, exhortation. It is to be rendered in English by the auxiliaries "will", "let", etc.

3. The Jussive is a shortened form of the Imperfect, where shortening is possible, to denote command etc. In Arabic, there are five moods of the Imperfect, which may be called Indicative, Subjunctive, Jussive, and Energetic (two of this last). The first three have the endings of the cases of the noun ŭ, ă, ĭ. The Jussive in Hebrew corresponds to the last of these, but has a distinctive form, (now that the old endings have been dropped), only in the Hiphil, e. g., יַקְטִיל becomes יַקְטֵל and תַּקְטִיל, תַּקְטֵל. In forms of the Hiphil with endings, the Jussive coincides in form with the ordinary Imperfect.

Rem. 1. The term Voluntative is used to embrace the Cohortative and Jussive.

Rem. 2. It will be seen, that the first form of the Hiphil Imperative is formed from the Jussive by dropping the preformative, i. e., הַקְטֵל from תְּהַקְטֵל.

4. The cohortative ה֫ is sometimes appended to the Imperative, changing its meaning from a command to a request, or prayer. In Kal, this cohortative Imperative takes either the form שָׁמְרָה, or the form שִׁכְבָה; though the form צָרוֹבָה is found once.

LESSON XXVI.

THE IMPERFECT WITH SUFFIXES.

1. The forms of all Imperfects ending in a vowel remain unchanged before suffixes, e. g., יִקְטְלוּהוּ, יִקְטְלוּהִי, יִקְטְלוּהוּ, יִקְטִילוּהוּ.

Rem. Instead of the feminine plural, the masculine plural is employed before suffixes.

2. Of the forms of the Imperfect ending in a consonant before suffixes.

(1) The Hiphil forms remain unchanged, e. g., יַקְטִילֵהוּ, יַקְטִילָהּ, יַקְטִילָם.

(2) The Kal forms in ŭ and Piel forms (a) obscure the last vowel before, ךָ, כֶם and כֶן, e. g., יִקְטָלְכֶם; יִקְטָלֵךְ, יִקְטָלְךָ, יִקְטָלְכֶם, יִקְטָלְכֶן.

b. Lower the last vowel everywhere else, e. g., יִקְטָלֵהוּ, יִקְטָלֵהוּ.

Rem. 1. The union vowels are

(1) ָ occurring only before הָ, e. g., יִקְטָלָהּ, יִקְטָלָהּ;

(2) ַ „ before ךָ, כֶם and כֶן, e. g., יִקְטָלֵךְ, יִקְטָלְךָ;

(3) ֲ „ everywhere else, e. g., יִקְטָלֵהוּ, יִקְטָלֵהוּ.

Rem. 2. Once, the original ŭ is written with Shurek, e. g., תִּשְׁמוּרֵם. Probably, a scribal error.

Rem. 3. In Imperfects in ă, the original ă (1) is retained before ךָ, כֶם and כֶן, e. g., יִלְבַּשְׁךָ, יִלְבַּשְׁכֶם.

(2) Is heightened, everywhere else into ā, e. g., יִשְׁמָעֵהוּ, יִשְׁמָעֶהָ.

3. In about four hundred cases in all, the old Nun of the energetic or cohortative form of the Imperfect is retained before the suffixes of the 3rd person singular. With הוּ, this Nun contracts into נּוּ; with הָ, into נָּה, e. g., יִשְׁמָרֶנּוּ, יִשְׁמָרֶנָּה.

Rem. 1. In addition to this visible, and certain, employment of Nun (called by grammarians, Nun epenthetic, demonstrative, or energetic), a Dagesh *forte* is often found in the first letter of the suffix of the second masculine singular, which may have been rightly inserted by the Massoretes for an assimilated Nun energetic, e. g., תִּשְׁמָרֶךָּ.

Rem. 2. A Nun epenthetic is found, also, occasionally before נִי, e. g., יְכַבְּדֶנֵנִי.

4. To forms of the Imperfect ending in a consonant, וֹ and הּ are sometimes appended instead of הוּ and הָ, e. g., יַשְׁפִּילֵהוֹ, יִרְדְּפוֹ. For ךְ of the second feminine singular כִי is occasionally found, e. g., אֶזְכָּרֵכִי.

5. A change of accent in a form with a suffix will, of course, cause a heightening and lowering of the changeable vowels in the word, e. g., אַקַּבֶּצְךָ in pause for אֲקַבֶּצְךָ.

6. Sometimes in forms of Imperfects in ŭ with suffixes, a compound Shewa appears instead of the usual simple Shewa, e. g., אֶכְתֳּבֶנָּה, אֶרְדֳּפֵךְ.

LESSON XXVII.

THE INFINITIVE, IMPERATIVE, AND PARTICIPLE WITH SUFFIXES.

A. THE INFINITIVES.

1. The Infinitive construct alone is used with suffixes.

2. The ordinary Infinitive construct Kal takes its original form ḳŭṭl before light suffixes, with the ŭ obscured to ŏ, e. g., קָטְלוֹ. But before grave suffixes, it takes the form קָטֹל, e. g., קָטְלָם.

Rem. 1. Both forms are found before ךָ, e. g., לִשְׁמָרְךָ, לִשְׁכָּבְךָ.

Rem. 2. The Infinitive construct Kal frequently unites with the preposition ל so as to form, as it were, one word. In such cases, the vocal Shewa becomes silent, e. g., לִשְׁפֹּךְ.

Rem. 3. The Infinitives are all inflected exactly like nouns, except that they take the objective suffix נִי for *me*. Of course, seeing that Infinitives are true *verbal* nouns, they must be treated as having the uses of both verb and noun. So, לְדָרְשֵׁנִי *to seek me;* but לְקִבְצִי *for my gathering*, i. e., *that I gather*.

Rem. 4. Before suffixes the Infinitive of בָּגַד becomes בְּגֹד, e. g., בְּבִגְדוֹ; that of שָׁכַב, before the grave suffixes becomes שְׁכַב, e. g., שְׁכַבְכֶם, before the light suffixes שָׁכְבְ, or שָׁכָב, or שְׁכַב, e. g., שָׁכְבְךָ, or שָׁכְבוֹ or שְׁכָבָהּ.

Rem. 5. Other forms of the Infinitive construct Kal beside the common form are שָׁכַב, וְקָנָה, אֲהַבָה, מִגְרַשׁ, מָמְשָׁלֶת etc.

3. Of the Infinitives of the derived stems, it need only be remarked, that the Infinitive Hiphil is unchangeable like the nouns of Lesson III; and that the others change only the vowel of the ultimate like the nouns of Lessons IX and X.

B. THE IMPERATIVES.

1. Imperatives being really nothing but abbreviated Imperfects, i. e., the second person of the Imperfect Jussive with the preformative Tau omitted, affix the suffixes in exactly the same way as the Imperfect, with of course, the necessary consequent vowel changes, e. g., קָטְלָהוּ, תִּקְטְלָהוּ with the vowel ŏ as helping vowel; קָטְלִיהוּ, תִּקְטְלִיהוּ, with ĭ as helping vowel; קַטְּלֵהוּ, תְּקַטְּלֵהוּ; קַטְּלִילֵהוּ, תְּקַטְּלִילֵהוּ, with the original characteristic Hê appearing in the Imperative.

Rem. With the form of the 2nd masc. sing. Imv. with the suffix 3rd masc. sing. קָטְלוֹ may be compared יִקְטְלוֹ, the less common form of the Imperfect with the 3rd masc. sing. suffix.

C. THE PARTICIPLES.

1. The Participles are inflected exactly like nouns. It must be remembered, however, that they are really verbal adjectives, when they are true participles; and as such they take objective pronouns, not possessive, or adjective, pronouns, e. g., מְקַבְּצָם *gathering them;* מְקַדִּשְׁכֶם *sanctifying you;* רְדָפָם *pursuing them;* שִׁלְמֵי רָע *paying me evil.*

Often, these adjectives have come to be indistinguishable from *nomina agentis*, e. g., רֹדְפֵיהֶם *their pursuers*, or *those persuing them.*

Rem. The Participle Hiphil is unchangeable in inflection; the Participles Kal, Piel, and Hithpael, are inuceted like the nouns in Lesson X; the Participles Niphal, Pal, and Hophal, like the nouns in Lesson IX.

LESSON XXVIII.

THE PERFECT AND IMPERFECT WITH WAU CONVERSIVE.

1. Wau conversive, or consecutive, is the conjunction Wau employed in immediate connection with the Perfect, or Imperfect, of the verb, with the result that the Perfect

following it, takes no longer the *nuances* of the Perfect but of the Imperfect; and the Imperfect following it, takes the *nuances* of the Perfect.

2. With the Perfect, the Wau has the pointings of ordinary Wau conjunctive; but the accent of קָטַלְתָּה and קָטַלְתִּי is in most verbs thrown from the penult to the ultimate, when the Wau is conversive, e. g., וְקָטַלְתָּה but וָקָטַלְתָּה, so וְקָטַלְתָּ, וְקָטַלְתְּ, וְקָטַלְתִּי etc. No change, however, takes place in the other seven forms of the Perfect, nor in the Perfect with Suffixes, when the Wau is conversive. The *context* alone must determine the character of the Wau.

3. With the Imperfect, Wau conversive takes the same pointings as the article with nouns. That is, before י, ת, and נ, the Wau conversive takes Pathaḥ and the preformative is doubled, e. g., וַיִּקְטֹל, וַתִּקְטֹל, וַנִּקְטֹל. Since Aleph cannot be doubled, the Wau conversive takes ā before the first person singular, e. g., וָאֶקְטֹל.

Rem. Where the Yodh of the preformative has a half-vowel, it cannot be doubled. Where it is not doubled in pronunciation, it does not receive Dagesh *forte* in writing, e. g., וַיִּקְטֹל, but with Wau conjunctive וַיִּקְטֹל.

4. In the Hiphil, the Jussive form is used with Wau conversive, e. g., וַיַּקְטֵל, וַתַּקְטֵל, but with suffixes וַיַּקְטִלֵהוּ.

5. Sometimes, Wau conversive causes the accent of the Imperfect to be thrown from the ultimate to the penult, e. g., in the irregular verb וַיָּקָם for וַיָּקָם.

6. After a protasis which may be resolved into an Imperfect, may come a perfect with Wau conversive, i. e., בַּאֲשֶׁר אֶפְקֹד = בְּיוֹם פָּקְדִי, *when I shall visit*. Hence, the perfect וּפָקַדְתִּי in the apodosis.

LESSON XXIX.

PÊ GUTTURAL VERBS.

1. The quickest way of mastering the guttural verbs is to apply the rules as to the peculiarities of gutturals to the original forms of the regular verb, observing the

variations arising from the fact that at times the changes are based not on the original forms but on the forms in actual use, e. g., the original form of the Kal Imperfect was יִקְטָל. If the first radical were a guttural, this would become יַעְטֹל, which is the form now in actual use. But in the Piel of גָּאַל, we find גִּאַל, a form based not on קִטֵּל but on קִטַּל. So, also, in נֶעֱמַד, הֶעֱמִיד, and יֶחֱזַק, the Seghols arise from the forms נִקְטַל, הִקְטִיל. and יִכְבַּד, not from the forms נִקְטַל, הַקְטַל, and יַכְבֵּד. So, also, יַעֲמֹד arises from יִקְטֹל rather than from יִקְטַל.

2. The Pê Guttural verbs (1) take compound Shewa, wherever the regular verb has simple vocal Shewa, e. g., עֲמַדְתֶּם, עֲמֹד, עֲמוּדָה, עָמְדוּ etc.

(2) Take a compound Shewa when the guttural would end the first syllable and hence have simple Shewa, e. g., יַעֲמֹד, יֶחֱזַק, נֶעֱמָד, נֶעֱמָד, הֶעֱמִיד, הֶעֱמַד etc.

(3) Change this compound Shewa into the corresponding short vowel, wherever it would come before another Shewa, e. g., יַעַמְדוּ, יֶחֱזְקוּ, נֶעֱמְדוּ, הֶעֱמְדוּ etc.

Rem. An exception to this rule occurs in the Imperative of the Kal in forms with vowel sufformatives, e. g., חִזְקוּ, עִמְדִי.

(4) In forms where the first radical should be doubled, heighten the preceding vowel, e. g., in Niphal wherever the Nun should be assimilated to the following consonant, e. g., הַעָמֵד, נֶעָמֵד.

3. Sometimes, at the end of a syllable, a guttural takes a silent instead of a compound Shewa; and in such cases, the preformatives prefer Seghol to Pathah, e. g., יֶחְסַר, נֶחְשַׁבְנוּ, נֶעְתַּק, נֶאְדַּר, נֶחְפַּדְתָּ. But where the ultimate vowel is Ḥolem, the preformative may take Pathaḥ, e. g., תַּחְבֹּל, יַחְמֹל; and, also, in some other cases, e. g., יַחְסְרוּ.

Rem. Seghol is also found sometimes in Imperative forms of the Kal with cohortative ה, e. g., אֶסְפָּה.

4. When the first radical is an Aleph, a Ḥaṭef-Seghol is employed in the Inf. Cons. and Imv. Kal instead of Ḥaṭef-Pathaḥ, e. g., אֱכֹל, וֶאֱמֹץ.

Rem. But when a suffix is added, the compound Shewa becomes Ḥaṭef-Pathaḥ, e. g., אֲכָלְכֶם, אֲכָלָךְ.

LESSON XXX.

PÊ ALEPH VERBS.

1. Pê Aleph verbs are but a sub-class of Pê Guttural verbs, from which they differ in but a few particulars. In fact, most verbs whose first radical is Aleph belong to the Pê Guttural class, there being but seven verbs altogether beginning with Aleph, that have any of the peculiarities of the so-called Pê Aleph verbs. These are אָמַר, אָכַל, אָחַז, אָסַף, אָבַד, אָבָה, and אָפָה.

2. The distinguishing peculiarity of Pê Aleph verbs is, that the preformative of the Imperfect Kal has the vowel ô in which the Aleph quiesces, e. g., יֹאמַר, יֹאכַל, יֹאחַז, יֹאסֵף, יֹאבַד, יֹאבֶה, and יֹאפֶה.

Rem. Two of these verbs have other forms, i. e., אָסַף and אָחַז, to wit: יֶאֱסֹף and יֶאֱחֹז. Two of them are Lamedh Hê as well as Pê Guttural, to wit: אָבָה and אָפָה and will be treated in Lesson XL.

3. In the first person singular of the Kal Imperfect, the Aleph of the root is dropped, e. g., אֹמַר, אֹכַל.

4. The Inf. cons. and the 2nd sing. masc. have a Ḥaṭef-Seghol with the Aleph אֲכֹל; but when a suffix is added it becomes Ḥaṭef-Pathaḥ, e. g., אֲכָלְכֶם, אֲכָלֵךְ.

5. The forms of the Imperfect of אָמַר and אָחַז, which are without sufformatives or suffixes, throw back the accent to the penult, when they have Wau conversive, e. g., וַיֹּאמֶר, וַיֹּאחֶז. In pause, however, we find וַיֹּאמַר etc.

LESSON XXXI.

AYIN GUTTURAL VERBS.

1. Wherever the regular verb has vocal Shewa under the second radical, these verbs have a compound Shewa, e. g., שָׁחֲטוּ, יִשְׁחֲטוּ, שָׁחֲטוּ, שֹׁחֲטִים, נִשְׁחֲטוּ, יִשָּׁחֲטוּ etc.

2. Since gutturals could not be doubled by the Hebrews, wherever the second radical should be doubled to constitute the form, as in the Piel, Pual, and Hithpael stems, it remains single; but the preceding vowel is often heightened by way of compensation, e. g., מַאַן.

3. More often, however, the vowel remains unheightened, the consonant being said to be implicitly doubled, e. g., בְּעַר, שְׂחַק, רְחַץ, נְחַם, כְּהַן, כְּחַד, טְהַר, נְאַץ. This is more common than not, when the second radical is Ḥeth, or Hê, or Ayin; but with Aleph, the vowel is usually heightened.

4. In the inflection of the intensive stems, verbs whose second radical is Resh, seeing that it cannot be doubled, always heighten the preceding vowel, e. g., בָּרַךְ, בֵּרַךְ, בֹּרַךְ.

Rem. They frequently, also, take compound Shewa under the Resh, e. g., בָּרְכוּ, בֵּרְכוּ.

5. When a helping vowel comes before a guttural with compound Shewa, the vowel is made to correspond with the Shewa, e. g., שַׁחֲטוּ.

6. In the Imperfect and Imperative Kal, the common vowel is ă, e. g., יִשְׁחַט, אָבְחַר, אָשְׁאַל, בְּחַר.

Rem. This ă is heightened before light suffixes, e. g., יִשְׁחָטֵהוּ, יִגְאָלֵנוּ; but remains before the grave suffixes and הֶ, e. g., יִגְאַלְכֶם.

7. Always before Ḥeth with Qameṣ, and once before Hê with Qameṣ, the ă becomes Seghol, e. g., הַטָּהֳרוּ.

8. Sometimes, with Wau conversive, the accent is thrown back to the penult. In such cases, of course, the vowel of the ultimate is shortened, e. g., וַיְבָרֶךְ, וַיִּלָּחֶם.

LESSON XXXII.

LAMEDH GUTTURAL VERBS.

1. At the end of a word, after all heterogeneous vowels, the gutturals Hê, Ḥêth, and Ayin, take before them a helping vowel Pathaḥ, called Pathaḥ *furtive*. This vowel does not form a syllable, nor influence the accent; but is inserted, simply because of the difficulty of pronouncing

these gutturals after any vowels but ă and ā, e. g., שְׁלַח, הִשְׁלִיחַ, שָׁלוּחַ, שְׁלוּחַ.

Rem. The heterogeneous vowels are ē, î, ō, ô, and û, i. e., all but ă, ā, e. g., שָׁלַח, יִשְׁמָע. The naturally long vowels ê and â do not occur in the guttural verb.

2. The Imperfect and Imperative Kal, with one or two exceptions, take ă as the characteristic vowel, e. g., יִשְׁלַח, שְׁלַח, תִּשְׁלַחְנָה.

Rem. 1. In pause, and before light suffixes, this ă is heightened to ā, e. g., יִשְׁמָע, יִשְׁלָחֵךְ, תִּבְלָעֵנוּ; but יִשְׁמַעֲכֶם.

Rem. 2. Before vowel sufformatives, this a is lowered, e. g., שִׁלְחוּ, יִשְׁלְחוּ.

3. Wherever the regular verb has vocal Shewa under the third radical, the guttural has Ḥaṭef-Pathaḥ, e. g., יִשְׁלָחֵךְ, מְנָעֲךָ.

4. Wherever the regular verb has silent Shewa under the third radical Lomadh Guttural verbs have, also, silent Shewa, e. g., שְׁלַחְתִּיךְ, שְׁמַעְתֶּם.

5. Before the ending תְּ of the second feminine singular, these verbs take a helping vowel ă, to aid in the pronunciation, e. g., שָׁלַחַתְּ. It does not, however, constitute a syllable.

Rem. 1. In pause the ă of the accented syllable is heightened to ā, e. g., פָּשָׁעַתְּ.

Rem. 2. Before suffixes, this form is regular, e. g., שְׁלַחְתִּיהוּ.

Rem. 3. This helping vowel is to be compared with the helping Seghol in forms like מָלְכָה, קָטְלָה, and more particularly to the helping Pathaḥ in נַעַר and דַּעַת and בִּרַחַת. The question arises as to whether the point in the ת is in this case Dagesh *forte*, or Dagesh *lene*. Origin and analogy would be in favor of Dagesh *forte*.

6. Feminine participles of these verbs may have the form שֹׁלַחַת, pause שֹׁלָחַת.

7. Forms which in the regular verb have Ṣere, derived probably from an original ă, retain the original ă, except in pause, where Ṣere usually occurs, e. g., יִבְקַע, הַצָּלַח, וַיִּכְנַע.

Rem. In the forms of the Hiphil Jussive and Impera-

tive, where the guttural is the final letter, nothing but ă is ever found.

Participial forms, however, which have an ē heightened from an original ĭ, keep the ē in the absolute, but change it to ă in the construct, e. g., מְוַבֵּחַ, שֹׁלֵחַ.

LESSON XXXIII.

LAMEDH ALEPH VERBS.

Lamedh Aleph verbs are but a sub-class of Lamedh Guttural verbs, but on account of the peculiar weaknesses of Aleph, they require a separate treatment to record their variations from the other Lamedh guttural verbs.

1. Wherever Aleph is the final letter of the syllable, the preceding vowel, if short, is heightened and the Aleph quiesces, e. g., מָצָא, נִמְצָא, הָמְצָא; מָצָאתִי; תִּמְצָאנָה; רֹפֵא, מְטַמֵּא, שָׂנֵאתָ. Or, it is attenuated and heightened, e. g., יִטְמָא, יִמְלָא, טִמֵּא, מַלֵּא; נִמְצֵאתָ, הִמְצֵאתָ, טִמֵּאתָ.

Rem. 1. Every Aleph which in the regular verb would come at the end of a syllable, quiesces in these verbs in the preceding vowel, which is then heightened.

Rem. 2. Where Tau follows a quiescent Aleph, it is aspirated, e. g., מָלֵאתָ.

2. The original characteristic ŭ of the Hophal is sometimes retained, e. g., הָמְצָא.

3. At the beginning or in the middle of a syllable and before suffixes the Aleph is treated as the other gutturals, e. g., שְׂנָאַךְ, יִרְפָּאֵם, יִמְצָאוּ, מָצְאוּ.

Rem. In the form שְׂנָאַךְ, the guttural has attracted the original vowel from ĭ to ă, so as to cause it to harmonize with the Ḥaṭef-pathaḥ of the Aleph.

LESSON XXXIV.

PĒ NUN VERBS.

1. When the Nun occurs at the end of the initial syllable, it is assimilated to the following consonant, e. g., הִנִּישׁ, נִגַּשׁ, יִגַּשׁ.

Rem. 1. In the Hophal, this causes the retention in the sharpened syllable of the original ŭ, e. g., הֻגַּשׁ.

Rem. 2. Before gutturals the Nun ordinarily remains, e. g., הִנָּחַלְתִּי, יִנָּצֵף, יִנְהַג, יִנְעַם. So, also, sometimes before other consonants, e. g., יִנְטֹר, הִנְדַּף.

On the other hand, the Nun is sometimes dropped and the guttural implicitly doubled, e. g., נִחַם for נִנְחַם; or the preceding vowel is heightened by way of compensation, e. g., יַחַת for יִנְחַת.

2. In the Imperative and Infinitive Construct Kal of verbs whose Imperfect is in ă or ē (from ĭ), the Nun is dropped, e. g., גַּשׁ, תֵּן; גָּשֶׁת, תֵּת (See 3 (3) below).

Rem. 1. If the third radical is a guttural the Infinitive has ă, both as main and as helping vowel, e. g., נַגַּעַת, קָחַת (from לָקַח, see below).

Rem. 2. This Infinitive is a feminine segholate. Before suffixes, the ă either remains, or is attenuated to Ḥiriq, e. g., נַגְּעָתוֹ, גָּשְׁתּוֹ, קָחְתּוֹ, תִּתּוֹ.

Rem. 3. When the Nun is followed by a guttural, it is not dropped, e. g., נָהַג.

Rem. 4. When the Imperfect is in ō (from ŭ), the Nun is not dropped, e. g., נָפֹל.

Rem. 5. The cohortative form of the Imperative is גְּשָׁה, שָׁקָה.

3. The verb נָתַן "to give" has the following peculiarities.

(1) The final Nun is assimilated to the sufformatives beginning with Tau, e. g., נָתַתָּה for נָתַנְתָּה etc. When the sufformative is נוּ, but one Nun is written, but it receives Dagesh *forte*, e. g., נָתַנּוּ

(2) The Imperfect and Imperative have the vowel ĭ, heightened to ē, e. g., יִתֵּן, תֵּן. Of course, this ē is lowered to Shewa before vowel sufformatives and likewise before light suffixes, e. g., יִתְּנוּ, תְּנוּ, יִתְּנֵהוּ, תְּנֵהוּ, אֶתְּנָה; and shortened to ĕ before כֶם, e. g., אֶתֶּנְכֶם.

(3) The Infinitive construct drops both Nuns and takes the form תֵּת (from נַתֵּנַת). Before suffixes this becomes תֵּת, e. g., תִּתּוֹ, תִּתְּכֶם.

4. The verb לָקַח, "to take", is treated in the Kal Imperfect, Infinitive construct, and Imperative, as if the first radical were Nun, i. e., we get the forms יִקַּח, יִקְחוּ, יִקְחֶהוּ; קַח, קְחוּ, קְחֶהוּ; קְחִי, קְחָה, קְחֶהָ; קְחוּ, קְחֶתּוּ, קְחֶתְכֶם.

LESSON XXXV.

AYIN AYIN VERBS. or Double Ayin Verb.

In these verbs, the second and third radicals are alike. Some of the forms are always uncontracted and regular, as the Infinitive absolute and Participles of Kal, e. g., סָבוֹב, סוֹבֵב, סָבוּב, — all forms which have in them an originally long vowel. Other forms are sometimes contracted and sometimes not, e. g., שָׁמֵמוּ, סַבּוּ. It will be understood, that in what follows, we are treating of the irregular or contracted forms alone, since the regular forms need no further treatment.

Note that the contractions are usually made from the original forms.

1. When the verbal form has no sufformative only two radicals are written and the original vowel is generally thrown back on the first, e. g., סַב, נָסַב.

Rem. 1. In the Perfect and Participle Niphal, the throwing back of the vowel of the 2nd radical to the ~~second~~ 1st causes the vowel of the ~~first radical~~ preformative to be left in an open unaccented syllable. This vowel is then heightened to ā, e. g., נָסַב, נָסָב, נָסָב (cons. נְסַב), from נִסְבַּב, נַסְבָּב.

Rem. 2. In the Hiphil, the original ă of the second radical is thrown back to the first, where it sometimes remains unchanged, e. g., הַפֵּר and with gutturals הַרַע. אָרַע. But generally, it is changed to Tsere, which remains before vowel sufformatives, the following consonant being then doubled, e. g., הֵסֵב, הֵסַבּוּ, יָסֵב, יָסַבּוּ. Notice, that in the Hiphil Perfect, the vowel of the preformative, when before the tone, is Tsere.

Rem. 3. The Hophal throws back the vowel of the ~~third~~ 2nd radical to the ~~second~~ 1st and heightens the vowel

Great tendency in these verbs is to unite the 2nd & 3rd radicals, and consequently to double the 2nd radical.

of the preformative into unchangeable û, e. g., הוֹסַב, הוֹסַבּוּ.

2. When the verbal form has a sufformative consisting of a vowel, it is affixed directly to the second radical, which is then doubled, e. g., סַבּוּ, יְסֹבּוּ; נָסַבּוּ, הִסַּבּוּ; הַסַּבּוּ, יָסַבּוּ; הוּסַבּוּ, יוּסַבּוּ.

Rem. When the second radical is a guttural or Resh, the vowel is heightened if possible, e. g., רָעוּ, רָעָה. But הַפְרוּ, יָרֵעוּ.

3. When the sufformative of the Perfect begins with a consonant a long vowel o is inserted between the sufformative and the doubled second radical, e. g., סַבּוֹתָה, נָסַבּוֹתָה, הוּסַבּוֹתָה, הַסַּבּוֹתָה.

Rem. The affixing of these endings causes no change in the Kal and Hophal except the doubling of the last radical. In the Niphal and Hiphil, however, it causes the lowering of the vowel of the preformative.

4. When the sufformative of the Imperfect begins with a consonant (i. e. in the feminine plural) the accented union vowel ֶ is employed, e. g., תְּסֻבֶּינָה. The withdrawal of the accent from the sharpened syllable causes its vowel in the Kal and Hiphil to revert to the pure short vowel and the pretonic vowel of the preformative to be lowered, e. g., תְּסֻבֶּינָה, תְּסֻבֶּינָה.

5. In Ayin Ayin verbs, there are found different contracted forms of the Kal Imperfect, e. g., יָסֹב, יָסֹב, יָקֹל, יָרוֹן(?), but יָחֹנֵן.

Rem. The form יָסֹב is exactly like the Imperfect in ŭ of the Pê Nun verb, e. g., יִפֹּל, יִפְלוּ; יִסַּב, יִסְבּוּ.

6. The Niphal יָסַב is contracted from יִנָּסַבּ. In יִסַּבּוּ, the ס is doubled because of the assimilated Nun, and the ב for the two radicals.

7. The Participle of the Hiphil changes the î of the ultimate to ē, and the ă of the penult to ē, thus making מֵסֵב. Before endings this becomes מְסֵבּ, e. g., מְסֵבָּה, מְסֵבִּים, מְסֵבָּם, etc.

8. When suffixes or sufformatives are added to the contracted forms, the vowels of the sharpened syllables are always short and pure and the vowel of the preformative is always lowered, e. g., סַבּוֹ, וְסַבֵּהוּ; הַסְבּוֹ, וְיַסְבֵּהוּ.

Rem. When the contracted consonant is a guttural or Resh, the preceding vowel remains long even when the accent is withdrawn, e. g., מְצֵרָה, וְיִפְרְנוּ, תִּרְעֵם.

9. The following extraordinary forms are to be noted (1) רָנִי with ŏ in the sharpened syllable instead of the more usual ō or ŭ. (2) תֵּרוֹן with ō written fully. (3) נְשַׁהֲנוּ perhaps for נְשַׁהוֹנוּ. (4) יְשָׁלֵךְ instead of יְשַׁלֵּךְ. (5) הָשַׁמָּה for הוּשַׁמָּה. (6) נָבְלָה for נִבְּלָה. (7) יְחָנֵךְ for יְחַנֵּךְ. (8) תַּחֲתוּ = תְּתַפְּבוּ in pause; but better to take it here as an intransitive Kal like יַקַל (9) נָשַׁמָּה Niphal Perfect; נְשַׁמָּה Niphal Participle; נָסַבָּה Hiph. Imperfect; נְסַבָּה Hiph. Imperfect with fem. suffix.

10. In the Intensive stems of these verbs, three forms are used:

(1) A regular form like קִטֵּל, e. g. הַלְלוּ, וַיְמָרְרֵהוּ, רַנֵּן, גָּרְנָה.

(2) A form which inserts an unchangeable ô after the first radical, but having the last syllable regular, e. g., סוֹבַב, סוֹבְבוּ, הִסְתּוֹבֵב.

(3) A form which doubles the contracted root, but has the same vowels as the regular Piel, e. g., שִׁעֲשַׁע, שֹׁעֲשַׁע.

Rem. 1. The first syllable of all these forms remains unchangeable, and the second suffers in all the same changes, e. g., סוֹבְבוּ, יְסוֹבְבוּ, יְשַׁעֲשְׁעוּ.

Rem. 2. A verb may have two forms of the Intensive, e. g. הִלֵּל, הוֹלֵל. חִלֵּל, חוֹלֵל.

LESSON XXXVI.

PÊ WAU VERBS.

1. At the beginning of a form, an original Wau has been almost always changed into Yodh, e. g., יָשַׁב, יָרַד.

2. After preformatives, however, it is usually contracted
(1) When preceded by ă into ô, e. g., נוֹשַׁב, הוֹשִׁיב.
(2) When preceded by ŭ into û, e. g., הוּשַׁב.
(3) When preceded by ĭ into î, e. g., יִירַשׁ, יִירָא.

Rem. 1. But in the Kal Imperfect of eight verbs, the original Wau has been dropped and the ĭ heightened into ē or the Wau has been first changed to Yodh and then contracted into ê, e. g., יֵשַׁב, either from יְוֹשַׁב or from יִישַׁב.

Rem. 2. Some think that יוּכַל is Kal Imperfect. If so the וּ has been contracted from ŭw into û instead of the more common î.

3. The Kal Imperative is formed by dropping the preformative of the Imperfect, e. g. תֵּשֵׁב, שֵׁב; תִּירָא, יְרָא; תֵּדַע, דַּע; but יִירַשׁ, רַשׁ (p. רָשׁ), רַשׁ, and יְרָשָׁה. So, also, הַב from יָהַב.

4. The Infinitive construct of verbs which have ê with the preformative drops the first radical and takes a so-called feminine segholate form, e. g., שָׁבֶת, דַּעַת. But, also, רֶשֶׁת from יִירַשׁ. In the case of יָצָא, צֵא, the Infinitive takes the form צֵאת.

Rem. 1. Before suffixes, the segholate Infinitives are inflected exactly as if they were masculine segholates with one original short vowel a, or i, e. g. שִׁבְתּוֹ, דַּעְתּוֹ, צֵאתוֹ.

Rem. 2. The Infinitive construct of verbs, whose Imperfect is of a form like יִירָא or יוּכַל, is varied, e. g., יְרֹא and יִרְאָה, יִרְאַת, יִרְאָתוֹ; יְכֹלֶת, יְכָלְתְּךָ; רֶשֶׁת, רִשְׁתּוֹ.

LESSON XXXVII.

PÊ YODH VERBS.

1. Pê Yodh verbs strictly speaking are such as had originally a Yodh for their first radical. In the Kal Imperfect they all have î with the preformative, and ă after the second radical, just like the second form of Lesson XXXVI, e. g., יִיטַב, יִיצַר.

Rem. 1. This ă becomes ĕ, when the accent is withdrawn to the penult, e. g., וַיִּיטַב, וַיִּיצֶר. It becomes ā in

pause, e. g., וְאִישֶׁן; where, also, an original ă is found heightened to ā, e. g., וַיָּשׇׂם.

Rem. 2. The Infinitives, Participles and Imperative of these verbs are formed regularly, e. g., וְטוֹב, וְטַב, וְצֵר, וְצַר, וְטַב, וְטַב.

2. In the Hiphil, the original Yodh is contracted with the preceding ă into ê, e. g., הֵינִיק, וַיֵּנִיק.

Rem. Singular is the pointing וַיֵּלֶל for וַיֵּלֶל.

3. In a few verbs whose first radical was Wau or Yodh, the first radical is assimilated after the preformative in the Kal and Hiphil, just as if the first radical had been Nun, e. g., אָצַק, הִצִּית, וַיַּצֵּת. almost every one of this kind the 2nd rad. is a dibbolant.

LESSON XXXVIII.

AYIN WAU VERBS.

1. The Wau is dropped in the Perfect and Participle active, e. g., קָם, מַת, בּוֹשׁ; and in some Jussives Kal and all Hiphil Jussives, e. g., יָקָם, וַיָּקָם.

Rem. 1. In the third person of the Perfect the Wau is dropped but the original vowel of the second radical apparently is heightened, e. g., קָוַם becomes קָם, מָוַת becomes מַת, בָּוַשׁ becomes בּוֹשׁ. In the 3rd person this heightened vowel remains throughout and retains the accent, e. g., קָמָה, קָמוּ; מָתָה, מָתוּ; בּוֹשָׁה, בּוֹשׁוּ. In the 1st and 2nd persons, the ā and ē become ă, e. g., קַמְתָּ, מַתָּה. But the ō remains, except before תֶּם and תֶּן where it is shortened to ŏ, e. g., בֹּשְׁתֶּם, בֹּשְׁתֶּן.

Rem. 2. In the Participle active, the second radical is dropped and the vowel heightened to an unchangeable a. The participle of the verb "to die" has the form מֵת and that of the verb "to be ashamed" has the form בּוֹשׁ. These are inflected an follows: קָם, קָמָה, קָמִים, קָמֵי, קָמָיו; מֵת, מֵתָה, מֵתִים, מֵתֵי, מֵתָיו; בּוֹשִׁים etc.

Rem. 3. The Jussive Kal יָקָם comes from an original form yăḳŭm; not from yaḳwŭm, which would have given the contracted vowel û. With Wau conversive, the Jussive becomes וַיָּקָם; in pause וַיָּקָם.

Since the contraction in this verb occurs in the middle it affects both the 1st & 2nd syll. Much like the Ayin Ayin verb.

The Jussive of the Hiphil, likewise, comes from yăkĭm, not yaḳwîm. Hence, we get the forms יָקֶם, in pause וַיָּקֶם; with suffixes, וַיְקִמֵהוּ.

2. The Wau is contracted with u to û, with a to ô, with i to î.

(1) The Wau is contracted (a) with a preceding ŭ in the Kal Infinitive construct, e. g., קוּם from ḳŭwm.

(b) With a following ŭ, in the Kal Imperfect and Imperative, e. g. יָקוּם from yăḳwŭm, קוּם from ḳwum.

(c) With a following û, in the pass. part, Kal, e. g., קוּם from ḳăwûm.

(2) Wau is contracted with an a,

(a) Preceding and following in the Inf. Abs. Kal, e. g., קוֹם from ḳăwâm; in the Niphal Imperfect. Imperative and Infinitive, e. g. הָקוֹם, יָקוֹם from yinḳăwăm.

(b) Following, as in the Kal Imperfect and Imperative in ă, e. g. יָבוֹשׁ from yăvwăš; in the Niphal Perfect and Participle, e. g. נָקוֹם from năḳwăm.

(3) Wau is contracted with i in the Hiphil throughout, so as to form î unchangeable, e. g., הָקִים from hĭḳwîm; יָקִים from yăḳwîm.

Rem. 1. The Jussive Imperfect is an exception to this. See above under 1. Rem. 3.

Rem. 2. The Participle Hiphil is מֲקִים, not מָקִים, as we should have expected.

3. A union vowel ô is inserted in the Perfects of the Niphal and Hiphil stems between the stem and the sufformatives. In the Niphal the contracted ô is commonly changed to û, e. g., נְקוּמוֹתָ; Hiphil הֲקִימוֹתָ.

But in the Niphal נְקֹמְתֶם is found, with the ô unchanged.

Rem. In the Imperfect of Kal a union vowel ֫ is inserted before the ending of the feminine plurals of forms which have an unchangeable û preceding the final radical, e. g., תְּקוּמֶינָה, תְּמוּתֶינָה; but תְּבוֹשְׁנָה, תְּקוֹמְנָה (the last form being the Jussive of the first).

4. The Hophal has the same form exactly, as if the verb were Pê Wau, e. g., הוּקַם, יוּקַם etc.

5. The intensive stems are formed in three ways.

(1) They are sometimes regular, e. g., קִיֵּם.

(2) They reduplicate the third radical, and contract the second radical into an unchangeable ô, e. g., קוֹמֵם, קוֹמַם, הִתְקוֹמֵם; כּוֹנֵן; עוֹפֵף; רוֹמֵם.

(3) They reduplicate the shortened Kal stem. e. g., כִּלְכֵּל. from kălkăl.

Rem. A verb way have two forms, e. g. קִיֵּם, קוֹמֵם.

6. When the 3rd radical is Tau and comes immediately before the Tau of a suffix, the two are written but once and the doubling denoted by Dagesh *forte*, e. g., מַתָּה, מַתִּי.

7. Notice, that in the 3rd fem. sing. and 3rd plur. of the Perfects and in the masc. plur. and 2nd fem. sing. of the Imperfect of the Kal, Niphal, and Hiphil Stems, the accent is on the penult, e. g., קָמָה, קָמוּ; נָקוֹמוּ, נָקוֹמָה; הַקִּימָה, הַקִּימוּ; יָקוּמוּ, תָּקוּמוּ, תְּקוּמִי; יְקוֹמוּ, תְּקוֹמוּ, תְּקוֹמִי; יָקִימוּ, תָּקִימוּ, תָּקִימִי.

8. Notice, also, especially such forms as הָרַע, יָבוֹא, תָּבִיא, וָבֵת, אָרִיתִי, נָגוֹסָה, הַצָּד (article with perfect), הַקֵּמֹתוֹ (instead of הַקִּימֹתוֹ), הֵמִתָּנִי, וַתְּנַח for הִנִּיחַ.

LESSON XXXIX.

AYIN YODH VERBS.

These verbs are exactly like Ayin Wau verbs, except that in the Kal Infinitive construct, Imperative, and Imperfect, î is found instead of û; and that no union vowel occurs in the feminine plural of the Imperfect, e. g., שִׂים, יָשִׂים, שִׂים, תָּשַׂמְנָה.

Rem. 1. That in these verbs the Imperfect Kal and the Imperfect Hiphil are the same in form.

Rem. 2. Sometimes the Infinitive construct has û, e. g., שׂוּם.

Rem. 3. In the Jussive Kal, just as in the Hiphil, the î becomes ē (by heightening from yăś[w]ĭm), e. g., יָשֵׂם, וַיָּשֵׂם; in pause וַיָּשֶׂם.

Rem. 4. When the last radical is Tau, and the sufformative begins with Tau, but one Tau is written. This Tau, however, receives Dagesh *forte*, e. g., שַׁתָּה.

Rem. 5. The first singular Imperfect Kal, or Hiphil, has the form אָשִׁים, even after Wau conversive. The cohortative is אָשִׁימָה.

Rem. 6. The Imv. of the Kal is like the Imperfect with the preformative dropped, e. g., שִׂים, שַׂמְנָה.

LESSON XL.

LAMEDH HÊ VERBS.

Originally, the third radical was Wau, or Yodh; but, when final, this radical has been dropped, its preceding vowel being heightened and being given the vowel letter Hê. From this last circumstance, the verbs are called Lamedh Hê. It must be remembered, that this Hê is never a radical, but always a vowel letter. When final Hê is a radical, it receives Mappik and the verb is treated as a Lamedh Guttural verb, e. g., גָּבַהּ.

1. In the Perfect, a final ă is heightened to ā, e. g. גָּלָה, נִגְלָה הִגְלָה etc.

2. In the Imperfect, the final vowel caused by the loss of the 3rd radical is always Seghol, e. g. יִגְלֶה, יִגָּלֶה, יִגָּלֶה.

3. In the Imperative, the final vowel caused by the dropping of the third radical is always Ṣere, e. g. גְּלֵה, הִגָּלֵה, הַגְלֵה.

4. In the Participles, the final vowels are for the masc. sing. abs. always Seghol; construct Ṣere, e. g., גֹּלֶה, גֹּלֵה. For the fem. sing. abs., we have גֹּלָה. For the masc. plur. cons. גֹּלֵי. The other forms are גֹּלִים, גֹּלֵת, גֹּלוֹת. All other participles are formed in like manner, except the passive of Kal, which has the forms גָּלוּי, גְּלוּי, גְּלוּיָה etc.

5. The Infinitive absolute of the Kal, Niphal, Piel, Pual, and Hithpeal ends in ô; of the Hiphil and Hophal in ē. In all of these forms, it seems that the third

radical has simply been dropped, e. g., גָּלָה (or גָּלוֹ), הַגְּלָה, הַגְּלַה.

6. All Infinitives construct end in an unchangeable וֹת probably contracted from וַת or וַת_, e. g., גְּלוֹת, הַגָּלֹת, הַגְּלֹת. With suffixes גְּלוֹתוֹ, גְּלוֹתְכֶם.

7. Before all vowel sufformatives, the third radical disappears entirely, the sufformatives being affixed directly to the second radical, e. g. גָּלוּ, גָּלְוּ, הָגְלוּ; תִּגְלִי, יִגְלוּ; יִגְלוּ: יִגָּלוּ.

8. Before sufformatives of the Perfect beginning with a consonant, the third radical is contracted with the preceding vowel of Kal into î, of the Pual and Hophal into ê, and of all the other stems into either ê or î, e. g. גָּלִיתָ, גָּלֵיתָ, גִּלִּיתָ or גִּלֵּיתָ.

9. Before sufformatives of the Imperfect and Imperative beginning with a consonant, the Yodh is preceded by a Seghol in which it quiesces; or with which it forms a diphthong, e. g., תִּגְלֶינָה, תִּגָּלֶינָה, תַּגְלֶינָה.

10. The third feminine singular of the Perfect is anomalous in that it seems to have two feminine endings, i. e. גָּלְתָה is formed as if the original *gălăyăth* had dropped the *yă* and then added an ā to the gălăth. It will be seen, that if גָּלַת were the verb, the feminine would have the same form, e. g. גָּלָתָה, נִגְלְתָה (comp. נִקְטְלָה), גִּלְתָה (comp. קִטְּלָה).

11. The Jussives are formed by apocopating the final vowel of the forms of the Imperfect and Imperative ending in Hê, e. g., יִגְלְ, יִגַל, יִגָּל; יִתְגַּל, הִגָּל, גַּל, הִתְגַּל.

Rem. 1. In the Kal and Hiphil and Hophal Imperfects a helping vowel is generally needed to aid in the pronunciation of the apocopated forms, e. g., יִגֶל or יִגַל; יִגֶל; יִגֶל. So, also, in the Hiphil Imperative, e. g., הָרֵב from הַרְבָּה from הַרְבֵּה.

But exceptions are not infrequent, e. g., יִגְבְּ, יִפְתְּ, יִשְׁבְּ, יִשְׁקְ, יַשְׁתְּ.

Rem. 2. The Kal Imperative cannot be apocopated since to cut off the ending from גְּלֵה would require a vowel to be given to the radicals remaining.

12. In the Perfect, the suffixes are added regularly to the forms of the first and second persons, the only change being the lowering in Kal of the vowel of the first radical to Shewa, since it is no longer pretonic, e. g., גָּלִיתִי, גָּלִיתִיהָ, גָּלִיתִיו. They are added directly and without change in any of the stems, except the Kal, to the 3rd plural, e. g., גָּלוּהָ, גָּלוּהָ, But in Kal the ā of the first radical is lowered when not before the accent, e. g., גָּלוּהָ, but גְּלוּיָם.

In the case of the 3rd fem. sing., the form before suffixes is גָּלְתָה, גָּלַת e. g., גָּלַתְנִי, גָּלַתְנוּ.

In the 3rd masc. sing., the suffixes are added directly to the vowel after the second radical, the vowel letter having been dropped, e. g. גָּלָהוּ, גָּלָהּ. This final vowel is lowered before ךָ, כֶם and כֶן, e. g., גָּלְךָ. In pause הָרְגֵךְ.

Rem. Note הָפְדָּה with Seghol instead of Ḥiriḳ.

13. In the Imperfect and Imperative, the suffixes are added directly, without any change, to forms ending in וּ and יִ, e. g., יִכְפּוּהוּ, תִּשְׁתּוּהוּ. The fem. plur. takes the form of the second masculine plural.

The remaining forms, i. e. all those ending in ה cut off the הֵ, or הַ, and add the suffixes to the second radical just as the regular verb does to the third, e. g., תִּבְלֶנָּה, תִּכְבַּנּוּ, פְּדַנִי, הַשְׁקַנִי, יַשְׁקֵנִי, אַשְׁקֵךְ.

LESSON XLI.

PÊ GUTTURAL AND פ״א VERBS WITH 2ND, OR 3RD RADICAL WEAK.

The verbs in this lesson all partake of the peculiarities of both the classes of weak verbs to which they belong.

1. Pê Guttural verbs which are also Ayin Guttural. These are such as אָהַב, הָרַס, הָרַשׁ, עָרַב, עָרַךְ, Examples of forms: תְּהָרֵס, נֶאֱהָבִים, יַעֲרֹךְ.

2. (1) Pê Guttural and Lamedh Hê, such as הָגָה, הָמָה, הָוָה, עָלָה, עָשָׂה. Examples: נֶהְגֶּה, הֲמִיתֶם, תֶּחֱוֶינָה, לַעֲשׂוֹת, עֲשֵׂה, וַיַּעַשׂ, עָשׂוּ.

(2) Pê Guttural and Lamedh Aleph, such as חָטָא. Examples: חָטָאתָם, יֶחֱטָא, יֶחֶטְאוּ.

(3) Pê Aleph and Lamedh Hê, such as אָבָה, אָפָה. Examples: יֹאבָה, תֹּאבוּ.

Rem. Sometimes, the Aleph is omitted, e. g., in וַתֹּפֶהוּ.

LESSON XLII.

VERBS PÊ NUN WHOSE THIRD RADICAL IS WEAK.

These verbs partake of the peculiarities of both kinds of weak verbs.

1. Those whose third radical was Wau, or Yodh, i. e., Lomadh Hê, e. g., נָטָה, נָטָה, נָטָה, נָטָה. Examples נָטָה, נָטִ֫ית, נָטוֹ, נְטוּיָה, נְטוּיוֹת, נָטֹה, נְטֵה, נְטֵ֫־, נְטֵ, נְטֵה, נְטֻיָּה; נְטוּי, נְטֻיָּה, נְטֻיּוֹת, הַטֵּה, הַטֵּ֫ה, הַטֵּ֫נִי, הַטֵּ֫נוּ, הַטֵּ֫נִי, הַטֵּ֫נָה, הַטּוּי, הַטּוּיָה, הַטּוּיוֹת; נָטוּי

2. The second a Resh, the 3rd a guttural, e. g., קָרַע. Treated like Ayin guttural and Lamedh guttural verbs, e. g., יִקְרַע.

3. The second a Resh, the 3rd an Aleph, e. g., בָּרָא, קָרָא. Partake of the peculiarities of both, e. g., בְּרַא, קְרַא, Inf. cons. קְרֹא "to call", לִקְרַאת "to meet". See Paradigm XLIV, 2(?).

4. Second radical Wau. 3rd radical a guttural, e. g., גָּוַע. Wau remains firm and verb treated as Lamedh guttural only, e. g., יִגְוַע.

5. Second radical Wau, 3rd radical a Yodh (or Wau?), e. g. לָוָה, קָוָה, צָוָה. Wau remains firm and the verbs treated as Lamedh Hê only, e. g., יִלְוֶה; יְלַוֵּךְ, צִוָּה, צַוֵּנוּ; יְקַוֶּה.

6. Second radical Wau, 3rd radical Aleph, e. g., בּוֹא. Partake of peculiarities of Ayin Wau and, also, of Lamedh Aleph verbs, e. g., בָּא, בָּאתָה; בּוֹא, בּוֹאוּ, בּוֹאוֹ, בּוֹאַךְ, יָבוֹא, תְּבוֹאָנָה, or תְּבוֹאֶינָה; בּוֹא; בָּא, בָּאָה, בָּאַת, בָּאִים, בֹּאוֹת; בָּאִי; הַבִיאוּ, הַבִיאוֹ, הֲבִיאֹתָנוּ, but הַכְאֹתָ; יָבִיא, תְּבִיאֶינָה; הָבָאת.

7. Second radical guttural, or Resh, and third radical Wau, or Yodh (Lamedh Hê), see paradigm XLIV 2. (1), שָׂחָה, שָׂעָה, קָרָה, מָחָה.

(1) Most of these partake of the peculiarities of both, e. g., שָׂעָה, מָחָה, מָחִיתִי, אֶמְחָה, יִשַׁע, תִּשְׁעֶינָה; זָרִיתָ, זָרוּת, זֹרוּ.

(2) קָרָה has some forms as if the 3rd radical were Aleph, e. g., קְרָאָה, לִקְרַאת see 3 above. But others are purely Lamedh Hê, e. g., קָרֵךְ.

(3) שָׂחָה differs from other verbs in reduplicating the 3rd radical Wau in certain forms, e. g., הִשְׂתַּחֲוָה; יִשְׂתַּחֲוֶה (3rd. sg. masc. Impf.), יִשְׂתַּחֲוּוּ 3rd. plur. masc. Impf.

LESSON XLV

VERBS WITH ALL THE RADICALS WEAK.

1. When the first radical is a guttural and the verb Ayin Ayin, e. g., אָרַר, הָלַל, חָנַן, חָיָה. (See XLVI), חָלַל, חָנַן, חָקַק, חָתַת, עָנַן. Examples אָרוּתִי, Imv. אֲרֹר־ or אוֹרוּ; Niph. נֶאֱרִים;

Pi. אֲבָרֵהּ, מְאָרְרִים; בְּהִלּוֹ Inf. cons.; Niph. נֶחַל, Hiph. הֶחַל, יַחַל or יָחֵל; יֶחֱנַן, חָנַנִי or יָחֹן; לְחַנְּכָם, לְחַנְּכָהּ, אֲחַנְּתָהּ, חִתְּנִי, חָתַנְתָּ.

2. When the first radical is Resh, the verb partokes of the peculiarities of all three classes, e. g., רָאָה, רָעָה. Examples: רָאִיתָה, רָאוּ, רָאֲתָה; רָאוּת, רָאוּ; רָאָה, יֶרְאֶה, נָרָא, וַיִּרָא, וַתֵּרָא, רְעִי; תִּרְעֶינָה; רְאֵה; רֹאֶה; נִרְאָה, נִרְאֲתָה; נִרְאָה, הֶרְאָה, נִרְאָה, וַיִּרְא; יִרְאֵהוּ, הִרְאַנִי, וַיַּרְא, אֶרְאֶנּוּ.

3. When the first is Resh and the verb Ayin Ayin, e. g., רָבַב, רָעַע, רָנַן Examples: רָנִי, יָרֹנּוּ, יָרֹן; רָע (in pause), רָעוּ, יָרַע or יָרַע, יֵרַע (for יֵרְעוּ?) Inf. cons. רַע or רַע; Niph. יֵרוֹעַ; Hiph. הֵרַע, הֲרֵעוֹתָ, הֲרֵעוּ, הֲרֵעֹתֶם; מֵרַע, מְרֵעִים.

4. When the first radical is a Nun, it remains firm, and the verb partakes of the peculiarities of the other two classes, e. g., נָחָה, נָחֲנִי, נְחָה, נְחַנִי.

5. Verbs Pê Guttural, Ayin Wau, and Lamedh Hê (Yodh), e. g., אָוָה, הָוָה, עָוָה. In these verbs, the Ayin Wau is always firm, e. g., אִוִּתָה, הִתְאַוּוּ, תִּתְאֶוְנָה; עָוֹתָה, נָעֲוֹתִי, הֶעֱוָה.

So also with רָוָה , e. g., רָוְוָה, יִרְוֶה.

6. Verbs Pê Guttural, Ayin Resh, and Lomadh Hê, e. g., הָרָה, חָרָה, עָרָה. These partake of the peculiarities of all three radicals, e. g., הָרָתָה, וַתַּהַר, וַיַּעַר, הָרָתָה: נָעַר.

LESSON XLVI.

THE VERBS הָיָה AND חָיָה.

1. The forms of הָיָה to be noted are הֱיוֹתָם, לִהְיוֹת, יִהְיֶה (with silent Shewa under the radical Hê), יְהִי, וַיְהִי, וַיִּהְיוּ, וַתְּהִי, וַאֲהִי, תִּהְיֶינָה; הֱיֵה, וְהָיָה.

2. The verb חָיָה is treated as a contracted Ayin Ayin verb, or as an uncontracted Ayin Ayin verb. In the latter case, it is a Lamedh Hê verb. Examples: חָיָה, חַי, חָיוֹת, יִחְיֶה (with silent Shewa under Ḥeth and ĭ under the preformative), יְחִי, וַיְחִי, וַיִּחְיוּ: תִּחְיֶינָה. Verbal adjective חַי *living*, חַיִּים.

LESSON XLVII.

THE NUMERALS.

A. THE CARDINALS.

1. The cardinals for one and two are of the same gender as the object numbered, e. g., אִישׁ אֶחָד *one man,* יוֹם אֶחָד *one day,* שָׁנָה אַחַת *one year.* שְׁנֵי הַמְּאֹרוֹת *the two lights;* שְׁתֵּי נָשִׁים *two wives.*

Rem. Commonly *one* is not expressed, e. g., אֶלֶף is *one* thousand; אַמָּה *one* cubit. So, also, *two* is expressed by the dual, e. g., יוֹמַיִם *two days;* מָאתַיִם וְאַלְפַּיִם *two hundred and two thousand.*

2. The cardinals from 3 to 10 inclusive are of the opposite gender from that of the object numbered, e. g., עֲשָׂרָה גְמַלִּים *ten camels;* שֵׁשׁ מֵאוֹת *six hundreds;* עֶשֶׂר יְרִיעֹת *ten curtains;* שֶׁבַע שָׁנִים (שָׁנִים is feminine) seven years.

3. The number eleven is formed by putting אַחַד or עַשְׁתֵּי before עָשָׂר *ten,* to constitute the form used with masculine nouns; and אַחַת before עֶשְׂרֵה to constitute the form used with feminine nouns, e. g., עַשְׁתֵּי עָשָׂר חֹדֶשׁ *11 months;* אַחַד עָשָׂר נְשִׂיאִם *11 princes;* אַחַת עֶשְׂרֵה עָרִים *11 cities.*

4. The number twelve is formed by placing שְׁנֵים or שְׁנֵי before עָשָׂר to constitute the form used with masculine nouns; and שְׁתֵּים or שְׁתֵּי with עֶשְׂרֵה to constitute the form used with feminine nouns. שְׁנֵים עָשָׂר אַחִים *12 brethren.* שְׁתֵּים עֶשְׂרֵה אֲבָנִים *12 stones.*

5. The numbers from 13 to 19 inclusive are formed by putting the feminine absolute or construct form of the units before עָשָׂר to constitute the forms used with the masculine noun; and the masculine absolute or construct, form of the unit before עֶשְׂרֵה to constitute the form to be used with the feminine noun, e. g., חֲמִשָּׁה עָשָׂר יוֹם *fifteen days;* חֲמֵשׁ עֶשְׂרֵה שָׁנָה *fifteen years.* חֲמִשֶּׁת עָשָׂר בָּנָיו *his fifteen sons;*

6. The number 20 is formed from the original form of ten by affixing the plural masculine ending, e. g., עֶשְׂרִים (from עֶשֶׂר).

7. The other tens are formed from the units by affixing the masculine plural ending to the masculine singular construct, e. g., שְׁלֹשִׁים 30. In the case of 40, the vowel, before the plural ending is heightened, e. g., אַרְבַּע; but, אַרְבָּעִים. In the case of 50 and 60, the final consonant is doubled, e. g., חֲמִשִּׁים, שִׁשִּׁים. In the case of 70 and 90, the plural ending is appended to the original one vowel form, e. g., תִּשְׁעִים from תִּשְׁעָ; hence, תִּשְׁעִים. In the form for 70, the original ă has been attenuated, e. g., שִׁבְעִים from שִׁבְעָ from שָׁבְעָ. In the case of 80 the ending of שְׁמֹנָה is dropped and the plural appended to שְׁמֹנ forming שְׁמֹנִים.

Rem. These numbers are not used in the construct.

8. In Hebrew, one may say *two and twenty*, or *twenty and two.*

9. The word for one hundred is מֵאָה, const. מְאַת, plur. מֵאוֹת, const. מְאוֹת; 200 מָאתַיִם (for מְאָתַיִם); 300 שְׁלֹשׁ מֵאוֹת; 400 אַרְבַּע מֵאוֹת; 500 חֲמֵשׁ מֵאוֹת; 600 שֵׁשׁ מֵאוֹת; 700 שְׁבַע־מֵאוֹת; 800 שְׁמֹנֶה מֵאוֹת, 900 תְּשַׁע מֵאוֹת.

10. The word for one thousand is אֶלֶף, אַלְפֵי, אַלְפִים, dual אַלְפַּיִם=2000; 3000 שְׁלֹשֶׁת אֲלָפִים, or שְׁלֹשֶׁת אֲלָפִים etc.

11. The word for ten thousand is רִבּוֹא; 40000=אַרְבַּע רִבּוֹא or אַרְבָּעִים אֶלֶף; 20000=רִבֹּתַיִם or עֶשְׂרִים אֶלֶף.

12. As to the number of the object numbered, the following rules are to be remembered:

(1) The singular is used invariably with *one*, e. g., יוֹם אֶחָד.

(2) The plural is used commonly with numbers from three to ten, e. g., שְׁלֹשׁ אַמּוֹת, שְׁלֹשֶׁת אֲלָפִים, שֵׁשׁ מֵאוֹת, שֶׁבַע שָׁנִים.

(3) The dual is used commonly for two, e. g., יוֹמַיִם, אַלְפַּיִם.

(4) The plural is used ordinarily for numbers from eleven to nineteen inclusive, e. g., אַחַד עָשָׂר כּוֹכָבִים *eleven stars;* שְׁנֵים עָשָׂר נְשִׂיאִם *twelve princes;* פָּרִים שְׁלֹשָׁה עָשָׂר *thirteen bullocks;* שִׁשָּׁה עָשָׂר אֲדָנִים *sixteen bases;* עָרִים אַחַת עֶשְׂרֵה *eleven cities* (עָרִים is feminine).

Rem. 1. But frequently a singular form of the thing numbered is employed, e. g., שִׁבְעָה עָשָׂר אָלֶף *seventeen thousand;* תִּשְׁעָה עָשָׂר אִישׁ *nineteen men.*

Rem. 2. The plural is generally used, when the object numbered precedes the numeral, e. g., פָּרִים שְׁלֹשָׁה עָשָׂר *13 bullocks.*

(5) With numbers above nineteen, the numeral usually precedes and the thing numbered follows in the plural, e. g., עֶשְׂרִים עֲבָדָיו *his twenty servants;* שְׁבַע־מֵאוֹת פָּרָשִׁים *seven hundred horsemen;* תִּשְׁעִים עֲבָדִים *90 servants.*

Or, if the noun is a collective. it may be put in the singular, e. g., חֲמִשִּׁים אֶלֶף אִישׁ *50000 men;* עֶשְׂרִים יוֹם *20 days;* תֵּשַׁע וְעֶשְׂרִים שָׁנָה *29 years.*

(6) The hundreds and thousands, also, precede the name of the thing numbered, e. g., מָאתַיִם וַאֲלָפִים מַלְאָךְ *2200 angels;* אַלְפֵי רְבָבָה *thousands of myriads;* מֵאָה שָׁנָה *100 years* מְאַת שָׁנָה *100 years.*

(7) With numbers compounded of units, tens, hundreds etc., the name of the objects enumerated is frequently repeated, in the plural with the units, and in the singular with the tens, hundreds, and thousands, e. g., חָמֵשׁ שָׁנִים וְשִׁבְעִים שָׁנָה וּמֵאָה שָׁנָה *five years and seventy years and one hundred years.*

13. The cardinals from two to ten inclusive may stand in the construct before the noun; or in apposition either before, or after, the noun, e. g., עֲשֶׂרֶת יָמִים *ten days.* אַלְפִים שְׁלֹשֶׁת 3000; חֲמִשָּׁה יָמִים *five days,* שְׁלֹשׁ אַמּוֹת *three cubits;* עֶשֶׂר עָרִים *ten cities.*

Rem. The word for year is used frequently in the construct singular before the number, e. g., בִּשְׁנַת שְׁמֹנִים וְשֶׁבַע in the eighty seventh year.

B. THE ORDINALS.

1. There are several ways of expressing "the first."

(1) הָאֶחָד follows the noun, e. g., הַקֶּרֶשׁ הָאֶחָד, *the one board* = the first board.

(2) In naming the days of the month, the idiom is as follows: בְּאֶחָד לַחֹדֶשׁ *on the first of the month.*

(3) In numbering the years, we have the following idiom; בִּשְׁנָה אַחַת *in the first year.*

(4) רִאשׁוֹן is used, e. g., הַבַּיִת הָרִאשׁוֹן.

2. Ordinals from second to tenth are formed by appending ִי to the third radical of the cardinal and usually by inserting another ִי after the second radical of the cardinal, e. g., שְׁלִישִׁי, שְׁבִיעִי, שְׁמִינִי, תְּשִׁיעִי, עֲשִׂירִי, e. g., בַּחֹדֶשׁ הַשְּׁמִינִי *in the eighth month* הַחֹדֶשׁ הָעֲשִׂירִי *the tenth month.*

Rem. 1. The prosthetic Aleph is dropped in forming fourth, e. g., רְבִיעִי e. g., הַיּוֹם הָרְבִיעִי *the fourth day.*

Rem. 2. Sixth and fifth double the last radical and keep the vowel before the second a short i, e. g., שִׁשִּׁי, חֲמִשִּׁי, as in הַיּוֹם הַשִּׁשִּׁי *the sixth day.*

Rem. 3. *Second* is of the form שֵׁנִי, e. g., בַּחֹדֶשׁ הַשֵּׁנִי *in the second month.*

3. The feminine is formed by appending ת, e. g., הַשָּׁנָה הַשֵּׁנִית *the second year;* הָעִיר הַשְּׁלִישִׁית *the third city.*

4. The ordinals above ten are expressed by the cardinals, which commonly in such usage precede the noun, e. g., בְּעַשְׁתֵּי־עָשָׂר חֹדֶשׁ *in the eleventh month;* בִּשְׁנֵים עָשָׂר חֹדֶשׁ *in the twelfth month;* בִּשְׁלֹשׁ־עֶשְׂרֵה שָׁנָה *in the thirteenth year;* בִּשְׁבָעָה עָשָׂר יוֹם *on the seventeenth day;* בְּעֶשְׂרִים וְאֶחָד לַחֹדֶשׁ *on the twenty-first of the month;* בְּעֶשְׂרִים וַחֲמִשָּׁה לַחֹדֶשׁ *on the twenty-fifth of the month;* בִּשְׁלֹשִׁים וְשֶׁבַע שָׁנָה *in the thirty-seventh year;* בְּאַרְבָּעִים שָׁנָה *in the fortieth year.*

Rem. 1. Sometimes, however, they follow the noun when the year is enumerated, e. g., בַּשָּׁנָה הָאַחַת עֶשְׂרֵה *in the eleventh year;* בִּשְׁנַת שְׁמֹנִים וָשֶׁבַע *in the eighty seventh year.*

Rem. 2. Sometimes the word for year precedes in the construct and follows, also, in the absolute, e. g., בִּשְׁנַת חָמֵשׁ עֶשְׂרֵה שָׁנָה *in the fifteenth year.*

TABLES OF PARADIGMS.

The numeration of these tables corresponds to the sections of the Etymology and, also, to the sections of the "Illustrations".

I.

THE INSEPARABLE PREFIXES.

A. THE INSEPARABLE PREPOSITIONS.

1. מִן. (1) מִגּוֹי (2) מִימֵי, מִחוּץ (3) מֵאִישׁ, מֵאֲדֹנָי (מֵאֲדֹנָי).
2. ב, כ, and ל. (1) לְפָנִים (2) לִבְנֵי (3) לַאֲבִי, לָאֶכֶל, לֶאֱכֹל, לָחֲלִי, לַיהוָה, לַאדֹנָי (Read לַאדֹנָי), לֵאמֹר, לֵאלֹהִים, לְתֵת (4) לָאֵלֶּה.

B. THE CONJUNCTION WAU.

1. THE SO-CALLED WAU CONJUNCTIVE.

(1) וַאֲתָּה (2) וְאַקְטֹל, וָאֶכֹל, וָעֲנִי, וַיהוָה, וַיְהִי, וְאֵלֶּה, וֵאלֹהִים. (3) וְיִקְטֹל, וַיִּקְטֹל. (4) וּמִן, וּבֵן. (5) וּפֶן, וּלְכָל. (6) וְרָע, וּדְמוּת, וְבֹהוּ.

2. THE SO-CALLED WAU CONVERSIVE, OR CONSECUTIVE.

(1) וַיִּקְטֹל. (2) וָאֶקְטֹל (3) וַיִּקְטֹל, וָאַקְטֹל, וַתִּקְטֹל (4) וַיְהִי, וַיֵּחִי, וָאֱהִי.

C. THE ARTICLE.

1. WITHOUT THE INSEPARABLE PREPOSITIONS.

(1) הַמֶּלֶךְ, הַיְאוֹר, הַיְעָרִים (2) הָאוֹר, הָאָרֶץ, הָרֹאשׁ. (3) הָעִיר, הָהוּא, הַהִין, הַהֵיכָל (4) הָעֲמִים, הֶעָרִים, הָעָם, הָהָר, הֶחֳדָשִׁים, הֶחָג, הֶחָכָם, הֶחָי, הָחַי, הַחַיִל (5) הֶהָרִים.

2. WITH THE INSEPARABLE PREPOSITIONS.

(1) מִן־הָאָרֶץ, or מֵהָאָרֶץ. (2) לַמֶּלֶךְ, לָאוֹר, לָעָרִים, לַחַיִל.

D. HÊ INTERROGATIVE.

1. Ordinarily, הַ, e. g., הַתִּחְיֶינָה, הַכִי 2. Before an unvowelled letter הַ, e. g., הַמְעַט 3. Occasionally, it receives Pathaḥ, e. g., הַאַכָּה, הַמַּכֵּה 4. Occasionally, it receives Pathaḥ and the following letter Dagesh forte, e. g., הַכִּצְעָקָתָהּ.

II.

THE PERSONAL PRONOUNS.

	A. INDEPENDENT		B. SUFFIXED			
			Singular		Plural	
	Singular	Plural	With Nouns.	With Verbs.	With Nouns.	With Verbs.
3rd Masc.	הוּא	הֵמָּה or הֵם	ו, וֹ or הוּ	וֹ or הוּ	ם or הֶם	ם
„ Fem.	הִיא	הֵנָּה or הֵן	ָהּ or ֶהּ	ָהּ or ֶהּ	ן or הֶן	ן
2nd Masc.	אַתָּה	אַתֶּם	ךָ or ְכָה	ךָ or ְךָ	ְכֶם	ְכֶם
„ Fem.	אַתְּ	אַתֶּנָּה or אַתֶּן	ְךָ	ְךָ	ְכֶן	ְכֶן
1st Common	אָנִי or אֲנִכִי	אֲנַחְנוּ or נַחְנוּ	ִי	ִי	נוּ	נוּ

Pausal forms: אָנִי, אָנֹכִי, אֲנָחְנוּ, or נָחְנוּ.

C. THE NOUN WITH SUFFIXED PRONOUNS.

	MASCULINE NOUN		FEMININE NOUN	
	Singular	Plural	Singular	Plural
Absolute State	סוּס	סוּסִים	סוּסָה	סוּסוֹת
Construct State	סוּס	סוּסֵי	סוּסַת	סוּסוֹת
Suffix Sing.				
3rd Masc.	סוּסוֹ	סוּסָיו	סוּסָתוֹ	סוּסוֹתָיו
„ Fem.	סוּסָהּ	סוּסֶיהָ	סוּסָתָהּ	סוּסוֹתֶיהָ

2nd Masc.	סוּסְךָ	סוּסֵיךָ	סוּסָתְךָ	סוּסוֹתֶיךָ
„ Fem.	סוּסֵךְ	סוּסַיִךְ	סוּסָתֵךְ	סוּסוֹתַיִךְ
1st Com.	סוּסִי	סוּסַי	סוּסָתִי	סוּסוֹתַי
Suffix Plural				
3rd Masc.	סוּסָם	סוּסֵיהֶם	סוּסָתָם	סוּסוֹתֵיהֶם
„ Fem.	סוּסָן	סוּסֵיהֶן	סוּסָתָן	סוּסוֹתֵיהֶן
2nd Masc.	סוּסְכֶם	סוּסֵיכֶם	סוּסַתְכֶם	סוּסוֹתֵיכֶם
„ Fem.	סוּסְכֶן	סוּסֵיכֶן	סוּסַתְכֶן	סוּסוֹתֵיכֶן
1st Com.	סוּסֵנוּ	סוּסֵינוּ	סוּסָתֵנוּ	סוּסוֹתֵינוּ

III.

A. B. NOUNS THE FORM OF WHOSE MASCULINE SINGULAR ABSOLUTE DOES NOT CHANGE IN INFLECTION.

Original form	ḳâyim(?)	măyĭth	tăwăv	šiyr	ṣăddîḳ	părrâš
Meaning	rising up	dying	good	song	righteous	horseman
Absolute singular	קָם	מֵת	טוֹב	שִׁיר	צַדִּיק	פָּרָשׁ
Construct „	„	„	„	„	„	„
With light suffix	קָמוֹ	מֵתוֹ	טוֹבוֹ	שִׁירוֹ	צַדִּיקוֹ	פָּרָשׁוֹ
With grave suffix	קָמְכֶם	מֵתְכֶם	טוֹבְכֶם	שִׁירְכֶם	צַדִּיקְכֶם	פָּרָשְׁכֶם

Original form	kâyim(?)	măyîth	tăwăv	siyr	şăddîḳ	părrâš
Meaning	rising up	dying	good	song	righteous	horseman
Absolute plural	קָמִים	מֵתִים	טוֹבִים	שִׁירִים	צַדִּיקִים	פָּרָשִׁים
Construct „	קְמֵי	מֵתֵי	טוֹבֵי	שִׁירֵי	צַדִּיקֵי	פָּרָשֵׁי
With light suffix	קָמָיו	מֵתָיו	טוֹבָיו	שִׁירָיו	צַדִּיקָיו	פָּרָשָׁיו
With grave suffix	קָמֵיכֶם	מֵתֵיכֶם	טוֹבֵיכֶם	שִׁירֵיכֶם	צַדִּיקֵיכֶם	פָּרָשֵׁיכֶם?
So their feminines	[קָמָה]	מֵתָה	טוֹבָה	שִׁירָה	צַדִּיקָה	[חָרְבָה]

C. D. NOUNS THE FORM OF WHOSE FEMININE SINGULAR ABSOLUTE CHANGES THE ENDING ONLY IN INFLECTION.

Original form	kăllăth	şărrăth	ḥâmăth	ʿămŭkăth	găvŭhăth
Meaning	bride	affliction	wall	depth	height
Absolute singular	כַּלָּה	צָרָה	חוֹמָה	עֲמֻקָּה	גְּבֹהָה
Construct „	כַּלַּת	צָרַת	חוֹמַת	עֲמֻקַּת	גְּבֹהַת
With light suffix	כַּלָּתוֹ	צָרָתוֹ	חוֹמָתוֹ	עֲמֻקָּתוֹ	גְּבֹהָתוֹ
With grave suffix	כַּלַּתְכֶם	צָרַתְכֶם	חוֹמַתְכֶם	עֲמֻקַּתְכֶם	גְּבֹהַתְכֶם
Absolute plural	כַּלּוֹת	צָרוֹת	חוֹמוֹת	עֲמֻקּוֹת	גְּבֹהוֹת
Construct „	„	„	„	„	„
With light suffix	כַּלּוֹתָיו	צָרוֹתָיו	חוֹמֹתָיו	עֲמֻקֹּתָיו	גְּבֹהֹתָיו
With grave suffix	כַּלּוֹתֵיכֶם	צָרוֹתֵיכֶם	חוֹמֹתֵיכֶם	עֲמֻקֹּתֵיכֶם	גְּבֹהֹתֵיכֶם

E.

1. INFLECTION OF THE PERFECT OF THE SIMPLE, OR KAL, STEM OF THE REGULAR, OR STRONG, VERB.

	Singular		Plural	
	Original Forms	Forms in use	Original Forms	Forms in use
Third masculine	קַטַל	קָטַל	קַטַלוּן	קָטְלוּ
„ feminine	קַטַלַת	קָטְלָה	[קַטַלָן]	?
Second masculine	קַטַלַתַ	קָטַלְתָּה	(?)קַטַלְתוּם	קְטַלְתֶּם
„ feminine	קַטַלְתִי	קָטַלְתְּ	(?)קַטַלְתֶן	קְטַלְתֶּן
First common	קַטַלְתִי	קָטַלְתִי	קַטַלְנוּ	קָטַלְנוּ

2. FORMATIVE ELEMENTS OF THE HEBREW PERFECT.

	Singular		Plural	
	Masculine	Feminine	Masculine	Feminine
Third Person	*None*	ה (ת_)	ו (ון)	*None in use*
Second Person	תְּ (תָּה[אַ])	תְּ (תִי[אַ])	תֶּם (תֶּם[אַ])	תֶּן (תֶן[אַ])
First Person	תִי (כִי[אָנ]?)		נוּ (נוּ[נַח])	

IV.

A. NOUNS WHICH HAD ORIGINALLY TWO SHORT VOWELS.

Original form	dāvăr	ʿăšăn	năhăr	răšāʿ	ṣăvāʾ	ʿănăw	ḳăṣăy	răʿāʿ
Meaning	word	smoke	river	wicked	host	poor	end	evil
Absolute singular	דָּבָר	עָשָׁן	נָהָר	רָשָׁע	צָבָא	עָנִי	קָצֶה	רַע
Construct „	דִּבַר	עִשַּׁן	נִהַר	רִשַּׁע	צִבָא	(?) עָנִו	קִצֵה	רַע
With light suffix	דְּבָרוֹ	עִשָּׁנוֹ	נְהָרוֹ	רִשְׁעוֹ	צִבְאוֹ	(?) עָנְוֹ	קְצֵהוּ	(?) רָעוֹ
With grave suffix	דִּבְרֹכֶם	עִשַּׁנְכֶם	נְהָרְכֶם	רִשַּׁעֲכֶם	צִבְאֲכֶם	(?) עָנְוֹכֶם	קְצֵלֶם	(?) רָעֲכֶם
Absolute plural	דְּבָרִים	חֲכָמִים	נְהָרִים	רְשָׁעִים	צְבָאוֹת	עֲנָוִים	פָּנִים	רָעִים
Construct „	דִּבְרֵי	חַכְמֵי	נַהֲרֵי	(?) רִשְׁעֵי	צִבְאוֹת	עַנְוֵי	פְּנֵי	רָעֵי
With light suffix	דְּבָרָיו	חֲכָמָיו	נְהָרָיו	רְשָׁעָיו	צִבְאֹתָיו	עֲנָוָיו	פָּנָיו	(?) רָעָיו
With grave suffix	דִּבְרֵיכֶם	חַכְמֵיכֶם	נַהֲרֵיכֶם	(?) רִשְׁעֵיכֶם	צִבְאֹתֵיכֶם	עַנְוֵיכֶם	פְּנֵיכֶם	(?) רָעֵיכֶם

Original form	zāḳăn	nĭḵăr	ṣĕlāʿ	yărĕḵ	mālĕʾ	gāmăl	nākŭd	šāḥŭr
Meaning	old	stranger	rib	thigh	full	camel	speckled	black
Absolute Singular	זָקֵן	נֵכָר	צֵלָע	יָרֵךְ	מָלֵא	גָּמָל	נָקֹד	שָׁחֹר
Construct „	זְקַן	נִכַר	צִלַע	יֶרֶךְ	מְלֵא	גְּמַל	נְקֹד	שְׁחֹר

With light suffix	זְקֵנוֹ	נִכְרוֹ	צַלְעוֹ	יְרֵכוֹ	מְלֵאוֹ	גְּמָלוֹ	נְקֻדּוֹ	שְׁחֹרוֹ
With grave suffix	זִקְנְכֶם	נִכְרְכֶם	צַלְעֲכֶם	יַרְכְּכֶם (?)	מְלֵאֲכֶם	גְּמַלְכֶם	נְקֻדְּכֶם	שְׁחֹרְכֶם
Absolute plural	זְקֵנִים	נִכְרִים	צְלָעוֹת	יְרֵכַיִם	מְלֵאִים	גְּמַלִּים	נְקֻדִּים	שְׁחֹרִים
Construct „	זִקְנֵי	נִכְרֵי	צַלְעוֹת	יַרְכֵי (?)	מְלֵאֵי	גְּמַלֵּי	נְקֻדֵּי	שְׁחֹרֵי
With light suffix	זְקֵנָיו	נִכְרָיו	צַלְעָתָיו	יְרֵכָיו	מְלֵאָיו	גְּמַלָּיו	נְקֻדָּיו	שְׁחֹרָיו
With grave suffix (*)	זִקְנֵיכֶם	נִכְרֵיכֶם	צַלְעֹתֵיכֶם	יַרְכֵיכֶם (?)	מְלֵאֵיכֶם	גְּמַלֵּיכֶם	נְקֻדֵּיכֶם	שְׁחֹרֵיכֶם

B. THE PERFECT OF THE INTENSIVE STEM.

	ACTIVE OR PIEL		PASSIVE OR PUAL	
	Singular	Plural	Singular	Plural
3rd masc.	קִטֵּל	קִטְּלוּ	קֻטַּל	קֻטְּלוּ
2nd masc.	קִטַּלְתָּ	קִטַּלְתֶּם	קֻטַּלְתָּ	קֻטַּלְתֶּם

(*) Nouns of the form גָּו, טוֹב (see Lesson III) and שְׂדֵה, פָּנִים (Lesson XV) belonged originally to this class.

1. Where there is no ending a helping-vowel is supplied.
2. All the suffixes are added on to sing. & orig. form
3. The plurals for these nouns are like nouns with the 2 short vowels.

V.

A. NOUNS WHICH HAD ORIGINALLY THE ONE SHORT VOWEL *ă*.

Original form	*mălk*	*ḥăsd*	*năʿr*	*păšʿ*
Meaning	king	favor	boy	transgression
Absolute singular	מֶלֶךְ	חֶסֶד	נַעַר	פֶּשַׁע
Construct „	מֶלֶךְ	חֶסֶד	נַעַר	פֶּשַׁע
With light suffix	מַלְכּוֹ	חַסְדּוֹ	נַעֲרוֹ	פִּשְׁעוֹ
With grave suffix	מַלְכָּם	חַסְדָּכֶם	נַעֲרָכֶם	פִּשְׁעֲכֶם (?)
Absolute plural	מְלָכִים	חֲסָדִים	נְעָרִים	פְּשָׁעִים
Construct „	מַלְכֵי	חַסְדֵי	נַעֲרֵי	פִּשְׁעֵי
With light suffix	מְלָכָיו	חֲסָדָיו	נְעָרָיו	פְּשָׁעָיו
With grave suffix	מַלְכֵיכֶם	חַסְדֵיכֶם	נַעֲרֵיכֶם	פִּשְׁעֵיכֶם

B. THE IMPERFECT AND IMPERATIVE OF THE SIMPLE (OR KAL) STEM.

	IMPERFECT		IMPERATIVE	
	Singular	Plural	Singular	Plural
Third masc.	יִקְטֹל	יִקְטְלוּ		
„ fem.	תִּקְטֹל	תִּקְטֹלְנָה		
Second masc.	תִּקְטֹל	תִּקְטְלוּ	קְטֹל	קִטְלוּ
„ fem.	תִּקְטְלִי	תִּקְטֹלְנָה	קִטְלִי	קְטֹלְנָה
First com.	אֶקְטֹל	נִקְטֹל		

VI.

A. NOUNS WHICH HAD ORIGINALLY THE SHORT VOWEL *ĭ*, OR *ŭ*.

Original form	sifr	ʿĭgl	nĭṣḥ	bŭḳr	ḳŭdš	pŭʿl
Meaning	book	calf	perpetuity	morning	holiness	work
Absolute singular	סֵפֶר	עֵגֶל	נֵצַח	בֹּקֶר	קֹדֶשׁ	פֹּעַל
Construct „	סֵפֶר	עֵגֶל	נֵצַח	בֹּקֶר	קֹדֶשׁ	פֹּעַל
With light suffix	סִפְרִי	עֶגְלוֹ	נִצְחוֹ	בָּקְרוֹ	קָדְשׁוֹ	פָּעֳלוֹ
With grave suffix	סִפְרְכֶם	עֶגְלְכֶם	נִצְחֲכֶם	בָּקְרְכֶם	קָדְשְׁכֶם	פָּעֳלְכֶם
Absolute plural	סְפָרִים	עֲגָלִים	נְצָחִים	בְּקָרִים	קָדָשִׁים	פְּעָלִים
Construct „	סִפְרֵי	עֶגְלֵי	נִצְחֵי	בְּקָרֵי	קָדְשֵׁי	פָּעֳלֵי
With light suffix	סְפָרָיו	עֲגָלָיו	נְצָחָיו	בְּקָרָיו	קָדָשָׁיו	פָּעֳלָיו
With grave suffix	סִפְרֵיכֶם	עֶגְלֵיכֶם	נִצְחֵיכֶם	בָּקְרֵיכֶם	קָדְשֵׁיכֶם	פָּעֳלֵיכֶם

Notice, also, the forms חַטָּא *sin*, חֲטָאֵי; אֹהֶל *tent*, אָהֳלִים; שֹׁרֶשׁ *root*, שָׁרָשִׁים; לְאֹם *people* (from *lŭʾm*), לְאֻמִּים; זְאֵב *wolf*, זְאֵבִי, זְאֵבִים, הַקָּדָשִׁים, קָדָשֶׁיךָ.

B. THE IMPERFECT OF THE INTENSIVE STEMS, PIEL AND PUAL.

Piel, or Active, יְקַטֵּל, יְקַטְּלוּ etc. Pual or Passive, יְקֻטַּל, יְקֻטְּלוּ etc.

VII.

A. NOUNS WITH ONE ORIGINAL SHORT VOWEL, WHOSE MIDDLE RADICAL WAS WAU OR YODH.

Original form	tăwk	ʿăwl	zăyth	ʾăry	ḥŭly	pĭry
Meaning	midst	iniquity	olive	lion	sickness	fruit
Absolute singular	תָּוֶךְ	עָוֶל	זַיִת	אֲרִי	חֳלִי	פְּרִי
Construct „	תּוֹךְ	עָוֶל	זֵית	אֲרִי	חֳלִי	פְּרִי
With light suffix	תּוֹכוֹ	עַוְלוֹ (?)	זֵיתוֹ	אַרְיוֹ	חָלְיוֹ	פִּרְיוֹ
With grave suffix	תּוֹכְכֶם		זֵיתְכֶם	—	חָלְיֵכֶם	פִּרְיֵכֶם (?)
Absolute plural	—		זֵיתִים	אֲרָיִים	חֳלָיִים	
Construct „	—		זֵיתֵי	אַרְיֵי	חָלְיֵי	
With light suffix	—		זֵיתָיו	אֲרָיָיו	חֳלָיָיו	
With light suffix	—		זֵיתֵיכֶם	אַרְיֵיכֶם	חָלְיֵיכֶם	

Notice, also, the forms שָׁוְא; גֵּיא, גֵּיא; שׁוּר, שְׁוָרִים; קְצֵוֹת, קְצָוֹת; תֹּהוּ; פְּתִי, פְּתָאִים.

B. THE PERFECT OF THE CAUSATIVE STEMS.

	THE ACTIVE, OR HIPHIL STEM		THE PASSIVE, OR HOPHAL STEM	
	Singular	Plural	Singular	Plural
Third masc.	הִקְטִיל	הִקְטִילוּ	הָקְטַל	הָקְטְלוּ
„ fem.	הִקְטִילָה	—	הָקְטְלָה	—

Second masc.	הִקְטַלְתָּ	הִקְטַלְתֶּם	הָקְטַלְתָּ	הָקְטַלְתֶּם
„ fem.	הִקְטַלְתְּ	הִקְטַלְתֶּן	הָקְטַלְתְּ	הָקְטַלְתֶּן
First com.	הִקְטַלְתִּי	הִקְטַלְנוּ	הָקְטַלְתִּי	הָקְטַלְנוּ

C. THE IMPERFECT OF THE CAUSATIVE STEMS.

Hiphil יַקְטִיל, יַקְטִילוּ, תַּקְטִילְנָה. Hophal יָקְטַל, יָקְטְלוּ, תָּקְטַלְנָה.

VIII.

NOUNS WHICH HAD ORIGINALLY ONE SHORT VOWEL FROM ROOTS WHOSE SECOND AND THIRD RADICALS WERE ALIKE ORIGINALLY, OR WHOSE SECOND RADICAL HAS BEEN ASSIMILATED TO THE THIRD.

Original form	kăpp	ḥĭṣṣ	ḥŭqq	'ănf	'ĭnz	dăll
Meaning	palm of hand	arrow	statute	nostril	goat	poor
Absolute singular	כַּף	חֵץ	חֹק	אַף	עֵז	דַּל
Construct „	כַּף	חֵץ	חָק(חָק)	אַף	עֵז	דַּל
With light suffix	כַּפּוֹ	חִצּוֹ	חֻקּוֹ	אַפּוֹ	עִזּוֹ	דַּלּוֹ
With grave suffix	כַּפְּכֶם	חִצְּכֶם	חֻקְּכֶם	אַפְּכֶם	עִזְּכֶם	דַּלְּכֶם

(1) Before endings the 2nd radical is doubled.
(2) In forms without endings the hiriq is lightened to sere, the Kibbus to holem

Original form	kăpp	ḥĭṣṣ	ḥŭqq	ʾănf	ʿĭnz	dăll
Meaning	palm of hand	arrow	statute	nostril	goat	poor
Absolute plural	כַּפַּיִם	חִצִּים	חֻקִּים	אַפַּיִם (dual)	עִזִּים	דַּלִּים
Construct „	כַּפֵּי	חִצֵּי	חֻקֵּי	אַפֵּי	עִזֵּי	דַּלֵּי
With light suffix	כַּפָּיו	חִצָּיו	חֻקָּיו	אַפָּיו	עִזָּיו	דַּלָּיו
With grave suffix	כַּפֵּיכֶם	חִצֵּיכֶם	חֻקֵּיכֶם	אַפֵּיכֶם	עִזֵּיכֶם	דַּלֵּיכֶם

Notice the forms אֵם *mother*, אִמּוֹת; יָם *sea*, construct יַם, or יָמּ; דַּי *sufficiency*, construct דֵּי; סַף *threshold*, plur. סִפִּים; הַר *mountain*, plur. הָרִים, הָרֵי (or הָרְרֵי), with the article הָהָר, הָהָרִים, with Hê directive הָהָרָה.

IX.

A. NOUNS WHOSE FIRST SYLLABLE IS UNCHANGEABLE.

Original form	ʿâlăm	ʾâfăn	mawṣăʾ	mâgĭn	măštăy
Meaning	eternity	wheel	exit	shield	feast
Absolute singular	עוֹלָם	אוֹפָן	מוֹצָא	מָגֵן	מִשְׁתֶּה
Construct „	עוֹלַם	אוֹפַן	מוֹצָא	מָגֵן	מִשְׁתֵּה
With light suffix	עוֹלָמוֹ	אוֹפַנּוֹ	מוֹצָאוֹ	מָגִנּוֹ	מִשְׁתּוֹ
With grave suffix	עוֹלַמְכֶם	אוֹפַנְכֶם	מוֹצָאֲכֶם	מָגִנְּכֶם	מִשְׁתְּכֶם

Absolute plural	עוֹלָמִים	אוֹפַנִּים	מוֹצָאִים	מִשְׁתִּים
Construct „	עוֹלְמֵי	אוֹפַנֵּי	מוֹצָאֵי	מִשְׁתֵּי
With light suffix	עוֹלָמָיו	אוֹפַנָּיו	מוֹצָאָיו	מִשְׁתָּיו
With grave suffix	עוֹלְמֵיכֶם	אוֹפַנֵּיכֶם	מוֹצָאֵיכֶם	מִשְׁתֵּיכֶם
So also	מִקְדָּשׁ	עִירִם	נִקְרָא	גּוֹלָה
	מִקְדָּשִׁים	עֵירִמִּים	נִקְרָאִים	גּוֹלִים

B. THE NIPHAL, OR REFLEXIVE STEM

(SOMETIMES, PASSIVE IN SENSE).

	PERFECT		IMPERFECT		IMPERATIVE		INFINITIVE	PARTICIPLE
	Singular	Plural	Singular	Plural	Singular	Plural	Abs. הִקָּטֵל	נִקְטָל
Third masc.	נִקְטַל	נִקְטְלוּ	יִקָּטֵל	יִקָּטְלוּ	—	—	(נִקְטֹל)	
Second „	נִקְטַלְתָּ	נִקְטַלְתֶּם	תִּקָּטֵל	תִּקָּטֵלְנָה	הִקָּטֵל	הִקָּטְלוּ	Cons. הִקָּטֵל	נִקְטַל

X.

A. MORE NOUNS WHOSE PENULT IS UNCHANGEABLE.

Original form	כֹּתֶב	măzbăḥ (?)	ḥâzăy	măḥănăy
Meaning	writing	altar	seer	camp
Absolute singular	כּוֹתֵב	מִזְבֵּחַ	חֹזֶה	מַחֲנֶה
Construct „	כּוֹתֵב	מִזְבַּח	חֹזֵה	מַחֲנֵה
With light suffix	כּוֹתְבוֹ	מִזְבְּחוֹ	חֹזֵהוּ	מַחֲנֵהוּ(וֹ)
With grave suffix	כּוֹתֶבְכֶם	מִזְבַּחֲכֶם	חֹזְכֶם	מַחֲנְכֶם
Absolute plural	כּוֹתְבִים	מִזְבְּחוֹת	חֹזִים	מַחֲנִים
Construct „	כּוֹתְבֵי	מִזְבְּחוֹת	חֹזֵי	מַחֲנֵי
With light suffix	כּוֹתְבָיו	מִזְבְּחוֹתָיו	חֹזָיו	מַחֲנָיו
With grave suffix	כּוֹתְבֵיכֶם	מִזְבְּחוֹתֵיכֶם	חֹזֵיכֶם	מַחֲנֵיכֶם

B. THE HITHPAEL, OR RECIPROCAL STEM.

	PERFECT		IMPERFECT		IMPERATIVE		INFINITIVE	PARTICIPLE
	Singular	Plural	Singular	Plural	Singular	Plural		
Third masc.	הִתְקַטֵּל	הִתְקַטְּלוּ	יִתְקַטֵּל	יִתְקַטְּלוּ	—	—	Abs. הִתְקַטֵּל	מִתְקַטֵּל
Second „	הִתְקַטַּלְתָּ	הִתְקַטַּלְתֶּם	תִּתְקַטֵּל	תִּתְקַטְּלוּ	הִתְקַטֵּל	הִתְקַטְּלוּ	Cons. הִתְקַטֵּל	מִתְקַטֵּל

XI.

NOUNS WHOSE FINAL SYLLABLE IS UNCHANGEABLE.

Original form Meaning	gădâl great	pākîḏ overseer	ʿănîy afflicted	zikkărân memorial
Absolute singular	גָּדֽוֹל	פָּקִיד	עָנִי	זִכָּרוֹן
Construct „	גְּדוֹל	פְּקִיד	עֲנִי	זִכְרוֹן
With light suffix	גְּדוֹלוֹ	ו „	עֲנִיּוֹ	זִכְרוֹנוֹ
With grave suffix	גְּדוֹלָם	כם „	עֲנִיָּם	זִכְרוֹנָם
Absolute plural	גְּדוֹלִים	ים „	עֲנִיִּים	זִכְרוֹנִים
Construct „	גְּדוֹלֵי	י „	עֲנִיֵּי	זִכְרוֹנֵי
With light suffix	גְּדוֹלָיו	יו „	עֲנָיָיו	יו „
With grave suffix	גְּדוֹלֵיכֶם	יכם „	עֲנֵיכֶם	יכם „
So also	עָצוּם			

B
The Imperative of Kal.

2nd	masc. sing.	קְטֹל
„	fem. „	קִטְלִי
„	masc. plur.	קִטְלוּ
„	fem. „	קְטֹלְנָה

XII.

FEMININE NOUNS FROM MASCULINE NOUNS WITH TWO SHORT VOWELS.

Original form Meaning	nădăvăt freewill offering	ʿărăvăt desert	ʿăgălăt waggon	ṣăʿăqăt cry	măliʾăt fulness.	băhămăth beast
Absolute singular	נְדָבָה	עֲרָבָה	עֲגָלָה	צְעָקָה	מְלֵאָה	בְּהֵמָה
Construct „	נִדְבַת	עַרְבַת	עֶגְלַת	צַעֲקַת	מְלֵאַת	בֶּהֱמַת
With light suffix	נִדְבָתוֹ	עַרְבָתוֹ	עֶגְלָתוֹ	צַעֲקָתוֹ	מְלֵאָתוֹ	בֶּהֱמָתוֹ
With grave suffix	נִדְבַתְכֶם	עַרְבַתְכֶם	עֶגְלַתְכֶם	צַעֲקַתְכֶם	מְלֵאַתְכֶם (?)	בֶּהֱמַתְכֶם
Absolute plural	נְדָבוֹת	עֲרָבוֹת	עֲגָלוֹת	צְעָקוֹת	מְלֵאוֹת	בְּהֵמוֹת
Construct „	נִדְבוֹת	עַרְבוֹת	עֶגְלוֹת	צַעֲקוֹת	מְלֵאוֹת	בֶּהֱמוֹת
With light suffix	נִדְבוֹתָיו	עַרְבוֹתָיו	עֶגְלוֹתָיו	צַעֲקוֹתָיו	מְלֵאוֹתָיו	בֶּהֱמוֹתָיו
With grave suffix	נִדְבוֹתֵיכֶם	עַרְבוֹתֵיכֶם	עֶגְלוֹתֵיכֶם	צַעֲקוֹתֵיכֶם	מְלֵאוֹתֵיכֶם	בֶּהֱמוֹתֵיכֶם

Compare also

תּוֹעֵבָה, תּוֹעֲבַת, תּוֹעֵבוֹת, תּוֹעֲבוֹת
מַמְלָכָה, מַמְלֶכֶת, מַמְלָכוֹת, מַמְלָכוֹת
עַמְקָה, עֲמֶקֶת, עֲמָקִים, עֲמָקוֹת
קְטַנָּה, קְטַנַּת, קְטַנִּים, קְטַנּוֹת

XIII.

FEMININE NOUNS FROM MASCULINES WITH ONE SHORT VOWEL.

Original form	mălkăth	dĭbrăth	ḥărpăth (?)	ḥŏkhmăth	ṭŭm'ăth
Meaning	queen	word	reproach	wisdom	uncleannes
With light suffix	מַלְכָּה	דִּבְרָה	חֶרְפָּה	חָכְמָה	טֻמְאָה
With grave suffix	מַלְכַּת	דִּבְרַת	חֶרְפַּת	חָכְמַת	טֻמְאַת
With light suffix	מַלְכָּתוֹ	דִּבְרָתוֹ	חֶרְפָּתוֹ	חָכְמָתוֹ	טֻמְאָתוֹ
With grave suffix	מַלְכַּתְכֶם	דִּבְרַתְכֶם	חֶרְפַּתְכֶם	חָכְמַתְכֶם	טֻמְאַתְכֶם
Absolute plural	מְלָכוֹת	דְּבָרוֹת	חֲרָפוֹת	חָכְמוֹת	טֻמְאוֹת
Construct „	מַלְכוֹת	דִּבְרוֹת	חֶרְפוֹת	חָכְמוֹת	טֻמְאוֹת
With light suffix	מַלְכוֹתָיו	דִּבְרוֹתָיו	חֶרְפוֹתָיו?	חָכְמוֹתָיו	טֻמְאוֹתָיו
With grave suffix	מַלְכוֹתֵיכֶם	דִּבְרוֹתֵיכֶם	חֶרְפוֹתֵיכֶם?	חָכְמוֹתֵיכֶם	טֻמְאֹתֵיכֶם

XIV.

FEMININE NOUNS WITH SEGHOLATE FORMATIONS.

Original form	yânikăth (?)	mišmărt (?)	nŭḥŭšăth (?)	kŭthŭnăth (?)	ṭăbbă'ăth	ṣărră'ăth
Meaning	sucking	guard	bronze	tunic	ring	leprosy
Absolute and Construct singular	יוֹנֶקֶת	מִשְׁמֶרֶת	נְחֹשֶׁת	כְּתֹנֶת	טַבַּעַת	צָרַעַת
With suffixes	יוֹנַקְתּוֹ	מִשְׁמַרְתּוֹ	נְחָשְׁתּוֹ	כֻּתָּנְתּוֹ	טַבַּעְתּוֹ	צָרַעְתּוֹ

Original form	yâuikăth(?)	mišmărt(?)	nŭḫŭšătḥ(?)	kŭthŭnăth(?)	tăbbā'ăth	ṣărrā'ăth
Meaning	sucking	guard	bronze	tunic	ring	leprosy
Absolute plural	יוֹנָקוֹת	מִשְׁמָרוֹת	No	כְּתֹנֶת (?)	טַבָּעוֹת	צָרָעוֹת
Construct „	יוֹנְקוֹת	מִשְׁמְרוֹת	plural	„	טַבְּעוֹת	צָרְעוֹת
With suffixes	„	„		„	„	„

XV.

NOUNS FROM LAMEDH HÊ ROOTS.

Original form	pĕry	'ărY	ḥŭly	sădăy	năḳîy	'ănăw	ḥâzăy
Meaning	fruit	lion	disease	field	pure	afflicted	seer
Absolute singular	פְּרִי	אֲרִי	חֳלִי	שָׂדֶה	נָקִי	עָנָו	חֹזֶה
Construct „	„	„	„	שְׂדֵה	נְקִי	עֲנִי	חֹזֵה
With light suffix	פִּרְיוֹ	אַרְיוֹ	חָלְיוֹ	שָׂדֵהוּ	נְקִיּוֹ	עֲנָוֹ	חֹזֵהוּ
With grave suffix	פִּרְיָכֶם ?	אַרְיֵכֶם	חָלְיָכֶם	שָׂדְכֶם	נְקִיָּכֶם	עֲנַוְכֶם	חֹזֵכֶם
Absolute plural	אֲרָיוֹת	אֲרָיִים	חֳלָיִים	פָּנִים	נְקִיִּים	עֲנָוִים	חֹזִים
Construct „	אַרְיוֹת	אַרְיֵי	חָלְיֵי	פְּנֵי	נְקִיֵּי	עֲנָוֵי	חֹזֵי

With light suffix	חֲזָיו	עֲנָנָיו	נְקָבָיו	פָּנָיו	חֲלָיָיו	אֲרָיָיו	אַרְיוֹתָיו
With grave suffix	חֲזֵיכֶם	עֲנָנֵיכֶם	נְקֵבֵיכֶם	פְּנֵיכֶם	חֲלָיֵיכֶם	אַרְיֵיכֶם	אַרְיוֹתֵיכֶם

The plural of צְבִי *gazelle* is צְבָאִים; of פֹּתִי *simple* is פְּתָאִים. Feminine of חֹזֶה = חֹזֵה, חֹזוֹת, חֲזוֹת; of שָׂדֶה = form יָפֶה *beautiful*, יְפַת, יְפוֹת, יְפוֹת. *פָּנִים face.

XVI.

NOUNS OF PECULIAR FORMATION.

	1.		2.		3.		4.
Original form	ăvĭy(?)		ʾaḥiy		ʾăḥăwăth		ʾămăhăth(?)
Meaning	father		brother		sister		maid
Absolute singular	אָב		אָח		אָחוֹת		אָמָה
Construct „	אֲבִי		אֲחִי		אֲחוֹת		אֲמַת
With light suffix	אָבִיו, (אָבִי my father)		אָחִיו (אָחִי my brother)		אֲחוֹתוֹ		אֲמָתוֹ
With grave suffix	אֲבִיכֶם		אֲחִיכֶם		אֲחוֹתְכֶם		אֲמַתְכֶם
Absolute plural	אָבוֹת		אַחִים		אֲחָיוֹת	or אָחוֹת	אֲמָהוֹת
Construct „	אֲבוֹת		אֲחֵי		אַחְיוֹת	or אֲחוֹת	אַמְהוֹת
With light suffix	אֲבוֹתָיו		אֲחָיו (אֲחֵי p. אֲחָי my brothers)		אַחְיוֹתָיו	or אֲחוֹתָיו	אַמְהוֹתָיו
With grave suffix	אֲבוֹתֵיכֶם		אֲחֵיכֶם		אַחְיוֹתֵיכֶם	or אֲחוֹתֵיכֶם	אַמְהוֹתֵיכֶם

	5.	6.	7.	8.	9.	10.
Original form	ʾiyš (?)	inšat	băyt	biny	bănyăt(?)	hărr
Meaning	man	woman	house	son	daughter	mountain
Absolute singular	אִישׁ	אִשָּׁה	בַּיִת	בֵּן	בַּת	הַר (הָהָר)
Construct „	אִישׁ	אֵשֶׁת	בֵּית	בֶּן־ (בֹּן־)	בַּת	הַר
With light suffix	אִישׁוֹ	אִשְׁתּוֹ	בֵּיתוֹ	בְּנוֹ	בִּתּוֹ	הָרוֹ
With grave suffix	אִישְׁכֶם	אִשְׁתְּכֶם	בֵּיתְכֶם	בְּנְכֶם	בִּתְּכֶם	הָרְכֶם
Absolute plural	אֲנָשִׁים	נָשִׁים	בָּתִּים	בָּנִים	בָּנוֹת	הָרִים
Construct „	אַנְשֵׁי	נְשֵׁי	בָּתֵּי	בְּנֵי	בְּנוֹת	הָרֵי (הַרְרֵי)
With light suffix	אֲנָשָׁיו	נָשָׁיו	בָּתָּיו	בָּנָיו	בְּנוֹתָיו	הָרָיו
With grave suffix	אַנְשֵׁיכֶם	נְשֵׁיכֶם	בָּתֵּיכֶם	בְּנֵיכֶם	בְּנוֹתֵיכֶם	הָרֵיכֶם

	11.	12.	13.	14.	15.	16.
Original form	yăwm	kily	may (?)	ʾiyr(?)	păy(?)	răʾš
Meaning	day	vessel	water	city	mouth	head
Absolute singular	יוֹם	כְּלִי	No	עִיר	פֶּה	רֹאשׁ
Construct „	יוֹם	כְּלִי	singular	עִיר	פִּי	רֹאשׁ

	יוֹמוֹ	כֵּלָיו		עִירוֹ	פִּיו (פִּיהוּ)	רֹאשׁוֹ
With light suffix	יוֹמָם	כֵּלֵיהֶם		עִירָם	פִּיהֶם	רֹאשָׁם
With grave suffix						
Absolute plural	יָמִים	כֵּלִים	מַיִם	עָרִים		רָאשִׁים
Construct „	יְמֵי	כְּלֵי	מֵי (מֵימֵי)	עָרֵי		רָאשֵׁי
With light suffix	יָמָיו	כֵּלָיו	מיו ?	עָרָיו		רָאשָׁיו
With grave suffix	יְמֵיכֶם	כְּלֵיכֶם	?	עָרֵיכֶם		רָאשֵׁיכֶם

17. שֵׁם name (from šimy(?)), cons. שֵׁם, שְׁמוֹ, שְׁמָם; plural שֵׁמוֹת, שְׁמוֹת.

18. שָׁמַיִם heaven (from šămăy), cons. שְׁמֵי, שָׁמָיו, שְׁמֵיכֶם.

19. עֵדוּת testimony, ? עֵדוֹת.

20. שֶׂה lamb, שֵׂיוֹ.

21. עַד until, עָדַי.

22. עַל upon, עָלַי, עָלָיו, עֲלֵיכֶם.

23. אֶל unto, אֵלַי, אֵלָיו, אֲלֵיכֶם.

24. יָד hand, יַד, יָדוֹ, יָדָם; יְדֵיכֶם, יָדַי, יָדָיו, יְדוֹת, יָדוֹת.

25. דָּם blood, דַּם, דָּמוֹ, דָּמִים, דְּמֵי, דָּמָיו, דְּמֵיכֶם.

יָשָׁן, ישנה, is another of the very few pers. nouns of this form plural is יְשֵׁנִים, יְשֵׁנוֹת

ILLUSTRATIONS

OF

GESENIUS' HEBREW GRAMMAR

WITH VOCABULARIES

BY

ROBERT DICK WILSON, PH. D., D. D.,
PROFESSOR OF SEMITIC PHILOLOGY IN PRINCETON THEOL. SEMINARY

PRINCETON
1906

ILLUSTRATIONS OF THE GRAMMAR.

This book is meant to give examples in illustration of the orthography and etymology of GESENIUS' Hebrew grammar. The sections, which the examples following illustrate, are given at the beginning of each lesson. All the words contained in the Hebrew bible twenty-five times, or more, have been used in the illustrations; so that the student who masters these, will not merely have acquired a knowledge of the elements of Hebrew grammar, but a working vocabulary as well. The words used in the illustrations will be found in the vocabularies at the end of the book:—the first of which contains the Hebrew words, and the second, under the corresponding numbers, their meanings in English.

The sections of this Text-book, which are denoted by the Roman numerals, will be found to correspond to the sections in the author's "Notes on Hebrew Orthography and Etymology". These "Notes" have been prepared especially for those who cannot afford to purchase the larger and more expensive grammar. It is the hope of the author, that all who can will procure both the grammar of GESENIUS and the "Notes on Orthography and Etymology".

כְּתִבוּ -d- קִשְׁטְ -e- סֵפֶר עֵנָב קָטַל -f- נַחַל בַּיִת
יְרֵב -g- קְטָלַנִי וַאדָנִי -h- מִדְבָּרָה -i- נַעֲרוֹ וַיֶּאֱסֹר
פָּעֲלוֹ בְּדִבַּר -k- יֶחֱזְקוּ פָּעַלְךְ -m- לְחִי -o- מַלְכָּה
וַיָּסַר וַיָּקָם חָכְמָה -p- תַּקְטִלְנָה קִמְנָה כָּתַבְתְּ
קָטַלְתִּי הִנֵּנוּ -q- אִמִּי בִּלּוֹ סַבּוּ שָׁמָּה הֵמָּה
-r- קָטַלְתְּ תּוֹסֵךְ

V. 1. Dagesh Lene Aspiration and Asperation. §§ 13, 21. — פָּרַץ יִפְרֹץ כֹּל לְכֹל -b- עַל־כֵּן עֵץ
פְּרִי בְּרֵאשִׁית וַיְהִי כַּאֲשֶׁר וַיְהִי־כֵן -c- וּמָצָא
בָהּ: רָאָה כִּי עָלַי פִּיהֶם: קָו בְּיָדוֹ -e- יִרְפָּא
קִטַלְתֶּם -f- רִדְפוּ מַלְכֵי -g- שָׁלַחַתְּ

2. Makkeph and Methegh. § 16. — כָּל־אָדָם: אֶת־כָּל־עֵשֶׂב: אֵת־כָּל־אֲשֶׁר־
לוֹ -d- הָאָדָם הָאַרְבָּעִים עֶבֶד־הַמֶּלֶךְ שָׁבְעֹתֵיכֶם
בְּנֵי־יִשְׂרָאֵל: מִי־לְךְ -e- וּבָנִים: וְזָהָב -f- קָטְלָה
יְרָאוּ: יָשְׁנוּ: שָׁת־לִי: אֹהֵב דָּעַת: יַעֲמֹד צֹעֲקִים:
יָקָבְנוּ יְהִיֶה אֶחְיֶה בָּתִּים אָנָּה -g-(a) הַמִּסְלָה לַמִּסְלָה
וַיְהִי־כֵן: וַיְהִי הָאָדָם: לַקְרָב: -(b)- הָאֹכֵל הַבְּרָכָה
-h- וַיִּשְׂבַּע לוֹ: רוּחַ־אֵל: -i- אָכְלָה יְרָאוּ יִרְאוּ אָכְלָה

VI. 1. Raphe.

מֶלֶךְ סְפַר שָׁתָה: שָׁלוּ בָהּ: — § 14e.

2. Dagesh forte.

נָתַנּוּ שַׁתִּי יִתֵּן לִמֵּד גְּמַלִּים הוֹלְלִים — §§ 12, 20.
תְּבָרְכְךָ הַלְלוּ -c- לְכָה־נָּא: לֶקָחָה־זֹאת: מֹשֶׁה
לֵאמֹר: וּמִשְׁנֶה־כֶּסֶף: -d- וְזֶה־שְׁמוֹ: מַה־פָּרַצְתָּ
-f- שָׁבִיתָ שֶׁבִי: עֹשֶׂה פְּרִי: אַרְצָה כְּנַעַן: מָלְאָה
שֹׂחַד: הָרָה לָךְ עֲשֵׂה־פְּרִי: עָשִׂיתָ קְעָרֹתָיו:
-g- קוֹמוּ צְאוּ: -h- עִנְבֵי עִקְבֵי מַמְגֵרוֹת -i- חָדֲלוּ
רָמוּ -k- הֲמָה אֵלֶה לָמָּה בַּמֶּה -l- רֹב עַם הָעָם
גַּן הַגַּן אַתְּ -m- וַיְהִי חַיְתוֹ עוֹרִים מִלְאוּ הַמְּקֵרָה
הִנְנִי יִקְחוּ תְּחָנְךָ זִכְרוֹן מִשְׁמַנֵּי כִסְאוֹ הַצְפַרְדְּעִים
חֲזִיוֹן הֶגְיוֹן יִשְׁאוּ

VII. Peculiarities of the Gutturals.

מִאֵן הָאָדָם הָעָם הָהָר יֶחֱבָא אֶחָד הֶחָג — § 22c.
הֶהָרִים הֶעָנִי הַחֹדֶשׁ מִחוּט הַהוּא בְּעֵר נִאַץ -d- זָבַח
שָׁמַע שָׁלַח יִשְׁלַח שִׁלַּח יַחְמֹד נַעַר -e- דֶּשֶׁא פֶּלֶא
כֹּחַ גָּבוֹהַּ נוֹעַ רֵעַ שִׁלַּח הַגְּבֹהַּ בֹּרֵא רוּחַ שָׁמוּעַ
בָּרוּא בְּרֹא הִשְׁלִיחַ יַגְבִּיהַּ מַזְרִיעַ בָּרִיא -h- פֹּעַל
אָהֶל לֶחֶם רֶחֶם -i- עֶמְדָה יֶהְגּוּ יֶחְבַּשׁ נֶאְדָּר
חֶבְלֵי יַעְתֵּק -k- הִלֵּל חַטָּה אִבַּד עִבַּר הֶגְיוֹן חֲזִיוֹן
עוֹרִים -l- אֲקַטֵּל אֱמֹר אֲהָלִים הַגִּיגִי הֱוֵה תְּהִלָּה
שָׁחֲטוּ הֶחֱזִיק חֲדָשִׁים עֲרָבָה אֶעֱשֶׂה הָעֲמַד
-m- שָׁלַחְתָּ יָדַעְתָּ גָּבַהְתָּ יַאְדִּיר תְּאַלַּף תְּהַגֶּה
נֶחְמַד אֶעְבְּרָה הָהְפַּךְ הָחְבָּאוּ תַּעֲמִדוּ נֶחֱרְבוּ

נֶאֱמְנוּ נָעָבְדֵם -o- אֱמֹר אֲלֵיכֶם אֲרִי אֲנִי הַרֹג
חֲמוֹר -p- מֵאָנָה הִטָּהֲרוּ שָׁחֲטוּ הָעֲלָה הַעֲמִיד
הֶעֱמִיד הָעֲמַד -q- בֵּרַךְ בָּרֵךְ בֹּרַךְ -r- וַיִּרְא וַיָּסַר

VIII. I. Feebleness of Aleph and Hê.

מָצָא מָלֵא הוֹצִיא מִלֹּא כָּלוּא מָצֹאת — § 23.
תְּמִצֶּאנָה מָלֹאת חֵטְא דָּשֵׁא -b- אָמַר מָאֲסוּ הוֹצִיאָה
לֶאֱכֹל נֶאְדַּר -c- רָאשִׁים פְּאֵרָה חִטְאִים חַטֹּאוֹת
מְלָאכָה יִשְׁמָעֵאל שִׁמְאל -d- וַיֹּאצֶל יֹאכֵל לֵאמֹר
וַאדֹנָי וַיהוָה לֵאלֹהִים יֹאמַר -e- בּוֹר רֵים יְמַלֵּא
-f- יָצָתִי שְׁלָתֵךְ אֹמַר -g-i- קָאם: רָאשׁ אָזוֹר
הָלְכוּא נָקִיא -k- (§ 14[a]) אַרְצָה אַרְצָה גָּבֹהַּ לַבֹּקֶר
בָּאָרֶץ יַפְקִיד סוּסוֹ בָּם -l- רָאוֹ הַכִּי שֶׁנָּא נָשָׂא

2. Changes of Wau and Yodh.

הוֹשַׁב יִקַּח עִבְרִי עָשׂוּ שָׁלוֹ זוֹ גּוֹי — § 24[b].
גָּלוּי יוֹשִׁיב מֵיטִיב גָּלָה שָׁלָה -c- בִּיהוּדָה וִיהוּדָה
כִּיאֹר לִיהוּדָה מִידִי -d- בֻּכָּה לֻקָּחָה פְּרִי תֹּהוּ
-f- צוּר דִּין יוֹם חִיק הוֹשִׁיב הֵיטִיב

IX. The Tone.

קָטַל קָטְלָה קִטַּלְתֶּם דָּבָר דִּבְּרוּ דִּבְרֵיכֶם — § 29.
לַיְלָה קָטַלְתְּ קִטַּלְתָּהוּ קַלּוּ קָמוּ וַיָּקֶם וַיָּקָם
-d- וַיֹּאמֶר וַיֵּלֶךְ -e- קָרָא לַיְלָה תֹּאכַל לֶחֶם
-f- לְבָעֵר קָלוֹן: הוֹלֵם פַּעַם -h- וַיִּכְתָּב־שָׁם -k- קָטַל
מַיִם קָטַלְתְּ אָרֵץ דִּבֵּר -l- אַרְבַּע -m- קָטָלָה מָלְאוּ
יִקְטְלוּ פְּרִי חֵצִי חֹלִי -n- יְהִי אֲנִי דְּבָרֵךְ יִשְׁמְרֵךְ
בָּךְ אֹתָךְ -o, p- אָגְבִי אָתָּה וַיָּמָת -q- וַיֵּלֶךְ

-s- יִתְהַלָּךְ -t- בְּעָיוּ -u- שָׁכָלְתִּי -v- אֶחָי יִתְנֶחָם

X. 1. The Character of the Vowels.

כְּתָב רָאשׁ -c- קָטַל יָד דָּבָר דִּבֵּר קְטָלָם — a, § 9.
-d- אַתָּ -e- נַחַל -f- יְדֵכֶם אֶרֶץ מֶלֶךְ קֶרֶן פְּרִי
-g- צַדִּיק יֶרְאוּ -h- קִטֵּל מִזְמוֹר וַיִּשְׁבְּ וַיִּפֶּן דִּבְרֵי
אֵיבְךָ בַּיִת -i- עֵינֵי -k- סֵפֶר שָׁנָה גִּלָּה בֵּן -l- עֵץ
יֵצֵא תֵּן־חֶלְקִי יִגֶּל -m- גְּבוּל גִּבְּלוֹ שֶׁלְחָן סָכָה
-p- יוֹם שָׁרְךָ -q- קִטֵּל אֱלוֹהַּ אֱלֹהִים -r- לְקַדֵּשׁ בִּרַּךְ
פְּעָלוֹ כֹּל כֻּלָּם כָּל־יִקְטֹל יִקְטְלוּ יִקְטָלְךָ אָכְלָה
אָכְלָה חָנֵנִי בָּתִּים כָּל־הָאָדָם וַיָּקָם שָׁת־לִי לָמָּה
-v- פָּעֲלוּ פָּעָלְךָ קָדָשִׁים

2. Changes of Vowels.

עֲנָלָה צְדָקָה קָטְלוּ יִקַּטְלוּ -e- דָּבָר — b, § 27.
דִּבַּר עָקֹב עֲקֹבִים עִקְּבִי יִקְטֹל יִקְטָלְךָ יִקְטְלוּ
כַּסְפִּי -d- יַד־יְהוָה: בֶּן הַמֶּלֶךְ: כָּל־הָעָם: אֵיבְךָ:
וַיָּקָם וַיֹּלֶךְ סִפְרֵי קָדְשִׁי מַלְכֵי אִמֵּי חֻקִּים עָזִּי
עַמִּי -e- קְטָלוּ סוֹפְתִי קִטָּלְךָ סוֹפָתְךָ -f- בֵּרַךְ בִּרַּךְ
-g- מָצָא מָצְאַתְּ יֹאכַל -h- קָטַל אֶרֶץ יִקְטְלוּ דִּבֵּר
הָאָרֶץ -i- שֵׁם שְׁמִי צִדְקַת בִּרְכַּת -k- דְּבַר גְּדוֹל
לְבָבִי תְּשׁוּבֶינָה -l- קָטְלָה יִקְטְלוּ כְּבֵדָה יִתְּנוּ
מַלְכֵי נַעֲרוֹ -m- דִּבְרֵיכֶם -n- נְקוּמוֹתָ מְנוּסָה
-o- יָקוּם יָקָם וַיָּקָם יָקִים יָקֵם וַיָּקֶם -p- אֲבִיתָר
-q- אֶחָיו הֶהָרִים הֶעָרִים הָאָב הָרֹאשׁ

XI. Changes of Consonants.

מִשְׁפָּם יִתֵּן לִנְגִּף וּנְגִעַ לְנָדֹר בְּנִפְלָ — c, § 19.
כְּנִשְׁאָ יִפֹּל יִגַּשׁ יִנְחַל יֵחַת יִנָּאֵף יִנָּהֵג יִנָּעֵם
יִנְטֹר הִנְדֹּף שָׁכַנְתָּ נָתַנּוּ נָתַתָּ -d יִקַּח נִלְקַח
תִּנָּשֵׂא (§ 54c) הִדַּכָּא הִטַּהֵר הִתַּמֵּם הִנַּבֵּא תִּכַּפֵּא
אַחַת -f קִטַּלְתּוּ -h נַחְנוּ דַּע קַח גַּשׁ -k לִקְרַאת
לַמֶּלֶךְ יַקְטִיל בַּאדֹנָי -l וַיַּרְא -m אֶזְרוֹעַ -n הִשְׁתַּמֵּר
הִצְטַדֵּק הִסְתַּבֵּל

XII. Rise of New Vowels and Syllables.

בִּפְרִי בִּיהוּדָה וְיהוּדָה לִנְפֹּל -b — a, § 28. וַאֲנִי
לֶאֱכֹל לָחֲלִי לַחְטֹב לֶאֱסֹר לֶהְיוֹת וֶהְיֵה -c יַעַמְדוּ
נֶהֱפְכוּ פָּעָלְךָ -d יִשְׁטֹ אָמַרְתְּ וַיִּבְךְ וְיֵרֶד וַיִּשְׁבְּ
וַיִּשְׁקֹ -e יֹרֶב שָׁלַחַתְּ בַּיִת הֶרֶף יֹגֶל נַחַל פְּרִי תְּהוּ

B. ETYMOLOGY: EMBRACING EXERCISES TO BE TRANSLATED INTO ENGLISH.(*)

I.

THE INSEPARABLE PREFIXES.(**)

I. I. The Inseparable Prepositions.

מִיעַר -b- מִידֵי מֵאָדָם מֵעָם מִחוּץ — a, § 102.
מֵהְיוֹת -d- לִפְנֵי כַּאֲרִי בַּעֲנִי לִיהוּדָה בֵּאלֹהִים
לֵאמֹר -f- לְתֵת לְלֶדֶת לְקַחַת -g- בְּזֶה לְזֹאת כְּאֵלֶּה
בְּכֶם כְּכֶם -h- לְמָיִם -i- לְעַד לְרֹב לְבֶטַח -k- בְּמֶה
-l- לָמָּה -m- לִיהוָה מִיהוָה לַאדֹנָיו

(*) Exercises to be translated from English into Hebrew will be found in Part II. The corresponding lessons have the same numbering.

(**) The student will point the following lesson in accordance with the rules in the sections cited.

2. The Conjunction Wau.

וְעַם וְאָדָם וְנַן -(b)- וְחַכַם וְאֶכֹל וְחָלִי — (a) § 104d.
ואלהִים וְאדֹנַי וּעְצֹר -(c)- וּלְכֹל וּמֶלֶךְ וּפְרִי וּבֵין
וְזָהָב -(d)- ויהִי וְהָיָה וְתִיתֶם -(e)- ובֹהוּ וּמֵת וְרָע

3. The Article.

הַשֶּׁמֶשׁ הַיְאֹר הַלְוִים -b- הַיְהוּדִים — a, § 35.
הַיְעָרִים הַיְסוֹד הַמְהוּמָה הַמְעָרָה הַמְרוֹמִים
-c- הָאָב הָאִישׁ הָאֵם הָאֱלֹהִים הָאוֹר הָרֶגֶל הָרֹאשׁ
-f- הַהוּא הַחֹדֶשׁ הַחָכְמָה הַחַיִל הַהֲמָה הַהֵם
הַהֲנָה הַחַי -g- הָעַיִן הָעֶבֶד הָעִיר -h- הָעֵם הָהָר
הָעֵין הָהָרִים הָעָוֹן -i- הַחָכָם הַחָג -k- הַחֲדָשִׁים
הָעֲמָרִים -n- בְּשָׁמַיִם לְעָם בְּהָרִים -o- בְּחֲדָשִׁים:
הָאָרֶץ הָהר: החג: העם: הפר: הארון: מָעוֹז לַתֹּם
דֶּרֶךְ יְהוָה:

II.

THE PERSONAL PRONOUNS.

II. The Personal Pronouns.

אָנֹכִי אָנֹכִי אֲנִי אֲנִי אָנִי — § 32 and Par. A page 536.
אַתָּה אָתָּה (§ 29o) אַתְּ אָתְּ הוּא הִיא (§ 29n) אֲנַחְנוּ
אֲנָחְנוּ נַחְנוּ נָחְנוּ אַתֶּם
י ו ה ד נו כֶם הֵם ן ם הֵן כֶן הוּ הָ ה
אַתֶּנָה אַתֵּן הֵם הֵמָּה הֵם הֵנָּה הֵן הֵן

The Inflection of the Masculine Noun.

סוּסִי סוּסוֹ סוּסָהּ סוּסִים סוּסֵי — b, p, § 91.
סוּסְךָ סוּסֵךְ סוּסֶךָ סוּסֵנוּ סוּסָם סוּסִים סוּסָן

סוּסְכֶם סוּסְכֶן -c- פְּרִיהֶם -d- שָׁדֵהוּ עָלֶהָ אוֹרֵהוּ
לְמִינֵהוּ רוֹחֵק -e- כַּפֶּכָה אָהֳלָה -f- כֻּלָּנוּ -h, i, g- סוּסַי
סוּסַיִךְ סוּסֶיהָ סוּסָהּ סוּסוֹ סוּסָם סוּסִי
סוּסָיו סוּסֵינוּ סוּסֵיכֶם סוּסֵיהֶם סוּסֵיכֶן סוּסֵיהֶן
סוּסֶיהוּ סוּסָיִךְ רֵעֵהוּ עֲוֹנֵנוּ -l- סוּסֵימוֹ סוּסֵיךְ

III.

UNCHANGEABLE NOUNS WITH SUFFIXES.

A. SINGULAR NOUN. MASCULINE.

III. Unchangeable Nouns with Suffixes. A. Singular Noun. Masculine.

אָנֹכִי — §§ 141[a, b], 140[a, b], 93[w], Par. I[i], 91[b, p], 89[a], 39[a].

גֵּר בָּאָרֶץ: לֹא כְצוּרָם צוּרֵנוּ: אַתֵּן צֹאנִי: אַתָּה
רָע: הוּא טוֹב: אַתָּה עֵד: אֲנִי גֵּר שָׁם: רָבַץ
שׁוֹרֵנוּ: שָׁכַב סוּסְךָ: סוּפָה: שָׁמַר כּוֹסִי: גָּדַל כֹּחוֹ:
לָמַד דִּינְכֶם: גָּדַל טוּבְךָ: קוֹלְכֶן טוֹב: וְאַתָּה רָע:
הוּא הָאִישׁ: אַתֶּם עֵדִים: שׁוֹרִי מֵת: הַגֵּר צַדִּיק:
יְהוָה עֵדִי: הוּא מֵת: קָבַר לוּחוֹ בָּעִיר: כָּתַב עַל־
לוּחַךְ: שָׁמַר הָאִישׁ צֹאנוֹ: רָבַץ שׁוֹרְךָ בַּבּוֹר:

B PLURAL NOUN. MASCULINE.

B. Plural Noun. Masculine.

לָמַד שִׁירַי: שָׁפַט הַדִּין בִּינִי — h, g- §§ 91, 40[c], 44[b].
וּבֵינֶךָ: סוּסַיִךְ רָעִים: שִׁירֶיךָ טוֹבִים: שִׁקּוּצֵיהֶם
וְגִלּוּלֵיהֶם עֵץ וָאֶבֶן כֶּסֶף וְזָהָב: קָבַר גְּרִיהָ הַמֵּתִים
בַּבּוֹר: עֵדֵיהֶם צַדִּיקִים: שִׁירֵיכֶם טוֹבִים לְרוּחִי:

גְּדַל הַסּוּס מִן הַשּׁוֹר: אַתָּה צַדִּיק מִן־עֵדֶךָ: רָבְצוּ
סוּסַיִךְ בָּעִיר: גְּרָיו מֻתִּים: שִׁירֵיכֶם רָעִים: קָטְלוּ
צַדִּיקִינוּ: כְּתַבְתֶּן שִׁירֵיכֶן עַל־לוּחַ: קָבְרוּ סוּסֵיהֶן
בֵּין הַבּוֹר וּבֵין הָעִיר

C. SINGULAR NOUN. FEMININE.

C. Singular Noun. Feminine.

§§ 132[a], 127[a], 92[h]. — §§ 89[e], 80[b]. — § 95, Rem. l, m, o, — s. — §§ 91[p, s], Par. I[d].

שָׁכְבָה אִמִּי עַל־הַסָּף: חַיִּים כֻּלְּכֶם הַיּוֹם: בְּשֵׁל
עִזָּיו בְּאִשּׁוֹ: קָבַץ כָּל־עַמּוֹ בְּאַפּוֹ עַל־הֶהָרִים:
שָׁמַרְנוּ כָל־חֻקָּתָיו: דְּרַשְׁתֶּם יְהוָה וְעֻזּוֹ: סִפֵּר
כָּל־חִצָּיו: סִפְרוּ כָל־עֲצָמַי: שָׁכְלוּ עִזֶּיךָ:

IX.

NOUNS WHOSE FIRST SYLLABLE IS UNCHANGEABLE.

IX. Nouns whose first syllable is unchangeable.

הָאוֹפַנִּים עֲגָלִים — Rem. nn-pp, § 93, Par. III.
וְהָאֲלָמִּים גְּבֹהִים: לְעוֹלְמֵי עוֹלָמִים יִשְׁמְרוּ הַנְּבִיאִים
בְּשִׁמִּי אֶת־חֻקֹּתַי: תִּשְׁמְרוּ כָּל־מִוְצָאֵי הַמִּקְדָּשׁ
וְכָל־מוֹבָאָיו: מִקְרָאֵי קֹדֶשׁ הֵם נִקְרָאִים: קִדְּשׁוּ
הַשֻּׁלְחָנוֹת לְקָרְבְּנֵיהֶם בְּמִשְׁכְּנוֹת הַמִּדְבָּר: שָׁבְרוּ
צוֹאֲרֵי כָל־הַנִּמְצְאִים עֵירֻמִּים: אֲזַכֵּר אֱלֹהִים
מָגְנִי וּמָעוּזִּי: יִשְׁפֹּט מִשְׁפְּטֵי צֶדֶק: יְקַדְּשׁוּ מוֹשְׁבֵי
כָל־הַתּוֹשָׁבִים: מִסְפְּרֵי צִבְאוֹת הַמַּלְאָכִים גְּדֹלִים:
תִּשְׁמְרוּ חֻקֹּתַי הַצַּדִּיקוֹת: הִנֵּה מִשְׁמַנֵּי הָאָרֶץ
מוֹשָׁבֶךָ: בְּקִצֵּה תֵּבֵל מִלֵּיהֶם: כְּנוֹר וְנֵבֶל וָיַיִן
מִשְׁתֵּיהֶם:

X.

LAST SUBJECT CONTINUED.

X. Last Subject Continued. אֲנִי שִׁמֵר — §§ 50 and 54, § 93 III[b] Rem. qq-ss.

חֻקֶּיךָ: אַתֶּם כְּתָבִים הַתּוֹרָה: קְטֹל אֹיְבֶכֶם עַל־
מִזְבַּח אֱלֹהִים: מוֹעֲדֵי אֹיְבֶיךָ מָחֲנֵיהֶם: הַכְּהָנִים
וְסֹפְרֵי הָעָם יִכְתְּבוּ מִשְׁנֵה מַרְאֵי הַחֹזִים עַל־לוּחֹת
הָאֲבָנִים: יִשְׁפְּטוּ הַשֹּׁפְטִים מוֹפְתֵי חֹזֵי: כָּל־מַעֲשֵׂי
מִקְוֵה סְחֲרֵי הַמֶּלֶךְ יִצְדָּקוּ: יָדְךָ עַל־עֹרֶף אֹיְבֶיךָ:
עִם גִּבּוֹר תִּתַּמָּם: הַקּוֹל מְדַבֵּר אֵלָיו: כָּל־אֹכְלָיו
יִטַּמָּאוּ: יִשְׁתַּמֵּר חֻקֹּתַי הַצַּדִּיקוֹת: מַה־נְּדַבֵּר
וּמַה־נִּצְטַדָּק: נִתְחַכְּמָה לוֹ: הִתְקַדְּשׁוּ לְמָחָר:

XI.

NOUNS WHOSE FINAL SYLLABLE IS UNCHANGEABLE.

XI. Nouns whose final syllable is unchangeable. פְּקַד — § 93, Par. IV, Rem.[tt-xx], § 85[uwl], § 84[k-u], § 50.

הַמֶּלֶךְ פְּקִידוּ עַל־הָעִיר: יִפְקְדוּ נְשִׂיאֵי בֵית
אֱלֹהִים: יִקְטָל־עָנִי וְאֶבְיוֹן: נָזַל מִשְׁפַּט עֲנִיִּי
עַמִּי: יִשְׁפֹּךְ דַּם הַנְּקִיִּים: כְּתֹב זִכְרוֹן מַעֲשַׂי
בַּסֵּפֶר: מִמִּזְרַח הַשֶּׁמֶשׁ וְעַד מְבוֹאוֹ גָּדוֹל שְׁמִי
בַּגּוֹיִם: כְּבוֹד הַקְּדוֹשִׁים גָּדוֹל מִכְּבוֹד הַנְּבִיאִים:
אֲדוֹן הָאֲדוֹן הַמְּשִׁיחַ הַנָּגִיד: הוּא שֹׁפֵךְ חֲרוֹנוֹ

עַל־נְדִיבִים עֲצוּמִים: הָרָקִיעַ בַּמִּקוֹמוֹת הָרְחוֹקִים:
דִּבַּרְתִּי בִּלְשׁוֹנִי דִּבְרֵי הַשָּׁלוֹם: הַמְאוֹרֹת הַגְּדֹלִים
בְּרִקִיעַ הַשָּׁמָיִם: עֲוֹן הַפָּרִיסִים גָּדוֹל:

XII.

FEMININE NOUNS (1) FROM MASCULINE NOUNS WHICH HAD ORIGINALLY TWO SHORT VOWELS AND (2) OTHERS WITH THE SAME INFLECTION AND CHANGES.

נִדְבַת יָדֵךְ — § 95, Par. II[a-c.] Rem. g-n. § 48[g-k.]

תְּקַדֵּשׁ לַיהוָה: עַרְבָתָה כְּגַן אֱלֹהִים: בִּרְכָתוֹ
עַל־עַמּוֹ: תִּמְשֹׁל בְּאַדְמָתְכֶם בִּצְדָקָתָה: עֶגְלָתוֹ
מְלֵאָה: בֶּהֱמֹת הַשָּׂדֶה טְמֵאוֹת: נִבְלַת אִישׁ תּוֹעֲבַת
הַקְּדוֹשִׁים: שְׁאֵלְתִי צַדִּיקָה: הַדָּגָה הַמֶּתָה בַּמַּיִם
הָעֲמֻקִּים: צַעֲקַת הָאַלְמָנוֹת תּוֹעֵבָה לֵאלֹהִים:
מַמְלְכוֹת הָעוֹלָם מְלֵאוֹת מִרְמָה: מְחִיר כְּלֵב
תּוֹעֲבַת יְהוָה: הִגָּה עָב קְטַנָּה כְּכַף אִישׁ: לֹא
מַחְשַׁבְתַּי מַחְשַׁבְתֵיכֶם נְאֻם אֲדֹנָי: תַּשְׁמֵדְנָה
הָאָרֶץ קְלֹלַת הָאַלְמָנוֹת:

XII. Feminine Nouns (1) from Masculine Nouns which had originally two short vowels, and (2) others with the same inflection and changes.

XIII.

FEMININE NOUNS FORMED FROM MASCULINES WHICH HAD ORIGINALLY ONE SHORT VOWEL.

גִּבְעוֹת הַצָּפוֹן — § 95, Par. I[a, b, c,] Rem. d-f, § 47[e, h.]

גְּבֹהוֹת מִן־גִּבְעוֹת הַקֶּדֶם: אִמְרוֹת יְהוָה אֲמָרוֹת

XIII. Feminine Nouns formed from Masculines which had originally one short vowel.

טְהֹרוֹת: דִּבְרוֹתֶיךָ חֶרְפַּת עוֹלָם: אֲדֹנִי חָכָם
כְּחָכְמַת מַלְאַךְ הָאֱלֹהִים לָדַעַת אֶת־כָּל־אֲשֶׁר
בָּאָרֶץ: דִּבְרוּ־לָנוּ חַלָּקוֹת: הַשְׁמִידוּ חֶלְקַת חֻמְדָתִי:
אַחֲרֵי טָהֳרָתוֹ מִטָּמְאָתוֹ יִקְדָּשׁ: יְהוָה צוּרִי וְלֹא
עַוְלָתָה בּוֹ: נֵזֶר מִשְׁחַת אֱלֹהָיו עָלָיו:

XIV.

FEMININE NOUNS WITH SEGHOLATE FORMATIONS.

XIV. Feminine Nouns with Segholate formations.

§ 95, Par.[e] and Par. III, Rem. p-r, § 94[b-h], § 90[g].

יַבְדִּיל הַפָּרֹכֶת לָכֶם בֵּין הַקֹּדֶשׁ וּבֵין קֹדֶשׁ הַקָּדָשִׁים:
אֶרֶץ מוֹלַדְתֵּנוּ לֶחָרְבוֹת הַשְׁמָמוֹת: כָּל־יִתְדֹת
הֶחָצֵר נְחֹשֶׁת: יִלְבַּשׁ כְּתָנְתּוֹ: צַרְעָתוֹ תִּדְבַּק־בָּךְ:
תִּשְׁמֹר מִשְׁמַרְתִּי: לִבְשִׁי בִגְדֵי תִפְאַרְתֵּךְ: הַכְבִּיד
נְחָשְׁתִּי: תִּשְׁכְּבִי עַל־מִטָּה כְּבֵדָה וּקְטָרְתִּי יַקְטִירוּ
לְפָנֶיךָ: טַבְּעוֹתֵיהֶם זָהָב וְהַכַּפֹּרֶת כָּסֶף: אֶל־הַנָּהָר
יוֹנְקוֹתֶיהָ: אֲסַפֵּר כָּל־מַלְאַכוּתֶיךָ: הַמָּאוֹר הַגָּדוֹל
לְמֶמְשֶׁלֶת הַיּוֹם וְהַמָּאוֹר הַקָּטֹן לְמֶמְשֶׁלֶת הַלָּיְלָה:
אַתָּה רָחוֹק מִכִּלְיוֹתֵיהֶם:

XV.

NOUNS FROM LOMADH HÊ ROOTS.

§ 93, Par. I[k], II[f], III[c], IV[b], Rem.[x-z, ll, mm, rr, ss, vv], § 87[a, b] and § 46 — לִי חַצֵי הַפְּרִי אֲשֶׁר בַּשָּׂדֶה: תְּבַקֵּשׁ פָּנַי: כָּל־פְּרִיו קֹדֶשׁ לַיהוָה: דַּם הַנְּקִיִּם עַל־יְדֵיהֶם: נָתַן חַצֵי שָׂדֵהוּ לַעֲנִיִּים: מְאֲרָיוֹת גָּבְרוּ: כָּבֵד חֹזֶה יְהוָה בְּאֵיֵי הַיָּם: וְהִנֵּה־לוֹ מִשְׁתֶּה בְּבֵיתוֹ כְּמִשְׁתֵּה הַמֶּלֶךְ: זְכֹר עָנְיִי יְהוָה: הָעֲנִיִּים וְהָאֶבְיוֹנִים אֱלֹהִים יִשְׁמֹר: הֶחָלָיִים רָעִים: לַחֲזִים מַרְאִים בְּמַחֲנֵה הַמֶּלֶךְ: כָּל־מִקְנְךָ תִּזְכֹּר:

XV. Nouns from Lomadh Hê Roots. Compare VI above.

XVI.

NOUNS OF PECULIAR FORMATION.

כָּל־אַנְשֵׁי הָעִיר גִּבּוֹרֵי חָיִל: רָאשֵׁי בֵּית אֲבוֹתֵיהֶם הָאֲנָשִׁים הָאֵלֶּה: אָחִי אִישׁ טוֹב: דִּבְרֵי שָׁלוֹם בְּפִיהוּ וּמְזִמּוֹת מִרְמָה בְּלִבּוֹ: הָאֶבֶן הַגְּדוֹלָה עַל־פִּי הַבְּאֵר: פִּי מְדַבֵּר אֲלֵיכֶם: מֻחָקִי צָפַנְתִּי אִמְרֵי פִיו: קָרוֹב אַתָּה בְּפִיהֶם: אֲחֵיהֶם רָאשִׁים לְבֵית אֲבוֹתָם: נִקְבְּצוּ אֵלָיו כָּל־זִקְנֵי הָעָם רָאשֵׁיהֶם וְשֹׁפְטֵיהֶם: אֲנִי אֲחוֹתוֹ אֵשֶׁת אָחִיו: אָנֹכִי אֲמָתְךָ בַּת אִישׁ עִירֶךָ וּשְׁמִי רוּת: תִּכְתֹּב שִׁשָּׁה מִשְׁמוֹתָם עַל־הָאֶבֶן: וְשָׁמַר אֶת דִּבְרֵי הַתּוֹרָה הַזֹּאת עַבְדְּךָ וַאֲמָתֶךָ:

XVI. Nouns of Peculiar Formation

כָּל־אַנְשֵׁי הָעִיר גִּבּוֹרֵי — §§ 96, 91[c], §§ 34, 47, 103.

עַל־עֲבָדַי וְעַל אֲמָהוֹתַי אֶשְׁפֹּךְ רוּחִי בַּיּוֹם הַהוּא:
הָאָרֶץ הִנֵּה רַחֲבַת־יָדַיִם לִפְנֵיהֶם: לָהֶם עָרֵי

וָשֶׁבַע שְׁנַיִם שְׁנַיִם בָּאוּ אֶל־הַתֵּבָה: אִישׁ אֶחָד
אִישׁ אֶחָד לַשַּׁבָּט תִּקְחוּ לָכֶם שְׁנֵי עָשָׂר אֲנָשִׁים
מִשִּׁבְטֵי יִשְׂרָאֵל: בַּחֲמִשִּׁים וְחָמֵשׁ שָׁנָה לְגָלוּתֵנוּ
יוֹשִׁיעֵנוּ: וַיְהִי בִּשְׁלֹשִׁים וְשֶׁבַע שָׁנָה לְגָלוּת מֶלֶךְ
יְהוּדָה בִּשְׁנֵים עָשָׂר חֹדֶשׁ בְּעֶשְׂרִים וַחֲמִשָּׁה
לַחֹדֶשׁ נָשָׂא מֶלֶךְ בָּבֶל אֶת־רֹאשׁ מֶלֶךְ יְהוּדָה:
הָיָה דְּבַר יְהוָה אֵלָיו בִּימֵי יֹאשִׁיָּהוּ בִּשְׁלֹשׁ־עֶשְׂרֵה
שָׁנָה לְמָלְכוֹ: וַיְהִי בְּאַרְבָּעִים שָׁנָה בְּעַשְׁתֵּי־עָשָׂר
חֹדֶשׁ בְּאֶחָד לַחֹדֶשׁ דִּבֶּר מֹשֶׁה כְּכֹל אֲשֶׁר צִוָּה
יְהוָה אֹתוֹ: הָיוּ יָמָיו מֵאָה וְעֶשְׂרִים: שְׁלֹשִׁים
וּמֵאָה שֶׁקֶל מִשְׁקָלָהּ: שָׁפַט עַמִּי מֵאַת שָׁנָה
וְשִׁבְעִים שָׁנָה: אַרְבַּע מֵאוֹת שָׁנָה עָבְדוּ מַלְכֵי
מִצְרָיִם: אֶת־הָאֶלֶף וּשְׁבַע הַמֵּאוֹת עָשָׂה אֲדָנִים
לָעַמּוּדִים: וַיְהִי מְאַת כִּכַּר הַכֶּסֶף לָצֶקֶת אֵת
אַדְנֵי הַקֹּדֶשׁ: נָתַתִּי אֶלֶף כֶּסֶף לְאָחִיךָ: פְּקַד
מָאתַיִם אֶלֶף רַגְלִי וַעֲשֶׂרֶת אַלָּפִים.

לֹא = not
לַא = not
אֵת = with or sign of acc.
עַל = upon, against
אֶל = unto
עֹל = yoke
אֵל = unto (see notes)

כֹּל = all
מָה = what?
מִי = who?
הָיָה, הָיוּ, יִהְיֶה = from הָיָה = to be. } followed by prep. ל = "be to" or "become"
כִּי = for; but.
עִם = with

II. A. THE HEBREW WORD-LIST.(*)

1	אָב	19	אֹהֶל	37	אָח
2	אָבַד	20	אוֹ	38	אֶחָד
3	אָבָה	21	אִוָּה	39	אֲחוֹת
4	אֶבְיוֹן	22	תַּאֲוָה	40	אָחַז
5	אָבַל	23	אֱוִיל	41	אֲחֻזָּה
6	אֵבֶל	24	אוּלַי	42	אָחַר*
7	אֶבֶן	25	אוּלָם	43	אַחַר
8	אָגָם	26	אָוֶן	44	אָחֵר
9	אֵד	27	אוֹפָן	45	אָחֹר
10	אָדוֹן	28	אוֹצָר	46	אַחֲרוֹן
11	אַדִּיר	29	אוֹר	47	אַחֲרִית
12	אָדָם	30	אוֹר	48	אַי, אֵי, אַיֵּה
13	אֹדֶם	31	מָאוֹר	49	אִי
14	אָדֹם	32	אוֹת	50	אֵיב
15	אֲדָמָה	33	אָז	51	אֵיךְ, אֵיכָה
16	אֶדֶן	34	אָזַל	52	אַיִל
17	אָהַב	35	אֹזֶן	53	אֵימָה
18	אַהֲבָה	36	אָזַן	54	אַיִן

(*) The numbering of the pages and words in the Hebrew list corresponds to the numbering in the list of English words which follows. This first list contains—1. All words occurring in the Hebrew Bible twenty-five times, or more.—2. The words found in Gen. I—IV.—3. A few words, besides, which were needed to illustrate certain grammatical principles, or forms. Most words, occurring less than twenty-five times, are marked with a cross.

1404 Ninth.

PRINTED BY W. DRUGULIN, LEIPZIG, GERMANY.
REPRINTED BY PRINCETON UNIVERSITY PRESS, 1908.

Conjugations of the Verb, & their Meanings, according to Gesenius.

Active		Passive
1. Kal	קָטַל to kill	(wanting)
2. Niphal	נִקְטַל to kill one's self	(very rare)
3. Piël	קִטֵּל {to kill many / to massacre}	Pual, קֻטַּל
4. Hiphil	הִקְטִיל to cause to kill.	Hophal, הָקְטַל
5. Hithpael	הִתְקַטֵּל to kill one's self.	Hothpael, הָתְקָטַל

In Dr. Chas. Wilson's grammar, the Niphal is considered the Passive of the Kal (Hophal - "he was caused to kill")

Indicative Active. Past time. פָּקַד he visited
Participle Present. פֹּקֵד visiting
" Preterite. Pahul. פָּקוּד visited
Infinitive פְּקֹד or פָּקוֹד to visit.
Imperative פְּקֹד or פָּקוֹד visit thou
Future. (Imperf.) יִפְקֹד. He shall visit.
Niphal Passive Voice
Preterite. נִפְקַד he was visited
Participle נִפְקָד
Infin. הִפָּקֵד to be visited
Imper.
Fut. etc.

Another list:
Kall = to kill
Niphal = to be killed
Piel = to kill many, or to massacre
Pual = to be massacred
Hiphil = to cause to kill
Hophal = to be caused to kill
Hithpael = to kill ones self.

HEBREW SYNTAX.

BY

REV. A. B. DAVIDSON, LL.D., D.D.,

PROFESSOR OF HEBREW AND OLD TESTAMENT EXEGESIS,
NEW COLLEGE, EDINBURGH.

THIRD EDITION.

"A companion volume to the author's *Introductory Hebrew Grammar*, the excellence of which may be inferred from the number of editions through which it has passed. . . . This 'Syntax' is, undoubtedly, the best of its size hitherto produced in this country, and is in every way well adapted for students and for practical teaching."—*London Quarterly Review.*

NEW YORK: CHARLES SCRIBNER'S SONS.

PREFACE TO THE TENTH EDITION.

THE necessity for another Edition of this Introductory Grammar leads me to hope that it has been found useful to beginners in Hebrew, and that the attempt made in it to combine a statement of the principles of the language with progressive exercises for practice upon them has not altogether failed.

In this Edition some parts in previous ones that appeared too brief and obscure have been made fuller and simplified; examples have been added, where wanting, and some additional Tables and Paradigms introduced. It is hoped that these changes will be found to be improvements.

Some irregularity in the grammatical order of the sections has naturally been occasioned by the requirements of an Exercise Book. It was necessary, for example, to introduce the Inseparable Prepositions and the Conjunction at an early stage, and also to make the First Declension of Nouns precede the Verb, in order to have materials for the construction of

sentences; but the proper grammatical order has been followed as closely as possible, and the outline of Grammar has been kept distinct from the Exercises, in order that, if desired, it may be used without them.

I have to express my thanks to several scholars and teachers who have kindly offered me useful suggestions and corrections, particularly the Rev. J. T. Fowler, Vice-Principal of Bishop Hatfield's Hall, and Hebrew Lecturer in the University of Durham; and to Mr. J. Iverach Munro, who has greatly helped me by reading the proofs.

EDINBURGH, *November* 1891.

OF SOUNDS AND WRITING.

§ 1. HEBREW ALPHABET.

Name	Form		Sound and Sign	Signification of the name	Numerical value
'Á-leph	Final	א	'	Ox	1
Bêth		ב	b, bh	House	2
Gí-mel		ג	g, gh	Camel	3
Dă-leth		ד	d, dh	Door	4
Hē		ה	h		5
Wāw (Vāv)		ו	w, v	Hook	6
Zá-yin		ז	z (in *zero*)	Weapon	7
Ḥêth		ח	ḥ	Fence	8
Ṭêth		ט	ṭ (lingual)		9
Yôdh		י	y	Hand	10
Kaph	ך	כ	k, kh	Bent hand	20
Lă-medh		ל	l	Ox-goad	30
Mêm	ם	מ	m	Water	40
Nûn	ן	נ	n	Fish	50
Ṣă-mekh		ס	ṣ	Prop	60
'Á-yin		ע	'	Eye	70
Pē	ף	פ	p, ph	Mouth	80
Çā-dhê	ץ	צ	ç (ts *or* ss)		90
Qôph		ק	q (guttural k)		100
Rêsh		ר	r	Head	200
Sîn, Shîn		שׂ שׁ	s, sh	Tooth	300
Tāw (Tāv)		ת	t, th	Sign or cross	400

1. These 22 letters are all consonants Hebrew is written from right to left.

2. The letter א expresses simply the emission of the breath. It may be well heard if in such words as *ye'eṣoph*, *yo'omar*, the stream of sound of the first vowel be suddenly shut off, and the second vowel uttered with a new emission of breath.

The letter ח had probably two sounds, one rough like *ch* in the Scotch word *loch*, and another a smooth deep sound of *h* very difficult to produce.

The letter ע had also two sounds, the one a sharp guttural sound, bearing the same relation to א that ח bears to the simple ה, the other a vibratory palatal sound like the French *r*.

These three letters, along with ק, represent peculiar Shemitic sounds.

3. Six of the letters have a double pronunciation. The difference is indicated by a point in the bosom of the letter, thus: ת פ כ ד ג ב have the sounds *bh* (v), *gh*, *dh* (th in *this*), *kh* (ch in *loch*), *ph*, *th* (in *think*), but ד ג ב &c. have the ordinary sounds of *b g d k p t*. This point is called Daghesh (§ 7).

4. The letter ו is sounded by most Scholars like *w* though some give it the sound of *v*.

The *lingual* sound ט *ṭ* is produced by pressing the flat of the tongue to the top of the mouth.

The sign שׁ *Shin* sounds *sh*; שׂ *Sin* sounds *s*, and so ס.

5. The five letters *k m n p ṣ*[1] have each two signs, of which the second is used when the letter is the last consonant of a word. All the finals except *m* have a tail coming below the line, and no other letter except *qoph* comes below the line.

6. *The letters and signs in the column marked* "sound and sign", Table p. 1, *are those for the most part now adopted to represent the Hebrew letters, and should be employed in transliteration into English.*

[1] The sound of this letter was probably a strong flat *ss;* but the Alphabet has so many *s* sounds that the traditional *ts* may be retained for the sake of distinction.

Rem. *a*. On 2. The clear sound of ע is represented in the Sept. by the *spiritus asper* or *lenis* of the Greeks (the former of which is now generally adopted as the sign of the letter), and the gargling sound by the letter γ. Cf. Gen. 2. 8; 10. 21; 10. 19. It is decidedly wrong to represent either of its sounds by the nasal *ng*.

Rem. *b*. Observe how the following letters are distinguished: ב *b* has a foot-stroke going behind, כ *k* is round and נ *n* square, while ג *g* is broken at the foot; ד *d* is square at the top, and ר *r* is round; ה *h* is open at the top, ח *ḥ* is shut, and ת *th* has a foot at the left; י *y* does not touch the line, ו *w* does, ז *z* has a cross-stroke at the top, while ן final *n* comes under the line; ס *ṣ* is round and ם final *m* is square; ט *ṭ* is open at the top and מ *m* open at the foot.

EXERCISE. WRITE THE FOLLOWING IN ENGLISH AND HEBREW.

בנו, דבר, ירד, ירך, גנב, ובזי, ימט, טעם, מעט, עצה, החשך, קצתם, כפים, מגן, מים, זין, כנען, אתה.

bh, b, l, lm, ml, ṣṭ, shn, lkh, gdh, dgh, qvph, rç, kph, çv, hm, zyn, mṣ, mṭ, ʿç, rʿ, ʾm, yvn, nvn, mym, ʿvphph, ḥmṣ, çyç, tmm.

N.B. The forms *bh, kh* &c. represent ב, כ &c. without the dot; *b, k* &c. the dotted letters (No. 3).

§ 2. VOWEL SOUNDS. VOWEL LETTERS.

1. *Vowel Sounds.* The three primary vowel sounds in Hebrew, as in other languages, are A I U (pronounced *ah ee oo*) which pass through the following modifications:

		A	I	U
a	primary pure short vowels	a	i	u
b	deflected short	(e, i)	e	o
c	pure long vowels	â (ô)	î	û
d	diphthongal long vowels		ê	ô
e	extension of pure short to tone long	ā	ē	ō
f	extremest shortening of a vowel	ᵉ ă	ᵉ ĕ	ᵉ ŏ

This table is not exhaustive, but it contains the main elements of the system. See the *Rem.* on p. 4.

1) *Pure short vowels.* The first line exhibits the three primary vowel sounds *a i u;* and the second line the deflection of these into related short sounds. The vowel *a* passes many times into *e*, and then further into *i*. The sounds *e o* have now at least equal currency with *i u*.

2) *Pure long vowels.* The pure long vowels *â î û* may be supposed to arise from the pure short by simple extension or duplication; or by short vowels coalescing with *y*, *w*, as *iy* = *î*, *uw* = *û*. The pure long *â* is less common than the others, *ô* being often found instead of it.

3) *Diphthongal long vowels.* Another class of long vowels are the diphthongal, *ê ô*, which have arisen from the vowel *a* coming before *i* and *u*, or before *y* and *w*, thus $\left.\begin{matrix} ai \\ ay \end{matrix}\right\} = ê$ $\left.\begin{matrix} aw \\ au \end{matrix}\right\} = ô$. Hebrew hardly uses the diphthongs *ai* and *au* (the sounds in *buy* and *how*), preferring, like English and French, the sounds *ê* and *ô* instead of them.[1]

4) *Tone-long and indistinct vowels.* The great strength of the Accent or Tone in Hebrew seems to affect short vowels in two ways: on the one hand it extends those in its immediate neighbourhood, giving rise to the vowels called *tone-long ā ē ō;* and on the other hand it greatly shortens those at a distance from it, giving rise to a class of sounds, which, though vocalic, are too brief and indistinct to perform the functions of real vowels. The commonest of these indistinct sounds is a very short indefinite sound, nearest perhaps to *e* in the syllable *be* of *believe*,—represented by the small ^{e} above the line;[2] but others approach so much towards distinctness that their affinity to one or other of the three vowels *a e o* can be detected; they are *ă ĕ ŏ*.

Rem. In the above Table the letters A I U indicate the three primary, generic vowel sounds, and the small letters the actual vowel sounds of the language. The notation adopted is convenient. The *pure long* and *diphthongal* vowels (both of which are unchangeable) are indicated by the circumflex, *â* &c.; the *tone-long* vowels (which are changeable) by the long mark, *ā* &c.; the *indistinct* vowels by the short mark, *ă* &c.; while the *simple short* vowels remain unmarked.

2. *Vocalization.* All the Shemitic Alphabets consisted originally of consonantal signs only (§ 1. 1). It is characteristic of their first efforts towards vocalization to make

[1] The sounds *ay* often combine into an open *ê* with the tone, instead of forming the more extended *ê*.

[2] The same sound is heard in German words beginning with two conss., e. g. *knie* i. e. *k^{e}nie*.

use of certain feeble consonants to represent vowels, particularly at the end of words. The various dialects differ considerably in the degrees of completeness to which they have developed this method of vocalization.

3. The consonants used in Hebrew for this purpose are א ה ו י, which on account of this use have sometimes been called *vowel letters*, thus:

1) The guttural, or *a* sound was indicated by the guttural letter *Aleph*, when not final (though indication of non-final *a* was rare), and sometimes when final.

Final *a* was chiefly indicated by *He*.

2) The palatal, or *i* and *e* sounds were indicated by the weak palatal *Yod*.

Final *e* was often indicated by *He*, but not final *i*.

3) The labial, or *u* and *o* sounds were indicated by the weak labial *Vav*.

Final *o* was often indicated by *He*, but not final *u*.

Briefly: *i* and *e* (medial and final) *were represented by* י
u and *o* (medial and final) . . . . . ו
all *finals* (except *i* and *u*) . . . . . ה

Rem. In this textual vocalization, vowels of the *second* class (*i* and *e*) and of the *third* class (*u* and *o*) were almost always indicated by the vowel letters, when *final*, less uniformly when medial; in the latter case they were often so indicated when *diphthongal*, also when *pure long* (*ê ô î û*), but not when *tone-long* (*ē ō*), nor when short. Vowels of the *first* class (*a* sounds) were rarely indicated when not final, and not uniformly even when final.[1]

[1] See note 2, p. 8.—The above statements regarding the so-called *vowel-letters* are general; their use can hardly be understood without a knowledge of the history of the language. 1. It is probable that they were used at first chiefly at the *end* of words, e.g. to mark pronominal suffixes (§ 19) and inflectional terminations, which were important for the sense. 2. In the *middle* of words they were chiefly used where *w* and *y* were elements of the word, e. g. formed diphthongs afterwards pronounced as vowels, or characterized the root (Ayin Vav and Yod verbs, § 40). 3. Later their use was extended to mark long vowels in general.—There is thus a great want of uniformity in the usage. In general they are most employed towards the end of words, and when the same long vowel occurs twice in a word it is usually only once written fully.—The representation of final *a* by *Aleph* is mostly late (usual in Aramaic), **Num. 11. 20, Is. 19. 17, Ez. 27. 31; 31. 5; 36. 5, Ru. 1. 20, Lam. 3. 12, Ps. 127. 2, Dan. 11. 44.**

EXERCISE. WRITE THESE WORDS IN ENGLISH LETTERS:

נא, מה, לה, לי, לו, לין, לון, מי, מימי, שילו, קומה, לולי, סירים, היניק, הושיעה, סוסים, הוריתי, ראמות, קול, קולותינו, עוֹם, הובישו, הילכי, הוליכו:

Write these Hebrew words, expressing the vowels by *vowel letters:*

shûr, shôr, shîr, shîrîm, ṣûṣ, ṣûṣôthênû, shâṭîm, qôç, lî, lô, lû, mê, mêshîbh, môth, hêlîl, ḥûl, ḥîlâ, çîph, mêqîç, ṭôbhê, nîrî, hôshîbhû, rîn, hôlîkh, hêlîkhû, lûlê, mênîqôthênû.

§ 3. EXTERNAL VOWEL SIGNS. THE MASSORETIC POINTS.

1. So long as Hebrew was a living language, the helps to vocalization described in § 2. 3, though scanty, might be found sufficient. But when the language ceased to be spoken and became unfamiliar, fuller representation of the vowels was needful for correct reading. This necessity, in combination with the literary activity of the time, gave rise to the present very complete system of vowel signs.

As the pronunciation of the language was not expressed by signs but handed down by tradition, this tradition became an important branch of study. The word for "tradition" is *Massôrah,* under which term was embraced the whole Textual Criticism of the Scriptures, including the vocalization and reading. Hence those who employed themselves about this have been called Massoretes, and the new system of vowel signs introduced by them is named the Massoretic System of Points.

The history of this system is difficult to trace. The names of its authors are quite unknown. So complicated and perfect a machinery of signs could have been matured only very slowly and by successive generations of labourers. The system probably dates from the sixth and following centuries; neither Jerome (d. 420) nor the Talmud (c. 500 A.D) appears to know anything of vowel *signs.* Being the result of a formal scientific effort to express the pronunciation of the language, it is, like all systems of vowel notation arising in similar circumstances, completely phonetic; the new signs, however, are not regarded as integral

parts of the word and are not placed among the consonants, but, with rare exceptions, beneath or above them, *outside* the word.

The names given to the vowel signs probably have some reference to the action of the mouth in uttering the sounds. These sounds are contained in the first syllable of most of the names. The signs have probably all arisen by various modifications from the single point or dot.

2. TABLE OF EXTERNAL VOWEL SIGNS OR MASSORETIC POINTS.

	A class.		I class.		U class.	
Short vowels	*páthaḥ* —	*a* fat	*ḥîreq* —	*i* pin	*qibbûṣ* —	*u* put
			ṣ^eghôl —	*e* pen	*qam. ḥaṭûph* —	*o* on
Long vowels	*qâmeṣ* —	*â ā* small	*ḥîreq* —	*î* ravine	*shûreq* —	*û* true
			ṣērê —	*ê ē* pain	*qibbûṣ* —	
					ḥôlem —	*ô ō* bone
Indistinct vowels	*simple sh^eva* .... —	*e*	—	*e*	—	*e*
	composite sh^evas or *ḥaṭephs* .... —	*ă*	—	*ĕ*	—	*ŏ*

1) The vowels in the English words annexed probably pretty well correspond to the Hebrew vowels, e. g. ◌ֲ = the *a* in *small;* ◌ַ = the *a* in *fat* &c. The notation *â*, *ā*, *a*, *ê*, *ē* &c. in the above Table is the same as that in Table § 2, p. 3.

2) *Long and Short signs.* There are five short signs, viz. ◌ֲ, ◌ַ (short), ◌ֳ, ◌ֱ, and ◌ֶ; and five long, viz. ◌ָ, ◌ֵ (long), ◌ֹ or ◌ׂ (long), ◌ֻ, and ◌ִ. When this Table is compared with that in § 2, to which it corresponds, it will be seen that the Massoretes invented only one sign for any long vowel sound, expressing a pure long, diphthongal, and tone long sound by the same symbol.[1]

The representation of the vowels *i* and *u* was also peculiar. In the case of the vowel *i* the one sign ◌ִ was thought sufficient to represent both its long and short sounds, as הִשְׁמִדָם *hish-mî-dhām* (he destroyed them). Short *u* is expressed by *qibbûṣ,* as שֻׁלְחָן *shul-ḥān* (a table). Long *û* was usually already represented in the text by *vav*, in which a point was inserted, forming *shûreq,* as קום, *qûm,* pointed קוּם (to arise). When *vav* was not already expressed *û* was indicated by *qibbuṣ*, as קם, *qûm*, pointed קֻם.[2]

3) *Indistinct vowels. Sh^{e}va simple and composite.* The name *sh^{e}va,* a word of doubtful meaning, was given to that indistinctest of all sounds resembling the swift *e* in *believe*, § 2. 1. 4). Its sign is two perpendicular dots. This sh^{e}va is so indistinct that the class of vowel to which it belongs cannot be detected, and hence it is common to the three classes. See § 6, Table *d.*

The other three indistinct vowels approached so much towards distinctness that the class of vowel sound to which they belonged could be detected, though they did not reach the rank of full vowels § 2. 1. 4). They thus seemed to

---

[1] In other words their system was phonetic simply not etymological.

[2] It is considered an anomaly by the punctuators when short *u* is represented in the text by *vav*, and attention is drawn to it in a note, e. g. Gen. 2. 25, Is. 51. 4, Ps. 102. 5. The same is the case when short *o* is represented by *vav*, e. g. 2 Sam. 13. 8, Is. 18. 4, and also when short *i* is represented by *yod*, e. g. 1 Sam. 17. 35, Prov. 30. 17.

stand midway between the simple sh^{e}va and true vowels, and are indicated by signs compounded of simple sh^{e}va and the three short vowels, ֲ, ֱ, ֳ. Hence they are often named *Composite sh^{e}vas.* Being also vocalic sounds perceptibly of the nature of the short vowels they are often called *swift* or *hurried* short vowels: *ḥāṭēph pathaḥ*, *ḥāṭēph ṣ^{e}ghôl*, *ḥāṭēph qāmeṣ*. This peculiar degree of vowel sound was heard chiefly in connexion with the consonants called *gutturals,* § 8.[1]

Rem. The sign of simple sh^{e}va is also put under every consonant without a vowel of its own, if it be sounded and not final, § 5. 6. The sh^{e}va in this position is called *silent*, having no sound.

4) *Position of the vowel sign.* The vowel sign stands under the consonant after which it is pronounced, as בַּל *bal, not,* נָמֵר *nāmēr, a leopard;* with the exception of *ḥôlem*, which stands over the left corner of the consonant which it follows, as דֹּב *dōbh, a bear*, קָטֹן *qāṭōn, little*, and *shûreq,* which has the compound sign, as סוּס *ṣûṣ, a horse.* Final *kaph* occurs only with *qameṣ* and *sh^{e}va*, and these it takes in its bosom, as בְּךָ, בָּךְ, *b^{e}khā, bākh, in thee.*[2]

A ḥôlem preceding *shin* coincides with its point, as מֹשֶׁה *môshe, Moses;* a ḥôlem following *sin* coincides with its point, as שֹׂנֵא *sône, hating.* The figure שׁ will be *sho* at the beginning of a syllable, and *os* elsewhere, as שֹׁמֵר *shô-mēr, keeper;* תִּרְפֹּשׂ *tir-pōs, thou treadest.*[3]

Rem. Besides the defects referred to in 2. 2) of this §, another defect in the Massoretic system is its failure to distinguish by sign

---

[1] Ordinary consonants, however, were occasionally pronounced with the opener sound of the ḥaṭeph: 1. when a letter is repeated the sh^{e}va under the first is usually ḥaṭ. path. as Gen. 9. 14 בְּעַנְנִי *when I bring a cloud.* Is. 1. 23. 2. After a long vowel, Gen. 2. 12 וְזָהָב *and the gold,* Gen. 3. 17; 27. 26. Also for euphonic reasons, Gen. 32. 18. Cf. § 36. Rem. *b* for another case.

[2] Final *ā* is occasionally written defectively after *n*, thus וַתִּבְלַעֵן, Gen. 41. 24, cf. Gen. 19. 33. 36; 37. 7, Ex. 1. 18, 19, Ru. 1. 9, 12. The form שְׁמַעֵן Gen. 4. 23 (Ex. 2. 20) is further contracted.

[3] When *ḥolem* precedes the letter א as a quiescent the point is placed on the right apex of the letter, as בֹּא *bô'*, when it follows, the point is on the left apex, as אֹב *'ôbh*. When the א is not quiescent the ḥôlem occupies its proper places, as בֹּאָם *bô-'ām.*

the long *a* and short *o*, vowels cognate in quality but different in quantity. By attending to the rules for the syllable (§ 5) and for Metheg (§ 10. 2), the learner will generally know for which of the two sounds the sign stands in any place.—1. The rules for the syll. (§ 5) shew that where ֻ stands in a shut unaccented syll. it is *o*, as וַיָּקָם *vay-yā-qom, and he arose,* כָּל־הָעָם *kol-ha-ʿam, all the people* (§ 10. 4), לִשְׁבָּר־אֹכֶל *lish-bor-'ōkhel,* Gen. 42. 7. 2. The rules for Metheg (§ 10) shew that חָכְמָה is *ḥokh-mah, wisdom,* (חָכְמָה *hā-khᵉmah, she is wise*) &c. 3. Only a knowledge of *forms* will teach that פָּעֳלוֹ is *po-ʿŏlō, his work,* cf. § 29 with § 36 and § 31. The Jewish Grammarians maintain that ָ in such instances is *ā,* but contrary to the analogy of the forms in the regular strong root (see Baer-Del. Job pref. p. vi).

EXERCISE: TRANSLITERATE THE FOLLOWING HEBREW WORDS INTO ENGLISH, AND ENGLISH INTO HEBREW WITH MASS. VOWELS.

זָר, חֵן, חֹק, גַּם, עַל, שׁוּם, אִם, אַתְּ, יֵשׁ, בְּךָ, דֹּב, צִץ, קֹהֶ, אֶכֹל, חֲזַק, אֲשֶׁר, רְפֹשׁ, שִׁפְטִ, קֶם, רָץ, רוּץ, הֲגַם, וָו, דְּבַר, אֱמֶת׃

gam, gōbh, bôr, bôsh, shûr, shîr, shôr, shām, ḥōq, ʾim, ʿim, nōph, ʿam, har, rōbh, rûç, hărōgh, çēl, māshāl, mᵉshal, qôṭēl, yārûç, qômam, yoʾŏmar, ʾĕṣōph.

§ 4. COALITION OF THE MASSORETIC AND TEXTUAL VOCALIZATION.

The Massoretes are supposed to have abstained from any alteration of the written consonantal text. The rudimentary vowel system expressed by the vowel letters remained untouched. At the same time their own system was not a mere supplement to this but a thing complete in itself. It thus happens that in all those cases where a textual vowel already existed, there is now a double vocalization, the textual and the Massoretic. When the consonantal letter is present the syllable is said to be written fully (*scriptio plena*), when it is absent the syllable is written defectively. See also § 9.

Rem. When vowels are written fully the Massoretic point stands in its proper place under the consonant which it follows, except *hôlem* which is placed over the *vav*, e. g. בִּין *bîn*, בֵּין *bên*, בֹּן *bôn*.

Exercise. *Write the words in Exercise* § 2 *with the Massoretic as well as Textual vowels.*

§ 5. PRINCIPLES OF THE SYLLABLE. READING.

1. Hebrew is a strongly accented speech, and the Accent or Tone to a great extent rules the various vowel changes in the language. The accent usually falls on the last syllable of the word; in certain cases it may fall on the penult.[1]

2. *Kinds of syllable.* A syllable ending in a vowel is called *open*, as קָ *qā;* one ending in a consonant is called *shut,* as קַל *qal.* Every syllable must contain a vowel, and the sh^{e}vas or indistinct sounds are not sufficiently vocalic to form syllables.

3. *Vowel of the syllable.* The vowel of an open syllable is long; it may be short if it has the accent, ás קוֹטֶלֶת *qô-ṭé-leth.* The vowel of a shut syllable is short; it may be long if it has the accent, as מִקְטָל *miq-ṭāl.*[2]

4. Another kind of syllable, not uncommon, is the *half open.* It has a short unaccented vowel, but the consonant that would naturally close it is pronounced with a slight vowel sound after it, and thus hangs loosely between this syllable and the one following, e. g. בִּקְטֹל *biq̃ṭōl, in killing;* which is not *biq-ṭōl* nor *bi-q^{e}ṭōl.* Half open syllables are generally the result of inflectional changes or composition (§ 6. 2 d).

5. *Beginning of the syllable.* Every syllable must begin with a consonant. No syllable can begin with more than two consonants. When a syllable begins with two consonants these must be separated by the slight vocalic sound indicated by sh^{e}va simple or composite, which is placed under the first, as קְטַל *q^{e}ṭal,* חֲלֹמִי *ḥălô-mî, my dream.*

Thus *the place of sh^{e}va vocal, simple or composite, is under the first of two consonants that begin a syllable.*

---

[1] It is understood that the *tone* or *accent* is the stress of the voice, and the tone-syllable is the syllable of the word on which the stress falls, e. g. in the noun *présent* the first syllable is the tone-syllable, in the verb *to presênt,* the last syll. has the tone.

[2] Observe that we speak of long and short *vowels* in Heb., but not of long and short *syllables;* the syllable is *shut* or *open.*

6. *End of the syllable.* A syllable may end in a vowel or consonant, that is be either open or shut (No. 2). None but a final syllable can end in more than one consonant; and a final in not more than two, and the two cannot be a double letter.

Simple sh^{e}va silent is placed under the consonant that ends the syllable, if the consonant be sounded and not the last letter of a word, as מִקְטָל *miq-ṭāl.* A consonant not sounded (i. e. quiescent) does not take sh^{e}va, as רֵאשִׁית *rê-shîth;* nor yet a single final consonant, except *kaph* which takes sh^{e}va in its bosom, as שָׁם *shām,* but לָךְ *lākh;* but two sounded consonants at the end of a word both take sh^{e}va, as קָשְׁטְ *qōshṭ,* יַשְׁקְ *yashq.*

Rule for placing *Sh^{e}va.* The rules in 5 and 6 regarding sh^{e}va (simple and composite alike) may be put briefly thus: *Sh^{e}va* (simple or composite) *is to be placed under every consonant without a full vowel of its own,* if the consonant be sounded (not quiescent) and not the single final letter of a word. When two consonants end a word, the last has sh^{e}va only when the first has it (by first part of the rule), as קָשְׁטְ *qōshṭ,* but לִקְרַאת *liq-rath.*

Rem. *a.* On 1. If the accent be on the penult, either the unaccented final or accented penult must be open.

Rem. *b.* On 3. The vowels *î* and *û* cannot stand in a shut syllable before *two* consonants even with the accent. On the other hand the secondary accent *Metheg* (§ 10. 2) has the same effect on the syllable as the main accent.[1]

Rem. *c.* On 5. There is one case of a syllable beginning with a vowel, when the conjunction *vav* is pointed *û* (§ 15). But Shemitic shews a tendency to pronounce *w y* as *u i* even at the beginning of words.

Rem. *d.* On 6. A double letter falling at the end of a word becomes single. This arises from the strictly phonetic character of the vocalization (see § 7. 3. Rem.), a true double letter necessarily requiring a vowel after it. There are perhaps a pair of exceptions, אַתְּ *thou* fem. (§ 12) and נָתַתְּ *thou* (f.) *hast given.*

From the last part of the above rule is excepted according to some Edd. 2 *fem. perf.* of verbs ל״א and ל״ה, e. g. הָיִיתְ 2 Sam. 14, 2, 1 K.

---

[1] On short vowel before gutturals see § 8. 4 Rem.

17. 13, Ez. 5. 11. In a few words, e. g. חַטָּא *sin*, וַיַּרְא *and he saw*, גַּיְא *valley*, the aleph is otiose (*ḥēṭ, vay-yar, gay*).

If a word end in two sounded consonants, the second must be a mute, that is one of the letters b g d k p t ṭ q. Words ending in two consonants are rare and chiefly either contracted or foreign.

Examples on the Syllable:

קָטַל *qā-ṭál;* קָטַלְתִּי *qā-ṭál-tî;* קְטַלְתֶּם *qᵉṭal-tém;* כְּרֻבִים *kᵉrû-bhi'm;* יִשְׁקְלוּ *yish-qᵉlû';* הַבְהֵיל *habh-dî'l;* מַמְלֶכֶת *mam-lé-kheth;* עֲבָדִים *ʿăbhā-dhi'm;* אֱלֹהֵיךָ *ʾĕlô-hé-khā;* יְלִידֵי *yᵉlî-dhé';* יַשְׁק *yashq;* יֹאמַר *yō-ʾā-mḗr;* יְרוּשָׁלַיִם *yᵉrû-shā-lá-yim;* חֳלָיֵנוּ *ḥŏlā-yḗ'-nû.*

EXERCISE. WRITE THE FOLLOWING WORDS IN ENGLISH, DIVIDING THEM INTO SYLLABLES:

אֱלֹהִים, חֶלְיִי, חֲמוֹר, אֲרִי, מֶרְקָב, תֶּחְדַּל, הַלָּהֵן, אָמַרְתִּי, נִשְׁקְלוּ, לְרַגְלֵיכֶם, מְצַפְצְפִים, גְּבוּרָה, לַמְּנוּ, קְצִיר, לָלֶכֶת, תַּלְכָנָה, יִשּׂוּעָתְךָ, יַעֲמֹד, אֲדֹנֵינוּ, מִדְבְּרֵיהֶם, לָאֲנָשִׁים, הַקְטָלָה, הִקְטִיל, קְטַלְתֶּם, יִשְׁתְּ, קָשַׁרְתְּ:

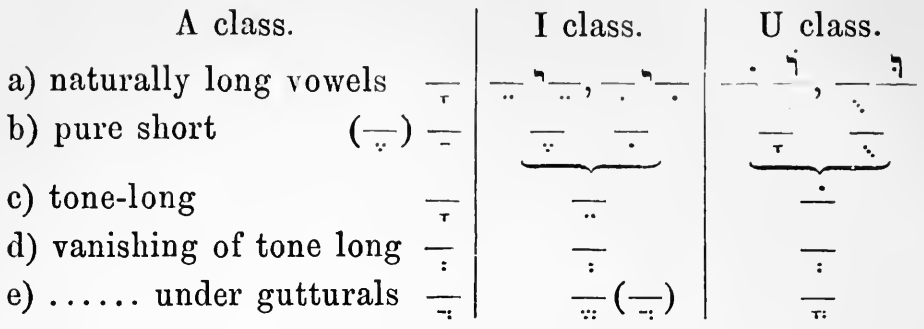
Write these Hebrew words: qôṭēl, qâm, qṭal, ʾeshqāṭ, nērd, māqôm, zérem, vlô, mizmôr, qiṭlû, shāmáyim, qû'mû, lmînḗhû, ûlyāmîm, yéreq, lilqōṭ, mamlākhâ, lshālôm, shmônîm, shnê, yashlîkh, mqômî, yôrshîm, nilḥam, yisrāʾēl, mizrāq, shmô, náʿar, ldhibhrêhem, ḥămôrîm, ʾăḥîkhem, leʾĕṣōph, ʿămaltem, yishb.

Note. In the above English words simple shᵉva, silent or vocal, is not expressed: the exercise is set partly for practice in placing it. The accent, unless marked, is on the last syllable, both in the Heb. and English words.

§ 6. THE VOWEL SYSTEM AND THE TONE.

The following table gives a pretty complete view of the various vowel signs. It is the same as that in § 2, though the classes of vowels are placed in a different order to shew better some points of connexion between them.[1]

[1] Some signs are omitted to avoid confusion e.g. *é* ◌ֵ—, a sound difficult to classify, being generally of diphthongal origin but of sharp short sound. The principles of this § are of fundamental importance but not more than 1, 2 should be read at first.



1. *Unchangeable vowels.* The vowels in the first line being naturally long, whether pure or diphthongal, remain unaltered in all forms of the word. They are the vowels *â î û ê ô*, Table *cd*, § 2. The pure short vowels also, standing generally in shut syllables (§ 5. 3), are from position unchangeable. They are *a i u e o*, Table *ab*, § 2.

2. *Changeable vowels.* The most important vowels in reference to inflectiou are those in the third line called *Tone-long, ā, ē, ō*, Table *e*, § 2, that is vowels not long by nature but from occupying a certain position in relation to the place of tone (§ 5. 1, and *footnote*), and therefore changeable, when their relation to the tone alters, by change in the place of accent.

With the tone-long vowels, which are vowels long through their relation to the place of tone, must be taken the sh^{e}vas or imperfect vowels ^{e} *ă ĕ ŏ* § 2, which are short from their relation to the tone. And the pure short vowels when they do not stand in shut syllables, come also into connexion with the tone long. The following particulars will here suffice:

a) There are only three tone long vowels, *ā ē ō*, one for each class; a tone-lengthened *ḥireq* is not *ḥireq* but *ṣere,* and a tone-lengthened *qibbuṣ* is *ḥolem,* Table *b c*.

In like manner besides the simple sh^{e}va common to all classes, there are only three composite sh^{e}vas, which are the extreme short sounds, *ă ĕ ŏ*, of the same three vowels *a e o*, of which the tone long are the extended sounds, Table *d e*.

b) Tone long vowels are produced by proximity to the tone, and are found in the open syllable immediately *before*

the tone (rarely after it), and in the shut syllable, chiefly the *final*, under the tone.

c) The indistinct vowels or sh^{e}vas are produced by distance from the tone, their common position being what would be an open syllable two places from the tone, or any open syllable further removed. That is:

> *the final accented shut syllable and the pretonic open syllable have tone-long vowels, and before the pretonic the vowels are indistinct* (i. e. *sh^{e}vas*).

Observe the important exceptions in *Rem. c.*

Now almost the whole actual vocalization of the language, i. e. the forms in which words appear *prior* to inflection, and the laws of inflection or vowel change, may be considered the result of an effort on the part of the language to maintain these two principles *b c* in operation. Hence for *dabàr* (a word) by *b* we write דָּבָר not דַּבָר nor דַּבַר nor דָּבַר. So for *dabèr* we write דֹּבֵר not דָּבֶר or דַּבֶר; and for *dabòr*, דָּבֹר. And if by processes of inflection a short vowel would be left in the open pretonic or final accented shut, it must be made a tone-long. Again for *dabarìm* (pl. of *dabàr*) by *c* we write דְּבָרִים not דָּבָרִים nor דַּבָרִים &c.; for *daberìm* דְּבֵרִים &c.; and when by inflectional processes and shift of tone the vowel that was pretonic and tone-long falls into a place *before* the pretone, it must be written an indistinct vowel. See § 18 for numerous examples.[1]

The indistinct vowel arising from the loss of a vowel of *any* class under ordinary consonants is *simple sh^{e}va vocal*, Table *d;* under *Gutturals* (§ 8), it is one of the *haṭephs*, Table *e*, generally *ḥ. pathaḥ* for vowels of first and second class, and *ḥ. qameṣ* for vowels of third class.

d) *When,* through processes of inflection or by composition, *two indistinct vowels come together, the first becomes a full short vowel, most commonly* the vowel *i,* e. g. דְּבָרִי = דִּבְרִי, from דָּבָר *a word.*

---

[1] Only in rare cases and with vowels long by nature in the tone, do indistinct vowels fall in the place immediately preceding the tone, as כְּתָב *k^{e}thâb* (a writing), יְקוּם (property).

There is, however, many times a natural effort made to keep up the identity of the word by putting in a short vowel of the same class as the chief vowel that had been lost, כַּנְפַי = כְּנְפַי from כָּנָף *a wing*.

If the first of the indistinct sounds be a composite sh^{e}va, the short vowel arising generally corresponds to it, חַכְמַי = חֲכְמַי, from חָכָם *wise*.

e) The *new syllable* arising with this short vowel in such cases is generally *half open* (§ 5. 4). See *Rem. d.*

3. The usage of the alternative short vowels in *second* and *third* classes, Table *b*, has also to be attended to. The following Table, illustrating the *shut* syllable, may be useful for reference.

a) Final shut accented	$\bar{a}(a)$	$\bar{e}$	$\bar{o}$
b) final shut unaccented	*a*	*e*	*o*
c) non-final shut, ordinary	*a*	*e, i*	*o, u*
d) non-final shut, flat (before gutturals)	*a*	*e*	*o*
e) non-final shut, sharp (before double letter)	*a*	*i*	*u*

Rem. *a*. On 1. Occasionally one of the naturally long vowels may pass into another of the same class, when the word suffers great constitutional disturbance from inflection. And the same is true of the pure short, among which *a* has a great tendency to pass by *thinning* into *i*.

Rem. *b*. On 2 *b c*. Thus the vowel changes go on in the lines *b c d e* of Table:

short falling in open pretone or shut final tone, into tone long,	*b* into *c*
tone-long in shut unaccented into short	*c* into *b*
tone-long before pretonic into indistinct	*c* into *d, e*
indistinct in pretone into tone-long	*d, e* into *c*
indistinct falling together into short *d d* or *e d* into *b*	

Rem. *c*. The principles stated in 2 *b c* are carried out both in nouns and verbs. There are however two remarkable exceptions: *first*, the law 2 *b* regarding the tone long vowel in the final accented shut has not been carried out fully in the case of $\bar{a}$, see 3 Table. Verbs always write $\acute{a}$ for $\bar{a}$ except in pause, and nouns do so sometimes under the full tone and regularly under the weaker tone of the construct state (§ 18). This $\acute{a}$ in verbs is subjected to change precisely as if it were $\bar{a}$.

Occasionally a short vowel of *second* class may be found in a final accented shut syllable; but hardly a pair of cases occur of a short *third* class vowel in such a position.

Second, in opposition to law 2 c the indistinct vowel stands in certain cases *next* the tone. This is so characteristic of verbs, that it may be named the verbal law of inflection (§§ 20, 30). Thus the noun inflects דָּבָר, דְּבָרָה *dā-bhār*, *d^{e}bhā-rah*; the verb דָּבַר, דִּבְּרָה *dā-bhar*, *dā-bh^{e}rah*.

Rem. *d*. On 2 *d*. When two indistinct vowels come together and the first becomes a short vowel, the second retains so much of its vocalic quality that the syllable formed is usually not full shut but *half open*. Such a syllable has these peculiarities: first, as it is not a shut syllable, one of the *B^{e}ghadhk^{e}phath* letters following it will not receive *Dag. lene* (§ 7. 2); second, as it is not open, its own vowel will not usually receive Metheg (§ 10. 2).

Half open syllables having a special emphasis, as those arising from the ה of interrogation, § 49; the Article § 11, not unfrequently are marked by Metheg.[1]

§ 7. DĀGHÉSH. THE LETTERS "BEGHADHKEPHATH". (ASPIRATES).

1. The word *Daghesh* is from a root which possibly expressed the idea of *hardness*. The sign of Daghesh is a point in the bosom of a letter, and this point was used to indicate both a lighter and a heavier kind of hardness. When it indicates the lighter hardness it is called D. *lene*, when the stronger, it is called D. *forte*.

[1] These *half-open* or loose syllables are important in Hebrew; a list of the chief of them may be given in a *note* for *reference* merely. *First*, such syllables are those arising by *composition;* e. g. 1) when *particles* or short fragments of words are *prefixed* to other words, as the *Interrogative* ה, § 49; the *Article* and *Vav Conversive*, when their Daghesh is omitted, § 11 Rem. *a*, § 26 Rem. *a*; the *Inseparable Prepositions*, § 14. The prep. ל *to* generally unites so closely with the *Infin. Cons.* that the syllable formed is shut, § 31. 2) when fragmentary particles are *affixed* to words, as the *consonantal suffixes* to nouns, § 19; and *all suffixes* to the *Infin. Cons.* and *Imperat.* qal of Verbs, § 31. In all these cases the feeling of the diversity of elements remains, preventing complete coalescence of the word and attached particle. *Second*, of this kind are the *new* syllables that arise when vowels are lost through change of place of Tone in processes of *Inflection*, e. g. *a*) in the *Imperat.* qal of Verbs, as רְדָף, *pl.* רִדְפוּ, § 21; *b*) in certain forms of the *Guttural* Verb, as יַעֲבֹד, *pl.* יַעַבְדוּ, § 34. Rem. *b*; *c*) in Nouns, particularly in the *cons. plur.*, § 18. 1 Rem. *b*, and in the *feminine* with affixes, e. g. מַלְכִי, בִּרְכָתִי *malkhî*, *bîrkhāthî*. *Third*, the first syllable in a few fem. nouns in *ûth*, מַלְכוּת *kingdom*, יַלְדוּת *youth*, עֲבֹדוּת *service*, and in several other individual words, as בֶּגֶד *garment* (when inflected), עַרְבִי *Arabian*.

2. *Daghesh lene.* Hebrew has not two sets of consonants for the sounds *b g d k p t* and their softer forms *bh, gh, dh* &c. It distinguished the sounds by means of the point Daghesh (§ 1. 3). The harder sounds it expressed by inserting the point, as בּ *b*, תּ *t* &c., leaving the unmodified consonant to express the weaker, *bh*, *th* &c. The softer sounds were natural or easy only after vowels; hence the rule:

The six letters בְּ גֵּ דְּ כְּ פֵּ תְּ *are hard and therefore have* Daghesh lene *whenever they do not immediately follow a vowel sound,* זָכָר *zā-khār*, יִזְכֹּר *yiz-kōr*.—Hence these letters receive the point: *always* at the beginning of a sentence or clause; *always* in the middle of a word after a shut syll.; and *generally* at the beginning of words.

Rem. The rule put as above is exhaustive; it may be put thus: *The six Aspirates are* without Daghesh *only when they immediately follow a vowel sound.* The least vowel sound, e. g. *simple sh^{e}va vocal*, preceding, suffices to enable the letter to have its softer sound, as זְכֹר *z^{e}khōr*. One sound is not considered to follow another *immediately*, if such a pause intervenes as is marked by a *distinctive* accent, as וְלֹא תִגְּעוּ בּוֹ Gen. 3. 3, where לֹא has a conjunctive, but תִגְּעוּ a disjunctive accent. See § 10. 3*e*.[1]

3. *Daghesh forte.* Hebrew does not write a double consonant. To indicate that a consonant has that kind of

---

[1] The diphthongs e. g. *ai, oi, ui*, are considered to end in a consonant, and the *B^{e}ghadhk^{e}phath* letters immediately following them receive *Daghesh.* See § 9. Cf. Gen. 16. 8, Lev. 2. 14. The divine name יְהוִה, being pronounced *'adhônāi*, is followed by Dag.—The above rule in 2 is liable to modifications in words beginning with *B^{e}ghadhk^{e}phath* though immediately preceded by words ending in a vowel sound, when euphony would suffer through several aspirates coming together. The prefixes בְּ, כְּ (§ 14) when pointed with simple *sheva* and forming combinations such as בְּבֶ, כְּבֶ, כְּפַ, and according to some כְּמַ, receive Dag. lene contrary to the rule, cf. Gen. 39. 12, Jud. 1. 14, 1 Sam. 16. 6, Is. 10. 9, Josh. 8. 24, Ex. 14. 4, Ps. 34. 2, Gen. 32. 11; 40. 7. Dag. is inserted in other cases irregularly to avoid the concurrence of aspirates. e. g. Ex. 15. 21, Deut. 32. 15, or uneuphonic combinations of sounds (see Baer-Del., Prov., pref.).

hardness which is duplication, it inserts in it a point, as קַלּוּ *qal-lû*. When so used the point is called D. *forte*.

Rem. Of necessity a double letter must be preceded by a vowel, and as it always forms a shut syllable, the vowel before it is generally short § 5. 3. In this way D. *lene* which is never preceded by a vowel can hardly be confounded with D. *forte*. Much of the beauty of Shemitic pronunciation depends on the extreme strength with which it enunciates the double letter. The Arabic double letter, and no doubt the Hebrew too, is more decided than the Italian. In Hebrew a long vowel is long, and a short vowel, short, and a double letter is a double letter. But see note below on 4.

4. D. *lene* is peculiar to the six *Beghadhkephath*; any letter may be doubled, and have D. *forte*, except the gutturals § 8. 4. When in the *Beghadhkephath*, D. *forte* includes D. *lene: it doubles the hard sound of the consonant,* as שִׁבֵּר = *shib-ber*.[1]

---

[1] Some additional details regarding D. *forte* must be given *for reference.*

a) Omission of D. forte. The language shews a tendency towards a softer enunciation by dropping the characteristic duplication in the middle of words from consonants not supported by a full vowel i. e. pointed with sh^{e}va vocal. This softer utterance occurs very frequently with *yod* and the *liquids*, *l*, *m*, *n*, and the letter ק, but is not confined to these, and may occur even with the so called Aspirates or *Beghadhkephath* e. g. Lev. 23. 24. The syllable that arises by loss of the duplication is *half open* § 5. 4; e. g. לַמְנַצֵּחַ *lam̃naç-ç̣ēaḥ*, for לַמְּ *lam-m^{e}naç-ç̣ēaḥ*, מְבַקְשִׁים *m^{e}bhaq̃shîm*, for מְבַקְּשִׁים *m^{e}bhaq-q^{e}shîm*. Gen. 27. 28, Ex. 2. 3; 8. 1, Jud. 8. 2.

b) Insertion of D. forte. D. forte dirimens. The opposite tendency to the above in *a)* sometimes shews itself, viz. the tendency to pronounce *half open* syllables more distinctly. The loose consonant is more firmly grasped in utterance and the two syllables between which it hung are sharply disjoined, so that a doubling of the consonant is the effect. The Dag. marking this has been called D. *dirimens* or separative Gen. 17. 17. Deut. 32. 32, עִנְּבִי (*cons. pl.*, *note* p. 17), *ʿiñbhê*, with *Dag. dir.* עִנְּבִי *ʿin-n^{e}bhê*. This duplication occurs properly only in half open syll., but a more refined pronunciation may make a real shut syll. half open (as תִּדְשֵׁא Gen. 1. 11), and such a syll. may then be further subjected to the influence of D. *dirimens*, as מְקֻדָּשׁ; Ex. 2. 3; 15. 17, Gen. 49. 10, 1 Sam. 1. 6; 10. 24, Job 17. 2.

D. forte conjunctivum. In continuous discourse monosyllabic words or words *penacute* are often attracted to the end of preceding ones, or words accentually weak fall forward upon those following them. From

5. *Mappîq* (extender). The same point is used in the letter *Hē*, when final, to indicate that it is to be pronounced, and is not a mere sign of a vowel. When so used the point is called *Mappîq*, as לָהּ.

6. *Rāphé* (soft). Raphé is a small horizontal stroke put over a letter to indicate the absence of Daghesh or Mappiq in places where these points might have been expected rightly, or not unnaturally, though wrongly, as לָהֿ not לָהּ; וַיִּמַּח not וַיִּמַּח Gen. 7. 23.

EXERCISE ON DAG. *LENE* AND *FORTE*.

Write these Hebrew Words.

1. gab, gam, kōl, dām, bēn, 'ēt, môt, par, pat, kap, tiktōb, bkû, lbad, blektkā, mishpāṭ, midbār, btôk, malkî, yabdēl, kôkābîm, kbadtem, tikbdî, kaṣpkā, ḥelqkā, midbrêkem, lāredet, yirb, yibk, gdôlîm, vtāgēl.

---

the determination of the accent to the end and the accentual fall of preceding syllable, the beginning of the second word receives a strong utterance, which causes its first consonant to be doubled. The *dag.* marking this has been called *conjunctive*. There are two cases. 1. When a word ending in ה— accented, or a word ending in ה— (or —) accented and immediately preceded by vocal sh^{e}va, is joined by *Maqqeph* to a following word which is monosyllabic or penacute, as Gen. 2. 23 לְקָחָה־זֹּאת, Gen. 27. 26, Num. 23. 13, Gen. 11. 4; 43. 15. The pronouns זֶה and מָה (§ 13) when joined by Maqqeph always so affect the following word, Gen. 38, 29, Hos. 10. 3, Num. 13. 27.—2. When a word ending in *ā* or *e*, accented on the penult, is followed by a monosyllabic or penacute word, as Gen. 3. 14 עָשִׂיתָ זֹּאת, Gen. 12. 18; 38. 29; 33. 5. If ordinary Metheg (§ 10) would stand on the preceding word the tone may be retracted to it to effect the junction, Gen. 19. 38; 21. 23; and in impf. and partt. of verbs ל״ה the retraction takes place though Metheg could not have stood, Gen. 31. 12, Ex. 21. 31, but with Maqqeph the Metheg remains, Gen. 1. 12. The union may take place if the secondary accent Metheg stand on the first syll. of second word, Gen. 49. 31, Ex. 15. 1. The *B^{e}ghad.* letters are excepted from this last rule, Gen. 2. 4; 24. 31. The second word, monosyllabic or penacute, may begin with two conson., the first having sh^{e}va, Gen. 12. 5; but if the first letter be one of the prefixes ב, כ, ל, ו (§ 14, 15), it is not doubled. (Baer-Del., Pref. to Prov.). The junction occurs also when the first word ends in *u*, Gen. 19. 14, Ex. 12. 15, Jud. 18. 19, 1 S. 15. 6.—The first of these two cases is technically called דְּחִיק *thrust*, compressed, the second אָתֵי מֵרָחִיק, *coming from a distance.*

2. mqaṭṭēl, mrakkēb, dibbēr, mdubbār, mbaqqshîm, mullal, ṣappdû, miṣpēd, ḥallôn, bkaṣpkem, shabbāt, mibbnê, çippôr, ykattēb, bqiçrkem, baddām, bôdēd, yittnû, limmadt, hammáyim, vayyinnāgpû, lbaddô.

Note. In this ex. the *B^{e}ghadhk^{e}phath* are expressed by ordinary hard letters, and *sh^{e}va* is not expressed as the ex. is set for practice on the syllable.

§ 8. THE GUTTURALS.

The letters א ה ח ע are called *gutturals*. They might be called spiritals, being strictly breathings. The ע is a firmer sound of the same kind as א, and ח a firmer sound of the same kind as ה. The last two are much stronger letters than the other two. Being but breathings these letters approach a good deal towards vowels, and this feebleness in consonantal power causes the following peculiarities:

1. The gutturals prefer about them, particularly *before* them, the guttural or *a* vowels, and a final guttural must be preceded by *pathaḥ* or *qameç*.

Pathaḥ furtive. Any short vowel before a final guttural becomes pathaḥ; and between any long vowel (other than qameç) and the final guttural there steals in, in utterance, the sound of short *a*. This short *a* is therefore called *furtive*. Thus מָלָךְ but מַלַח; הִשְׁלִיךְ but הִשְׁלִיחַ *hish-líaḥ*.

2. The gutturals cannot take simple sh^{e}va vocal, they require the composite sh^{e}vas; in many cases they dislike simple sh^{e}va silent, preferring the composite, e. g. קְבֹר but קֳבֹר; רַגְלִי but בַּעֲלִי.

3. A guttural letter points itself and the consonant preceding:—that is a guttural with a ḥaṭeph turns a preceding *simple sh^{e}va vocal* into the short vowel corresponding to the ḥaṭeph; e. g. לְעֲבֹר becomes לַעֲבֹר.

4. The gutturals cannot be doubled. In this peculiarity *resh* agrees with the gutturals. Hence the short vowel that would precede the guttural were it doubled (§ 7. 3 Rem.) falls into an open syllable before the undoubled letter and becomes the corresponding tone long vowel (§ 5. 3; § 6.

Table *b c*); e. g. הַכָּבֵד *hak-kébhedh* but הָעֵבֶד *hā-ʿébhedh*, שִׁלֵּשׁ but שֹׁרֵשׁ, קִטֵּל but בֵּרֵךְ.

Rem. *a*. On 1. The sharp vowels *i*, *u*, falling before gutturals not final, are generally depressed to *e*, *o*, as nearer the *a* sound (§ 6. 3 Table *d*). The depression happens less regularly when the vowels follow the gutt.; e. g. יֶחְדַּל for יִחְדַּל; עֶגְלָה for עִגְלָה.

The letter א (being a quiescent also, see § 9. 1 Rem. *a*) is excepted from this rule. The letter ר often agrees with החע in desiring *pathaḥ* before it when final, but it is not subject to the rule of *path. furtive*.

The sign of path. furtive is written *under* the final gutt., but the sound is heard *before* it, as רוּחַ *rúaḥ*, *spirit*. Path. furtive is not counted as a vowel, and, of course, disappears when the gutt. ceases to be final; e. g. הִשְׁלִיחַ has only two vowels, *i* and *î*; its *fem.* is הִשְׁלִיחָה. So רוּחִי *my spirit*.

Rem. *b*. On 2. By far the most common ḥaṭeph is ֱ. Initial א is fond of ֲ immediately before the tone, but at a distance from the tone it reverts to ֱ, as אֱלַי but אֲלֵיכֶם. The ḥaṭeph that takes the place of *silent sh^{e}va* always corresponds to the preceding short vowel, as בַּעֲלִי (for בַּעְלִי).

The second half of the rule applies chiefly to syllables not in the tone, and the process is facilitated by the law stated in Rem. *a* whereby the gutt. depresses *i u* to *e o*, e. g. נִאְמַר = נֶאֱמַר = נֶאֱמַר. This softer enunciation shews itself chiefly with the weak gutturals א ע, the harder ה ח often retain the simple sh^{e}va silent.

Rem. *c*. On 3. This rule and the second half of rule 2 really go together and might be compressed into one in the words of the old grammars: "littera gutturalis punctat se et præcedentem" et vice versa. The words *vice versa* form the second half of rule 2. Rule 3 applies greatly to prefixes, e. g. לְאַרְי = לַאֲרִי *to a lion*.

Rem. *d*. On 4. As the cause that produces the tone-long in this case is permanent, the vowel is *unchangeable*.

Before the stronger gutt. ה ח, the short vowel is very often retained, and sometimes even before the weaker א ע. To prevent the special emphasis of the short vowel in this case

from being neglected it is often marked by *Metheg* (Rem. *d* p. 17).[1] In a few cases ר takes *Dag. forte*, e. g. 1 Sam. 1. 6; 10. 24; 17. 25. Prov. 3. 8; 14. 10; (?11. 21; 15. 1). Song 5. 2. Jer. 39. 12. Ezek. 16. 4. Otherwise the vowel is uniformly prolonged before it. This probably points to a double way of pronouncing the *resh*.

EXERCISE: CORRECT THE FOLLOWING WORDS.

בְּאֶמֹר, אֲבַדְתֶּם, אְמֹר, יִשְׁחְטוּ, חְזַק, שָׁלוּחַ, דְּשִׁלִּיחַ, שָׁמֹעַ, שִׁבֵּעַ, רֶגֶע, יְהַגֵּהַ, בֶּרֶךְ, שַׂרִים, דְּחָזִיק, טְעָמוּ, כְּאֶמֶת, נְאַמַר, לְחָלִי, לְאֲרִי, בְּחֲמֹר.

§ 9. THE QUIESCENT LETTERS.

The letters א ה ו י shew the same kind of feebleness that the letters *h w y*, that correspond to three of them, have in English: they frequently coalesce in various ways with the vowel sounds about them.[2]

1. They are real consonants at the beginning of a syllable, but at the end of a syllable after a full vowel they generally surrender their consonantal power and are silent; e. g. אָמַר *'ā-mar*, but יֹאמַר *yô-mar*; יְמֵי *y^{e}mê*, but בִּימֵי *bî-mê*. They do not modify the sound of the vowel before them when silent, though it is often lengthened, particularly if it be of the first or third class. *Sh^{e}va* is not placed under the silent consonant (§ 5. 6).

Rem. *a*. The letter א may be silent after any vowel sound, either medial or final.

---

[1] When the short vowel remains before the gutt., *Dag. forte* is then, in the language of many Grammarians, said to be *implied* in the gutt. (*Dag. forte implicitum*). The punctuation, however, appears to treat the short vowel as forming an open syll., Is. 1. 4 נָאֲצוּ *they despise*. Zeph. 1. 17 כָּעִוְרִים *as the blind*. In a few instances, where characteristic duplication is not omitted, the strong gutt. admits a short vowel before it, e. g. אָחָד *one*, אַחֵר, pl. אֲחֵרִים *other*, מַהֵר (?) *swift*, אַחִים *brothers*.

[2] The facts stated in 1 suffice for the exercise; 2, 3, 4 had better be passed over and read only when referred to.

The letter ה is silent perhaps in a pair of cases when medial, and when final is the mere sign of a vowel sound (§ 2. 3).

Rem. *b*. The letter ו is silent after the *o* and *u* sounds (*third* class), and generally after the *a* sound (*first* class), with which it coalesces and forms the diphthongal *ô* (§ 2. 1. 3)). In a few cases ו is consonantal after the *a* sound, as צַו *ṣav*. The *suffixal form* ־ָיו is sounded *âv* (§ 19), as סוּסָיו *sû-ṣâv*. After vowels of the *second* class (*i*, *e*) ו is sounded, as זִו *ziv*.

The letter י is silent after the *i* and *e* sounds (*second* class), and generally after the *a* sound, with which it unites to form the diphthongal *ê* (§ 2. 1. 3)).

In a few cases י is consonantal after *a*, as in the *suffixal form* ־ַי (pausal ־ָי), which is sounded *áy* (*áee*), as סוּסַי, *ṣû-ṣáee* (§ 19).

After vowels of *third* class (*o*, *u*), י is sounded, as הוֹי *hôy* (*hôee*), גָּלוּי *gālûy* (*gā-loo-ee*).

2. Even at the beginning of a syllable immediately after a consonant these letters can hardly maintain themselves: they generally surrender their vowel to the preceding vowelless consonant, and quiesce after the vowel which they have given up, or even fall out of the form altogether, thus *yaqwim*=*ya-qîm*, *yaqwum*=*ya-qûm*, *hushwab*=*hu-shab*, *yehaqṭil*=*yaqṭil*, *r*^{e}*āshîm*=*rā'shîm*.

3. When the letters *w y* stand between two vowels they many times are lost in the vowel stream surrounding them; they disappear and the two vowels are represented by that one which being *characteristic* of the form was the stronger, which is generally the latter of the two; or the two vowels coalesce and form a new sound. Thus, *qawam*=*qâm*, *maweth*=*mêth*, *qawum*=*qûm*. So *h* sometimes, *ṣuṣahu*=*ṣuṣô*.

4. One of the weak letters *w y* may be changed into another under the influence of a strong preceding characteristic vowel resolved to maintain itself: the weak letter passes into another homogeneous to the vowel, *yivrash*=*yiyrash*=*yî-rash*.

EXERCISE: PRONOUNCE AND WRITE OUT IN SYLLABLES THESE WORDS.

קְרוּאָיו, אַל, לֹא, וּבֵיתוֹ, נוֹלְדוּ, יִיטַב, צְבָאוֹת, בָּאוּ, בָּרָא, בְּרֵאשִׁית, גֵּיא, לוּא, קָלִיא, אֶרְאֶה, לִקְרַאת, יִשְׁמָעֵאל, מָאתַיִם, שָׁאוּנִי, צְבִאִים, שְׁלֹמֹה, בִּימָיו, תִּגְלֶינָה, יַקְנִיאֵהוּ, מִיגְּאָתִיו, כָּסוּי, שָׁלֵו, גּוֹי, קֵו, אֲדֹנָי, רָאשִׁים, בָּאִשּׁוֹ, כְּלָיוֹת, לוּלֵי, קִנֵּהוּ:

§ 10. THE ACCENTS. METHEG &c. PAUSE.

1. *Use of the Accents.* The accents have three uses: 1) they mark the tone-syllable; 2) they are signs of logical interpunction, like our comma &c.; and 3) they are musical expressions. In the first case they are guides to the pronunciation of the individual words; in the second they are guides to the sense, being a kind of commentary; and in the third they are guides to the proper reading of the text as a whole, which is a kind of recitative or cantillation. The last use, of course, embraces the other two.

2. *The secondary accent (Metheg) and the Tone.* The main accent or Tone falls generally upon the last syllable of the word (§ 5. 1); in one class of nouns (the *Segholates* § 29), and in some Verbal forms, it falls on the penult.[1]

a) According to the natural rhythm of the language the syllable immediately before the Tone has a fall, but the syllable *second* from the Tone a certain emphasis or accentual rise. To prevent this emphasis or anti-tone being neglected the syllable was often marked by a sign called *Metheg* (bridle), a small perpendicular stroke. An open syllable was most apt to be hurried over, and hence: *the second full syllable from the Tone, if open, is uniformly marked by Metheg*, as אֲנֹכִי, וְזָכַרְתָּ, הֶחָכָם.

b) When the tone syllable begins with two consonants, the indistinct vowel under the first is strong enough to bear the accentual fall, and the preceding open syllable is marked with Metheg, אָכְלָה *'ā-khᵉlāh*, *she ate*. In such positions Metheg indicates that the shᵉva is *vocal*, and thus serves

---

[1] Of the accentual *signs* some stand above, and some below the word; when above, the sign stands upon the initial cons. of the accented syll., as מַיִם; when below, it stands after the vowel of the syll., as מַיִם, except in the case of *ḥolem* and *shureq*, when it is placed under the conson., as יוֹם, רוּחַ. When the accented syll. begins with two conss. the sign is put on the second. A few signs are restricted to particular positions, such as the initial or final letter of a word, and do not indicate the Tone syll. For more information on these and other points see my *Outlines of Hebrew Accentuation.*

to distinguish between *ā* and *o*, and between *î* and *i*, and *û* and *u*; e. g. אָכְלָה *'okh-lah, food*; יִרְאוּ *yî-r^{e}'û, they will fear*; יִרְאוּ *yir-'û, they will see.*

If the vocal sh^{e}va in this case be a *ḥaṭeph*, the preceding vowel though *short* has that distinctness that requires to be preserved by Metheg, לְאַשֵּׁר.

Rule for placing Metheg.—(1) The second full syllable from the Tone, if open, receives Metheg. (2) Before simple sheva the five long vowels *a i u e o* have Metheg; and before a composite sheva all vowels have Metheg.

c) If the *second* from the Tone be a shut syll., it will be pronounced with sufficient distinctness without the aid of Metheg; in such a case, if there be an open syll. further from the Tone, this is felt to require Metheg to prevent too hurried utterance, as וּמֵחֶלְבֵהֶן Gen. 4. 4; Ezek. 42. 5.

d) If the word be long the Metheg already placed may be taken as a new *tone*, and another Metheg may fall two syllables from it, as וּמֵהַתֵּיכוֹנוֹת Ezek. 42. 5.

The conjunction וְ *and*, being a weak sound, very rarely takes Metheg.[1]

---

[1] The above rules give the main facts about Metheg. The results of a very full investigation into the Massoretic laws of Metheg have been given out by *S. Baer* in two Articles on Metheg-Setzung in Merx's *Archiv* i, ii, 1869. According to *Baer* Metheg is of three kinds; first, *light*,—the object of which is to secure to vowels their full breadth of sound; second, *heavy*,—the object of which is to ensure to a syllable its special emphasis; third, *articulative*,—the object of which is to ensure that a consonant be enunciated distinctly and not run into another.

Again, light M. is of two kinds; first, *ordinary*—placed on the *second* syll. from the Tone, if the syll. be *open*, i. e. not followed by *Dag. forte* nor *any Sh^{e}va.* See the exx. above in No. 2, *a.* To this ordinary M. applies what is said above in 2, *a.* Second, *stationary* (feststehend)—placed on the *five long* vowels (§ 6, Tab. *a*) when followed by *simple Sh^{e}va*, and on all vowels, long or short, when followed by a *composite Sh^{e}va.*

Examples of *heavy* M. occur in the case of the Art. when its *Dag.* is omitted (§ 11. Rem. *a*); with the ה of Interrogation (§ 49. comp. Rem. *d* p. 17). This M. may stand on simple sh^{e}va, e. g. נְנַתְּקָה Ps. 2. 3. Examples of the *articulative* M. in Gen. 28. 2 &c., פַּדֶּנָה אֲרָם. These laws are not observed in printed Edd. but are followed in *Baer's* Ed. of *Genesis*, *Psalms*, and *Isaiah*, &c.

3. *The Accentual system.* The Accentual system is very intricate and in some parts obscure. A brief outline of its uses as a means of interpunction will here suffice:—

a) The text is broken into verses, *Pᵉṣûqîm*, and the end of each *Pāṣûq* is marked by the sign :, called *Ṣôph paṣuq* (end of the verse). The accent on the final word is called *Ṣillûq*, its sign being like Metheg.

הָאָרֶץ׃ . . . . . Gen. 1. 1.

b) The greatest logical pause within the verse is indicated by a sign called *'Athnāḥ* "breathing", or "rest".

הָאָרֶץ׃ . . . . . אֱלֹהִים . . . . . Gen. 1. 1.

c) If there be two great pauses in the verse the greatest or one next the end of the verse is marked by 'Athnaḥ, and the one nearer the beginning of the verse by sign called *Ṣᵉgōltâ*, as,

בֵּן׃ . . . . . לָרָקִיעַ . . . . . הָרָקִיעַ . . . . Gen. 1. 7.

d) If the clause of words lying between Ṣilluq and 'Athnaḥ, or between 'Athnaḥ and Ṣegolta, or between 'Athnaḥ and the beginning of the verse, Ṣegolta being absent, requires to be divided by a pretty large pause, this is in all these cases marked by a sign called *Zāqēph qāṭôn*, resembling simple shᵉva placed over the word,[1] as

לָמֽוֹ׃ . . . . . מַבְדִּיל . . . . . הַמָּיִם . . . . . אֱלֹהִים . . . . . Gen. 1. 6.

e) A distinctive of less power than Zakeph is *Ṭiphḥâ*, which marks a pause which the rhythm *requires* as a preliminary to the great pauses indicated by Ṣilluq and 'Athnaḥ. Its sign is a line bent backwards, as

הָאָרֶץ׃ . . . . הַשָּׁמַיִם . . . . אֱלֹהִים . . . . בְּרֵאשִׁית . . . Gen. 1. 1.

f) These are the main distinctive accents, and by stopping at them, as at the points in modern languages, the reader will do justice to the sense. There are several more distinctives of lesser force. There is also a number of conjunctive accents or *Servants*, as they are called, to the disjunctives, accents which are placed on the words that stand immediately before and in close relation with those on which distinctives are placed. It would seem to follow

[1] The sign ̱ called *z. gāḏhôl*, of the same distinctive power, is used when its word is the only word in the accentual clause.

from the variety of the conjunctive signs that they had musical significance, otherwise one connective might have served all distinctives alike. The two most common *conjunctives* are *Mêrkhâ* ֥, which serves *Ṣilluq* and *Ṭiphḥa*, and *Mûnāḥ* ֣, which serves *'Athnaḥ* and *Zaqeph*. See Gen. 1. 1, 2.

g) The books *Job*, *Proverbs* and *Psalms* have an accentuation in some respects different from that of the other books, called the *Poetical*. The end of the verse is marked as in Prose by Ṣilluq and Ṣoph paṣuq; also the great distinction next the end by 'Athnaḥ; but this is not the greatest distinction in the verse, which is that next the beginning, marked by a sign called *Mêrkhâ Mahpākh* or *ʿÔlê v^{e}yôrēdh*, thus

יָשָׁב׃ . . . . . עָמֵד . . . . . רְשָׁעִים . . . . . Ps. 1. 1.

4. *Maqqēph* (binder). Part of the accentual or rhythmical machinery is the *Maqqēph* or hyphen, which binds two or more words together. The sign indicates that all the words so joined are pronounced in the rhythmical reading as one word. The occurrence of two accented syllables in immediate succession is contrary to the rhythm, and this conjunction is avoided by throwing several words into one. All the words joined by Maqqēph lose their accents except the last, and in consequence of this their long vowels, if changeable, become short (§ 5. 3), כֹּל הָעָם but כָּל־הָעָם, *all the people*.[1]

5. *Pause*. The great pauses just described (in 3) are naturally accompanied with certain changes upon the ordinary vocalization. In general only the two greatest Prose accents (viz. *Ṣilluq* ֥, marking the end, and *'Athnaḥ* ֣, marking the middle of the verse), and the three greatest of the Poetical, throw vowels into pause. The effects are mostly as follows:

a) A short vowel in the tone becomes long, as מַיִם, pause מָיִם; and if the short vowel had been modified from another it is the long of the primary sound that appears, אֶרֶץ p. אָרֶץ.

[1] Unchangeably long vowels are usually marked by Metheg, as שֵׁת־לִי *Shâth'lî*.

b) Occasionally the tone is shifted from the last syllable to the penult, which is lengthened if it was short, עָתָּה p. עָתָּה.

c) Perhaps the commonest pausal effect is what looks like a combination of *a b*. In verbal forms with vocal sh^{e}va before the tone, this sh^{e}va becomes the tone long of the primary sound whose place it had taken, and the tone is then shifted to it, as שָׁכְנָה *she dwelt*, p. שָׁכֹנָה, from שָׁכֵן; עִמְדוּ *stand ye*, p. עֲמֹדוּ from עָמַד. A few nominal forms follow the same method (see § 45).

Rem. Sh^{e}va before the suffix *kha* becomes *ê*, סוּסֵךְ p. סוּסֶךָ. In some cases the weight of the Pause doubles the consonant, חֲדַלּוּ Judg. 5. 7; there is also a fondness shewn in many cases for the sharp *á* in pausal syllables.

6. *Q^{e}rî* and *K^{e}thîbh* (read, written). The *K^{e}thîbh* is the consonantal text as it lay before the punctuators, being held inviolable. When however for any reason, whether of grammar or propriety, the punctuators preferred another reading, the *vowels* of this reading were put under the *K^{e}thîbh* in the text, while the consonants, which could not find a place in the text, were set in the margin. This recommended reading is the *Q^{e}rî*. Attention is called to the Margin by a small circle placed over the *K^{e}thîbh*, thus: הַנַּעֲרָ Gen. 24. 14,—which means that for the (*mas.*) form הַנַּעַר of the text the form הַנַּעֲרָה (*fem.*) is to be read.

OF WORDS AND FORMS.

Roots may be considered to be of three classes: *first*, the simplest and instinctive *interjection*, expressive of mere feeling, as *ah! second*, the higher *demonstrative*, expressing locality, direction, and distinction between one object and another; and *third*, roots embodying thoughts, *nouns* and *verbs*. The first class, being uninflected and individual, do not need any separate treatment. And of the others it is better to begin with the second, which is next in simplicity.

---

v. 14. הנערה ק׳.

§ 11. THE ARTICLE.

Hebrew has no *indefinite* Article, though the numeral *one*, particularly as the language declined, began to be used with the feebleness of an Article.

The Definite Article, properly a demonstrative pronoun, is הַ. This is an inseparable particle, prefixed to words; and, like *the* in English, suffers no change for Gender or Number.

PARADIGM OF THE ARTICLE.

Before ordinary conss.		— הַ,	הַקּוֹל
Before gutturals	א, ר, ע	— הָ,	הָאִישׁ
	ה, ח	— הַ,	הַחֹרֵב
Before gutturals with qameç	הָ, עָ	— הָ,	הָעָם
	עָ, הָ	— הָ,	הֶעָמֹל
	חָ,(חֶ)	— הָ,	הֶחָכָם

a) The *l* of the Art. is not written, but assimilated to the next consonant, which is thus doubled, as קוֹל *voice,* הַקּוֹל *the voice.*

b) Before *gutturals* (which cannot be doubled), the *pathaḥ* of the Art., falling in an open Syllable, expands to *qameç* (§ 8. 4), as הָאִישׁ *the man.* This expansion is universal before א and ר, and general before ע. Before the strong gutt. ה and ח, *pathaḥ* usually remains (§ 8. Rem. *d*).

c) The rule in *b*) applies to א and ר with any vowel. But when ה, ע, ח are pointed with *qameç*, the punctuation of the Art. varies:—

Before הָ and עָ in the Tone, the Art., falling in the *pretone*, takes *ā* (§ 6. 2*b*), as הָהָר, *the mountain*, הָעָם, *the people.*

Before הָ, עָ not in the Tone, the Art., falling *before* the pretone, retains the short vowel (comp. § 6. 2*c*), which by a law of euphony becomes *e* (*ṣᵉghol*), as הֶהָרִים, *the mountains*; הֶעָמֹל, *the trouble.* Before חָ (*ḥā*) in all positions the Art. takes *ṣᵉghol*, and also before חֶ, הֶחָכָם, *the wise,* הֶחָג, *the feast.*

Rem. *a.* Not unfrequently a softer pronunciation omits the Daghesh from letters pointed with *Shᵉva,* by § 7 Note *a.* The somewhat great

emphasis of such a syllable, which still remains, is many times marked by *Metheg*, as הַמְסַכֵּן Is. 40. 20. Metheg is not put before ֹ, nor yet immediately before the Tone.

Rem. *b*. The *hal* is *'al* in Arabic (though the Bedawin are said to pronounce *hal*), as *'Al-Qor'ân*. Perhaps this form is seen Gen. 10. 26.

---

man	אִישׁ	woman	אִשָּׁה	morning	בֹּקֶר
day	יוֹם	night	לַיְלָה	light	אוֹר
darkness	חֹשֶׁךְ	firmament	רָקִיעַ	dust	עָפָר
water, waters	מַיִם *pl.*	great	גָּדוֹל	good	טוֹב
high	רָם	upon	עַל-	and	וְ

The conjunction *and* is a particle inseparably prefixed to words, וְאִישׁ *and a man.*

To day	הַיּוֹם	*A good man*	אִישׁ טוֹב	*The man*	טוֹב הָאִישׁ
to night	הַלַּיְלָה	*the good man*	הָאִישׁ הַטּוֹב	*is good*	הָאִישׁ טוֹב

Rule 1. The adjective when it qualifies stands after the noun. If the noun be definite the adj. has the article.

Rule 2. The simple adj. when a predicate oftener precedes the noun than follows it. The predicate does not receive the art. The copula *is, are* &c. is not usually expressed.

EXERCISE: TRANSLATE.

To day. The morning. The night. The light *is* good. The good light. The lofty firmament. The darkness *is* upon the waters. The man and the woman. The great darkness. The good man. The firmament *is* high. A great day. The night *is* good. The dust *is* upon the waters.

§ 12. THE PERSONAL PRONOUNS.

	Sing.		*Signif. part.*	*Plur.*		*Sig. part.*
1. *pers. c.*	אָנֹכִי, אֲנִי	I	*i, ni, ki*	אֲנַחְנוּ, נַחְנוּ	we	*nu*
2. *pers. m.*	אַתָּה	thou	*ta*	אַתֶּם	ye	*tem*
f.	אַתְּ	„	*t*	אַתֶּן, אַתֵּנָה	„	*ten*
3. *pers. m.*	הוּא	he	*v, hu*	הֵם, הֵמָּה	they	*m*
f.	הִיא	she	*y, (ha)*	הֵן, הֵנָּה	„	*n*

The above forms of the Pers. Pronouns are used only to express the Nominative or as Subject: they must not be put as *oblique cases* after a verb or preposition. When not expressing the Subject, the Pers. Pronouns become attracted in a fragmentary form to the end of other words. These fragments (the *significant parts* above) are named *Pronominal suffixes*. See §§ 19, 31, 49. Comp. § 20. 6.

Rem. *a*. On 1 *pers*. In pause the accent is retracted to the penult (§ 10. 5b) אָנִי and אָנֹכִי. A plur. אָנוּ occurs once, Jer. 42. 6, and *naḥnû* six times, e. g. Gen. 42. 11, Ex. 16. 7.

Rem. b. On 2nd *pers*. In pause אָתָּה. The mas. is occasionally written אַתָּ 1 Sam. 24. 19, Job. 1. 10, and three times אָתְּ, Num. 11. 15, Deut. 5. 24, (? Ez. 28. 14). The form *'attā* is for *'an-tā*, and *'att* for *'antî*, which is seven times spelled אָתִי, Jud. 17. 2, 1 K. 14. 2 &c. The *plur*. *'attem* is for *'attum*. The *fem. pl*. *'atten* occurs Ezek. 34. 31, the MSS. waver between *'atten* and *'attēn*.

Rem. *c*. On 3rd *pers*. In the Pent. as usually printed הוּא is of *com*. gender, הִיא occurs only eleven times. *Fem. pl*. הֵן is actually found only as suffix.

---

eye	עַיִן *f.*	hand	יָד *f.*	mountain	הַר	disease	חֳלִי
earth	אֶרֶץ *f.*	heaven	שָׁמַיִם *pl.*	evening	עֶרֶב	people	עַם
sword	חֶרֶב *f.*	God	אֱלֹהִים *pl.*	palace	הֵיכָל	wise	חָכָם
powerful	עָצוּם	bad, sore	רַע	very	מְאֹד	very bad	רַע מְאֹד

The mountain הָהָר *the people* הָעָם *the earth* הָאָרֶץ

Rem. *d*. The Article sometimes prolongs the *pathaḥ* of monosyllables to *qameç*. The word *earth* appears as above with the Art.

The people is wise חָכָם הָעָם or הָעָם חָכָם הוּא.

Rule. The personal pronoun of 3. *pers*. is sometimes used to express the copula. It generally follows the predicate when indefinite, and precedes it when definite.

EXERCISE: TRANSLATE.

רָם הַהֵיכָל׃ 2 הָהָר הוּא רָם מְאֹד׃ 3 טוֹב הָעֶרֶב׃ 4 אַתָּה הוּא הָאֱלֹהִים׃ 5 אַתְּ הָאִשָּׁה׃ 6 הַחֶרֶב הִיא עַל־הָעָפָר׃ 7 אַתֶּם הָעָם׃ 8 עַם רָם וְגָדוֹל׃ 9 הָעָם הוּא עָצוּם מְאֹד׃ 10 הַיָּד וְהָעַיִן׃ 11 הַשָּׁמַיִם וְהָאָרֶץ׃ 12 הָעָם הֶעָצוּם וְהַגָּדוֹל׃ 13 אֲנִי הָאִישׁ הֶחָכָם׃

The eye. The hand. The mountain is very lofty. The dust is upon the waters. I *am* the man. We *are* the people. The sword. The good man is the wise man. The good and powerful people. The morning and the evening are the day. The darkness is the night. The lofty mountain. The darkness is very great upon the earth and upon the waters. Thou *art* the woman. It (*f.*) *is* the eye. They *are* the heavens. The great and sore disease.

§ 13. THE DEMONSTRATIVE AND OTHER PRONOUNS.

	Sing.	*Plur.*	*Sing.*	*Plur.*
mas.	זֶה this		הוּא that	הֵם, הֵמָּה those
f.	זֹאת „		הִיא „	הֵן, הֵנָּה „
c.		אֵלֶּה these		

	Sing.		*Plur.*
mas.	הַלָּזֶה	yonder	wanting
f.	הַלָּזוֹ	„	„
c.	הַלָּז	„	„

2. *Relative pronoun.* The relative is אֲשֶׁר *who, which*, invariable for all genders, numbers and cases.

3. *Interrogative pronoun.* The interrogative is מִי *who?* for persons, and מָה *what?* for things, both words indeclinable.

The emphasis of the question not being on the interrogative particle it falls forward on the next word (§ 7, note *b*), and מה assumes a *pointing quite like the Article* (§ 11):

Before non-gutturals	*path. and dag.*	מַה־זֶּה what is this?
before א and ר	*qameṣ*	מָה־אֵלֶּה what are these?
before other gutturals	*pathaḥ*	מַה־הִיא what is it?
before gutt. with qam.	*ṣeghol*	מֶה עָשָׂה what has he done?

Rem. *a.* The *fem.* of *this* is sometimes written זֹה or זוֹ, where the *th* of *fem.* termination is softened as in nouns § 16. Rem. *b.* A shorter *plur.* אֵל occurs eight times in the Pent. and in 1 Chron. 20. 8. A form זוּ is more used as a relative, comp. the use of *that* and *der*. With *z* i. e. *ds* comp. the *d*, *th* in *the*, *this*, *that*, *der*, *dieser*.

Rem. *b.* A shorter form of the relative is שׁ prefixed inseparably to words, mostly as שֶׁ or שַׁ with Dag. *forte*, שֶׁלִּי = אֲשֶׁר לִי.

Rem. *c.* In pointing *mah* the maqqeph is not always inserted. The pointing with ṣ^{e}ghol occurs in other cases besides the one specified. Occasionally מה unites with the following word, מַלְכֶם *what mean ye* (to you)? Is. 3. 15, Ex. 4. 2.

---

king	מֶלֶךְ	head	רֹאשׁ	boy	יֶלֶד	Jehovah	יְהוָה
to create	בָּרָא	to call	קָרָא	to bear	יָלַד	to shed	שָׁפַךְ
to take	לָקַח	to hear	שָׁמַע	to say	אָמַר	to come	בָּא
to sit	יָשַׁב	not	לֹא	how!	מָה	unto	אֶל־

Rem. The root of the verb is 3. *s. perf.* e. g. *he created, he took*, not the *infin.*

This is the man	זֶה הָאִישׁ
This is the good man	זֶה הָאִישׁ הַטּוֹב
This man	הָאִישׁ הַזֶּה
This good man	הָאִישׁ הַטּוֹב הַזֶּה

Rule 1. The demonstratives *this, that* may be pronouns or adjectives. When pronouns they do not take the Art., and the order is as in English. When they are adjectives, their noun is definite, and they conform to Rule 1 § 11. With another adj. the demons. stands last.

The boy heard	שָׁמַע הַיֶּלֶד	*The boy did not hear*	לֹא שָׁמַע הַיֶּלֶד
The boy did not hear the voice		אֶת־הַקּוֹל	„ „ „

Rule 2. The nominative, unless emphatic, usually follows the verb.[1]

Rule 3. The definite accus. in nouns and pronouns when directly governed by an active verb is usually preceded by the particle אֵת.[2]

Rule 4. The negative stands immediately before the verb or predicate.

---

[1] Sentences are of two kinds, verbal—having a *finite* verb for predicate; and nominal—having any other kind of predicate. The order in a verbal sentence is verb, subject; in a nominal, subject, predicate (cf. the excep. § 11 Rule 2).

[2] The pron. *mah* "what" does not take אֵת.

EXERCISE. TRANSLATE.

מִי אַתֶּם: 2 מִי הָאִשָּׁה הַהִוא: 3 הַמַּלְכָּה הַהוּא: 4 זֶה הַיּוֹם אֲשֶׁר עָשָׂה
אֱלֹהִים: 5 הָעָם הֶעָצוּם הַזֶּה: 6 זֶה הַיֶּלֶד אֲשֶׁר שָׁמַע אֶת־הַקּוֹל:
7 מִי יָלַד אֶת־אֵלֶּה: 8 יָשַׁב הַמֶּלֶךְ עַל־הָעָפָר: 9 בָּא הָאִישׁ אֲשֶׁר
שָׁפַךְ הַמַּיִם עַל־הָאָרֶץ: 10 מַה־טּוֹב הַיּוֹם הַזֶּה׃ 11 בָּרָא אֱלֹהִים
אֵת הַשָּׁמַיִם וְאֵת הָאָרֶץ: 12 וְקָרָא זֶה אֶל־זֶה וְאָמַר קָדוֹשׁ
יְהוָה[1]: 13 לָקַח הַמֶּלֶךְ אֶת־הַחֶרֶב: 14 מִי הָאִישׁ הַגָּדֹל הַזֶּה:

Who *are* these? What *are* ye? Who *is* yonder woman? I *am* the great king who *is* over (upon) the land. That day. This *is* a good head. This *is* the good head. This head *is* good. This good head. This *is* the bad boy who spilt the water upon the earth. This woman. What has the man done? This mountain is very lofty. What *are* these? These *are* the heavens and the earth which God created this day. This *is* the wise king. That[2] sore disease. He sat by (upon) those waters. How great *is* that palace!

§ 14. THE INSEPARABLE PREPOSITIONS.

1. Prepositions and similar words in Hebrew are usually nouns, sometimes entire, but oftener worn down and fragmentary. The following three fragments used as prepositions are, like the Art., inseparably prefixed to words:

ב *in, by, with;* local and instrumental

כ *as, like*

ל *to, at, for;* sign of *dat.* and *infin.*

a) The usual pointing of these light fragments is simple sh^{e}va.

b) Before another sh^{e}va this becomes *ḥireq*, by § 6. 2 d., forming a half open syllable, לְבַב, בִּלְבַב.

c) Before a ḥaṭeph the sh^{e}va becomes the corresponding short vowel, by § 8. 3, אֲרִי, כַּאֲרִי=כְּאֲרִי, *like a lion.*

d) Before the accent, the prep., falling in the *pretone,* often has tone-long *qameṣ* (§ 6. 2 b.), as לָמָּיִם *to water.*

---

[1] For this name the reader substituted אֲדֹנָי *Lord*, the vowels of which stand in the text. Possibly the word was pronounced יַהֲוֶה *Yah-véh.*

[2] In *sing.* הַהוּא, in *plur.* הָהֵם.

e) In words with the Art. the weak *He* usually surrenders its vowel to the prep. and disappears, by § 9. 2., לָעָם, הָעָם *to the people*.[1]

2. The short word מִן used as a prep. in the sense of *from, out of*, is also a worn down noun and generally used as an inseparable particle.

a) The weak liquid *n*, as in other languages, is assimilated to the next consonant, which is doubled, מִמַּיִם *from water* (as *im-moveable*).

b) Before gutturals, the short vowel expands in the open syllable into the corresponding tone-long, מֵעֵץ *from a tree*, by § 8. 4.; and occasionally ḥireq remains by § 8. 4. Rem.

c) Before the Art. either *b*) is followed; or oftener the prep. is prefixed entire to the word with help of Maqqeph, מַהָעֵץ or מִן־הָעֵץ *from the tree*.

Rem. The prep. is occasionally found entire in other cases.

---

book	סֵפֶר	garden	גַּן	place	מָקוֹם

to give	נָתַן	to eat	אָכַל	to rest	שָׁבַת
to rule over	מָשַׁל בְּ	to destroy / to blot out	מָחָה	to cry / unto	קָרָא עַד

EXERCISE. TRANSLATE.

קָרָא אֱלֹהִים לָאוֹר יוֹם וְלַחֹשֶׁךְ קָרָא לָיְלָה׃ 2 שָׁבַת אֱלֹהִים בַּיּוֹם הַשְּׁבִיעִי מִכָּל־מְלַאכְתּוֹ אֲשֶׁר עָשָׂה׃ 3 שָׁמַע הָאָדָם הַקּוֹל בַּגַּן׃ 4 מָשַׁל הַמֶּלֶךְ בָּעָם׃ 5 יָשַׁב הַיֶּלֶד בַּמָּקוֹם הַזֶּה׃ 6 מָחָה יְהוָה אֶת־כֹּל אֲשֶׁר עָשָׂה מֵאָדָם וְעַד בְּהֵמָה׃ 7 עָשָׂה אֱלֹהִים אֶת־הָאָדָם עָפָר מִן־הָאֲדָמָה׃ 8 הָאֱלֹהִים הוּא בְּהֵיכָל׃

---

[1] The ה sometimes remains, particularly after כ, and in the declining stages of the language.

To a lion. The man wrote in the book. God gave the woman to the man for wife. In the morning. In these heavens. In the earth. In that day. In the lofty palace. The lion cried like an (the) ass. God called the firmament heaven, and the dry land called he earth. He gave the sword to the king. Man is dust out of the ground. He ate of the tree. The wise people rested on the seventh day. To the dust. In (at) pain. On (in) the high mountain.

§ 15. THE CONJUNCTION &c.

1. The inseparable conjunction וְ *and* is pointed very much like the inseparable prepositions in § 14.

a) Its ordinary pointing is sh^{e}va, וְאַתָּה *and thou.*

b) Before the ḥaṭephs it takes the corresponding short vowel (§ 8. 3.), וַאֲנִי *and I.*

c) Before simple sh^{e}va and the Labials (ב ו מ פ) its pointing is וּ, וּבֵן *and a son.*

d) Before the accent, especially if disjunctive, it often takes *qameç* (§ 6. 2 b.), וָרַע׃ *and evil* Gen. 3. 5.

Rem. Before *yod* with sh^{e}va the pointing is *ḥireq* after § 6. 2d., and *yod* is silent (§ 9. 1), וְיֹמֵי *and the days of—*. Even before a labial, the law *d)* of the *pretone* may prevail, as וָבֹהוּ, Gen. 1. 2. Naturally the conj. does not cohere so closely with the word as the prep. and does not displace the *He* of the Art., as וְהָעָם *and the people.*

2. *The verb.* The root of the verb is held to be 3. *sing. perf. act.*, which is the simplest form. Verbal inflection for persons is made by attaching to this root the significant elements of the personal pronouns (§ 12).

3. *sing. mas. perf.*	he ruled, has ruled &c.	מָשַׁל	
2. „ „ „	thou hast ruled &c.	מָשַׁלְתָּ	*ta* of pr. *thou*
2. „ *fem.* „	thou hast ruled &c.	מָשַׁלְתְּ	*t* „ „
1. „ *com.* „	I ruled, have ruled &c.	מָשַׁלְתִּי	*ti* = *ki* of pr. *I*
1. *plur. com.* „	we ruled, did rule &c.	מָשַׁלְנוּ	*nu* of pr. *we.*

EXERCISE. TRANSLATE.

I said to the man. The man and the woman. A lion and an ass. We rested on the seventh day. And of the tree we have eaten.

God destroyed from the earth man and cattle. And on that day I wrote in the book. People and king. Who spilt the water upon the earth? I heard the voice in the garden. Thou hast said, holy *is* Jehovah. And these who *are* these? Dry land and water. Night and morning. Thou (*f.*) hast ruled over this people.

§ 16. THE NOUN. INFLECTION.

1. Stems in Hebrew are considered to contain three consonantal letters. The noun may be regarded as expressing the stem idea in *rest*, and the verb the idea in *motion*. Hence the vowels of the verb are lighter than those of the noun. It is convenient to consider the verb as the root out of which other parts of speech grow, though there are many nouns not traceable to extant verbal stems. Nouns are thus primitive or derivative. We may on the other hand take a noun or particle and set it in motion, that is verbalize it; such verbs are called *Denominatives* &c. as *to dust*.

2. Inflection in Hebrew takes place after two modes, an outside and an inside mode. Both modes are to be observed in most languages, e. g. *boy*, *boys*, by the outside inflection; *man*, *men*, by the inside; so *fear*, *feared*, but *tread*, *trod*. The Shemitic languages have a preference for the inner inflection. This prevails greatly in the Heb. verb, though it has not gained great footing in the noun, the inflection of which is external. But in Southern Shemitic internal nominal inflection is also very common. Great alterations do occur within the noun in Heb., but these are due to movements of the Tone and differ altogether from such changes as appear in *foot*, *feet*. At the same time as the accentual changes take place to a certain extent on various principles, they afford means for classifying nouns into several *Declensions*. The external changes may be called *Inflection*.

3. *Inflection, external modifications in Nouns.*

In Hebrew there are *two* genders: *mas.* and *fem.*

There are *three* numbers: *sing.*, *dual*, and *plur.* The *dual* is now very much in disuse, being employed mostly to express things that occur naturally or by use in pairs, as *hands, feet, shoes.*

The *fem. sing.* is formed by adding *āh* to the *mas.*

The *plur. mas.* is formed by adding *îm* to the *sing.*; and the *plur. fem.* by changing *āh* into *ôth*, or by adding *ôth* to the *sing.* if it has no *fem.* termination.

The *dual* is formed by adding *áyim* to the *mas. sing.* for the *mas.*, and to the original *fem. sing.* (see Rem. *b*) for the *fem.* Thus:

	mas.		*fem.*		*mas.*		*fem.*	
sing.	טוֹב	*good*	טוֹבָה		סוּס	*horse*	סוּסָה	*mare*
plur.	טוֹבִים	„	טוֹבוֹת		סוּסִים	„	סוּסוֹת	„
dual					סוּסַיִם	„	סוּסָתַיִם	„

4. *Classes of nouns feminine.*

1) Words ending in ה֫— or ת (see Rem. b).

2) Words of any termination that are names of creatures feminine, as אֵם *mother.*

3) Names of cities, countries &c., which may be considered *mothers* of their inhabitants.

4) Names of organs of the body of men or animals, especially such organs as are double, as *hand, ear, horn;* also of other utensils or instruments used by man, as *sword, cup,* and even of *places* in which man is wont to move.

5) Names of things productive, the elements, unseen essences &c., as *sun, earth, fire, soul* &c.

In all these classes however there are numerous exceptions; and many words are of both genders, though in general where this is the case one gender is largely predominant in usage over the other.

6) Words *fem.* usually assume the distinctive *fem.* termination in the *plural.* Many *fem.* nouns however have the *mas. plur.* ending; and on the contrary many *mas.* words have the *fem.* termination in the *plur.*, especially if they incline towards a *fem.* sense by 4) or 5).

Rem. *a.* The *Dual* is confined to substantives (and the numeral *two*); it is no more found in the adjective, pronoun, or verb.

The dual perhaps properly expresses a *pair*, or *one* or *more pairs*, but it is now used as a *plur.* of things occurring in pairs, as שֵׁשׁ כְּנָפַיִם *six wings*. In usage the dual is employed, 1. for organs and features in men and animals that are double, as eyes, ears, hands, feet, lips, teeth, loins, horns, wings &c. 2. For things that are double, as shoes, door-leaves, fetters. 3. A few nouns still use the dual to express *two*, as day, year, cubit, hundred, thousand. 4. The Numerals employ the dual to express *times* (repetition), § 48. When terms properly dual are transferred to inanimate objects as *horns* (of altar) they are used in *fem. plur.*

Rem. *b*. The original *fem.* ending is *ath* (ת—). When the word stands independently this is softened in the *tone* into *āh*, the present ordinary termination, but when the word is in close connexion with what follows, or has any addition made to it, the original *ath* reappears. By loss of the *a* this ending became *th*. This simple *th* could most easily be attached when the word ended in a vowel, or in a single conson. preceded by a changeable vowel, as עִבְרִי, עִבְרִית, מִשְׁמָר, מִשְׁמֶרֶת. It could not be added at all if the word ended already in two conson. (§ 5.6), nor readily if in one cons. preceded by an unchangeably long vowel. In these cases the termination *āh* was added. Thus the fem. endings may be: 1) *t* or *th*, יַלַדְתְּ Gen. 16. 11, which generally assumes the form יָלְדָה (§ 29). 2) *ath* or *āth*, חַיַּת Ps. 74. 19, עֲזָרַת Ps. 60. 13, both archaic and passing into 3) *āh* the ordinary ending. Sometimes this *āh* may be represented, as it is usually in Aramean, by א (§ 2. 3). In a very few cases *āh* is deflected to *êh* (s^{e}ghol).[1]

---

[1] The Shemitic *fem.* being in *t* the apparent analogy between the *fem. a* in Latin &c. and the ordinary *ăh* of *fem.* nouns is no real one. But a new analogy arises between the Heb. *fem.* and the *neuters* in Lat. English &c., so many of which end in *t*, *id*, *quid*, *illud*, *it*, *that*, *what*. Possibly the *mas.* in Shemitic included both the *mas.* and *fem.* (comp. הוּא *eom.*) and that which was once dedicated to express the *neut.*, this having been dropped, has been appropriated to the *fem.*

ox	שׁוֹר[1]	cow *f.*	
horse	סוּס	mare *f.*	
fish	דָּג	fish *f.*

EXERCISE. TRANSLATE.

לֹא שָׁתָה הַפָּר מִן־הַמַּיִם כִּי מָרִים הֵם׃ 2 אֵלֶּה הַפָּרוֹת הָרָעוֹת
אֲשֶׁר רָאָה הַמֶּלֶךְ עַל־הַיְאֹר׃ 3 מָשָׁל הָאָדָם בַּבְּהֵמָה וּבַדָּגִים׃
4 הֶהָרִים הַשֹּׂרִים וְהַגִּבּוֹרִים אֲשֶׁר נָתַן הַמֶּלֶךְ עַל־הָעָם׃ 5 אָמַרְתִּי
אֶל־הָעָם הַזֶּה צַדִּיקִים אַתֶּם׃ 6 הֶהָרִים הָאֵלֶּה רָמִים מְאֹד׃
7 סָפַרְתָּ אֶת־הַכּוֹכָבִים׃ 8 מָה רָמִים הַהֵיכָלִים הָהֵם׃ הַיָּדַיִם׃
יַרְכָתַיִם׃

I remember (*perf.*) the songs which I heard in the temple. These waters *are* bitter. Those heavens *are* very lofty. These *are* the asses which we slew. Who *are* these princes and heroes? Thou hast heard the cows. God remembers the just (*pl.*). We sat on the hills two-days. The new king saw the good cows by the rivers in a dream. The just are as the stars which *are* in the firmament. The two-sides. He took oxen and cows and horses and asses. We heard the wolves in the evening. I counted the stars which God has set in the heavens. Water from the wells. Thou (*f.*) hast spilt blood (*pl.*).

§ 17. CASES. THE CONSTRUCT STATE.

1. Hebrew is considered to have the following cases: first, the Nominative. But the language has no special termination for the expression of this case. In some proper names, borrowed

[1] The words *ox, prince, adversary, bitter*, have *a* (path.) when uninflected or without the Article, see Rem. *d*, § 12, and § 43.

probably from neighbouring tribes, there appears the termination *u*. (The nom. in Arabic ends in *u* or *un*.)

Second, the Genitive. This is a relation of two elements, of which the first is always a noun, while the second, though chiefly a noun, may be a pronoun or even a clause. The first member of the gen. relation is said to be in the *construct state*. It is a question whether this first member had any distinctive termination. It appears occasionally in *i*.[1] The second member has no special termination. (The Ar. gen., which is the *second* member, is in *i* or *in*.)

Third, the Accusative. Neither is this case expressed ordinarily by any specific termination. But there are here quite visible traces of a case ending, though it is not easy to say whether the traces should be considered remains of a full development now in decay, or merely a rudimentary commencement. This accus. ending is *a*. (The Arab. acc. is in *a* or *an*.)

Thus so far as case endings can be suspected they are the three sounds *a i u*. Three cases may seem to form a meagre provision for expressing the relations of nouns. But the use of the Accus. is very wide, it serves often as a *locative*, and sometimes almost as an *instrumental*, and as a general *modal* or adverbial case. And the use of the Gen. is also extremely free.

2. *The construct state.* When a noun is so connected in thought with a following word or clause that the two make up one idea, the first is said to be in the *construct state* or in construction. A word not so dependent is said to be in the *absolute* state; e. g. in *son of the king, great in power,* the words "son" and "great" are in the construct, "king" and "power" are in the absolute.

The const. relation corresponds most nearly to the Gen., or to the relations expressed by *of* in English. Now the first half of a relation like *son of*—, forming no complete idea of itself, the emphasis of the whole expression lies on the second half. In this way the cons. or first half is uttered *as shortly as is possible* in consistency with the laws

[1] See Gen. 49.11 &c. and such proper names as Gabri-el, *man of God*, Melchi-zedek, *king of righteousness*. In a few cases the Cons. ends in o.

of pronunciation in the language; any merely tone long vowel within the word will be shortened or lost, § 18, and any weak letter outside the word, elided.

NOMINAL PARADIGM.

	Mas.			*Fem.*		
	Abs.		*Cons.*	*Abs.*		*Cons.*
sing.	סוּס	horse	סוּס	סוּסָה	mare	סוּסַת
plur.	סוּסִים	„	סוּסֵי	סוּסוֹת	„	סוּסוֹת
dual	סוּסַיִם	„	סוּסֵי	סוּסָתַיִם	„	סוּסָתֵי

In *mas. sing.* there is no change of termination.

In *mas. plur.* and *dual, îm* and *ayim* elide the weak *m* and become *ê*.

In *fem. plur.* no change.

In *fem. sing.* the original ending is resumed (§ 16 Rem. *b*); and in *fem. dual ayim* becomes *ê* as in *mas.*, and tone-long *ā* is lost (§ 18).

3. *Use of the accusative ending.* The accus. ending has been retained in one particular usage. The *āh* is added to words to express *direction* or motion towards.—The ending in this use of it, which is probably a revival and extension of its former use, has not the tone. It may be appended to the plur., and even to the cons. state, as הָהָרָה *towards the mountain;* הַשָּׁמַיְמָה *heavenwards;* בֵּיתָה יוֹסֵף *to the house of Joseph.*

Rem. This *He* is called *He locale* by some. It cannot be used with *persons*, and has in many cases lost its strong sense of *direction to* and implies no more than *at* or *in*. It may even admit a prep. of motion before its word.

The horse of the king
the king's horse } סוּס הַמֶּלֶךְ

The horses of the king
the king's horses } סוּסֵי הַמֶּלֶךְ

Rule 1. The word in cons. state does not take the Art. The second noun is usually definite and the first is defined by its relation to it.

The good horses of the king סוּסֵי הַמֶּלֶךְ הַטּוֹבִים
The good mare of the king סוּסַת ה' הַטּוֹבָה

Rule 2. An adj. qualifying a noun in cons. state must stand after the compound expression, and the noun in cons. being definite, the adj. has the Art.[1]

Every day כֹּל יוֹם *All the day* כֹּל הַיּוֹם

All the king's horses כָּל־סוּסֵי ה׳

Rule 3. The word *all* is a noun and used in the cons. state.

north צָפוֹן — valour / force חַיִל — bed מִטָּה — poor אֶבְיוֹן

[1] Abigail. [2] Israel. [3] Dag. in *kaph* only in cons. [4] Observe the pausal vowels in 6, 9, 10, 11.

The great day of the Lord. The day of the Lord is great. The good queen of the land. All the people of the earth. All the king's good asses. The captain (prince) reviewed all the mighty-men (heroes) of valour and all the people of war. In the two-sides of the temple. I have gone northward. We are gone down to-hades (Sh^{e}'ôl). He went towards-the-mountain. We slew the

[1] The adj. agrees with its noun in gend. and numb. but not in *state*. The cons. is euphonic as well as syntactical and must be *followed immediately* by the word to which it subordinates itself.

man's ass. The people did not drink from the waters of the rivers for they *were* blood.[1] The law of the lord is good. Thou hast not kept the commandments of the God of all the earth. The spirit of God *was* upon the waters. God of the spirits *that belong* to all flesh. I have broken down all the walls of the city. Thou hast kept the poor of the land from all ill. Thou hast eaten of the tree of the garden.

[1] In dependent clauses with כִּי *for, that* &c. the pronoun is put last.

§ 18. THE FIRST DECLENSION.*

Nouns may be arranged in Declensions according to the internal vowel changes produced by alteration in the place of Tone occasioned by *Inflexion* (§ 16. 2). Many forms of Nouns, however, contain unchangeable vowels, i. e. vowels pure long, or diphthongal, or unchangeable from position, as גִּבּוֹר (*gibbôr*), *a hero,* אֶבְיוֹן (*'ebh-yôn*), *poor*, in both of which the first vowel is unchangeable by position, and the second pure long, and consequently unchangeable by nature (§ 6. 1). Such Nouns, as they suffer no internal change from inflexion, do not seem to require classification; they are indeclinable.[1]

The forms that suffer change are those having *tone-long* vowels. These vowels, having been rarely expressed by the so-called *Vowel-letters* (§ 2. 3), may very generally be distinguished from pure-long, and diphthongal, vowels, which were very often so expressed (§ 2. 3 Rem.). In general only *qameç* and *çere* are tone-long in nouns, *ḥolem* being for the most part unchangeably long.

The forms with changeable vowels seem capable of being generalized under *three* classes or Declensions.

---

* The principles stated in § 6 should be fully understood here; and it should be remembered that, when words are increased at the end, the accent plants itself upon the significant inflectional addition (§ 5. 1).

[1] Such forms are those numbered 8, 14, 15, 16, 20, 23 in the Table of Common Nominal Forms in the Appendix of Paradigms, and a number of other Forms not given in that Table. These forms with unchangeable vowels might be called a First Declension, in which case the Declensions would amount in all to *four*.

1. A large number of words are of the same form as the *perfect* of verbs, and are chiefly participles or adjectives, though many are substantives. With these may be classed some other forms of words that are subject to the same laws. Together they may be called

THE FIRST DECLENSION.

They are words having:

ā in the pretone, or *ā* in the tone, or *ā* in both places.

Rules for declension. 1. With inflectional additions the accent is shifted a place, and the tone-long pretonic *ā ē* is lost, i. e. becomes vocal sh^{e}va, by § 6. 2 c.

2. The very hurried utterance of the construct produces, in addition to this loss of the pretonic vowel, a contraction of the tone-vowel *ā ē*, that is the shortening of it in a shut syllable (*sing.*), and the loss of it in an open one (*plur.*)

		Plur.	*Cons. sing.*	*Cons. plur.*
1) upright	יָשָׁר	יְשָׁרִים	יְשַׁר	יִשְׁרֵי (=יְשָׁרֵי)
2) old	זָקֵן	זְקֵנִים	זְקֵן	זִקְנֵי (=זְקָנֵי)
3) great	גָּדוֹל	גְּדוֹלִים	גְּדֹל	גִּדְוֹלֵי
4) blessed	בָּרוּךְ	בְּרוּכִים	בְּרוּךְ	בִּרְוּכֵי
5) overseer	פָּקִיד	פְּקִידִים	פְּקִיד	פִּקְידֵי
6) heart	לֵבָב	לְבָבוֹת	לְבַב	לִבְבוֹת (=לְבָבוֹת)
7) star	כּוֹכָב	כּוֹכָבִים	כּוֹכַב	כִּוְכְבֵי
8) desert	מִדְבָּר	מִדְבָּרִים	מִדְבַּר	מִדְבְּרֵי

Rem. *a.* Tone-long *ō* does not appear much in nouns, but see § 29. The forms 1, 2, 3 with vowels *a—a*, *a—e*, *a—o*, may be considered the typical forms of this declension, see § 22. The forms 4, 5 are pass. participles, and 6 is a less common nominal formation. The forms 7, 8 shew that if the pretonic be immutable there is no change except in Cons., rule 1 having no application. A very few forms without *ā* are similarly inflected. See Add. Notes.

Rem. *b.* The form *a—e*, has *a* in *cons. sing.*, as no other short vowel can stand in the final accented shut (§ 6. Rem. *b*). If it be desired to retain the *e* sound, the form זְקֵן־ with Maqqeph can be used, comp. § 10. 4.

The *new* syllables that arise are *half open* (§ 6. 2 e), as in *heart*, *lĭbhbhôth*, No. 6.

2. *Feminine nouns.* When the distinctive termination of the fem. noun is not *final*, its softening into *āh* cannot have place, the real ending *ath* must be assumed as base, and then the above two laws apply as to other nouns.

righteousness	צְדָקָה	(=צְדָקָת)	*cons.*	(=צְדַקַת)	צְדַקַת
elder	זְקֵנָה	(=זְקֵנָת)	*cons.*	(=זְקֵנַת)	זְקֵנַת
righteousnesses	צְדָקוֹת		*cons.*	(=צְדָקוֹת)	צְדְקוֹת

3. A few monosyllables with changeable vowels (*ā ē*) in the tone attach themselves to this declension. They are probably real dissyllables which have undergone contraction. The chief are יָד *hand*, דָּם *blood*, דָּג *fish*, עֵץ *tree*. As they want the pretonic vowel the same law that applies to *star* will apply to them. See Add. Notes to First Declension.

fish דָּג *cons.* דַּג *plur.* דָּגִים *cons. pl.* דְּגֵי

WORDS FOR PRACTICE.

male	זָכָר	holy	קָדוֹשׁ	perfect	תָּמִים
word	דָּבָר	short	קָצַר	lip	שָׂפָה
proverb	מָשָׁל	luminary	מָאוֹר	blessing	בְּרָכָה
heavy	כָּבֵד	prophet	נָבִיא	vengeance	נְקָמָה
leopard	נָמֵר	fat	בָּרִיא	corpse	נִבֵלָה

Exerc. Write the *cons. sing.* and the *abs.* and *cons. pl.* of the above words. (The *abs.* and *cons. dual* of *lip.*)

two שְׁנַיִם sand חוֹל to gather אָסַף to lift up נָשָׂא sea יָם
there שָׁם face פָּנִים *plur.*

EXERCISE. PARSE AND TRANSLATE.

בְּרִיאוֹת, דְּגַת, נְבִיאֵי, יִשְׁרֵי, רְקִיעַ, לְבָבוֹת, מְאוֹר, מְשָׁלֵי, כָּבֵד, לִבְבִי, פִּקּוּדֵי, לֵבָב, שִׂפְתֵי, נִקְמַת, בִּרְכוֹת, יָדַיִם:

הַחֲמוֹר׃

[1] Isaac. [2] Jacob. [3] Esau.

The law of the Lord is perfect. The king saw the fat kine upon the bank (lip) of the river. We have eaten the flesh of fat oxen. The words of the lips of the Lord *are* upright. I *am* not a man of words. Good words *are* the words of the law of the Lord. The waters *are* upon the face of all the earth. We have heard the words of the holy prophets of God. Thou hast kept the hearts of this people from evil. Very great *are* the righteousnesses of God. Blessed *are* the upright of heart. The vengeance of the people *was* great. The day of vengeance *is* in the heart of God. The proverbs of the king *are* perfect. All the fishes of the river. The desert of the sea.

§ 19. THE PRONOMINAL SUFFIXES.

The separate Personal Pronouns are used only to express the Nominative or as Subject (§ 12).

Hebrew has not largely developed the adjective; instead of saying *holy hill, silver idol,* it says *hill of holiness, idol of silver,* and the like. Similarly for *my horse* it says *horse of me.* The possessive pronouns *my, thy, his, our* &c. are altogether wanting. But the noun being placed before the pronoun in the Genitive, two effects followed:

first, the pronouns had not the strength of nouns and could not maintain themselves as separate words, and so became attracted in the form of *Suffixes* to the noun preceding them;

and *second,* the noun itself, which before an independent word would have stood in the form of the *Const.,* underwent before these lighter fragments attached to itself a less degree of shortening, only a few of the more heavily accented Suffixes having the power to throw it into the Const. form.

Thus the Suffixes are divided into *light* and *heavy;* all

are light, except those to a singular noun which express *your* mas. and fem., and those to a plur. noun which express *your* and *their* mas. and fem.

The light suffixes affect a noun like the Plur. or Du. termination, the heavy throw it into the form of the Const. state.

Particles, such as *Prepositions* and *Adverbs,* are generally *Nouns* in a fragmentary condition, and may take Suffixes, which are attached to them precisely as to Nouns. See § 49.

NOUN WITH SUFFIXES.

	Mas.		*Fem.*	
Singular noun	סוּס	דָּבָר	סוּסָה	צְדָקָה
	(horse)	(word)	(mare)	(righteousness)
sing. 1 *c.* my	סוּסִי	דְּבָרִי	סוּסָתִי	צִדְקָתִי
2 *m.* thy	סוּסְךָ	דְּבָרְךָ	סוּסָתְךָ	צִדְקָתְךָ
2 *f.* thy	סוּסֵךְ	„	סוּסָתֵךְ	„
3 *m.* his	סוּסוֹ	„	סוּסָתוֹ	„
3 *f.* her	סוּסָהּ	„	סוּסָתָהּ	„
plur. 1 *c.* our	סוּסֵנוּ	„	סוּסָתֵנוּ	„
2 *m.* your	סוּסְכֶם	דְּבַרְכֶם	סוּסַתְכֶם	צִדְקַתְכֶם
2 *f.* your	סוּסְכֶן	„	סוּסַתְכֶן	„
3 *m.* their	סוּסָם	דְּבָרָם	סוּסָתָם	צִדְקָתָם
3 *f.* their	סוּסָן	„	סוּסָתָן	„
Plural noun	סוּסִים	דְּבָרִים	סוּסוֹת	צְדָקוֹת
	(horses)	(words)	(mares)	(righteousnesses)
sing. 1 *c.* my	סוּסַי	דְּבָרַי	סוּסוֹתַי	צִדְקוֹתַי
2 *m.* thy	סוּסֶיךָ	„	סוּסוֹתֶיךָ	„
2 *f.* thy	סוּסַיִךְ	„	סוּסוֹתַיִךְ	„
3 *m.* his	סוּסָיו	„	סוּסוֹתָיו	„
3 *f.* her	סוּסֶיהָ	„	סוּסוֹתֶיהָ	„
plur. 1 *c.* our	סוּסֵינוּ	„	סוּסוֹתֵינוּ	„
2 *m.* your	סוּסֵיכֶם	דִּבְרֵיכֶם	סוּסוֹתֵיכֶם	צִדְקוֹתֵיכֶם
2 *f.* your	סוּסֵיכֶן	„	סוּסוֹתֵיכֶן	„
3 *m.* their	סוּסֵיהֶם	„	סוּסוֹתֵיהֶם (תָם)	„
3 *f.* their	סוּסֵיהֶן	„	סוּסוֹתֵיהֶן	„

NB. The *dual* takes the same Suffixes as the plural. The suffixes of *sing.* nouns are sometimes joined to *fem. pl.,* particularly 3 *pl.,* נַפְשׁוֹתָם *their souls.*

Rem. *a.* The suffixes of 2. *pers. ka, k, kem, ken*, are for *ta, t, tem, ten*, according to an interchange of *t* and *k* frequent in language (§ 12). No *Dag.* in *k* by Note p. 17.

In the other persons the fragmentary element of the pronoun may readily be seen.

Rem. *b.* The helping vowel between the stem and the suffix seems in all cases traceable to *i* or *a*. Comp. § 17. 1. In the 1st and 2nd person the *i* sound prevailed as base, *ṣuṣî, ṣuṣékha, ṣuṣēkh, ṣuṣēnu.* Forms with *a* are rare. Job **22.** 20.

In 3. *pers.* the *a* sound prevailed, as 3 *mas. ṣuṣáhu=ṣuṣaw=ṣuṣô*; 3 *fem. ṣuṣāh;* 3 *pl. ṣuṣáhem* or *ṣuṣáham* (2 Sam. **23.** 6)=*ṣuṣām.* Forms with *e* in *ṫhu, éha* are rare (§ 45). Gen. **1.** 21.

Rem. *c.* Peculiarities are common. Sing. noun: 2 *m.* in *p.* סוּסְךָ, Gen. **4.** 11; plenary writing, סוּסֶכָה Gen. **3.** 9; **10.** 19; **27.** 37, Ex **13.** 16. In 2 *f.* כִי־, Jer. **11.** 15, Ps. **103.** 3. In 3 *m.* old form אָהֳלָה *his tent*, Gen. **9.** 21; **35.** 21; **49.** 11. After vowels *hu* (§ 45, see Irreg. nouns); otherwise, Gen. **1.** 12, Jud. **19.** 24, Job **25.** 3. In 3 *f.* mappiq omitted, Is. **23.** 17, Ps. **48.** 14. In some cases the *fem.* termination appears dropped, Gen. **40.** 10 נִצָּה for נִצָּתָה, Zech. **4.** 2, Prov. **7.** 8, Job **11.** 9, cf. Hos. **13.** 2, Ps. **49.** 15; **55.** 16 (Ez. **32.** 27?). Rarely in 1 *pl. ānu*, Ruth **3.** 2, Job **22.** 20; on particles cf. § 49. In 2 *pl. f. kénah*, Ez. **23.** 48, 49. In 3 *pl. m.* מוֹ־, Ps. **17.** 10 (cf. לָמוֹ § 49). In some cases מוֹ appears 3 *sing.*, cf. Job **20.** 23; **22.** 2; **27.** 23 (Is. **53.** 8? Ps. **11.** 7?). Uncontracted form 2 Sam. **23.** 6. In 3 *pl. f.* נָה־, Gen. **21.** 29; **42.** 36; נָה־, Gen. **41.** 21; הֶנָּה־, 1 K. **7.** 37, Ez. **16.** 53. After vowels *hen* (§ 45), and otherwise, Gen. **21.** 28, Lev. **8.** 16, Ez. **16.** 53, cf. Is. **3.** 17.

Plur. suff. often defectively written by omission of *yod*, e. g. 3 *m.* סוּסָו, Gen. **33.** 4, 1 Sam. **18.** 22, Ps. **10.** 5; **24.** 6; 3 *pl. m.* Gen. **10.** 5; **43.** 11; 3 *pl. f.* Gen. **4.** 4.—Peculiar forms are: 2 *f* כִי־ 2 K. **4.** 3, Ps. **103.** 3, 4, 5; 2 *pl. f. kénah*, Ez. **13.** 20; 3 *pl. m.* ימוֹ־ Ps. **2.** 3, 5, Deut. **32.** 37, 38; **33.** 29; *hémah* Ezek. **40.** 16; 3 *pl. f. hénah* Ez. **1.** 11.

My good horse סוּסִי הַטּוֹב *Your evil words* דִּבְרֵיכֶם הָרָעִים

Rule. The noun with Suffix being really in the Cons. and definite, the rules for the Cons. apply to it and its adj.—it does not take the Art. and its adj. does. § 17 Rules 1. 2.

face פָּנִים *son* בֵּן *pl.* בָּנִים *daughter* בַּת *pl.* בָּנוֹת

my face פָּנַי *the man's face* פְּנֵי הָאִישׁ

before me לְפָנַי *before the man* לִפְנֵי הָאִישׁ

after אַחֲרַי *after me* אַחֲרַי

EXERCISE. TRANSLATE.

תּוֹרָתוֹ, שִׁפְתָיו, בִּרְכָתְךָ, בָּנֶיךָ, מִשְׁלֵיכֶם, מִקוֹמָהּ, מִבְּשָׂרִי, בְּשַׂרְכֶם, לְפָנַי, לְפָנֶיךָ, שִׁפְתֵיךָ, בָּנֵינוּ, לְבָבֵנוּ, בְּנֵיהֶם, יָדַי, יָדוֹ, תּוֹרָתָם, יְדֵיהֶן:

יָצָא [1]לוֹט אֶל־[2]הָאֲנָשִׁים הַפֶּתְחָה וְהַדֶּלֶת סָגַר אַחֲרָיו: 2 [3]וְאֵהוּד תָּקַע בַּשּׁוֹפָר בְּהַר אֶפְרַיִם וּבְנֵי יִשְׂרָאֵל יָרְדוּ מִן־הָהָר וְהוּא לִפְנֵיהֶם: 3 הוּא יְהוָה אֱלֹהֵינוּ בְּכָל־הָאָרֶץ מִשְׁפָּטָיו: זָכַר לְעוֹלָם בְּרִיתוֹ אֲשֶׁר כָּרַת אֶת־אַבְרָהָם: כִּי חֶסֶד יְהוָה מֵעוֹלָם וְעַד־עוֹלָם עַל־יְרֵאָיו וְצִדְקָתוֹ לִבְנֵי בָנִים: וַאֲנִי עָלֶיךָ בָּטַחְתִּי יְהוֹה אָמַרְתִּי אֱלֹהַי [4]אָתָּה: מָה רַב טוּבְךָ אֲשֶׁר צָפַנְתָּ לִירֵאֶיךָ פָּעַלְתָּ לַחוֹסִים [4]בָּךְ נֶגֶד בְּנֵי אָדָם: מָה אָהַבְתִּי [4]תוֹרָתֶךָ כָּל־הַיּוֹם הִיא שִׂיחָתִי:

[1] Lot. [2] *pl.* of אִישׁ. See Table of *Irreg. Nouns.* [3] Ehud. [4] Words in *pause.* See § 10. 5.

Your blessings. Her corpse. My commandments. Her lips. Thy words. His face; her face; my face. And his words we heard out of the fire. Thy law *is* in my heart *O* my God. God has redeemed his holy *ones.* He went down to-Sheol unto his sons. The Cherub put out his hands. Thou hast heard my voice out of thy temple. We sat before her. The words of thy (*f.*) lips *are* as the sand which *is* upon the shore of the sea. He came and in his hand a sword. Very good *are* the proverbs of his lips. We have sold our asses. Ye *are* my sons and my daughters saith (*perf.*) your God. My heart *is* in his law continually. I have kept all his commandments. Thou hast kept their heart, *O* our God. I have kept your hearts. The day of vengeance *is* in his heart. Thou hast kept my law and my commands. He lifted his corpse upon the ass. Their hearts *are* fat. Thy perfect law. This *is* flesh from my flesh. By (in) all his great prophets.

§ 20. THE VERB.

1. *Root.* The root of a verb is considered to be the 3*rd sing. mas. perf.* of the simple form (15. 2). This form is called *Qal* "light", in distinction from all the other forms,

which are heavy, being loaded by additional inflectional letters.

2. *Tenses.* The verb has not *Tenses* strictly speaking. It has two forms, which express not time but action; the one expresses a finished action, and is called the *perfect*, the other an unfinished action, and is called the *imperfect.*

The perfect action includes all *past tenses* of other languages, such as perfect and pluperfect (indic. and subjunctive), and future perf. The imperfect includes all *imperfect tenses* e. g. present (especially of general truths), the classical imperfect, and the future. The first form is often called the *preterite*, and the second the *future*, but these designations are proper to Tenses and are too limited.

3. *Moods.* Both the perfect and imperfect may be *indicative*; the subjective moods (subjunctive, optative &c.) are generally expressed by the *imperfect* and its modifications (§ 23).

Besides, there is an *imperative* which is also derived from the imperf. And there are two forms of infinitive, called *absolute* and *construct*, the latter being a gerund.

4. *Degrees of the stem idea.* The stem idea or meaning of the verb is presented in *three* conditions or degrees: the Simple, as *to eat*; the Intensive, as *to eat much, often, greedily*; and the extensive or Causative, extending the action over a second agent, as *to make to eat, to give one to eat.*

Each of these three conditions of the stem idea appears in three voices, Active, Passive, and middle or Reflexive, though some parts are now lost. Thus:

Simple.	*Intensive.*	*Extensive* or *Causative.*
act.	act.	act.
—	pass.	pass.
reflexive.[1]	reflex.	—

[1] It is not in strict accordance with the methods of Shemitic grammar to call the Reflexive a voice. The reflexives are considered independent

5. *Conjugations.* What are called in other languages conjugations, do not exist. The various classes of irregular or weak verbs most nearly correspond to conjugations. The above seven parts are all growths of the original simple stem, which undergoes some modification, consonantal or vocalic, to produce them.

6. *Inflection.* Inflection to express person takes place by the connexion of the significant parts of the personal pronoun with the stem (§ 12 and 15. 2); and the third sing. as simplest is taken first, then the second, and finally the first. In an action which is finished rather the action itself than the actor is prominent: hence in the perfect the stem is put before the personal designations. In the imperfect, or action going on, the actor is more prominent, and the personal modification is prefixed.

THE PERFECT.

Sing.		*Plur.*	
3 *mas.*	קָטַל he *killed* &c.	3 *c.*	קָטְלוּ they &c. (וּם = וּ *pl.* of הוּא)
3 *f.*	קָטְלָה she „		
2 *m.*	קָטַלְתָּ thou „	2 *m.*	קְטַלְתֶּם ye (*tem* of *'attem*)
2 *f.*	קָטַלְתְּ „	2 *f.*	קְטַלְתֶּן „ (*ten* of *'atten*)
1 *c.*	קָטַלְתִּי I	1 *c.*	קָטַלְנוּ we

The terminations *tem, ten* are heavy, and, removing the accent, destroy the tone-long vowel in first syllable (§ 6. 2c). Of great importance are the vocalic additions *a i u*, which bring out the peculiarity of the verb, thus:

In verbal inflection with vocalic additions the vowels á ē ō *in the tone syllable are lost,* i. e. *become vocal sh^{e}va* (§ 6. Rem. *c*, p. 17).

---

formations, which may even have a passive; at the same time from the meaning of these forms they not unnaturally take the place of the pass., which they have altogether superseded in Aramean and Ethiopic. The above scheme, therefore, though an accommodation to Western methods, is not altogether without ground even from Shemitic usage.

Uses of the perfect. The Perf. expresses:

a) The Aorist (Past), *he killed.*
b) The Perfect, *he has killed.*
c) The Pluperfect, *he had killed.*
d) The Future Perfect, *he shall have killed.* (See § 46.)

Rem. For *fem. āh*, the original *ath* may occasionally be met with, § 16. Rem. *b*, Deut. 32. 36; and for *t* of 2 *f. s.* occasionally *ti*, § 12. Rem. *b*. esp. in Jer. and Ez., e. g. Jer. 2. 33; 3. 4, 5, also 2. 20 rightly read. Plenary writing in 2 *s. m.*, Gen. 31. 30, Mal. 2. 14. Compare § 31. For *û* of 3 *plur.* *ûn* is found in two or three cases, Deut. 8. 3, 16, Is. 26. 16.—In *pause* קָטַלְתָּ, קָטַלְתָּ &c., § 10. 5.

[1] Moses. [2] Samuel.

Ye did not keep my words. The woman stood before the king. The fire of God fell from heaven. God set (gave) luminaries in the firmament of the heavens. All the fishes of the sea perished in the waters. All the males fell before the sword. The heavens of the heavens are God's (*dat.*) and the earth he has given to the sons of man. Thou hast fallen o (*art.*) city in the heart of the sea. Thou hast kept the hearts of this people from all ill. I kept my tongue

from evil words. These *are* the proverbs of the wise king of Israel. We heard his voice from his temple. Their faces fell. We leant our hands upon her head. The blessing of Jehovah *be* upon thy children (sons). We sat by (upon) the waters of the great rivers. Ye have burnt their city in the fire. Ye have not kept my law and my judgments. She bare to her husband a son to his old age. Ye have forgotten my words and the proverbs of my lips. On the seventh day God rested from the work which he had made.

§ 21. THE IMPERFECT &c.

1. *Imperfect and Imperative.*

	Imperfect.		*Imperative.*
sing. 3 *mas.*	יִקְטֹל	he *will, may* &c. *kill, is, was, killing* &c.	
3 *fem.*	תִּקְטֹל	she „ „	
2 *m.*	תִּקְטֹל	thou „	קְטֹל *kill* thou
2 *f.*	תִּקְטְלִי	thou „	קְטְלִי „ „
1 *c.*	אֶקְטֹל	I „	
plur. 3 m.	יִקְטְלוּ	they „	
3 *f.*	תִּקְטֹלְנָה	they „	
2 m.	תִּקְטְלוּ	ye „	קְטְלוּ *kill* ye
2 *f.*	תִּקְטֹלְנָה	„ „	קְטֹלְנָה „ „
1 *c.*	נִקְטֹל	we „	

2. *The Infinitive.*

Inf. cons. קְטֹל *to kill* (admitting the nominal prefixes and affixes).

Inf. abs. קָטוֹל *to kill* (admitting no prefix and affix).

3. *The Participle.*

Act. Part.	*m.*	קוֹטֵל or קֹטֵל	*pl.*	קֹטְלִים *killing*
	f.	קֹטֶלֶת or קֹטֶלֶת	*pl.*	קֹטְלוֹת „
Pass. Part.	*m.*	קָטוּל	*pl.*	קְטוּלִים *killed*
	f.	קְטוּלָה		&c.

Uses of the Imperfect. The Impf. expresses:

a) The Present, *he kills* (especially of general truths).
b) The Imperfect, *he killed* (particularly of repeated past acts).
c) The Future, *he will kill.*
d) The Potential, *he may* or *can kill, might, could, would* &c. *kill* (See § 46).

Rem. *a.* The abstract noun which appears as *infin. cons.*, may be considered to lie at the root of the impf. and the imper. The prefixes and affixes are fragments of the personal pronouns, though rather more obscured than in the perfect. The terminations יִ— and וּ— are probably worn down from יִן— and וּן—. The latter is still common, both in 2 *pl.* and 3 *pl.*, Gen. 18. 28, 29; 32. 20, Ex. 9. 29. The termination וּן— has the *tone*; in pause the preceding vowel is often lengthened, Josh. 4. 6, Ru. 2. 9. In 2 *f. s.* יִן— occurs seven times, always with *tone*, 1 Sam. 1. 14, Ru. 2. 8, 21; 3. 4, 18, Is. 45. 10, Jer. 31. 22.

Rem. *b.* The imper. is the impf. stript of the pronominal prefixes. It has only 2nd pers., and has recourse to the impf. for all others. The first syllable of imper. is half open. (§ 6 Note, p. 17.) *Fem. pl.* is sometimes written defectively, Ru. 1. 9, Gen. 4. 23, Ex. 2. 20, so in impf. Gen. 27. 1; 30. 38; 33. 6.—In pause the original vowel of sing. returns, Zech. 7. 9; so in impf. Prov. 8. 15. § 10. 5 c).

Rem. *c.* The Simple Form or *Qal* has two Participles. The Pass. Part. is the only remaining part of the lost Passive.

He left off counting חָדַל לִסְפֹּר
He would not keep לֹא אָבָה שְׁמֹר

Rule. One verb subordinates another to itself in the *Infin. Cons.*, either simply, or more commonly in Prose by the Prep. ל *to.*

to judge שָׁפַט / a judge *part.*	to bury קָבַר / grave קֶבֶר	to watch שָׁמַר / watchman *part.*	to eat אָכַל / food אֹכֶל
to buy שָׁבַר	to steal גָּנַב	to pursue רָדַף	to cut כָּרַת
dead מֵת	lord, husband, Baal בַּעַל		

EXERCISE. TRANSLATE AND PARSE.

אֶשְׁמֹר, לִשְׁמֹר, שִׁמְרוּ, שְׁמֹר, תִּשְׁמֹר, יִשְׁמְרוּ, נִשְׁמֹר, גְּנֹבִים, גָּנוֹב, תִּפְקְדוּ, תִּזְכְּרִי, זְכֹר, כֹּרְתִים, הֹרְשִׁי, רֹעֶשֶׁת, תִּשְׁמֹרְנָה׃

לֹא תְגֻנֹּב׃ 2 לֹא תִשְׁמְרוּ אֶת־מִשְׁפְּטֵיהֶם׃ 3 אֲנַחְנוּ נִכְרֹת עֲצִים
מִן־הָהָר׃ 4 רְדִפוּ אַחֲרָיו׃ 5 אָמַרְתִּי לִשְׁמֹר דְּרָכָי׃ 6 מִשְׁלֵי
הָעָם הַזֶּה׃ 7 מִי יִשְׁכֹּן בְּהַר יְהוָה׃ הוֹלֵךְ תָּמִים וּפֹעֵל צֶדֶק
וְדֹבֵר אֱמֶת בִּלְבָבוֹ׃ לֹא רָגַל עַל־לְשֹׁנוֹ וְחֵרְפָּה לֹא נָשָׂא עַל־קְרֹבוֹ׃
8 בָּא [1]יוֹסֵף מֵאֶרֶץ [2]מִצְרַיִם לִקְבֹּר אֶת־יַעֲקֹב׃ 9 קָבְרוּ אֶת־נִבְלַת
הַנָּבִיא הַזָּקֵן בַּקֶּבֶר אֲשֶׁר אִישׁ הָאֱלֹהִים קָבוּר שָׁם׃ 10 יָרְדוּ בְּנֵי

אֶל־הַר הַכַּרְמֶל וְאֶת־נְבִיאֵי הַבַּעַל וּנְבִיאֵי הָאֲשֵׁרָה אַרְבַּע מֵאוֹת
אֹכְלֵי שֻׁלְחַן [4]אִיזֶבֶל׃ 12 [5]דְּבוֹרָה אִשָּׁה נְבִיאָה הִיא שֹׁפְטָה אֶת־
יִשְׂרָאֵל בָּעֵת הַהִיא׃ וְהִיא יוֹשֶׁבֶת תַּחַת־תֹּמֶר דְּבוֹרָה בְּהַר אֶפְרָיִם׃
13 אָמַר אֱלֹהִים אֶל־[6]אֲבִימֶלֶךְ בַּחֲלוֹם הַלַּיְלָה הִנֶּה אַתָּה מֵת
עַל־הָאִשָּׁה אֲשֶׁר לָקַחְתָּ וְהִיא בְּעֻלַת בָּעַל׃

[1] Joseph. [2] Egypt. [3] See § 10.4. [4] Jezebel. [5] Deborah. [6] Abimelech.

I will pursue after her. I promised (said) to pursue after them. Pursue after me. He set the stars in the firmament of the heavens to rule over the night. Jehovah will judge this people. A city shedding blood like water. In that day I will pour out my spirit upon all flesh. Keep this man. Ye shall keep your hearts from all ill. We have left off counting. They left off counting the proverbs of his lips for they *were* as the sand which *is* upon the shore of the sea. His commandments and his words will we keep. His children (sons) will keep his covenant. Hands shedding[1] blood. But I would seek unto God. He came to shed blood. We will burn your city with (in the) fire. Bury my corpse in the grave where[2] the prophets are buried (*part.*).

§ 22. THE VERB TRANSITIVE AND INTRANSITIVE (ACTIVE AND STATIVE).

(See Paradigm of Regular Verb.)

1. The perf. Qal may end in any of the three vowels *á ē ō*, *á* taking the place of *ā* (§ 6 Rem. *c*). Verbs are named

[1] Verbs and adj. having no dual use the plural with a dual noun.
[2] See Vocab. under "who".

according to these vowels *a, e* and *o* verbs. Verbs ending in *a* are transitive, verbs in *e* and *o* are intransitive, though these terms in Hebrew do not quite correspond to the same terms in the Western languages. The class of intransitive verbs is very wide, embracing words that describe the *condition* of the subject (as *to be full, to thirst, to fear, to love*), even though capable of taking an object after them. The term *Stative* verbs, i. e. verbs of *state*, is used by some grammarians.

Formation of Impf. The Perf. in *á* (Active verb) gives the Impf. in *ō*, קָטַל, יִקְטֹל; the Perf. not in *á* (Stative verb) gives the Impf. in *á*, כָּבֵד, יִכְבַּד.

Formation of Imper. and *Inf. Cons.* The Imper. and Inf. Cons. agree with the Imperf., being in *ō* in Active verbs, and in *á* in Stative verbs. But see Rem. *d.*

Form of the Participle. The Active verb has the Part. of the form קֹטֵל; the Part. of the Stative verb is the same as the Perfect, קָרֵב *drawing near.*

Rem. *a.* The class of Stative verbs is very numerous. It consists of words which express *a*) a bodily or physical state, as *to be great, little, smooth, deep, short, old*, and the like; *b*) an affection of the mind or act of the senses (except *sight*), as *to mourn, rejoice, hate, hear* &c.; *c*) actions intransitive, or actions in which the reflex influence of the action upon the subject is very prominent, as *to die, approach, wear* (clothes), *hew wood* &c.

Rem. *b.* Forms with *ē* express a temporary state, those with *ō* a state permanent, but this distinction is not now observed in verbs, though it is still quite prevalent in the participial adjectives derived from them. Verbs in *ō* do not now number over half a score, but the *ē* verbs are very numerous. Only a very few, however, have *ē* invariably, this vowel being usually sharpened, except when in pause or in the open pretonic syllable, into *á*.

Rem. *c.* The *ō* verbs retain the *ō* throughout the perfect; in *2nd plur.* *ō* becomes *o* by loss of the accent. See Parad.

Rem. *d.* The rule given regarding the agreement of Inf. Cons. with the Impf. is true in theory, but in point of fact the Inf. Cons. even in Stative verbs is generally in *ō*; the number of forms in *a* is now very small in the Strong verb, e. g. שָׁכַב to *lie*, usually, Gen. 39. 10, 14, and others occasionally, Eccl. 12. 4, cf. Prov. 10. 21; 21. 4, Is. 58. 9.

From both types of the Infin. Cons. a *fem.* has been formed, viz. קָטְלָה (*qoṭlāh*) from קְטֹל, and קִטְלָה (*qiṭlāh*) from קִטַל. Both forms are mostly used by Stative verbs. Gen. **24.** 36, Deut. **11.** 22. Comp. §§ 29, 31.[1]

		To be great / become great	גָּדַל		
		to be able	יָכֹל		
		to be sweet	מָתַק		
to be holy	קָדַשׁ	to fear	יָרֵא	to be little	קָטֹן
holy	קָדוֹשׁ	fearing	„	little	„
to be old	זָקֵן	to draw near	קָרַב	to hear	שָׁמַע
to be just	צָדַק	to learn	לָמַד	to be hungry	רָעֵב

I am old זָקַנְתִּי *I know* יָדַעְתִּי *I am able* יָכֹלְתִּי

Rule. In Stative verbs the Perfect usually corresponds to the English *Present.* (See § 46.)

EXERCISE: PARSE AND TRANSLATE.

יָעֵפוּ, תִּשְׁפַּלְנָה, קָטֹנְתִּי, תִּקְטַן, יָכְלָה, יְכָלְתֶּם, אֶשְׁפַּל, לְבָשִׁי, נִכְבַּד, תִּכְבְּדִי, אֶגְדַּל, רָעֵב:

כְּפִירִים רָעֲבוּ: 2 לֹא יָכֹלְתָּ לִסְפֹּר הַכּוֹכָבִים: 3 יִגְדַּל שֵׁם יְהוָה עַד עוֹלָם: 4 קָרַב וּשְׁמַע אֶת־כָּל־הַדְּבָרִים אֲשֶׁר אָנֹכִי דֹּבֵר אֵלֶיךָ:

---

[1] It is interesting to observe that the vowel *a* is characteristic of the Active, *e* (rarely *o*) of the Stative, and *u* (or *o*) of the Passive,—that is, the three Classes of vowels correspond generally to Active, Stative(Neuter) and Passive. In the Perf. Qal the place of the characteristic vowel is in the *second* syll., in most of the other parts it is in the *first* throughout.

In the Active verb the type of the Impf. was perhaps *yaqṭōl* (*yaqṭul*), and in the Stative, *yiqṭal*; but owing to the prevalent thinning of *a* to *i* in the language (§ 2. 1. 1), the syll. *yaq* was pronounced (and of course spelled) *yiq*. In favourable conditions, however, the *a* still remains, as in Verbs 1*st Gutt.*, *Ayin Vav*, and *Ayin Doubled.* The last class is particularly instructive (§ 42).

The original form of the Act. Part. was perhaps קָטֵל, like the Perf., and many of the adjj. of this form may be Participles. The Part. *qôṭel* is a newer formation and has not yet made its way into all verbs. See §§ 40, 41.

5 עַתָּה יָדַעְתִּי כִּי יְרֵא אֱלֹהִים אָתָּה׃ 6 יְהוָה אֱלֹהַי גָּדַלְתָּ מְאֹד
הוֹד וְהָדָר לָבָשְׁתָּ׃ 7 זְכֹר צַדִּיק לִבְרָכָה וְשֵׁם רְשָׁעִים יִרָקָב׃
8 קָרוֹב אַתָּה יְהוָה וְכָל־מִצְוֹתֶיךָ אֱמֶת תִּקְרַב רַגְלַי תִּקְרַב לְדָבֶיךָ׃ 9 לְעֵת
זְקֵנַת [1]שְׁלֹמֹה לֹא דָיָה לְבָבוֹ שָׁלֵם עִם־יהוה אֱלֹהָיו כִּלְבַב דָּוִיד׃
10 יִקְרָא הַמֶּלֶךְ בְּסֵפֶר הַתּוֹרָה כָּל־יְמֵי חַיָּיו לְמַעַן יִלְמַד לְיִרְאָה
אֶת־יהוה אֱלֹהָיו׃ 12 קָדוֹשׁ אַתָּה יהוה אֱלֹהֵי כָּל־הָאָרֶץ לֹא
יִצְדַּק לְפָנֶיךָ כָּל־בָּשָׂר׃

[1] Solomon.

I cannot draw near. I will be great. Draw near. The young-lions shall be hungry (*pause*). The God who made the heavens and the earth I *am* fearing. Ye cannot keep my statutes with (in) all your heart. Thou art little. Hear in order that thou mayest learn to fear the Lord thy God. They are not able to pursue. I am bereaved. I know that thou shalt reign. How should man be just with God! I am sated-with burnt-offerings and the blood of oxen I do not desire; cease to draw near before me for your hands are full of blood (*pl.*). How great art thou *O* Lord! very deep are thy thoughts.

§ 23. THE MOODS. VAV CONVERSIVE.

1. Besides the ordinary imperfect, which expresses the action simply, there are certain modifications of it which indicate the relation of the action to the speaker's will or feelings. The speaker may throw his own feeling into the word in two ways, either by a sharp, hasty utterance of it, thus expressing peremptory *wish*; or on the contrary by a lengthening out of the word, giving expression to the *direction* of the mind or action. The short form that arises in the first way is called the *Jussive*; the other or lengthened form has been named the *Cohortative*.[1]

1) *The Jussive.* The Jussive arises through a contraction of the last syll. of the impf.; but as in the regular verb

[1] Both the Jussive and Cohortative are comprehended by Ewald under the name *Voluntative*; for Cohortative Böttcher prefers to use the term *Intentional.*

this can take place only in *Hiphʿil* (§ 27), the Jussive in all other parts coincides with the ordinary impf.; and in all forms with inflectional terminations the juss. and ordinary impf. coincide. The Jussive is found only in 2d and 3d persons.

The Jussive (as the name implies) expresses *a command*, as יִקְטֹל *let him kill*; or, less strongly, *an entreaty, request* &c.—*may he kill*; or, with a negative, *a dissuasion*, as אַל־תִּקְטְלוּ *do not* (ye) *kill.*

2) *The Cohortative.* The Cohortative is formed by adding the syllable *āh* to the impf. The Cohort. is found (with rare exceptions) in 1st person only.

The Cohort. expresses a *desire* or *intention*, as אֶקְטְלָה *let me kill, I will kill.*

2. *The Emphatic Imperative.* The same termination *āh* is added to the imper. 2. *m. s.* to give it emphasis, as קָטְלָה *Oh kill!*

Rem. *a.* The sharp pronunciation of the impf. (by which the Jussive arose) was probably accompanied by a retraction of the Tone to the penult, with the effect of leaving a short vowel in the last syll. As the Tone, however, could be retracted only under peculiar conditions, e. g. when the penult was open (§ 5 Rem. *a*), the accent usually fell on the last, the vowel of which it made *tone-long* (§ 6. 2 *b*). The only *formal* effect, therefore, of the Jussive (except in verbs ל״ה § 45) was to change the vowels *î* and *û* in 2nd and 3rd *sing.* impf. into *ē* and *ō*.

Rem. *b.* The Emph. Imper. has two forms קָטְלָה and קִטְלָה (*qoṭlāh, qiṭlāh, half open*, § 21, Rem. *b*). The Emph. Imper. appears chiefly in the Irregular Verb (§ 32).

3. *Vav Conversive.* The conjunction וְ *and* is sometimes used not as a mere copulative to join or coordinate clauses, but with a certain subordinating power, so as to indicate that what is now added is the *result* or sequence of the preceding; as, *he spake* and (and so, and thus, then) *it was done.*

The usage is this:

After a simple *perfect* events conceived as following upon this perf. are expressed by the emphatic *vav* joined with

the *imperfect*; and conversely, after a simple *imperfect* the events conceived as following on it are expressed by *vav* with the *perfect*.

As in this usage the *vav* seemed to convert the impf. into the meaning of the perf. and *vice versa*, it was named *vav conversive*. By modern Grammarians it is commonly named *vav consecutive*.

Pointing of Vav with Imperfect. a) When joined to the *Impf.* this strong *vav* is pointed exactly like the *Article* (§ 11), as וַיִּקְטֹל *and he killed*; וָאֶקְטֹל *and I killed*.

b) The Tone is usually retracted from the last syll. to the *penult*, when this syll. is open (Rem. *a* above), as וַיֹּאמֶר *and he said*.

Pointing of Vav with Perfect. a) When joined to the *Perf.* strong *vav* has the pointing of *vav* Copulative (§ 15), as וְקָטַל *and he will kill*; וּקְטַלְתֶּם *and ye will kill*.

b) The Tone is usually thrown forward from the penult to the *last syll.*, as וְקָטַלְתָּ *and thou shalt kill*.

On *usage* of *vav conv.* see particularly the *note* p. 63.

Rem. *a*. As the form with *vav* expresses the speaker's *feeling* of the connexion of what he now states with the preceding, it is natural to suppose that the forms of the Voluntative (Juss. and Cohort.) are those lying at the basis of the Consecutive Tenses.[1]

Rem. *b*. The drawing backward of the Tone in *Vav consec. impf.* very well suggests its connexion with what precedes, and the throwing of it forward in *Vav consec. perf.* suggests its connexion with what follows.

The projection of the Tone is regular in 1st and 2nd *sing.* of Perf., but does not appear in 1st *pl.*, and is not found anywhere in *pause*. It is also avoided when it would occasion the concurrence of two accented syllables, Deut. 14. 26, Am. 1. 4, 7. In weak verbs the rule of projection is subject to modifications.

---

to grow up גָּדַל *st.* to be angry קָצַף to sell מָכַר to burn שָׂרַף
to expire גָּוַע *st.* to take (capture) לָכַד to be sated שָׂבַע *st.* to visit פָּקַד
to לְ to me לִי[2] sign of *acc.* אֵת me אֹתִי[2]

---

[1] This is denied by some. See Driver's *Hebrew Tenses* § 70 foll.

[2] See Table § 49.

Keep thou	שָׁמְרָה, שְׁמֹר	*Do not keep*	אַל־תִּשְׁמֹר
he will keep	יִשְׁמֹר	*he will not keep*	לֹא יִשְׁמֹר
let him keep	יִשְׁמֹר	*let him not keep*	אַל־י׳
I will keep	אֶשְׁמְרָה	*let me keep*	אֶשְׁמְרָה

Rule. The imperative has recourse to the imperf. for all persons except the 2nd, and for the *second* if *negative*. The forms of imperf. adopted will usually be the Voluntative (Juss. and Cohort.).

Draw near that I may judge קְרַב וְאֶשְׁפְּטָה
Draw near that he may judge קְרַב וְיִשְׁפֹּט

Rule. The forms of the Voluntative (Juss. and Cohort.) with simple *vav* express (particularly after an *imperat.*) the purpose or design of a preceding act.

a) *He found the place and lay down* מָצָא הַמָּקוֹם וַיִּשְׁכַּב
b) „ *and did not lie down* וְלֹא שָׁכַב „
c) *he will find the place and lie down* יִמְצָא הַמָּקוֹם וְשָׁכַב
d) „ *and will not lie down* וְלֹא יִשְׁכַּב „
e) *and the man lay down* וַיִּשְׁכַּב הָאִישׁ, וְהָאִישׁ שָׁכַב

Note. Strong *vav* must be united to the verbal form so as to form one expression, if any word intervene then the *other* i. e. the proper natural tense must be employed, *b d e*. Again, the expression must stand *at the head* of the clause and precede the Subject; if the Subject must stand first the converted Tense cannot be used—the *other* simple Tense must be employed, as in *e*. The conversive Tenses are properly used after simple Tenses (see 3 above), but the usage has pervaded the language to such an extent that they may be employed when no simple Tense actually precedes; vav conv. impf. is the usual narrative past tense, and vav conv. perf. the usual expression of *and* with *fut.* action; and in translating into Hebrew *and* with a verb may generally be expressed by the conversive Tense, in particular *vav* as mere copulative should not be used with *perf.*[1]

EXERCISE. TRANSLATE.

אֶשְׁמְרָה תּוֹרָתְךָ תָּמִיד׃ 2 נִכְרְתָה בְרִית אֲנִי וְאַתָּה וְהָיָה לְעֵד בֵּינִי וּבֵינֶךָ׃ 3 אָמַר אַבְרָהָם אֶל־בְּנֵי [1]חֵת מִכְרוּ לִי קֶבֶר וְאֶקְבְּרָה

[1] Heth.

[1] The statements made in this *Note* are perhaps liable to some modification in Poetry; there *vav* may sometimes exert its conversive power though detached from the Verb.

מֵתִי מִלְּפָנָי׃ 4 אַל־תִּקְצֹף יהוה עַד־מְאֹד׃ 5 אַל־תִּקְרַב הַלֹּום כִּי הַמָּקוֹם אַדְמַת קֹדֶשׁ הוּא׃ 6 אָמַר יַעֲקֹב אֶל־עֵשָׂו מִכְרָה כַּיּוֹם אֶת־בְּכֹרָתְךָ לִי וַיִּמְכֹּר לוֹ אֶת־בְּכֹרָתוֹ׃ 7 אָמַר יהוה הֵן הָאָדָם הָיָה כְּאֱלֹהִים [1]יֹדֵעַ טוֹב [2]וָרָע וְעַתָּה פֶּן־[3]יִשְׁלַח יָדוֹ וְלָקַח מֵעֵץ הַחַיִּים וְאָכַל [2]וָחַי לְעֹלָם׃ 8 וְהַמַּיִם גָּבְרוּ מְאֹד מְאֹד עַל־הָאָרֶץ וַיִּגְוַע כָּל־בָּשָׂר הָרֹמֵשׂ עַל־הָאָרֶץ בָּעוֹף וּבַבְּהֵמָה וְכֹל הָאָדָם׃ 9 וְהָיָה בָּעָם בַּכֹּהֵן וּפָקַדְתִּי עָלָיו מַעֲלָלָיו׃ וְאָכְלוּ וְלֹא יִשְׂבָּעוּ כִּי אֶת־יהוה עָזְבוּ לִשְׁמֹר׃

[1] See § 8. 1. [2] Conj. *vav* in *pretone* § 15. 1 *d*. [3] Impf. of שלח.

Thou shalt not lie down in that place. Let me lie down. Do not (ye) draw near. May the Lord judge between me and (between) this people. Oh hear my prayer *O* Lord! Let us draw near unto the Lord that he may judge between us. Sell to me this cave that I may bury my dead there. The man ate of the tree which *was* in the garden and God was very angry. And the calf I took and burnt it[1] with (in the) fire. Thus saith (*perf.*) the Lord: Behold I will-give (*part.*) this city into the hand of the king of Bābel, and he will burn it[1] with fire. Sārāh bare to her husband a son, and the boy grew up. And God called the light (*dat.*) day and the darkness he called night. And the children of Israel forgot the Lord their God and he sold them into the hand of the king of Mô'āb. And thou shalt keep his law continually. And I remembered his words.

§ 24. SCHEME OF THE REGULAR VERB.

	simple.	*intens.*	*caus.*	*simp.*	*intens.*	*caus.*
act.	qal	piʿēl	hiphʿîl	פָּעַל	פִּעֵל	הִפְעִיל
pass.	—	puʿal	hophʿal	—	פֻּעַל	הָפְעַל
refl.	nîphʿal	hithpaʿēl	—	נִפְעַל	הִתְפַּעֵל	—
				קָטַל	קִטֵּל	הִקְטִיל
				—	קֻטַּל	הָקְטַל
				נִקְטַל	הִתְקַטֵּל	—

[1] אֵת with suffix § 49.

1. The names *simple, intensive* &c. have been explained § 20. 4.

2. The word פָּעַל *to do* formed the paradigm of the original grammarians. Now the language, possessing no general terms like *reflexive*, *intensive act.*, and such like, made use of the parts of this verb that were *simple reflex.*, *intens. act.* and the like, as *names* for the same parts in all verbs. Thus the *intens. act.* of *Pāʿal* is *Piʿēl*; hence instead of speaking of the *intens. act.* of a verb we speak of its *Piʿēl*; instead of saying *caus. act.* we say *Hiphʿîl* &c.;— much as if we should speak of the *amabo* of a Latin verb for the *fut. act.* &c.

The use of פָּעַל as a Paradigm is inconvenient for a learner, because, its second radical being a guttural, the characteristics of several of the parts, such as the intensive, are obscured; hence the word קָטַל (though poetical and defective), is generally used in modern grammars.[1]

3. "Intensive" means that which is increased *within*, and to express intensity the middle radical of the verb is doubled. "Extensive" or causative means what is increased *without*, and to express the causative a syllable is attached to the outside.

WORDS FOR PRACTICE ON THE ABOVE SCHEME.

to write	כתב	to be great	גדל	to be heavy	כבד	to steal	גנב
to rule	משל	to pursue	רדף	to govern	מלך	to visit	פקד
to sell	מכר	to take	לכד	to speak	דבר	be holy	קדש

§ 25. THE SIMPLE REFLEXIVE OR *NIPHʿAL*.

The Niphʿal is formed by prefixing to the stem the syllable *hin* having reflexive force. This syllable is contracted to *n* in the *perf.* and *part.* and one form of the *infin.*, but appears entire in the *impf.* and parts connected.

[1] The learner must not use קָטַל in Prose composition for "kill". The word is rare in Heb. and in use only in Poetry.

perf. נִקְטַל *part.* נִקְטָל *infin. abs.* נִקְטֹל and (=הִנָּקְטֹל)
infin. cons. and *imperat.* (=הִנָּקְטֵל) הִקָּטֵל
imperf (=יְהִנָּקְטֵל=יְהִקָּטֵל) יִקָּטֵל

In meaning the Niphʿal is properly the reflexive of the simple form or Qal, as שָׁמַר *to keep*, נִשְׁמַר *to keep oneself, to beware*; but the common use of Niph. is as *passive* of Qal, as שָׁבַר *to break*, נִשְׁבַּר *to be broken.*

Rem. *a*. The *i* of first syll. is probably a thinned *a*. Occasionally, in parts connected with the imperf., *a* takes the place of *ē*, particularly in the fem. and in pause, וַיִּגְמַל Gen. 21. 8; 10. 9, Ex. 31. 17.

Rem. *b*. Infin. abs. נִקְטֹל is chiefly used in combination with *perf.*, Gen. 31. 30, Jud. 11. 25, 1 Sam. 20. 6, 28; sometimes it is of form of inf. cons., Deut. 4. 26 (Is. 7. 4?), 1 K. 20. 39. The parad. shews that in impf., imper. tone may be retracted, Gen. 24. 6; 25. 21; Ex. 23. 21; inf. cons. Job 34. 22.—In a few cases the initial *he* of inf. is elided with prep., Is. 1. 12, Ex. 10. 3, Ez. 26. 15, Prov. 24. 17.

Rem. *c*. With the passage of reflex. into pass. compare the identity of pass. and deponent in Lat. and of pass. and middle in Greek, and the great disuse of pass. in modern languages, as It. *non si fa*=non fit, or fieri potest. The reflex. sense may pass into the *middle*, as נִשְׁאַל *to beg*, or *reciprocal*, as נִשְׁפַּט *to litigate.*

EXERCISE. TRANSLATE.

נִשְׁמָר, הִשָּׁפֵט, נִפְקַדְתֶּם, אֵשֵׁב, נִכְתְּבוּ, נִשְׁפְּטָה, לְהִמָּלֵט, יִשָּׁקֵל, וַתֵּלַחֲמִי, נִלְחַמְתִּי, תִּזָּכֵרְנָה:

הָרְשָׁעִים לֹא יִכָּתְבוּ בְּסֵפֶר חַיִּים: 2 הַפַּח נִשְׁבָּר וַאֲנַחְנוּ נִמְלָטְנוּ:
3 יַתְשָׁחֵת הָאָרֶץ לִפְנֵי אֱלֹהִים וַתִּמָּלֵא הָאָרֶץ חָמָס: 4 שֹׁפֵךְ דַּם
הָאָדָם בָּאָדָם דָּמוֹ יִשָּׁפֵךְ: 5 וַיִּגְדַּל הַיֶּלֶד וַיִּגָּמַל: 6 נִגְרַשְׁתִּי
הַיּוֹם מֵעַל פְּנֵי הָאֲדָמָה וּמִפָּנֶיךָ אֶסָּתֵר: 7 וַיְגָרֵם יְהוָה כִּי עָשָׂה

אֶת־הָאָדָם בָּאָרֶץ׃ 8 לֹא יִכָּרֵת עוֹד כָּל־בָּשָׂר מִמֵּי הַמַּבּוּל׃ 9 בָּא
הָאֹרֵב אֶל־הָעִיר וְלֹא יָכֹל לְהִמָּלֵט עָלֶיהָ׃

Jehovah is near to the broken of heart. I am hidden from the face of Jehovah. Hide thyself from his face. Ye shall hide yourselves on that day. Thou shalt escape from his hand. And the earth was corrupted and all flesh was cut off by the waters of the flood. The arms of the wicked shall be broken. And their city was burnt with fire. Let me escape in the day of fighting (*inf. cons.*). And the earth was filled with blood (*acc.*). His dead was buried out of his sight.[1] Thus saith (*perf.*) Jehovah the God of Israel: Behold I give (*part.*) this city into the hand of the king of Babel and he shall burn it with fire, and thou shalt not escape from his hand but shalt be captured and shalt be given into his hand. Beware lest thou make a covenant with (*dat.*) the inhabitant of the land, and take of his daughters to thy sons.

[1] *From before him.*

§ 26. THE INTENSIVE ACT., PASS. AND REFLEX., *PI'ĒL* &c.

The Intensive is naturally formed by doubling, both in verbs and nouns, the middle stem-letter.

1. *The Pi'ēl.* Pi'ēl is properly intensive of Qal, that is, it adds such ideas as *often, much, for a long time* &c. to the simple idea of the verb, as שָׁבַר *to break,* שִׁבֵּר *to break in pieces;* or it implies that the action of the verb is done *by many* or *to many*. Sometimes when the Qal is intransitive the Pi'ēl becomes causative, as לָמַד *to learn,* לִמֵּד *to teach*

2. *Pu'al.* Pu'al is the proper *passive* of Pi'ēl in its various senses.

3. *Hithpa'ēl.* The Hithpa'ēl is formed by prefixing the syllable *hith,* having reflexive force, to the root-form of the Pi'ēl, as קִטֵּל, הִתְקַטֵּל.

When the syllable *hith* precedes the sibilants ס, שׁ, שׂ the ת changes places with the sibilant, as הִשְׁתַּמֵּר for הִתְשַׁמֵּר; with צ the ת further becomes ט, as הִצְטַדֵּק from צָדַק.

With unsibilant dentals the ת is assimilated, as הִטַּהֵר for הִתְטַ.

In meaning Hith. is properly reflexive of Piʿēl, as קִדֵּשׁ *to sanctify*, הִתְקַדֵּשׁ *to sanctify oneself;* but it very often implies that one *shews himself as,* or *gives himself out as* performing the action of the simple verb.

Rem. *a.* The *i* in first syll. of Piʿēl is a thinned *a*, cf. Gen. 41. 51; *a* appears in parts after the perf. The final *ē* appears as fixed sound only in imperf. and connected parts; the perf. has often *a*, probably the real vowel of the form, שִׁלַּם Jud. 1. 7. In a very few verbs *e* (*ṣᵉghol*) appears in *perf.*, דִּבֶּר *to speak*, כִּבֶּס *wash*, כִּפֶּר *atone.*

The infin. abs. is generally of form *paʿēl* like cons. Ex. 21. 36, Jer. 12. 17, but cf. Ps. 118. 18. In some cases first syll. retains the *i*, Lev. 14. 43, 2 Sam. 12. 14, Jer. 44. 21 &c.—Inf. *fem.* Lev. 26. 18, Is. 6. 13, Ez. 16. 52.—With *vav conversive* Piʿēl is pointed וַיְקַטֵּל § 11. Rem. *a*, no *Dag.* in *Yod.* Cf. § 7, 4, Note *a.*

Denominatives are often formed in the Piʿēl, as עָפָר *dust*, עִפֵּר *to cast dust.*

Many verbs are found in Piʿēl of which the Qal does not occur.

In *Pu. o* may appear for *u*, Ez. 16. 4, Ps. 72. 20; 80. 11, Ex. 25. 5. In *part. Pu.* initial *m* in a few cases falls away, Ex. 3. 2, 2 K. 2. 10 (Ez. 26. 17 is *perf.*).

Rem. *b.* The syllable *hith* is a stronger reflexive prefix than *hin*, and the Hithpaʿēl less commonly has the passive sense. It has even a pass. of its own in a few cases. Naturally it has *reflexive* sense, Gen. 42. 1.

As in Piʿēl the final vowel may be *a*, Deut. 1. 37; 9. 8.

Rem. *c. Other forms of intensive.* Though the intens. is most naturally formed by doubling the middle consonant, it may be formed in other ways analogous:—

1) By doubling the last stem-letter, *piʿlēl* (*piʿlal*), *puʿlal*, *qiṭlal*, *quṭlal*, as שַׁאֲנַן *to be quiet*, Jer. 48. 11, Job 3. 18; pass. אָמְלַל 1 Sam. 2. 5, Is. 19. 8, Hos. 4. 3 (Ez. 28. 23, Ps. 88. 17 may be textual errors).

2) By doubling the last two letters, *pᵉʿalʿal*, *qᵉṭaltal*, as סְחַרְחַר *to palpitate, pass.* חֲמַרְמַר *to be much inflamed.* Ps. 45. 3, § 44.

3) In some stems as *Ayin Vav* and *Double Ayin* §§ 40. 42 doubling the last two letters is equivalent to doubling the whole word (with omission of the weak letter), *pilpel:* as עוּף *fly*, עַפְעֵף *flutter*, גַּל *roll*, גַּלְגֵּל *whirl*, כַּלְכֵּל *sustain*, *pass.* כָּלְכַל (kolkal) from כּוּל, comp. *click-clack*, *dingdong.*
